The New Jersey team have an engagement with the Georgia team made at the same time as that with the District of Columbia team, to visit Savannah, Ga., in February. It is said that a large delegation headed by Gov. Werts will accompany the team to Savannah.

### Cincinnati Rifles.

CINCINNATI, Oct. 21.—Cincinnati Rifle Association's regular practice shoot. Conditions 200yds., off-hand, at the standard target:

| R H Duff....247 | Wm Hughes....234 | S P Thompson....229 |
| J W Hennessey....243 | Jas Hughes....230 | J Binns....224 |
| L P ansen....242 | | |

### The Zettler Club Season Shoot.

ON Oct. 21 the Zettler Club held the last of the series of its bimonthly shoots at Cypress Hills for the season 1894. The scores made by the members present on this occasion were published in last week's issue. Appended we publish a summary of the scores made by the members who shot through the season and participated in the distribution of the prizes, which took place at headquarters on Tuesday night of last week.

The programme called for $150 divided into fifteen prizes as follows: Ring target—For the best 50 scores, prizes of $25, $20, $18, $15, $12, For the best 35 scores, prizes of $10, $9, $5, $5. For the best 25 scores five prizes of $5 each.

Bullseye target—Each member is entitled to three shots on the bullseye target. After having finished five scores on the ring target, he is entitled to three shots on the bullseye target for a fine trophy, presented by C. Wissel. The shooter having the best single shot on the bullseye target will be presented with the trophy at the end of the season.

For simple practice shooting the above programme was most liberal and it was expected that it would have the effect to draw out the shooting element and keep it interested in the shoot throughout the season. But beyond a few of the regulars the members did not take but little interest in the programme. Of those who did participate only twelve members shot out the required numbers of scores necessary to entitle them to the prizes.

The few enthusiasts in the club who shoot for the love of it took advantage of the opportunity offered them, and as each shooting day came around they made the pilgrimage to Cypress Hills, where they shot their scores, discussed the rifle and enjoyed the hospitalities of mine host Wissel.

Those who followed the shoot through to the end of the season have stored away a large fund of pleasant incidents, which will be brought forth again during the coming winter in the Zettler "den." Of the twelve men whose scores are recorded in the appended list one at least is deserving of special notice. We refer to Fred. C. Ross. During the season he shot 72 scores of 10 shots each. His average is of such unusual excellence that we append them in detail for the benefit of our readers. Of the many expert riflemen whom we have met in the past fifteen years we can recall no one who has reached this high average. Although shooting under "Schuetzen" rules, he does not use the palm rest, but uses the body rest, with his rifle resting upon his fingers. His rifle is a Ballard action with a Schalk barrel (.32-40cal.), using a lubricated bullet loaded from the muzzle. The rifle weighs about 12lbs. The following are the full list of scores (72) shot by Mr. Ross during the season:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| F C Ross | 233 | 238 | 228 | 200 | 229 | 227 | 229 | 225 | 218 | 219 | 225 | 223 |
| | 229 | 232 | 225 | 220 | 232 | 219 | 221 | 224 | 224 | 221 | 226 | 233 |
| | 230 | 229 | 218 | 219 | 219 | 225 | 226 | 223 | 231 | 225 | 229 | 218 |
| | 217 | 229 | 236 | 232 | 222 | 223 | 228 | 224 | 228 | 225 | 205 | 205 |
| | 231 | 216 | 228 | 225 | 235 | 230 | 228 | 225 | 224 | 220 | 223 | 223 |
| (Average 224.9) | 228 | 220 | 219 | 226 | 226 | 223 | 224 | 226 | 220 | 222 | 214 | 233—16195 |

Ross' average for his best 50 scores, 227.6, placed his competitors far in the rear. Henry Holges, the second man on the list, was also well in the lead of his followers. The third and fourth men, Plaisted and Hansen, had a close race between them for their relative positions. Plaisted's margin over Hansen of three points on a total of 10,764, was decidedly narrow. The next two men on the list, Busse and Engel, had a close race for the fifth position. Busse's total for the 50 scores was 10,588 and Engel's 10,581. The margin of 7 points set Engel back into the 35-score class. Of the other competitors each held his position with a fair margin.

The competition for the Wissel trophy on the bullseye target was carried on through the season, many of the members making more or less center shots. On Oct. 21, when the last man in the competition had finished his scores, the bullseye box was broken open and the bullseyes measured to find the best center shot. The measurement developed the unusual circumstance of two of them measuring exactly the same. The two cartons in question belonged one to L. P. Hansen and the other to Geo. W. Downs. Another peculiar circumstance was that while Hansen had many cartons in the box, Downs had only one, and his one shot had accomplished as much as Hansen's many. Downs not being present when the cartons were measured, the final disposition of the Wissel trophy was left to be decided at the opening of the winter gallery shoot of the club, which was to be held on the following Tuesday night, the report of which appears in another column under the heading "The Zettlers in Winter Quarters." ### Schlicht Rifle Club.

WEST NEW YORK, N. J., Oct. 24.—The Schlicht Rifle Club held its weekly shoot for class medals at headquarters, Oct. 23. Scores: G. Schlicht 239, C. Meyer 231, P. Man 200, H Aufderheide 220, G. Dorr 239, J. Schlicht 228, F. Lambrix 231, G. Reichert 224, A. Meyer 220, Conrad Schlicht 221, Wm. Schlicht 216, Capt. J. Dedrick 222, J. Diehl 229, Wm. Marrs 204. Medal winners: G. Dorr, champion medal; J. Diehl, first class medal; F. Lambrix, second class medal; C. Meyer, third class medal.

FRED. LAMBRIX, Secretary.

### The Zettlers in Winter Quarters.

ON Tuesday night of last week the members and many invited guests of the Zettler Rifle Club met in the headquarters of the club for the purpose of inaugurating the gallery season shoot of 1894-5. A visit to the headquarters on the night in question found these large and roomy quarters well filled with many of New York's most prominent rifle enthusiasts. Among the many familiar faces to be seen were Dr. E R. Chadbourne, Maj. Geo. Shorkley, Col. Litchfield (retired), U. S. A., A. C. Gould, editor *Shooting and Fishing*, and Mr. Maynard, assistant editor; Aug. J. Christian, Chas. C. Wissel, L. P. Hansen, John H. Brown, inventor of the Brown wire gun, and others unknown to the scribe. The order of exercises for the evening called for the opening of the winter shoot, the distribution of prizes from the season's shoot at Cypress Hills to the lucky winners, also the settlement of the tie between Messrs. Hansen and Downs for the Wissel trophy. Interspersed with the above was the "caviar," without which our German-American schuetzen is not himself. President Barney Walther was on hand with his usual supply of enthusiasm.

R. Busse, one of the live members of the club, anticipating the pleasures of the occasion, introduced a quartette of male singers, artists in their profession, who were a decided feature in the evening's entertainment. During the evening Major Geo. Shorkley's enthusiasm over the Zettler Rifle Club became so pronounced that he expressed a desire to become one of the "Guild." The Major's desire was quickly responded to by the president calling a special meeting, when the old veteran was given the third degree in the order of "Zettlers." The matter of the tie between Messrs. Hansen and Downs for the Wissel trophy was brought to a decision by the two gentlemen agreeing to shoot it off in the gallery, one shot each, at a 4in. carton, muzzle rest, the best center shot to take the trophy. Hansen led off, making almost a center. Downs was not so fortunate, his shot being so far from the center that it was not necessary to bring the measuring machine into play to make a decision.

Following the shooting off of the tie between Hansen and Downs came the presentation of the trophy to the winner, also the cash prizes from the Cypress Hills shoot to the winners thereof. The ceremony was celebrated by President Walther; as each member was called up to receive his prize the president prefaced each presentation with a flow of English that can only be found in B. Walther's "unabridged." It brought down the house, the president would have been encored surely, could there have been more candidates for prizes produced.

While some of the members were engaged in entertaining the guests others were engaged in shooting and many good scores were the result. The best score of the night was shot by M. Dorrler, who made 248 out of a possible 250. F. C. Ross was second with 247. It was long after midnight before the evening's sport was brought to a close. In the shoot for the champion trophy for the highest score on the first entry the honor fell to F. C. Ross with 244. The five best scores were made by:

| | | | | | |
|---|---|---|---|---|---|
| F C Ross (first)....244 | 243 | 244 | 246 | 247 |
| H Holges (second)....243 | 243 | 245 | 243 | 246 |
| M Dorrler (third)....240 | 242 | 243 | 248 | 242 |

Best single scores: M. Dorrler 248, F. C. Ross 247, M. B. Engel 246, H. Holges 246, B. Zettler 245, J. H. Brown 245, Dr. Chas. Grosch 243, H. D. Muller 243, C. G. Zettler 243, G. W. Plaisted 242, Gus Nowak 242, Louis Flach 142, L. P. Hansen 241, R. Busse 240, Ph. Feigel 239, J. Blumenberg 237, B. Walther 237, Ph. F. Schmidt 236, A. Klein 236, H. Murnz 231, S. Buzzini 231, G. W. Downs 229.

Champion medal, first entry: Busse 234, Blumenberg 234, Downs 221, Dr. Grosch 229, Holges 243, Muller 241, Plaisted 235, Schmidt 233, C. G. Zettler 240, Murnz 162, Buzzini 229, Dorrler 240, Engel 238, Feigel 235, Hansen 223, Klein 221, Nowak 239, Ross 244, Walther 237, B. Zettler 238.

## RIFLE NOTES.

A MEETING of delegates representing the societies in the National Shooting Association of the United States of America (Nationaler Schuetzen Bund der Staaten von Amerika), was held at headquarters, 12 St. Mark's place, on Friday night of last week. President William Weber, on behalf the executive committee, gave a brief history of its labors during the past three months. The principal feature of the report was the reading of the contract which secures the Glendale Park, Long Island, to the association from June 30 to July 8, 1895, for the great national festival. Monthly meetings of the delegates will be held on the last Friday of each month up to the date of the festival. Programmes (English) containing the constitution, by-laws and prize list will be issued within a few weeks. All rifle clubs and associations in the United States and Dominion of Canada will be eligible, and are requested to join the association (Bund) and participate in the coming festival.

The individual champion match, which takes place next Tuesday (Election Day) in Cypress Hills Park, is going to be a great success. The entries are coming in fast. Up to Saturday of last week the three States of New York, New Jersey and Connecticut were represented by the entry of some of their most expert marksmen. Should the weather on Tuesday be fine there will undoubtedly be a large gathering of the lovers of the rifle present to witness the contest.

Some days since it was our pleasure to meet one of the good old has beens (ex-riflemen) who was present at the champion match last year as a spectator. He said: Say Plaisted I am going to be on hand again this year; wouldn't miss it for the world. As we started to walk away the old fellow obstructed our further progress with the exclamation, Hold on! I forgot to enquire is that man Wissel going to get up another one of them deer dinners? We assurred the O-F, that the dinner would be forthcoming with doubt. He departed with a smile of anticipation born of previous experience.

The New York Schutzen Corps opened its winter gallery practice on the Zettler Galleries on Tuesday night. The success of the corps gallery shoot last season has generated a decided interest in the members to participate in the shoot this season. The many improvements which have been made by the Zettler Brothers since last season make their gallery a most inviting place for a rifleman to devote an evening.

During a visit to Zettlers one evening we had the pleasure to meet that old rifleman and inventor, John H Brown. He had just returned from Newport, R. I where he had been a witness to some of the experiments of the Naval Bureau with the new naval rifle (236 calibre.) He says the power of this little rifle is almost past belief. It has the power to penetrate two ¼in. steel plates and almost go through the third. Mr. Brown exhibited one of the bullets (135 grs. wgt.) that had been shot through 54in. of dry pine wood. The shape of the bullet was uninjured by its passage through this mass of wood. Mr. Brown informed us that he saw one of these bullets with the shell loaded with 30grs Rifleite penetrate 23in. of dry white oak. If this small calibre and its light bullet will accomplish so much, of what advantage are the larger calibres?

We are pressed on every hand by inquiring riflemen with the query as to why our manufacturers have not got a target rifle on the market adapted to smokeless powder. We confess our inability to solve the problem. It has taken years of experiment to adapt nitro to the shotgun, and in all probability there will be considerable further time exhausted before the same success will be reached in the rifle.

We would suggest to some of these inquiring riflemen a private field of experiment for their own amusement. Buy a single loader Winchester rifle 25-20, reinforce the shell inside with brass tubing so that it will hold from 8 to 12grs. nitro (wgt), then have a bullet mould (cannelured) made, the bullet to fit the barrel loose; give the bullet an electro-photo coating of copper or soft metal to bring it up to the proper fit. We have made some personal experimeuts with the Ballard .38 55 on the lines suggested above with considerable success. But we would not advise any one to follow us using the Balard action or any other of the old-style actions of the same strength. The Winchester .25-20, however, has the requisite strength to hold all the power that can be generated in the shell and with the necessary experimenting to adjust the powder charge to the bullet and *vice versa*, we believe one can accomplish results that will be quite satisfatory. The experimentor must not expect to land his bullets in one hole at 200yds, otherwise our suggestion will not have been made in vain. This rifle loaded with the factory (black powder) ammunition will just about keep the shots in a 12in. black at 200yds., shooting from a rest.

The Bennett Brothers, W. W. and T. E., paid a visit to New York last week. They came on to participate in the tournament of the Emerald Gun Club, at Dexter Park. Some years since these gentlemen were prominently before the public as experts with the pistol and revolver. T. E. Bennett gained great prominence by his defeat of old Champion Ira Payne, in a series of revolver matches a few years before his death. The Bennetts have been out of revolver practice for some time. F. E informed us that he had hardly looked at his in the past three years.

A galley match, 100 shots, will be shot between G. G. Williams, of the Excellsiors and Geo. Oberst, of the Essex Indians, on Thusday night, Oct. 1.

### Greenville Rifle Club.

GREENVILLE, N. J., Oct. 27.—The Greenville Rifle Club held its weekly gallery shoot at headquarters last night, 16 members participating. Scores: First class—C. Boag 231, J. Boag 238, Purkess 240, Collins 240, Robidoux 232, Dorrler 240. Second class—Agneau 234, Chavant 230, Charlock 234, Spahn 235, Gotthardt 217, Chase 238. Third class—Graef 26, Hill 229, Holzapfel 230.

### On the Marion Rifle Range.

On Monday of last week there was a large gathering of local riflemen at the Marion, New Jersey rifle range to witness a series of team and individual matches. One part of the programme was a match between L. P. Hansen of the Excelsior Club and John Rebhan of the Hudson Club, 50 shots each. The weather conditions were fine. In a previous match between these two marksmen which was shot two weeks ago Rebhan won by one point on a score of 1012 against 1011 for Hansen.

The narrow margin of the previous match was the means of developing considerable interest on the part of the friends of the contestants as to the outcome of the second match. The first ten shots in the second match showed Hansen to be in good form while Rebhan seemed to laboring under difficulties. Hansen made 1070 points in his score against 1010 for Rebhan. The Excelsior contingent returned to Jersey City highly elated over the success of their champion. Scores:

| | | |
|---|---|---|
| John Rebhan | 22 16 17 22 22 18 22 19 17 22 | —197 |
| | 23 21 18 19 24 21 23 19 19 18 | —205 |

| | 23 13 20 17 19 22 21 17 10 19 | —181—1010 |
| L P Hansen | 23 22 2' 19 24 24 22 21 23 22 | —222 |
| | 20 24 23 24 25 20 19 25 24 17 | —221 |
| | 22 23 21 21 21 23 17 12 20 24 | —203 |
| | 19 21 23 19 23 23 20 24 21 21 | —214 |
| | 21 16 21 21 25 21 20 23 18 25 | —210—1070 |

While the Hansen-Rebhan match was in progress a team match was shot off between Mahlenbrock and John Rebhan against Capt. A. Braun and A. Malz, 50 shots per man, Mahlenbrock and Rebhan won by 11 points. Scores:

| | | | |
|---|---|---|---|
| Mahlenbrock | 926 | Braun | 981 |
| Rebhan | 1010—1936 | Malz | 944—1925 |

## Trap-Shooting.

**All ties divided unless otherwise reported.**

**If you want your shoot to be announced here send in notice like the following:**

### FIXTURES.

Nov. —.—Peoria, Ill.—Peoria Target Company's tournament. Everybody invited, experts handicapped.

Nov. 6.—Rye, N. Y.—Rye Gun Club's all-day shoot, commencing at 9 A. M.; live birds and targets. E. J. Pope, Sec'y.

Nov. 7-8.—Coffeeville, Kan.—Two days' shoot of the Coffeeville (Kan.) Gun Club.

Nov. 9.—New London, Conn.—Eighth tournament of Connecticut Trap-Shooter's League, under auspices of Thames Gun Club. James W Clinton, Sec'y.

Nov. 13-15.—Chicago, Ill.—Brewer-Carver series of three 100 live bird matches for the world's championship; $100 a side each race.

Nov. 17-18.—Esizabeth, N. J.—Two days' shoot of the Elizabeth Gun Club; first day, targets; second day, live birds.

Nov. 28.—Central New York Trap-Shooters' League, eighth tournament, at Syracuse.

1895.

Jan. 1.—Newark, N. J.—Fifteenth annual New Year's Day tournament of the South Side Gun Club. W. R. Hobart, Sec'y.

Jan. 17-19.—Hamilton, Canada.—Hamilton Gun Club's annual tournament; $1,000 added money. J. W. Bowman, Sec'y.

April 3-5 —Willard Park, Paterson, N. J —Interstate Manufacturers' and Dealers' Association's third annual grand American handicap at live birds, at New York; $1,000 guaranteed, all surplus added.

May 14 16.—Dayton, O.—Ohio Trap-Shooters' League annual meeting and tournament under the auspices of the Buckeye Gun Club, of Dayton, O. Ed. Taylor, Sec'y, 8 West Third street, Cincinnati.

May 21-24 —Knoxville (Tenn.) Gun Club's fourteenth annual tournament; $1,500 added to the purses.

June 4 7.—Memphis, Mo.—Memphis Gun Club's annual tournament; $2,000 added money.

June 19-21.—Cleveland, O.—Chamberlain Cartridge and Target Company's second annual tournament; $1,200 in cash added.

Aug. 29 31.—Hot Springs, S. D.—Hot Springs Gun Club's second annual tournament.

Oct. 3-6.—Pennsylvania State Sportsmen's fifth annual tournament, under the auspices of the Keystone Shooting League of Philadelphia. John C. Shallcross, Sec'y, Frankford, Pa.

## DRIVERS AND TWISTERS.

*Club secretaries are invited to send their scores for publication in these columns, also any news notes they may care to have printed.*

The shoot for the Riverton Challenge Plate originally set for Tuesday, Oct. 30, has been postponed until after the quail shooting season has gotten well under way. The challenger is Mr. J. S. Dando of Philadelphia, probably the strongest opponent Mr. Welch has had to meet in defense of the trophy.

Mr. Noel E. Money of the American E. C. Powder Company, is busy preparing for a hunting trip to Nebraska. He leaves New York for Omaha on Nov. 7.

Oscar Hesse, of Walsrode fame, starts for Germany on Nov. 7. Mr. Hesse hopes, if all goes well, to reach the Fatherland in time for the Emperor's annual hunt, and to take an active part in the second day's sport among the wild boar and deer himself. Mr. Hesse's brother is chief forester to the Kaiser.

There is some talk about a match at live birds between Frank Class and T. W. Morfey of Paterson, N. J. Morfey has several matches now on his hands; one with Eddie Hill in the middle of November and a series of three 100-bird races with W. G. Clark of Pennsylvania the latter part of December.

Those two birds dropped by Jack Brewer in his last series of five during the Empire City Handicap on Thursday of last week cost him just $50; that is the difference between what his one-fourth of first money would have been and the portion of third which he actually received; just $25 a bird.

The Coffeevillee (Kan.) Gun Club will hold a two-days' shoot on their grounds at Coffeevillee on Nov. 7 and 8.

The eighth tournament of the Connecticut Trap-Shooters' League, which was advertised to be held on Oct. 25, had to be postponed from that date until Nov. 3, owing to the heavy rain storm which prevailed on that date. So severe was the storm at New London, that although the shooters were protected while at the score by a tent, yet it was impossible to distinguish the flight of a target through the driving rain.

The Elizabeth (N. J.) Gun Club will hold a two-days' shoot at their new grounds at Elizabeth on Nov. 17 and 18. The first day will be for targets, the second for live birds.

T. W. Morfey, of Paterson, N. J., is booked to shoot a race with Eddie Hill, of Trenton, N. J., on Nov. 15, at Charlie Zwirlein's grounds at Yardville. The conditions of the race are 100 live birds per man, $100 a side, 28yds. rise, loser to pay for the birds.

With Carver and Brewer matched to shoot three races in Chicago, and with every possibility of a series of five races between Brewer and Elliott, things in the trap-shooting world are looking up.

The complimentary benefit to Mr. C. H. Townsend is to take place on Tuesday and Wednesday of this week at Marion, N. J.

Utica, Oct. 24.—The seventh meeting of the Central New York Trap Shooters' League closed here to-day. The light was bad and scores were low. In the team shoot for a trophy, the Oneida county team scored 79, Rochester 75, and Syracuse and Auburn 67 each, out of a passible 100. In this contest, which will be decided on Nov. 28 at Syracuse, Rochester leads by 7 birds, with Oneida second, Syracuse third and Auburn fourth. The individual championship will also be decided at the next shoot. At present John and Ed Fulford, Carr, Mayhew, Glover and C. Ayling are about even. Glover broke 25 straight in this contest to-day.

The following list of donations and subscriptions to the complimentary benefit of Mr. C. H. Townsend had been received by Mr. W. Fred Quimby up to Monday evening: Syracuse Arms Co. $10, Hunter Arms Co. $10, Lefever Arms Co. $10, Ithaca Gun Co. $10, Oneida County Sportsmen's Association $21, Elizabeth Gun Club $28, Cleveland Target Co. $10, Chas. Fehrenbach, Wilmington, Del., 150 Trap-Shooters' memorandum book; Miss Annie Oakley a handsome table lamp, onyx stand; "Uncle Al" Heritage $40, American Wood Powder Co. 100lbs. powder; American E.C. Powder Co. 60lbs. powder, Louis Schortmeier box of Perfecto cigars, Forest and Stream Pub. Co. $25. In addition to the above, the Peekskill Gun Club, of Peekskill, N. Y., have written that they will subscribe $15 to the testimonial fund.

In the second contest for the cup presented to the New Utrecht (L. I.) Gun Club by Capt. A. W. Money and his son, Noel E. Money, Mr. Walter F. Sykes, president of the club, won the trophy after shooting off a tie with C. Furgueson, Jr.

The Titusville, Pa., Gun Club is said to have made arrangements with the local game dealers whereby the latter will hereafter refuse to receive ruffed grouse for shipment.

The number of entries for the Emerald Club's Empire City Handicap was fifty-one, just three less than the number of entries in the Interstate Manufacturers' and Dealers' Association's Grand American Handicap which took place at Dexter Park, L. I, last April.

Early on Thursday morning a large number of local pot-hunters were making the woods around Dexter Park resound with the booming of their guns as they discharged them, regardless of the law, at the flocks of robins which had come in during the storm.

Mr. L. T. Duryea ("Davenport") leaves shortly for a month's hunt in the West. He is shooting pigeons as well as ever.

During part of Thursday's shoot in the Empire City Handicap, Charlie Zwirlein's black setter did good work retrieving dead birds. When it came to ticklish birds, however, the invincible Billy Mills was deputed to do the work, and his south paw always did the business. In the miss and out H. Heyer, his brother trapper, nailed a bird on the fly for D. C. Smith, which otherwise would have gone out of bounds.

The choice of Willard Park, Paterson, N. J., as the scene of the Grand American Handicap next April, seems to meet with general satisfaction among the local shooters.

### Elliott and Brewer Will Meet.

The following correspondence between Messrs. Brewer and Elliott, together with Elliott's gentlemanlike letter to Forest and Stream, also given below, will make interesting reading in view of the fact that every pigeon shooter in the States is anxious to see these two men matched. The letters referred to are as follows:

Kansas City, Mo., Oct. 29.—*Editor Forest and Stream:* I had hoped, from the equitable proposition which I made through the columns of the *American Field* recently, that the question of championship honors of the world might be brought to an issue, and have endeavored by a personal correspondence which I inclose you, to perfect these arrangements. It seems, from the letters published in last week's issue (of Dr. Carver and J. L. Brewer), that the object cannot be accomplished without a newspaper controversy.

I trust your readers will pardon me for increasing the affliction which they have been enduring so patiently. In regard to the world's championship trophy, which Dr. Carver and J. L. Brewer base their claim upon. I have the following authentic information: Dr. Carver, in March, 1881, won at Hendon, England, a cup presented by the proprietors of the London *Sportsman*, and termed the championship of the world's challenge cup, defeating thirteen contestants in a 50-bird contest.

Who dares to assert that the number 13 is not lucky, when a man at this day and age of the world can retain championship honors for thirteen consecutive years and evade public demands from individuals to defend the title which he claims.

In regard to Mr. Brewer's assertion that he is champion wing shot of the world, also basing his claim upon a trophy he won in England, we have the following facts: In a final contest for the so-called championship of England cup, at Hendon, on July 3, 1888, the Captain was awarded the winner by killing 24 birds out of 25 at 30yds. rise, and which he has since nobly defended through the columns of the press with bombastic and insulting letters.

In regard to Dr. Carver's assertion that I had quit shooting and gone into business with my brothers, it is true, and it was my intention to devote my time and attention to business. After my withdrawal so many mushroom champions and world beaters sprung up that I found it more profitable to again resume pigeon shooting. The money supplied Dr. Carver by his backers (the syndicate) has enabled me to pay off a large amount of obligations contracted during last year's financial depression.

In my proposition of Oct. 13 I simply named amounts which had already been published as the stake in the contest between Dr. Carver and Mr. Brewer, and which could be raised by any one of the gentlemen at large who are seeking for world's championship honors. To hold such a contest in Chicago under the supervision, and with Uncle John Watson as referee, it being neutral ground, would virtually decide the championship honors of the world.

Dr. Carver's desire to shoot for the championship of the world and $5,000 a side, is simply ridiculous, and to say the least very unjust and unkind to those who are not in a financial condition to stake that amount on a shooting match. While this amount is but a mere bagatelle to the Doctor and I, there are a great number of championship aspirants whom this amount would freeze out. At present I have on deposit with the *American Field* $100 to make good my proposition to Carver and Brewer or to shoot Mr. Brewer a series of races under conditions upon which he virtually agreed to meet me. All I can say is, "Put up and shoot pigeons or—shut up." I remain just plain everyday Jim Elliott.

The following correspondence between Elliott and Brewer speaks for itself:

New York, Oct. 18.—*J. A. R. Elliott Esq., Kansas City, Mo.:* Yours of the 16th came duly to hand. In reply I will say, that I have no proposition to make you more than we agreed upon at Memphis, in August last. I think, perhaps, you remember telling me if you defeated Carver that you would shoot me a series of matches for $750 and the championship. I do not want any newspaper controversy, and notoriety does not pay me a dollar. What I want is to know who is the champion. If you beat me, I say, joy go with the honors, and I have ever got a good word for you; if you fail to connect I hope there will be no animosity. It is not necessary to discuss the question of our abilities through the sporting papers. This we will settle behind the traps. I am quite willing for you to enjoy a good opinion of yourself, and I believe myself that you are far superior to lots of the would-be champions, and there is no reason why you should not come East and shoot all the matches I have named, as I am sure the gate money will amount to several thousand dollars, which I am quite willing to divide with you.

Trusting this may be satisfactory to you and that you will inform me at once of your willingness to accept, when I will at once go to work and arrange for our meetings, so that it will be satisfactory to the winner, and I will forfeit all claims if fair play does not exist throughout. I am, yours truly, John L. Brewer.

Elliott's reply to the above was as follows:

Kansas City, Mo., Oct. 26.—*John L. Brewer, Esq., 100 West Street, New York:* Your favor of the 18th inst. received and contents fully noted. I remember quite well arranging matches with you to take place this fall, not only at Memphis, Tenn., but standing in front of Thompson's saloon on Broadway, New York, last March. The understanding was that you were to shoot me a series of five races for the amounts named in my proposition to the *American Field* this week. You further agreed to shoot a part of this series of matches in the West and in Kansas City. The Western people are very anxious to see you shoot, and I owe them at least that favor, and will certainly require you to meet me on Western grounds.

There will be no ill will or animosity on my part toward you in these contests, and there is no city in the world where any fairer treatment is accorded a visitor than in Kansas City.

I am willing to shoot this third match at Pittsburg, Pa., and the other two at Al Heritage's, Dexter Park or John Erb's grounds (in no instance are the pigeons to cost more than 50 cents per pair for first-class birds), and you are to furnish the grounds without any additional expense, we to have joint control for that day exclusively. The Kansas City grounds I will agree to supply on the same conditions. Either to divide or shoot for the gate receipts in each contest will be agreeable to me. If you don't want to shoot at Pittsburgh, I will send a man to toss up with you to decide which point the third or fifth race will be shot at; and should I gain it, will name Kansas City If you gain it, we will shoot them on the grounds which you name East. The more matches we shoot on one or two grounds, the less will be the expense traveling from point to point

Would be pleased to have you wire me your answer. If agreeable, I will forward contract in accordance with the above, in order to facilitate matters and have those matches come off before cold, stormy weather. Respectfully yours, J. A. R. Elliott.

Brewer's answer to this letter reads thus:

New York, Oct. 29.—*J. A. R. Elliott, Esq., Kansas City, Mo.:* In reply to yours of Oct. 26, I will say that your letter is quite satisfactory to me, and I will meet you in Kansas city, in Pittsburgh, and in New York city a series of 5 pigeon matches, the first two to take place in Kansas city (some date to be agreed upon), soon after my meeting with Carver in Chicago. The third match, within a few days after our meeting in Kansas city, to take place in Pittsburg, Pa. The fourth and fifth to be shot in the vicinity of New York, and dates to be arranged suitable for the meeting; and, as you state, for $100 a side each match. The gate money to be divided; $100 to be deposited by each contestant in the hands of some stakeholder to be agreed upon, on the day of each individual match, and, if it is preferable to you, you can name the stakeholder each time.

Now I trust you will understand this letter thoroughly, as I cannot enter into any championship agreement, as it is in dispute and will not be settled until after the middle of November; but, as I before stated, these matches are to be shot singly and the winner of each to take $200 and fifty per cent. of the gate money, and each contestant to pay his own expenses, as to birds, etc., or any advertising or any expense that may be caused by each individual; and, in case of interference, the referee may have the power to declare the match off, and the money refunded to the partes having deposited the same with the stakeholder; and I do openly say that fair play is all I want, and if I cannot win at that, I will be pleased to acknowledge my defeat, and will be ever grateful to the man that defeats me. If you can meet me in Chicago on November 15, I will deposit the necessary amount to assure you I am in good faith, and you can bring any responsible party with you to hold the money.

Trusting this may be satisfactory to you, I am yours truly, John L Brewer.

Thus the matter stands now. Both parties are evidently anxious for a meeting, but Brewer's matches with Carver, noted elsewhere, prevent any match for that title between Elliott and himself.

### The Championship of Kentucky.

Louisville, Ky., Oct. 25.—The event of the season came to a most pleasant and successful termination on the grounds of the Kentucky Gun Club, at Louisville, on Oct. 22, at which time the championship of Kentucky was fought out, resulting in the winning of the coveted title by Mr. Harry J. Lyons, of Louisville, one of the most energetic and enthusiastic member of that splendid club. Mr. Lyons is to be congratulated on having displayed an amount of cool nerve and courage that inspires the most phlegmatic onlooker with the deepest admiration. His score in no way exhibits the manner in which he shot—this had to be seen to be appreciated—for of itself it is not a wonderful one, although on such good strong birds it is seldom beaten. He was a bit careless with his second bird, and consequently lost it. On the fourth round he went up to the score with the safety of his gun at safe, so here he did not shoot at all. Some one had locked his gun, which, being a non-automatic hammerless, lost him the shot. After this he steadied down to work and smashed bird after bird, and by dint of pure pluck and good judgment killed out straight to the end and proved himself what few men can, a first class stayer and a very dangerous competitor. He has had little experience at the trap, but is steadily forging ahead in that resolute determined way that admits of no refusal. Another year or two ought to land him among the chosen few who can win when they want to by sheer tenacity and courage.

No. 1, 5 birds, $3 entrance, birds extra:

| W L Lyons | 11110—4 | J Gay | 11010—3 |

The birds were a superior lot all along, and the day being breezy only added to their flight, increasing the difficulty of making good scores.

The Kentucky Gun Club is to be congratulated in bringing together such an assembly of good shots and in successfully managing the day's shooting. Comments were heard from all quarters showing that the visiting Kentuckians were proud of this organization. Well they may be, for a better club does not exist nor can one be formed where visitors are received with more cordiality. To say that these features are conspicuous and salient in the South means a great deal, far more than any one can conceive who has not been a recipient of Southern hospitality with its spontaneous and magnificent generosity.

Gaucho.

### Trap at Little Rock.

Little Rock, Ark. Oct. 25.—The tenth contest for the Pulaski County medal took place Wednesday, Oct. 24, on the club grounds in North Little Rock. The weather was bright and clear without any wind to interfere with the flight of the targets; this made it a perfect day for trap shooting. The attendance was very light, only six shooters taking part in the contest. This is the busiest time of the year with the majority of our shooters, while some will not shoot at the trap when quail and duck shooting is to be had.

Dickinson won the medal with the fine score of 47 out of 50, though Duley was right after him with 45, both of these men were shooting in fine form, Dickinson missed but three targets out of 65 and Duley six. Conditions 50 single targets per man, known traps, unknown angles.

Paul R. Litzke.

### Weir City, Kansas.

Weir City, Kansas, Oct. 20.—The following scores were made by members of Business Men's Gun Club, at this place on Oct. 17. The day was extremely windy, making good scores very difficult. This will in some measure account for the poor showing made. Trap-shooting is steadily gaining in popularity here, and each meeting at the traps sees some new convert come out to try his hand. After the medal shoot Doctors King and Doan chose teams of 6 men and shot for a supper; Dr. King's team winning by a small margin. Scores:

Regular medal shoot, 25 singles per man, with handicap allowance:

* Not members. Pettit won the medal in class A, Henry Smith taking the class B medal.

### Brewer and Carver Matched.

All arrangements have now been perfected and Brewer and Carver will shoot a series of three 100-bird races at John Watson's Park in Chicago, Ill., on Nov. 13, 14 and 15. The conditions are 100 live birds per man each race, $100 a side; the title of champion of the world at live birds to go to the man winning the series. Brewer will leave for the West on or about Nov. 9, and before his return to this city will in all probability have shot three races with J. A. R. Elliott, two at Kansas City and one at Pittsburg, Pa.

## The Emeralds' Great Tournament.

THE first day's scores made in this tournament, which opened on Monday, Oct. 22, were given in last week's issue of FOREST AND STREAM. From them it could be gathered that the tournament was an assured success, bad weather notwithstanding. The weather was about as unpropitious as it well could be. Monday, it will be remembered, was cold, damp and overcast, making the flight of the targets hard to follow. It was also against the attendance of the locals, who, preferring live birds to inanimate targets, laid off for the Empire City Handicap on Wednesday. Tuesday, the

*Second Day,*

was precisely like its predecessor as to the quality of the weather; perhaps a little "more so" as regards the penetrating powers of the chilly northeast wind which swept across Dexter Park right in the shooters' teeth.

Notwithstanding this condition of affairs the programme was started at an early hour. It will be as well to enumerate once more the list of visitors who took part in the shoot: Massachusetts was to the fore with a strong team of seven—W. "White" Bennett and his brother, Fred "Jones" Bennett, the champion pistol shots from Boston; J. T. Mascroft, V. D. Kenerson and Fred Bucklen of Worcester; B. "Leroy" Woodward, Brockton, and H. G. Wheeler of Marlboro. Harry Thurman and H. "Landis" had come from Philadelphia, and D. C. Smith of Hamilton, Canada, loaded down with championship honors, was also present, shooting well and talking up his club's great tournament which is to be held on Jan. 17, 18 and 19 next. W. H. Skinner was also on deck, smashing targets with a precision that showed that his Forehand Arms Co.'s gun and Leonard powder were in it with any of them. Of course "U. M. C." Thomas was there; by the way, if Thomas improves his shooting as much in the next six months as he has done in the past half year, he'll be warm enough for any of the "cracker jacks" to tackle. Van Dyke was hardly up to his own standard on Tuesday, but Wednesday and Thursday found him pumping lead into the live birds in a way that caused his Winchester repeater to challenge attention.

Thirty-six shooters took part in the various events, the majority shooting right through the programme. Two sets of traps were used, but lack of assistants prevented things from being hustled in a thoroughly satisfactory manner. Still everybody seemed to get enough shooting by 4:30 P. M., at which hour nothing but a whippoorwill could fairly have distinguished one of the flying targets. It was decidedly a relief to non-contestants when darkness put an end to the day's work. The expression, "lack of assistants," which I have used above, is perhaps hardly correct. There were plenty of assistants "of a sort;" all were willing to help, but referees, scorers and pullers, all require at least some previous experience in their respective lines. The bad light in particular was a great strain on the eyes of the referees, especially in the unknown angle events; absolute satisfaction could hardly be guaranteed by anybody. This shoot, however, was the Emeralds' maiden effort, and it was a good one. The experience, too, gained in this effort will be of vast use at their next similar gathering.

A word about the shooting. The quality of the work done by the shooters can hardly be estimated from the scores they made. Dexter Park is a difficult place naturally to shoot targets in; the background being none of the best; add to this a species of twilight all through the day and the scores are little short of phenomenal. "Leroy" and Brewer did the best work, as a glance at the tabulated scores given below will show. Leroy is shooting black powder again, claiming that he cannot get the same results at targets with nitro powders as he does with "soft coal." The improvement in his form at Dexter Park over that shown by him at New London early in September furnishes him with an argument of considerable strength. Massachusetts furnished several rainmakers: Leroy, Bucklen and the Bennett brothers, all used black powder nothwithstanding the object lessons they have been given time and again as to the effectiveness of nitro powders of various makes. On Tuesday, after the shoot was over, it required something stronger than water to wash out the taste left in one's mouth by the volumes of dense smoke, belched forth from the guns of the above four shooters, which was blown by the raw northeaster plumb in the faces of those at the score and of the spectators behind them. All honor to Wheeler, who cut away from his leading strings and proved by his work on Tuesday, Wednesday and Thursday that American wood powder was just what he had been looking for; his average of 89 per cent. speaks for itself.

To particularize is, at the best, an invidious task; still, it would never do to pass over the work done by Noel Money during the afternoon. Noel and his father, Capt. A. W. Money, could hardly be improved upon as exponents of the work American E. C. powder is capable of doing. Noel was smashing the targets one after the other in a manner that couldn't fail to attract attention; the targets were just snuffed out! His percentage of 93 was surpassed by but three and only equaled by one, R. "Woods," a gentleman tersely described by the inimitable "Tee Kay," as "a Dutchman shooting under an American name!" In other words, "Woods" was the name assumed by Dick Pfister. F. "Jones" Bennett's percentage of 93⅘ is within a very small fraction of that made by the top notchers, Brewer and "Leroy." In fact, the "down Easters" held their own, and a little of other people's, too, at the close of the day. Here are their averages: Leroy 93¾, Jones 93⅘, Bennett 90½, Wheeler 89, Kenerson 88, Mascroft 85, Bucklen 72; Davis, with 88½, is another from the East who divided more than one good pot. Taken all through, the company was decidedly warm. Scores:

No. 1, 10 empires, known angles, entrance $1.20: T. H. Keller 9, Kenerson 8, Jones 10, Wheeler 5, Brewer 10, Leroy 10, Hoffman 9, Mascroft 8, Skinner 9, Woods 10, Drake 10, Richmond 9, Schorty 7, Bucklin 7, Thomas 8, Davis 8, Bennett 7, Brownell 5, Hobart 10, W. H. Thompson 9.

The following figures on the second day's scores at targets will be of interest. It will be noticed that whereas "Leroy" and Brewer are tied on the whole day's shooting with a percentage of 93¾, yet "Leroy" beat Brewer by one bird on the regular programme events. Taken as a whole, bad light, acute angles and everything considered, the percentages are remarkably high.

*Third Day,*

If Monday and Tuesday, the first and second days of the Emerald Gun Club's tournament, were bad days for the matter in hand, then Wednesday, the third day, was far worse. The morning opened even more overcast than on the previous day, while the northeaster came across Dexter Park just as if it knew there was a stove in full working order in the club house, and meant to make the shooters hunt it.

The programme for the day was the Empire City Handicap, 25 live birds per man, $10 entrance, birds extra, $100 added by the Emerald Gun Club, handicap varying from 26 to 33yds. The first 15 birds in the handicap formed an optional sweepstake of $5, 3 moneys, high guns to get the money. By Tuesday night no less than 46 forfeits of $3 each for entrance in the big event had been received by Dr. G. V. Hudson, the able and energetic secretary of the club. Before the first gun had been fired on Wednesday this number had been increased to 51! The handicapping committee, consisting of Messrs. Jacob Pentz, Milt Lindsley, Fletcher Walters, L. H. Schortemeier and "Tee Kay" had no light task before them in apportioning the various handicaps. Prior to calling up the first squad to the score, the committee announced that the conditions of the handicap had been changed, the scratch mark being 32yds instead of 33, the limit men standing at 25 instead of 26. This change was evidently satisfactory to all, not a dissenting voice being heard.

An analysis of the entries shows that no less than 14 Emeralds had put up their $10 to support the honor of their club. The following shows each man's handicap, gauge of gun and club of which he is a member:

| | Name. | Handicap. | Gauge of gun. | Club. |
|---|---|---|---|---|
| 1. | M Herrington | 28 | 12 | Emerald Gun Club. |
| 2. | L H Schortemeier | 29 | 12 | Emerald Gun Club. |

| 49. | J E Timmons | 28 | 12 | Morristown, N. J. |
| 50. | Gus Grieff | 28 | 12 | Emerald Gun Club. |
| 51. | William Lair | 27 | 12 | Coney Island Rod and Gun Club. |

In the above handicaps all the men using 10-gauge guns were placed 2yds. behind the mark they would otherwise have shot from had they been using 12-gauges; as will be seen, no less than 8 men used 10-gauge guns.

All preliminaries having been arranged as far as handicaps, etc., went, T. H. Keller was appointed referee, C. Dellar and the representative of FOREST AND STREAM being the official scorers. At 10:15 Mr. Herrington opened the ball by knocking over a right-quartering driver with his first barrel. The race was shot on Wednesday (for it lasted nearly all Thursday as well,) in squads of 10 men who shot alternately until they had shot at 5 birds. They then retired and waited until three more squads of 10 had shot at 50 birds to the squad, and the fifth and last squad of 11 had had 55 liberated for them to shoot at. It was a long wait between their fifth and sixth shots, but that couldn't be helped. The first squad was called out and took possession of a couple of benches close to the score. By this means rapid progress was made with its shooting. The same was done with the second squad, but before it had completed its set of 5, the rain which had been threatening for two days commenced to fall, driving shooters, scorers and lookers-on into the club house, where shelter and warmth awaited them. The only persons left outside were the referee, trap puller and trappers. It was a most inhospitable day, becoming worse and worse as the daylight began to give way. The shoot, too, dragged terribly; almost every shooter had to be called to take his place at the score, and squad hustling was no sinecure. The birds, also, began to show signs of the effect the weather had upon them. Good as they were, the pelting rain and cold wind made them slow to start and weary of wing. Under favorable circumstances they would have been of the "corker" quality; they were so at first. But what could one expect? Even the shooters themselves, usually as cheerful a set of men as one can find, showed but few signs of animation until a colored man set their feet beating time to the music evolved from his mouth organ and guitar.

By the time each contestant had shot at ten birds the light had got very bad, and both rain and wind had increased in violence. An announcement was made by the referee that, as there was no possible chance of finishing the handicap on that day, each man would shoot at one more bird, the balance of the event going over to the next day. At the close of this, the eleventh round, 46 were left in the race, five having dropped four birds were out of it unless no straight score was made. The unlucky five were C. M. Meyer, who had the misfortune to miss his first three birds owing to defective ammunition, all three birds being good ones. His tenth was a low, fast flying incomer, a bird liable to be missed by anybody under the conditions then prevailing; Conny Furgueson, 3d, the 11-year-old member of the New Utrecht Gun Club, evidently felt the strain of shooting in such a big event and was soon out of it, apparently shooting under all his missed birds; with a few more years on his shoulders he'll be a hard one to beat; "Henry" fell out at the tenth round, while "Wanda" and T. Codey dropped out on their eleventh birds. "Wanda," the popular wife of M. F. Lindsley, of American wood powder fame, started in well by killing her first seven birds cleanly. The weather, however, soon became such that to brave the elements was really more than could have been fairly asked of a woman. Its effect upon Mrs. Lindsley is plainly shown in the four consecutive cyphers which fill the eighth, ninth, tenth and eleventh sections of her score. T. Codey, who all through the race as far as it had gone had drawn as hard birds as anybody, got a corking right-quartering driver for his eleventh, scoring a miss and losing his chance of the $610 in the pot.

Only nine men was left with clear scores of 11 each: Dr. Hudson, Wright, Morris, "Woods," Knowlton, Walters, Edgerton, Van Dyke and Brewer. Welch had the ill-luck to have his 11th bird, a fast right-quartering driver, carrying his load of lead just out of bounds, thus spoiling what was apparently a sure clean score for the first day. With the close of the 11th round everybody went home glad for the most part to get away from the dreary scene presented by Dexter Park, storm-ridden as it was. The

*Fourth Day*

was almost the exact counterpart of the one preceding it. It is true that at times the rain held up, and shooters and spectators were able to stand outside the club house without being drenched to the skin. Considering the weather the birds flew marvelously well, testing the capabilities of the shooters very severely.

It was late before the handicap was proceeded with, 10:30 having been passed before a gun was fired. The arrangement was to shoot 4 birds to a man, and then continue the squads of ten at 5 birds each as soon as all had shot at 15 live birds.

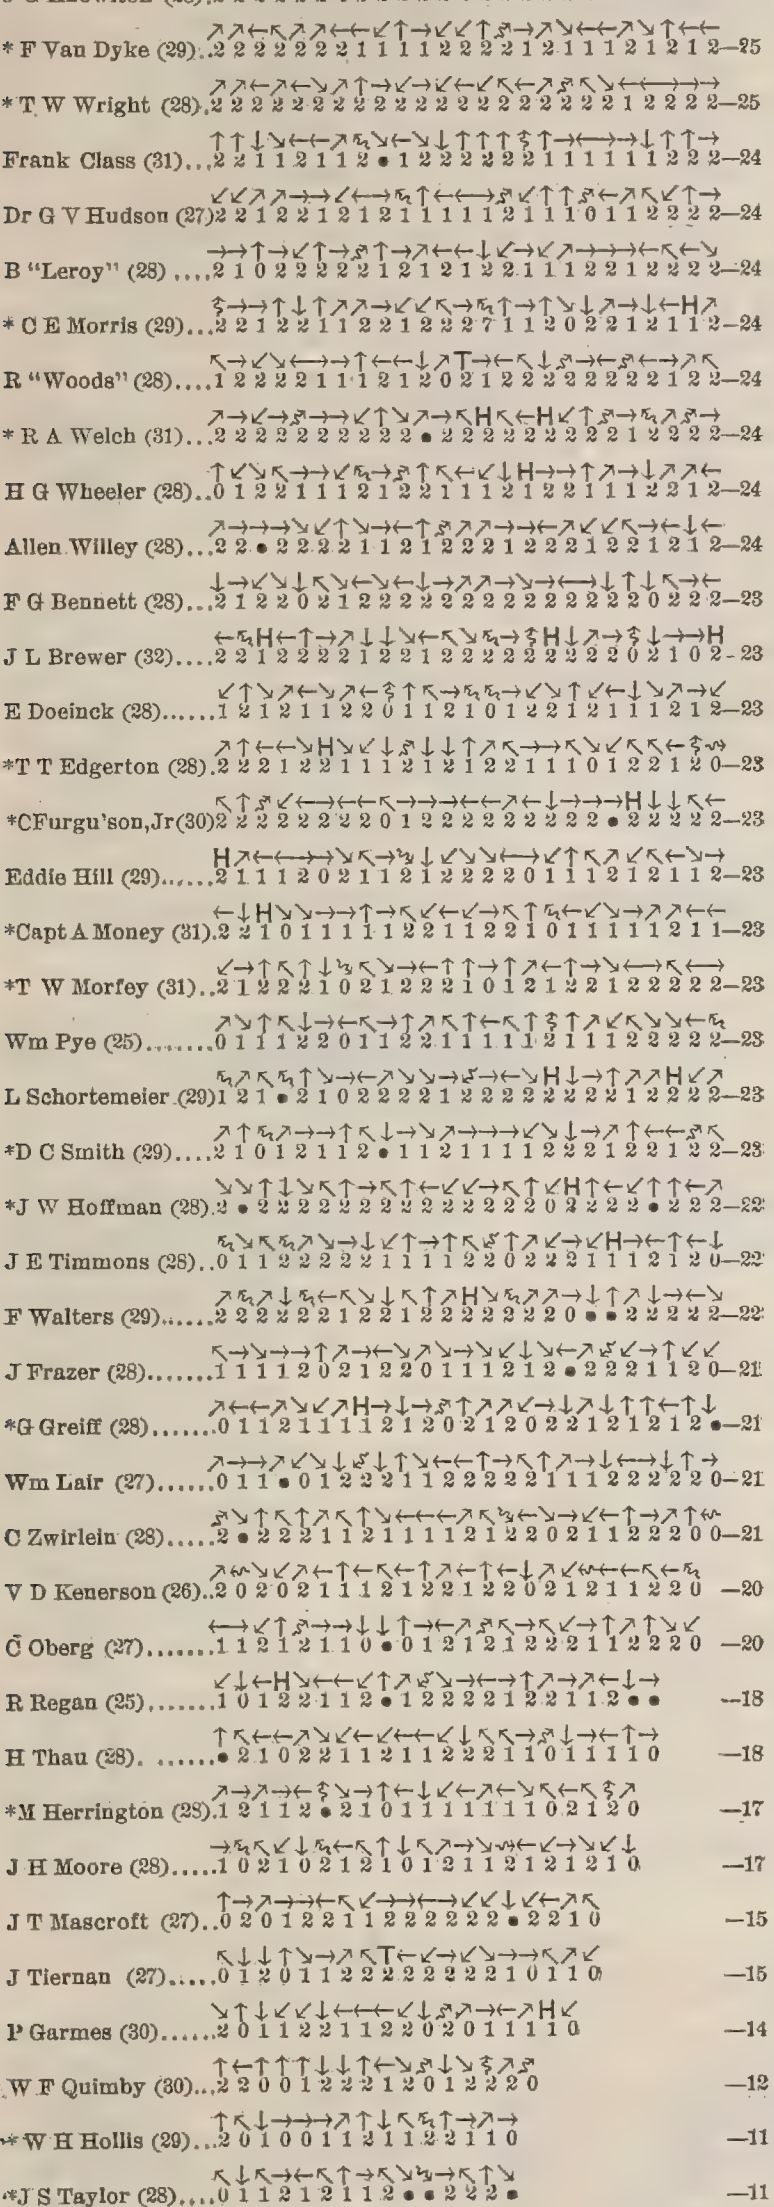
By the end of the 15th round eight men had clean scores. These were: Dr. Hudson, T. W. Wright, C. E. Morris, J. G. Knowlton, F. Walters, T. T. Edgerton, Van Dyke and Brewer. Of these, but four, Wright, Morris, Edgerton and Van Dyke, were in the extra $5 sweep; as sixteen had paid in their $5, this left $80 to divide between the four above named. Of the fifty-one who had started in the big race, eleven had fallen by the wayside, leaving only forty-one to continue the contest. Many of them had 3 misses each scored against them and it required only one more cypher to put them out entirely.

In the next 5 birds Dr. Hudson, Morris, Walters and Edgerton each spoiled the looks of their scores. The doctor, who had been shooting remarkably well, slipped up on a zig-zagging left-quartering driver. Morris was in hard luck indeed; he was centering his birds well and was looked upon as a certainty for part of first money. When he stepped to the score for his 18th bird, something was wrong with one of the traps and Billy Mills went to put it straight; Morris put the safety on his gun and forgot to unlock it; result a lost bird. Walters, who had been making Leonard powder drive his shot clean through his birds, made a bad break on his 18th bird, following it up by letting his next two birds carry his lead over the boundry. Edgerton's missed bird was a right-quartering incomer which he apparently missed clean. First money now lay between four: Knowlton, Wright, Van Dyke and Brewer, with 31 others entitled to shoot for the money.

Wright, Knowlton and Van Dyke killed their last five and divided $244. Van Dyke's last bird, however, caused him momentary anxiety It was a right-quarterer and a strong flyer. Van pumped into him as soon as he started; his second shell, usually as effective with him as his first, didn't appear to strike the bird as it fluttered to the boundary, dropping dead finally about 10yds. inside the flags. A curious feature of the last series of five was the fact that no less than four men shot themselves out of a place by missing their twenty-fifth bird. Charlie Zwirlein had particularly hard luck on his last five, drawing perfect screamers each time he went to the trap. Brewer missed his 21st, a rattling bird, and his 24th, a bird that did not appear particularly hard, his dropping from first money down into the third hole was a surprise to everybody present, as he had been killing his birds cleanly for the most part. A decision on one of his earlier birds caused a little dissatisfaction, but it was made apparently because the referee was unable to see just what happened. It was Brewer's 9th bird, an incomer, which was just fluttering out of bounds, coming straight for the score. In the opinion of many Brewer made an attempt to gather the bird, thus turning it from its course, Billy Mills eventually retrieving it, the bird being scored a dead bird. Some claimed that the bird had even been out of bounds.

The work done by the Massachusetts contingent is worthy of special mention. Here was a body of men who, owing to the laws prevailing in their State, are unable to shoot live birds at home. All their practice is on foreign grounds. The character of their shooting is well shown by the following figures: Wheeler and Leroy, 24 out of 25; Fred Bennett, 23 out of 25; V. D. Kenerson, 20 out of 24, and J. T. Mascroft, 15 out of 19. Wheeler missed his first bird, Leroy dropping his third.

Second money, $183, was divided between eight men, each of whom had killed 24 birds: Dr. Hudson, Wheeler, Morris, "Woods," Leroy, Welch, Willey and Class. Third money, $122, went to eleven men with



scores of 25: Schortemeier, Pye, Hill, Morfey, Smith, Doeinck, Money, C. Furgueson, Jr., Bennett, Edgerton and Brewer. Fourth money, $61, was divided between Hoffman, Watters and Timmons, with scores of 22.

Thus ended a most successful tournament, a credit to the Emerald Gun Club that gave it. It is understood that the result of the four days' shooting has determined it to make the "Emerald Gun Club's tournament" an annual affair.

Score:

Empire City handicap, 25 to 32yds. rise, 25 live birds per man, from 5 ground traps, gun in any position, boundary approximate 80yds., class shooting, 4 moneys, 4 misses out; entrance $10 and price of birds, $100 added to the purse by the Emerald Gun Club; the first 15 birds of the 25 will form another event with extra entrance of $5; 3 moneys, straight shooting, high guns to get the money; entrance to either, or both, optional; forfeit of handicap $3, to be sent to recording secretary of club; entrance to both cease when first gun is fired In case handicap is not finished on Oct. 24 the event will be finished on Oct. 25. Fifty-one entries in the main event, sixteen in the extra event:

*Trap score type—Copyright 1894, by Forest and Stream Publishing Co.*

* Entered sweep of $5 extra on first 15 birds, purse to go to the three high scores; Wright, Van Dyke, Morris and Edgerton divided $80.

Miss and out, 30yds. rise, entry $3, 14 entries:

NOTES OF THE SHOOT.

W. R. Hobart was well to the fore during the target events; he doesn't appear to have lost his eye for targets during his western trip.

Of the three winners of first money in the Empire City Handicap, Knowlton used E. C. in both barrels; Van Dyke used DuPont's Smokeless in his first shell and E. C. in his second; Wright shot Wood Powder in both barrels.

The prices for refreshments at Dexter Park were based upon those at Coney Island during the height of the season. Coffee (none too good at that) ten cents a cup, a quarter of an apple pie, ten cents, clam chowder twenty cents per plate, etc., etc., "with trimmings to match," as the saying goes, is a little steep. Shooters don't mind paying good prices when they get good articles in return; but first-class prices should be met by first-class articles. It is only fair to the Emerald Gun Club to say that this department was not under their charge.

"Uncle Al" Heritage and Dr. Hudson livened up proceedings on Wednesday afternoon by the way in which they tripped it to the colored musicians' melody.

Mr. Rice of Chicago rendered yeoman service to the management by the way in which he hustled things in its behalf.

By killing his last 24 straight in the big handicap, and by scoring 13 straight in the succeeding miss and out, Wheeler, of Marlboro, Mass., scored a great run of 37.

Welch practically killed forty straight during the two days, his lost bird, the eleventh in the handicap, dropping dead out of bounds.

Capt. Money's tally of one-barrel kills will compare with any one of them; sixteen out of the twenty-five birds did not need a second dose.

EDWARD BANKS.

## North Side Sweepstakes.

PITTSBURG, Pa., Oct. 26.—*Editor Forest and Stream:* The initial shoot of the new Northside Gun Club, Thursday, Oct. 25, was a pronounced success. Messrs. Shaner, Crow and "Old Hoss" had charge of the affair, and it lacked nothing in entries, shooting equipment or enthusiasm. Events 4, 5, 7 and 8 were shot under the following handicap; viz: Experts shot from five unknown traps. Semi-experts shot from known trap, unknown angle. Amateurs shot at known trap and known angle. Event No. 6, was shot under the expert system. The remaining events were shot known trap and angle. One of the strong features was the fact that the semi-experts and amateurs were given as fair a show and broke in as frequently on the money as the experts. The best average for the day was made by Elmer E. Shaner who shot as an expert. The scores follow:

No. 1, 10 targets, entrance $1.20 4 moneys.

BIX.

PEORIA, Ill.—The Peoria, Ill., Target Company will hold their first semi-annual tournament during the month of November. W. Tromp Irwin is now the manager and proposes to make this the largest gathering of sportsmen held in the West this year; Peoria Blackbird rules will be adopted; all shooting will be unknown angles; experts and all professionals handicapped.

## WESTERN TRAP GOSSIP.

JACK WINSTON ON THE WINNERS.

CHICAGO, Ill., Oct. 25.—Jack Winston, of St. Louis, is in town this week, and had some interesting gossip over trap matters when he called at the Western office of FOREST AND STREAM.

"I saw all the late big matches at Kansas City, St. Louis and Des Moines," said he, "all the more important ones in which Dr. Carver figured, and say! I am the most unlucky man that ever was! At first I figured that Carver would beat Elliott at Kansas City, but what does Elliott do but kill 199 out of 200. I wouldn't hardly have gone up against that if I had known what was ahead. Well, I thought of course, when Carver and Crosby shot, Carver would beat Crosby, but I picked just the wrong race there too, and Crosby beat Carver. I am no millionaire, and I thought I had had about enough of Carver, so when I went up to DesMoines to see Carver and Budd shoot their matches, I picked Budd for the winner in the first race, but what does Charlie do but shoot like a Chinese sailor and let Carver beat him! Well, thinks I, there is something in this Carver business after all, so I just backed Carver to win the second race with Budd. My luck still held, and Budd beat Carver that time, just as Carver beat him in the first place.

"You can see from this that I am not a millionaire just now, but I thought I would just come around to Chicago and see the boys, and see if I couldn't get even a little bit by backing myself, since I have had such bad luck backing anybody else. I am not flourishing around any, and I don't want to shoot any pigeon races, because I haven't shot birds for a long while, but I will say if any one in Chicago, or any one anywhere else on earth, wants to shoot 100 targets, National rules, I shall be glad to make an arrangement for $100, and maybe for less if they would rather have it that way. I don't know anybody in Chicago that I wouldn't like to shoot a race with, and I know there isn't any better place to decide a match than Watson's ground in Chicago. Both sides are sure of getting a square deal there in either a pigeon or a target race.

"Of course, the pigeon game at Watson's will be a little harder than at either St. Louis or Des Moines. Both the shooters complained of the birds at Kansas City. What kind of a town is Chicago? You fellows are full of talk about hard birds and all that, but I will bet that I can kill 90 out of 100 of the hardest birds that John Watson can trap; only, I would have to do that in a regular match for money, the bet on the birds being a side bet. Of course when all these big shooters come to Chicago we will not see any such big scores as we have been hearing about, but I want to tell you to keep your eye on Jim Elliott, and don't you bet any money against him, for no one has any license to beat him now. He is in perfect condition and taking the best kind of care of himself. He goes to bed early and sleeps regularly, takes a shower bath every morning, does some running and walking and pulls fifteen miles in a shell. He is a regular athlete. Of course he is feeling 'way up about himself, but he can shoot, nevertheless, and he has got all kinds of money behind him in Kansas City. There is no trouble about his getting all the backing any one need want, from $1,000 to $5,000 a race.

"I must say that Carver is the fairest and most gentlemanly shooter I ever saw at the trap. When anything came up in the preliminaries, he always said, 'Anything will suit me; fix it up to suit yourselves;' and at the score he never said a word. Elliott, after his winnings, was not so pleasant. He had so much confidence in himself that he fairly grinned when he went to the score to shoot. After the races, when the talk about Chicago came up, he said to Carver, 'Why you can't shoot hard birds, Carver, what are you talking about. You wouldn't shoot me a race in Chicago for $5,000 a side, and you know you wouldn't.'"

"'Well I have $5,000 to say that I would shoot you in Chicago,' Carver said to him. He does'nt seem to be a bit at all uneasy because he has lost the Kansas city races. Carver's backer is a gentleman by name of Hadley, of Kansas City, a jeweler who has made plenty of money in the real estate business, and he is dead anxious to back Carver for any kind of a race. When Elliott made this talk about $5,000, Hadley pulled out a roll of money as big as your leg and wants to put up $500 forfeit to bind the $5,000 race right there. Both Carver and Elliott have big backing behind them, and I guess that it is all sure enough that the races are for blood.

"You folks will see the biggest pigeon picnic in Chicago in November that you ever heard of in your lives. Carver has got nineteen races to shoot in Chicago, and is ready to shoot clear through the list, win or lose. Elliott is on the war path, too, and if they can get Brewer out here, there surely ought to be races which will decide which one of those three is the best man. Then I hear Charlie Budd and Charlie Grim are going to drift into Chicago early in November, and probably the result will be that even after it is all simmered down, we will have the biggest series of big matches ever known in this part of the country. Of course I will have to be in Chicago to see all this, and I only hope that I will be able to get on some target matches. I don't care who comes after me, Brewer, Budd, Elliott, Grim, Parmalee or anybody else, I think I can get just a few more than they can. Now, you know I can't shoot very much, but I am just willing to chance it this way. What kind of a place is Chicago? Haven't you got any shooters here at all?"

E HOUGH.

909 SECURITY BUILDING, Chicago.

## Courtney Wins the Medal.

SYRACUSE, N. Y., Oct. 25.—The Class A diamond medal of the Onondaga County Sportsmen's Club was shot for at Maple Bay on this date, the scores made being as follows:

Class A, diamond medal contest, 50 targets per man, known traps, unknown angles:

| | |
|---|---|
| A G Courtney | 01010011111111111111111111111111111111111111111111111—46 |
| Geo Holloway | 11111110111111111111011111011111111111011110111111111—45 |
| C F Arno | 01011110110111110111111110111111111011111111110101—41 |
| Geo H Mann | 11011111011111111111111011101111111001110111111111—41 |
| A C Ginty | 01011111010011111111011110100101111111110111111111—39 |
| Harry Jones | 10110000111011111111111111011011111011101111111110—39 |
| D M Lefever | 10111001000111101111111010101101111111111101110111—37 |

A G. Courtney wins the diamond medal for the fifth time, and becomes its final possessor, missing 4 out of first 10, and making a brilliant run of 44 straight, with Holloway a close second. The medal has been contested for nearly a year, and has been won four times by C. F. Ayling (Arno), three times by Chas. Wagner, three times by Geo. H. Mann, twice by H. McMurchy, Geo. Holloway and D. M. Lefever, once by Cal. Dugard. Mr. Ayling made a pleasant speech complimenting the various rivals for the medal on their earnest endeavors. Mr. Courtney, he said, had given every one a chance to try for the prize, even when he had won it four times, but had finally won it for the last time very fairly. He then in the name of the club handed it over to Mr. Courtney. The winner made a very brief and pleasant speech, and invited the boys to Webb Howe's cafe, and celebrated the event in royal style.

The Class B and C medals were won some time ago New trophies will now be provided for the next regular shoot, which occurs every two weeks.

FALSTAFF.

## Orangeville Shooting.

ORANGEVILLE, Md., Oct. 25.—The following scores were made by the members of the Woodpowder Gun Club at a shoot held this day at Orangeville, Md.:

No. 1, 10 targets, entrance 50 cents:

| | | | |
|---|---|---|---|
| Petty | 1011010101— 6 | Dr Smith | 1111111110— 9 |
| Ware | 1110100100— 5 | Kimble | 0100100111— 5 |
| Overman | 0000111011— 5 | Shackleford | 0011100101— 5 |
| Bire | 1101011101— 7 | Steever | 1001111111— 8 |
| Wonder | 1011111011— 8 | Hartner | 1111111111—10 |
| Oler | 1111111010— 8 | Evans | 0100010111— 5 |

No. 2, 10 targets, entrance 50 cents:

| | | | |
|---|---|---|---|
| Petty | 1101110110— 7 | Dr Smith | 1111111111—10 |
| Ware | 1000010110— 4 | Kimble | 1010001101— 5 |
| Overman | 1011011110— 7 | Shackleford | 0100010110— 4 |
| Bire | 1001000110— 4 | Sleever | 0111011111— 8 |
| Wonder | 1001110110— 6 | Hartner | 1111111111—10 |
| Oler | 1011101111— 8 | Evans | 1110111001— 7 |

No. 3, 15 targets, entrance 75 cents:

| | | | |
|---|---|---|---|
| Dr Smith | 101101111111111—13 | Evans | 110111111101011—12 |
| Hudson | 010001011111111—10 | Overman | 101011111101111—12 |

| Steever | 111101101111111—13 | | |

No. 4, 10 targets, entrance 50 cents: Overman 6, Ware 7, Wonder 5, Oler 8, Petty 6, Dr. Smith 9, Evans 7, Shackleford 6, Hartner 10, Kimble 5, Bire 7, Jackson 8, Hudson 9.

No. 5, 10 targets, entrance 50 cents: Overman 7, Ware 7, Wonder 8, Oler 9, Petty 7, Dr. Smith 9, Evans 7, Steever 9, Shackleford 6, Hartner 10, Kimble 7, Bire 7, Jackson 8, Hudson 8. J. J. PETTY, Sec'y.

## "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

## Morfey vs. Pier.

PATERSON, N. J., Oct. 23.—About 500 people went to Rogers's grounds to-day to see what was thought would prove a fight to a finish between these two men, as their last match resulted in a tie, each killing 10 birds. Considerable money was wagered on the result to-day. Each side was well provided, and the Morfey followers did not let one dollar go begging. Before the match was half over they were offering odds of 10 to 6 on their favorite, which he justified by the remarkable way in which he was shooting. The birds were of the first order, every one being trained for the occasion. They were all game and strong. They were much too fast for Pier, as he was shooting away behind; he was simply outclassed, throwing up the sponge after missing his thirteenth bird. Morfey only shot at 12. Capt. Money, of Oakland, N. J; John Lennard, of Morristown, N. J., and a number of others whose names I could not learn, were present. Morfey shot his Greener 12-gauge, using 48grs. American E. C. powder and 1¼oz. No. 7 shot loaded in the U. M. C. Co.'s New Trap shell. Scores:

Match, 15 live birds, $100 a side, Long Island rules, 30yds. rise, 80yds. boundary:

*Trap Score Type—Copyright 1894 by Forest and Stream Publishing Co.*

| | | |
|---|---|---|
| Pier | ↖↗↖↖↗↗→↖↓↖↗↑↗<br>1 1 0 1 1 0 0 1 0 1 1 1 0 0— | 8 |
| Morfey | ↑↗↕↙↗←↕↗→↗↗→<br>1 0 1 1 1 1 1 1 1 1 0 1 — | 10 |

Referee, Tom Dunkerley; judge for Morfey, Chris. Wright; judge for Pier, James Burns; handlers for Morfey, Wright and Rogers; handlers for Pier, Rogers and Boyle; scorer, Dutcher.

Details of the birds and shots are as follows:

Morfey's: First—Extra fast left-quartering driver killed at 40yds. Second—Fast right-quartering driver, black and white, hit full and hard, and managed to carry his load just over line. Third—Fast left-quartering twister, broke its wing at 45yds. Fourth—Steel gray left-quartering incomer, fast, a fine kill. Fifth—This bird has won a reputation for itself, having been shot at and missed three times to my knowledge; it was a white, the same bird that Morfey missed in his last match; right-quartering driver, lightning fast; broke his wing at 45yds. Sixth—Extra fast left-quarterer; good kill. Seventh—Extra fast left-quartering twister; fine kill. Eighth—Extra fast blue right-quarterer; well stopped. Ninth—Extra fast right-quarterer; fine kill. Tenth—Extra fast gray right-quartering twister; fine kill at 45yds. Eleventh—Fast right-quartering twister; clean miss, didn't try. Twelfth—Fast right-quarterer, hit hard; carried load to 65yds.; a good game bird.

Not one bird needed flushing, they were off as soon as trap was pulled.

Pier's: First—Was a black and white left-quartering driver, which he grassed; a fine stop. Second—Black and white right-quarterer; very fast; hit and broke his wing at 40yds. Third—Extra fast grey bird; left-quartering driver; clean miss. Fourth—Extra fast left-quartering twister; fine kill at 40yds. Fifth—Fast right-quartering twister, which was well stopped. Sixth—Extra fast gray bird, hit lightly; went away off toward the mountains. Seventh—Fast black and white right-quarterer, shot 2yds. behind. Eighth—Extra fast left-quartering bird; well stopped. Ninth—Fast incomer, which was a complete surprise to Pier; it came about shoulder high; a clean miss. Tenth—Fast left-quartering twister, which he grassed. Eleventh—Extra fast right-quartering driver; fastest bird yet. Twelfth—Extra fast low-flying left-quartering driver; shot away over. Thirteenth—Extra fast right-quartering driver, which he hit lightly and got away towards the mountains, same as the preceding one. DUTCHER.

## Riverton Gun Club.

THE following scores were made on Friday at a shoot held on the Riverton Gun Club grounds, at Riverton, N. J. Those who took part were Edgar Murphy, Cartaret Gun Club, New York; Fred Hoey, Hollywood Gun Club; W. B. Ogden, Elk Ridge Gun Club, Baltimore; Robert A. Welch, T. S. Dando, G H. Edwards and F. Leonard, Riverton Gun Club. Murphy did the star work, killing 60 out of 61. He took the whole of two purses and half of the other, dividing the latter with Fred Hoey. Scores:

No. 1, miss and out:

| | | | |
|---|---|---|---|
| Murphy (30yds) | 12111222121—11 | Dando (30) | 211222220— 8 |
| Hoey (30) | 222221212222—11 | Edwards (27) | 1121210 — 6 |
| Leonard (30) | 222122122220—10 | Ogden (27) | 2222110 — 6 |
| Welch (30) | 1112221220 — 9 | | |

No. 2, 25 live birds, 30yds. rise, 50yds. boundary, entry $25:

| | |
|---|---|
| Edgar Murphy (30) | 2222212122101121221222112 —24 |
| W B Ogden (27) allowed 3 birds | 2212221112212222200112222022—24 |
| G H Edwards (27) allowed 1 bird | 0212222121012122221112012 0 —23 |
| T S Dando (30) | 0222222112112121220220w. —20 |
| F Leonard (30) | 2222222202222202210 —18 |
| Fred Hoey (30) | 1222212022122221020 —16 |
| R A Welch (30) | 20221222011120 —11 |

In the shoot-off Murphy won by killing 3 straight. Murphy took 50% of the purse, Ogden 30%, and Edwards 20%.

No. 3, miss and out:

| | |
|---|---|
| Murphy (30) | 212221111122222222222—21 |
| Leonard (30) | 122222222222222222210—20 |
| Hoey | 2222220 — 6 |
| Edwards | 1122220 — 6 |
| Dando | 2210 — 3 |
| Ogden | 20 — 1 |

## Tournament of the Soo Gun Club.

SIOUX CITY, Ia., Oct. 20.—The first annual tournament of the Soo Gun Club of this city was held on the 9th and 10th of this month. The attendance was good and the shoot a success in every way. The weather was fine but a high wind blew both days and caused the targets to be quite tricky, and high scores were not made as a rule. The club added some thirty-two special prizes to the different purses and a number of the boys went home loaded with various things a trap-shooter would like. The officers and members of the club did all in their power to make it pleasant for the visiting sportsmen. Every one had a royal good time and will be glad to visit Sioux City and take part in the next annual tournament of the Soo Gun Club. There were two medals given by the club emblematic of the Northwestern championship, one for live birds and one for targets. Mr. C. M. Grimm of Clear Lake, Ia., won the live bird medal after an exciting shoot off. Mr. Taylor of South Dakota won the target medal after a hard-fought battle on ties; he had to break thirty straight to win. Five dollars was added to every purse in the target events except on the medal shoot on the second day. Scores:

The merchandise prizes in the target events on the second day were distributed as follows:

No. 2: Abbott, one year's subscription to the *Daily Journal;* Johnson, one dozen photos; Higgins, box of Maurer's best cigars; Lyons buggy whip.

No. 3: Delano, $5 hat; Abbott, box of Rad's Own cigars; Wood, $5 shoes; Cople, hunting pants.

No. 5: Loomis, Angora rug; McNamara, rubber boots; Ackerman, hunting coat; Keller, knife.

No. 6: Damon, hunting coat; Johnson, umbrella; Ellis, chair; McNamara, gloves. C. W. BUDD.

## Highland Gun Club's Tournament.

DES MOINES, Ia., Oct. 18.—The fourth annual tournament of the Highland Gun Club closed to-day. The weather was fine each day and the tournament a success in every way. Among the visiting sportsmen in attendance were S. A. Tucker, representing Parker Bros.; Mr. Danlon, representing the Burgess Gun Co.; Mr. McQueen, of St. Paul; W. T. Irwin, of Peoria; C. M. Grimm, of Clear Lake; Hon. J G. Smith, of Algona; Van Emons, of Ottumwa; Mead, of St. Louis; Christianson and Hamaker, of Randall; Cottrell and Hoskins brothers, of Menlo; John Rice, of Odell; Peterson and Preston, of Coon Rapids; Hastings, of Carlisle; Mr. Sylvester, representing the Winchester Repeating Arms Co.; Dr. W. F. Carver, F. O. Hadley and Clarence Pond, of Kansas City.

The matches between Carver and Budd were shot on Monday and Tuesday, Oct. 15 and 16. Scores:

[The scores made in the Budd- Carver races appeared in our issue of Oct. 27.]

*First Day.*

No. 1, 10 targets, entrance $1: J. G. Smith 8, Grimm 9, McQueen 7, Cottrell 8, Blackbird 5, Lewis 7, Van 5, Hicks 7, Rice 10, Milner 9, Hamaker 8, Wilson 10, Damon 9, Budd 10, Mead 7, Sanford 6, Hoskins 8, Tucker 9.

No. 2, 15 targets, entrance $2: Grimm 13, Hamaker 9, McQueen 10, J. G. Smith 14, Wilson 15, Cottrell 15, Rice 10, Van 11, Hicks 12, Balt 12, Damon 14, Tucker 13, Hoskins 11, Sanford 12, Budd 13, Mead 14, Blackbird 11.

No. 4, 8 live birds, entrance $6:

| | | | |
|---|---|---|---|

# Answers to Correspondents.

**No notice taken of anonymous communications.**

J. G. S., Brooklyn.—Please send name to this office; it will be considered as confidential.

J. S S., Denver, Col.—Please settle a dispute here by stating what a Chesapeake canvasback duck will weigh. Party here says it must be 4lbs. or more to be considered a prime or saleable duck. Our birds do not weigh much over 3lbs. Ans. The weight of the average canvasback does not exceed 3lbs.

## The Great Northern's Game Book.

THE lines of the Great Northern Railway run west from St. Paul to the Pacific coast, and so cross Minnesota, North Dakota, Montana, Idaho and Washington; in other words, some of the best hunting and fishing grounds left in this country. The points on this line where good sport may be had are many, yet it is not always easy to obtain information about such points, or to learn what special game or fish are to be found at them, or what special arrangements must be made for a trip.

Mr. Malcolm E. Nichols is planning a small but extremely comprehensive book which will give at a glance detailed information on all these points of the very kind most needed by the sportsman. The book will consist of an alphabetical numbered list of the Great Northern stations, which will be followed by a number of columns variously headed. In these columns will be found—among other things—the fare to the point, the kind of game there, whether it is plenty or scarce, the arm needed—whether rifle or shotgun—whether a guids is needed or not and his price per day, whether or no a dog is required, if a team must be used, and if so, its price per day. The series of columns devoted to fish is similarly arranged, and the information given is compact and is intended to cover every possible inquiry that the sportsman would make.

Another division of this compendium will be a list of the game and fish found in the country of the Great Northern, and following each species is a list, by numbers, of the stations at which it can be taken. A list of all books pertaining to the various species is to be printed, so that the reader may fully inform himself as to the habits of the game he may elect to follow.

It is probable that this little work, which will be a sort of sportsman's gazetteer of the Northwestern United States, will be ready in about six weeks, and that it will be sold for a small sum. Sportsmen who are interested should correspond with Mr. Malcolm E. Nichols, Advertising Manager, Great Northern R. R., St. Paul, Minn.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

The growing popularity and success of the EMPIRE TARGET are causing our competitors to renew their efforts to malign its qualities by calling it a "cheap imitation and inferior substitute," but it would seem by the enormous sales and the large list of leading jobbers and dealers handling the EMPIRE that their efforts were not "panning out" as they would wish. We are informed by the largest dealers that the Empire is giving better satisfaction than any other target they ever handled. The reason for this is that the Empire is a strictly first-class article and sold on its merits. It is manufactured under the management of experts, who have been in the business from its beginning, and made by the most expensive and perfect automatic machinery, from the very best composition that is possible to put in a target, and so shaped and constructed as to make the surest breaker and flyer, and we challenge our competitors to prove otherwise.

**Empire targets cost no more—perhaps less—than any other, and can be thrown from all principal traps.**

## NEW EDITION.

Lancaster's Famous Book,

# THE ART OF SHOOTING.

**By CHARLES LANCASTER.**

**AUTHOR'S PREFACE.**

At the special request of many gentlemen who have placed themselves in my hands for instruction in the Art of Shooting, I have written this treatise. I have endeavored to meet the special requirements of those who are anxious to become proficient in the art, and who have hitherto been unable to obtain, in a precise form, the information necessary for studying the first principles of shooting at moving objects.

I have had the honor of coaching many gentlemen, and have carefully studied the points especially requiring attention that have cropped up from time to time while giving instruction. I hope that those who favor me by studying this treatise may quickly gain the knowledge so essential for the making of an average if not brilliant shot.

I have purposely refrained from touching on the several merits of any class of gun—being a gun-maker myself; and, indeed, so many good works on the subject have been written, that it is really unnecessary.

I trust that authors from whose writings I have made extracts will pardon me when they recollect that I have at heart one object, viz., the advancement of a manly sport which gives pleasure, health and occupation to many, and to the patronage of whose followers I am indebted for many pleasant days.

# American Big Game Hunting

The Book of the Boone and Crockett Club.

EDITORS: THEODORE ROOSEVELT, GEORGE BIRD GRINNELL.

Entertaining sketches of hunting and exploration by members of the Club. The handsome volume comes from the DeVinne Press; a large octavo of 345 pages, with 16 full page Illustrations by leading artists. Price $2.50, postpaid.

**FOREST AND STREAM PUBLISHING COMPANY,**
**318 Broadway, New York.**

## BOOKS ON SHOOTING.

**New Editions.**

### The Modern Shotgun.

**By W. W. GREENER.**

PRICE, $1.00.

### The Gun and its Development.

**By W. W. GREENER.**

PRICE, $2.50.

These volumes have been for some time out of print, and new editions revised by the author have just been received. There is scarcely any one whose utterances with regard to shotguns and rifles are entitled to as much weight as Mr. Greener's, for he has been making these arms for many years. To his great knowledge of them he adds a pleasant and clear style in writing, which adds to the value of his books. Every American who uses a gun ought to read these books. Sent postpaid on receipt of price.

FOREST AND STREAM PUBLISHING CO., 318 Broadway, N. Y.

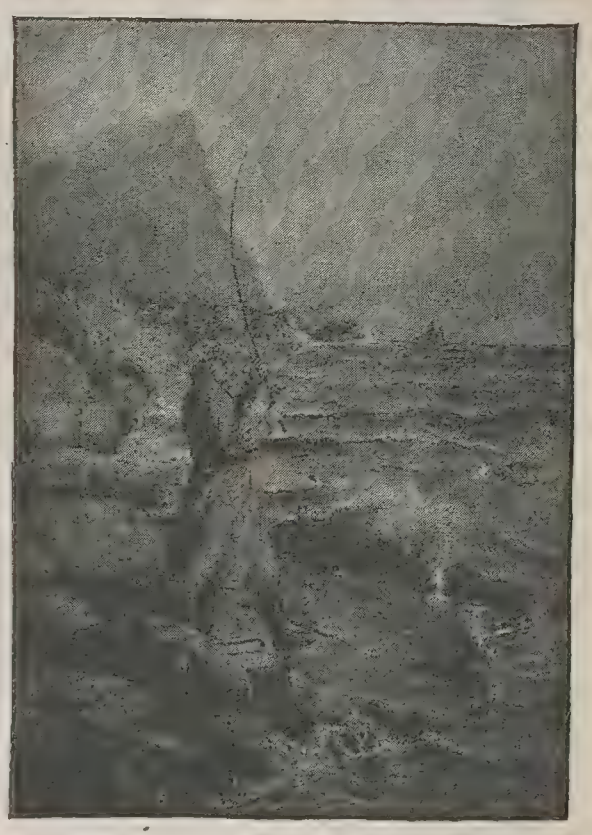
# Forest and Stream's Outdoor Scenes.

FROM ORIGINALS IN WATER COLOR AND OIL, PAINTED EXPRESSLY FOR THE FOREST AND STREAM.

HE'S GOT THEM.

JACKSNIPE COMING IN.

## AS PREMIUMS.



We have prepared as premiums a set of four beautiful and artistic reproductions of original paintings of realistic outdoor scenes. The art work is the best obtainable in New York; the pictures are rich in effect and are intended for framing. They are done in 12 colors. The yacht race is from an oil painting; the others from water colors. The scenes are shown in the small cuts herewith. The plates are 14¾ x 19in. The pictures are sent both to **new** subscribers and to **old** subscribers upon renewal, on the following terms:

**Forest and Stream** *one year and the four pictures*, **$5.**
**Forest and Stream** *6 months and any two pictures*, **$3.**

If subscribing for 6 mos. designate by title the two pictures desired. Single pictures will be sold separately, price $1.50 each, or the set, $5. Remit by express or postal money order, payable to Forest and Stream Publishing Co., 318 Broadway, New York.

The pictures are sent by mail, postpaid, wrapped in tube.

Copies of them may be seen at this office, and inspection is invited.

### Uncle Lisha's Shop.

LIFE IN A CORNER OF YANKEELAND.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies." The talk naturally ran much on hunting stories and wood lore, but although the stories told were generally good, their truthfulness was not always accepted without question, and the volume abounds as much in dialogue as in narrative. "Uncle Lisha's Shop" is brimful of quaint humor and sentiment, and there is an unmistakable touch of human nature in Uncle Lisha himself, and his good old wife, Aunt Jerushy; in Sam Lovel, the hunter, and in fact in all the other characters introduced.

### Sam Lovel's Camps.

UNCLE LISHA'S FRIENDS UNDER BARK AND CANVAS.

When Uncle Lisha went West, Sam Lovel took Antoine as his partner, and the fortunes and misfortunes of the two as trappers are described with all the charm of our author's quaint style, while their friends and enemies, and all with whom they are brought into contact, in the course of the story, step on to the stage real living flesh and blood creatures drawn with such fidelity to life that the reader never doubts that he would recognize any one of them from the description, should it ever be his good or ill fortune to run against him.

### Danvis Folks.

A SEQUEL TO THE SHOP AND THE CAMPS.

This volume is a collection into book form of the "Danvis Folks" chapters published in FOREST AND STREAM. It relates the further fortunes of Uncle Lisha, Sam Lovel, Granther Hill and those personages of the story whom we know so well. Mr. Robinson avers that his characters were of the old times and have passed away. That surely is a mistake. They are living to-day here in these three books, and the Vermont author has endowed them with qualities which will give them long life to come. If you already have on your shelves the Shop and the Camps, you have a place there for this third volume.

Sent postpaid, the Shop and the Camps, $1.00 each, the Danvis Folks, $1.25.

# That Soap Story

told in our issue of Oct. 6, as an extract from Dr. Peirce's "A Man from Corpus Christi," was only one of the funny episodes told of in the book. There are scores of laughs and hundreds of chuckles between the covers. We would not dare to go into camp with the man who could read the chapters and not chuckle over the scrapes and escapes of this original citizen of Corpus.

Illustrated by no special artist; 257 pages; price a dollar and a half.

**FOREST AND STREAM PUBLISHING CO.,**
**318 Broadway, New York.**

# Wildfowl Shooting

is one of the branches of shooting treated fully and well in Howland Gasper's "Complete Sportsman." The beginner will find Mr Gasper's instructions clear, readily understood, and helpful. The oldest gunner in the land will find them pretty close to what he would say himself. The "Complete Sportsman" is a book for wild duck and wild goose shooters. 227 pages, 17 illustrations, $2.00.

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

The plates are for frames 14 x 19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream** *one year and the set of four pictures*, **$5.**
**Forest and Stream** *6 months and any two of the pictures*, **$3.**

☞ Remit by express money order, postal money order, or postal note. Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

### *SPORTSMEN, JUDGES AND WARDENS.*

WE certainly have no intention of giving undue prominence to the affair of the New Jersey judges, who stand charged by Game Warden Charles A. Shriner with a violation of the game law in having unlawfully shot ducks from a steam launch on Greenwood Lake, but the case has assumed a phase which merits attention.

The approved standard of sportsmanship has been set so high in these days that not all who take part in field sports may lay claim to recognition as genuine sportsmen. They may be good shots or expert fly-casters, and yet lack those qualities which are requisite for admission to the ranks. Tried by his part in the Greenwood Lake incident, may Chief Justice Dixon be classed as a sportsman?

As in this country at least all sportsmen are on one footing in the field, and men of the gun recognize no class distinctions, so, too, all are equal with respect to the game laws and their observance or want of observance. When Warden Shriner swore out his complaint for Judge Dixon and his companions, two courses were open to the accused, either of them perfectly honorable for citizen, sportsman or judge. If guilty, he might have answered to the charge, pleading in extenuation an inadvertent offense, and have paid his fine. If guiltless, his was the privilege accorded as of right to every wrongly accused person, to declare his innocence and prove it.

When this duck-shooting charge was first brought, one of the party, Judge Inglis, seemed inclined to adopt the first mode of dealing with the case both for himself and for Judge Dixon and the others. Not denying the unlawful shooting, he averred that before going out in the man DeGraw's launch, the duck hunters had consulted a copy of the statute and had failed to note in it any prohibition of the practice, and that their violation of the law had therefore been unintentional. This, it is true, was a lame excuse for a jurist, nevertheless if the circumstances were as related, and if the accused persons had stood by Judge Inglis and had paid their fines, they would have come out of the affair with comparative credit. One of them in fact—a layman—manifested a desire to adopt this honorable course, for before the Paterson magistrate he put in a plea of *non vult.* (which was to say that he had not intentionally offended), and expressed a readiness to pay his fine; but none of the others joined him. Now, if Judge Dixon did shoot ducks unlawfully, and is yet unwilling to settle promptly and cheerfully for his infraction of the game law, may he be classed as a sportsman?

If, on the other hand, the Chief Justice did not shoot the ducks, it would have been, when the case came up last week, the part of a genuine sportsman, a good citizen, and a judicial officer jealous of his honor, to have denied the charge and made his defense on the facts. Did he do this? On the contrary, as reported in our game column, the eminent jurist avoided the plain issue of fact, and asked for the dismissal of the action on the ground of a defective complaint. Failing to accomplish this, he took the case on purely technical points to a higher court. The presumption is usually against a defendant who, instead of meeting the issue of fact frankly and fearlessly, skulks behind a plea of technicalities. When one is charged with shooting ducks unlawfully and answers the accusation by saying that the complaint is defective, is he to be regarded as a sportsman?

As a matter of fact, we suspect, that whether he may be regarded as a sportsman is perfectly immaterial to the Chief Justice of the Supreme Court of New Jersey; he probably is concerned with weightier subjects of thought. The point is indeed of little consequence.

But it is of consequence, and of the very highest consequence, that we should have a clear understanding, in New Jersey and every other State in the Union, that men of all grades and stations, whether in public life or private citizens, are without distinction all alike amenable to the game laws. There are those who appear to think otherwise. The Under Sheriff of Passaic county, for instance, is quoted as saying in comment on the Greenwood Lake affair that it was "a gross outrage that a miserable fish warden should be so presumptuous as to prosecute a Justice of the Supreme Court." That was a foolish and impudent remark to come from a peace officer. If the extraordinary sentiment it embodies is held and acted upon by the other under-strappers in the office of the Sheriff of Passaic county, we advise that official to rid himself of the whole lot of them.

If anybody in New Jersey or out of it doubts the perfect propriety of Game Warden Shriner's course in prosecuting Judge Dixon, let him reflect that there are particular reasons why a Justice of the Supreme Court should observe the game laws, or failing in this, should be prosecuted by a game warden, "miserable" or otherwise.

In the first place, by reason of his position, a judge should be as a shining light, and exemplar in all that pertains to good citizenship. That means that he should scrupulously respect and abide by the law of the land, the game law included.

When charged with a violation of law, a game statute or any other, if guilty he should promptly pay the penalty; if innocent he should as promptly prove his innocence, without resorting to avoidance and technical pleading. In other words, a Justice of the Supreme Court stands with respect to law just where any other citizen stands; he is under precisely the same obligations and has no immunity from them.

Moreover, since game laws are so often and so mischievously regarded with disfavor as "class legislation," it is the duty and should be welcomed as the privilege of a high-minded judge, when occasion offers, to correct this mistaken prejudice by showing that the game statutes make no distinction of persons, but apply to all men, the highest as the lowest. In the present case, for example, Chief Justice Dixon should improve the opportunity to rebuke the un-American and contemptible servility manifested in the sentiment of the Under Sheriff of Passaic county, by himself making cheerful and ready reparation for his own deliberate or inadvertent violation of a game statute, or else he should clear himself of the charge precisely as he would expect of the humblest citizen in the land.

If these are good reasons for a Supreme Court Justice's conformity to the game laws, they are likewise reasons quite as cogent why a game warden should enforce such obedience; and they not only warranted Game Warden Shriner in taking the course he did, but compelled him to adopt it. If he shall now permit himself to be swerved from his plain duty by the silly pratings of under-sheriffs, he will be faithless to his oath of office, for that oath was to enforce the laws against all men, without any exception in favor of judges who shoot ducks from steam launches.

### *VERMONT DEER.*

IN Vermont deer are protected all the season through, and have been for many years, ever since some public-spirited citizens of Rutland bought a herd of Adirondack deer and turned them out in the Green Mountains. The imported animals have multiplied and are growing more numerous every year. So too are the native deer in the western part of the State, which have enjoyed a certain amount of immunity under the law.

The guileless Yankees and the artless Canucks of the agricultural districts where the deer are found have been vying with each other in telling pitiful stories of the depredations of the game upon their crops. To listen to their tales of woe is to be told that their condition is more desperate than that of the poverty-stricken and deer-devoured crofters; and now they have appealed to the Legislature for relief. All they ask is permission to defend their altars and their fires and the green graves of their sires by repelling with clubs and guns the cabbage-cropping deer and potato-blighting partridge. A bill to this effect has been introduced at Montpelier, along with another one offering a bounty of a dollar a head on rattlesnakes.

We notice, however, that in their biennial report to the Legislature the Commissioners of Fisheries and Game aver in substance that this talk about the destruction of crops by deer is nonsense; but then the Commissioners are not hankering after deer meat.

They explain that among citizens of the three counties of Essex, Orleans and Lamoille, there is a special demand for a short open deer season. In these counties violations of the law have been numerous, but now the residents promise that if they shall be given liberty to hunt deer a part of the time, they will rigidly obey the law for the remainder of the year. This is as if a man who was making away with his neighbor's hay should propose to him: If you will let me take a load or two openly I will no longer steal it at night. That is not a very exalted stand to take, neither for Yankee nor Canuck; and it would be a pity if the Legislature should sacrifice the true game interests of Vermont in concession to such a highway robber style of argument.

### *SNAP SHOTS.*

HAPPY indeed is the sportsman who is mated with just the right companion for a shooting chum. In such a union the rules of mathematics are thrown to the winds; for while twice one is two, and two guns may secure twice as much game as one, the satisfaction two friends can get out of an excursion is ten-fold or a hundred-fold what may be given to one alone. To begin at the very beginning—and that is where the fun of an outing begins if at all—there is a deal more pleasure in planning and discussing the campaign with another who is to share it than there is in figuring it out alone. And to go on to the end of it—if the end ever comes while memory holds—recollections are fresher and clearer and dearer if there be two to remember and talk together of the field days of the past. In all these three phases of one's outing—the anticipation, the realization and the retrospect—one needs a friend to share them, and by sharing each to increase it.

---

Thus much of the satisfaction of field sports consists in the companionships they create and foster and cement. Take away from an outing this element of social intercourse and often there will be very little left. Some of the pleasantest and firmest friendships of a lifetime have been formed in the field. Some of the friends whose absences we most deplore, for whose deaths we sorrow most sincerely, are the friends and companions of the camp and field and stream and shore. For more than one gunner old or young the charm of his once favorite sport has vanished, because he can no longer enjoy it in company with one whose personality lent to it its chief fascination.

---

Abundant promise is given in the prospectus of the Sportsmen's Exposition sent us to-day by Secretary Webster. The scheme has been developed to meet the requirements of an affair worthy American enterprise. The promotors should have prompt and generous co-operation and unstinted support. If the Exposition shall be in actual attainment a half of what is here outlined, it will prove an event of incalculable benefit to the interests concerned.

# The Sportsman Tourist.

## IN QUEST OF OUANANICHE.

LET any one who is oppressed with "that tired feeling," which plays so important a part in the literature of modern advertisements, beware of patent medicines, and go to Saguenay River, where he will find Ponce de Leon's spring of youth. If the affected person does not return from that trip with a new lease of life, his malady must be a constitutional laziness which can only be cured in the next world.

After a wearisome journey from Quebec, occupying the entire day, the traveler is landed at Roberval by the one train of which the Quebec & Lake St. John Railroad is the proud possessor. There is one parlor car, which does duty on the return trip as a sleeping car, and I have often wondered when the solemn faced solitary porter managed to get a wink of sleep, as he is almost constantly on the road. There is a very fine hotel at Roberval, where fishing parties are equipped with tents, provisions, etc., and where the last taste of civilization and champagne is obtained. The trip across Lake St. John on the steamer gives one a little idea of the glorious air which is to be our sovereign panacea for the woes of the tired man. At the Island House, the guides are in waiting, standing beside their canoes, in their picturesque costumes, which look like the pickings of some second-hand clothing emporium. I selected two extremely villanous looking Kanucks, and after loading the canoes, we started down the river, *en route* for the camping ground on Isle Malîne.

The skill with which Thomas & Cie. steered the canoe through the rapids was simply marvellous. The scenery on that part of the Saguenay is wonderful; so wild and grand that one feels far removed from the humdrum of city life, and a sense of exultation at the beauty of nature takes possession of the tired man in the canoe. Everything seems more interesting by contrast, and the recollection of voyages on other rivers involuntarily impresses on the traveler the grandeur of the Saguenay. A trip on the Bosporus in a caïque is certainly enjoyable, the beautiful shores dotted with marble palaces and red-topped Turkish houses impress you as being entirely harmonious and soothing; but the banks of the Saguenay as they slip by you, with their ever changing glimpses of forests and the fast receding islets and bold rocks, give you a much more poignant feeling of exhilaration and contentment. Portages are made around the more dangerous rapids, where a canoe would have no chance to live. Then the burly Thomas shouldered the canoe and started at a brisk pace along the difficult pathway, while *son associé* Joseph (called Spaghetti for short by a member of the party) put the baggage on his head and trotted along in the wake of his senior partner. Isle Malîne is about eight miles from Lake St. John, and is surrounded by rapids, which make the approach in canoes extremely exciting. Pitching tents in a pouring rain, while the future occupants thereof are sitting on a log, clad in mackintoshes and shielded by leaky umbrellas, knocked some of the poetry out of the situation; but when the sun appeared the next morning in all its glory, the trials and tribulations of the preceding night were forgotten.

Ouananiche, or landlocked salmon, are exceedingly gamy and they certainly are blessed with a large amount of intelligence, which makes their capture very difficult. The flies which seemed to tempt them especially were Jock-Scotts and Seth-Greens. It is wonderful how these fish fight their way up against the rapids; they seem to be endowed with wonderful strength, even in adversity. The angler must go out equipped with high rubber boots, and his trusty guide or "heeler" must carry a strong landing net. When a good spot is found, generally near some rapid, the fisherman wades out to a rock, from which point of vantage his casts are made. If the ouananiche strikes the fly, a little *coup* (as the guides say) should be given to the rod, and then the struggle commences. The fish will generally start for the middle of the stream, then suddenly dart back and jump several feet out of the water, giving the line a smart whack with his tail. If the line is taut he will break the leader, unless you lower the rod as he leaves the water. If there happens to be any convenient rock near by he will try to get under it. He is very ugly and spiteful, and you must watch him every second, or he will surely get away. It often takes from 25 to 30 minutes to bring one of the wily ouananiche near enough to enable the guide to reach it with the landing net. It is splendid sport, and when the angler is lucky enough to get a 4-pounder, the pleasure is very keen indeed.

The guides are very interesting men, well worth a careful study. They are big, strong fellows, with hearts proportionate in size to their bodies, and an inborn sense of courtesy which is remarkable. They speak a queer sort of French which is very difficult to understand at first, but which is interesting from its originality. Few of them can read or write. They are willing to do anything for you, and seem to know just where the fish are lurking. Some days it is impossible to lure ouananiche from their hiding places, and often they will jump all about you and refuse to touch any kind of a fly. On a cloudy day, a yellow-May or scarlet-ibis may tempt them, or possibly, if you are fishing in the afternoon, a gray or light brown fly will be just the thing. It is almost useless to fish in the rain, as the ouananiche will not rise.

Time goes very rapidly up there on the Saguenay, and in the evenings, in place of opera, or the drama, you are entertained by the guides, who sing quaint little French songs, some of which remind the listener of Eastern melodies, while others are pretty little love songs. The men dance, with the big camp-fire as a background, all sorts of strange jigs and clogs, and often dressing themselves up, imitate the antics of a bear, or other animals, in the most lifelike manner. They are very quick in arranging for their performances, improvising costumes from the camping outfit with much dexterity, and further, seem to enjoy the show as much as the spectators. After a few days, they commenced to hum the airs of some of our college songs, and the accent which they gave to the words, set us in roars of laughter.

There were some magnificent rapids close by the encampment, which one never tired of watching. With a novel in hand, an afternoon would slip by very quickly in contemplation of those surging waters. The guides were good cooks, and as the appetites of the campers were sure to be very keen, they were kept busy broiling fish, which is the principal article of diet. One never tires of the ouananiche; there is something very appetizing in the pinkish tinge. One of the guides recited his adventures with caribou to me in a manner which was made more interesting by the quaintness of his French. They lead a queer sort of roving life, and never seem to "trouble trouble until trouble troubles them." They can do anything, from acting as valet to steering a canoe, and whatever they undertake, they do well. They are like children in their thankfulness for favors conferred, and the present of a jackknife produces a delirium of joy which is manifested by cries and laughter of a truly wild tone. One of the men, who was a great-grandfather, told us many pleasant stories of the home life of his many descendants. Age had not dulled his strength, and his eye was just as quick as it used to be. I have seen one of the men lie on his back and lift another man weighing 160lbs. in the palms of his hands, and then stand up, holding his human burden high in the air. It is wonderful to see them crossing a rapid; they wait until the water is just right, then they make a bold dash for the other side, landing you safely, after a very exciting trip.

We had four Indians who were very timid fellows, and who seldom even smiled. It was a weird sight to watch those surly Indians, seated around a table, with pipes as ornaments to their solemn, strongly marked faces, washing the camp dishes in silence, broken only by the occasional monosyllabic exclamation of the chief who was giving some order to the younger men. Washing dishes is as serious an affair to them as making treaties was to their ancestors. One of the Indians was a great favorite among the guides, who called him "La Jeunesse," as he was the pet of the crowd. As a general rule, however, the Indians kept apart from the Kanucks, sleeping in a separate tent, and being much of the time by themselves. They are quiet, inoffensive fellows who have a sad look and lack the animation and love of jollity of the Kanucks. The parting with these companions of our camping life at the Island House on Lake St. John, was really touching. They waved their brightly colored sashes at us and wished us "*bon voyage*," until the steamer had left them far behind.

If anybody wishes a complete change of air in a beautiful spot, let him get a congenial party and go to some island like Isle Maline on the Saguenay, where no telegrams, telephones or evening newspapers ever penetrate, and from which he will return to his work refreshed, and with a fund of pleasant recollections which will cheer him up all through the winter. JAMES E. WHEELER.

## DAYS AFIELD.

SOME time ago I heard a man remark, "The more I see of women the more I am in love with my wife, and the more I see of men the better I like my dog."

For more than ten years my gun had remained in its case. Old Rover, a black setter, that for so many seasons was the companion of many a day's tramp after the Bob Whites from New Jersey to Georgia, and was at all times my most devoted admirer, has been long since "gathered to his fathers." And as the frost was beginning to show a little at my temples, I fancied that the old love had been pretty well gotten out of me when last fall the Professor insisted that I should join him on a three-days' trip to Maryland.

The panic was on, had been on for five months. I had stuck to my desk every day, and it seemed as though the end had come to business and nothing was left but to worry, and fret, and chafe, and wonder how you would look offering twenty-five cents on the dollar.

My wife joined the Professor. The old hammer gun was rubbed up, two dogs borrowed, and on a Thursday morning in November 3 o'clock found us on a lonely steamboat wharf on the Eastern Shore. I won't describe those three days—I couldn't—I was eighteen again—and came home with the fever in my veins.

I won't tell how much I have spent the past year for a hammerless gun and a pair of Gladstone pups—one by Breeze, the other by Sig. Gladstone—nor how much John Lewis is charging me for breaking the Breeze—Gladstone pup Rim, nor what he writes me about him, nor how I am counting the days to get off down there in North Carolina to see the puppies work. Mrs. B. may see this, and she will have too good an argument for a sealskin coat if I do. But I'm going if well enough.

You don't know the Professor? Well, perhaps you do and don't know it. He's six feet one, big brained and bigger hearted, and the steady tramp of his long legs over fields, and mountains, and rocks, through swales and bogs, and swamps, would tire a mule. His quiet laugh and subtle wit, his thoughtfulness and fairness in shots, always ready to let you have more than half the bed when you are cramped for room (and you often are on a hunting trip), would just make you fall in love with him, and agree with him, that after all some men are better than most dogs.

We have been off this year after ruffed grouse—pheasants they call them in Pennsylvania mountains, partridges in New England and New York. What a king of game birds he is. Does any one know another that can get on wing and away as quickly and that requires such tireless energy to hunt?

Away up in Pike county, a glorious morning, three good dogs, Ben Hur and his hopeful son Ben Hadad with the Professor, Donald with me. Bartleson is waiting for us. Only he has to go and borrow a gun after we arrive. We are soon off, however, up through a piece of hemlock and no birds, up over the mountain, down again in a swale. I am going up an old road when suddenly Donald comes out in front of me and is "stiff." The birds are there under that bunch of chestnut saplings. I am on the wrong side, but the Professor is up on the hill above me. A step and that roar of wings, and the crack of the Professor's gun, another roar, another crack, still another, but evidently the Professor is putting in new shells; he is ready for the next, and the next. They are all out now and the dead are gathered in. I break through the thicket and go a little way when Donald once more "comes down" (he was just eleven months old that day), and up gets a bird. For the first time in my life I fire at a ruffed grouse. I am not quick enough. Bartleson says I hit him and that he fell about 30yds. off a little to the left. I think not and put in a new shell, and when Donald goes in, the way that bird comes out of those bushes shows that Bartleson is wrong. The first barrel cracks and still that bird is off. I am steadier now and the left barrel drops him.

Did I say a moment ago that I was eighteen again? Well, I am fourteen now and school has just "let out." Oh! how I yell and jump and struggle through those briers and laurels, and what a hunt Donald and I have before that bird is stowed in my capacious pocket.

Never was such a spring as the one we found to eat our lunch by; forgetting my wedding day, my first boy's first birthday, and some other days, I was going to say never was there such a happy day. I had some English dairy cheese and gave some to Bartleson; he remarked, "Golly, if a man had a little of that in each hand he could walk on the water." This amused the Professor, as he had some Roquefort; he invited Bartleson to have some of his cheese, "he might like it better," and putting a liberal piece on a slice of bread gave it to him. Bartleson starts in, looks up, looks silly, his eyes water, and you can see that the harder he chews the larger the "cud" becomes; finally he gulped it down with a shudder, and a "Ge-whiz, that would cure the catarrh." But he is a good fellow, and the Professor did not seem hurt at such a slighting remark about his food, so trouble was averted.

I won't attempt the whole day. It is almost night and we are crossing a pretty swamp. The Professor remarks, "This looks like a promising place for woodcock." Bartleson says that sometimes there are some there. I am across and out of it, calling for my dog. He don't come; I call to the Professor to call in his dogs and "Come on; it will soon be dark and we have a long drive and I am very tired." He replies, "Wait a moment," and then, "Oh, G orge, come here quick." Tired? No; I am in that thicket again, and there, right there in that little open glade is Ben Hur "down," and fully fifteen feet away is Donald, backing like a veteran. To the right is the Professor's shot, left mine. We step forward, and with that gently whistling-like rustle of wings away goes a woodcock to the right, and I can see the blaze as the Professor's gun cracks. Both dogs still stood firm. I stepped forward and away goes another, this time to the left. They are quickly gathered in, and as we leave the woods Bartleson says, "If I owned that pup I wouldn't take fifty dollars for him." I wonder what made the Professor smile at this? He don't know what he cost and I saw no necessity for saying "Neither would I." Poor old Rover. I like the pup, but I would rather have had you.

We had ten ruffed grouse and two woodcock.

As we drive home in the twilight we are tired, and hungry and happy. What a glorious day we have had.

G. B.

NEW YORK, Oct. 30.

## WOODLANDS.

*Editor Forest and Stream:*

Much is being said by men of good judgment throughout the country about preserving our forests in a measure, and increasing their areas in some sections where there is a scarcity of timber and firewood. Now, in my opinion it is the height of wisdom for the people, severally and jointly, to take action in a matter of so much importance, for that is a work that more or less interests nearly every person in the country.

If we regulate the forests we also do the same for the streams, for in the economy of nature forests and streams are so generally connected, that if considerable tracts of one are destroyed the other will surely suffer in proportion.

Let us take the closest view of the subject. If we ramble through any hilly woodland after a rain, we will notice one drop of water after another coursing along the little rootlets, fibers and leaves, and it will often continue dripping so for quite a while, sometimes in moist places for days afterward; so in this way the water is kept from floating off of the land in a body down the valleys, the rootlets, sticks and leaves acting together as a regulator of the drainage of the land. Then, again, one will often observe some rivulet running out of a moist place under a thick growth of timber and bushes. How clear it is, and how regular its volume of water throughout the year. Afterward, when the timber is cut off or burned up and the ground cleared, the little stream is gone during a greater part of the time, and when it does flow, what a volume of muddy water pours down its bed instead of the clear stream that sparkled there formerly. Then again many of us can recall to mind some larger stream draining a considerable section of country, how at one time it seemed to be full most of the year before the woodland at its sources had been cleared up, then afterward how irregular the flow of the water was, according to the state of the weather. That shows that nature's regulators of the stream were gone.

Now, the very law that governs these examples also governs every stream, large or small, throughout the once and now wooded portions of our country, which includes about all of the land east of the western prairies. So the people must regulate the forests at the sources of the streams, if they wish in a measure to control the volume of water in them, for the one follows the other as sure as effect follows cause. In helping to do it let the general government take the matter in hand, and on lands still owned by it preserve as much as possible the growth of wood, and appoint commissioners to have the general oversight of the business as well as to study the laws of painting, culture, growth and preservation of forests, and to recommend to the people the best methods to accomplish the desired ends. It would be of a much greater practical value to the people than will many of the laws now enacted. Then let the legislatures of the several States take action in the matter by buying up the cheap mountain sections and waste lands, as for instance the Adirondack region in New York State, and forbid the cutting of timber on them except under certain restrictions. By so doing the water in the streams of those sections would not diminish in volume, and besides the value of property, both public and private, would be increased, to say nothing of the natural parks, camping grounds, hunting and fishing tracts, and breathing places generally that those lands would make for the people. Also a great deal might be accomplished throughout the country by individual efforts, that is, if many of the land owners, especially those living in partly denuded sections, would take enough interest in the matter to plant trees and to preserve the old growth, if any, by a judicious cutting out, and also by taking care of the sprout lands and young timber, for on any land where wood sprouts quickly but a few years will suffice to cover the ground with a thick growth of it, provided fires and cattle are kept out, especially when the trees are very young.

Arbor Day should be one of the leading holidays

throughout the country, and should be well observed by all classes. Not that the planting of a few dozen trees here and there will in itself amount to much, but it inculcates in the minds of the people, especially the younger portion, grand ideas of the beauty and value of trees, which will in after years be of great advantage to themselves and to the country at large. Let us take any farm; what a resource it is to the owner if there is a good-sized tract of timber on it. That seems to give a substantial look to the premises; even if the buildings and fences are poor; somehow a good wood lot seems to compensate in a great degree for their dilapidated look. There is considerable land on most farms such as steep hillsides, gullies and the like, that often look unsightly, and are of no real value, which, if clothed with trees, young or old, would certainly beautify the farm, besides being a source of profit to its owner. Then take any large tract of land; if it is well timbered we all know how much the landscape is beautified, and also what an improvement it is to the general face of the country around. I think the Druids in olden times had an eye to the beautiful in nature when they performed their rites and ceremonies beneath the branches of some venerable oak; for to many persons, as well as myself, one of the most pleasing objects in nature is a gigantic oak. It is something that scarcely any one will pass by without admiring, for we are all alike then, and the same may be said of any other sound, well-proportioned tree, be it in the open land or forest. Let any one of us go through a noble old forest; a certain indescribable feeling comes over him; it might be called a slight feeling of awe mingled with admiration, something akin to that which one experiences when in the vicinity of mountains, cataracts and other grand objects of nature. It is not an unpleasant sensation by any means, as we all know, and that is the reason why communing with our great mother in her woodland haunts is so delightful to her human children.

Now, let the Legislature and the people heartily join hands in preserving our forest lands and increasing their areas when necessary, for such work as that would be a lasting benefit to the people throughout the country.

## CUBAN SHOOTING.

SHOOTING in Cuba must be enjoyed under conditions which to any but a sportsman who loves his pastime would be unbearable. In the first place, the system of licenses is in Cuba a nuisance in every form of business or of pleasure you may undertake. From a cock fight to the leaving of the island in a perfectly legitimate manner, licenses and special permissions must be obtained, and invariably they are presented to you in any quantity of tape. I found that any shooting license obtained in Havana gave me no more protection than none at all. I was stopped on several occasions by the soldiers and escorted a mile or more to an outpost, where a captain who murdered English politely informed me that it was all right, that he would have come out after me but he found it best to rest after dinner. Then he beamed upon me, offered a cigar and went to sleep. I afterward found that if your gun is heard at a fort, soldiers are sent to bring you in so as to be sure you are not rescuing the island from the august hand of Her Majesty the Queen of Spain; and thereafter I saw to it that the soldiers invariably returned without finding me and with something more than air in the pocket.

I found very good shooting in the region about Caibarean, which is a seaport town two and one-half days away from Havana. Immediately outside the town lay tremendous swamps, nasty to walk around in, but the roosting place of bird creation. Parrots, pigeons, flamingoes, guinea hens and birds of names I know not, all are there in great numbers. Also a not so desirable element is to be found in the presence of young alligators and snakes. The alligators are not much to be feared, as only on the large rivers do they attain large size. But the snakes—I saw great and weird scenes in the swamps in which they played prominent parts. I have the skin of one before me now which I got last winter. He looked to be 38ft. several inches when I saw him, but quiet contemplation, tanning and shrinkage brings the figure to 12ft. 8½in. without head or tail.

Likewise horrible spidery crabs would flop over me and remind me that it was time dinner was ready and time to go home. But mud and rough country, snakes, crabs, tarantulas, scorpions and all the rest sink into nothingness when you stroll into town muddy and nasty looking, with a string of forty or more birds. Small boys then are much in evidence, and the fair sex gaze enraptured at you and your boots. Then the crowd pull over the birds when the hotel is reached. An evening at the American Consul's office recounting the day's joys.

All in all in Cuba there is much sport for the gunner. Remember that while snow is thick in the North, here you may have shooting galore, 1,200 miles away from New York and amid tropical surroundings of beauty and grandeur.

The man who is weary of commonplace life and wishes for the hereafter, should take a Spanish dictionary, gun and traps to Cuba for one winter, and if after being compelled to send to the American Consul's office for an interpreter to explain that you don't drink coffee in the morning, and being comfortably started off by train to Havana by the obliging station agent when you wanted to reach the other end of the island—if then one does not find himself compelled to gird up his loins and take an interest in living he will have to die; for the Cuban wots little of the school-learnt Spanish and the desires of the Northern mangler of his native tongue.

ROBERT PHILIP FROELICH.

### Colorado Game.

BERTHOUD, Colo., Oct. 27.—Duck hunting is very good here now. My son has a small lake that he has leased to some Denver sportsmen; and they come up here once or twice each week and usually get a nice string of about twenty ducks each, mostly mallards. No geese are alighting yet; some flying. Quail are on the increase under protection. I have a number of coveys on my place now, where two years ago there was not a quail. A friend of mine just returned from a hunting trip to Steamboat Springs, Colo., found deer quite plenty and had good success and a grand good time. My son just returned from my sheep ranch in Morgan Co., reports antelope quite numerous. I am going down in a few days and I want one.

## BREEDING HABITS OF KING PENGUIN.

IN Bulletin No. 2 of the United States National Museum (p. 41) Dr. J. H. Kidder mentions a curious habit of the king penguin (*Aptenodytes longirostris*) upon the authority of Captain Joseph J. Fuller. He says: "Captain Fuller, of the schooner Roswell King, informs me * * * that they [the king penguins] build no nests whatever, carrying the egg about in a pouch between the legs, and only laying it down for the purpose of changing it from male to female."

This Bulletin No. 2 was printed in 1875. In 1891 I had the good fortune to meet this same Captain Joseph J. Fuller, then about to sail for the Antarctic as master of the sealing schooner Francis Allyn. After some experimenting with cameras to find one best suited to the bad conditions of the Antarctic, we found a camera combining the essential virtues and agreed that one principal point to settle should be this one as to the egg-carrying habits of the penguins. If possible a king penguin was to be photographed so as to show the egg in position in the sac. Captain Fuller told me he felt sure he could manage the camera, which was fitted with a roll holder and films, but greatly feared the dark and foggy weather prevailing would hinder the best results.

About ten months later I received four rolls of films by schooner from St. Helena, where the Francis Allyn had

KING PENGUIN (*Apteno lytes longirostris*).

From the October *Auk*.

transhipped her catch of skins. They were Eastman films and many were excellent, especially such as had been exposed in sunlight at Cape Town, St. Helena, and Tristan d'Acunha. But the special efforts to photograph seals, sea elephants, penguins of all degrees, skuas (*Buphagus skua antarcticus*), Johnny rooks (*Senex australis*), sheath-bills (*Chionis minor*), and many another strange and interesting denizen of that comfortless Antarctic region were all failures, in part at least. The weather was no doubt largely responsible for this, and in many cases there was barely light enough to show a horizon line. The large percentage of failures was relieved by the fact that some of the best and most decipherable among them bore precisely upon the point stated by Dr. Kidder upon the authority of Captain Fuller. The photograph from which Mr. E. Whitney Blake has kindly made a careful scale drawing now reproduced, was one of the best of three, all meant to show the egg in the pouch. All three were taken on Kerguelen's Island during January, 1894, at which time the whole "rookery" of penguins was incubating. While the sailors caught the birds, then not a hard task, Captain Fuller photographed them, and while very bad photographically, it is possible to decipher at least one of them, as I think the drawing proves. A careful inspection of the original shows the larger end of the egg, which barely projects from the external sac, which holds it firmly between the thighs of the bird, a king penguin. The bird reclines in its position in the sailor's arms, while his finger holds the egg securely, to prevent the bird dropping it. The soles of the penguin's feet, if one may so speak, are turned up toward the camera, and are clearly defined against the breast. Mr. Blake's drawing shows all this and more.

The penguins, as shown in the photograph, stand dismally in pessimistic attitudes, scornful and disgusted at the intrusion, highly disapproving and indignant over the outrage with the camera. They seem to be wondering over the strange times on which they have fallen.

Upon Captain Fuller's return, nearly eighteen months after his departure, he brought me a most interesting mass of material, including a fine series of the eggs of *Chionis minor*, with skins of this singular bird, which is neither pigeon nor gull, yet partakes of the nature of each. He also secured eggs of the southern skua (*Buphagus skua antarcticus*), wandering albatross (*Diomedea exulans*) and others, all of which I retain in my cabinet.

If the accompanying drawing should be held to have settled this question, I shall hope to be allowed to convey the information to Captain Fuller, who is at present pursuing his isolated, arduous life among the seals, and to whom the credit should belong. I myself am entirely convinced from the development of my plate, that the case is proved beyond any question.—*R. G. Hazard in the Auk.*

### Color Variations of the Gray Squirrel.

THE exhibition of two distinct color varieties (often in the same nest) by a single species, as seen in the cases of the gray squirrel (*Sciurus carolinensis* [Gmelin] Allen) and the screech owl, *M. asio* (L.) is an interesting fact. When, in addition, as in the case of the gray squirrel, one variety (the black) seems to have been the original one in certain localities, and to be giving place slowly but surely to the other variety, the fact becomes still more interesting.

I have been told by old hunters that the black variety, they had heard, was quite common 100 years ago in some parts of Connecticut, but that for the last fifty or sixty years they had been practically extinct. So, too, in eastern New York, a friend of mine who had hunted squirrels for years in Rensselaer county, told me some fifteen years ago that he had never shot a black one, nor seen one in the woods, though years before that they had been quite common.

In the "Vertebrates of the Adirondack Region" Dr. Merriam says of the gray squirrel: "Fifteen years ago the two forms were about equally abundant along the western border of the region under consideration; but the black has gradually become less and less common, till now it may almost be regarded as one of our rarer mammals. However, it is still abundant in a number of places bordering Lake Ontario, both in this State and in Canada." (Transactions of the Linnæan Society of New York. Vol. II., 1884, p. 134.)

In regard to the western part of New York State Robert Munro, in "A Description of the Genesee Country," published in 1804, says: "Squirrels are so numerous in some years as considerably to injure corn; and upward of 2,000 of them have sometimes been killed in a day, which is occasionally appointed for that purpose by the inhabitants; the most common kinds of them are the black and the red, the gray colored being very scarce."

Old hunters at Le Roy, N. Y., some twelve miles west of the Genesee River, tell me that fifty or sixty years ago a gray squirrel was considered quite a prize there; not more than one gray to ten blacks being the ratio. To-day the ratio is more nearly thirty-five grays to one black. From my note book I find that during the seven years, 1877–83 inclusive, out of one hundred and twenty-four squirrels observed twelve were black, or about 9⅝ per cent. From 1884–90 inclusive, out of seventy-nine observed two were black, or about 2½ per cent. These were all observed within ten miles of Le Roy, most of them within six miles.

From my own experience and observation, extending over a period of about thirty years, it would seem that in the vicinity of Le Roy the gray form is replacing the black in a manner that may be compared to a wave advancing slowly from north to south.

Thirty years ago the black form was probably nearly, if not quite, as numerous as the gray, from two to four miles north of Le Roy, and probably more numerous at the same distance south of that village. To-day the black is very rarely found north of Le Roy, and is slowly giving place on the south to the gray form. At a distance of twelve to fifteen miles south the ratio of blacks is higher and I understand increases as the Pennsylvania line is approached, a distance of some sixty miles. Of the fourteen blacks recorded in my note book, as above, only one I believe, was taken north of Le Roy.

From the above facts it would seem that there must be some reason for the displacement of the black form by the gray, and that is not entirely due to chance, or to a

mere freak of coloration. In fact, if either form is a freak it would seem to be the gray, while the black would be the true form.

The reason of the displacement of the one form by the other will probably not be understood until we have more facts in regard to it. It seems to be somewhat dependent upon the length of time the locality has been settled, and the consequent more persistent hunting of the species. Possibly the gray color is a better protection from the hunter than the black, and so is taking its place.

When we were boys my friends and myself used to think that we were more likely to find the black squirrels in woods that were more swampy than those in which the grays were most numerous. If this were true the clearing off of the woods and the consequent drying up of the swamps would account to some extent for the disappearance of the blacks.

Many hunters claim that the head of the black is more slender and pointed than that of the gray, while the tail is not quite so bushy.

I should be very glad to receive any facts in regard to the relative abundance of the two forms, and to the displacement of the one by the other. F. M. COMSTOCK.

NATURAL SCIENCE ROOMS, Case School of Applied Science, Cleveland, O.

### Quail Reared with Chickens.

KNOXVILLE, Tenn., Oct. 20.—While Mr. J. T. Stuart, a prosperous farmer living near this place, was mowing his grass this summer, the machine cut off the head of a hen quail which was sitting on her nest. A broken egg showed that the eggs would have hatched in a few days. A little daughter of Mr. Stuart's took the eggs and carefully put them under a hen, whose eggs were to hatch in a day or two. Fourteen of the quail eggs hatched and sixteen of the hen's. For a week or so the young quail went under the hen at night, as the chickens did; after that they roosted in one corner of the coop by themselves.

The little girl fed and looked after them, and they seemed to have no fear of her, but would come and jump in her hand. The moment any one else came about they would run and hide. Their favorite hiding place was under the chickens, and sometimes two or three would try to get under one chicken, and in their efforts to hide would completely upset it. After they could fly fairly well they took up their abode in the garden, but would always come to the little girl's call of "Chick, chick, chick," and if at a distance would fly and alight at her feet. When they were quite small an old cock quail came for several days and tried to toll them away, but they would not go with him. They are now full grown and all are living but one, which killed itself against a wire gate only a few days ago. Mr. Stuart promised me that they should not be molested, and hopes that they will nest in his garden next year. S. B. D.

[Our correspondent will oblige us by reporting on the outcome of this domestic quail colony.]

### Grosbeak and Potato Bugs.

THERE is a theory among the farmers that the rose-breasted grosbeaks became more plenty when the potato bug first became abundant, and they may certainly be often seen making a meal of these insects. If that theory be true, we certainly have the potato bug to thank for the increase in numbers of a beautiful and interesting songster, although the aforesaid striped visitor to the potato vine would probably express anything but gratitude concerning his feathered devourer. J. R. B.

## Game Bag and Gun.

### THE BIG BUCK OF WALDEN'S RIDGE.

CHATTANOOGA, Tenn.—*Editor Forest and Stream:* I belong to the Chickamauga Rifle Club of this city, which counts among its members half a dozen fine rifle shots. I am also an old hunter although only twenty-nine of years of age. I was for six years employed as an civil engineer in the wilderness and swamps of Texas, Arkansas, Louisiana and Mississippi and learned the use and love of gun and rod, so thoroughly that now I find great trouble in getting rid of the inclination to hunt. I read your fine paper whenever I can get my hands on it, and silently size up some of the tales, as I expect the one I am going to relate will be sized up by my readers.

In September and October 1892, myself and seven more good companions took a two months' hunt in the headwaters of Yellowstone and Gros Ventre rivers, east and west of Yellowstone Park, and had great success in elk, moose, black tail and mule and antelope and also got one bear. However, this has nothing to do with the subject except to show that I have had some experience in hunting deer, and love the sport.

Our rifle club, composed of Squire Thomas Cowart, William Cooke, George I. Parks, J. H. Hogan, Washington Durango, William P. White and Pat. Craig, concluded to take a deer hunt on Walden's Ridge, which is a continuation of the Cumberland Mountains. We started on Wednesday morning, Sept. 20, in a wagon with one week's supplies for men and horses, and reached our destination at 3 P. M., 15 miles from Chattanooga. We camped near a spring, got our tents up and made ourselves comfortable that day. The next morning by daybreak we were eating our breakfast and were on the way to the nearest deer drive. Squire Cowart, who is an old and experienced hunter, and who owned the pack of hounds, was to do the driving. We made the drive in the morning, but failed to start anything, and the nearest we came to a deer was a cold trail; so we went back to camp for dinner. After a good dinner, which made us all feel like hunting, we started out again. Our leader made another drive, and was on the point of blowing his horn to call the men off the stands, as he had failed to start a deer, when he heard William P. White's old deer gun go off. We all knew that of course it was not a deer, as the dogs had not struck a trail, and with one accord we started to see what White had shot at, when all of a sudden we heard his gun again. When we reached his stand we found he had shot at a big turkey gobbler which had come walking along near him. White says he knocked the gobbler down, and it fell or fluttered over a precipice, and that he scrambled down the declivity to get his gobbler and jumped a fox, and shot at that; anyway, he did not get either one.

However, the noise his big old No. 10 deer gun made served us a good turn. Of course the hounds, having followed the driver back to the standers, ran to White as soon as he fired at the gobbler, and when White scrambled down the side of the declivity to get his turkey the hounds followed him; so that when White jumped the fox and shot at and missed it, the hounds took the trail and soon ran the fox into a hole. But they had not gone 200yds. on the fox race when they jumped a very large buck. Part of the dogs took after the buck and the balance treed the fox in a hole. Mr. Wm. Cooke was the only man who had not left his stand; and, strange to say, the buck made straight for his stand. Now, Mr. Cooke is one of the very best rifle shots in our club, and is now, and was then, wearing the gold medal that we shoot for at our weekly contests; but he did not have a fair chance at the buck, so missed him. The buck stopped within 150yds. of Mr. Cooke; but unfortunately his entire body was hidden from view by a clump of trees, and Mr. Cooke had to fire at his head. When the hunter fired, the buck turned completely around and took the back track.

Pat Craig and I were sitting upon our horses on the ridge, where we had been on the deer stands, and as we heard the hounds coming toward us again and heard the report of Mr. Cooke's .44-90 Winchester, we began to look about us. We galloped down the ridge half a mile or more, keeping ahead of the dogs all the time. Finally, as the dogs seemed to be getting nearer and nearer all the time, we dismounted and walked along, listening to the hounds. I was several hundred yards in advance of Pat and finally heard the brush breaking and then saw the buck at about 200yds. distance jumping up the side of the ridge. I ran to get nearer to him and get in ahead of him, but he saw me and I knew it was then or never; so I stopped and commenced to pump my repeater at him. I got five fairly good shots at an average range of probably 200yds., the buck doing all in his power to get away. I knew I had hit him, as he ducked his tail at the second shot, and after I had fired the last one he ran off several hundred yards more, and I saw him stop and lick his side. The dogs were then in 200yds. of him; so I knew he was badly wounded or he never would have stopped with the hounds in sight of him. Well, he was a rousing big buck, and I made up my mind that if it was necessary I would camp on his trail or get him. My horse was quarter of a mile from me and the country was too rough to make any progress on horseback, so I took it afoot. I ran a while, then walked, then ran again; but with all my efforts I finally lost the sound of the dogs and turned to go toward camp with a full determination to come back at daylight in the morning and try to put the dogs on the blood trail and follow it until I found my buck.

After walking for a half mile or more I fired my rifle to locate Pat, as it was growing dusk and I wanted company on my way home. In a few moments after I fired my gun the four dogs which had stuck to the deer and brought him by me, came jumping to me, licked my hands and jumped all over me. I knew that was too much affection for dogs to bestow upon an entire stranger, as I had never hunted with them before, but in a few moments I understood them as well as if they had told me in plain "Queen's English" what they wanted. All four dogs turned in a directly opposite direction from camp and started to trot all in a row, or one after the other, through the woods. I knew what they wanted. They had either killed the deer and wanted to take me to the carcass; or the deer had whipped them off and they wanted me to go and kill it. Every now and then the dogs would look back to see if I was coming, and trot on perfectly contented.

They carried me a half mile or more to the edge of a precipice and down in the gulch they went. I followed as best I could, swinging from tree to tree and scrambling over rocks and through brush until the bottom of the gulch was reached. The dogs kept just ahead of me and led the way through the thick laurel and mountain ivy until we finally got to the bed of the North Chickamauga Creek. This creek runs through a deep gorge or cañon, that cuts the mountain in two, and emerges almost at a level with the valley to flow into the Tennessee River. Well, when we reached the bed of the creek the first thing I saw was the big buck in a hole of water with nothing but his head and horns sticking out. As soon as he saw the dogs and me he sprang out of the water hole and dashed up the bed of the creek. The dogs took up the trail and before the buck had gone 300yds. overhauled him in another water hole about 12 or 15in. deep. I heard the melee and followed as fast as I could get over the big boulders in the bed of the creek. I paid no attention to the water and split the middie of the water holes, which were pretty deep in places.

Finally I got to the scene of conflict, and I give you my word that in all my hunting experience I never saw such a grand sight. I stood with my rifle in my hand for several minutes, and was a silent spectator of the "Fight Between the Wounded Stag and the Hounds." I have seen a score of pictures of this particular style of scene, but none to equal this one. The large buck fighting with desperation the four determined dogs, his charges and counter charges, the yelp of the hounds as the buck would strike one of them, the sighing of the wind among the tall fir trees, the whoop of the whippoorwill, the constant rippling of the mountain stream, and ever and anon the snort of the infuriated beast at bay—all helped to make a drama far grander to me than the masterpiece of Shakespeare played or reproduced by a Booth, a Keene or a McCullough. The natural hunting instinct in a man, when he possesses it in large measures as I do, will make him do things and enjoy things that seem absolutely absurd to the outside world.

The dogs had their equal, if not their superior, in this contest. The old buck was so big and heavy that they could not drag him down, and although they were four as good and plucky dogs as I ever saw in my life, I believe he would have killed the last one of them if I had not interfered. Sometimes all four of them would take hold of him at once, and then he would snort, cut at them with his forefeet, knock at them with his horns from side to side, and then make two or three jumps, wheel and come at them full tilt with his head down like a mad bull. Then I would see the dogs scatter, and one of them slip around and nip the old buck on the hams and heels until he would wheel again at this new foe.

It was getting dark and I began to fear lest the deer would make a plunge into the thick mountain ivy and get away from me; as I did not know how badly he was wounded; so I took very careful aim along the barrel of my rifle, as I could not see the sights, and let drive at his neck. At the crack of the rifle the deer tumbled over into the water and the hounds covered him and I thought all was over. But imagine my surprise when the old fellow got up, shook off the dogs and went at it again; he nearly killed one of the dogs after he was shot through the neck. Then I was determined to take no more chances; as he might yet get away from me; so I threw in another shell and walked up within 5ft. of his head and blew his brains out, as it was too dark to see how to shoot even at 20ft. distance. So ended the career of one of the finest specimens of the deer race that I ever killed or saw killed.

It was now past 7 o'clock in the evening and I was in the bottom of the deepest cañon in the mountains, three miles from camp and worn out with the exertion that I had gone through. However, a hunter must always take a hunter's fare; so I shouldered my rifle after dragging the buck to the edge of the water.

When I got half-way up the side of the gulch I heard Pat fire his gun out on top; and I was glad to hear it too; for I knew he had my horse with him. Pat, it seems, had been attracted to the edge of the precipice by my firing down in the gulch which he could plainly hear. He knew I was after the buck, but did not know exactly where I was; so he stayed on top of the mountain and kept firing and whooping until I got him. I was in for going to camp and coming back in the morning after the game; but Pat said that would never do, as the wild hogs and varmints would tear the deer all to pieces, and eat it up by daylight. Well, what would we do, go and camp in that den, among the varmints and rattlesnakes all night? That was not a pleasing thought, with no supper except milt or liver fried, with no cover to sleep on or put over us, and besides I was wet up to my waist with water wading through the holes in the creek, and not a dry thread on me from perspiration. Now the only thing to do was either to stay in that gulch under those conditions, by the side of that deer, or get it out that night. So we concluded to get it out.

It was now past eight o'clock and so dark we could not see our hands before our faces, not even a friendly star to light us. We set about with the aid of matches and collected sticks enough to build a fire, then by the blaze of the fire we found some pine knots and split them up with a big hunting knife and made a good torch apiece. Then we found some more pine knots and split up a good supply; tied them together into regular flambeaus and got ready to descend the precipice. It was a dangerous undertaking for both man and beast, as we had to take one horse to bring the deer out on. We made a good fire at our point of descent, so as to mark the place where we left Pat's horse and our rifles and coats and everything we could dispense with. We took a more rambling course than I had made going down; and after half an hour of slipping and sliding and breaking brush and climbing around boulders we reached the bottom. The horse was a sure-footed fellow and was luckily rough shod. We experienced great difficulty in getting him through the thick mountain laurel and ivy that bordered the creek bed; but had to break our way through. We both came near losing all of our clothes in this attempt, and received numerous scratches and bruises, as it was dark as ink, and one had to hold the light while the other did the breaking the way. We were one and one-half hours going 300yds., but finally got the horse to the carcass of the buck.

Then came the tug of war. Both of us were worn out from over-exertion in the coppice, and to get that big buck on the horse's back and tie him so he would not be dragged off in our ascent was the most skillful part of the whole job. However, we finally got him fastened, and started, and after stopping every few feet to unfasten his horns from the matted coppice, and scrambling and working and renewing our torchlight for two hours, we got to the top of the gulch. We had to take such a roundabout, winding route up the bank that we missed our fire and the spot where we left our other horse and guns on the crest of the gulch. We groped around for half an hour or more in the dark trying to find them; as the fire had burned out and all was in darkness, and finally, being disgusted and worn out, we determined to leave them in the woods all night and make our way back to camp.

We struck out in the direction we thought camp was, and after traveling for a mile or more, heard the welcome sound of a gun. We answered by whooping as loud as we could, and walked toward the sound. We finally heard another gun fire, and this time it was considerably nearer. We answered by whooping again, and this time made our voices heard. In a few minutes we were met by a party from camp who had lanterns and were out looking for us. We made tracks as fast as our legs could carry us and arrived there about 12 o'clock at night. All of the boys were delighted at seeing the buck brought in, and all agreed it was one of the largest ever seen in this section of the country. It had a magnificent set of horns, which were given to Mr. G. I. Parks, and Mr. William Cooke took the hide. The buck weighed a few pounds short of 200lbs. with his entrails out.

Well, after we had supper we had to tell how and where it was all done, as Pat and I were the only ones who had followed the buck at all.

One thing I wish to comment upon was the wonderful vitality of the animal. Any one who knows anything about the Winchester rifles know what tremendous muzzle velocity and striking force their model of 1886 Express rifles have. I was using a .40-70-330, with the bullet 1 part tin to 15 parts lead. Now, I shot that buck through and through twice and did not stop him. If it had been a bull or a horse it would have dropped dead. I suppose the deer being hot and closely pursued by the hounds was the cause of it; but I honestly believe a deer can carry more lead than any animal we have, excepting a bear. We had to shoot an ordinary black bear in the Rocky Mountains eight times with express rifles before we dropped him.

Another feature of this experience was the gameness and grit of the old buck. I think the buck would have killed every dog if they had stuck to him and I had not been there. I am satisfied that he had whipped the dogs off when they came to me in the woods and led the way back to the deer.

This was about the only excitement we had on the trip. I saw a small doe the next day in the woods, but did not get a shot at her. We also ran a doe and a fawn through Durando's stand the next day after that, but he was not paying strict attention and let them through without

getting a shot. Our driver jumped up a large drove of wild turkeys on one of his drives, but did not stop to hunt them, as the dogs at the time were trailing a deer. Several of the boys killed some mountain pheasants (grouse) and numbers of squirrels. Taken altogether the hunt was a failure, as we were out five days and only killed one deer. On one hunt fifty miles from here, back in the mountains, last fall the party was out ten days and shipped eight whole deer back to their homes in Chattanooga, besides several that were consumed by the hunters and dogs. The place we were at is only fifteen miles from Chattanooga and is hunted too much for much game to stay there, but it is a very wild and rough country, and for that reason it is impossible to kill out the deer entirely, as they go back into the gulches or cañons where a man cannot find them. There is plenty of good deer hunting in the Cumberland Mountains of East Tennessee; but it is like Idaho and Wyoming—a man has to know where to stay and how to hunt them, or he will not have much success.

After staying out five days we came home, and all the boys agreed that they were well paid for the trip as they had enjoyed the camping out and exercise hugely, although none but myself and Mr. Cooke had obtained shots at a deer. We were especially anxious for G. I. Parks to get a shot, as he is one of the best shots in our rifle club, and we wanted to see if he would have the "buck ague" when a deer came along. However, he did not get the chance we desired so much for him. We are going to try it again, in a better place some time this fall, and if you would like to have the result to publish in your paper, some of us will write it for you.

A. B. WINGFIELD.

## THE SPORTSMEN'S EXPOSITION.

NEW YORK, Nov. 3.—*Editor Forest and Stream:* The article in your valuable paper under date of Oct. 13, 1894, affords the directors of the Sportsmen's Exposition Association an excellent opportunity to place before your many readers a few facts regarding the enterprise as planned.

When the scheme was first taking shape, there was a probability of its being merely a trades display, but after a careful and full canvass of the situation by the committee, and much deliberation, it was expanded into an exposition, with its scope extended, so as to cover the realm of the sportsman in every essential detail, and what might have been a limited epitome of the subject was broadened into a comprehensive plan which would specifically illustrate the evolution and growth of all that pertains to the life and pursuits of the sportsman; in every sense a Sportsmen's Exposition.

The directors recognize the importance of having the enterprise embody every feature which would place the exposition on an educational, practical and profitable basis. This was considered fundamental. In this event the affair would assume a dignity and importance not to be questioned. That this has been practically accomplished is evidenced by the prompt co-operation of every one who has been approached on the subject. The universal interest manifested on all sides in the undertaking, and the unanimity of good will accorded is encouraging and inspiring.

The directors have laid out the plans accordingly, feeling convinced that the first sportsmen's exposition will be an assured success. It is to be made attractive and interesting, and every means devised to draw the public, whether amateur or professional. The practical advantages to accrue to the exhibitor will be much more surely attained by invading the ranks of the novice and the amateur by the educational and historical features, recommended by you, than by any other means, and this has been fully provided for.

The board calls your attention to the several branches (fourteen in number) which define the general character of the undertaking, but which will admit only of a brief outline here.

First in the list is *Class A.*—Firearms of every description, ancient and modern, and is a very important industry from the manufacturers' standpoint. Every style of firearm manufactured, formerly used, and now in use, and as they appear in various stages of construction will be exhibited.

*Class B.*—Ammunition, another important branch, will embody various kinds of powder, shot, shells, and method of making the same. The appearance of powders in the several conditions of manufacture. Their relative force and effectiveness will be illustrated with targets and diagrams. The material used in manufacturing ammunition will be systematically arranged.

*Class C* will be no less extensive than the preceding. The display of Sporting Sundries and appliances fill up a large share of the sportsman's necessities. They are too numerous to name in this schedule, but they will be comprehensive and complete in every respect.

*Class D*—Fishing Tackle—appeals to the disciples of "Old Izaak," and it will not be uninteresting or deficient, and will contain collections of rods, reels, hooks, spoons, artificial flies, lines of every kind, from the silken thread to the whaler's cable; nets, scoops, seines and dredges; baits of every sort, appliances to capture the game fish, also the methods of preserving and transporting the same.

*Class E*—Boats—will include various styles, from that of the Indian canoe to the finest racing shell.

*Class F*, Camping Outfits and Utensils, includes a host of necessary articles, and will show many new appliances and articles which serve to make camp life convenient and comfortable, such as tents, beds, bedding, stoves and cooking utensils, the arrangement of the same during camp life, and so far as practicable, realistic groups showing the home of the hunter when camping. This class will offer a splendid opportunity to introduce the picturesque camping scenes with the camp in full rig—the hunters in costume and other accessories, naturally belonging to this sunny chapter in the life of the sportsman.

*Class G*—Athletic Goods—will include articles manufactured for the athletic sports, such as lawn tennis, archery, fencing, baseball, football, cricket, golf, curling, racing, skating, bowling and other field and lawn games. Models and charts showing how the games are played will be introduced. Also the literature giving a history of the several games and the laws governing them.

*Class H* will cover the whole zoölogical and practical side of the hunter's work. Upon this branch falls a large share of the burden of making the exposition attractive and instructive. It will not be lacking in extent or character. There will be a complete museum of skins, skeletons and mounted specimens, single and in groups, of every animal followed by the hunter, and considered worthy of the attention of the sportsman, whether it is an animal, a bird, a reptile or a fish.

When grouped they will make a grand disply, and will undoubtedly be a drawing card of the exposition.

Arrangements will be made for the preparation of a number of picturesque groups of natural mounting representing hunting scenes of different nations. They will be realistic and strictly accurate from the ethnologist's and naturalist's standpoint.

The taxidermic features of the display will be represented by splendid exhibits of the best taxidermists in the country, and every effort will be made to induce foreign preparateurs to take part in this exhibit.

The advancement made in the art of taxidermy in the last fifteen years has been such as to insure in this department of the exposition a large collection of mounted animals of unusual artistic and scientific merit.

Efforts will be made to have tanks of living trout, bass, salmon, and other food fish, showing the several stages of growth, and the methods of propagation and protection. Also such living animals as can be obtained, including buffalo, moose, elk, deer, antelope, mountain sheep, wild boars, rabbits, hares, pheasants, quail, grouse, etc.

Collections of various kinds of traps and devices for killing and capturing game. Skins and skulls of every fur bearing animal slain for commercial purposes. Tables showing the zoölogical classification of all the animals in the exposition and the number killed in order to supply food and aid in clothing man.

*Class I*—Kennel Supplies will form an interesting group and include all kinds of dog food mentioned, improved kennels for benching and feeding, transportation crates, dishes and watering troughs, dog medicines and surgical instruments, books on the care and training of various kinds of dogs, literature defining the status of the dog as personal property, and the advancement in dog history.

The Society for the Prevention of Cruelty to Animals it is expected will be induced to exhibit the methods adopted for the humane protection of the canine race. It may be desirable to have a specimen of every species of dog used by the sportsman, and also with each dog specimens of the animals which they pursue as game.

*Class K.*—Cameras and Photographists' supplies will be well sustained, and in every way unique. A full display of photographs showing the work of the camera in every field and its practical advantages to the sportsman and naturalist as a means of study of our wild animals.

*Class L*—Will be devoted to the horse and his uses as adopted and applied by the sportsman in his pursuit of game. Saddles, bridles, spurs, whips and general equipment. Here fox hunting, coursing and falconry will be illustrated.

*Class M.*—Sportsmen's Art and Literature will be the library of knowledge of the Exposition. Copies of every volume published for the sportsman's use and information. All the publications devoted to field sports will be represented. Engravings and paintings will form an interesting gallery of art. Illustrations showing the sports of ancient days will form a part of the collection.

*Class N.*—Trophies of the Chase.—This class will consist of collections ef typical examples of our large game. It will represent largely the educational features of the Exposition, and include mounted heads and entire specimens of buffalo, musk ox, moose, caribou, reindeer, Virginia and blacktail deer, mountain sheep, antelope, mountain goat, European stag, roebuck, chamois, wild boars, black, brown, grizzly and polar bears, etc., etc.

The Committee of Records and Measurements will carefully measure all the specimens, and reliable data will be recorded bearing on the display. From these tables of comparative measurements the committee will decide what specimens are worthy of being known as the "kings of record." Private persons and museums will contribute from their collections. The management wishes to emphasize the importance and value of universal co-operation and necessity of the best trophies being in the collection. A neat monograph of this exhibit will be published, with full descriptive text and effective illustrations. By this means a valuable contribution to the history of our North American and European game animals will be secured.

Specimens showing abnormal growths of horns and antlers, also skins showing albinoism and melanism are desirable.

*Class C*—The Loan Exhibit—will include various styles of hunting costumes and accoutrements from the time of the early trappers' day up to the present. Old firearms, Kentucky rifles, flint-lock guns, punt guns and ducking cannons in contrast with the modern breechloading guns, rifles and trappings will be shown.

Spears, arrows and other primitive weapons, various styles of foot gear. Different kinds of snow shoes and sleds.

Primitive saddles, bridles, lassoes and whips. Originals and models of canoes, skiffs, boats and other sailing craft.

Fishing hooks and harpoons of the natives. Tackles, nets, spears and devices of the Indian for capturing fish and other aquatic animals.

Also photographs, engravings and paintings of animals, hunting scenes and camp life.

In fact, everything within the realm of the sportsman, which will illustrate the evolution and advancement in firearms and implements for hunting during the earlier centuries in contrast with the scientific methods of the chase of modern times.

In submitting the foregoing to the sportsmen of the world it will readily appear how necessary it is for all to contribute something in the historical line in order to have the exposition represent what is intended.

Every article which will illustrate the various exhibits is desired.

A synopsis of the material needed for this purpose will be printed later. We believe no one will hesitate to offer such specimens and objects as they may be fortunate enough to possess, no matter how insignificant.

All loans, whatever their nature, which are donated, will be guarded and carefully arranged in systematic order, and properly labeled with the name of the exhibitor.

The management wishes to carry out to the letter the object of the exposition, and in order to accomplish it must depend on the sportsmen of the worl for general co-operation and assistance.

The Committee of Measurements and Records is composed of well known gentlemen who have kindly consented to serve the exposition, Hon. Theodore Roosevelt, Archibald Rogers, George Bird Grinnell.

FREDERIC S. WEBSTER, Sec'y and Curator.

## THAT CASTILLA GROUSE HUNT.

HAVING finished, for the time being, with the subject of game laws and their violation in this section of the West, it will be in order for me to continue with the grouse hunt. Our party alighted from the train at Castilla a little before 11 o'clock, and as the sixty miles' ride from Salt Lake had been conducive to everything but ambition, it was unanimously agreed to wait until after dinner before engaging in violent exercise. A hot bath, the water rather sulphurous and fresh from nature's laboratory, was first in order, and after this the duck dinner required no appetizer for prologue, nor smooth yet fiery epilogue to aid digestion.

My companions all carried 10-gauge guns. In respect to bore and load there has been a moderate reaction within the last two years. A man who uses a shotgun will use it four times for ducks for every time that he spends in the pursuit of other game. If he can own but one gun it should be a duck gun and not a grouse gun, hence the increase in bore and weight. It is a fancy of mine that no gun will stand duck shooting as well as grouse or chicken shooting. Guns are in many respects like their masters, and I know that one hour of duck shooting, whether from boat or blind, tires me more than a long afternoon's tramp over the hills in search of chickens.

Our route lay up the Rio Grande track for a mile or so. On either side were the walls of Spanish Fork Cañon, a dull red or russet, with here and there a withered yellow to break the general terra cotta effect. It was beautiful, but tame compared with the autumnal coloration of an Appalachian hillside. Now on this side, now on that, and sometimes beneath us, flowed Spanish Fork River, itself throughout the greater part of the year as tawny as the Missouri, but nevertheless a fair trout stream, and fed by tributaries and clear as crystal. At length we reach the Diamond, that famous trout stream mentioned in my last. Hobble Creek, a tributary of Utah Lake, lying between Provo and Spanish Fork rivers, is as good a trout stream as Diamond, but its banks and shady ledges are so infested with rattlesnakes that the speckled darlings have no attraction for me.

The valley of Diamond is much wider than Spanish Fork Cañon. The sinuous stream alternately washes either bank, and in the great bends are little upland clearings, small ranch houses and dairies, inhabited only in the summer months, and stubble. Here in the oat stubble lies the sharp-tailed grouse, and the little ruffed grouse or pheasant is within gunshot in the thickets. These two species are locally known as "chickens" to distinguish them from "pine hens" and "sage hens;" but in flight, habits, markings and habitat they have nothing in common. On one side of the creek a long-disused tie track winds its way, and on the other a wagon road leads past the farms and saw mills to Strawberry and the Uintah Reservation. The only dog we had with us had been broken on the level prairies of Kansas, and was accustomed to neither the country nor the birds. Still, he did good service as soon as he found what was required of him. We had just struck our second stubble patch when Don commenced to sneak in a way that indicated birds ahead and on the move. In vain he made use of his Kansas wiles, the birds would not lie. As they arose they became the targets for a platoon fire, and three dropped, while one or two that were slightly crippled continued with their companions a short quarter of a mile and lit in the next field. This covey, from which we afterward secured four more birds, was the only lot of sharptails that we saw during the afternoon.

But when the sun hid itself behind the tall peaks and the cool of afternoon drew on what a change of luck we experienced! It was about four o'clock when we commenced to think of retracing our steps and one of the party suggested a trip up a little side cañon that gave promise of nothing more game-like than a porcupine. Don ran headlong upon a covey of pheasants and they so surprised him by they running to cover with their quick *cluck, cluck* (that I can compare only with the click of a gun hammer), that the poor dog quite forgot his ancestry and jumped about and barked like any common cur. It seemed as though the chickens had "packed" in that cañon for a fall flight, although this is not habitual with the species and I had never before met with a similar instance. It seemed impossible to get those birds to fly until they were actually stoned and clubbed into it, and at first the work of hunting was mere slaughter. By degrees, however, they came to understand what was required of them, and when darkness fell there was not a pheasant within sight or sound; we had all the birds that we could carry, and before us a 3 mile walk to the caravansary. Time passed quickly enough, as the homeward trail, after we struck the cañon road, was well-beaten and downhill. At the springs we found supper awaiting us and between nine o'clock and midnight the time was spent in an orthodox, sportsmanlike manner. Then, according to the rules of the house, we took a hot bath and retired to be awakened by the call, "Breakfast! No. 1 will be here in half an hour."

So, my comrades left me and I returned to hot baths and solitary hunts with just sufficient study to keep up my interest in the outside world. I have to note in conclusion, and in marked contrast to his conduct on the trout question, the stand taken by our local Game Commissioner in the enforcing of the duck law. Almost every evening for the past week our local papers have contained paragraphs like the following:

> Walter Smith, a lad of Lake View, was found guilty to-day by Judge Wedgwood of shooting at ducks after sundown. He was fined $5. His partner, Parley Swenson, a grown man, was found guilty of killing two ducks after hours, and he was fined $10 and costs. The boys are trying to raise the money, but the prospects are they will be obliged to serve their sentences out in jail.

If these laudable efforts are not spasmodic our duck shooting will constantly improve, and if we succeed in cultivating the protection idea in one particular, it will be more easy after a while to enforce the trout law.

SHOSHONE.

CASTILLA SPRINGS, Utah, Oct. 25.

# CHICAGO AND THE WEST.

## The West of the Present and the Past.

[*From a Staff Correspondent.*]

### New and Old Archery.

CHICAGO, Ill., Sept. 28.—Any one can recall the popular fancy for the noble game of archery which was so generally spread over this country a dozen years or more ago. It faded and died practically because it was too noble a game for the populace. There are few archery clubs and few archers left in America to-day.

At Mandan, N. D., I found a man who still retains his love for archery, and who is not only an enthusiastic but a skillful archer to-day. This is Mr. J. D. Allen, who runs the Indian bazaar at that point. Mr. Allen makes of the long bow an efficient field arm, and he shows nicely mounted trophies of jack rabbits, cottontails, grouse and other game, all killed by himself with the bow and arrow. Mr. Allen does not use the Indian bow, but has a dozen of the most expensive long bows of English make, with raw hide backing, etc., etc. He prefers the old English yew and has some beauties of that wood, some of them stiffer than one would think a man of his weight could use, though long practice has given him mastery over his weapon.

Mr. Allen and I walked out one bright, sunny Dakota day not long ago to have a try with the long bows. We enjoyed ourselves mostly at shooting for distance, as we started no game near the edge of the town. Mr. Allen showed himself possessed of a skill most unusal to find these days, and we had a lot of sport in our little competitions at a mark. At length we came upon a couple of Sioux tepees pitched on the summit of a ridge near town, and here we paused to investigate matters a little. The single Sioux brave and the three squaws and two pappooses who were keeping house there didn't seem to be troubled with any notions about cleanliness, but they were cheerful enough and ready to talk with Mr. Allen, who speaks Sioux very fluently. After a while we got the Sioux man out to show us a little of the incomparable skill of the Indian with the bow and arrow. He couldn't have hit a flock of meeting houses, and we both beat him till he looked foolish. He shot with the bow held horizontally across his stomach, letting the arrow fly with a push and a jerk. Evidently he had seen or heard of the old Indian fashion of handling a bow, but it was before his time. After a little he retired to his tepee and wouldn't shoot any more, lapsing into silence and smoke. We tried to buy his pipe, a goodish one of the red pipe clay, but it was a month later before Mr. Allen got it and sent it to me.

These modern bows and arrows brought us naturally to the bows of the past, which we were well situated to study, Mr. Allen having over 125 Indian bows in his collection. I noticed in all these bows what I used to think was a defect caused by the Indian's lack of proportion—one side of the bow being straighter and stiffer than the other. I found that the straighter half of the bow was always the lower half, that part representing the top being more crooked than the lower half. Mr. Allen told me that the Indians always made their bows thin, alleging that this formation made them carry higher and further, for which there does seem philosophical ground of belief, when you come to look into it. Mr. Allen said that the Indians also purposely built their bows so that the strings crossed diagonally or on a line back from the arrow side or firing side of the bow. This is precisely what we would think would make accuracy impossible, but Mr. Allen showed that this feature was invariable. Mr. Allen said that the Indians put the double bend in the backs of their bows by smoking and heating the wood. This bend cannot be soaked out of one of the genuine old buffalo bows, which were not made to sell.

### How the Indians Made Arrows.

The Sioux arrows were often or usually made of willows, and my informant told me that the arrow maker was not particular whether or not his stick was straight. A good arrow maker would straighten almost any kind of a stick. He would heat it and bend it, over and over again. In straightening it, he would put it in his mouth and pull it into shape, holding it firmly in his teeth. All the well-made old-time arrows show numerous grooves and rings, running round and round the shaft. These are teeth marks, where the Indian rolled the shaft between his teeth. I have noticed them very plainly on a couple of Crow arrows given me by Col. Ike Allen, of Columbus, Mont. These two arrows I showed to the present head man of the Crows, old Plenty-Coups, and he said they were the genuine old buffalo arrows—that is, he told my friends so. I am rusty on Crow. Plenty-Coups took these arrows between his thumb and finger, by the neck, balancing the arrow in that way; and he smiled as though the feel of them brought up the thought of other days.

The Indian arrow maker did not work in a very big hurry in the old days, but he turns out more stuff to-day. Now, as in the past, he uses in his work a knife whose blade is filed on only one side, and that the reverse side. The Indian is built backwards, and in whittling he always pulls the knife toward him, instead of pushing it away from him, as we do.

### How the Indian Tanned Skins.

In his collection Mr. Allen showed me some very fine specimens of genuine old Indian elk horn hide scrapers, of the sort the squaws used in dressing hides. These were cut out of a fork of the elk antler, having a handle about a foot long, the head being at a little less than a right angle from the lower side of the handle, and of 4 or 5in. length. The head or blade was drawn to an edge at its lower end, and was usually tipped with a bit of strap iron or a piece of steel. The shoulder or corner of the tool was carefully rounded and usually polished, and the whole implement was often nicely worked out and polished, so that it looked much like ivory.

I remember I asked old Bill Hamilton how the Indians used to dress the buffalo skins, and he explained to me that the main secret of their excellent tan lay in the steady and skillful use of this same inefficient-looking tool in the hands of the squaws.

"The squaw would first tack out the hide on the ground, flesh side up," said Uncle Bill (Mr. Allen and I saw our Sioux have a beef hide stretched out near the tepee in the same way); "and she would first go over it and get off all the shreds of flesh she could. Then as the hide began to dry she would go at it with this little hoe. She stood right on top of the hide, and stooped over, hoeing between her feet. The handle of the scraper was held in the right hand, and the left hand was pressed on this rounded shoulder, to press the edge down hard on the skin. The squaw hacked and scraped away in this way, and kept on at it till she broke up the inner fiber of the hide. Then sometimes she would take up the hide, loosening the edge and holding a fold between her knees, while she stood on it with her feet. Then she would hoe and scrape away at the fold of the hide. It was mostly a matter of hard work. Sometimes in softening a hide they dragged it back and forward over the limb of a tree, just as a tanner uses his beam, you know. They didn't put much on a hide except work. Sometimes they used brains, and sometimes they made a sort of grease by boiling up brains, marrow, and bits of the dried fleshings taken from other hides. That little squaw hoe, though, was what did the business. A good robe dresser could take that little awkward looking tool, with no edge at all on it to speak of, and pare a thick buffalo hide down till it was white and thin as paper, and it would be the same thickness all over, too."

### Wouldn't Do To-Day.

So much for the Indian weapon *par excellence*, and the Indian tool of like rank. I looked at these old-time things with an interest I never felt when seeing them in museums. I seemed to be getting closer to their idea, here on the ground where they were made and used, in the West that now is of the past. I looked at their bows, their arrows, their shields, their quivers, their ineffectual stone war clubs, which I shouldn't think would scare anybody so very much, they are so absurd looking. Well-a-day, these things will hardly do in competition with the little bullet not so big as a lead pencil, that kills a man two or three miles from the man who speeds it on its trackless way.

### All About Sinew.

All these old-time bows had the sinew bowstrings. And this reminds me of what another old-time friend of mine, Col. J. Isham Allen, or "Ike Allen," above mentioned, has lately told about some of the things the Indians used to do with sinew. In the issue of the *American Anthropologist* for April, 1894, Col. Allen has the following, all too brief, on this very subject. He handed me the page when I saw him. It reads as follows:

ABORIGINAL USE OF SINEW.—The aborigines of America put sinew to a very great number of uses for which it is peculiarly adapted by its flexibility, lightness, great strength and durability, and employ it in a variety of forms and sizes. In the making of clothing for men and horses, in the fabrication of weapons, including clubs, bows, arrows, etc., in the building of lodges, and for domestic and many other purposes its use is universal. For bow-strings and rough sewing the sinew of the buffalo is preferred as being coarser in texture, that of the elk being next in favor for these uses. The sinews of the deer, the antelope, the mountain sheep, and the mountain-lion are also in high favor, that of the mountain-lion being considered the finest and most durable. The sinew is prepared for use by first removing all adhering flesh with the back of a knife. It is then stretched on a board or lodge pole and left to dry for an hour or so preparatory to the separation of the fibers or threads by twisting in the hands. By the same similar twisting motion and by pulling the fiber can be extended to a reasonable length. Cords or small ropes are made by twisting many fibers together between two forked sticks fastened on the ground and during the process rubbing with thin skins of the elk and deer to soften them. The largest cord I have seen made in this manner was one-fourth of an inch in diameter. To prepare it for sewing the sinew is wet and at the needle end rolled on the knee with the palm of the hand to a fine hard point like that of a shoemaker's bristle. As suggested, the sinews are made sufficiently fine for use in fixing the guiding feathers and fastening the iron or flint heads of arrows and in the wrappings of clubs, etc. Formerly the awl used in sewing was of bone taken from the leg of the eagle. This has been displaced by the common sailor's needle. The over-stitch is that most commonly employed in aboriginal sewing.

### Modern Indians No Good.

I imagine the old-time Indians were up in their native arts better than the Indians of to-day. While Mr. Allen and I were visiting at the Sioux tepees, we broke one of our hemp bow strings. We gave it to our Sioux brave to mend, and he tried to splice it with a bit of sinew, but didn't do it worth a cent. He seemed to be more engrossed in that red pipestone pipe than anything else. And I was a good deal interested in it too, and still look at it, as it hangs from the elk antlers in my office, with a good deal of interest, though I am expecting to be told by an expert that this pipe is modern and civilized in manufacture and so no good. It has a section of handle made of the red pipestone, as well as the bowl, and this section was fitted to the connecting reed by means of a bushing of red calico. This latter I think my Sioux man swiped from the skirt of Mary, the moccasin-maker. Sweet Marie was lying with her back to the flap when we called on her, and though we spoke sweetly to her and praised the *washta pappoose* we saw running around outside, Marie refused to be jolly boy and come out and talk with us. If anybody should come into this office and find me dressed up in war paint and a buckskin shirt, I beg he will not be alarmed. I shall be only celebrating. I gave this Sioux sweet Marie an order for a hunting shirt, but she only works when she feels like it, and as the shirt has not arrived, I am disposed to think Marie has not yet come out of the lodge.

### "West of the River."

It was interesting enough, here on the borderland of the old and the new, at the edge of that great and unknown country of which the old-timers once spoke with pride as "West of the River." But it is all of the past, now. There is no actual West any more. Mr. Allen told me of some very amusing things which he has seen happen there at Mandan by virtue of certain tenderfoot ignorance of the above fact. Every once in a while, he says, even yet there appears at Mandan some tenderfoot rigged out in story book fashion, ready for wild adventures in the West. We read about these blooming idiots, and it seems hard to believe that they actually exist, but they do. My friend told me that about a couple of years ago one of these things got off the train at Mandan. He was gotten up in the regulation style, wide hat, corduroy clothes, heavy top boots, bright new belt, little pistol and big hunting knife—the kind you see in stores and nowhere else, kept exclusively for the tenderfoot trade, and good only to open tin cans with. This fellow got off and posed around for the people to get a look at him—and they all looked. He didn't talk much, only to ask where there were any Indians and bears. At length some one asked him:

"What part of the States are you from, stranger?"

This offended him, and he straightened himself up and said, pompously:

"My home is in the Rockies!"

At this everybody laughed a-plenty; so after awhile the wild man went up to the depot and sat down, and took off one of his boots, which was skinning his heel some.

### A Jersey City Scout.

One time some of the Maudon boys just for fun set a couple of tenderfeet to hunting deer in the wild rose bushes just back of the waterworks. They didn't get any, but declared they saw plenty of sign. Mr. Allen showed me the picture of a Jersey City wild man scout, Bill Germayne by name—I think he lately died. The picture showed "scout" Germayne in beaded buckskin, long hair, goatee and all that sort of thing, but the history of the scout wasn't written on it. The facts were, Bill Germayne got stuck on the scout business (he was an exhibition rifle shooter, or something of the sort), and he started West for blood and glory. When he got to the edge of the Yellowstone Park he went broke and couldn't get back home. About then along came a party of foreign Dutch dignitaries, who wanted to get a guide through the Park, and this was where Bill's buckskin shirt got in its deadly work. He had never been in the Park in his life, but he was broke and needed funds, so he offered himself as guide. The foreign dignitaries were a trifle scared for fear he might break out, but they just chanced it, and employed him, they furnishing everything. And Bill—well. Bill just followed the roads, so he got through all right. That gave him his start in the scout business, and after that he wore a few more beads and fringes I hope Sioux sweet Marie is going to put plenty of fringe on my new shirt, for I may need it for something of this kind some day.

### Plenty of White Deer.

There is a notion prevalent that albino deer is very rare; but the article can be had if wanted. At the taxidermist shop of Chas. Emsley, at Missoula, Mont., I saw two albino white-tail deer, pure white, nicely mounted. Mr. Emsley has also the skin of a two-year-old buck, pure white, and he lately had another albino offered him from Trenton, Maine. In Mr. Allen's collection at Mandan, N. D, I saw a fine specimen of white deer. It came from Cable, Wis., in December of 1892. There are two good specimens of albino deer mounted, in St. Paul, to-day, and I know of a fine one in Chicago, which I mentioned some years ago in these columns.

Among other curiosities I saw at Mandan was a fine group of a mountain lion and four spotted cubs. These came from Boulder, Col., and they make an interesting composition. Mr. Allen also had in his collection a black-tail deer head which measured 38¼in. across the widest spread of the antlers, a phenomenal one. I saw also seven entire skins of cow buffalo, which Mr. Allen says he has had eight years, they being from the last of the Panhandle herd. There was a five-year old bull head, said to be from Charlie Allard's Flathead reservation herd, and five other buffalo heads, the whole skin of a three-year-old buffalo cow, and entire skins of about all the great North American animals except the musk ox.

### Plenty of Buffalo Heads and Robes.

I ran across plenty of buffalo robes in the Northwest, and I believe 50 to 100 robes could be bought in St. Paul without trouble. Many of these are pretty fresh, and there are some very fresh heads, too. A buffalo head is not so hard to buy, if you want it. The Babcock Hardware Co., of Billings, lately advertised quite a number in FOREST AND STREAM, but these were not Park heads. At Missoula, Mont., Emslay was mounting a fine buffalo head, said just lately to have been killed out of the Allard herd. This bull had been shot square between the eyes. He had been acting sick, and when killed it was found he had lately been shot behind the ear with a .32 bullet. It was thought some of the boys may have done this, because the bull wouldn't drive well in the herding operations.

### Heads, Horns and Skeleton.

Speaking of hides, heads and horns and of the past and present and that sort of thing, reminds me of an old, old, weather-beaten buffalo skull I picked up near Columbus, Mont., on the Yellowstone Valley, last April. This old-timer was no doubt killed by the Indians, for the frontal bone is broken in, as if it had been opened for the brains. From tip to tip of its weathered horns it measures 27⅝in., and competent judges say that is very wide. The frontal bone is also very wide. This old relic lay on a meadow in full sight of the road, and Mr. Meigs, one of our fishing party up the Stillwater, said he had seen it there for years. It is now on the wall of the FOREST AND STREAM Western office, in company with the Crow arrows and the Sioux pipe.

Mr. Meigs, seeing me kindly disposed toward skulls and bones, promised to send me a lovely Indian skull, which he said had been lying for a long time on one of the islands of the Yellowstone. "It has a bullet hole right square in the middle of the forehead," said he, and added meditatively, "I saw a fellow riding a horse around here that looked a good deal like the horse that same Indian used to ride." As I still remain shy of that particular skull, I beg to remind Mr. Meigs of his promise to go and hunt it up. I would run that skull in on my grandchildren in great shape, if I had any.

### Skis.

I was interested recently by reading the comments of Mr. T. S. Van Dyke on *skis* and *ski* matters. I find it difficult to reconcile a great many of Mr. Van Dyke's ideas with those current in the country where I learned the little I have of *ski* knowledge. For instance, Mr. Van Dyke says a 6ft. *ski* will do for ordinary work as a "cross country or traveling shoe." If he would appear at Fort Yellowstone with so short a *ski* as that, he would be thoroughly laughed at as a tenderfoot, nor do I believe that so short a shoe would do at all in the soft unpacked snow of that country, where even the 10ft. *skis* sometimes sunk 8in. deep into the snow; 8ft. is about the shortest *ski* which is used in that country. They run from that to 10 and even 12ft., although the latter is quite the extreme. Larsen, our Scandinavian *ski* running private, told me that in the old country he had seen a *ski* used as long as 16ft., but this was usually in conjunction with a short *ski* on the other foot, so that the runner could turn about easily. It is a well known fact that with a *ski* and a half a man can make a pretty stagger at getting along.

Mr. Van Dyke's appliances for steadying the heel, by

means of a thin piece of strap iron on each side of the heel, would, I fear, hardly find favor in the Rockies, and I am sure I would not want any of that in mine. The least projection on the shoe catches the snow, and when the snow once begins to stick it increases into a bigger and bigger lump, which becomes sodden and icy as one treads along upon it. As it was, we found a continual trouble from the forming of lumps of snow and ice under the heel on the foot plate, and these we often had to stop and cut off with our knives. A piece of iron on each side of the foot would only aggravate this balling up of the snow, I should think. So, I should think, would Mr. Van Dyke's centerboard appliance. In fact, unless there be some merit in the idea of a piece of untanned hide fastened on the bottom of the shoe with the hair pointing backward (the practicability of which in thawing and freezing snow I seriously doubt), I should think a good many of these notions were like telescope sights and that sort of thing on a hunting rifle. Some may like them, but I wouldn't, and I believe also the average plain Rocky Mountain *ski* runner would rather have just a plain *ski* or a plain rifle with no frills or accordeon plaits.

The statements made by Mr. Van Dyke as to speed attainable on the *skis* no doubt apply to what he calls sleigh track traveling, where I suppose one could get along without sinking down much, even on foot. Of this I know nothing at all, but I don't mind saying that if he has a Swede, Norwegian or anybody else who can go out into the Park country and go 30 miles in 3 hours, 25 miles in 5 hours, or 30 miles in 6 hours, he can break Fort Yellowstone and all Montana, including myself, although I don't live in Montana. The country out there is too much broken and has in it too many climbs to attain such speed, or the half of it. Yet our best *ski* runners out here always said they would rather travel over rolling country than over one that was perfectly level. When we were going down Nez Percé Creek, 8 miles or so of level country, or a little bit better than level, since it was along the water grade of the stream, I think we never reached a speed of 4 miles an hour, nor much if any over 3 miles, but there of course the snow was deep and soft and we sank far down at each step. It would be quite a different thing no doubt on a smooth hard surface where one did not have to break a trail.

When we started on our trip through the Park we made us some nice clogs to put under our feet going up hill, but we threw them all away and finally got so that we rarely ever even stopped to knot a strip of gunny sacking under the foot when taking a steep hill. The idea out in that country seems to be to take the naked *ski* and get along with it without any furnishings other than the straps. There is all the difference in the world between ignorance and experience in getting across country on the plain and unadorned *ski* of the West, but I suppose when you are in Rome it is best to do as Romans do, so I took mine straight when I was out there. In short, this is such a big country that it seems there are sectional differences even in *ski* matters; but I can quite heartily agree with Mr. Van Dyke as to the charm of the exhilarating sport of *ski* running. You must have big hills though, to get the most fun out of it. It is seen at its best in the Rockies. E. HOUGH.

909 SECURITY BUILDING, Chicago.

## TEXAS AND THE SOUTHWEST.

### On the Border.

AMONG the cleanest, wiriest and best sportsmen of the Rio Grande border can be named Col. William Ferguson, located at Eagle Pass. "Bill," as the writer is wont to call him, knows everything about game, having hunted in every State and Territory of the West and Southwest. He is now hunting smugglers for Uncle Sam, and he says in a recent letter that the crop this year is unusually large, and that before the birds return to the North in balmy spring, he will have several vermin-laden scalps dangling from his belt.

"Bill" says that the duck shooting at Nava is the best he ever saw, and that the black bass fishing at San Juan de Allende (40 miles in Mexico) is a perfect dream. He gives such a glowing description of a recent trip that he has set my blood afire, and some time next month I shall take in both Nava and Allende.

### Mallards and Geese.

A Corpus Christi correspondent says: "Not a feather at the Aso. Lots of curlew have presented their bills, but we don't shoot them. We have some fine mallard shooting in the lagoons at the mouth of the Nueces River and plenty of geese in the Loreles Lake, about 50 miles from here."

### Port Lavaca.

The duck and geese prospects were never better than this year at Lavaca. Large shipments are received daily at San Antonio and Houston, and the price received by the market-hunters scarcely enables them to buy powder and shot. Good.

### A Tragedy.

On the 19th of October there was enacted a bloody tragedy in several acts near San Antonio. A fine six-point buck was shot in the hindquarters by some tyro and the poor animal was then pursued by four fierce hounds. The pack brought the deer at bay in the middle of the Salado River at the crossing on the public road from San Antonio to Austin. In fighting off his enemies, the buck drove one of his forefeet into one of the hounds, pinning it to the bottom until he drowned it. A Mexican living near by came upon the bloody scene, armed with a rope and a pocket knife. He had no trouble in roping the deer and holding it securely until he hacked out its life with the knife. Horrible.

### Visitors.

It gave great pleasure to the Southwest wing of FOREST AND STREAM to shake hands with Wm. Wheeler, of Hempstead, Tex., and Jim Stewart, of Galveston, last week. Both gentlemen are sportsmen of note and good people to know.

### Plenty of Bear.

Mr. Ferdinand Herff of San Antonio has just returned from a very successful bear hunt off Alpine, Texas. He joined a party at Alpine and, accompanied by a pack of first-class hounds, penetrated in the fastnesses of the west Texas Mountains. They saw plenty of deer, but killed only enough to supply camp. Six bears and three panthers were killed in five days, Mr. Herff killing three bears. He says there is not near as much sport in bear killing as he anticipated. All his former ideas of a hand to hand combat with bruin are abandoned and the animal is killed in the most plebian manner. The hounds are put down at the mouth of a cañon in which flourish a heavy growth of live oaks, the acorns of which Mr. Bruin feeds on. The game is gradually driven up the cañon, and finally the animals seek refuge in the small live oaks or upon some overhanging rocks, from which they are easily knocked off the perch by the Winchester or even the six-shooter method.

### Olden Times.

About eighteen miles south of San Antonio are—or rather were—the Greytown lakes. The country surrounding is tilled by Mexicans exclusively, who raise cotton, fodder, etc. A few years ago, according to our most ancient nimrod, Col. Enoch August Dosch, he was in that region shooting deer and turkey. He came upon a party of Mexican women who were washing on the banks of one of the chain of lakes. They were talking loudly and laughing, and he was astonished to see the lake literally covered with hundreds of wild mallards and other ducks. The Mexicans don't hunt game, and the birds seem to know it, and they were not the least bit alarmed at the approach of the hunters, but kept on feeding, just as if they were in the wildest marshes of Manitoba. Speaking of the knowledge of the absence of harm that wild birds seem to possess, the writer has walked within 25yds. of all kinds of ducks that were feeding near the banks of West End Lake, in the city limits of San Antonio. The Greytown Lakes, spoken of above, have been dry for six years, and the wild ducks have been supplanted by cotton and canefields.

### Requiescat In Pace.

There is a vacant chair in a San Antonio household. A cheery voice has been hushed; a generous soul has been released from its earthly tenement. Arthur C. Paris, sportsman, gentleman—as noble a fellow as ever pulled a trigger, has been cut down in the full bloom of manhood; a fond mother deprived of her support and two little children were orphaned by his sudden demise on Oct. 27. Arthur Paris's loss to the sportsmen of San Antonio is a serious one, as he was an active spirit in both field and trap shooting; besides being passionately fond of the rod. He was one of the best shots in the city and a cheery, wild west chap, whose presence cast a ray of sunshine wherever he appeared. He was generous to a fault, particularly to strangers; exceedingly hospitable and kind to his friends, whom he never forgot. Thus passed a noble soul, a generous heart, an honest man. He has pressed his last trigger.

---

*Oct. 29.*—As my nose sniffed the air this morning a thrill came over me and flock after flock of redheads and canvasbacks appeared (in my imagination). A fine norther is on and I am clutching a telegram from Corpus Christi stating that the bluebills are invading the sacred precincts of Gum Hollow. I shall take the 2 o'clock train. Good-bye. TEXAS FIELD.

## A DAY WITH THE BIRDS.

"WELL, Joe, how about our day's gunning?" asked big Jim Mac, one delightful October day, as his round, good-natured face made its entry into my office.

"When shall we go?" I asked, busy calculating how much a load of wheat would come to at so much a bushel, so you may know how long ago it has been, as wheat has not been that price lately.

"How about Wednesday?" And so we determined.

Wednesday came—an October Wednesday—with its frost and bright and clear atmosphere. It was all a sportsman could wish for. I was all ready at 5 o'clock. The dogs, Flora and Sport, made themselves comfortable in the wagon; I took the ribbons and Cecil, the colt, was off with a bound. My fried Mac lived some distance up the street. Out came his big burly form, and with him came his dog Monitor, called after the celebrated battery of that name. Away we went for a six mile drive. The air was delightfully cool and fragrant with the odor of spiceberry and perfumed with the aromatic scent from the pines. Arrived at the farm, we hurried away to the fields. The country was rough and heavy, so we concluded to go slow, but the dogs with a joyous bark and yelp were away down the back lane, on one side of which was a stone fence almost covered with grass, on the other side a ditch full of golden rod and other fall flowers. About half way down this lane was a pair of bars, an entrance to a buckwheat stubble and cornfield. When well out in the field, Sport began to wind his game, which Flora seeing, came to him and both began their march, heads high, sterns low, drinking in what was to them the sweetest aroma in the world. So they go for a long distance as the wind was full in their faces. By this time Mon had seen the fun and began his march and they all three stand most beautifully. Is this not the sportsman's best pleasure to see his dogs stand perfectly free from all jealousy, firm, fast.

I walk in, flush the birds, get my two barrels in, with one bird down. Mac, who shoots from his left shoulder, knocks his birds nicely, but the reports have started a rabbit, and away goes Flora on a picnic after it, while Sport, who is at a charge, looks at me with a whimper of protest against such folly. Amid the confusion we do not mark the birds well down. We get our birds and go but a little way, when out of some bushes ahead and to the right of us springs a pheasant, but out of range. He goes toward the road, right over the bars, and settles down in the gully. Now Miss Flora puts in her appearance and a pretty thing she is, covered with mud, full of Spanish needles and limping. I examine her feet and find them full of sand burs, which I pick out one by one; it is no easy job. By her stampede she has taken at least three hours' good work out of herself. This was her only fault, but she would "break shot" and run a rabbit. I could not break her.

We conclude to hunt the pheasant and start back to find it, and after a time it rises wild; I always found it useless to hunt those birds; they are wild and will not lie for a dog. I have known good sportsmen to take a special day, "just for the fun of it," and give them a fair trial, but have never known more than four or five birds fall to two guns in a day. It don't pay to hunt pheasants, but it is nice to shoot them if you fall in with a lot, to fill the bag.

We now hunt further down the lane, find another "bunch" of birds, as Mac calls a bevy, which rise wild (for the wind is now blowing quite sharply from the west), and no shot. By this time my nerves are strung to the utmost, and our day's sport has a "black eye," which, sponge as we may with hope, will be sore. Again we try. Flora in a ravine points. Sport goes to her back; and I go in and out jumps a rabbit, much to my disgust; but I check Miss Flora from running it, which is good and softens the hit on the "black eye." I am now called by Mac, and there stands Mon serenely beautiful on a dead point. This time I hope he will have something. We go up, the dogs back and we flush one bird, which rises to Mac, and which he kills. Another springs, and I miss it clean, out in the open. Black eye worse. These were birds from the first covey and we hunt on, picking up some 10 or 12 of them, which put me in better humor and got us all right side up. The black eye is somewhat better.

At this point Flora and Sport did some of the best work I ever saw dogs perform. The bushes were thick and the grass grown up through them, and into this mess went the last covey flushed in the gulley. Sport came to a point, as also did Flora, and on separate birds. Flora being the nearer, I flushed and killed her bird. They both dropped to a charge when I loaded, the Jip went and pointed dead, which I picked up. Sport at once arose, resumed his point on the bird, which I flushed, and which my friend killed beautifully as it came out to him. How is that for a trained dog—oh! ye kennel men and importers of "blue blood?" The horn now sounded for dinner and we attended joyfully to its summons.

The afternoon became somewhat windy. We worked on, picking up a few birds and alas, alack-a-day, over a point by Mon there rose what we thought was a pheasant and which was stopped in mid air by—but excuse me, I won't say which, only Mac apologized to our hostess for the loss of her golden pheasant pullet. These chickens are very wild and will lie for a dog, and although they will beat the world for eggs they are destructive on gardens and truck and not good for the table.

Mac proposed to go down along the river as he thought we might get some ducks; so bidding adieu to our kind host and his good lady, we started towards home and to the river. Leaving our dogs and team at a barn, we find a dugout. Mac poles and I keep myself busy steadying the thing, and as I am not a waterman, or never was, I think I grew noisy, for just as we turned a point I heard "Hush, hush; there they are." I look and see what I suppose is a flock of tame ducks, and as we had got into one mess, I did not feel like repeating it; but being assured by Mac, and told not to shoot until he said to, I was quiet as a mouse. At last they rose from the water, circled over our heads, and as the "Ready, shoot" came, we put four shots into the bunch of ducks and the dugout put me into the river, plump. "All greenies must be initiated," said Jim with a laugh. But I could afford a ducking as we got 17 bluewing teal. I shivered for a while, I can tell you; but as I was, and am still a good hydropathist, I soon got over it, dried my clothes at a friend's good fire and we started home with a bag of 16 partridges, 17 bluewings, several rabbits and a lot of squirrels killed on the river hills. Going home Mon kept up a big row and I teased Mac about his dog's sweet temper. He would scold and box poor Mon's ears until at last turning suddenly, he caught Sport with Mon's foot in his mouth. Sport did it quietly and slyly, but when the jolting of the wagon would make the dogs touch, Sport would bite him and apparently be asleep when Mac turned. "Ah! Mr. Joe, it is your sweet, amiable dog Sport doing all the mischief," said Jim with a laugh.

The colt Cecil went finely until half way home, when he frightened at a pile of wood. I either had to let him upset the wagon or run him down a steep hill, which I did, and landed him high and dry in a bunch of green briers, and after unhitching the wagon and pulling it away, we had to cut him out, and I made him haul us up the hill. The next morning he was pitted as if he had the small-pox. Mac had the laugh on me, but I always believed he was a little "scart" when going down the hill on a run. Cecil got to going well, and sold for $3,000, which was a big price then for a horse; but I bet he never ran into a green brier bush again. JOSEPHUS.

### "Report Your Luck."

BUSHKILL, Pa., Oct. 28.—Down in the store there is a little tin placard nailed to the post, which reads, "Report your luck with rod and gun to FOREST AND STREAM," and though I have been a pretty constant reader of FOREST AND STREAM for the past fifteen years, this is the first time I have accepted the invitation. Even now, I have little luck to report, as the past week has been so very wet; but I thought possibly my fellow readers would enjoy hearing of one more proof of the wonderful scenting powers of a well bred dog.

While hunting rabbits with Mr. John Schoonover, a well known resident here, a couple of quail got up from a clump of bushes to our left, and swung to the right over the bank of the Bushkill, bound for Monroe county. I took a snap shot at the hind one and was confident I saw one of its wings drop down, but though we looked for it faithfully we could not find it, as we had not a dog with us. This was at 10 o'clock in the morning. At 3 o'clock in the afternoon Mr. S. took his old setter Pearl to the spot. She immediately began to road and was gone for fully five minutes when she returned, wagging her tail and bringing the bird in her mouth.

While I was at breakfast this morning a pheasant came sailing on to the lawn, from the woods, within a few feet of the house and strutted about for several minutes until one of the dogs frightened it off. To-morrow evening I hope to have him hanging up in the cellar.

Rabbits are fairly plentiful, but owing to the forest fires this spring pheasants are rather scarce. H. E. D.

### Ducks Shot from Boats on Long Island.

BAYVILLE, L. I., Oct. 25.—Having just read one of your articles on law breaking, I would like to speak about it near home. Almost every day since the law has been off ducks, there has been from one to three steam and naphtha launches chasing and shooting ducks. I do not think there is any place in the State where the game laws are so much held at defiance as they are within five miles of here. Ducks are not very plentiful yet but are coming fast. Black ducks are making a good showing on the meadows considering the weather. Three of us got eleven birds two nights ago; though not a very large bag it was all we wanted. BLACK DUCK.

FOR SALE.—One share in Horicon Club of Wisconsin. Greatest duck marsh in America. W. H., care FOREST AND STREAM.—*Adv.*

## BOSTON AND MAINE.

NOT all of the hunters who go to Maine are successful, and it is refreshing to find one with the courage to say so, if he has not taken a moose, a deer or a bear. Mr. Geo. H. Lanphier, well known to the newspaper fraternity, is just back from his annual hunting trip. Last fall he went to Maine, and the ffrst or second day of hunting he shot a moose, and also obtained a deer or two, early in the trip. This year his hunting trip has been counted on with a good deal of pleasure. He corresponded with Mr. Edward Jack, well known to the readers of the FOREST AND STREAM, and decided from that gentleman's representations, to visit New Brunswick. He wanted moose, caribou and bear. Each of these noble game animals is well represented in the Canaan River country that Mr. Lanphier visited. He went to Salsbury, on the Intercolonial Railway, and from that point to the Canaan River. But neither moose, caribou or bear did he get. He was often near moose, judging from their tracks, but he did not succeed in approaching them near enough for a shot. He is satified that moose are plenty in that country; but next year he will wait for snow. He had to pay no license to hunt in that country—a great relief to sportsmen—and the matter of duty on his guns was easily adjusted. Sportsmen from the States are desired, and sensible customs officials are willing to do all in their power to relieve the burdens that the government imposes. Mr. Lanphier says that it is a wonderful game country.

Mr. Claud H. Tarbox, with his friend Bailey, has been out after the birds at Byfield another day. This time they were accompanied by a crack shot; a man who hunts the most of the time when the law is off. They got five partridges and one duck. The crack shot made a couple of real good misses with both barrels; one when the partridge was flying dead ahead. This much surprised him, as well as his friends. They started a large number of birds, but they would not lie to the dog. Their dog came to a point near the edge of a pondhole in a swamp, where the reeds and underbrush were very dense and high. Mr. Tarbox ordered him forward to flush the game, when the shooter was ready. The dog made a bound forward and landed in the middle of the pondhole, in the mud and water. But the bird came up in good style, and fell to one of the guns, a few rods away. The dog got out of his plight in the mudhole and retrieved the bird in good shape. It proved to be a bluewinged teal; and good sense of the dog was proven. He had carefully nosed the bird in the swamp, and come to a point at the right time, though his flushing was rather disastrous.

Mr. L. W. DePass and Mr. E. M. Gillam are planning for a partridge hunting trip to South Acton. Mr. DePass, speaking of coot shooting, mentions a gunner he came across on his gunning trip down on the Cape recently, who had an 8-bore. The usual charge for the weapon is about 5½drs. of powder and a couple of ounces of shot. In one day he got over thirty coot with his gun. His method is to find where they are bedded for the night if possible. Then he gives them his tremendous loads of lead. There is a man down there who pays fifteen cents for all the coot the gunners will bring him. The birds he peddles out through the country at twenty-five cents each, after he has sent all to the Boston market he can dispose of there. He is represented to handle a great many coot in a season. Even the poor coot are destined to fall before the market-hunters.

Among the hunters who have been to Maine for deer, who are willing to speak the truth, there is a complaint that the great majority of deer being killed in that State this year are does. It sounds better among one's friends to mention the "pronged buck" shot, but, alas, the truth told is compelling the hunters this year to say "doe." Out of seven deer seen hung up in Faneuil Market on Saturday not a single buck was to be seen, and I learn that out of something like a dozen received here this fall only one or two bucks have been counted. Of course the marketmen do not admit that the deer they are handling are Maine deer at all, though one did tell me yesterday that "Almost any of the hunters that come back from Maine will sell their deer, especially if the game happens to be of the female persuasion." The unwillingness to sell a buck, if there is really any such unwillingness, may account in part for the great majority of does that appear in the markets here. But the expression of hunters concerning the great majority of does being killed is not explained by that theory.

The attempt is likely to be made in the Maine Legislature this winter to get the beginning of the open season on partridges put forward to Oct. 1 instead of Sept. 1, as the present law stands. The best interests of game in that State believe that the ruffed grouse is doomed if the present early shooting is continued. As has so often been explained, the chicks are in flocks on the first of September, and it is easy for anybody to destroy the whole brood. By Oct. 1 the condition of the young birds has greatly improved, and they have learned better how to take care of themselves. Two well known and very responsible Boston gentlemen, who annually spend a great deal of money in land and water sporting in Maine, have called on me with the urgent request that the FOREST AND STREAM advocate this change in the law upon ruffed grouse in Maine. The gentlemen are Mr. D. H. Blanchard, who did the noble work for the suppression of salmon netting a couple of years ago, and Mr. Harry B. Moore, whose moose and deer stories are familiar to the readers of this paper. I also learn that the Maine Game Protective Association will urge this change in the laws of that State.

D. B. Farewell is back from a Maine hunting trip with two deer. He is also leader in the Press Rifle Team, having made the highest score at one of their recent shoots.

It should have been mentioned in my account of the coot shooting of Mr. G. T. Freeman and Mr. O. W. Whittemore the other day, that they were accompanied by a boy, and one who is very fond of shooting. It was Mr. Warren Hapgood, the founder of the Monomoy Brant Club, and a gentleman who has always had a great love for sporting with rifle and rod when it can be done in a fair manner. Mr. Hapgood is now 83 years old, but he was called the "boy" of the cooting party at Anisquam.

Big bears from Maine are the order of the day now. One was shown in Faneuil Hall Market the other day weighing nearly 400lbs. It was shot by a Mr. R. G. Wilson, of Cherryfield, in Beech Ridges township, at the head of the Narragaugus River.

The taking of a big bear when jacking deer was the good fortune of a member of the Charlestown Club the other day at Arnold Lake, on the preserve of the Megantic Club. Mr. W. R. Dickey, the crack clay pigeon shot, was the lucky man. The guide was paddling the boat very softly, when he heard some animal out in the lake, so he thought that he could head him off from the shore. He proceeded to do so, telling Mr. Dickey to look out for a deer. Mr. Dickey, as soon as near enough, emptied a couple of charges of buckshot at the head of the bear, as it proved, without the least effect, except to anger him and send him madly after the boat. But he swerved out into the lake, so as to get by the boat. as soon as he saw that he was at a disadvantage in the water. The guide called to Mr. Dickey to use the rifle, which fortunately was in the boat. The bear got by the boat and started for the shore. In attemptiug to get over an old log, partly in the water, he exposed his body, and one bullet was all that was required.

The Charlestown party was remarkably successful otherwise. They took nine deer in all, though the first week of their stay was rough and stormy. But the second was fine enough to bring the deer down to the water. Mr. J. W. Hoffman got a buck estimated to have weighed over 300lbs. Mr. Hoffman says that it was as large as a small caribou. Dr. Heber Bishop is reported to have killed two deer with one bullet; the one standing just beyond the other.

Game Warden Harriman, of Bangor, has made several arrests for hunting deer with dogs, and one Boston party is reported to have paid fines and settled, though the hound used was furnished by a guide. The Boston hunters are much afraid that their names will get into the papers.

Mr. S. B. Woodman is back from his hunting trip in Maine. He is very much pleased, and well he may be. With his friend Bessee and the captain, he enjoyed a most successful trip and several deer were taken, and a bear.

Mr. J. F. Dwinell is one of the most successful partridge hunters that ever visits the Maine woods. He has been to Upton for several seasons. He is just out of the woods with a record of sixty-five birds. He has had Loomin Sargent for guide for many seasons, but this year Mr. Sargent and Steve Morse are trapping, and so Mr. Dwinell took Eldana Brooks, one of the best of the Upton guides. They found the birds more wild and better able to take care of themselves than on former seasons.

It seems that the case of the fining of the Eastport farmers for having parts of a moose in possession in close time has been carried up to the full bench. The case, I understand, was that of the body of a moose lately killed being found in the river. The men prosecuted drew the meat and hide to their homes, and were brought into court for having the same in possession. They swore that they did not kill the animal, and now are anxious to find the man who did. Unless they find this man, the case is likely to cost them something like $100 each, besides the cost of prosecution. SPECIAL.

---

JACKMANTON, Me.—Messrs. G. E. Greely, O. B. Leport, B. F. Welch and L. W. Johnson killed eleven deer in a week's stay at Penobscot Lake. F. E.

## DOWN IN MAINE.

BOSTON, Mass., Nov. 1.—It has been so long since I have had occasion to use my FOREST AND STREAM pen that I find it has become pretty rusty.

In the "good old days" when the "Nessmuks" were able to get together and out into the country every few weeks, news was quite plentiful, but for a year or two our outings have been few and far between, and this fall when the time for my vacation came around the other members of our party were unable to get away, and I was forced to join in with a new party, and strike into a new country.

I started with no great expectations as to fish and game, but was thoroughly played out and knew that the location selected would offer ample opportunity for rest.

We left Boston one evening, the latter part of September and arrived at Rockland, Me., early the next morning. Here began our trip proper. The morning was perfect, just enough wind to make the sail pleasant and a bright September sun to bring out the vivid green of the thickly wooded shores, dashed with an occasional patch of red and brown or yellow, for the deciduous trees were just beginning to take on their brilliant autumn coloring. Doubtless many readers of FOREST AND STREAM have taken that sail from Rockland to Bar Harbor, and to those I need say no more, but to those unfortunates who have never had that experience let me say that it was one of the most delightful sails I ever took.

From Rockland to Bar Harbor the boat follows the shore line quite closely, threading in and out among the numerous islands, and stopping at a number of such clear, restful, inviting little towns, that one naturally gets to anticipating something quite irresistible when far-famed Bar Harbor shall be reached; for of course Bar Harbor must be the most charming place on the entire coast to draw its lion's share of the summer visitors.

Bar Harbor, as seen from the boat and during a short walk, was the stuffiest-looking place we touched at, though friends tell me its chief beauty lies in the drives leading out into the country. It was the first distinct disappointment of the trip; but then I may be prejudiced. I am not much on resorts any way.

About dusk we arrived at the end of our boat's journey, not at all sorry to land, for the trip beyond Bar Harbor is tiresome, the boat taking more of an outside course. The islands passed are more barren than those we passed earlier in the day.

A stage ride of nine miles took us to the end of transportation except as specially arranged for, and to the town where we were to stop over night. We had letters of introduction to people here who treated us in the kindest manner imaginable, having our supplies all arranged for, also a guide and team to take us into the woods. Early next morning a buckboard drew up in front of the house to take our traps and ourselves, when the road permitted, thirty-five miles further into the bush. The load was packed and strapped securely down and we were off, our host and his son following later in a light hitch and towing the boat. We enjoyed every mile of the trip, though the blueberry plains did get monotonous, and when we pulled up beside a dancing trout stream for dinner, and had the tea boiler steaming, it did seem that we were getting into the woods sure enough. Arrived at camp just before sundown, Ed. and Billy not getting in until long after dark.

The first few days we put in prospecting for deer signs and whipping over the lilypads for trout. Of the signs we found a fair number, and of the trout took enough to keep the spider from growing rusty. We took a number of half and three quarter-pounders and saw other parties take several that would go 2lbs. and better, but we failed to raise any of the big fellows. Sunday we climbed Pleasant Mountain to get the lay of the country. The climb was a "teaser," but the view from the top was well worth the price. We could see a stretch of country extending for miles in every direction, every acre of which appeared to be woodland, dotted with numerous lakes, large and small, from First Lake on the south to where Nicatous stretched its snake-like length away to the north.

What a tremendous stretch of country it was, the field glasses showing no sign of human habitation except our little camp and the Jock Darling camps on Nicatous.

Monday morning the "fine was off" and most of the party tried the burns for deer, but were unsuccessful, although starting a few and getting one or two snap shots. Later we had better luck with them. Partridges were quite plenty, and some one picked up one or two pair about every day while following the old twitch roads to and from the burns. Scarcely a day but we had a fricasee of these plump fellows, though no special effort was made to hunt them; in fact, no especial exertion was made to do anything, our heaviest work being done at the table and behind the old deacon block. From 7 P. M. to 7 A. M. was about the average night's rest, and this was frequently supplemented by a nap after dinner.

You could not do anything up there any more than you can down South. Everything was against it. The old bunk, filled with fresh-cut fir spills, was so soft and fragrant that it was next to impossible to leave it in the morning. Then the coffee was always just the flavor that enticed one to linger for a second or even a third cup, and when you stepped out of doors and looked across the lake to the mountains, growing each day more brilliant as the greens gave way to the brighter tints of red and yellow which the maples and birches were taking on, and drew in long, intoxicating draughts of the balsam-laden air, there was an indescribable something in the ether that softened the savage desire to spill blood, and we would put off till to-morrow the "big hunt."

To-morrow we would get an early start and "soak 'em." But to-day, well, to-day we would smoke. So we lingered longer and slept, and ate, and smoked, and loafed in a way that was good for the soul. And the sun and frost painted daily new landscapes for us to admire.

But one morning we did get started—breakfast at 2 A. M., and up at the inlet before it was light enough to see the landing, a rousing fire to take the chill out of our marrow, a tramp of a mile up to the big burn, and at daylight we were right after them. How we did scour the swamps that morning, drenched to the skin as soon as the sun came up and melted the frost on the grass and brakes, and hungry as bears at our regular breakfast hour, but we were out for horns that day and would not be denied.

By 10 o'clock some of the party had enough and were for looking up the lunchbox, but about that time the Nimrod of the party spied a yearling buck that was topping off a late breakfast just on the edge of the swamp we were preparing to drive, and pulling down on him sent a ball through his hip, but a little too low to break the backbone. He was off like a flash, but with his flag down, and then and there the ball was opened. Talk about deploying as skirmishers. Our column of four executed movements never dreamed of at West Point. We charged that burn with a reckless desperation worthy of a better cause.

Over the rocks and stumps, through the brush, every atom of the old "redskin taint," now nearly extinct through generations of civilization's eradicating influence, was aroused, and no aborigine ever bent himself to the chase with keener impulse than did we as we tore across the burn after that hapless buck. And at last we had him, and the excitement of that one chase repaid us for the whole trip. It lasted probably ten minutes, during which time he had covered a quarter of a mile in his devious course, and when he was bled and hung up to dry out we took account of stock and found ourselves just twenty-one shells short. And all that buck had to show for it was three bullet holes, any one of them a fatal shot. He was not the largest buck we brought out, but he certainly afforded us more hunting than usually accompanies the capture of one deer.

After thoroughly drying him out, packing him two miles to the inlet, paddling four more to camp, and feasting on heart and liver fried in salt pork fat, garnished with baked potatoes, hot biscuit, fried onions, cranberry sauce and accompanied with a cup of Down East tea, we called the "big hunt" over and dropped back into our old habits of loafing and growing fat.

Not that we literally did nothing, for several trips were made to Cranberry Lake for a sack of the crisp fruit which has made Cape Cod famous the world over, and we "cruised round" in some direction every day. But we were not a hunting crowd, some of us having never been into the woods before; and—well, you all know how it is trying to hunt with people who are not accustomed to the woods. No matter how hard they try to keep "in the hunt," half the time they are lost, and the other half are in no position to get a shot if game is found. When a man has to work his mental motor 30 seconds to decide whether it's a doe or a kangaroo that you have just driven out on to him, and that hesitation costs him an open shot at 20 paces at a doe and fawn on the walk, it is discouraging, yet that was an actual occurrence.

But then, I did not go in any great expectations as to game, and was neither greatly surprised nor chagrined at these "episodes," as "Kingfisher" would say.

All too soon came the day when we must pack up for an early start the next morning, and on getting in one night we found our good old friend Haycock with Ben and the buckboard, ready to take us back to civilization, so called. That last night in camp we made memorable with a mammoth camp-fire, and in the morning Jet and I paddled the canoe down the lake a piece and hid her in the brush, made everything tight about camp, took a farewell look at the mountains, now fairly ablaze with color, and shouldering our guns started on a nine mile tramp over the mountain to where the team picked us up. While at dinner it set in to rain and continued with increasing severity the whole afternoon. About 5 P. M. we arrived, soaked, saturated and nearly frozen, but were soon put to rights by the kind friends who set us up on

the way in, and who had been obliged to leave us at the end of the first week in camp. Did you ever run across people when away from home, and perfect strangers, people from whom you had no moral right to expect more than civility, and yet who used you so well as to make you almost ashamed of your own relatives? Well, that's the kind of people we went to, perfect strangers, and came away glad to call friends. In fact, anyone we met showed us the greatest kindness. That sort of thing makes a vacation kind of pleasant to look back upon.

One thing I noticed with much regret was the local feeling in regard to the game laws, or rather the officers appointed to look after their enforcement. Never did I get into a section where there was such a general expression of the utter unfitness for office, as was everywhere heard regarding the game wardens in that part of Maine, and from their methods of enforcing the law as told by any number of reputable persons, the contempt in which they are held would seem well merited. It was said that this feeling was so strong that the wardens dared not go in the woods alone. My only acquaintance among the Maine wardens was Steve Lowell, of the Rangeleys, a man who would command the respect of any one coming in contact with him, and the drop from honest old "Steve" to what specimens we saw was striking, to put it mildly. We only saw one evidence of dogging and that on our way out. A party of four drove up in front of a hotel with five deer under the seat and two hounds in their laps. No conclusive evidence that they had been dogging of course, but such an open defiance of the laws of the State was disgusting. How a party of men calling themselves sportsmen could parade the evidence of their lawlessness in such a brazen manner is astonishing. What influence can they expect such an example will have on the local hunters who see outsiders coming out of the woods with such a palpable disregard for their laws.

HAL.

## NORTH CAROLINA GAME

THE game laws in North Carolina have had an excellent effect. The people of the State, especially in the western section, are law-abiding people and it is rather a peculiar fact that they have insisted strictly and invariably that the game laws be carried out to the very letter. The result is that the game in the mountains of western North Carolina is much larger than it has ever been before, and the general opinion is that the bird crop, so to speak, is much larger than it has ever been before since the war. It is no trouble whatever to flush a dozen coveys within a half-day's hunt, even in the section surrounding the city of Asheville. The birds have been taken care of, and those who have posted their plantations are just now in the position to offer the visitors to Asheville splendid quail shooting. The first flight of woodcock has just taken place. The lowlands along the French Broad River are said to be teeming with this splendid bird, and the hunters are anxious to get a shot at them. The law forbids, however, any shooting in western North Carolina, of woodcock or quail until Nov. 1. The mountaineers bring the news that there is a large quantity of pheasants all over the mountain ranges, and a larger number of deer to be seen this fall than in a long while. Mr. E. P. McKissick, manager of the Battery Park Hotel, Asheville, tells us that he can offer the best class of shooting as he has privileges on a number of plantations around Asheville, being somewhat of a sportsman himself he is prepared to take out parties on his private hunting places on the plantations around Asheville and in the Great Smoky Mountains.

The Swananoa Hunt Club of Asheville has been recently resuscitated. Col. Cox, owner of the Battery Park, has just completed a magnificent club house on the grounds of the hotel, which he has given to the Hunt Club; and besides this he has built a country club house for the club four miles from Asheville on the French Broad River. These two houses will be elegantly fixed up. The club membership is 100, and there is a pack of 35 hounds, most of them having been bought from Rodman and Meadowbrook hunt clubs. Mr. J. S. Churchill of New York has been elected master of hounds, and the Hunt Club will be a great success. During the winter it will give a number of balls which will be the most prominent social functions to be held in Asheville.

### Down on the Marsh.

WABASHA, Minn., Oct. 27,—*Hoo, wha-who, wa-who, who-are-you*, was the cry that greeted me in the dusk of evening not long since as I was putting the finishing touches to my abode down in the woods by the wild rice marsh. Stepping out of the tent I recognized my large round-eyed friend sitting on a limb not far away.

"Never mind who I am," I answered, "I've known you and your ancestry for many generations back, for not a year out of twenty-five have I missed camping in this marsh; and I never harmed a feather of your heads."

*Ke, ke-ke, ke-ke, kar-ke-war*, said another not far away.

"Yes, it's war. War on ducks, but not a war of extermination. Quality, not quantity, is what we are after and a few fat mallards will fill the bill. Now, keep up your racket all night. It's music to my ears, as a cowbell would be to one when lost in the wilderness. We'll get a FOREST AND STREAM plank and put it up in the tree for you to hoot and dance around on; and on it will be inscribed 'No shooting for market and no spring shooting.'"

"Them's my sentiments." And as the darkness came on I could hear my big-eyed friends talking the matter over.

H. B. J.

### To Make Small Shot Shoot Like a Ball.

SARANAC LAKE, N. Y.—I have just finished reading Mr. Wilkins's experience with the lion in the White River jungle and have often read of sportsmen meeting large game when they had only bird shot to shoot, and thought that I would mention that providing one has time to fix it a shell loaded with small shot can be made to do good work at 30yds. Take jack-knife and cut around the shell between powder and shot, not quite cutting all the way through the shell, and shoot from the cylinder barrel. The front half of the shell will leave the barrel with the shot held between the wads and cardboard and will bore a hole its exact size through an inch board at from 20 to 30yds. like a single ball without a shot scattering. It would make bad medicine even for a lion. L. O. CRANE.

### The New Jersey Duck Cases.

PATERSON, N. J., Nov. 3.—*Editor Forest and Stream:* I presume that it would be of interest to you and your readers to know exactly the points on which Judge Dixon and others endeavor to escape the penalty for having shot ducks from a steam launch in Greenwood Lake. I presume the New York papers have informed you of the motion made by Warren Dixon in behalf of his father and the other defendants, this motion being to dismiss. The motion was refused by the justice, whereupon Warren Dixon handed the justice writs of certiorari carrying the cases to the Supreme Court, of which Judge Dixon is a member.

The points of law insisted upon by Warren Dixon and Mr. John Harding, counsel for the defendants, were the following two:

First—That the justice had no jurisdiction. Sec. 36 of the game law of 1893 provides "that such justice of the peace, district court or police magistrate in any city, upon receiving proof by affidavit or affidavits of one or more persons of the violation of any of the provisions of this act, is hereby authorized, etc." Counsel claimed that Justice Senior had no jurisdiction as he had no proof. The affidavit on which the warrants were issued set forth that the affiant, the warden of the county, "on information and belief," swore that the law had been violated. Counsel contended that the justice must have absolute proof of an offense before he can issue a warrant.

Second—That the complaint did not state where the offense was committed. The section of the law violated reads as follows:

> That it shall not be lawful for any person or persons to sail for, to shot or shoot at any goose, brant or duck from any boat or boats, vessel or vessels, propelled by steam or sail, etc.

The language of the complaint is that the defendants did "in the State of New Jersey, county of Passaic and township of West Milford sail for wild duck and shoot at one wild duck." Counsel claims that although it is apparent that it is charged that the sailing for was done in West Milford township there is nothing to show that the shooting at was done in New Jersey, or anywhere within the jurisdiction of the courts of New Jersey.

When Reuben Wells, one of the accused, was arraigned, he laughed at the matter and told the justice that he would send him his check for the fine and costs at any time he saw fit; as the justice himself said, Mr. Wells pleaded *non vult*. But Mr. Wells said that he would do as the others implicated did, and so his case has gone to the Supreme Court.

Only one of the cases against De Graw was certified to the Supreme Court, that being the case in which he is charged together with Judge Dixon and the others. On the other case counsel made a motion to dismiss on the grounds stated above; this was denied by the justice and the case adjourned for one week. Counsel in this case has expressed it as his intention to fight the case in the Common Pleas. From the number of witnesses produced by the warden, counsel apparently feels convinced that De Graw will be convicted before the justice, wherefore counsel deems it better to try the case on appeal before a court of which Judge Inglis is one of the three judges.

### A Massachusetts Side-Hunt.

WEST CHELMSFORD, Mass., Oct. 31.—*Editor Forest and Stream:* Thinking it might interest the readers of FOREST AND STREAM to read of the result of the twenty-first annual hunt of the Tyngsboro Gun Club, of Tyngsboro, Mass., I inclose a list of the game killed during the three weeks the hunt has been in progress and which was brought in on the evening of Oct. 27, the last day of the hunt. To one who has been conversant with these hunts for several years it seems like an unnecessary slaughter, and contrary to the interest of true sportsmanship and to the interests of lovers of hunting. During the three weeks of the hunt so much is destroyed by decomposing and so much is thrown away finally that the game is being fast exterminated in our section, and it would seem uselessly.

Why would it not be a good idea to abolish such hunts, and permit the game to develop and increase, and as the years roll along we should all see the good results of such action by securing more and better game.

Incidentally, let me say, that the above-mentioned hunt was for a supper, sides being chosen, and the losing side to pay for the supper. The game killed consisted of 4 foxes, 3 minks, 6 coons, 1 crane, 49 partridges, 1 weasel, 29 woodcock, 6 ducks, 37 hawks, 4 owls, 1 kingfisher, 325 crows, 35 gray squirrels, 47 muskrats, 262 jays, 2 snipe, 65 red squirrels.

H. A. F.

### Fox Up a Tree.

I HAVE heard the question of foxes climbing trees discussed for fifty years, but very few believe that they will. I have claimed that the gray fox would when pressed by dogs, but not until recently did the opportunity occur to settle the question without any doubt.

On the night of Oct. 11 David Quinlan, William Watson, C. U. Fowler and myself, with two dogs, drove from Getty Square, Yonkers, N. Y., out to Bryn Mawn Station on the New York & Putnan R.R. When let loose the dogs immediately took a trail of what we supposed was a coon. After about three-quarters of an hour's run the supposed coon treed. The tree was a straight, perpendicular one, about 30ft. high and stood in a pond of water waist deep. One of our party stripped and walked in the water to the tree, and shot the supposed coon, but when the shore was reached with the game it proved to be a gray fox. This settles it.

P. U. FOWLER.

### A Report from New Jersey.

ALLENWOOD, N. J.—The prospects in and around this section are about as follows: Owing to the scarcity of nuts, gray squirrels are so greatly scattered through the timber that their number seems to be much smaller than commonly, or else they are much scarcer than they have been during a number of years back, for I have still-hunted with rifle very carefully for them several times and have succeeded in getting at the most only from two to three each day. According to the reports of local hunters and others besides and also according to my own observations, quail and rabbits are far more numerous than has been the case for several years. Pheasants are about as plenty as commonly around here and also over in the adjoining county (Ocean). So taking it altogether the prospects for gunning this fall are rather above the average.

A. L. L.

### A Generous Louisiana Game Supply.

BURNSIDE, La., Oct. 30.—This is going to be a remarkable season for game in this section of Louisiana. The spring and summer have been very dry, ruinously dry for every crop except the quail crop. The quail have hatched out two broods almost without exception, and there has been a large crop of peas, so there has been plenty of food to make the birds fat and strong. I will not be able to do any shooting until after our grinding season, then I anticipate some very fine quail shooting. The weeds will be killed down by then, and the weather cooler for the dogs.

A letter from my friend Dr. Perkins of North Louisiana tells me that the crop of quail was never so large as this year, but the weather is so dry that little work is to be gotten out of the dogs as yet. Last year I shot for three miserable, cold and rainy days with him on his farm, and notwithstanding the weather, we managed to bag some 150 quail. Then too, the birds were found mostly in the woods, which made the shooting rather difficult. I am looking forward to great days of shooting with my old cylinder bore quail gun up at the Doctor's place.

I also hear that there are plenty of quail in the parish of New Iberia. In fact there are plenty all through Louisiana this season. Snipe I don't know so much about, as I have not had an opportunity to get into any snipe country; but a letter from Mr. Walter Anderson of New Orleans tells me that on the 13th he bagged 43 snipe at Chef Menteur. Some fine snipe shooting was had last March by Anderson and myself over in Acadia Parish. I am not posted as to ducks yet; but see a good many hanging up in the market, mostly bluewing teal.

This has been a most remarkable year for squirrels. Where have they all come from? They have been killed by the hundreds around here. I have been out four mornings and have shot sixty-five; the swamps are overrun with them. But with our dense foliage and the gray moss it takes a keen and practiced eye to make out a squirrel; so it is not so easy to make a good bag of them as one would think. There are some deer sign to be seen, and one very big track we have noticed, and when we have had a rain and some cold weather we hope to have a good chase after his highness.

Strange to say I have seen some bear tracks; we don't often see bear down here. There is a big dogwood thicket on the edge of the plantation that a bear or bears have almost demolished. The bears climb the little dogwood trees until by their weight they bend them over or break them; then they sit around on the ground and eat the berries from the broken tops. We have no bear dogs. So I don't think we will kill one next winter; I hate the idea of trapping the poor beast. Wildcats we have, a plenty of them, and we will have some glorious chases with our young pack of hounds. We have lost several hounds from rattlesnake bite; this has been a great year for rattlers, for there was no crevasse to drown them out. And there have been a good many alligators and they are quite partial to dog meat.

The outlook for sport this winter is very fine.

W. P. M., Jr.

### Preparations for Camp Nine.

SAND LAKE, Mich.—The author of "The melancholy days have come," could never have been a lover of the sports of the field and forest, for as our open season for deer approaches (Nov. 5 to 25) one would judge by the animated looks and consultations among the boys of our party, that melancholia enters very little into the spirit of the occasion.

You will learn by listening, that the rifles have been tested to the satisfaction of the owner, the camp stove set up to ascertain its qualities as a baker, the tent overhauled and the hole in the northeast corner neatly patched, application made for hunters' tickets, and all of us forgetting for a few days the work and worry of eleven months of the year, are looking forward to the period of glorious sport which for eight consecutive seasons we have enjoyed together.

The barrel of Northern Spies are ready, another of potatoes, cabbage, beans, etc., and those will be sent ahead by freight. Our cook will join us at Reed City, and leaving home at 8 A. M. we will be settled and will take supper in camp the same evening.

The stories of that old camp in Lake county would fill a volume, and every hill and jack pine grove could tell of wondrous running hits at forty rods, and more of humiliating misses "dead still" at six.

Thanks to our protective laws, the deer are still plenty in portions of the Lower Peninsula, and will increase if the law against hounding is observed. One more should adorn our statute books, providing that no game or game fish should be sold. Deer carcasses are now being bought by the hundreds in the Upper Peninsula at five cents per pound.

Last season was our most successful one, our party scoring eleven deer and one bear. We will write again on our return.

JIM.

[We shall be glad to receive the promised report.]

### Central New York Shooting Notes.

ITHACA, N. Y.—Gray squirrels have been more plentiful in central New York counties the present year than for a number of years. Court Bellis, of this city, is credited with a score of twenty-one grays and one black squirrel in a single day's outing at West Danby. From six to fifteen may be put down as an ordinary day's shooting.

Local gunners assert that not in a good many years have English snipe been found in such large numbers as at present. The marsh gunners, however, are not enthusiastic over the duck shooting at this end of Cayuga Lake.

The unexpected so often happens in gunning pursuits, as in other pastimes, that Mr. Art Miller, of this city, calmly tells me, with the air of a man who considers it an everyday occurrence, that one day recently, while in quest of the elusive squirrel tribe in the wilds of Danby, he picked and ate wild raspberries from a bush on which were found blossoms in profusion and unripe and ripe berries in plenty. All this in mild, middle October days.

M. CHILL.

### Still-Hunting.

THE need of a good still-hunting boot aside from the Indian moccasin, has long been felt, and it will therefore be good news to many hunters to hear that one has at last been supplied. The advertisement of this boot will be found elsewhere. It is made on the principle of a moccasin, but with durable soles of tanned cowhide, which by a new process are rendered soft, flexible and waterproof. As this boot possesses the good qualities of the moccasin without its disadvantages it is sure to prove very popular.—*Adv.*

# Sea and River Fishing.

## THREE DAYS ON LONG KEY.

ST. PETERSBURG, Fla.—We made up a party for a three days' outing on Long Key, which divides the Gulf of Mexico from Tampa Bay. There was Dr. G. F. Wright, of Denver, Col., who was brought here ten days ago so nearly dead that we thought he had come only to die, was one of the party. The Doctor has gained 14lbs. since his arrival at St. Petersburg. With the Doctor came his friend (and nurse) Mr. Ed. Marsh from Chicago. The fourth was Mr. H. V. Leaycraft, who owns a summer hotel on the top of the Catskill Mountains; and lastly myself from Fort Dodge, Ia. For crew we had a cracker of the deepest dye as captain, and a young Spaniard, who served both as sailor and cook. We chartered a 40ft. oyster schooner that had a stuffy little cabin about 7ft. square, and 4ft. high, with two small ports on each side for air and light. There were two berths in the cabin. These berths were 6ft. long, 2ft. high and 2ft. wide. We called these "state rooms."

We had a fine run down the bay, in which we saw a large number of porpoises feeding from a school of mullet. The meal was evidently nearly over, for they were sporting with their victims. A porpoise would run his long nose under a fish, flip it two or three feet into the air, and with his strong jaws and sharp teeth catch and cut the mullet in twain, as if done with a sharp knife.

Many pelicans and sea gulls hovered over this field of slaughter, picking up the pieces that the porpoises left; and then came the great scavengers of the ocean, the shark, which can smell fish blood from a great distance, and cleaned up what the birds could not carry away.

We arrived at the entrance of Pass à Grille (which divides Long Key from Pine Key) at sundown, but as the Pass was narrow and dangerous, the Captain anchored in the bay for the night. After supper the Captain loaded his pipe and between the whiffs began to talk. To a Northern man seeking recreation, the Floridian skipper is entertaining in the highest degree; for, ask him any question (however profound) about the stars above or the earth below, and he will never say, "I don't know," but will always have an answer ready, though it be—as it generally is—a roughguess.

A misty cloud near the northern horizon hid the big dipper, as well as the pole star. One of the party asked the Captain to point out the north star. The Captain pointed to a star in the northeast, and, to demonstrate more clearly, he took a fish rod and pointed out a seven-star dipper from the constellation of the Great Bear, bringing the two pointers of his dipper to bear upon his new-found pole star. Who would feel unsafe with a navigator that could carve out a seven-star dipper and establish a new pole star, with no other instrument than a bamboo pole? One of the boys lit a match, looked at the compass and pointed his finger due north, showing the Captain's north star beaming southeast. The Captain went to the binnacle, verified the report, and seemed much chagrined at his stellar collapse.

Some one spoke of a large alligator that they had seen at Jacksoville, when the Captain again "put in his oar." He had killed a 'gator that was 14ft. long, and had taken from his enormous stomach one bushel of horseshoe crab shells, and two bushels of feathers. We could understand why the crab shells were there, but how did the feathers get into this monster's stomach? He said that the 'gators would make a sneak under water and capture wild ducks and loons, and as the flesh would be digested long before the feathers the most enterprising 'gator would have the largest stock of feathers on hand. He said the alligators would dig holes in the bank and there live, "year in and year out;" and these holes he called 'gator dens. He had driven sticks across the mouth of the den of the 14ft. 'gator, and had then dug a hole down from above, when he shot the monster with a rifle.

A few days before he had taken a canoe out into a deep bayou where he caught a young 'gator, which called loudly for its mother. He saw the water boil, as a large female alligator charged on the canoe. He threw the baby overboard and saved a capsize, and possibly his life.

At sunrise we crawled up on deck, finding everything covered with a heavy dew. We got under way and sailed up the pass, which is long and narrow, until we came to an old dock, where we anchored. Mr. Leaycraft made one cast with a minnow net and caught enough bait for two hours' fishing.

We put a mackerel's head on a large hook and made a cast about 60ft. from the dock, when a grouper took the bait and started off across the pass. The Doctor let him run until 100ft. of line had run out, when he struck, and soon reeled him in so that we could see that we were sure of fish enough for breakfast. The grouper made a good fight and tried to get under the dock, but the Doctor soon landed him on deck, where the cook met him with frying pan and knife. He weighed 8lbs., and made a meal for the whole party.

After breakfast we fished from the schooner and dock, and within one hour we had caught twenty-five mackerel and five grouper.

The Spanish mackerel (next to the pompano) stands at the head of all salt water fish for beauty. They are graceful in outline, with long tapering bodies, and covered with tiny transparent scales, that when first caught reflect rainbow colors; but every scale falls off at death, and the beautiful colors fade out, leaving the fish as smooth as a brook trout. They have the flavor of the regular mackerel, but are less oily than the northern fish.

As the fish did not bite after dinner, we went up the beach after shells and gathered a large quantity; some rare and beautiful. We saw jelly fish and sea horses, stranded on the sand, and many coon tracks on the beach, where they had been looking for turtle eggs, of which they are very fond.

Our captain promised us a brown conch stew for supper. He put an old greasy and rusty kettle on the fire, put in some salt pork and fried the fat out, then added water and flour and stirred the same until the rust and grease had become well mixed, which was the secret of making the brown color to the stew. Then he added fish, potatoes and onions, cut up in small cubes, and boiled the whole conglomeration for forty minutes, when the stew was done. He then poured the "brown stew" into the wash basin, from which we were to be served, and called all hands to dinner. We made various excuses, and the "brown stew" was left to the captain and cook, who ate the whole mess with great relish.

That evening we built a camp-fire near an old house, and Mr. Leaycraft told us some stories of his early life in New York city. He had held down a clerical seat in the city hall, had been a private detective and had served two or three years on the Police force. While in this he was stationed near the docks, and part of his duty was to look out for river thieves. Many schooners and canal boats had been robbed by an adept thief named "Slippery Jack," whom no officer could capture. A scheme was devised to capture this "wharf rat" and Mr. Leaycraft was detailed to work it up. He went aboard a schooner that had just anchored out in the stream, and secreted himself in the cabin, sending the captain and crew ashore just before dark, thus leaving the craft actually unguarded. About 10 o'clock at night he heard a bump under the stern, and soon a man whom Leaycraft recognized as "Slippery Jack" forced his body half through one of the cabin windows. Leaycraft grabbed the thief by the collar, which gave away, and the fellow—true to name—slipped back into his boat and sculled rapidly away.

Leaycraft ran on deck, and drawing a bead on the fugitive ordered him to come back; but he kept on sculling, and Leaycraft fired. The man then threw up his hands, fell from his boat and went down. Leaycraft went to headquarters and reported that he had killed "Slippery Jack." The next day the papers had an account of the transaction, and congratulated the captains of schooners and canal boats that the King of Wharf Rats was dead. Not long after this a thief caught in the cabin of a canal boat was recognized as "Slippery Jack," who said he had not been struck by the shot from the schooner, but had played possum by diving under his boat, coming up on the off side and floating safely away with the tide.

The next day we took our rods and went up the pass to a narrow inlet, through which the incoming tide was running like a mill race, and standing on a point of sand, made casts and reeled in the Spanish beauties until we had captured forty, when the tide became slack and the fishing was over for that day. We returned to the schooner, where the cook had been watching a set grouper line since morning. We were just in time to see the line straighten out. At the proper time the cook struck and the astonished grouper made a fine fight for his liberty. He tried to run under the schooner but was checked; then he jumped clean out of the water and tried to shake the hook from his mouth; then he ran under the dock and wound the line twice around a pile. Mr. Marsh took the shore end of the line back around the pile and hauled him up, hand over hand, on to the dock, when he began to jump and shook the hook from his mouth. Mr. Marsh fell upon the fish, holding him with both hands and knees, and called loudly for the hatchet, which the Doctor produced, and the 24lbs. grouper was dispatched and secured. The meat of the grouper is hard, white and very free from bones, and while they are not to be compared with pompano, red snapper, or Spanish mackerel, they are far better than the northern carp, pickerel or red horse.

We trim our sails for home, where we distribute our fish among friends.

We caught two hundred mackerel, seven large grouper, and brought them home in fine condition. R. P. BELL.

## A DAY WITH THE FLATFISH.

S. MET me the other day and remarked, "The flatfish are running up the bay now. What do you say, shall we try them some day next week?"

"Agreed," said I, "Cad and I will come down in the morning and take breakfast with you."

That night I overhauled my tackle, strapped the little rod on my wheel, set the alarm clock for an early hour and was soon dreaming. It seemed about fifteen minutes when the racket commenced and I crawled out of bed, groped around for a match, lit the gas, slipped into my old duds and stole down stairs for a cup of coffee, and then slinging the fish basket over one shoulder, mounted the bike and started for C.'s My, but it was chilly. A heavy fog hung over everything. The city streets were deserted by all save a sleepy "copper" and a stray cat. C. roused up, we were soon on the way to Pawtuxet. The sun was gradually rising over the housetops. The fallen leaves were frosty and glistening in the morning light, and cracked as the pneumatics rolled lightly over them. Our fingers tingled a little as they grasped the cold handle bars, but the invigorating exercise, stimulated by the cool air and the prospect of a good day's outing, sent the warm blood rushing through the body. Oh, ye brother anglers and shooters, go on a wheel to your sporting grounds. Nothing like it. You don't sit cramped in a wagon with your blood frozen in your veins. Down the road we sped, joking and story telling, until we reached the little red cottage on the banks of the cove. There was no one around. It looked deserted. A loud banging on the door, however, brought a grunt from within, and later the door opened and the smiling face of S. appeared.

"Good-morning, boys," he remarked. "Got here early enough, didn't you."

"Yes," replied C. "Art here must have been up all night. Came around to the house just after I got to bed."

"Well," said S., "we'll have breakfast."

This over, we took the boat and started for the Flats, where we anchored, but fished without success. We then pulled over to the ledge, catching nothing but chogsets. Then down to Seal Rock, where the sport began.

Probably all of our salt-water fishermen have caught flatfish, but for the benefit of those inlanders who may at some future time have a chance to fish for them, perhaps a little description of the tackle used would not be out of place. A light rod is the best. Mine was a 10oz. bass fly-rod, but one tip was broken, and cutting it off and fitting a three-ring top, I have what I call a good rod for this fishing. We use braided linen line for salt-water fishing, considering that it will stand best. Some use a leader as for scup and some a brass wire spreader, I generally fasten a sinker, and by the way a good sinker of about the correct weight in a moderate tide, I found was a rifle bullet with a small screw eye fastened to its end. I use my condemned .38-180 bullets. The sinker is fastened to the end of the line and the hooks above it, thus by allowing the sinker to rest on the botton one can more easily feel the slight bite of a small fish. As I have noticed that flatfish are sometimes found directly feeding on the botton, and at other times off the bottom, I generally arrange so that one hook shall hang below the sinker and one or two above.

A small hook, say a No. 6, 7 or 8 Carlisle to double gut is the proper thing for flats and scup, although when using a handline for tautog, I have caught both these fish on a good-sized Virginia, but as they have a small mouth and nibble, a smaller hook will catch them quicker.

Well, C. took first meat—a good flatfish. S. followed with another; then C. landed two. It rather looked as if I was to be left, keeping up my reputation as a Jonah when first starting in. But a couple became tangled on the hooks, and then the fun began. Out they came by ones and twos. The fish bag over the side soon became filled, and then a big basket. It began to get monotonous, and as we were getting hungry again S. suggested we quit and get home.

As we passed up the channel we were hailed by a number of boats, and when we showed the catch all hands pulled up and headed for the rocks. TODE.

## THE LOCH LEVEN TROUT.

I HAVE received the following letter from Dr. J. D. Quackenbos about the Loch Leven trout which requires no comment from me, as he writes from personal experience and his own convictions upon the subject. Certain it is that there is something queer about this fish, and surely Dr. Quackenbos makes a very excellent argument against those whom I quoted in my notes in FOREST AND STREAM of Oct. 6 that contend that the Loch Leven is simply the brown trout. Since my notes were printed Mr. W. de C. Ravenel, acting assistant in charge of the Division of Fishculture of the United States Fish Commission, has written me that in the experience of the Commission it has been impossible to distinguish between the Loch Leven and the brown trout except it was known in which ponds the fish were reared. A. N. C.

*Mr. A. N. Cheney:*

In your communication of Oct. 6 to FOREST AND STREAM, you state that possibly I may wish to reverse my opinion regarding the classification of the Loch Leven trout—an opinion formed deliberately while I was at the loch, and supported by that of many British anglers whom I have the honor of knowing. I thank you for giving me the opportunity to make public any change in my convictions; but I am still of the same mind. That is, I believe the Loch Leven trout to be a different species of *Salmo* from the yellow *fario* that inhabits every burn and fattens in every mill-pond in Scotland. I regard it as the descendant of an anadromous fish that was seagoing within the present century. Sea fishes originally had access to the loch; flounders were caught there almost within the memory of living men; and there can be no doubt that this fish, which inhabits the Forth to-day, ascended annually from the Firth, before the age of dams and bleacheries, to spawn in the inlets of Loch Leven and feed upon its luscious crustacea. Tradition credits its presence in other Scottish lochs to the fathers of the church, who, being restricted to a fish diet during many days of the year, were active in planting choice foodfishes, among them this delicious sea-run trout and the toothsome grayling from the continent.

The Loch Leven ova that I imported in 1887 were hatched and placed in my brooks at Soo-Nipi Park. The fry certainly did not develop into *Salmo fario*, for a brown trout has never been seen in any of the lakes or brooks of the Sunapee system. But so like are the young and adult Lech Levens to our landlocked salmon, that many anglers believe a Loch Leven trout is often fast when the exciting cry of "Salmon! salmon!" from the fishing fleet greets the first frenzied leap of a supposed ouananiche pierced by the lucky steel. One Scottish authority unhesitatingly declares the Loch Leven trout to be a landlocked salmon dwarfed to its present proportions in its shallow miniature ocean. But I believe it to be a landlocked sea trout. With its purplish silver back and silvery sides starred with X and XX spots, it so closely resembles the well-known migratory *Salmo trutta*, that foreign experts commonly fail to distinguish between the two fish. The fin-ray formula is identical in each. Moreover, sea trout that have been confined in fresh water are absolutely indistinguishable from the true *Fario levenensis*.

The theory that the differences observable in the two trouts of Loch Leven are due to differences of food or residence is hardly tenable. Every one is aware that trout by the divine law of adaptation, instinctively put on the tint that harmonizes with their environment. I have known our American brook trout entirely change its coloration in twenty minutes. But no one ever heard of a trout's losing all his fighting qualities or running from a lake into a brook; or on returning from brook to lake, of exchanging his round, red haloed spots for black crosses, doubling the number of his cæcal appendages, modifying his fin-ray formula, altering the shape of his maxillary and generally refining his form, and doffing the red tips of his adipose fin—a marking never lost by the brown trout. As soon believe the saibling of Sunapee will become a brook trout if taken up the Pike stream and fed on grasshoppers, or that a Chinaman will lose his almond eye and musky pig-tail by swapping his native diet of rice and rats for Yankee crustacean salads. Both species of trout live side by side in Loch Leven, subjected to precisely the same influences. Why do not all lose their silver and stars (if all are brown trout), and why are not all structurally the same? Dr. Parnell, Yarrell, Sir John Richardson and Dr. Günther have answered these questions by pronouncing *Fario levenensis* an independent species.

But finally, dear brother of the angle, and most effectually, there is as much difference between the killing of one of these sublime fish and the suffocating of an ordinary brown trout as there is between the conquest of our ouananiche and the potting of a sucker. In full view of the castled isle of Mary Stuart, one casts his delicate flies deftly knotted on the most invisible of gut. As he floats toward the suggestive ruin, the scenes in Queen Mary's eventful life flit before him—from her youth whose rare beauty is immortalized in the Orkney portrait, to the beginning of the end, when, charged with complicity in the murder of Darnley, she was committed to Loch Leven Castle in 1567; to her escape the following spring with the aid of "Little Douglas," who yielded to the power of her resistless charms; to the revolting murder that closed her career in 1587, and the agony so inimitably expressed in the livid pallor and contracted features of the Abbotsford painting of the Queen's head after decollation—but look! that gleam through a wave's crest! that flash of

bluish silver beneath the flies, like the sudden blaze of an old mine stone! Instinctively your wrist turns and the barb of your tiny hook is set in the lip of a 1½lbs. Loch Leven trout. The moment you have dreamed of for years has come at last. Be cautious, for your tackle is refined to the utmost, and your fish is the prince of finny diplomats. His first rush is toward the drifting boat. "Catch the pirn!" cries the watchful oarsman, and in response you reel madly on the slack and lead your fish successfully past the bow. Who but a lover of the angle can conceive of the exalted thrill which accompanied the rush of that trout at the descending "teal and red"—who else, that erethism, short-lived, unearthly, that electrified every nerve in your frame as you twisted the steel into his jaw and felt him "fast"—that concentration of delight in the struggle that followed, wherein the noblest fish that God has made matched his brute intellect, perhaps his manifold experience, against your reason and art; wherein your wand-like Leonard gracefully responded to his desperate leaps for life, and arched in perfection to his wild circles. Who but an angler knows of the sweet calm that followed victory, as you tenderly placed your dying captive on the skiff bottom, and wearied by the excitement, sat down to watch his brilliance fade, with the feeling that if your life were forthwith to end, you had not altogether lived in vain.

May I entertain the hope that some day you—the dear companion of many a happy outing—will fish with me over the shoals of the storied loch; for I know that an introduction to the capricious, sharp-eyed, quick eared beauty himself must convert you from the stupid theory that makes him one with the good-natured, slow-going, worm-loving synthesis of ocellated spots, and yellow netherness, and orange fins. JOHN D. QUACKENBOS.

## ANGLING NOTES.

### Salmon in Lake Champlain.

FISH COMMISSIONER JOHN W. TITCOMB, of Vermont, writes me: "I recently heard a report that landlocked salmon had been taken in Lake Champlain, and that Walter Button, who keeps the lighthouse near Burlington, was conversant with the facts in the case. I wrote him and received in answer the reply which I send you with the inquiry whether you have heard anything about this, and whether you believe there is anything to it."

Mr. Button states the case as follows: "I am in receipt of yours referring to landlocked salmon. The salmon was taken in April, 1894, with a spear by a man living about one mile north of Port Kent, N. Y. The dressed weight of the salmon was 12½lbs. This man saw others of about the same weight. I think this fish was taken near the mouth of the Au Sable River, and I also think it is not generally known in that locality that any salmon has been taken."

I had not heard of this particular fish mentioned by Mr. Button, and it is not at all probable that it was a landlocked salmon, as the first of this species planted in the tributaries of Lake Champlain were planted on the Vermont side of the lake in November, 1891, and they would scarcely grow to a dressed weight of 12½lbs. in three years. The fish was, without doubt, a sea salmon, and it is not unusual to find sea salmon in Lake Champlain, on the New York side, as the result of planting fry in the Saranac River. In FOREST AND STREAM June 2, 1894, in a note under the head of "Salmon from Lake Champlain," I mentioned that two salmon were killed at the mouth of the Saranac, and 10 or 12 others were seen. The same note told of a number of plants of salmon fry made on both sides of the lake.

Only a few hours after I received Mr. Titcomb's letter, about Port Kent fish, Mr. J. W. Burdick, general passenger agent of the D. & H. R R., wrote me from Albany as follows: "It will interest you to know that on Monday last I obtained authentic information of a sea salmon approximating about 20lbs. weight, having been seen in Lake Champlain, near Westport, this season. The fish was not caught, but Mr. Bishop, the man who saw it, is an intelligent and careful naturalist and says there is no question whatever as to the identity of the fish."

### Plants for Ponds and Color for Boats.

Mr. Edwin Hallam sends me another letter containing these queries: "I have just read your researches on the Loch Leven trout printed in FOREST AND STREAM. In the latter part of the article you mention some plant food for the trout family. Will you in some of your future notes in FOREST AND STREAM give the common English names of some of the plants, how and where to plant them, whether the seed or roots and character of bottom where grown?

"Here is another and perhaps foolish query, at least it so appeared to me when I first heard of it; but I would like your opinion on it. In lake and river fishing, does the outside color of the boat used have any influence in scaring the fish? In other words, if a boat is painted white outside would it be more likely to frighten fish than one painted lead color or some neutral tint? I have known fishermen who will not go fishing in a boat that is painted white on the outside if they can obtain any other."

To answer the last question first I may say that I have known fishermen who would not go fishing unless the "sign was right" and the two men would contend for a different sign. In fact, old Jake Hutcheson at Sunapee Lake swears by one "sign" on one day and another "sign" on another day, depending upon his success. He changes so easily and so frequently that I think during the year he must swear by all the signs of the Zodiac. I think Jake would be just the man to tell about the proper color to paint a boat. Personally, I have never concerned myself about the outside of the boat from which I fished. If it was dry inside and reasonably safe it was enough. However, now that I think of it I believe I have fished more from boats white or very light color outside than from boats of any other color, and I do not believe the color makes any more difference to a fish than it does whether you smoke a five cent Grabiola or a twenty-five cent Perfecto when you sit in the boat.

In my reference to aquatic plants for trout waters I did not mean to be understood that the plants themselves were to serve as food for trout, but rather that the water vegetation supported the food of the fish. Livingston Stone says: "Water plants consume carbon and return oxygen. Trout consume oxygen and return carbon. By putting plants and fish together, therefore, we avail ourselves of one of nature's great universal agencies, in balancing vital forces against each other, and maintaining the equilibrium on which the continuance of organic life depends."

While aquatic plants are most desirable in trout waters, great care should be exercised to introduce only those that are desirable, for there are many that are wholly undesirable. Mr. Armistead, of the Salway Fishery in Scotland, recommends water lobelia and water quillwort. "The water quillwort does well in water any depth up to 10 or 12ft., and does not attain a height of more than a few inches; it soon covers the bottom with a grass-like looking carpet. The water lobelia does best in water from a foot to 3ft. deep, and sends up a single flower stem." To plant them, he recommends that grass sods be cut and placed grass downward and the roots of the water plants be pricked into the soil, and then the sods are lowered into the water where desired. I have read very recently that Mr. Armistead had a book in press in which this subject will probably be treated at length, but I cannot now recall where I saw it or who is to publish it.

Mr. Thomas Andrews, a most successful trout breeder in England, says, "If I may be allowed to venture an opinion, I will name as the most desirable weeds to cultivate, watercress, starwort, crawfoot and water celery. Many southern rivers contain all these forms of vegetation, and they can be easily introduced into other waters. There can be no doubt that the reason of our southern trout running to such a size is owing to the great growth of vegetation, and the abundance of insect life which it supports." If Mr. Hallam will write to W. P. Seal, 907 Filbert street, Philadelphia, Pa., he can find out all about aquatic plants from A to Z.

### Hook Chart and Jam Knot.

I believe that I have now sent out charts showing old and new scale of numbering fish hooks, with illustrations of jam and slip knots, to all that applied for them. One postal card was dated Charlestown, with no State, and I assumed it was Charlestown, Mass., from the street number given, as I happen to know that Charlestown, N. H., has no such number. Another card was from Iona, with no State, and the post mark furnished no clue, so I sent the chart to Michigan. If I have overlooked any request for charts I will be glad to remedy the oversight, as I now have plenty of the circulars.

In explanation I may say that I sent out at first a lot of charts in eight-page form, and when I sent to England for more I could only obtain about a dozen of them, but I did get a quantity in another form showing various forms of hooks with diagram of knots on a separate sheet.

### Landlocked Salmon for Lake Champlain.

A week is supposed to have elapsed since I wrote the first note in this week's issue of FOREST AND STREAM, and in fact it has elapsed.

I received a letter from the U. S. Fish Commission which read in part as follows: "As the trip to Lake George with landlocked salmon was such a success I think it advisable to try and move another carload of these fish to Lake Champlain as referred to in the Commissioner's letter to you on Dec. 4, 1893. The car can go to Albany, thence over the Delaware & Hudson R. R. to such places on the lake as you think desirable. Will you arrange the transportation for the car and crew, making special arrangements to have the car hauled over the D. & H. The car can leave Green Lake with the fish as soon as these arrangements are made."

As I was not expecting that this car load of fingerling salmon would be planted on the New York side of Lake Champlain, I was somewhat unprepared to carry out the directions of the Commission so far as selecting suitable streams might be concerned, and that was all important to the success of the plant. The Chief Executive of the United States occasionally addressed a letter to some "great and good friend," but I did better than that, for I addressed two letters to two great and good friends. The first, Mr. J. W. Burdick, the general passenger agent of the D. & H. R. R., sent me transportation for the car and crew by return mail, and said he would go up the Champlain division of his road and examine the streams near Plattsburg and tell me all about them so I would not have to go myself. The second, Mr. W. C. Witherbee, of Port Henry, commodore of the American Canoe Association, wrote very promptly that he would go up the line of railroad and examine the streams near West Port, Port Douglass, etc., and that he would furnish teams to take the fish from the car to the streams. The car started from Green Lake Oct. 25 with 10,000 fingerling salmon. Mr. Elihu Vedder, of Rome, Italy, was my guest at the time and I invited him to go with me and see how fish were transported and planted. The car was No. 4 in charge of Captain T. C. Pearce, and when I met it early Saturday morning, my first question to Capt. Pearce was, "How are the fish?" When he said "Bad, very bad," his face was so serious I thought something serious had happened, but an examination of the contents of the hundred cans in the car showed the best carload of landlocked salmon ever transported a journey of forty-eight hours. The fish had grown remarkably since the trip of car No. 4 to Lake George, and they were all large and thrifty. The total loss for the entire trip was 230, making it the banner trip with this species of fish. Mr. Burdick had written me that he would make the journey with the car, but wired me Saturday that he was unexpectedly called elsewhere much to my regret, for he has for years taken such an active interest in stocking the waters of northern New York with fish, I hoped he might see this planting of salmon made. We were favored with perfect Indian summer weather, and as the car rolled along the shore of Lake Champlain, the talk of its occupants was about fish. Mr. Vedder, who is familiar with and takes a great interest in all that relates to Japan and the Japanese, told of Japanese fish and fishing, and put a question to me which I could only pass. Many people have seen the Japanese gold fish with their tails, and doubtless wondered how the Japs succeeded in breeding the fish with the extra tails. Mr. Vedder leased a villa in Perugia, Italy, for a number of summers, and he says that on the property there was an artifical pond containing gold fish, and they had occupied the pond for a hundred years or more, and certainly there had been no introduction of gold fish from Japan. Yet these fish, some of them, developed three tails. As this could not have been the result of Japanese skill in breeding curiously formed fishes, what was it? Was it just Mother Nature and inbreeding?

At Port Henry Mr. Witherbee met the car, and the fish in sixty cans were taken off, doubled into thirty cans, and three teams started with them for three different trout streams flowing into the lake without dams, mills or falls on them. The car went on to West Port and Port Douglass, and twenty cans were taken off at each place, where teams were waiting to take the fish to other trout streams tributary to the lake. Mr. Vedder and I remained at Port Henry, the guests of Mr. Witherbee. We followed the teams to the streams and saw the salmon planted in ideal water, and when this was done we drove to the top of Bulwagga Mountain, where we had a view difficult to surpass. The next day we went by steamer with Mr. Witherbee and Dr. Chas. A. Neidé to Fort Crown Point and Fort St. Frederick, taking a Peterboro canoe with us. After walking over the old ruins, little known in comparison with Fort Ticonderoga, but much greater in extent, and well worthy of preservation for historical associations, we listened at sun setting for the quail which Mr. Witherbee has planted around the old ruins, and which have done remarkably well in spite of the cold winters, and then in the gloaming we paddled back to the Bulwagga boat house. The next morning the fish car returned from Plattsburg and we joined it. Port Henry is far and away the best place to plant fish that I ever struck, provided Mr. Witherbee and Dr. Neidé assist at the planting, and I would like to make a plant up there every few months. Aside from the personal pleasure that Mr. Witherbee's guests are sure to derive, the streams are in every way suitable for the salmon, and they will be protected in the streams by Supervisors' law, and fed by plantings of natural food if such proves to be necessary. A. N. CHENEY.

### Pleasant Pond Landlocked Salmon.

CHARLESTOWN, N. H., Nov. 2.—*Editor Forest and Stream:* Some three weeks since Mr. Cheney in his "Angling Notes" published a letter from Commissioner Wentworth, of New Hampshire, on the stocking of Pleasant Pond, in New London, with landlocked salmon, and the rapid and remarkable growth they had shown.

Now, with all due respect to Mr. Wentworth, I think he was entirely mistaken in supposing that he made the first plant of these fish in Pleasant Pond, for if my memory serves me right, and it usually does, my colleague on the Fish Commission put a few hundred fry in this pond in 1879 or '80.

I know he abstracted a few from one of the large lots sent to Sunapee about that time, and placed them in two other trout lakes in the vicinity. One of them I know was Star Pond in Springfield, and I think the other was Pleasant Pond. I transmitted all my regular records to my successor, and all my private notes and correspondence with a copy of the lists of lakes in the State stocked and unstocked were destroyed by fire three years ago.

Still, my memory is very clear on the point, and I know we made several small plants of fry experimentally, without any public announcement of the fact. Among the ponds so stocked were the Campton Ponds in Sandwich, and Commissioner Hodge and I visited them two years later, and took three or four salmon a foot long as samples, and I carried two of them down to Manchester and exhibited them. It is very doubtful if any one but Powers and his nephew knew of the plant in Pleasant Pond, but I am very sure it was made about 1880, and this will account for the 12lbs. fish to-day.

I have been hoping to see an account from "W. W. B." of gray squirrel shooting on Skitsiwauke, as the bushy-tailed gentry have been more plenty on this side of the river than for many years past.

A young friend of mine shot fourteen one day a month ago, and our village baker got sixteen and was back for dinner. I am on the retired list now, my right eye, which has been troubling me for some years, has at last refused to work in the woods, and I am too old to learn to shoot left-handed. It does not matter much, for the desire "to go out and kill something" departs with advancing years, and I am content to read FOREST AND STREAM and enjoy the stories of the exploits and successes of a younger generation, and am glad once more to hear from "Shoshone." When in funds I shall send for the "Danvis Folks."

VON W.

### Cayuga Lake Black Bass.

ITHACA, N. Y.—Messrs. Finch and Goodwin claim the laurel branch of victory for the finest catch of black bass made at this end of Cayuga Lake this season. In a few hours' fishing one afternoon recently they caught five bass, the total weight of which was 17¾lbs. Every one was a beauty and a fighter from Fighterville. A local angler, who claims to have facts to back up his pessimistic views, asserts that the enormous quantity of carp at this extremity of the lake is destined to destroy the true angler's sport very shortly. M. CHILL.

### Hudson River Striped Bass.

SING SING.—The members of the Point Senasqua Rod and Reel Club catch of striped bass on Oct. 27 on Croton Point Reef was the best of the season, some 60 being taken from 1lb. up. H. S. S.

**The Sunset Limited to California. 18 Hours Quicker Time.**

COMMENCING Thursday, Nov. 1, the Southern Pacific Railroad will put on a fast limited train composed of dining and sleeping cars to run from New Orleans, La., in connection with the Southern Railway, "Piedmont Air Line," Southwestern Limited now operated between New York and New Orleans, within thirty-nine hours. This elegant train will leave New Orleans every Thursday morning at 8 o'clock, after arrival of the Southern. This new schedule gives the California travel many hours the quickest travel with complete dining and sleeping car service between New York, Los Angeles and San Francisco. For full particulars call on or address R. D. Carpenter, General Agent, or Alex. S. Thweatt, Eastern Passenger Agent, 271 Broadway, New York.—*Adv.*

FOR the convenience of the bankers, brokers, lawyers and business men in general, in the vicinity of Wall street and the Stock Exchange, the Pennsylvania Railroad tickets, formerly at No. 113 Broadway, have been removed, two doors below their former location, to No. 111 Broadway, Trinity Building, where every facility has been provided for the reservation of sleeping and parlor car space on limited and other trains to the West and South, and where a staff of experienced and attentive ticket sellers will be found constantly on duty during business hours, assuring the public the promptest and best attention. With this office in Trinity Building and the old established offices continued at No. 1 Astor House and at No. 433 Broadway, besides an office at No. 261 Broadway, the convenience of the down town business community has been well provided for by the Pennsylvania Railroad Company, which is always in the van to meet the wishes and requirements of the citizens of New York.—*Adv.*

## FIXTURES.

### DOG SHOWS.

1895.

Feb. 19 to 22.—Westminster Kennel Club's nineteenth annual show, at New York. James Mortimer, Supt.

Feb. 26 to March 1.—Mascoutah Kennel Club, at Chicago. J. L. Lincoln, Sec'y.

### FIELD TRIALS.

Nov. 13.—New England Field Trial Club, Members' Sweepstake. A. R. Sharp, Sec'y, Taunton, Mass.

Nov. 14.—Gordon Setter Club's Trials, at Assonet, Mass. L. A. Van Zandt, Yonkers, N. Y., Sec'y.

Nov. 19.—Eastern Field Trials Club, at Newton, N. C. All-Aged, Eastern Subscription and Selling Stakes. Entries close Oct. 1. W. A. Coster, Saratoga Springs, N. Y., Sec'y.

Dec. 17.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.

## NEW ENGLAND K. C. TERRIER SHOW.

### Oct. 30 to Nov. 2. Entries, 244. Dogs Benched, 192.

THERE are some kennel clubs whose members are easily discouraged, but it requires a good deal more than a deluge to dampen the spirits of the New England Kennel Club's board of governors. Imagine a country club with all the modern appurtenances of race-track, polo grounds—about the best in America—golf links, etc., etc., a club house appointed with all the internal and external comforts so dear to the country club man; to one side of the polo grounds a long marquee, in which ran two long rows of Spratts benching, a number of bedraggled enthusiastic terrier men and women and a drenching rain and you have a picture of the conditions under which the club labored the first two days of the terrier show. Were the bench show committee any the less hearty in their greetings? Not a bit of it; they just made the best of it, and so did the visitors, with an occasional adjournment to the fire in the club house, where we examined the pictures and other *objets d'art*.

At this time of year, when the weather clerk is in such a capricious mood, an undertaking such as this is fraught with much misgiving as to success, but we must congratulate the club on the complete success of their venture, and also the terrier men who risked their dogs' health in making it possible. The nights are cold at this time of year, even when the weather conditions are all that could be desired; but with two boisterous wet, cold days and nights the risk the dogs ran was considerable and the watchmen's lot must have been a very unenviable one.

On Wednesday afternoon the weather was so boisterous and the tent so water-soaked that fears were entertained that the whole thing would come down. Such a catastrophe was happily averted. Hallowe'en brought us hope, however, for the setting sun struggled through the clouds and left a streak of gold on the horizon that promised Country Club weather for the morrow. True to his promise, Old Sol came forth on Thursday and gave us a glorious Indian summer day, and and the club members and their wives and aunts and sisters and cousins drove into the grounds from all directions until the club house piazza and grand stand were crowded with a brave show of men and women in stylish costumes, and the fun of the fall meeting commenced in earnest.

Judging commenced in the tent on Tuesday at 11:30 A. M. There was some delay on account of the express companies' dilatory deliveries and several dogs were still at the office when their numbers were called. Mr. James Mortimer assumed the ermine and right well did he acquit himself. His was a difficult task, more so than at an ordinary show, so many dogs were entered in so many different classes, and that there were no reversals, and that he kept them well in his eye showed that his judicial acumen was in good working order, and that he judged in no haphazard manner, for he did not require to turn the pages of his judging book back to see where he was at. The task was rendered still more important as he was surrounded by a number of terrier experts whose presence would have made a less confident man a trifle nervous. Among those present were Prescott Lawrence, Winthrop Rutherford, Clarence Rathbone, G. W. H. Ritchie and Dr. Foote, the Damon and Pythias of the wire fancy; H. W. Smith, C. Stedman Hanks, D. Baldwin, H. F. Church, Frank F. Dole, Dr. R. S. Huidekoper, Herbert Merriam, Walter J. Comstock, Andrew B. Cobb and son, W. Wheeler, T. C. Hollender, J. E. Davis, Charles F. Roberts, Dr. and C. Walter Lougest, Robert S. Ryan from Baltimore, German Hopkins, Alfred Heald and son, W. S. Turner, Charlie "Blemton," Donald Monroe, P. Grady, etc.; and among the locals, E. H. Moore, F. Blackwood Fay, W. C. Baylies, Dr. Perry, Hollis White, Sam Hammond, Jr., Willard Clark, Harry Brooks, and of course the managers of the affair, Ed Brooks, H. H. Hunnewell, Jr., Oscar W. Donner, and the secretary, D. E. Loveland.

Judging was interrupted by the whippet racing and was not concluded until Wednesday. There was no occasion for hurry, as none of the outside sports could be indulged in. The first heats of the whippet racing were run off under trying conditions, but this part of the programme is described elsewhere. The arrangements for the show were carried out well; outside the tent on the open field a regulation Spratts judging ring had been put up, but the weather compelled this part of the programme to be carried out under the tent, where there was ample room between the two rows of benching, and the outside ring stood a silent reproach to the weather clerk. Austin & Graves fed the dogs very acceptably, and no dog went hungry. Buchan's disinfectant was used, but terriers are clean dogs as a rule, and there was little need of its services. Mr. Hughes made his initial effort at benching and acquitted himself well, as the unevenness of part of the turf made the task a difficult one. Spratts Co., Austin & Graves and Buchan Disinfectant had stands at one end of the show. There was no lack of attendants with numbered badges, and everything seemed to work smoothly, Messrs. Ed Brooks and Cobb getting the dogs into the ring in good order.

And now a word for Messrs. Ed. Brooks and Hunnewell who practically assumed the burden of the show, they were untiring in their efforts and their courtesies to visitors will long be remembered by those fortunate enough to be there, for ourselves were we to speak as we feel, our remarks might appear too fulsome, but we take this opportunity to return thanks, while every visitor from highest to lowest went away charmed with the hospitality of the N. E. K. C., and convinced that the first terrier show held in America was a rousing success. There was no money in the venture for the club as admission was by badge and it simply formed one of the features of the Country Club's fall meeting that opens the winter season. The Terrier Show has come to stay and a bigger one is to be held next year.

On Tuesday evening the club gave a dinner to the visitors and it was a most enjoyable affair.

BULL-TERRIERS.—Those who like to see a good bull-terrier were not disappointed at the turn-out here, but we should have preferred to see one or two other kennels represented. Still, the quality of those present could not be denied, but no new faces were brought to light. In challenge dogs Cordona was ready for anything, as he was shown for his life, and it was a pity he had no competitor to put him on his mettle. This dog keeps himself well, and has doubtless a long winning career before him. Champion Attraction has been good to herself lately, and might have been shown a pound or two lighter; still, she looked very well, and it is wonderful how she holds her head. Only two came forward in heavy-weight open dogs, and the new dog, Greenhill Nunthorpe, had an easy win from White Wonder, Jr. He is a wonderfully well muscled, strong-looking customer, has a good long head with powerful jaw, and well-cut ears, which he carries to perfection; eyes too round and full, and should be darker, but the dark rims make the eyes look lighter and larger than perhaps they really are. His worst faults lie in shoulders which are not clean enough, and elbows might be straighter and truer; behind the shoulders he is a model of strength and beauty of form, with excellent quarters and muscling and a well carried stern. Little Wonder, Jr., is a lighter made dog throughout, a bit lippy and is light in body yet, good legs and fair head. Aspiration was absent. That good quality bitch, Edgewood Topsy, had no difficulty in scoring over young Miss Giddy in bitches (3), her beautiful neck and clean shoulders being very noticeable, and her whip tail is something we see too little of in the general run of terriers now shown; Miss Giddy loses in muzzle, too weak and is cheeky, nice front, fairly good body, and quarters well muscled, but her stern is coarse compared to Topsy's; Castle's Pride is also fine in muzzle, should be better in feet, nice neck and shoulders, dips slightly behind the withers, and was not in tip-top show shape. Open dogs under 30lbs. (4), but Rookery Boy was absent. First went to Little Flyer, the smart little dog that won at the Rhode Island show; second to Edgewood Pete, a trifle short in neck, while a little more liberty in couplings would improve him, but body is well shaped, nice head and eye and of the true shape in both respects. Jack of Clubs, vhc., has excellent neck and front, a little fine in muzzle, and lips could be tighter, and eyes should be smaller; it was a very close thing between the two latter. Jean D'Arc, the Louisville winner, was alone in the bitch class, she was out of coat but was well shown otherwise. Frank F. Dole won the kennel prize with four he need not be ashamed of.

BOSTON TERRIERS.—These were catalogued after the bull-terriers, but were judged first, as they are prophets not without honor in their own country. This is the first time that a representative gathering of these terriers (*sic*) have come under the eye of an all-round judge, and several pet decisions were upset; but the judge was as consistent as the different types would allow. This time we will essay a criticism of the entries, drawing conclusions from a careful reading of the club standard, the exhibit on the whole being more even than is usually the case. There were no challenge classes. In open dogs, 25lbs. and over, three came forward, but Prince Walnut, a noted winner, was absent. First went to Jack, the Rhode Island show winner. He has a more level jaw than Tom Sayers, second; good, neatly-shaped body, if it is a little light, good, straight forelegs, cheeks should be flatter and a trace of the bull is shown in wrinkle there. Rowdy, vhc., loses in stern and head to the others, and is not so good in front. In bitches Countess dethroned Nankin and Nancy. Countess has a very neat head, but does not stand so true in front as the others, and is too wide in chest. Nankin, second, is a little "bully" in body and heavy in front; has a nice fine tail. Nancy has a stump tail, but possesses a good flat skull, with a neat, square, deep muzzle, the best head of the lot, and is a smart shaped one in body. Open dogs under 25lbs. had a class of six entries, one absentee—Tom. First went to Dixie, a small, very neatly put together brindle dog, tail has a bulldog kink; he is light in bone and should be shorter in front and stronger in pasterns, very neat little flat skulled head and level muzzle, but the latter is not wide nor deep enough. Spider, second, has a fine little whip tail, pasterns are weak, nice compact body, but skull is a little round and muzzle should be deeper and squarer. Both the winners were true at elbows and straight in bone. Jem Mace, reserve, throws his feet out, is scarcely clean enough in cheek, good muzzle but skull seems too broad, nice body but "bully" in quarters and tail. Peter, vhc., is a bit leggy, but has a good flat skull and square muzzle, tail inclined to a "screw" and he should be better ribbed up Tobey, hc., is a bit cowhocked, is cheeky, and face is too snipy, tail seems to have been cut off, toes closer and pasterns stronger, elbows not true, nice body. In bitches the Providence winner, Topsy, took the ribbon again. She has a faulty screw tail, good body, fore legs not very straight and ears are too large; a dark brindle bitch with a little too much bull in her. Sally also loses in terrier characteristics. Rose, reserve, is a neat sort. In puppies, Topsy is lower to the ground and better in stern than Clytie. Bayonne Kennels took the kennel prize with a neat lot.

FOX-TERRIERS.—Such a grand collection of quality has probably never been seen before, unless we except the New York shows in the spring, but even there there was not the opportunity to get such a line on the young stock coming on. In challenge smooths the meeting of Blemton Victor II., Warren Safeguard and Starden's King again proved a most exciting and interesting struggle for honors. Starden's King—good dog though he is and better has been—had to give way before his younger rivals. Terrier all over as Safeguard is and keeping himself wonderfully clean in shape for a dog built on lines that promise coarseness with increasing years, he stood a model in the ring last week, such a combination of terrier attributes that at once calls to mind the Fox-Terrier Club's standard, where it says that a fox-terrier should resemble a foxhound in general symmetry. In meeting, however, such a "gentleman" as Blemton Victor II., the black and white dog is at a disadvantage in the absence of that *soupçon*, as the judge would say, of "gentle" quality so much desired, but, while we hail the victor we cannot help casting a backward glance at Safeguard and—wish we owned him. The next class brought out three noted dames, Warren Captious, Dona and Miss Dollar, and Captious took the blue; wonderfully well shown, her superiority in bone, excellent front and nice body could not be denied, but she loses in head to the others. Dona took reserve over Miss Dollar, but it is a near go between the two bitches; neither are very good in feet, though of course not bad, but I like Dona better in front and body than the other, though she loses to Miss Dollar before the eye; either one of them could be first without the judge's life being in danger. Open dogs was a warm lot, seventeen, with four absentees. The judge was very careful, and his decisions were well received. First went to the Providence winner, Blemton Rasper, who would be better if lower to the ground; he was put down in rare form, and handled by the "only German," lost nothing for the want of a bit of showing at the right time; second to Warren Tip Top, the well-known son of Dusky Trap, who, though not as clean in skull and shoulders as he might be, is still a rare, workmanlike-looking terrier. Beverwyck Royalist is better in head, but not as good in body, well shown—better than at Providence. Blemton Stickler, reserve, should be stronger in pasterns and ears closer carried. In the vhc. division were Warren Salesman, a son of Safeguard, who has all the terrier shape of his sire, but is scarcely so good in head nor feet, still all round he pushes Tip Top close, even if he does lose a little in quality. Hillside Dominican also took three letters; he is making up nicely; his good feet, ears and head are most noticeable. Seacroft King is a bit long-waisted for this company, though a nice fronted dog, and shows lots of character. Beverly Rally was a noticeable terrier that will be spoken of later on. Raby Pallisy has seen his best days; looked light in loin, though well shown, faulty in skull and pasterns. Werner, c., is rather a plain sort, pinched in muzzle, excellent texture of coat, should be a little more compact in body. Domino is getting a little coarse in skull and it is not flat enough and his ears should be carried closer. Spendthrift shows too much stop; nicely carried ears. Hillside Royal, Warren Layman and Tory were absent. The open bitch class was not quite so hard to sort out. There was one absent, Beverwyck Twilight. The blue ribbon fell to Blemton Vindex, excellently shown and "German" held the leader; she might be better in feet and pasterns and a little stronger before the eye, but she is a well-topped terrier all round and never looked better. Another well known bitch, Warren Dorothy, came next and ran the winner mighty close, for she has not the faults mentioned in Vindex. Warren Duty, third, is another capital little terrier; her ears might be better carried and a little more bone would suit her; our criticism at Providence when her kennel mate Ripple beat her comes right here, when Warren Damsel divided them, Ripple getting vhc. Damsel is a little round and full in skull and a bit light behind, but beautiful in front. Another vhc. taker was Spinster, a well known matron whose worst fault lies before the eye where she is weak, the eye is not small enough either, and ears should come down closer. Hill Hurst Diana we have described before; her muzzle should be stronger and ears smaller; fine front and nice body. Blemton Erminie is a bit long-waisted and eye should be darker; nice head and ears. Hillside Sapphire, c., is rather short in muzzle and feet should be more compact. Seacroft Empress is another that needs a little more terrier and should be more compact in body and stronger in muzzle. In puppy dogs (6) a very neat sort in Beverly Rally could not be denied; excellent front, a furnished body, he only requires to shape up a bit between the eyes, flatten in skull and get his ears down properly and he will make a name for himself; he is a son of Starden's King and a credit to his breeding, a handsomely marked white and tan dog. Warren Prancer is another of Safeguard's stamping, a trifle common in head, but rare front, bone and body. Seacroft Result, reserve, should be stronger in pasterns, a little lightly and long built all through, ears well carried, good coat. Blemton Visitor, vhc., is faulty in front and eye, but good shoulders and back. Seacroft Duke, hc., was well shown, is leggy, but all over I like him better than his kennel mate. Hillside Twinkle is rather a nice sort and could have been placed higher; good bone, niceish head with well carried ears. In the bitch puppy class two came forward. Hillside Stella, the winner, should be stronger in front and muzzle, after this she is a well shaped one that showed well, but Seacroft Daisy did not want anything but home and could not be kept in the ring, so I can tell little about her.

WIRE-HAIRS.—This type of the fox-terrier showed up with a strength in keeping with its increasing popularity, and although the Hill Hurst Kennels owned a majority of the entries still there was a number of other exhibitors that made the competition interesting. In challenge dogs the kennel mates, Cribbage and Oakleigh Bruiser met once more with the decision as of yore. Cribbage was really put down in almost faultless condition and far away better than he has yet been shown. He has usually with the exception of, Providence, been shown light, his ears troubling him so that he lost instead of gained flesh; now he is all right and he shows it. Bruiser also looked well but the decision was never in doubt. In bitches, Rydale Pattern (come back to her own again), has improved in flesh and coat the last few weeks though still a little ragged; she did not show very well—crouching a good deal, probably the effect of the weather. Open dogs (9), two of them absent, Saint Trick and Compton Vindex the latter having arrived too late for judging. The rival Brittle pups, Mister Great Snap and Brittle Beaut, furnished us with another little comedy which became almost a tragedy for the owner of the losing dog. Joking aside, the rivalry between these two good dogs and their owners is an amusing but at the same time a game one and would we had more of the same sort—it is the life of sporty showing. Well, Mister Great Snap won and Brittle Beaut was forced to take a second place. Snap has rounded into nice shape lately. I like Beaut's head better than the winner's but he is not so compactly built nor so good in front and should be lower to the ground. Third went to a much improved dog in Halifax Revival whose good bony front and pin wire coat will always bring him well up; he is on the coarse side, but should get some good stock. Yale Tramp, vhc., is another useful sort though a trifle long cast, nice head and front. Hill Hurst Trick, vhc., a son of Cribbage, has a good long head, should be straighter behind the withers. Hill Hurst Nip, c., needs trimming up a bit; too much hair on face and should be harder in coat. In open bitches (7) Surrey Janet, looking tip top, just romped in a winner, but another good sort, Hill Hurst Brunette came second; her coat is the texture of a besom. She was at Providence. H. H. Blossom, third, would do with more length in head but is making up nicely, carries good ears. H. H. Vamp, vhc., is another that has been out before this fall; and Hill Hurst Pansy, a little weak in head, brought up the rear with c. Lister Nettle and Roath Rennie were marked absent. In puppy dogs Hill Hurst Trick had an easy win, the other prize being withheld. In bitches little Hill Hurst Snowflake, very small, but neatly and stylishly made, scored over Maybrook Vixen, who is faulty in head and a bit slack and long in back but good front.

Smooth novice dogs have all with the exception of Warren Satyr, been mentioned above, he is another son of Safeguard and partakes of his individuality, though rather plain in head, excellent terrier front and good ears. The bitch class winners have also been spoken of with the exception of Blemton Vigilant, vhc., who is light in loin and long enough, nice ears and head in which the eye should be darker. Hill Hurst Vic., hc., is rather down behind and quite wide enough in front. In novice wire dogs it was again Brittle Beaut and Halifax Revival, and Hill Hurst Blossom and Pansy in bitches. Then came several classes that gave even the weakest competitors a chance for a ribbon, dogs of both sorts never having won but one first prize and those never before exhibited, but as they were entered in the other classes it is no use giving a recapitulation. Hillside Reina is one we did not see before, she is rather short in face but nice front, bone and ears. Hillside Kennels supplied both winners in bitches never exhibited before, with Reina and Valina, the latter short in head too, good front and coat. Diadem II., vhc., is rather weedy. In wire dogs, same division, H. H. Trick beat Doctor, a rather nice sort, little full in eye and ears large, fairly good head and front. In bitches H. H. Snowflake had a walkover. Then came the specials and these happened to fall so that each kennel but one got a piece of the pie. Blemton Kennels took the kennel for smooths, the Hill Hurst team for wires, and then in the big competition for best ten the ribbon fell to the Rutherford team, as they certainly contained a majority of sorty ones to which Safeguard had given the stamp. The competition for best in the show lay between Blemton Cribbage, Victor II. and Surrey Janet. It was close all around, but we believe the judge thought Blemton Victor's stronger head and better eye offset any disadvantage he might have to the other in lightness of back rib and loin. Speaking personally we should have plumped for Surrey Janet, fined out a little between the eyes, little fault could be found with her and she is a terrier all over with plenty of strength both back and front.

H. W. LACY.

[*For other classes see next issue.*]

### LIST OF AWARDS.

BULL-TERRIERS.—CHALLENGE—*Dogs:* 1st, Dr. H. S. Huidekoper's Cordona. *Bitches:* 1st, F. F. Dole's champion Attraction.—OPEN—*Dogs* (30lbs. and over): 1st, F. F. Dole's Greenhill Nunthrope; 2d, G. F. Brown, Jr.'s White Wonder, Jr. *Bitches:* 1st, F. F. Dole's Edgewood Topsy; 2d and very high com., F. F. Church's Young Miss Giddy and Castle's Pride—*Dogs* (30lbs. or under): 1st, H. F. Church's Little Flyer; 2d, F. F. Dole's Edgewood Pete. Very high com., F. W. Neale's Jack of Clubs. *Bitches:* 1st, F. F. Dole's Jean D'Arc.

BOSTON TERRIERS.—*Dogs* (25lbs. and over): 1st, D. Baldwin's Jack; 2d, T. Plant's Tom Sayers. Very high com., W. T. Rowe's Rowdy. *Bitches:* 1st and 2d, Bayonne Kennels' Countess and Nankin. Very high com., Phelps & Davis's Nancy.—*Dogs* (under 25lbs.): 1st and high com., Bayonne Kennels' Dixie and Tobey; 2d, C. F. Leland's Spider. Reserve, T. Plant's Jem Mace. Very high com., F. C. Hollender's Peter. *Bitches:* 1st, Phelps & Davis's Topsy; 2d, D. Baldwin's Sally. Reserve and very high com., Bayonne Kennels' Rose and Miss Hermie. High com., W. G. Kendall's Mora. *Puppies:* 1st, G. B. Inches's Topsy; 2d, Phelps & Davis's Clytie.

FOX-TERRIERS (SMOOTH).—CHALLENGE—*Dogs:* 1st, Blemton Kennels' champion Blemton Victor II. Reserve, L. & W. Rutherford's Warren Safeguard. *Bitches:* 1st, L. & W. Rutherford's Warren Captious. Reserve, John E. Thayer's Dona.—OPEN—*Dogs:* 1st, Blemton Kennels' Blemton Rasper; 2d, L. & W. Rutherford's Warren Tip Top; 3d, Clarence Rathbone's Beverwyck Royalist. Reserve, Blemton Kennels' Blemton Strickler. Very high com., John E Thayer's Hillside Dominican, W. Wheeler's Beverly Rally, L. & W. Rutherford's Warren Salesman and Charles S. Hanks's Seacroft King. High com., C. Stedman Hanks's Raby Pallisy. Com., John E. Thayer's Werner and Hillside Domino, Blemton Kennels' Blemton Spendthrift. *Bitches:* 1st, Blemton Kennels' Blemton Vindex; 2d and 3d, L. & W. Rutherford's Warren Dorothy and Warren Duty. Reserve, L. & W. Rutherford's Warren Damsel. Very high com., L. & W. Rutherford's Warren Ripple and Blemton Kennels' Spinster. High com., Hill Hurst Kennels' Hill Hurst Diana and Blemton Kennels' Blemton Erminie. Com., John E. Thayer's Hillside Sapphire and Charles Stedman Hanks's Seacroft Empress.—PUPPIES—*Dogs:* 1st, W. Wheeler's Beverly Rally; 2d, L. & W. Rutherford's Warren Prancer. Reserve, C. Stedman Hanks's Seacroft Result. Very high com., Blemton Kennels' Blemton Visitor. High com., John E. Thayer's Hillside Twinkle and C. Stedman Hanks's Seacroft Duke. *Bitches:* 1st, John E. Thayer's Hillside Stella; 2d, C. Stedman Hanks's Seacroft Daisy.

WIRE-HAIRS.—CHALLENGE—*Dogs:* 1st and reserve, Hill Hurst Kennels' Cribbage and Oakleigh Bruiser. *Bitches:* 1st, Hill Hurst Kennels' Rydale Pattern.—OPEN—*Dogs:* 1st, G. W. H. Ritchie's Mister Great Snap; 2d, Rochelle Kennels' Brittle Beaut; 3d, A. C. Bradbury's Halifax Revival. Reserve, F. A. King's Yale Tramp. Very high com., Hill Hurst Kennels' Hill Hurst Trick. Com., G. von L. Meyer's Hill Hurst Nip. *Bitches:* 1st, 2d, 3d and very high com., Hill Hurst Kennels' Surrey Janet, Hill Hurst Brunette, Hill Hurst Blossom and Hill Hurst Vamp. Com., Dr. J. Ferris Belt's Hill Hurst Pansy.—PUPPIES—*Dogs:* 1st, Hill Hurst Kennels' Hill Hurst Trick; 2d, withheld. *Bitches:* 1st, Hill Hurst Kennels' Hill Hurst Snowflake; 2d, A. C. Bradbury's Maybrook Vixen.—NOVICE (Smooth)—*Dogs:* 1st, L. & W. Rutherford's Warren Salesman; 2d, W. Wheeler's Beverly Rally. Reserve, L. & W. Rutherford's Warren Satyr. Very high com., C. S. Hanks's Seacroft Result. High com., J. E Thayer's Werner and C. S. Hanks's Seacroft Duke. Com., Blemton Kennels' Blemton Ethelred II. *Bitches:* 1st, Hill Hurst Kennels' Hill Hurst Diana; 2d, John E. Thayer's Hillside Sapphire. Very high com., Blemton Kennels' Blemton Vigilant. High com., Hill Hurst Kennels' Hill Hurst Vic.—WIRE-HAIRS—*Bitches:* 1st, Hill Hurst Kennels' Hill Hurst Blossom; 2d, Dr. J. F. Belt's Hill Hurst Pansy.

Smooth and wire-haired dogs that have won but one first prize—1st, L. & W. Rutherfurd's Warren Salesman; 2d, John E. Thayer's Hillside Dominican. Reserve, Blemton Kennels' Blemtom Firebrand. Very high com., C. S. Hanks's Seacroft King and Rochelle Kennels' Brittle Beaut. High com., C. S. Hanks's Seacroft Result. Bitches ditto—L. & W. Rutherford's Warren Ripple; 2d, J. E. Thayer's Hillside Dunnette. Reserve, J E. Thayer's Hillside Reina. High com. and Com., Hill Hurst Kennels' Hill Hurst Blossom and Rose.

Smooth dogs never before exhibited—1st, W. Wheeler's Beverly Rally; 2d, L. & W. Rutherford's Warren Prancer. Reserve, C. S. Hanks's Seacroft Result. Very high com., Blemton Kennels' Blemton Visitor. Smooth bitches, ditto—1st, J. E Thayer's Hillside Reina; 2d, J. Thayer's Hillside Valina. Very high com., W. Wheeler's Diadem II.

Wire-haired dogs never before exhibited—Hillhurst Kennels' Hillhurst Trick; 2d, W. P. Hunnewell's Doctor. Bitches ditto—1st, Hillhurst Kennels' Hillhurst Snowflake.

DANDIE DINMONT TERRIERS.—CHALLENGE—*Dogs:*—1st and 2d, E. Brooks's King o' the Heather and Amphion.—OPEN—*Dogs:* 1st, E. Brooks's Laddie. *Bitches:* 1st, withheld; 2d, E. Brooks's Gyp V.

BEDLINGTON TERRIERS.—1st and 2d, C. W. Lougest's Mount Vernon Tibbie and Professor.

SCOTTISH TERRIERS.—CHALLENGE—*Dogs:* 1st and reserve, Brooks & Ames's champion Tiree and Rhudaman. *Bitches:* 1st, Brooks & Ames's Wankie Diana.—OPEN—*Dogs:* 1st, very high com. and high com., Brooks & Ames's Wankie Tam, Wankie Dandie, and Wankie Masher and Wankie Caddie; 2d, J. L. Little's Bellingham Bailiff; 3d, P. H. Howard's Kilbar, Jr. Reserve, G. Hatch's Kilrain. High com., J. L. Little's Newcastle Sandie and Newcastle Allan, W. C. Coop's Scott. Com., J. L. Little's Indiana Scottie. *Bitches:* 1st and 2d, Brooks & Ames's Wankie Janet and Vorda. Very high com. and high com., Brooks & Ames's Wankie Daisy and Wankie Cambria.—AMERICAN BRED—*Dogs:* 1st, Brooks & Ames's Wankie Tam; 2d, P. H. Howard's Kilbar, Jr.; 3d, G. Hatch's Kilrain. Reserve, Brooks & Ames's Wankie Dandie. Very high com., Brooks & Ames's Wankie Dandie and Wankie Masher, and Hazlecroft Farm's Hazlecroft Angus. High com., J. L. Little's Newcastle Allan. Com., Hazlecroft Farm's Gipsey John. *Bitches:* 1st and 2d, Brooks & Ames's Wankie Diana and Wankie Janet. Reserve, Brooks & Ames's Miss Ted. Very high com., J. L. Little's Newcastle Rona. High com., Brooks & Ames's Wankie Cambria.

IRISH TERRIERS.—CHALLENGE—*Dogs:* 1st and reserve, Walter J. Comstock's Merle Grady and champion Boxer IV. *Bitches:* 1st, Walter J. Comstock's Dunmurry.—OPEN—*Dogs:* 1st, Sam A. Fletcher's Jack Desmond; 2d, T. S. Bellin's Marton Shamrock. Reserve, J. C. Rogers's St. Blaise. Very high com., Walter J. Comstock's His Honor and J. E. Davis's Regent St Mike. High com., C. S. Hanks's Mike Murphy and Samuel D. Parkes's Tim. Com., Samuel D. Parkes's Tubbs. *Bitches:* 1st, E. K. Butler, Jr.'s Beauty Norah; 2d, Daniel McGarry's Brina. Very high com., Edward Woolhead's Daisy.

BLACK AND TAN TERRIERS.—CHALLENGE.—*Dogs:* 1st, Rochelle Kennels' Broomfield Sultan.—OPEN—*Dogs:* 1st, Davis & Winter's Rochelle Rush; 2d, Albert Searle's Jasper. *Bitches:* 1st, A. Searle's Lady Prudence.

YORKSHIRE TERRIERS.—*Dogs:* 1st, Mrs. H. H. Hunnewell, Jr.'s Bijou.

SKYE TERRIERS.—CHALLENGE—*Dogs:* 1st, H. K. Coner's Endcliffe Maggie.—OPEN—*Dogs:* 1st, Duncan Kerr's Roderick Dhue.

### The National Fox Hunters' Association Meet.

*Editor Forest and Stream:*

Judge J. H. Perry, chairman of the committee of the National Fox Hunters' Association who went to Olympian Springs to look after the grounds, writes: "I have often visited and hunted in the vicinity of Olympian Springs and know the people and country well. The people are kindly disposed and there are plenty of foxes. The Olympian Springs are two and one-half miles southeast of the Chesapeake & Ohio R. R. in Bath county, Ky. The springs can be reached from the station either by wagon, omnibus or hack, the road being a level pike.

Olympian Springs was at one time a famous watering place. It is situated between gently rolling hills, within sight of high knobs on the east and gently undulating flatlands on the west for several miles. Nearly all the larger timber has been taken off, leaving the small timber and underbrush, and haul roads are all over the land, which will allow you to gallop as fast as you like. There is but little cleared land and but few fences. The country in which we will hunt is about six miles wide and ten miles long."

Word has been received from hunters in almost every State in the Union making inquiries concerning the meet, and it will undoubtedly be the largest gathering of fox hunters ever held in America. HARRY L. MEANS, Sec'y.

LOUISVILLE, Oct. 29.

### Gordon Setter Trials.

*Editor Forest and Stream:*

As previously announced, the Gordon setter field trials will take place on the grounds of the New England Field Trials Club, at Assonet Neck, Mass., on Nov. 14, after the club's Members' Stakes have been run off. All entries for the Gordon Setter Stakes must be received here by or before Saturday, Nov. 10, together with the nomination fee of $5. The additional fee of $10 to start is payable on or before the night previous to the trials. JAMES B. BLOSSOM,

President Gordon Setter Club of America.

NEW YORK, Nov. 3.

Mr. John H. Matthews has bought the bulldog Reve Royal from Mr. Gilmore, of East Osange, N. J.

# DOG CHAT.

Mr. M. J. Flaherty of Providence, R. I., writes us: "It is with great regret that I am compelled to write you of the death of my promising young bitch Daisy Hunter III., by Gem—Florence, who won second prize in the class for bitch puppies at the late State Fair show here, and where she contracted the disease, distemper, which carried her off. She was 13 months old, color lemon and white same as her great-grandmother, and gave promise of being a good one, as she was showing great things, and I expected to run her in the trials next season if nothing happened. I have still some of the same litter left and will try some of them next season in the trials.

Dr. Lougest, owner of the Mount Vernon Kennels, of Franklin, Mass., is continually improving his already strong kennel. In addition to the bloodhounds we spoke of, he has also purchased the noted mastiff bitch Lady Cameron (E. K. C. S. B. 31605), by champion Lord Stafford. Mr. Higgs says that Lady Cameron is absolutely the shortest faced and heaviest wrinkled mastiff bitch in England to-day; she is in whelp now to his dog Viscount. Lady Cameron beat Brampton Beauty at the Crystal Palace show. Dr. Lougest has also invested in a brindle bitch; importing her for breeding purposes in order to keep up the black points. She is a prize winner and is a litter sister to Miss Constable. They were shipped from London on Oct. 24, and would have been out before, but the Kennel Club did not supply the certificates in time.

Messrs. A. E. Foster and Watrous have purchased the noted field spanield Staley Baron, and Seacroft Kennels have bought the black and tan terrier Gipsey Girl from Geo. S. Thomas, who sailed for England two weeks since.

The St. Bernard Club has instituted a St. Bernard sweepstakes for St. Bernards whelped in America on and after April 25 and not later than Oct. 25, 1894. To be awarded at the St. Bernard Club show to be held in connection with the Farm Show at New York about May, 1895. Entrance fee is $5 for each entry. The amount received will be credited to the variety (rough or smooth) and sex of the entry, the winner in each class to take the total amount received in that class. (The total amount received from rough dogs will be awarded to the best rough dog, the same with smooth dogs, rough bitches and smooth bitches.) The second best in each class will receive a club medal. Competition is restrictd to dogs owned by members of the St. Bernard Club of America. Entries close Dec. 1, 1894, with Mr. Jas. A. C. Johnson, 120 Broadway, New York. In case the Farm Show is not held the stake will be declared off.

Edward Manice, who fell from a Norwich boat and was drowned was not E. A. Manice of dachshund fame.

Mr. and Mrs. E. M. Williams, the Skye breeders and late owners of champion Old Burgundy, have removed to Charlottesville, Va., where they intend settling and expect to be well represented at future shows. Mrs. Williams is thinking of bringing out some toy "Poms," which should take well over here.

The Collie Club has the pleasure of announcing that as a starter for its special prize list for the Westminster Kennel Club dog show of 1895, Mr. J. Pierpont Morgan has kindly offered the following: A silver cup to cost $50 for the best collie born in 1894, exhibited by a member of the Collie Club. A free service by either Sefton Hero or Rufford Ormonde to the best bitch in the open class, owned by a member of the Collie Club and the same in the novice and puppy classes. A bitch winning in one of these classes cannot compete in the others, the service going to the next best bitch.

The following is the proposed new classification of the American Spaniel Club: Classification No. 1: Spaniels, all breeds over 28lbs.—Challenge class dogs, challenge class bitches. Field spaniels, black—Open class dogs, open class bitches. Field spaniels, any other color—Open class dogs, open class bitches. Cocker spaniels not over 28lbs., black or liver—Challenge class dogs, challenge class bitches. Cocker spaniels, any other color—Challenge class dogs and bitches. Cocker spaniels, black—Open class dogs, open class bitches. Cocker spaniels, red or liver—Open class dogs, open class bitches. Cocker spaniels (any other color than black, red and liver)—Open class dogs or bitches. Clumber spaniels—Open class dogs and bitches. Irish water spaniels—Open class dogs and bitches. Classification No. 2: Spaniels, all breeds over 28lbs.—Challenge class, dogs and bitches. Field spaniels, black—Open class dogs, open class bitches. Field spaniels, any other color—Open class dogs, open class bitches. Cocker spaniels not over 28lbs., black or liver—Challenge class, dogs and bitches. Any other color—Challenge class, dogs and bitches. Black—Open class dogs, open class bitches. Red or liver—Open class dogs, open class bitches. Any other color—Open class, dogs and bitches. Clumber spaniels—Open class, dogs and bitches. Irish water spaniels—Open class, dogs and bitches. Classification No. 3, is left unchanged. If our readers have any suggestions to make on the above, we should be pleased to publish them.

The members of the Bulldog Club will be shocked to hear of the sudden death of Mr. Renshaw Mason Jones, who was an enthusiastic bulldog owner and member of the club. A fortnight since he went to his Newport residence in perfect health, a day later was taken ill with typhoid fever and died Nov. 5. The deceased gentleman owned the well known bulldogs Derby May, Lady Grace, etc. As a friend of Mr. Travers he always showed His Lordship and White Venn.

The Hamilton Kennel Club's local show will be held Saturday, Nov. 24. The judges will be: Mastiffs, great Danes, Newfoundlands, collies and barbettes, A. D. Stewart; St. Bernards, W. H. Thompson; English greyhounds, Russian wolfhounds, Danish wolfhounds, deerhounds and staghounds, W. J. Tulk; fox-terriers, F. R. Close; pointers, setters, foxhounds, harriers, beagles and retrievers, E. Tinsley; all spaniels, terriers, except fox and bull-terriers, and pugs, W. McDonald and Andrew Murdoch; bull-terriers and bulldogs, Dr. Griffin; whippets, R. B. Harris; dachshunds, poodles and miscellaneous, C. W. Ricketts.

### United States Field Trials.

BICKNELL, Ind., Nov. 6.—*Special to Forest and Stream:* The trials began with the Pointer Derby, ten starters, namely: Mayfield's Belle and Stafford's Della, Devereux's Tamarack, Jr., and Mayfield's Day Dream, Tinsley's Roderick T. and Rex Faust, Blankenbaker's Lad's Lady and Lockhart's Halbraden, Hempstead Don and Lady Peg II. Five were kept in the second series: Tamarack, Jr., Lady Peg, Hempstead Don, Lad's Lady and Roderick T. The competition was decidedly inferior. The vegetation is yet rank, which makes the work more difficult. Birds have not been found plentiful. The judges are Major J. M. Taylor, J. B. Stoddard and J. M. Freeman. The Setter Derby has twelve starters, namely: Clementina and Nora IV., Jack Scott and Nellie Fox, Cynosure and Tony Boy, Iroquois and Dixie's Flag, Wun Lung's Pride and Harvard, Tony's Gale and Lady Mildred. The Southern trials are postponed till the first week in February, B. WATERS.

### U. S. F. T. Club's Derby B.

*Editor Forest and Stream:*

In the list of Derby B. forfeitures I see that I included Mr. J. L. Adams's dogs Jamie, O. G. and Gilt Edge. This is a mistake; the forfeits were regularly paid, but I failed to make the entry of same on the books.

P. T. MADISON, Sec.-Treas.

INDIANAPOLIS, Ind., Oct. 28.

### Canadian Fox-Terrier Club.

*Editor Forest and Stream:*

Will the secretary of the Canadian Fox-Terrier Club give the names of the incoming committee that appointed the present president, secretary, etc. INQUIRER.

# Hunting and Coursing.

## FIXTURES.

FIELD TRIALS.

Nov. 19.—National Foxhunters' Association's meet, at Olympian Springs, Ky. H. L. Means, Sec'y, Louisville, Ky.

COURSING.

Nov. 14.—California State meeting at Merced, Cal. J. R. Dickson, Secretary.

### Western Massachusetts Fox Club Hunt.

PRESIDENT Kinney, of the Worcester Fox Club, in his speech at the banquet of the Western Massachusetts Fox Club, forcibly expressed the hold which fox-hunting has upon its devotees.

"The fourth of last month I killed a moose in New Brunswick," he said. "To-day I killed an old dog fox. Which do you think gave me the most pleasure?" Every fox-hunter knew what the answer would be and there was a burst of approval when the speaker added, "Why just five minutes of the dog's baying is better than five moose."

When such words can be said of sport, is it any wonder that fox-hunting is popular among the old New England hills?

The seventh annual hunt of tho Western Massachusetts Fox Club was held in Westfield, Oct. 31 and Nov. 1. The first day was rainy in strict accordance with the precedence which has governed every hunt the club has held, but that fact did not prevent a large attendance and a successful meet. The banquet on Wednesday night was up to the high standard set by the club in every particular, and 150 members and guests listened to as fine a symposium of after dinner speaking as is heard anywhere. This fox club oratory is perhaps the distinctive feature of the hunt, and it is a question if it is equalled by the oratory of any other similar organization in existence.

Three foxes were killed the first day, which is an excellent rainy weather record and four the second day. This equals the record of the last two years.

The first day's hunt was in Pochossit along the foot of Montgomery Mountain. The hunters got an early start and had some hopes of a fair day, as it was not raining. The day was very damp, however, and soon the over-saturated clouds began to spill a little, and before noon it was raining hard. Among the visiting sportsmen the first day were N. Wallace, who brought four hounds, and H. Schenherr of Farmington, Conn.; G. I. Clapp, I. C. Neat, George Lux and William Lux of Hartford, Mr. Owens of Granby, Conn., C. E. Brace of Lee, W. H. Perkins of Ware, Hon. John R. Thayer, J. M. White, Dr. C. H. Hake, O. M. Ball, Wm. R. Dean, E. Sprague Knowles and President A. B. F. Kinney of the Fur Club, all of Worcester. This latter party brought the following dogs: Logan, Ned, Aggie and Fly of the Kinney-White pack, Billy Dean's Diamond and John R. Thayer's Joe and Guess. In all there were about thirty dogs on the opening day of the hunt.

Foxes were killed by B. J. Babley, Arthur Dibble and A. B. F. Kinney.

The scene that night in the Park Square Hotel, the headquarters of the Fox Club, was bright and cheery despite the pouring rain outside. A FOREST AND STREAM representative found the place full of hunters discussing plans for the following day and the events of the day that had gone. Before an open fire lay the body of an old dog fox, one of the trophies of the day's hunt. President Roraback and the various committeemen of the club were on hand, and the talk was as lively as at a political caucus. At 7 o'clock the members and guests fell in behind the Westfield band and marched to the Town Hall, where an excellent banquet had been prepared.

Following this President Roraback made a short address of greeting. "When I say I am glad to see you," he said, "I mean every word I say." He then introduced Capt. L. F. Thayer, civil engineer and former chairman of the Board of Selectmen, as toast master. Capt. Thayer modestly remarked that he had protested against the appointment "with all the shyness he was able," but before the evening was over he proved that his selection had not been ill judged, and that he possessed all the requirements of a good toast master. His introductions of the speakers were invariably witty and to the point, and he had the requisite number of good stories, which were given out at proper intervals.

James H. Bryan, representing the business interests of Westfield, was the first speaker. He was followed by Hon. John R. Thayer of Worcester, introduced as "chock-full of fox lore." Mr. Thayer remarked that though his local club, the Worcester Fur Club, was a strong and representative organization in a city of 100,000, yet only 60 or 70 persons sat down to its annual banquets, yet Westfield, with but 10,000 population, could muster 150 representative citizens. He recalled the events of the day, and remarked that he had stood in a driving storm for three hours "until there wasn't a thing dry about me except my throat."

Mr. A. S. Kneil was next called upon, but failing to respond, his place was taken by his running mate, Representative Henry C. Bliss, of West Springfield. Mr. Bliss wove a graceful speech about the truism that the labor of one age becomes the diversion of the next. The bicycle, he said, was but the offspring of the treadmill, and the sport of fox hunting the child of the necessity that had obliged the first settlers to hunt and fish for a living.

Toastmaster Thayer told a little story of how, when sidetracked one day in North Dakota, he had his attention called to a handsome parlor car, likewise sidetracked, which had its sides and ends festooned with deer and antelope and ducks and geese till it was nearly hid from sight. He entered the car, and then and there made the acquaintance of the president of the Worcester Fur Club. Here was an original hunter—a man who had killed all kinds of game found on the continent—yet whose first love and last love was the sound of the hunter's horn.

Mr. Kinney with much dry humor, told the story of the day's hunt. He told how the dogs had been put out on Mount Tekoa, four miles from Westfield and how, realizing the fact that being a wet day the foxes would seek the high land, he had hired a farmer for a dollar to drive him to the top of Montgomery Mountain. It was a dollar well spent as proved by subsequent events. With the assistance of a native he had picked a good crossing and waited there an hour without hearing a dog.

"Finally I heard Thayer's dogs start a rabbit I think on a hill called Grindstone. I said it is no use to go there. If it is a fox he can't stay on that little hill long." The "old gent" who had been his companion couldn't stand the bay-

ing, however, and started off for the hill. "He hadn't been gone five minutes when I heard a pack of dogs coming, and I knew there was business ahoad of them." Shortly after he had the pleasure of killing the fox. He was "straightened out" with three dogs only a few seconds behind. The dogs were Logan and Ned of the Kinney-White pack and Billy Dean's Diamond.

When the "old gent" heard the shot he returned in a hurry, but such was his excited state of mind that he ruined further chance of scoring. At one time John R. Thayer's dogs drove a fox within five rods of him, but he was "dancing about" under an apple tree looking in all directions but the right one, and turned the fox from the other hunter. Mr. Kinney, when the fox was no more, was prompted to turn his gun in the direction of the aged enthusiast, but humanity prevailed and the "old gent" lived to scare away another fox shortly after.

Mr. Kinney eventually got home at a cost of some $ $ $ and found that his friends thought that because he had killed a fox he had a dry throat. "I didn't work half so hard to get that fox as I did to keep sober afterward," he remi niscently remarked.

Wm. R. Dean, of Worcester, prompted by the toastmaster, told an amusing story on himself in which an unsophisticated native and a 50 cent fox figured prominently.

The silver-tongued Henry W. Ely, of Westfield, was the next speaker. He told how the toastmaster had come to him for suggestions as to whom to call upon. He had not answered him because the band had just then started up and made that impossible; but if he had he would have told him the story of Richard, who at the capture of Jerusalem was asked how the captors were to know the faithful so that they might make no mistake in whom they killed. Richard replied, "Slay everybody! God knows his own." Mr. Ely would have called upon every one present to speak, so he said. It would be known afterward who were orators.

Then Mr. Ely began to philosophize still in the realms of mediæval history. He told how "that old law-giver, Charlemagne," had said, "I declare it to be a law that the true and only universal antidote for selfishness is universal hospitality." Mr. Ely made a very happy application of this law of hospitality to the present day and the fox club.

E. Sprague Knowles said: "If I knew a man who was a fox hunter wherever I was—on a team, in a hotel—I should go to that man and introduce myself and I know I should find a friend." The Chauncey Depew of Canada, (as the northern part of Westfield is called), who is sometimes known as George Parker made a witty speech, and was followed by C. K. Lambson.

Toastmaster Thayer announced that the hour of ten had arrived, an hour which by general understanding terminated the ceremonies. He made some suggestions for another year—one of which was that the name of the club should be changed to the "Rainmakers Club" and that the meetings should hereafter be held during the months of drought, for the benefiit of the farmers. "I trust," he continued "sometime in the future—I don't know when it will be—that the club may come together on a bright, clear, crisp day. I have attended every meeting and I have never known a day different from this."

An executive meeting of the club followed the banquet, at which the following officers were elected: President, George W. Roraback; Vice-Presidents, F. S. Gross, Wm. Warren; Secretary, C. M. Goodnow; Treasurer, L. P. Lane; Executive Committee, W. H. Foote, R. H. Kneil, J. T. Way; Reception Committee, J. D. Cadle, G. E. Whipple, N. A. Harwood; Dinner Committee, Wm. Warren, J. A. Lakin, T. J. Cooley; Master of Hounds, C. D. Allen.

One of the amusing features of the evening was "carving a coon" by President Roraback. When the cover was removed the coon was found to be alive. It was not of the native New England variety either, and the dish might fittingly have been styled "African coon."

### THURSDAY.

Dame Nature, won from her frowns by their bravery in facing the elements the first day, yielded a willing conquest to the bold hunters the second, and turned to them a face all smiles. As is the case with most coquettes, she could scarcely be gracious enough, and spared no pains in turning out a perfect day. Not a cloud hung about the summit of Tekoa, and the woods were just damp enough to let the hounds trail well.

Promptly at 5 o'clock the hunter's horn sounded through the streets of Westfield, and a little after 6 the main division of hunters set out. Just after the start an accident happened that marred the day for some of their number, and which might easily have spoiled the day for all. It was, in short, the upsetting of the tally-ho. The tally-ho carried the following gentlemen: Ex-Senator John R. Thayer, E. S. Knowles and O. M. Ball, of Worcester, and John T. Way, F. S. Deweo, Jr., E. E. Austin, Geo. W. Waterman, Wm. L. Barton, Dr. Holland, and the driver, all of Westfield, on the outside, and Perry Otis, who stayed inside to keep tne door shut. With this array of manly beauty, it is no wonder that the coach was the cynosure of all eyes; but Perry Otis, who stayed inside and let vaulting ambition alone, had much the best of it in the end. Unseen fair ones peeped admiringly from behind curtained windows as the coach bowled merrily along the principal streets, and it was a question whether anybody else was in it with the tally-ho.

Some one remembered that somebody had been left behind and in an evil moment the driver attempted to turn the coach. Just then an engine on a railroad near by came puffing along, and the horses crowded the pole short round and over went the tally-ho. The dozen hunters were all thrown in a heap with the heavy-weights on top. Hon. John R. Thayer got a severe shaking up, but he is too enthusiastic a foxhunter to mind a trifle like that, and was found later in the day in the van of the hunt. John T. Way, one the energetic promotors of the meet, suffered from a badly wrenched shoulder and his right leg was also injured. Mr. Wm. J. Barton's shoulder was dislocated and Mr. Waterman was knocked senseless. He lay on his back in the road with a cigar clinched tightly between his teeth. Mr. Ball hurt his heel and leg but during the day managed to hobble to the front whenever the hounds drove his way. The driver, when he fell, still held fast to the lines, which prevented a more serious accident. He was caught under the coach and for a moment was in a very perilous position. Mr. Austin, however, grasped the leaders and the others who were not injured assisted to free the driver. Most of the hunters, including Mr. Waterman, who had recovered consciousness, having righted the coach, went on to the hunt, and one of them, the modest Perry Otis, killed a fox.

Other foxes were killed by William Tice, Arthur Dibble and a party of squirrel hunters who secured a fox that had been wounded by James L. Kelly.

The neighborhood of Tekoa was again the scene of the hunt, but the hunters were stationed mostly on Montgomery Mountain. This mountain affords a lovely view. It is set in the center of an amphitheater of other mountains that hang on the horizon like filmy clouds, and with scarcely more substantiality. The Hampton Ponds lie off to the eastward, and in its bosom the mountain nourishes twin reservoirs.

In the upland pastures violets were still blooming, and the wild apple trees still afforded an abundant supply of their fruit.

That great foxhound, Logan, was foremost among the dogs. It was said that two foxes were killed ahead of him, one of which, though wounded, might have gotten away, if he had not run it down and caught it. When the hunt was over and the dogs were being lifted into the conveyance that had brought them to the grounds, Logan stood watching with an easy indifference characteristic of the dog.

Though it had been a hard day for him, he was still on his tiptoes. When all the other dogs were in the cart, Logan walked up, and giving a light bound alighted beside them. There was no need to lift that seasoned hunter, as the other dogs had been.

Among those present the second day were H. C. Hartley, A. B. F. Kinney, C. A. Kilbur, L. R. Cole, C. A. Sheldon, John L. Kelly, A. M. Billings, G. E. Austin, H. T. Snow, F. S. Dewey, Jas. Lynch, Jas. Jeffers, S. W. Wood, Chas. M. Lewis, Dr. Jas. Allen, Fred Schmidt, Geo. Parker, F. S. Hager, Mr. Gibbs, Chas. Sherman, Joe McClure, George M. Delanny, Wm. Tice, C. H. Hake, John M. White, Wm. R. Dean, President Roraback, Hon. John R. Thayer, Chauncey Allen, Arthur Way, Tom Mountjoy, B. F. Babb and Bert Holcomb.

More than one sportsman who would have thoroughly enjoyed the hunt was kept away by circumstances beyond their control. Among these were "Woronoco," Mr. S. S. Conners who has been in ill-health for several years as the result of an attack of grip, and Mr. E. E. Clark who killed a fox last year, but was kept away this by the demands of his profession.

The date for the next hunt has been left to the executive committee to decide, but even at this early date it is safe to prophesy that when it does materialize it will be a great success. Nothing can keep it from being that. It takes something more than rain to dampen the ardor of the Western Massachusetts fox hunter and something more than snow or hail or ice to cool his hospitality. He is independent of the weather. All that is needed to make him happy and his guests also is a fox afoot in the day time and a rousing good banquet at night. The cheer of good fellowship will overcome all other obstacles.

J. B. BURNHAM.

## NATIONAL BEAGLE CLUB FIELD TRIALS.

### Oct. 29—Nov. 1.

THE fifth annual field trials of the National Beagle Club were brought to a successful termination last week at Hempstead, N. Y. To the regular attendants at these trials, who go year after year, it seemed odd to journey to Long Island instead of Nanuet, where we know every cover and are intimately acquainted with the "brier patch," "the sumac hill," "the swamp where Tony Weller ran" and other spots long to be remembered in beagle history. It was with some misgiving that we looked at the flat, uninteresting Hempstead plains, and more than one spectator who wished to see the running with as little labor as possible, wondered how he could do it, and longed for the old side-hill at Nanuet, where he could stand at ease and see the judges and hounds tear their way through the briers below. Then, too, we knew we should miss the kind hospitality of Mr. Kreuder and his family, and the jolly evenings in the homestead parlor after the serious work of the day was over.

Yet attached as we all are to Nanuet, it must be confessed that the club made no mistake when it chose Hempstead as this year's venue. While no hotel could give us the charming seclusion which we enjoyed at the Kreuder homestead, yet there are few hotel proprietors as obliging as Mr. and Mrs Roth. We overran the whole house from kitchen to garret and were never made to feel that we were overstepping the bounds which hotel guests are usually called upon to observe.

The hunting grounds—when we discovered where they were—proved to be the best suited to a beagle field trial of any yet found in the East; flat as a table, covered with dead grass and weeds, with here and there a scattered growth of oaks, birches and light underbrush, there was nothing that a stout runner could not easily break through and keep in with the hounds. The rabbits, too, deserve a word of praise. They ran almost as well as the white hares of New England, and on only two occasions were any of them driven to earth. Many made long runs in the open fields and gave the spectators a grand view of the chase.

The trials excited much interest among the residents of Hempstead, and many of them were present during the week. On Thursday a party of ladies and gentlemen from the Meadowbrook Hunt, handsomely mounted, gave a sporting air to the picture which it had not had before. Among the visitors and sportsmen from a distance whose names were not given in last week's issue of this paper were J. B. Lozier, A. W. and Geo. B. Post, H. F. Schellhass, J. W. Appleton, F. W. Chapman, Geo. W. Rogers, Robert Barstow and others.

The best of good feeling prevailed throughout the week and there was no friction or unpleasantness at any time. The decisions of the judges—Jos. Lewis, Moodus, Conn., and Bradford S. Turpin, Boston, Mass.—were well received, and the hearty cheers which greeted the victors proved that the awards were thoroughly indorsed. The prizes were paid on Thursday evening.

The National Club is strong and enterprising and is constantly growing in membership and influence, and now that it has secured the best field trial grounds in the country, it will doubtless add new laurels to its already splendid record.

On Monday morning after the adjournment of the club meeting, which was reported in last week's issue of FOREST AND STREAM, the field trial committee was called in session. Geo. Laick was appointed marshall, some minor matters were arranged and the All-Age Stake—15 to 13in.—was drawn to run as follows:

### Class A—All-Age Stake—15 to 13in.

Geo. F. Reed's blue ticked dog Buckshot (Dare—Daisy), handler, owner, *with* Mark Lewis, Jr.'s, white, black and tan bitch Mollie L. (Don—Mollie), handler, W. S. Clark.

Miss E. C. Kreuder's black, white and tan bitch Blanche (Frank Forest—Ina), handler, Geo. F. Reed, *with* Wm. Saxby's blue ticked bitch Dime (Judge—Baby), handler, owner.

Geo. F. Reed's black, white and tan bitch Nell R. (Ned—Haida), handler, owner, *with* G. A. Buckstaff's black, white and tan dog Royal Rover (Rover—Singer G.), handler, W. S. Clark.

Rockland Kennels' white, black and tan bitch Gay (Rover—Kitty), handler, H. L. Kreuder, *with* Somerset Kennels' black and tan bitch Helen (Storm—Una), handler, A. W. Post.

Somerset Kennels' black, white and tan bitch Marvel (Bounce—Ferol), handler, A. W. Post, *with* Hempstead Farm Kennels' black, white and tan dog Millard (Burk—Little Fly), handler, H. F. Schellhass.

Guy D. Welton's black, white and tan dog Joe (Billy—Kay), handler, H. F. Schellhass (a bye).

The meeting adjourned at 10:30 and all soon retired with anticipations of great sport on the morrow.

### TUESDAY.

A cloudy sky and an east wind greeted us as we peered anxiously out of the window at dawn. The threatened rain, however, did not fall, but in the afternoon a driving mist set in and soon drenched all who followed the hounds. The day's work was unsatisfactory. Much time was wasted in searching for suitable ground which held game. It was no trouble to find rabbits in the dense cover where the judges could not follow the hounds, and there was no difficulty in finding splendid hunting grounds where there was no game. In the afternoon, however, we were guided to a place which combined all the requisites for a successful beagle trial, and our spirits, which had fallen to a low ebb, began to rise rapidly. Five braces were run.

### Class A.—15 to 13in.

*First Series.*

BUCKSHOT—MOLLY L.—At 7:40 this brace was cast off in thick cover. It took but a moment to discover that the ground was entirely unsuited to our purpose. It was low and swampy and extended for some distance on both sides of a sluggish brook. Bull-briers grew in profusion, overran the underbrush and made a network which was almost impenetrable. Not even the thickets of Hyannis, where an attempt was made to run off the first trials of this club, were so difficult of passage. Nevertheless the judges and handlers pushed on as best they could, while the crowd stood on the upland and now and then caught a glimpse of the hounds. In the edge of the swamp Judge Lewis picked out a rabbit and the beagles were called up. Buck was the first to respond, Molly harked to him and away they went. They were quickly out of sight and soon at fault, the rabbit having wisely taken to a wet piece of ground. Both tongued here and there but did not start the game again, and finally by hard work on the part of the handlers were drawn to the upland. There on the edge of a bull-brier thicket which covered a quarter of an acre and was impassable for men or hounds, another bit of fur was started. The beagles were caught as they attempted to force their way into the briers in pursuit, and were taken to light cover some distance from the swamp. Game was plenty, and after a few minutes' work the beagles trailed prettily together to a start. Bunny knew where safety lay, and at once took to the briers and lowlands. The judges struggled along seeing what they could, and at 8:40 ordered the brace up. Both hounds were eager, industrious workers, and judging from the small fraction of work which was seen Buck was faster than Molly in driving and in taking up the losses.

BLANCHE—DIME.—The judges seeing that it was time wasted to work longer in the swamp, ordered this brace down at 8:50 in a weed field. Mr. Saxby gave the boys several new wrinkles in caring for a field trial beagle. Dime was carefully blanketed between her races, rubbed down after working and handled much as a greyhound or whippet would have been in a coursing match. Both beagles started off well, but Dime was the more eager of the two and covered her ground carefully and at a good pace. She is a merry little worker, and although an hour passed without finding a sign of game not once did she let down in her gait Blanche on the other hand made up her mind that there was no rabbit to be found and was perfectly willing that Dime should do the hunting. Finally the little "purple pup" caught a scent of game and began to trail. Blanche worked near by, but the rabbit was put up by a spectator before either beagle could start it. The hounds were laid on the smoking track, and for a few minutes we were rewarded with a burst of music. But it was of short duration. The chase was mostly in bull-briers and both beagles were somewhat torn by them. Each caught a few turns, then ran to a check and could not hit it off again, try as hard as they would, casting far and wide. They were ordered up at 10:10 and put down again at 10:30 in underbrush, and once more we took up the march in our search for game. Pasture, weedfields, cover, yielded nothing. But at last, near the edge of an apple orchard, which was in full bloom, Marshall Laick picked up a rabbit. Away went the beagles in full cry, skirting an open field, then into a little strip of impenetrable scrub oaks, from which they forced bunny again into the open, and finally lost near the starting point. The driving especially in the fields was difficult, the hounds catching the scent here and there and doing but little steady work Up at 11:45. Dime excelled Blanche in hunting qualities and in trailing displayed greater care and better nose. In speed there was little to choose between them.

NELL R.—ROYAL ROVER.—Cast off at 11:50. Neither moved with life. In thick oak scrubs Rover tongued, but failed to start, and at 12:25 they were ordered up for lunch, which was eaten, picnic fashion, in the woods. At 12:50 they were put down again where a spectator reported that he had seen a rabbit, but neither could make it out, though swung over the track repeatedly. The lack of game was disheartening, and the judges now decided to again try the swamp, where the first brace had been run. There was surely game there, and perhaps good fortune would send us a rabbit that would take to the upland. But fortune was unkind. To be sure, a rabbit was started at once and no less than four others were seen in the thicket, but the game persisted in keeping to the cover till the judges, perspiring and weary, broke their way out to the dry ground. The effort to see the work was useless, and at 2:20 the hounds were ordered up while in full cry. It was an hour or more before the handlers succeeded in catching the beagles, who were making the woods ring with their tuneful cry.

It was a very tired crowd that gathered about the judges and discussed the probabilities of our being able to finish the trials in Hempstead. But just then J. W. Appleton joined us and suggested that we try ground about a mile away, where rabbits had been seen. The advice was acted upon at once, and after a brisk walk of fifteen minutes we entered a country suited to our purpose and harboring plenty of game.

GAY—HELEN.—This pretty couple was cast off in a weed field at 2:45. Gay handled by H. L. Kreuder, and Helen by A. W. Post. Two tiny leverets too small to be hunted were found in the grass, and then among the bushes at the end of the field a large rabbit was started from its form by Mr. Appleton. The best chase of the day was on at once. The beagles ran well packed and were full of fire. Eagerly they pressed their quarry, drove it from the cover into the open fields and forced it to take refuge in a stack of rails close behind a barn. Bunny soon bolted from his hiding place and as he led off for the cover was seen by the hounds. A coursing match followed but the bounding ball of fur easily outstripped his pursuers and once more the hounds were in full cry in the cover. The falling mist rendered the scenting perfect. In vain the rabbit twisted and turned and played all his tricks to throw the little hounds from his track. They clung to him splendidly and at last drove him to earth, both digging madly at the burrow and making the prettiest picture of the day. In this race Helen's work was a trifle better than that of her rival. They were about equal in speed, but Gay was inclined to depend on her mate when casting and did not quite equal her in nose. Up at 3:40.

The underbrush was now saturated by the heavy mist and every one who followed the chase was wet through and through. But it was deemed best to continue the hunt so as to finish the first series if possible.

MILLARD—MARVEL.—This brace was put down at 4:15. The hounds were worked to a place where Judge Lewis had spied a rabbit. It was easy to see that Millard had lost none of the energy and ambition which distinguished him two years ago, but he showed a woeful lack of training and care. No sooner did he scent game than he was away like a flash, tonguing here, there and everywhere. His constant babble bothered his running mate and she failed to show her usual good form. Even when the judges ordered Millard held up she was unable to steady herself and drove poorly and unsteadily. Millard when tried alone failed to carry a hot track and seemed content to circle at great speed and in full cry, endeavoring in vain to hit it off. Up at 5:10.

This finished the work of the day. The discovery of excellent ground and plenty of game sent us all home in good humor and it was a jolly crew that gathered about the dinner table in the evening.

### WEDNESDAY.

The same dismal, leaden sky that hung over us yesterday greeted us again to-day. Before the barge left the hotel for

the hunting grounds a few drops of rain fell, but nevertheless we started, hoping for a change of wind and clearing weather. We were doomed to disappointment; by 9 o'clock the storm broke, the rain fell in torrents and put an end to field work for the day. The running of the first series in class A was completed.

NELL R.—ROYAL ROVER.—The race which this brace ran in the swamp yesterday was so unsatisfactory that the judges decided to put them down for the second time in a place where their relative merits could be determined. Handled as before, they were cast off at 8:10 on the grounds where Gay and Helen ran their splendid race. As luck would have it the same rabbit, or one that ran the same course, was jumped by a spectator. For some distance he ran in cover, then took to the open, following the fences to a vegetable garden within a dozen yards of a large barn. Taking a turn through the asparagus bed he finally squatted among the parsnips, and lay like a stone, while the hounds cast here and there, sometimes coming within a few feet of him. Finally Nell fairly ran over him. He immediately bounced into a pile of rails, the hounds trying in vain to break into his hiding-place. In this race Rover led most of the time, picking up the losses nicely and fairly outworking Nell, who acted as if she was tired, and well she might be after her long, hard run of yesterday. Up at 8:40. When the brace was ordered up the rabbit was snugly ensconced in the rails. The next couple was sent for, and meanwhile Mr. Chapman, with the skill born of long practice, caught bunny. Holding him up he pronounced him a fine, fat fellow, and then let him go. With a hop, skip and jump he raced over the fields to cover.

JOE, the bye beagle, handled by H. F. Schellhass, was put down at 8:50 with Mollie L as a running mate. They were drawn to the track of the captured rabbits, but the scent was too cold and neither could lift it. Working to another part of the grounds a rabbit was seen in its form by W. S. Clark. The beagles were brought up and a smart race in cover followed. Joe worked in the dashing style characteristic of him but seemed off in nose. Molly caught most of the turns but was too much inclined to depend on Joe in his wide casts and was too tonguey. The rabbit finally threw off his pursuers by running across a plowed field. Then Mr. Contoit provided another cottontail and the judges ordered Molly held up to give Joe a chance to show what he could do alone. For a short distance he carried the trail like a veteran, then lost and was unable to pick it up again though put on where the rabbit had been seen to pass. The rain was now coming down by the bucketful and 9:55 the hounds were ordered up and work discontinued for the day.

In due time all arrived at headquarters, most of us drenched to the skin, and the afternoon was passed in drying our hunting togs, capping one story with another, and discussing the merits of the hounds. A little diversion was caused by a visit from an agent of the Society for the Prevention of Cruelty to Animals. Some enterprising but overworked reporter for a Brooklyn daily had announced that the trials of the N. B. C. would be run on cats. The S. P. C. A. very properly looked into the matter, but their agents quickly discovered that the puss we were after was not of the feline tribe and that we were not hunting bagged rabbits. He declined an urgent invitation to run with the judges on Thursday's hunt and the momentary excitement occasioned by his visit passed away.

## THURSDAY.

For the first time since the beginning of the trials we saw the sun. The morning was clear, cool and still, and promised grand sport. The scent, however, especially early in the day, was bad. Nevertheless, a great day's work was accomplished; no less than fourteen races were run, and the trials brought to a successful conclusion. The beagles selected to run in the second series of the All-Age, 15in. class, were: Blanche and Gay, Dime and Helen, Buckshot and Royal Rover.

*Second Series.*

BLANCHE—GAY.—Put down on our familiar hunting ground of yesterday at 7:55. Working through cover, both began to trail, but before either had time to start the game Mr. Chapman put it up. Both beagles were on at once, and away we went at a good clip. The bright morning had brought many spectators to the scene, and all were anxious to see the running. In their eagerness they pressed the hounds close, and it was fortunate that neither beagle was timid or the race would have come to an abrupt end. Gay was the closer worker of the two, and in the driving caught her full share of the turns; Blanche cast wide and swiftly, and at times hit it in advance of her rival. On a straight-away drive she outfooted Gay, but taking all this work into consideration, there was nothing to choose between them. The first rabbit was run to a loss. Then a second one, a very little youngster, was put up, but he furnished no sport worth recording, and at 8:35 the hounds were taken up.

DIME—HELEN.—Helen's interests were intrusted to H. F. Schellhass in the absence of Mr. Post. One of the spectators spied a rabbit, but it was too lazy to give us a good run. Puss preferred to dodge here and there and tried the patience of both men and hounds by its doubling and turning, going but a few yards in any one direction. Helen was evidently out of sorts and did not run in the form displayed in the first series. She showed no independence and constantly followed Dime and gave tongue when she imagined her mate had the track. In the hope of finding a rabbit which would show better sport, the hounds were worked to another part of the grounds. A rabbit was jumped by a spectator and the handlers were directed to bring up their charges. Dime was not found for some time, and was then discovered trying to work the track of the leveret first started. When she was finally brought to the line the scent was gone and neither could make anything of the track. Drawn away to new grounds Dime harked back to the first rabbit and was trailing diligently when a third rabbit was put up by the crowd. Once more the scent was gone before the hounds were brought up. Then a fat, handsome specimen of the cotton-tail was discovered and he led the couple a merry race in which Dime did by far the better work. The scent was catchy and the driving uneven. Up at 9:30.

BUCKSHOT—ROYAL ROVER.—This brace was put down where the last couple were taken up and on the trail of the rabbit which they were driving. Working into a grass field both began to trail, Buck in advance. Bunny kept close in his form under a cedar tree till Buck was upon him. Then away he went at top speed with the eager hound only a yard behind. A hedge row was all that saved puss to run another day. He darted through the briers and took across a plowed field, where the beagles could not carry the line. But the spectators had seen the game cross a neighboring grass lot and the hounds were cast that way, only to disappoint the crowd, however, for the scent had disappeared. Just then another rabbit was put up and he ran into the field where the first had been jumped by Buckshot. The beagles were called up and this time Rover took his turn at the fun. He trailed slowly to the hedgerow and hustled bunny out of his form in short order. We were all again on tip-toe for a chase in the open, but again we were disappointed. Never did scent lay worse and the beagles could do nothing with it. Soon bunny was again found hiding in the grass and once more the hounds were put on the smoking trail. They did not take it, but inch by inch picked out another track and jumped their game in the edge of the underbrush. Here the driving was better, and away we all went pell-mell through the cover, Buck leading the way and catching most of the losses. Puss took to the open, and finally the hounds ran to a dead loss on plowed land. Up at 10:05.

After consultation the judges ordered down Buckshot and Dime, as it was evident that they were the two best beagles in the class.

*Third Series.*

BUCKSHOT—DIME.—Both started off well, working intelligently and with vim and life in every motion. Hunting through light underbrush to a new portion of the grounds a small rabbit was kicked out by the crowd. He followed the fence for some distance and then dodged into cover. The beagles caught the scent together and away they ran at a sprinter's gait, each jealous of the other and keeping a watchful eye upon its rival. The rabbit like all small ones did little but dodge, now one hound lifting the trail for a few yards and then the other. The race after the first burst was over was tame and it was not long before the beagles ran to a loss. At the send-off Dime seemed to have a little the best of Buck, but the latter soon rose to the occasion. He cast at full speed, picked up the losses quickly and showed great dash and vigor in his work. Nor was Dime lacking in hunting sense and intelligence. Buck, however, outfooted her a little and she fearing that he would get away without her depended too much upon him when at fault. Drawn to new ground Mr. Reed stumbled upon a rabbit and away we all went at top speed through the cover. Buck was now driving in his best form and proved himself too much for Dime though the little blue-ticked lady was a worthy competitor and at no time was out of the race. Up at 10:40.

The judges were now prepared to award the prizes in this class, but to comply with the running rules which provide that the first and second, and second and third prize winners shall run together it was necessary to run a formal heat between Dime and Gay.

DIME—GAY.—This brace was down at 10:50 and up at 11. No game was started and the race was merely *pro forma*.

The judges then announced the winners: First prize, $60, to Buckshot; second prize, $40, to Dime; third prize, $20, divided between Blanche and Gay; reserve, Helen.

The hearty cheers for owners and hounds which followed the announcement of the judges reminded us of the jolly meets at Nanuet when Tony Weller and Lee II. carried off the highest honors of the beagle world. After a few minutes spent in general congratulation the judges called Class B, which had been drawn to run as follows:

### Class B—All-Age Stake—13in. and Under.

Geo. Laick's black, white and tan dog Laick's Roy (Rover Minnie L.), handler, Geo. F. Reed, *with* N. A. Baldwin's black, white and tan dog Laddie (Royal Krueger—Midge), handler, owner.

Rockland Kennels' white and tan dog Rags (Little Wonder—Jessie), handler, H. L. Kreuder (a bye).

LAICK'S ROY—LADDIE.—This brace of little fellows was put down at 11:15 in brush. Roy is very timid and the crowd was held back as far as possible to give him a chance to gain confidence and show his paces. Both worked slowly at first, but Laddie soon got down to business and Roy profiting by his example followed suit. A rabbit was started by a spectator and the beagles were worked to the warm trail. Laddie hit it off, closely followed by Roy. They soon ran to a check, and here Laddie showed his experience and hunting sense, casting well and working the track slowly along. The trailing was difficult. The sun was warm, the ground dry as tinder, and the chase was necessarily slow and dull. Up at 11:50, Laddie easily the better.

RAGS.—The bye beagle, in charge of H. L. Kreuder, was put down at 11:52, with Laddie for company. The latter was busy on the trail which he had been running with Roy, but Rags was evidently of the opinion that "all work and no play makes Jack a dull boy," or beagle, as the case may be, and so he started in for a frolic. He skipped about here and there, barked at the judges, did not deign to notice Laddie, who was working industriously, and paid no attention to the orders of his handler. He was glad to get out of his crate and meant to enjoy life while he could. Laddie meantime straightened out the track and drove prettily and evenly to a burrow where he marked his game to earth, tonguing and digging with all his strength. Rags thought that was pretty good fun and did a little of it on his own account. Just then another rabbit was put up near by. Laddie was held up and Rags asked to run alone, but he would have none of it. Laddie was then put down and soon trailed the game to a start. Up at 12:20.

The second series was called immediately, and the two beagles defeated by Laddie were put down to run for second and third money.

*Second Series.*

LAICK'S ROY—RAGS.—This brace, handled as in the first series, was put down at 12:22. Roy set to work at once and trailed to a start. He drove the rabbit slowly through an open field, picking out the track nicely on the dry turf. Then it dawned on Rags that if he was to win anything at all he must go to work. So he joined Roy and did his best to make up for lost time. They drove a short distance in company and were ordered up at 12:30.

The judges then gave their verdict. First prize, $30, to Laddie; second prize, $20, to Laick's Roy; third prize, $10, to Rags.

Lunch was now ready, and the sandwiches and coffee, grapes and apples, rapidly disappeared before the onslaught of the hungry crowd. Then all lined up for a photograph, and after being "shot" four times the judges called for Class C. It had been drawn to run as follows:

### Class C.—The Derby.

Geo. F. Reed's black, white and tan bitch Nell R. (Ned—Haida), handler, owner, *with* Rockland Kennels' black, white and tan dog Clover (Roy K.—Fanchette), handler, H. L. Kreuder.

D. F. Summer's black, white and tan bitch Lucy S. (Frank—Jip), handler, owner (a bye).

NELL R.—CLOVER.—These youngsters, handled by G. F. Reed and H. L. Kreuder respectively, were laid on at 11:40. Clover found a little foot, but before he came up with the game Judge Lewis jumped it from its form. The hounds were called up, and Nell at once led off at a slashing pace and ran in far better form that she displayed in the All-Age class. Clover refused to hark to her, and the little Vermont beagle had it all her own way. Up at 1:55.

LUCY S.—The bye was now put down with Clover on the track where Nell had been driving. But as usually happens in such cases, neither hound could hit it off. Drawn away to another part of the grounds where a rabbit had been seen. Lucy began to trail, tonguing in a squeaky voice inaudible 50yds. away. She soon ran to a check and we were about to give it up as a dead loss, when one of the judges saw the rabbit squatting in some low bushes. Lucy was held up and Clover put down close by the game. When the cotton-tail jumped she caught a glimpse of it and ran by sight till it was lost to view in the underbrush. Then she cast wildly here and there, using her eyes instead of her nose. But after a little she quieted down and began to work out the trail slowly. Clover was then set loose and soon took the rabbit away from her inexperienced competitor. Up at 2:10.

*Second Series.*

LUCY S.—NELL R.—When these good ones were cast off at 2:12 it was evident that we were in for one of the best races of the trials and we were not mistaken. Lucy was the first to strike the trail, and in a moment Nell was with her and the fun began. The rabbit was no coward. He refused absolutely to be driven to earth, and for a half hour he ran in cover and open, now squatting in the plowed field which had so often given harbor to our game, then hiding in the underbrush. He was hard pressed by the beagles many a time, but in vain they tried to drive him in. Back and forth through the cover, over the open fields and plowed land went the chase. Now and then a welcome check gave a moment for the judges and handlers to catch their breath, and then on we went again. It was one of the events of the meet, and a more interesting race is rarely seen. Each contestant did grand work, showing hunting sense, speed and endurance. Nell, however, had a trifle the best of the run, her greater experience making her more independent in her work. Much of the chase was give and take between them, but Nell's wide casts served her in good stead at the bad losses. Up at 2:50.

The judges gave first prize, $20, to Nell R.; second prize, $10, to Lucy S.; reserve to Clover.

The running in the open classes having been finished, the entries for the championship classes were called. They filled and ran in the order reported below:

### Champion Class—15 to 13in.

Rockland Kennels' black, white and tan dog Frank Forest (Riot—Skip), handler, H. L. Kreuder (a bye).

FRANK FOREST.—This veteran was the only entry and he was cast off at 3:10 to run alone. He was in fine condition and the weight of years rests lightly upon him. He hunted with intelligence and covered his ground with the same care he displayed in the days when he was the bright star of Mr. Parry's kennel. After he had been down some time one of the judges started a rabbit but the scent was cold when Frank was brought up and he could not make it out. Not long after another cottontail was discovered. Frank hit it off at once and was driving when ordered up at 3:40. The judges awarded him first prize and immediately called for the entries in the next class.

### Champion Class—13in. and Under.

N. A. Baldwin's white, black and tan dog Laddie (Royal Krueger—Midge), handler, owner, *with* Rockland Kennels' black, white and tan bitch Zillah (Racer, Jr.—Nellie), handler, H. L. Kreuder.

Geo. F. Reed's black, white and tan bitch Spot R. (Kenneally's Lee—Skip), handler, owner (a bye).

LADDIE—ZILLAH.—These merry little workers were laid on at 4:05 in the same ground which we had been hunting all day. As it was growing late and we were anxious to finish the trials before dark all hands set out to find game. Soon a war whoop from Mr. Reed told us that Spot had jumped a rabbit. She was held up despite her objections and the competing brace cast to the line, but neither could carry it, and Spot himself was unable to make it out when put down the second time. Just here it was noticed that Zillah was going on three legs, and an examination disclosed the fact that one of her feet was badly cut. However, she kept on hunting and soon caught sight of a cottontail, which Mr. Clark assisted from its form. Laddie harked to her and they ran to a check, which soon developed into a loss. Not long after, a spectator supplied another "toy rabbit," and a neat little run in the open followed. Zillah was handicapped by her injured foot and Laddie did the greater part of the work. The latter now struck a winning gait, and it was clear that it would be no easy task to down him. He is a very industrious little fellow, works out his ground carefully and when he casts does so at top speed.

SPOT R.—This handsome little lady, the winner of first in the open class last year, was put down with Laddie at 4:42 on the track of the rabbit which he had been running in the last race. Neither, however, could make it out. Soon Laddie began to trail. Spot harked to him and together they put up a rabbit in the open. They were as jealous a brace as was seen during the trials. Neither meant to give away anything to the other. Each strove to gain the lead and a long and pretty race, mostly in the open fields, followed. The rabbit did not go to earth, but he would run for a half-mile or more and squat, then he would make another long run and again wait for the hounds. These tactics frequently gave the hounds a cold track for a long distance, and here Laddie displayed a better nose than Spot. Most of the trailing was done by him, and he frequently caught the losses well in advance of his rival. Not that Spot failed to work. Never did a beagle try harder. She fairly buried her nose in the earth in her endeavors to lift the trail, but it availed her nothing; she was not in the winning form of last year, and Laddie held his own with little difficulty. At 5:30, when it was so dark that one hound could be distinguished from the other only with difficulty, the brace was ordered up.

It was a tired party that crowded into the barge for the ride back to headquarters in the moonlight. After supper the judges announced the winners in the 13in. champion class. First prize, $18 and title of field trial champion, to Laddie; second prize, $9, to Spot R.; reserve to Zillah. The judges suggested that the special prize of $30 offered by the club for the best beagle sired by or out of a field trial winner should be divided by Laddie and Blanche, as it was manifestly unfair to run the little beagle against the large one. The field trial committee approved the suggestion and it will come before the club for action at the next regular meeting.

Then with cheers for Laddie and his owner, and amid universal congratulations and good feeling, the meet of 1894 came to an end.

BRADLEY.

## What They Said.

(*With apologies to everybody.*)

*Staley Doub*—I tell you, pard, there's no place like old Nanuet. Say, just come up-stairs and help me open my trunk, will you?

*Geo. F. Reed*—Funny a man can't blow his horn when he wants to. Been introduced to Old Maryland yet?

*Louis Contoit*—Bet I'll never go to another field trial in a stiff hat.

*Jos. Lewis*—I tel l you, boys, Robino's the best headed little beagle in America; he is for sure.

*N. A. Baldwin*—Who said Laddie wasn't bred right to hunt?

*F. W. Chapman*—Come down to Maine; we'll hunt bay lynx with Umsly?

*John Bateman*—I've got a beagle at home that can beat anything there is here. No, don't give me that chestnut.

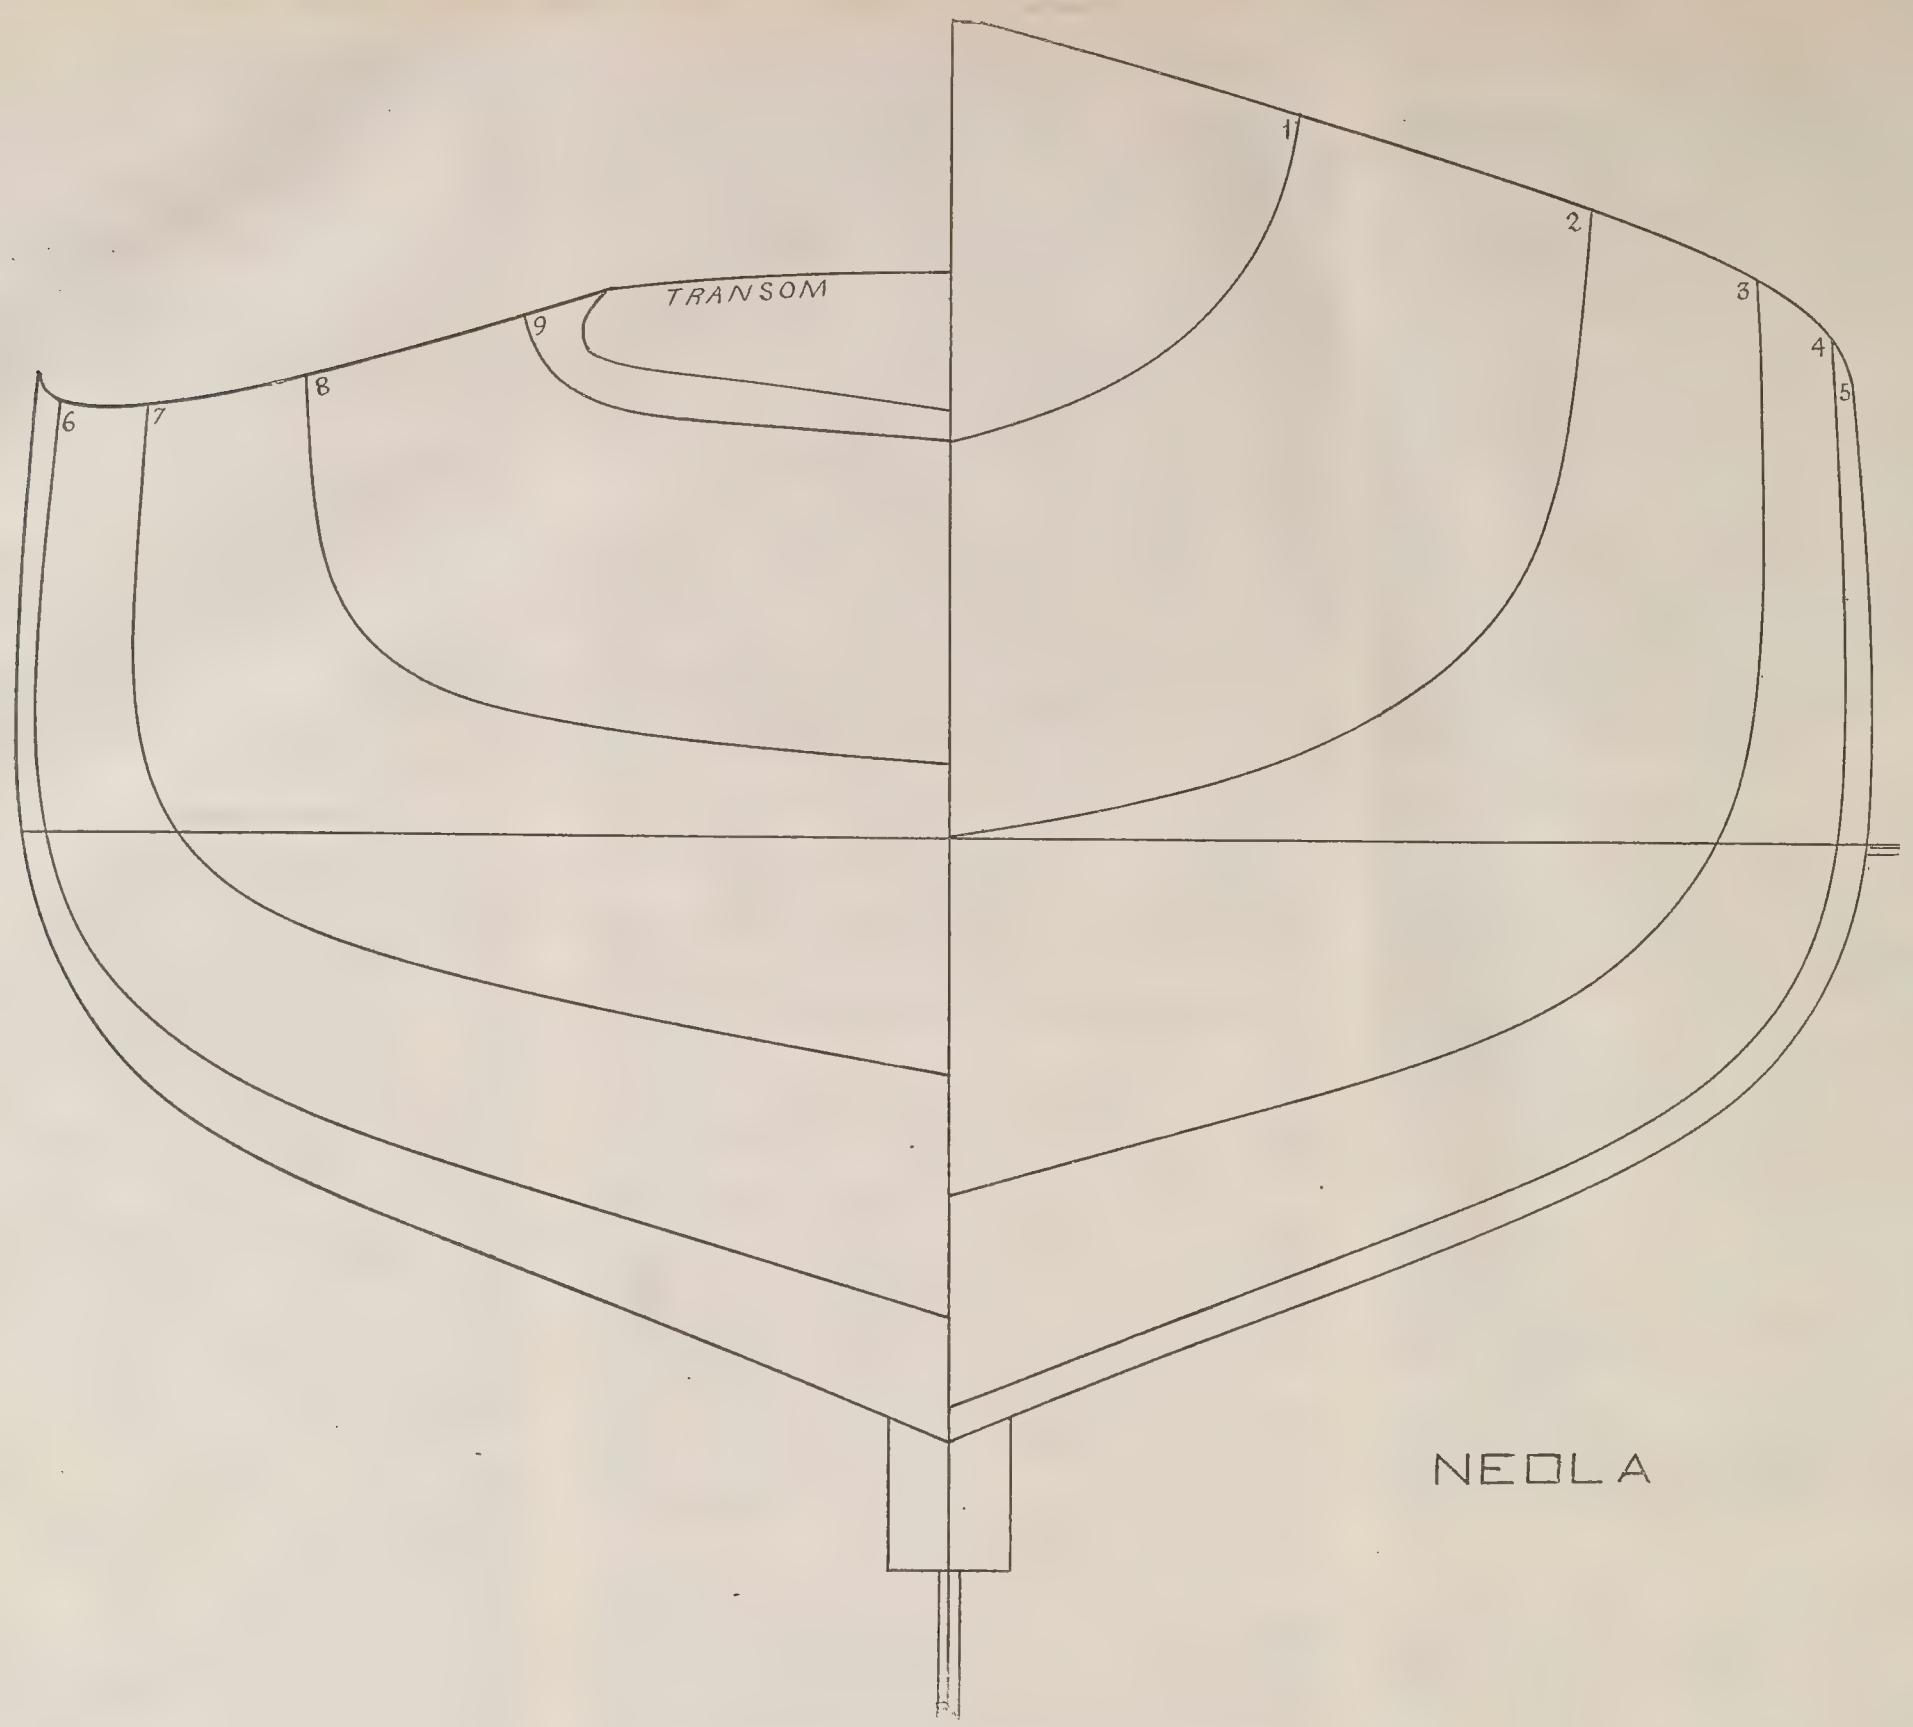
*Geo. Laick*—You needn't be afraid of Roy. He won't bite.

*H. L. Kreuder*—Yes, I've bought Buckshot.

*D. Summers*—I'll cross swords with Canada Gray another year and don't you forget it.

*C. W. Quynn*—I wouldn't judge again for $1,000. Bet I'll sleep when I get home.

*R. S. Cramer*—No, I haven't seen any purple pups in Maryland yet.



*Wm. Saxby*—I've learned a thing or two. You just wait till next year, I'll bring more blankets.

*The Dogs*—Why don't they shoot something? What's it all about anyway?

• • • •

## The N. E. K. C. Whippet Races.

WHIPPET racing for the *elite* did not make its debut under the most auspicious circumstances at the Terrier Club show, for the little dogs could scarcely be expected to do their best on a soggy turf and during drenching rain. Still, every one seemed eager to see the little ones run, and braved the elements until the first series was run through on Tuesday afternoon and then broke for cover. For the information of the uninitiated, we may say that these whippets are small greyhounds, or rather large Italian greyhounds with a dash of terrier in them to give them courage and tenacity. They are smart little chaps, some smooth, some broken-haired, with all the make and shape of a miniature greyhound.

NEOLA——BODY PLAN (ONE-HALF SIZE).

The method of racing is simple. The course, 200yds. straigtaway, was laid diagonally across the polo field, a lane 20yds. wide, defined at intervals by sticks in the ground. At the starting end were marks denoting the number of yards from the scratch. All whippets are handicapped on a complicated system based on the weight of the dog. The main point is that a bitch of the same weight gives the dog 2yds. start, and scaling on the weights, 2yds. to the pound is the regular rule.

The race is in heats, and getting ready for heats, each dog is grasped and held on its appropriate mark by a handler. There is another man for each dog who runs down the course waving a big white cloth, after first allowing the dog to smell of it. When the ragman, or "runners up," have reached the finish, they wave their rag more frantically than before and yell encouragingly at the dogs, who are yelping and straining to get away from the handlers at the starting line. The pistol is fired finally after a cautionary word, and away they go. The rules permit the handler to throw the dog at the pistol shot, and no little skill is exercised in sending the dogs away right. A good man can throw a dog several feet, the dog landing right in his stride, and being off under almost full headway at once.

A number of ladies stood on the rain-soaked turf to see the fun and were not the last to leave, braving pneumonia with the rest of us. The course being so wet no times were taken. The following are the results of the first round:

Sweepstakes, $2 each, and $150 added by the club:

First heat—Gyp (8½yds.), E. Holding, Fall River, first; Buck (3¾yds.), S. Ford, Fall River, second; Daddy White (½yd.), and Can't Tell (20½yds.), unplaced.

Second heat—Bess (20½yds.), G. Thompson, Kearney, N. J., first; Fannie (6½yds.), T. Ratcliffe, Fall River, second; Paddy (19yds.) and Spark (2¼yds ) unplaced.

Third heat—Young Dick (17yds.), J. Douglas, Kearney, N. J., first; Spring (2°y'ls.), T. Redford, Fall River, second; Rose (¼yd ) and Dandy (19yds.) unplaced.

Fourth heat—Daisy (4½yds.), T. Hurst, Ashland, Pa., first; Plunger (18yds.)A. Hoey, Natick, second; Dash (17yds.) and Peggy (18½yds.) unplaced.

An attempt was made to continue the racing on Wednesday but the rain simply drowned us out and the second round was postponed until Thursday when the weather being so fine a great crowd of ladies and members of the Country Club interrupted their admiration for the horses and transferred it to the whippets. Pretty nearly every one vowed he'd own a whippet before the week was out, while some of the dogly inclined members of the N. E. K. C. made anxious inquiries as to where the record breakers could be purchased. The only men who did not stop to see the running were the golfers and nothing short of the Rockies would stop them. Summary of second round is as follows:

First heat, first, J. Holding's Gip (8½yds.); second, G. Thompson's Bess (20½yds.); Fanny (6½yds.) and Buck (3¾ yds.) unplaced. Second heat, first, T. Redford's Spring (22yds.); second, J. Douglas' Young Dick (17yds.); Plunger (18yds.) and Daisy (4½yds.) unplaced. Final, won by Spring, Gip second, Bess third and Young Dick fourth.

Then the club in its enthusiasm announced another sweepstake of $2 each, to which they added $100, and drew fourteen entries.

*First Round.*

First heat—First, G. Thompson's Bess (14yds.); second, J. Holding's Gyp (¾yd.); Buck (sch.) and Dandy (17½yds.) unplaced.

Second heat—First, A. Lord's Paddy (17½yds.); second, J. Douglas's Young Dick (12½yds.); Fanny (2yds.) and Spring (12yds.) unplaced.

Third heat—First, J. Campbell's Dash (17yds.); second, A. Hoey's Plunger (14yds.); Rose (1yd.) ran unplaced.

Fourth heat—First, T. Hurst's Daisy (2½yds.); second, A. Hoey's Dandy White (½yd.); Spark ran unplaced.

*Second Round.*

First heat—First, Daisy; second, Dandy White; Plunger and Dash ran unplaced.

Second heat—First, Paddy; second, Gip; Bess and Young Dick ran unplaced.

Final won by Dandy White; second, Gip; third, Daisy; fourth, Paddy.

The dogs were handicapped by Mr. W. Finn, of Natick, Mass., and Mr. James Mortimer was judge-referee, and placed the winners accurately—no easy matter at times to one not accustomed to see these doggy streaks finish in a bunch. Each dog had a colored rag round its neck, and that helped to distinguish them.

That whippet racing will take firm hold is very probable, and in future we would suggest that the course be lined at each side with whitewashed planks—say a foot high, which would serve to mark the course for the dogs and keep people back. Several dogs were led astray and lost their chances when leading. The names of owners and dogs, with their handicaps, should be posted in some conspicuous place, for of course when the entries are made so late in the day it is impossible to get out a race card, which would aid the public in getting a knowledge of the dogs.

• • • •

### National Fox Hunters' Association.

SINCE the publication of the rules of the National Fox Hunters' Association the committee has decided to reduce the entrance fee from $5 to $2.50 for each dog, and to limit the number of entries from any one kennel or pack to four.

HARRY L. MEANS, Sec.

LOUISVILLE, Ky.

## HUNTING AND COURSING NOTES.

Mr. Alex. S. Thweatt writes us that there is a movement on foot to have a great fox hunting meet in Asheville, N. C., about Dec. 1, and he would like to have the various fox-hunting clubs of New York, Massachusetts, New Jersey, Connecticut and Pennsylvania communicate with him in regard to it. His address is 271 Broadway, New York.

• • • •

Mr. F. J. Hagans of Louisville, Ky., a good friend of FOREST AND STREAM, and an enthusiastic fox hunter, has had some of the best known fox hunters at his hunting lodge this fall. Messrs. Sam and James M. Herr, with the best of the Goodman & Pooler dogs, will be his guests this week. He has been solicited to act as chairman of the field trial committee or as judge at the coursing meet of the N. F. H. A., a position about as satisfactory to fill as umpire at an amateur base ball game. But some one must do it and no better choice could be made.

## Yachting.

THE New York Y. C. has this week received a communication from Lord Dunraven, the nature of which will not be disclosed until it is made public at a special meeting of the club, which has been called for Nov. 8.

### Model Yacht Building.

THE subject of model yachting, designing, building and sailing has never yet attracted the attention which it deserves from American yachtsmen, the sport being far less advanced than in England. That it is by no means child's play, but well worthy of the same careful study as is bestowed on large yachts, is being better understood each year, and the prospects of model yachting have greatly improved of late. The history of model yachting in America, which is largely the history of the American Model Y. C. of Brooklyn, N. Y., was told in the FOREST AND STREAM of March 10, 1894. Besides the work of the senior club, others are growing up about Philadelphia, in Minneapolis and other places, and the interest is increasing every year.

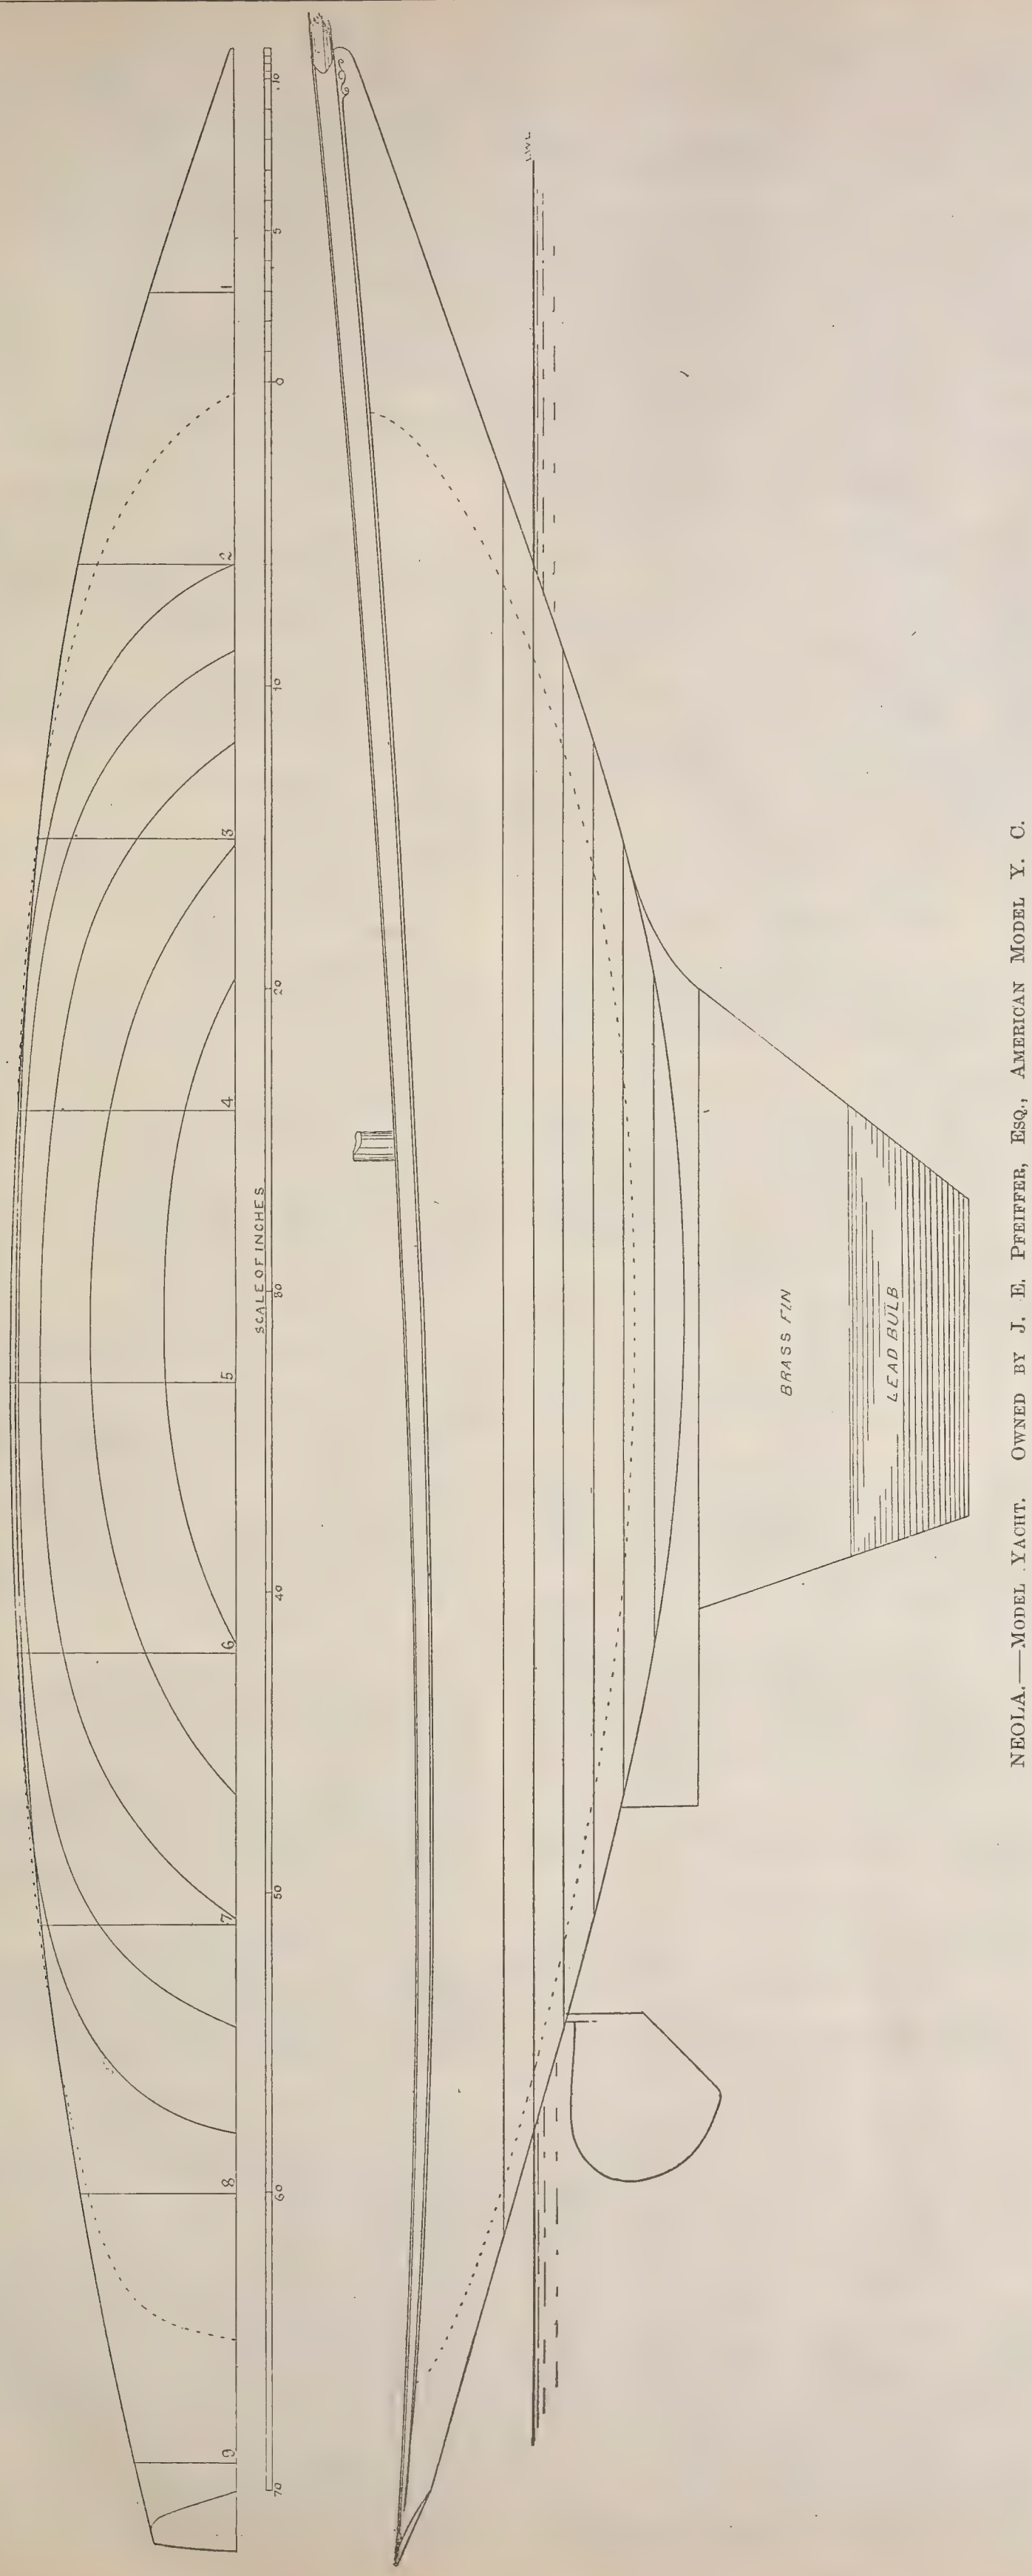
To the great number of men or boys who are fond of boats and sailing, but debarred by limited time or means or the distance from navigable water from indulging their tastes, model yachting offers special attractions, as, at a very limited cost, a man is enabled to test his skill as designer, builder and sailor, and to experiment on any theories that he may believe in. The outlay for the necessary tools and materials is small, and the work may be done at home in the evenings, and under circumstances which would make any other kind of boat or yacht building impossible.

In answer to many inquiries from our readers since the previous article on model yachting appeared, we propose to give in this and the following issues plain and simple directions for building a model yacht. The yacht selected as an example, through the kindness of her owner, Mr. J. E. Pfeiffer, of the American Model Y. C., is the Neola, one of the racing craft of the club whose name has frequently appeared in our reports of the races. The directions for building are by Mr. Herbert Fisher, secretary of the club, and the drawings by Mr. Frank Nichols. The dimensions of Neola are:

| | |
|---|---|
| Length over all | 83½in. |
| l.w.l. | 52in |
| Beam | 15in. |
| Draft | 14½in. |

The body plan is reproduced exactly one-half of the true size, so that it may readily be enlarged. To do this a series of lines parallel with the waterline and any convenient distance apart, as ½in., are drawn on the body plan as printed. A piece of stout brown paper about 18in. wide and 24in. long is then prepared by drawing in the waterline at the proper position, some 16in. from the lower end, and then reproducing the series of parallel lines, aut of double the distance apart of the original, or 1in. The breadth of each section on each waterline are then taken with a pair of dividers or by marking with a pencil on a strip of paper and set off twice on their respective waterlines in the enlarged body plan. The sheer and half-breadth plans should also be laid off full size on brown paper. If desired, the model may be reduced to half size by using the body plan exactly as printed; or an enlargement may be made to three-quarter size by ruling the parallel lines but ¾in. apart and laying off each breadth one and one-half times instead of twice.

There are three methods by which to build model yachts; termed in model yachting parlance, the block, bread-and-butter and the built-up plans.



In working by either of these methods, the first thing to do is to get out the design on paper, so as to have something definite to work to before commencing to cut the wood. The design should show the deck line and water lines—the half breadth plan—the profile, and, for the block or bread-and-butter plans, as many of the vertical cross sections, not less than six to the length of the waterline, as may be deemed to be desirable or necessary for accurate work in cutting down to the form required.

It often happens that a person intending to build, may have in his mind just what he wants in the way of form or shape, and weight of a model, but is not able to properly put the lines down on paper; in that case, he must get some one who has had some experience in designing and building model yachts, to draft a plan for him, after his description; which may be done for a small cost. By expending a little money at first, thus one may save considerable time and trouble in doing the work, and when it is finished, if the builder has followed out his plan accurately, he can depend upon having a properly formed boat.

The design being completed, next thing is to make from the body plan a set of templates or forms, one for each of the cross sections shown in the drawing. These can be made of any thin wood that is easy to cut with a pen knife, say $^1/_{16}$ to $^1/_8$ of an inch in thickness, and hollowed out on one edge to conform exactly to the cross section line. Tack to the upper end a short straight piece of the same wood, to square the mould by when applying to the block.

THE BLOCK METHOD.

In what is termed the block method, which some years ago was about the only one in use, and is still used to some extent for small models of not over 20 or 25in. length, there is required a piece of soft white pine, clear of knots and straight-grained, of length, width and

NEOLA.—MODEL YACHT. OWNED BY J. E. PFEIFFER, ESQ., AMERICAN MODEL Y. C.

thickness sufficient to get out the model without having to piece out anywhere.

First mark out with a lead pencil the deck line on the block, using the drawing for a pattern, draw a line straight through the center from end to end, carry this line down each end and straight along the bottom of the block. Now cut away the sides to the deck line—a good way if the block is a large one is to take it to some mill where there is a band saw and have it sawed out. Now mark on the side the profile or keel line, and sheer line of the deck, and cut away to it, being careful to cut only a little at a time and follow up the cutting by marking the center line under the bottom of the boat so that when you have finished that part of it you have a line running down the stem and straight along what will be the center of the keel up the center of the stern post and along under the center of the overhang. When you have cut away the sheer of the deck line mark the center line over again, and divide this line off by lines running across the block at the points where the templates are to be used, and make corresponding lines across the bottom of the keel.

Having gone this far you are ready to commence to shape your boat, and this part of the work will require a great deal of care and patience. Don't try to hurry, but cut into the block carefully, trying your templates often to see that you are not cutting away too much, always being sure that the straight piece on the top of your template lies on the line on the deck at right angles to the center line, and the bottom end is on the corresponding line on the keel. When you have finished one side, turn the block and work the same on the other side, and if you have used proper care in adjusting the templates, both sides will be alike, and your boat true. Now sandpaper it down to remove the unevenness caused by your tools, using coarse (No. 2) paper first, and finish with fine (No. 1½) paper.

The boat is now ready to be hollowed out. To do this conveniently a cradle should be made for it to lie in, so that it will be held firmly while using the gouge or chisel. This can be made by taking two short pieces of board and cutting them out so that they will fit under the boat, one at either end, and connecting the two by strips nailed from one to the other.

Draw a line from ⅜ to ¾in. from the outside all around the boat on the top or deck, cut straight down from this line for about ¾in., and as you go further down in the boat, work out toward the outside until as thin as desirable until near the bottom, where it should be left thicker. The thickness of the sides depends somewhat upon the size of the model, from ¼in. on a small model to ⅓in. on one of 35 to 40in. in length.

Next get out the deck beams, cutting all before setting any in, so as to have them of the same curve or rise of deck. They should be about ¼in. in thickness by ½in. deep, and curve to rise about ½in at midship. Use the first one made as a pattern for the rest. Cut them to length for the position they are to go in, and mortise them into the sides so that the upper side is flush with the upper edge of the boat, and the ends ¼in. inside of outer line. Now fasten two straight pieces or beams in between the deck beams at the place where the hatch opening is to be, to form the sides of the hatch, being careful to leave the opening large enough to insert the hand, as you will need to hold a small weight under some of the beams while nailing on the deck.

For the deck use either pine or light mahogany ⅛in. thick and cut ⅛in. larger than the boat, and when nailed on, round off the edge with sandpaper. This forms a sort of bead, and will act as a fender.

When the deck is on, cut out the rail, preferably of oak, from ⅛ to ¼in. in thickness, according to size of boat, and about twice as high at the bow as at the stern—a gradual taper down. Cut out two or three places from the under side of the rails close together at the lowest part of the deck, for scuppers, about 1in. long and half the height of the rail. Bevel the rail where needed to conform to section of the boat, and nail on with wire nails. It is well to drill holes in the rail for the nails, to insure their going straight and to avoid splitting.

### THE BREAD-AND-BUTTER PLAN.

The bread-and-butter plan is an improvement over the block method for models of larger size and is used to advantage in smaller ones as well. In this plan the water lines are laid down a distance apart equal to the thickness of the material to be used. It is desirable to have all the pieces out of the same wood to avoid breaking of the joints by expansion and contraction of different woods, so the larger the boat the thicker must be the plank from which it is made in order to be able to get all that is wanted from one plank. Large models sometimes require a plank 2in. thick and 16ft. long, and even then it is necessary to make some of the smaller sections from the pieces taken out from the center of the upper ones.

To begin this plan, cut your drawing out at the deck line and use as a pattern to mark out on the wood. As the drawing is usually made for only one-half of the boat, after marking one side draw a straight line on the board from end to end of the line you have made for one side, then turn the pattern over and mark the other side, a straight line should be drawn across the plan at midship and this line marked on each section when marked off, as well as the line running fore and aft to guide in putting the sections together; these two lines we will call the guide lines.

Now cut your drawing down to the next section or waterline and lay it on the part you have already marked out, being careful to bring the guide lines over each other, and make a light or dotted line to the pattern, and removing it draw a heavy line from 1in. to 1½in. inside of the dotted line, increasing the distance from the dotted line at the ends to 2½ or 3in. This line marks the piece to be sawed out from the inside of the upper section, leaving sufficient overlap to glue to the next one below.

Now move the pattern along the plank and mark out the next section, after which cut the drawing down to the third section line to get the inside line for section as before; repeat this process until you have all the sections marked out. The bottom sections, two or perhaps three of them, if the model is for a keel boat, will be solid, not sawed out in the center.

You can now take your plank to the mill and have your sections sawed out to the lines you have made, and they are ready to be glued together. In gluing care must be taken to bring the guide lines together exactly over each other; you will facilitate this by squaring the lines down the edges of the sections after they are sawed out. When it is all glued together the whole will have something the form of the boat made of a series of steps both inside and outside, and you will find the labor of shaping it is very much less than it would be from the block, and you have a better and stronger boat; as it is less liable to check or split open. The writer has now four models that were made in this manner five or six years ago, and there is not a check or split in them, and it is impossible to tell at this time where the joints in them are. The instructions for shaping and hollowing out given for the block method should be followed in this plan, but in addition you have the waterlines on which the sections are sawed to guide you in your work as you work off the corners until you fair the boat down to the sawed lines.

Care should be taken where the section is convex in form not to take off too much between the lines before trying the templates, or you will be apt to destroy the symmetry of the boat.

The instructions for deck beams and deck also apply to this plan.

We now come to the built up plan, which is the one at present most in favor with the advanced model yachtsman.

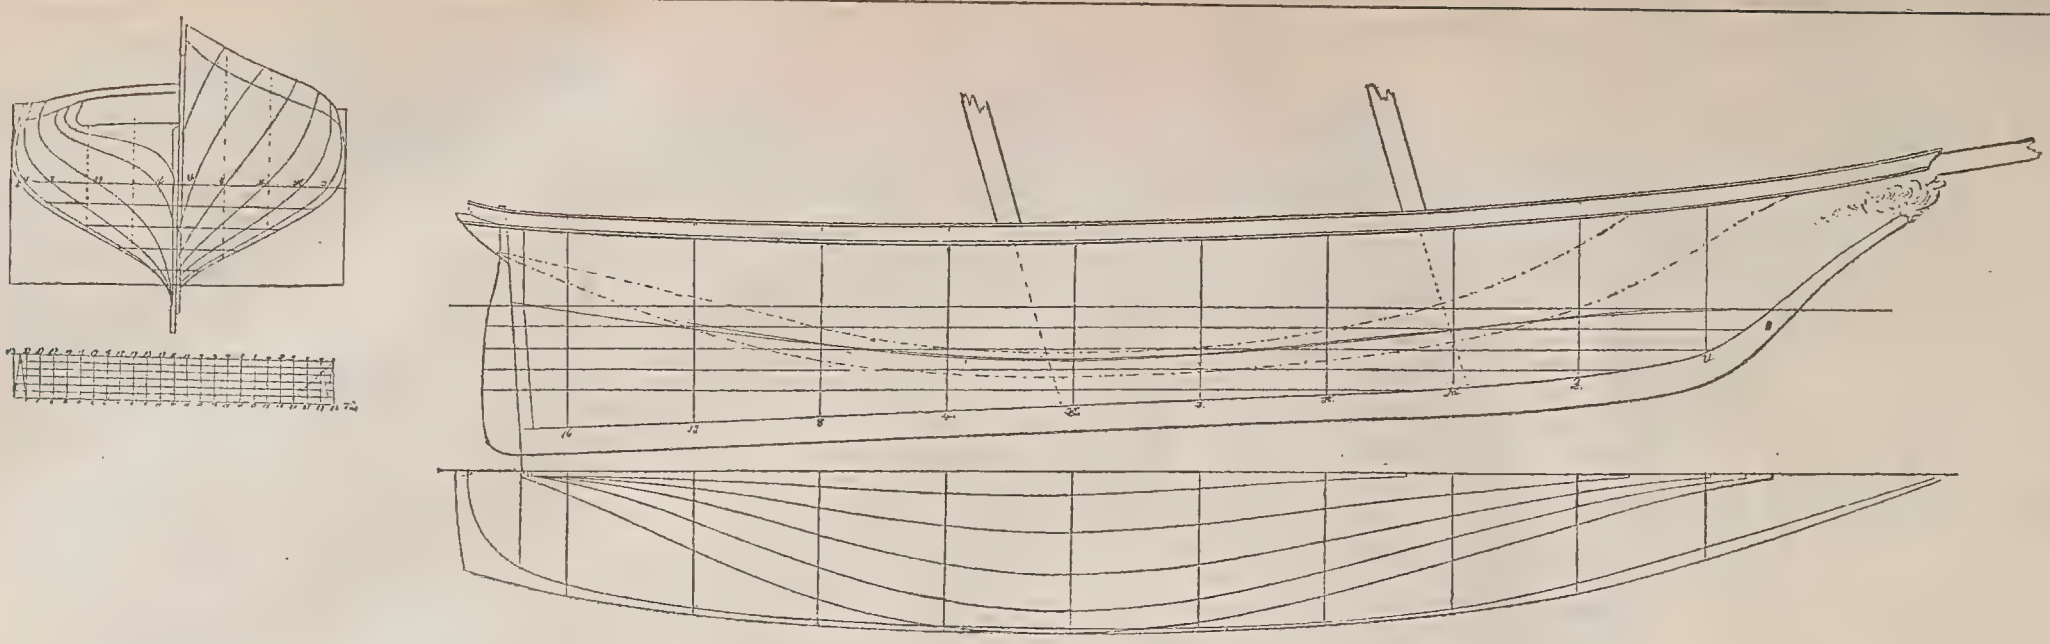
As the instructions for a built model are somewhat lengthy and will require considerable space, we will leave it for another number.

[TO BE CONTINUED NEXT WEEK.]

## Steel Shipbuilding in Washington.

EVERETT, Wash., Oct. 24.—The first whaleback steamer built on the Pacific coast was launched to-day at the yards of the American Steel Barge Company, in this city, in the presence of 15,000 people.

This new rival for the Pacific carrying traffic, christened the City of Everett, is 361ft. long, 42ft. beam, 26ft. deep, with a carrying capacity of 4,800 tons, and will cost completed $300,000.



The launching and celebration in the city were successes, augmented by warm, bright weather. Among the guests were Governor McGraw and staff, officials of the Great Northern, Northern Pacific and Everett & Monte Cristo Railway companies, and mayors and councilmen from neighboring cities.

The parade in celebration of the event was a grand pageant of the industrial resources of this the youngest city in the State, and represented manufacturing enterprises employing an aggregate of $5,000,000 capital. It also marks an epoch in city building, when it is realized that four years ago a dense forest existed where now stands a vigorous city having imposing buildings, fifteen miles of paved streets, eighteen miles of water mains, eight miles of electric street railway, a port of customs entry, shipping facilities over five railroads and lines of ocean steamships, and the most extensive manufacturing industries in the Pacific Northwest. CAYUGA.

## Crusader and Toxteth.

A FINE race was sailed on Oct. 13 between the keel schooner Toxteth and the centerboard schooner Crusader, both of Chicago. A gale was blowing on Lake Michigan and both yachts were reefed down when they started at 3:15 P.M., the course being from the Van Buren street gap around the Waterworks Crib and the Four-Mile Crib and back; a dead beat, a run and a beat in. Toxteth crossed in the lead and held her own over two legs of the course. The sea was very bad and Crusader finally gave up, as she was far astern and making water. The times were:

| | Start. | 1st crib. | 2d crib. | Finish. |
|---|---|---|---|---|
| Toxteth | 3 16 40 | 3 51 00 | 4 14 30 | 5 03 40 |
| Crusader | 3 15 00 | 3 52 00 | 4 15 30 | Withdrew. |

SCHOONER YACHT SVERIGE.

## The Schooner Yacht Sverige.

But little is known in this country about the Swedish yacht which in 1852 sailed a match with America, then owned by Lord De Blaquierre, of 20 miles to leeward and return from the Nab, and, though defeated, in part or wholly through the breaking of her gaff jaws, came nearer to the famous American yacht than any of her English competitors. We are indebted to Mr. John Emberg for the following translation of an account of this yacht, the Sverige, published in connection with the drawing, which we reproduce, in the Swedish yachting journal, *Tidning For Idrott.*

Among the models of ships in the Swedish department of the World's Columbian Exposition is one that should be noted with special attention. The long, raking and thin keel that indicates only inside ballast, the very short overhangs and the low freeboard, with its plain, rounded sides, show that the model does not represent a modern boat, while, on the other hand, the extraordinarily fine lines testify to a sailing capacity unusual for its time, and which will compel the admiration of the yacht expert for the well executed model. An American expert in looking at the model may perhaps carry away the idea that it represents the world-renowned schooner America, that first won the America's Cup, an error that is quite excusable on account of the strange similarity between this model and that of America. The model represents, however, a vessel designed and built in Sweden, and which, perhaps, under such favorable circumstances as attended America, might also have made a world-wide reputation.

The notice which she at first attracted was by no means equal to the fame of America; and as the latter finally took the prize after the Swedish yacht had for a time outsailed her, it is not to be wondered at that the history of Sverige is very little known, either in America or Sweden.

It may be stated as a fact that the model now on exhibition at Chicago, has long had a permanent resting place on Langholm's Wharf (Sweden), in company with one on the same scale of America; and on the back of the former is to be seen the inscription: "Racing schooner Sverige, built at Essingen's Wharf in 1852, by Carl Fredrik Andersson." It can most truly be said of Sverige that she was built at Essingen's Wharf and by Carl Fredrik Andersson; but whether the builder also designed her, it is hard now to tell. I have been told that the schooner was intended to be built by a Capt. Andersson for a company; and that, after her completion, he was her sailing master in the race with America. Some doubt has been thrown on the correctness of the date on the model, as the race took place early in the summer of 1852, outside the Isle of Wight; and the time betwen her completion and this date would have been short for her to have reached England; but if, in accordance with a common custom, the year of building is that of the final completion and launching; it is not impossible that the launching and sailing to England could have been done before the date of the race. [The race was sailed on Oct. 12, 1852, not early in the summer, as stated.—Editor Forest and Stream.]

Of Sverige's racing in England little is known, save that she raced with America at the time of the latter's highest fame, and after outsailing her for a long distance, lost the race by the breaking of the jaws of her gaff. Her creditable performance with America, and the resemblance in topsides and rig, gave rise to the opinion in England that she was a copy of America; but there are many circumstances to show that this was not the case. In the first place, the designer of America was George Steers, and if he did not adopt the same secretive tactics which mark the designer of to-day, he at least did not give out his models and drawings to the public; and further, it is very doubtful whether a design was made prior to the building of the yacht, Mr. Steers, like all the other American designers of his day, being accustomed to cutting the model in wood and laying off the vessel from the model.

Further, it is not probable that the two models, of Sverige and America, on the wharf of Langholm, would have been made exactly on the same scale as compared with each other if Sverige was only a copy of America; the models being so old that they no doubt date from a period when certain knowledge existed of Sverige's true origin, the wharf of Langholm being from the first, so it is said, but an outgrowth of the business of Essingen.

Finally, there is a great difference between the underwater body of Sverige and America. The latter vessel has, in all of the section of the forebody, very straight lines below the waterline; while the sections of Sverige in the same part of the vessel have a very remarkable curvature. The dimensions and proportions of the two are not the same. With America looked up to as an absolute masterpiece in every detail, it is most probable that if the builder of Sverige had had a drawing of the former to work from, he would have done the work as carefully as possible; and not have made the changes in the sections, and in the forefoot, deeper and not so shapely; and in the placing of the spars and other minor details. The general appearance of the two ships is so similar that we may fairly assume that the designer of Sverige has at least taken his inspiration from the American pilot boats, which have retained the same general type before and for a time after America. The dimensions of Sverige were:

| | |
|---|---|
| Length over all | 113ft. 10in. |
| l.w.l. | 96ft. |
| Beam extreme | 25ft. 8in. |
| l.w.l. | 24ft. 8in. |
| Draft | 11ft. 8in. |
| Displacement, long tons | 149.5 |
| Area midship section, sq. ft | 102 |

## YACHT NEWS NOTES.

A meeting of the Council was held on Oct. 24 at the Langham Hotel, London. There were present Sir G. A. Leach (in the chair), the Hon. G. C. Colville, Mr. Philip Perceval, Jr., Mr. G. B. Thompson, Mr. C. Newton Robinson, Mr. G. E. Lake, Mr. T. B. C. West, Capt. C. G. Nottage, Mr. G. F. Flemmich, Col. Villiers Bagot, Col. Fitzroy Clayton, Mr. Herbert Crossley, Mr. W. Baden-Powell, Mr. Peter Donaldson, Mr. A. Manning and Major P. H. Hewitt. Mr. W. G. Jameson was elected to the Council to fill the vacancy caused by the death of Lieut. Henn, R.N. The Marquis of Carmarthen and Mr. Linton Hope were elected members of the Association. The Council proceeded to consider the report of the rating rule committee, as already published, and decided not to make any attempt to bring about an international rating rule. Mr A. Manning then proposed and Mr. Peter Donaldson seconded, that the existing rating rule be amended next spring, and the rules as amended to come into operation in 1896. Mr. W. Baden-Powell proposed and Mr. Herbert Crossley seconded, as an amendment, that the words "next spring," etc., be omitted, and the following substituted, "That the rule be amended this autumn, and come into operation in 1895." Three voted for the amendment, which was not carried. The original motion was then put, and twelve voted for it, and it was declared carried. The following members were then appointed a committee to recommend what amendment to the rating rule is desirable, and with full powers to take such steps as they may consider expedient; Mr. H. Crossley, Mr. Peter Donaldson, Mr. G. F. Flemmich, Sir George C. Lampson, Bart., Sir G. A. Leach, Mr. A. Manning, Mr. W. Baden-Powell, Col. Saunderson, M P., Mr. G. B. Thompson and Mr. C. Newton Robinson. A question was asked by the Tenby regatta committee whether, if a yacht fouled the bowsprit of a committee boat, she should be disqualified; or whether the bowsprit ought to have been run in. The answer was that the yacht must be disqualified. The Lough Derg Y. C. referred a protest made by the Knockcrockery against the Achilla for being steered during a portion of a race by a paid hand, but the protest was disputed because no ensign had been displayed, and was not made in time. The Council decided, under the last paragraph of Rule 30, that the Achilla must be disqualified.—*The Field, Oct. 27.*

The interest of the Encinal Club was centered yesterday in the launching of the new yacht that was built at High-street bridge by Dr. Edward S. Clark and his brother, Carlton H. Clark. Her spars and sail had been set before launching, and when floated she was ready to get under way. This was not undertaken until high tide, at 4 P. M., as the channel from the bridge to the club house is very narrow and has not much water. Therefore, in the light prevailing winds, she did not reach the latter place till 7:30 P. M. This new addition to the fleet of the Encinal Boat Club will be known as the Nita. Her measurements are: Length over all, 30ft.; length on waterline, 26ft.; beam, 11ft.; draft without centerboard, 2ft. 6in.; draft with centerboard, 6ft.; length of boom, 31ft.; length of gaff, 14ft. 6in.; hoist of mainsail, 17ft. 5in.; deck to hounds, 19ft.; hoist of the jib, 24ft.; foot of jib, 16ft. 5in. Her cabin is very large, having about 6ft. of head room, which does not give her a very rakish appearance; but as she is built expressly for a cruiser this is a decided advantage. The interior is finished in oak, with a very high polish, which gives the cabin an exquisite appearance. On the port side forward is the lavatory, with which there are special connections for pumping out the yacht. On the starboard side forward there is the galley, while forward are the gas and water tanks and chain locker. One of the novelties aboard this craft is the illumination by gas, which is the first time such a thing has been tried in a yacht of her size on this bay. Later on, electric lights, the fittings of which are all in place, will be put in. The tables are of the leaf pattern, fastened alongside of the centerboard case. The steering gear is both wheel and tiller, at the option of the owners. There are 5,000lbs. of ballast at present in the shape of sash-weights, but this has been found to be insufficient and 3,000lbs. more will be added, 1,000 of which is likely to be in an iron shoe. Her underbody somewhat resembles Dr. Humphries' old boat, which may be, because the same man that built the vessel laid the keel and bent the ribs of this new craft The rest of the work has been done by her owners, who are only amateurs at the art, and must therefore be congratulated on their success—*San Francisco Call, Oct. 22.*

The regular organization meeting of the Neptune Y. C. of New Rochelle was held at the residence of Mr. L. C. Ketchum on Oct. 29. The committee on constitution and by-laws submitted their report, which was adopted. The constitution, by-laws and racing rules are similar to those of the Seawanhaka Corinthian Y. C. The designating signal will be a white pointed flag with a red cross thereon outlined with blue. The first fifty members will be admitted without initiation fee, and the dues have been set at $10 per year. The club officials are now negotiating for a house and grounds at New Rochelle. The new club will have its headquarters on the lower harbor, just inside of Glen Island. A committee is now engaged in sounding along the shore, and will lay out an anchorage inside of the channel lines. The following officers have been elected: Acting Com., Chas. M. Connolly; Treas., Arthur Townsend; Sec'y., Robert T. Badgley; Trustees, Chas. M. Connolly, Arthur Townsend, Robert T. Badgley, L. C. Ketchum and A. E. McArthur. Mr. Ketchum has been appointed a committee on site and Messrs. Ketchum, Townsend and Badgley have been appointed as a house committee. The regatta or sailing committee is composed of T. Fleming Day, E. Burton Hart and F. M. Freeman. Among the members enrolled up to date are Francis Wilson, Frank M. Freeman, H. G. O. Dunham, Mr. Sherwood, Hazen Morse, E. Lyon, W. L. Lyon, Mr. Pelham, Mr. Kehoe and many other prominent residents of New Rochelle. The election of the commodore, vice-commodore and rear-commodore will not be held until the committee on site has completed its labors.

The Minneapolis M. Y. R. A. 40in. race on Oct. 21, was not brought to a conclusion owing to want of wind. A rather longer course than usual was given them and they were sent half a mile to windard and return. Wasp did not show up, leaving D. H. E. and Minerva to fight it out again. D. H. E. to leeward, was first away and drew out from Minerva; the latter was pointing higher however, and when they went about was in the best position, and on this tack increased her lead. Shortly after a shift of wind enabled her to lay a direct course for the turn, round which she came with a good lead. Shortly after the wind died almost completely away, and the yachts gave up on the run home.

The shoal-draft yawl Lounger, designed and built by H. C. Wintringham for James B Hammond in 1892, has proved very successful both in Florida waters, for which her very light draft was specially intended, and in the offshore work between New York and Florida; and Mr. Wintringham has just completed the designs for a similar craft, for Mr. H. M. Billings, of New York. She will be 52ft. over all, 38ft. l.w.l., 14ft 3in. beam and but 19in. draft. The rig will be between a ketch and a yawl, similar to the "American yawl" rig of the Biscayne Bay Y. C. The yacht will be built by John F. Mumm, at Bay Ridge, the work being now well under way, as the yacht is to sail for Florida next month.

Mr. Arthur Binney is busy with the design for a 90ft. cruising steam yacht for a Boston owner, a roomy boat of moderate power. He has also under way a 28ft. centerboard sloop of 30in. draft, for Barnegat Bay, a cabin boat with galley and w. c., and a 2½-rater for Shanghai, to be built in China.

Alice, yawl, 42ft. built by Clapham, has been purchased by Mr. Conyers C. Converse, of Highwood, N. J.

Hanniel, steam yacht, C. H. W. Foster, will have two new Almy water tube boilers put in at Lawley's.

The sale of the steam yacht Embla, by J. H. Hanan to E. W. Bliss has been cancelled.

# Rifle Range and Gallery.

## Excelsior Rifle Club.

The Excelsior Rifle Club brought its half-yearly gallery competition to a close last week. On Friday night the annual election of officers was held. The new board is as follows: President, Thos. Hughes; Captain, L. P. Hansen; Treasurer, Wm. H. Hallowell; Secretary, W. J. Channing; Shooting Committee—L. P. Hansen, J. W. Hennessey, Jas. Hughes; House Committee—L. P. Hansen, Jas. Hughes, J. Brinkman; Finance Committee—E. J. McCarthy, H. Reeves and G. G. Williams.

The total scores of the members competing for the class medals and a list of the winners are appended:

| | Total. | Aggregate. | | Total. | Aggregate. |
|---|---|---|---|---|---|
| R H Duff | 5,075 | 230 | G G Williams | 4,929 | 224 |
| J Binns | 4,805 | 218 | J Martin | 4,948 | 224 |
| W Hughes | 4,979 | 226 | F P Thompson | 4,838 | 219 |
| J Hughes | 5,100 | 231 | L P Hansen | 5,220 | 237 |
| W J Hennessy | 5,251 | 238 | D Kastendiek | 4,903 | 222 |

The winners in the classes were: First class—W. J. Hennessey, first medal; L. P. Hansen, second medal. Second class—Jas. Hughes, first medal; R. H. Duff, second medal. Third class—William Hughes, first medal; Jas. Martin, second medal.

## Greenville Rifle Club.

Greenville, N. J., Nov. 2.—The weekly gallery shoot of the Greenville Rifle Club for class prizes was held at headquarters this evening. Scores: M. Dorrler 235, Geo. Purkess 241, C. Boag 241, W. C. Collins 242, J. Boag 240, C. Scheeline 233, C. H. Chavant 235, Agneau 229, Charlock 231, Spahn 233, E. Wuestner 217, Holzapfel 230, Renker 231.

## Zettler Rifle Club.

The Zettler Rifle Club held its weekly gallery shoot at headquarters, 219 Bowery, on Oct 30. Fifteen members were present and participated in the competition. F. C. Ross won the champion medal on the score of 246. Dorrler and Holges were a tie for second place, with 245. Dorrler was high man for the best 10-shot score, also for the 5 scores. Scores:

Champion medal, 10 shots, first entry:

| | | | | | |
|---|---|---|---|---|---|
| R Busse | 240 | G Nowak | 240 | G W Downs | 224 |
| J H Brown | 240 | C G Zettler | 238 | L Flach | 240 |
| M Dorrler | 245 | H Muenz | 200 | H D Muller | 238 |
| M B Engel | 237 | S Buzzini | 229 | F C Ross | 246 |
| H Holges | 245 | J Blumenberg | 233 | B Zettler | 241 |

Five best scores:

| | | | |
|---|---|---|---|
| M Dorrler | 245 245 245 246 248 | F C Ross | 246 245 245 241 246 |
| H Holges | 245 244 247 244 241 | | |

Best 10-shot score, 5 entries:

| | | | | | |
|---|---|---|---|---|---|
| M Dorrler | 248 | C G Zettler | 245 | L Flach | 242 |
| F C Ross | 246 | S Buzzini | 238 | G Nowak | 244 |
| J H Brown | 245 | H Holges | 247 | B Zettler | 242 |
| M B Engel | 244 | R Busse | 248 | H Muenz | 231 |
| H D Muller | 240 | G W Downs | 233 | | |

## Independent New York Schuetzen Corps.

The Independent New York Schuetzen Corps, Capt. Wm. V. Weber, held its closing shoot for the season at Glendale Park on Oct. 30. Twenty-one members were present and entered the competition for prizes on the ring, man and point targets. On the ring target Gus Zimmerman was high with 115 points. Zimmerman and Hayes also tied for high score on the man target, each making 59. On the point target Begerow, Hayes and Martin tied for high score, each 18 points. A full report of the season's work will be published in these columns at an early date. Scores:

Ring target, 5 shots, possible 125: Gus Zimmerman 115, I. Martin 113, Wm. Hayes 105, B. Walther 104, Geb Krauss 103, G. Bauer 102, J. Bittschier 95, E. Greiner 90, M. Herman 87, A. Stolzenberger 86, N. Burgart 81, Aug. Schmidt 70, J. Koerber 66, F. C. Halbe 60, W. Soell 59.

Man target, 3 shots, possible 60: Gus Zimmerman 59, Wm. Hayes 59, B. Walther 56, I. Martin 55, E. Greiner 53, Aug. Schmidt 52, Geb Krauss 50, J. Bittschier 49, E. Fisher 48, M. Hermann 45.

Point target, 5 shots, possible 20: Aug. Begerow 18, Wm. Hayes 18 Ignatz Martin 18, B. Walther 17, E. Berckman 16, Gus Zimmerman 16, Geb Krauss 16, E. Fisher 15, M. Hermann 15, E. Greiner 15, Aug. Schmidt 15, J. G. Bauer 14, F. Kronsberg 14, L. A. Hoffman 13, H. Kahn 13, W. F. Baab 13, R. Henke 12, J. Bittschier 12, F. C. Halbe 10, J. Clauter 10, Wm. Soell 11.

## Freak of a Bullet.

Castleton Corners, N. Y.—*Editor Forest and Stream:* I have been shooting a rifle for the past fifteen or eighteen years, and I would be greatly obliged to you if you will try and explain the following freak:

Yesterday I was shooting off-hand at the German ring-target, 200yds. I had fired two strings of 10 shots each, getting 206 and 211 to each string. I started on the third string and fired two shots, getting 19 and 23, but the third shot went fully 6ft. above and 4ft. to the right of the target, and I am positive I pulled it as well as any. After the above I shot from a rest, using a bag of sand, and fired four strings, making 234, 233, 237 and 239.

My rifle is a .32-40 and I load my own shells, using 45grs. hazard Fg. and a bullet of 140grs. I never load more than seventy-five shells without refilling the flask and each bullet is carefully examined for streaks and flaws before lubricating; in fact, I am so particular in loading that my shooting friends call me an old maid. I recovered the bullet from the ground, which is very stony, and it is somewhat battered. However, I will inclose it, hoping it will assist you in making a solution of the to me puzzling affair. I always wipe my rifle after each 10 shots. There was no wind. Chas. W. Green.

## Columbia Club Scores.

San Francisco, Oct. 28.—The Columbian Pistol and Rifle Club held its semi monthly all-comers' shoot to-day. The attendance was small.

In the Blanding pistol madal shoot C. M. Daiss scored 91 and F. O. Young 91.

Ross target rifle medal—Fred Gehret 90, Col. Kellogg 82, H. R. Brown 79.

Kellogg rapid-firing revolver medal—Scoring is done on the usual schuetzen man-target, 5 shots, revolver with not less than 3lbs. pull of trigger; the number of seconds consumed in shooting the five shots to be deducted from the total points made in the five shots. Howard Carr carried off the honors, making in four scores 49, 62, 69, 70—250; F. O. Young 228, C. M. Daiss 226.

In practice shooting with pistol last Sunday the following were the highest scores: F. Gehret 95, Dr. Rodgers 94, A. H. Pape 93, F Young 93, C M. Daiss 92. Roebl.

## Schlicht Rifle Club.

West New York, Oct. 29.—At the weekly shoot of the Schlicht Rifle Club for class medals, held at headquarters, this evening, the following appended scores were made by the members entered in the competition. Scores: C. Meyer 233, G. Schlicht 244, W. Schlicht 228, J. Schlicht 231, F. Lambrix 230, G. Reichert 233, H. Aufderheide 222, J. Diehl 227. Medal winners: G. Schlicht, champion medal; J. Diehl, first class medal; G. Reichert, second class medal; C. Meyer, third class medal.

## RIFLE NOTES.

Rapid progress is being made in preparing the grounds for the forty-five targets on the new range in the Glendale Park, Long Island. The executive committee of the National Association propose to have a grand celebration over the laying of the corner stone for the foundation of the shoooting stand of the new range. The affair will come off some time in December and all the societies in the Association will be represented.

In last week's issue in Rifle Notes in the paragraph relating to the .25-20 Winchester and nitro powder, electro-photo should read electroplate. One of our small-caliber enthusiasts, whose attention was called to the article referred to above, informs us that he is going to try a little experimenting with his .25-20. The fact that our small-caliber friend is an expert chemist and a man of large experience in nitro explosives leads us to believe that the results of his experiments in this line may be of some use to the Forest and Stream readers.

We note that the Winchester Repeating Arms Co are advertising a nitro cartridge for their .38cal. rifles, models 1873 and 1892. This cartridge is loaded with the new metal-patched bullet. It is claimed that this cartridge gives a velocity of 1,600ft. per second against 1,200 for black powder.

The Greenville Rifle Club will hold its gallery tournament on Nov. 10 and 11. All of our gallery experts should be on hand to compete for the diamond trophy; it's worth winning.

Our readers should follow the work of the Zettlers in their weekly gallery shooting, a lively competition is already well under way and high scores are being made. Dorrler, Ross and Holges are running neck and neck.

## Revolver Shooting in England.

THE final competition of the North London Rifle Club took place on Oct. 17. Major Munday made a highest possible at 20yds., putting himself into fourth place for the championship. Below are details of the day's shooting, leading scores, 20yds. competition:

| | | | |
|---|---|---|---|
| Major Munday | 777777—42 | Dr Howe | 577775—38 |
| Walter Winans | 777776—41 | C F Lowe | 767765—38 |
| Capt Richardson | 676776—39 | | |

Group 1.—Major Palmer (allowed 14 points), first prize.
Group 2.—Carter and Barrington (allowed 20 points), divided first.
Group 3.—Walter Winans (no points allowed), first prize.
Group 4.—Denyer (20 points allowed), first prize.
Group 5.—Lowe (4 points allowed), first prize.
Championship for 1894, leading scores:

| | 20yds. | 50yds. |
|---|---|---|
| Walter Winans | 42 42 41 41 41 41 | 29 30—307 |
| F Andrews | 42 40 40 40 39 39 | 29 29—298 |
| F Rand | 42 41 40 40 39 39 | 28 27—296 |
| Major Munday | 42 39 39 39 39 38 | 28 27—291 |
| C F Lowe | 40 40 40 39 39 39 | 27 27—290 |

Winans used S. & W. .45 revolver, U. M. C. ammunition, black powder; Andrews, Webley revolver, .45cal., V. R. Smokeless powder, Eley's ammunition; Rand, Colt revolver, .45cal., Eley's ammunition, black powder.

Below are details made by members who belonged to both clubs. Total for both North London and South London revolver championships: Walter Winans 629, F. Rand 610, C. F. Lowe 584.

## A Bullseye that did not Count.

*Editor Forest and Stream:*

I received yesterday one of your "Silver Bullseyes," which I presume some kind friend asked you to send me, or possibly it was sent without any request. I am pleased with it, as I consider it one of the finest little "ads" I ever saw, but I have been reading FOREST AND STREAM for over a dozen years, and we are far from being strangers.

C. H. P. RONEY.

## Excelsior Rifle Club.

JERSEY City, Oct. 30.—The Excelsior Club held its last shoot for the current series for class medals this evening. The scores are appended. Scores: L. P. Hansen 243, W. J. Hennessey 236, J. Hughes 233, F. P. Thompson 231, G. G. Williams 230, Wm. Hughes 229, R. H. Duff 228, D. Kastendiek 221, Joe Martin 220, J. Binns 197.

# Trap-Shooting.

**All ties divided unless otherwise reported.**

**If you want your shoot to be announced here send in notice like the following:**

### FIXTURES.

Nov. 9.—NEW LONDON, Conn.—Eighth tournament of Connecticut Trap-Shooter's League, under auspices of Thames Gun Club. James W. Clinton, Sec'y.

Nov. 12.—SARATOGA, N. Y.—Tournament of the Saratoga Gun Club, at its East avenue grounds; targets.

Nov. 13-15.—CHICAGO, Ill.—Brewer-Carver series of three 100 live bird matches for the world's championship; $100 a side each race.

Nov. 18-19.—ELIZABETH, N. J.—Two days' shoot of the Elizabeth Gun Club; first day, targets; second day, live birds.

Nov. 28.—Central New York Trap-Shooters' League, eighth tournament, at Syracuse.

Dec. 20-21.—ELIZABETH, N. J.—Two days' shoot of the Elizabeth Gun Club; first day, targets; second day, live birds.

1895.

Jan. 1.—NEWARK, N. J.—Fifteenth annual New Year's Day tournament of the South Side Gun Club. W. R. Hobart, Sec'y.

Jan. 17-19.—HAMILTON, Canada.—Hamilton Gun Club's annual tournament; $1,000 added money. J. W. Bowman, Sec'y.

April 3-5.—WILLARD PARK, Paterson, N. J.—Interstate Manufacturers' and Dealers' Association's third annual grand American handicap at live birds, at New York; $1,000 guaranteed, all surplus added.

May 14 16.—DAYTON, O.—Ohio Trap-Shooters' League annual meeting and tournament under the auspices of the Buckeye Gun Club, of Dayton, O. Ed. Taylor, Sec'y, 8 West Third street, Cincinnati.

May 21-24.—Knoxville (Tenn.) Gun Club's fourteenth annual tournament; $1,500 added to the purses.

June 4-7.—MEMPHIS, Mo.—Memphis Gun Club's annual tournament; $2,000 added money.

June 19-21.—CLEVELAND, O.—Chamberlain Cartridge and Target Company's second annual tournament; $1,200 in cash added.

Aug. 29 31.—HOT SPRINGS, S. D.—Hot Springs Gun Club's second annual tournament.

Oct. 3-6.—Pennsylvania State Sportsmen's fifth annual tournament, under the auspices of the Keystone Shooting League of Philadelphia. John C. Shallcross, Sec'y, Frankford, Pa.

## DRIVERS AND TWISTERS.

*Club secretaries are invited to send their scores for publication in these columns, also any news notes they may care to have printed.*

Judge Biddle recently allowed the application of the Philadelphia Gun Club for a charter, to be filed without reference to a master. The club was organized for the purpose of promoting athletic sports and social enjoyments among its members, who are as follows: A. J. Drexel, Jr., Samuel Bell, Jr., Edward Browning, Charles Bohlen, Henry C. Butcher, David S. B. Chew, B. Frank Clyde, Franklin S. Coxe, T. H. Dixon, Spencer Ervin, John R. Fell, Joseph N. Fox, Joseph C. Fraley, C. Ross Grubb, C. Leland Harrison, Theodore L. Harrison, R. Wistar Harvey, E. C. Knight, Jr., C. Hartman Kuhn, Charles M. Lea, Clarence B. Moore, Edward Morrell, James Potter, J. R. Evans Roberts, Murray Rush, Frank Thompson and Samuel Price Wetherill. Recently the Club has arranged to purchase a large property for the practice of marksmanship and other purposes, and in part payment therefor to give certain obligations for which the members do not wish to be individually responsible, which is the reason for the club desiring to be incorporated.

A dispatch from Kansas City has been going the rounds of the daily newspapers to the effect that Brewer will shoot Elliott a series of five races at live birds, but not for the championship. This is correct in a certain sense, but the statement should be qualified by the addition of a sentence or two telling why Brewer can't nor won't shoot Elliott for the championship. As that title is in dispute until the Brewer—Carver series on Nov. 13-15 at Chicago, it is very evident that no other matches for the world's championship can be made by Brewer or Carver until after a decision has been arrived at in this series. Elliott has written Brewer that he'll meet him in Chicago shortly, as suggested in Brewer's last letter, and will then sign articles for the series of five matches. They had better defer signing those articles till after the Brewer—Carver series, so that should Brewer win, they can shoot for the championship as well as for a monetary consideration.

From time to time rumors have been afloat in regard to dissensions between the gun clubs at Pittsburgh, Pa. A recent issue of the *Chronicle-Telegraph* of that city has the following on the subject: "There is said to be quite a split in the Heron Hill Gun Club. A number of members, of a little over a year's standing, have been growing because they were always handicapped in the club's shoots. These men developed into good shots in a short time and the club promptly put them on the rear marks in order to equalize the shooting, or in other words, to also give the less skillful shooters a chance to win. This policy has not pleased the men, who are accused of being shooters for revenue only. It is said that at least a half dozen resignations have been presented."

Mr. Elmer E. Shaner, manager of the Interstate Manufacturers' and Dealers' Association, is busily engaged in the preparation of the Association's second annual report, which he hopes to have ready for distribution by the close of the month. Interesting as was the first annual report issued in December of last year, this year's statement of what has been done in 1894 should be correspondingly more interesting, the shoots held under the direction of the Association having been uniformly most successful. It is proposed to make the circuit of 1895 consist almost entirely of Southern fixtures. Clubs located in Southern cities will do well to send in applications for dates in next year's circuit list at an early date.

Miss Annie Oakley sails for London on Saturday of this week, Nov. 10, on board the steamship Mohawk. During the past two weeks she has been busily engaged in training her new horse preparatory to his and her debut on the English stage in "Miss Rora." The horse is 14½ hands high, seal brown in color and, under Miss Oakley's treatment, has become a perfect pet, following her up and down stairs like a dog. Last week Miss Oakley gave an exhibition of rapid and effective work with rifle and shotgun before the kinetoscope.

As per the programme announcement, FOREST AND STREAM donated three one-year subscriptions to the management of the Emerald Gun Club as premiums at its recent tournament. The management decided to award these prizes to the three men, non-prize winners, who should make the largest runs of kills in the Empire City Handicap. The winners according were Mr. Wm. Lair, Coney Island Rod and Gun Club, 19 straight; Mr. Charles Zwirlein, Yardville, N. J., 14 straight, and Mr. C. Oberg, of the New York German Gun Club, with 13 straight. Mr. Oberg will be remembered as the gentleman who kept strictly to "gun below elbow;" he doesn't believe in "gun in any position."

At a banquet held recently by the Canandaigua, N. Y., Rod and Gun Club, F. J. Amsden of Rochester, N. Y., secretary of the New York State Fish and Game Protective Association, urged upon the club the necessity of protecting small game and song birds in this country. He said that the club should devise a plan to prohibit the shooting of these birds; that within the past few years the youngster with the rifle had succeeded in exterminating them to a frightful degree. He added that without these birds it is useless to attempt to raise fruit.

The Saratoga Gun Club will hold a tournament on the East avenue grounds on Monday, Nov. 12. The out of town clubs which are expected to be represented at the shoot are the Albany, Troy, Granville, Johnstown and Canajoharie. The principal event will be a sweep at 150 kingbirds per man. The Saratoga and the Glens Falls gun clubs will probably also have a team race for a trophy.

The Bayonne (N. J.) Gun Club is organized, with these officers: John S. Devanny, President; Nicholas Carroll, Vice-President; John Bull, Secretary and Treasurer. The club shoots are held on the Newark meadows at present, but the new grounds, Avenue A and West Twenty-second street, will soon be ready for use.

The Wilmington, N. C., tournament, to be held on Nov. 29 and 30, under the auspices of the Eastern Dog and Game Protective Association, should be a success, notwithstanding the lateness of the season. The details of the programme, given elsewhere, are something out of the ordinary run of such events.

The Rockville, M., Gun Club brought its 1894 season to a close on Oct. 26 with a target tournament at its grounds at Rockville Heights. The chief event of the day was for a gold medal and the championship of the club. Robert B. Peter was the winner with a score of 17 out of 20.

The Emerald Gun Club of New York city, emboldened by the success of its big tournament recently held at Dexter Park, L. I., will try to obtain the privilege of giving under its auspices the State shoot for 1896.

Mr. L. H. Schortemeier, of the Emerald Gun Club, states that somebody left behind him at Dexter Park several hundred shells, which he can obtain by addressing Mr. Schortemeier at 44 Grove street, New York city.

It is understood that a tournament will be held at the Elizabeth Gun Club's new grounds on Nov. 18 and 19, not 17 and 18, as previously announced. The first day will be devoted to targets, the second to live birds.

The annual tournament of the Rye (N. Y.) Gun Club was set for Tuesday of this week, Nov. 6.

H. G. Miller, '95, has been elected to the captaincy of the Yale Gun Club.

## Dayton Defeats New Brunswick.

DAYTON, N. J., Nov. 3.—The Dayton "farmers" once more left their plows and pruning hooks and journeyed to Monmouth Junction. On that (their own) grounds they proceeded once more to take a fall out of the men from New Brunswick. As on previous occasions, the race was really a close one, but Dayton came out ahead finally by 11 targets. The conditions were 15 men a side, 30 targets per man, 10 targets are shot at everything known, 10 at unknown angles and 10 at expert rules, use of both barrels, second barrel break counting one-half. On the known angles round Dayton led by 10 targets; at unknown angles they increased this lead to 17, on the final round New Brunswick rallied, scoring 103 to Dayton's 97. The strong wind blowing across the traps was against high scores, as it caused the targets to take very erratic flights. Ths last squads shot their final strings in a very bad light, it being almost too dark to discern a target clearly. Scores:

Team race, Dayton vs. New Brunswick, 15 men to a team, 30 targrts to a man, 10 at known angles, 10 at unknown angles and 10 at expert rules, use of both barrels, second barrel break scoring one-half:

Dayton.

| | Known angles. | Unknown angles | Expert rules, second barrel break to count ½. | |

## Elizabeth Gun Club.

ELIZABETH, N. J., Nov. 1.—The Elizabeth Gun Club at its meeting Oct. 30, constituted its officers with three other members of the club, a board of managers, who will have exclusive control of the management and conduct of all tournaments, shoots and private matches held by the club on its grounds. The club, believing that the large and increasing number of trap shooters in New Jersey and in the vicinity of the city of New York desire some convenient shooting grounds where trap shooting both at inanimate targets and live birds can be had at regular and stated intervals, and where they can come and enjoy the sport, concluded to open its grounds to shooters generally. The club determined therefore to hold regular bi-monthly tournaments on its grounds. The first tournament will be held Thursday and Friday, Dec. 20 and 21 next, the first day at targets, the second day at live birds. The grounds of the Elizabeth Gun Club are so well arranged for both kinds of shooting, and the communication by rail to and from the city of Elizabeth is so rapid and convenient, the club believes that the trap shooters will be pleased with its action, and that they will liberally patronize its tournaments. The tournaments will be held regularly, and as long as they are sustained by the trap shooters; it is for the trap shooters themselves to determine by their patronage whether they shall continue or not. The club guarantees that all tournaments will be conducted in a manner honorable and just to all participants.

ROBERT E. CHETWOOD, President.

## Live Birds at Weir City.

WEIR CITY, Kans., Oct. 27.—Below are scores made in a friendly match at 25 live birds between W. W. McIlhany and C. H. Calhoun, both of the Business Men's Gun Club of this place. The match was shot under American Association rules. McIlhany used a new Parker hammerless weighing 8lbs. His load was 3½drs. American E. C. powder in a Smokeless shell, with 1¼oz. Tatham's No. 7 shot. Calhoun used an L. C. Smith hammerless weighing 8¼lbs., with 3drs. E. C. powder and 1¼oz. Tatham's No. 6 shot. McIlhany's load seemed to be the most effective, for while he used his second barrel only six times, twice it was entirely unnecessary.

MAMALUKE.

## Victories for the Maplewoods.

SOUTH ORANGE, N. J., Oct. 27.—Below are given the scores made at the grounds of the Maplewood Gun Club this afternoon. We try to accommodate all clubs who desire a race of any sort with us and, although we are beaten sometimes through allowing "too big odds," we realize that it stimulates the younger clubs when they can claim that they "beat the Maplewoods." The scores show that all the Class A men were barred except in the shoot with the Brightons, who shot Warren Smith against the Maplewood's W. N. Drake. In the shoot-off with Myrtle Park, Maplewood won easily, the Myrtles going to pieces, dropping 11 out of 25. Scores:

No. 1, 10 targets:

| | | | |
|---|---|---|---|
| Whatten | 0101111010—6 | Drake | 1011010110—6 |
| Huff | 1111101100—7 | Kritcher | 1111011010—7 |
| Badgley | 1101110101—7 | Potter | 0100111111—7 |
| W Smith | 1011111101—8 | George | 0010110111—6 |
| Van Idestine | 1100111101—7 | O'Meally | 0010000110—3 |
| Dr Jackson | 1011111100—7 | | |

No. 2, 10 targets:

W. N. DRAKE.

## The Towsend Testimonial Fund.

THE shoot on Oct. 30 at Marion, N. J., was entirely successful, but the weather on Oct. 31 was against all trap-shooting. The net receipts were $193.41. The programme originally set for Wednesday, Oct. 31, will be carried out on Thursday of this week, Nov. 8, at the same place. The hour of commencing business will be 9:30 sharp. The following merchandise prizes will be competed for: .38cal. Winchester repeating rifle, donated by W. H. Wolstencroft, of Frankford, Pa.; 12½lbs. American wood powder, donated by M. F. Lindsley; 20lbs. American E. C. powder, donated by Capt. Money; one copy of "American Field and Bench Show Records," donated by Major J. M. Taylor; a magazine shooting vest; a grass ducking suit, donated by F. A. Lawrence; a box of cigars, donated by L. H. Schortemeier; 300 loaded shells, W. H. Cruttenden, Cazenovia, N. Y.

The following subscriptions to the testimonial fund have been received: By W. Fred Quimby: Syracuse Arms Co. $10, Ithaca Gun Co. $10, Hunter Arms Co. $10, Lefever Arms Co. $10, Peekskill Gun Club $15, Forest and Stream Pub. Co. $25, Riverside Gun Club $13.50, Cleveland Target Co. $10, Elizabeth Gun Club $27, Dr. G. V. Hudson $2, Cash $1, sale of Bilderbach score books $3.50. Total, $137.

By M Lindsley: N. A. Hughes $5, Harry Stewart ("Slocum") $5, C. B. Bristor $5, Harvey McMurchy $10, Frank C. Fowler $10, Knoxville Gun Club $25, Members of the Heron Hill Gun Club, per W. S. King $25, James Green and Joe Hunter $20, West Newburgh Gun Club $10, Will K. Park $2, Frank Class $2. Total, $119.

Total receipts:

| | |
|---|---|
| Proceeds of shoot at Marion, N. J., on Oct. 30 and 31 | $213 91 |
| By W. F. Quimby | 137 00 |
| By M. F. Lindsley | 119 00 |
| | $469 91 |
| Less expenses of trappers at shoot | 23 50 |
| Total | $446 41 |

In addition to the above sum of $446.41, a donation of $32.50 has been sent by the Lynchburg Gun Club, of Lynchburg, Va., making the total amount $478.91. The other merchandise and cash prizes not mentioned above were competed for at the recent shoot. It should not be overlooked that Al Heritage gave a cash donation of $40 to be competed for; $20 of that amount will be put up as a purse on Thursday next. On that day it is hoped that a substantial addition to the above fund will be realized.

## The Wilmington, N. C., Programme.

WILMINGTON, N. C., is going to have a big time the latter part of this month. The week from Nov. 26 to Dec. 1 is to be a "grand carnival week," with all sorts of attractions scheduled for those dates. On Nov. 29 and 30 a trap shooting tournament will be held under the auspices of the Eastern Dog and Game Protective Association, $100 being added to the purses each day. All purses will be divided into four moneys. Shooting commences at 9:30 each day. The programme is as follows:

First day, Nov. 29.—No. 1, 20 targets, practice, known angles, no purse, no entrance; No. 2, 15 targets, unknown angles, $10 purse, $1 entrance; No. 3, 20 targets, known angles, 5-men team shoot, $20 purse, entrance $5 per team; No. 4, 15 targets, unknown angles, $10 purse, $1 entrance; No. 5, 20 targets, known angles, $10 purse, $1 entrance; No. 6, 15 targets, unknown angles, $10 purse, $1 entrance; No. 7, 20 targets, known angles, $10 purse, $1 entrance; No. 8, 25 targets, unknown angles, $10 purse, $1 entrance; No. 9, 25 targets, unknown angles, 5-men team shoot, $20 purse, entrance $5 per team.

Second day, Nov. 30.—No. 1, 20 targets, practice, known angles, no purse, no entrance; No. 2, 15 targets, unknown angles, $10 purse, $1 entrance; No. 3, 20 targets, known angles, 5-men team shoot, $20 purse, entrance $5 per team; No. 4, 25 targets, unknown angles, $10 purse, $1 entrance; No. 5, 20 targets, known angles, $10 purse, $1 entrance; No. 6, 15 targets, unknown angles, $10 purse, $2 entrance; No. 7, 20 targets, known angles, $10 purse, $1 entrance; No. 8, 25 targets, unknown angles, $10 purse, $1 entrance; No. 9, 25 targets, unknown angles, 5-men team shoot, $20 purse, entrance $5 per team.

The handicap is one of distance only; three classes. All shooters averaging 85 per cent. or over will be Class A men and will shoot from the 18yds. mark; those averaging 75 per cent., but less than 85, will be Class B men and will be placed on the 16yds. mark; all under 75 per cent. will be considered as Class C men, and will shoot from the 14yds. mark. The handicap will be graduating, the shooter being classed for the next event by his work in the last preceding event which he shot in. All shooters who cannot be classified will shoot their first event from the 16yds. mark. Communications looking for further information or for programmes should be addressed to H. McL. Green, chairman of tournament committee, Wilmington, N. C.

## Trap at Dexter Park, L. I.

DEXTER PARK, L. I., Oct. 30.—The First German Gun Club held its regular shoot of live birds for the club medal this morning. William Michael won with the score of 9 out of 10.

Club shoot, 10 live birds, club handicap, modified Hurlingham rules: William Michael (21yds.), 9; William Soll (21), 6; George Schneider, Frederick Brandhorst and Andrew Newell (all 21yds.), 7; George Schmeck (21), 6; Peter Wannamacher (30) and Philip Neusch (25), 5; Charles Dietz (21), 4; Charles Pfaff (21) and Frederick Schell (21), 3.

In the afternoon the Hell Gate Gun Club held its club shoot at targets in the afternoon. The attendance was very small, very different from that which usually marks the gatherings of this club. Score: Club shoot, 20 targets per man: J. Blotz 18, Philip Woelfel 10, John H. Voss 8, John Sehm 5.

## The Townsend Benefit Shoot.

TUESDAY, Oct. 30, saw a gathering of sportsmen at Marion, N. J., who had come together to shoot targets at Al. Heritage's grounds, and also to show their appreciation of the work done for trap-shooting by Mr C H. Townsend, late trap editor of FOREST AND STREAM. Had the weather been more favorable, the attendance would undoubtedly have been larger, but the appearance and feel of the day was against it. It looked cold and chilly, and it felt damp and raw. "Uncle Al's" stove, chowder and other comforts went very well under the circumstances. Beside the programmed events special merchandise races were made up. Miss Annie Oakley had donated a handsome table lamp, with an onyx stand, which has gone to Oneida county, N. Y., S Glover winning it with 23 out of 25. Major Taylor's book, "American Field Trial and Bench Show Records," is now at South Orange, N. J., W. N. Drake having won it. The American E. C. Powder Company, through Capt. A. W. Money, donated several pounds of their powder, while M F. Lindsley also gave 100 cans of his American Wood powder. W. Fred Quimby, also a promoter of this meeting, donated 1,000 empire targets, while other merchandise prizes were also received by the committee of managment, which was made up as follows: Al. Heritage, W. Fred. Quimby, M. F. Lindsley and T. H. Keller. "Uncle Al" Heritage gave a cash donation of $40 to be shot for, $20 in each of two events, besides giving the use of his grounds free of all charge. An interesting and amusing match during the afternoon was a race at 15 targets between "Uncle Al," ex-chief of the Fire Department of Jersey City, and Nat Astfalk, chief of the Elizabeth Fire Department, in which the ex chief came out ahead by no less than four targets. Among those present from a distance whose names do not appear on the score sheets, was Capt. George Taggart, field captain of the West Newburgh Gun and Rifle Club. The scores given below will tell the rest of the story:

No. 1, 10 empires, known angles, entrance $1: Keller 9 Van Dyke 9, Breintnall 9, Glover 8, E. D. Miller 6, Hobart 8, Drake 8, Whitehouse w., Sigler 8.

No. 2, 10 empires, unknown angles, entrance $1:

| | | | |
|---|---|---|---|
| Keller | 1111111111—10 | Skinner | 0000101001— 3 |

The prizes in this event were won as follows: First prize, table lamp, donated by Miss Annie Oakley, won by S. Glover; second, "American Field Trial and Bench Show Records," presented by Major J. M. Taylor, won by W. N. Drake; third, 5lbs. E. C. powder, no winner given; fourth, 4lbs. E. C. powder, Capt. Money (donated back to committee); fifth, 3lbs. E. C. powder, Breintnall; sixth, 2lbs. E. C. powder, Lindsley (donated to those who broke 12); seventh, 1lb E. C. powder to lowest score, won by Edwards on the shoot-off.

*Second Day.*

Owing to the heavy rain, which did not cease falling until afternoon, the attendance at the shooting grounds was very small. No attempt was made to carry out the programme, it being decided to postpone the shoot until Thursday of this week, Nov. 8. Those shooters who did put in an appearance during the afternoon shot several small races, finishing up with a team race. Scores:

No. 1, 10 targets. Keogh 1, Ivins 7, Glover 9. Lindsley 6, Heritage 6, Stewart 4, H. Block 3. No. 2, 10 targets. Stewart 7, H. Block 4, Keogh 4, Lindsley 7, Ivins 6, Glover 6. ## State Championship of Iowa.

DES MOINES, Ia , Oct. 31.—The match between John Georgeson, of Kelly, and H. J. Wilson, of Emmettsburg, for State championship medal and a purse of $100, took place yesterday on the grounds of the Highland Gun Club of this city. The contest was at 25 live birds, 15 single targets, from five unknown traps, and 5 pairs targets, American Association rules.

The weather was cold with some rain and a strong wind from left to right across the traps. The birds were an average lot; the targets were standard keystones and were thrown about 50yds. The shooting of both Wilson and Georgeson was good considering the day. This medal was first won by G. P. Christianson, of Randall, at the Iowa state tournament, held at Clear Lake, Ia., 1892, and has to be won five consecutive times to become the property of the holder and is subject to a challenge every 90 days. The challenge must be accompanied by $50 and the holder of medal has to put up a like sum and medal. Had Mr. Georgeson defeated Mr. Wilson the medal would have been his property, as he has defeated Mr. Christianson, of Randall, Mr. Williams, of Kelly, Mr. Chingrin, of Fonda, and Mr Hamaker, of Randall. There is no doubt but Mr. Wilson will have to keep in good shooting trim should he succeed in holding this medal against all comers, as there are quite a number who think they can win it. Score:

Match for State championship of Iowa, 25 live birds:

*Trap score type—Copyright 1894, by Forest and Stream Publishing Co.*

H G Wilson.....↗↖↗↖↖↗↗↙↖←↘↖↖→→↖↖↖↖↑↗↑↖↘

Fifteen targets, expert rules:

H J Wilson.....111110111111111—14 J Georgeson....111011111011010—11

Five pairs of targets:

H J Wilson.....10 11 00 11 10— 6 J Georgeson.....11 10 10 11 10— 7

The full scores show: Wilson, 22 live birds, 14 singles and 6 out of the pairs; total 42. Georgeson, 22 live birds, 11 singles and 7 out of the pairs; total 40.

C. W. BUDD.

## Live Birds at Des Moines, Ia.

DES MOINES, Ia., Oct. 30.—Below are given the scores made in a fifty live bird practice shoot held recently on the Highland Gun Club grounds of this city. The birds were a fair lot and quite a number fell dead out of bounds. Five of the contestants used E. C. powder, two Schultze, one Du Pont's smokeless, one Troisdorf. Five used Winchester Leader shells, seven used L. C. Smith guns, one a Parker and one a Burgess repeater. Mr. S. A. Tucker shot his $400 Parker in great form and killed his birds in good shape, and if he keeps on improving will make it warm for some of the champions. Mr. Damon, representing the Burgess Gun Co., has had but very little experience in trap-shooting but has improved his scores twenty-five per cent. in the last three weeks; he will be heard from in the future. C. M. Grim, the World's Fair champion, was in good form, and with his Smith gun and E. C. powder made the high score. Waruf Irwin was a little off, but forty-four is an average score; he can do better. Georgeson, Kirsher, Perkins and Rice did not shoot up to their average, not having had any practice on live birds for some time. The weather was warm and pleasant. Mr. C. O. Perkins had a fine lunch sent to the grounds for the shooters. Mr. Tucker said he would like to stay on the club grounds a week, so you may know all had a pleasant day, for "Tuck's" judgment is second to none, when it comes to shooting and eating. Scores:

Practice shoot, 50 live birds, 30yds. rise, American Association rules:

## Trap at Lynchburg.

LYNCHBURG, Va., Oct. 29.—The following scores were shot this afternoon by the members of the Lynchburg Gun Club. The net proceeds of the event, $32.50, were forwarded to New York city to be added to the Townsend Testimonial Fund. Along with the check were sent the good wishes of the Lynchburg shooters—"May he live long and prosper." Scores:

No. 1, 50 targets per man, unknown angles: Nelson 44, Terry 44, Stearns 43, Dornin 43, J. Cleland 41, Moorman 40, Miller 39, Owen 38, Scott 37, E. Cleland 32, T. Christian 32, D. Christian 30, Wrenn 30, Wingfield 29.

N. M. BANCROFT.

## Hill Beats Class.

TRENTON, N. J., Oct. 29 —The shoot which took place at Yardville on Friday, Oct. 26, was one of those pretty affairs which occur occasionally during a season. Frank Class and Timmons were the first on the grounds, and were enjoying a quiet little shoot of their own, when the gate opened and a crowd of shooters came in. Among them were Brewer, Morfey, Eddie Hill and Giberson. It was not long before they were at work, and several sweepstakes were shot off before dinner. The competitors were Class, Timmons, Brewer, Morfey, Zwirlein, Hill Giberson. Timmons soon began to make an impression and before the day was out was known as "the man with the terrible left." He certainly used his second barrel with telling effect, and did very fine work all day. About 12:30 all retired to do justice to Charlie Zwirlein's fine dinner. It was served royally, and to the great satisfaction of Brewer, there was plenty of it. I say to Brewer's satisfaction, but it was to ours also, for Brewer was so much engaged in devouring two chickens, 4lbs. of roast beef, half a bushel of potatoes, as well as other things too numerous to mention, that he had no time to talk. Immediately after dinner the shooting commenced again with two more sweepstakes, every one participating as before. This brings us to the affair of the day, a match for $100 a side between Frank Class and Eddie Hill.

The birds, which were a little slow in rising in the morning, rose almost with the springing of the trap. Eddie Hill made some surprising shots, but did not seem as deliberate as Class, who also did some fine shooting. Hill won by one bird. Every one was loud in the praises of Charlie Zwirlein's dog Nig, which retrieved at the trap. It is certainly a wonderful dog and seemed to be perfectly fresh, although he had been working all the day before the shoot at Dexter Park.

| | No. 2, same: | No. 3, same: |
|---|---|---|
| No. 1, 8 birds, $5 entrance, 2 moneys: | | |
| Class | 12211111—8 | 22212222 - 8 11222200—6 |
| Brewer | 11122222—8 | 22112022—7 21222222—8 |
| Timmons | 21111111—8 | 12111211—8 22122121—8 |
| Giberson | 1•112111—7 | 21211111—8 011112•2—6 |
| Zwirlein | 012122•2—6 | 0110w. —2 11101111—7 |
| Morfey | 11021921—6 | 20222122—7 21112220—7 |
| Hill | | 12200121—6 |

Then came the match, which resulted as follows:

Match, Hill versus Class, 50 live birds, $50 a side:

O. K.

## Work Outshoots Brewer.

ON Tuesday, Oct. 30, Capt. J. L. Brewer, went to Bergen Point, N. J., to shoot a practice race at 100 live birds on the Carteret Club's grounds with Mr. George Work, an amateur who has shown time and again that when he strikes his gait he is capable of doing as good work at the traps as any man living. If Capt. Brewer expected an easy race the result shows that the future opponent of Carver and Elliott had to kill his last 52 straight to prevent being distanced. Mr. Work's record in this match is the more remarkle as he has not been shooting live birds for some time and consequently was supposed to be out of practice. In Captain Brewer's own words the story of the race can best be told: "It was the prettiest race I ever shot. The birds were really a good lot and a breeze diagonally across the traps from right to left helped them. It made no difference to Mr. Work what sort of birds he got, he killed his hard ones just as surely as he downed his easy ones; his 'time' was excellent, like clockwork. I believe he would have gathered 87 of his birds in a 21yds. boundary. When I started in I didn't know what I'd gone up against and was a little careless, letting two easy incomers fool me; but when I found that I was in a shooting match for sure, I pulled myself together and kept right after him, thinking to myself, 'Now, my friend if you make a skip I've got you,' but— the skip never came, and he beat me out by one bird." Score:

Match, 100 live birds per man:

## "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

A 2oz. trial package sent post-paid for 25cts.
MARBURG BROS,
THE AMERICAN TOBACCO CO, Successor.
BALTIMORE, Md.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

# ROWLAND E. ROBINSON'S DANVIS BOOKS.

CHRONICLES OF SPORTSMEN AND OTHER HUMAN BEINGS.

## Uncle Lisha's Shop.

LIFE IN A CORNER OF YANKEELAND.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies." The talk naturally ran much on hunting stories and wood lore, but although the stories told were generally good, their truthfulness was not always accepted without question, and the volume abounds as much in dialogue as in narrative. "Uncle Lisha's Shop" is brimful of quaint humor and sentiment, and there is an unmistakable touch of human nature in Uncle Lisha himself, and his good old wife, Aunt Jerushy; in Sam Lovel, the hunter, and in fact in all the other characters introduced.

## Sam Lovel's Camps.

UNCLE LISHA'S FRIENDS UNDER BARK AND CANVAS.

When Uncle Lisha went West, Sam Lovel took Antoine as his partner, and the fortunes and misfortunes of the two as trappers are described with all the charm of our author's quaint style, while their friends and enemies, and all with whom they are brought into contact, in the course of the story, step on to the stage real living flesh and blood creatures drawn with such fidelity to life that the reader never doubts that he would recognize any one of them from the description, should it ever be his good or ill fortune to run against him.

## Danvis Folks.

A SEQUEL TO THE SHOP AND THE CAMPS.

This volume is a collection into book form of the "Danvis Folks" chapters published in FOREST AND STREAM. It relates the further fortunes of Uncle Lisha, Sam Lovel, Granther Hill and other personages of the story whom we know so well. Mr. Robinson avers that his characters were of the old times and have passed away. That surely is a mistake. They are living to-day here in these three books, and the Vermont author has endowed them with qualities which will give them long life to come. If you already have on your shelves the Shop and the Camps, you have a place there for this third volume.

Sent postpaid, the Shop and the Camps, $1.00 each, the Danvis Folks, $1.25.

FOREST AND STREAM PUBLISHING COMPANY.

## One of the Branches

of shooting treated fully and well in Howland Gasper's "Complete Sportsman" is Wildfowl Shooting. The beginner will find Mr. Gasper's instructions clear, readily understood, and helpful. The oldest gunner in the land will find them pretty close to what he would say himself. The "Complete Sportsman" is a book for wild duck and wild goose shooters. 227 pages, 17 illustrations, $2.00.

FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

## "THE ART OF SHOOTING."

PRICE $3.00. FOR SALE AT THIS OFFICE.

**FOREST AND STREAM PUBLISHING CO.**

## BOOKS ON SHOOTING.

**New Editions.**

### The Modern Shotgun.

**By W. W. GREENER.**

PRICE, $1.00.

### The Gun and its Development.

**By W. W. GREENER.**

PRICE, $2.50.

These volumes have been for some time out of print, and new editions revised by the author have just been received. There is scarcely any one whose utterances with regard to shotguns and rifles are entitled to as much weight as Mr. Greener's, for he has been making these arms for many years. To his great knowledge of them he adds a pleasant and clear style in writing, which adds to the value of his books. Every American who uses a gun ought to read these books. Sent postpaid on receipt of price.

**FOREST AND STREAM PUBLISHING CO., 318 Broadway, N. Y**

## CANOE HANDLING.

**By C. B. VAUX ("DOT.")**

FOREST AND STREAM PUBLISHING CO., NEW YORK.

# Standard Works for the Sportsman's Library.

ANY BOOK HERE NOTED WILL BE SENT POSTPAID ON RECEIPT OF PRICE BY THE FOREST AND STREAM PUBLISHING CO., 318 BROADWAY, NEW YORK.

## ANGLING.

### The American Angler's Book.

Combining the natural history of sporting fish, the art of taking them, with instructions in fly-fishing, fly-making and rod-making, and directions for fish breeding. Description of salmon runs, inland trout fishing, etc. By THAD. NORRIS. 80 illustrations. Cloth. Price, $5.50.

### American Fishes.

A popular treatise upon the game and food fishes of North America, with especial reference to habits and methods of capture. By G. BROWN GOODE. With numerous illustrations. Cloth, 496 pages Price, $3.50. This is, by far, the most popular work which has ever been published on the fishes of America, and is the book that no angler who takes pleasure in knowing the fishes which afford him sport, can afford to miss.

### Book of the Black Bass.

Comprising its complete scientific and life history, together with a practical treatise on angling and fly-fishing, and a full description of tools, tackle and implements. By JAMES A. HENSHALL, M.D. Illustrated. Cloth, 470 pages. Price, $3.00. Dr. Henshall's monograph is the standard work.

### More About the Black Bass.

Being a supplement to the "Book of the Black Bass." By JAMES A. HENSHALL, M.D. Fully illustrated. Cloth, 204 pages. Price, $1.50. This is a supplement or sequel of Dr. Henshall's first volume, in which the author's aim is to bring the subject matter down to date.

### Fly-Fishing and Fly-Making for Trout, etc.

By J HARRINGTON KEENE. With plates of the actual material for making flies of every variety. Illustrated. Cloth, 160 pages. Price, $1.50. The matter of the book embraces everything which the fly-fisherman wants to know about the senses of fish, practical fly-fishing, casting and fly-making; with list of standard flies and their dressings; the feathers, silk and other material used in fly-making, there are samples of all, attached to blank sheets like pictures by way of illustration.

### Fishing Tackle.

Its Materials and Manufacture. A practical guide to the best modes and methods of making every kind of appliance necessary for taking fresh-water fish and for the equipment of the angler and fly-fisher. With 454 illustrations and explanatory diagrams. By J. HARRINGTON KEENE. Price, $1.50.

### With Fly-Rod and Camera.

By EDWARD A. SAMUELS, President of the Massachusetts Fish and Game Protective Association, author of "The Ornithology and Oölogy of New England and Adjacent States and Provinces," "Among the Birds," Associate Editor of "The Living World," etc., etc. Cloth, 480 pages (7×9½in.), 147 illustrations. Price, $5.00. The author is known as one of the most devoted and expert salmon fishermen of America. The volume is likewise noteworthy as an example of the rare possibilities of amateur photography.

### Fly-Rods and Fly-Tackle.

Suggestions as to their Manufacture and Use. By HENRY P. WELLS. Illustrated. Cloth, 364 pages. Price, $2.50. The most exhaustive work on the subject in print.

## MANUALS.

### Game Laws in Brief.

Laws of the United States and Canada Relating to Game and Fish Seasons. For the guidance of sportsmen and anglers. Compiled by CHARLES B. REYNOLDS, Editor of *Forest and Stream*. Paper. Price, 25 cents. Gives all sections relative to game and fish seasons, limit of size or number, non-residents, transportation, etc. All in brief, but full enough for the practical guidance of sportsmen and anglers. Carefully compiled, and shorn of verbiage. Handsomely illustrated with numerous half-tone engravings from *Forest and Stream*.

### Woodcraft.

By NESSMUK. Cloth, 160 pages. Illustrated. Price $1.00. A book written for the instruction and guidance of those who go for pleasure to the woods. Its author, having had a great deal of experience in camp life, has succeeded admirably in putting the wisdom so acquired into plain English.

### Tricks of Trapping.

Camp Life in the Woods, and the Tricks of Trapping and Trap Making. Containing hints on camp shelter, all the tricks and bait receipts of the trapper, the use of the traps with instructions for the capture of all fur-bearing animals. By W. HAMILTON GIBSON. Illustrated. Cloth, 300 pages. Price, $1.00.

### Log Cabins.

How to Build and Furnish Them. By WILLIAM S. WICKS. New and enlarged edition. Price, $1.50. Mr. Wicks might have called his book "Every Man His Own Log Cabin Builder," for he has set out to describe fully and particularly each detail in the process of construction. Plans are given for cabins, large and small, with details of exterior and interior.

### Hints and Points for Sportsmen.

Compiled by "SENECA." Cloth. Illustrated, 224 pages. Price, $1.50. This compilation comprises six hundred and odd hints, helps, kinks, wrinkles, points and suggestions for the shooter, the fisherman, the dog owner, the yachtsman, the canoeist, the camper, the outer, in short for the field sportsman in all the varied phases of his activity.

## SHOOTING.

### Names and Portraits of Birds

Which Interest Gunners, with Descriptions in Language Understanded of the People. By GURDON TRUMBULL. Cloth, 222 pages. Price, $2.50. The average gunner with this work at hand would have little difficulty in identifying the contents of his bag from the text alone. Identification is further facilitated by portraits of the birds.

### Antelope and Deer of America.

A comprehensive scientific treatise upon the natural history, including the characteristics, habits, affinities and capacity for domestication, of the Antilocapra and Cervidæ of North America. Second edition. By JOHN DEAN CATON, LL.D. Cloth, 426 pages, 50 illustrations; steel portrait. Price, $2.50.

### The Gun and Its Development.

With Notes on Shooting. By W. W. GREENER. Breechloading Rifles, Sporting Rifles, Shotguns, Gunmaking, Choice of Guns, Chokeboring, Gun Trials, Theories and Experiments. Fully illustrated. Cloth, 770 pages. New edition. Price, $2.50.

### The Art of Shooting.

An Illustrated Treatise on the Art of Shooting. With Extracts from the Best Authorities. By CHARLES LANCASTER. Illustrated with numerous drawings from instantaneous photographs. Price, $3.00. New edition.

### Field, Cover and Trap-Shooting.

By CAPTAIN ADAM H. BOGARDUS, Champion Wing Shot of the World. Embracing Hints for Skilled Marksmen; Instructions for Young Sportsmen; Haunts and Habits of Game Birds; Flight and Resorts of Waterfowl; Breeding and Breaking of Dogs. With an appendix. Cloth, 493 pages. Price, $2.00. There is no other man in this country—or in any other, for that matter—better fitted to teach a novice the art.

### The Still-Hunter.

A Practical Treatise on Deer-Stalking. By T. S. VAN DYKE. The information contained in "The Still-Hunter" is as exhaustive as it is possible to make it. 390 pages. Price, $2.

### The Breech-Loader and How to Use It.

288 pages. Price, $1.00. A book for that numerous class of sportsmen who delight in a day's shooting, but have neither the time nor the means to make the sport a life's study.

## CAMP AND HOME.

### Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By ROWLAND E. ROBINSON. Cloth, 187 pages. Price, $1.00. "Uncle Lisha's Shop" is brimful of quaint humor and sentiment, and there is an unmistakable touch of human nature in Uncle Lisha himself and his good old wife, Aunt Jerushy; in Sam Lovel, the hunter, and in fact in all the other characters introduced.

### Sam Lovel's Camps.

A sequel to "Uncle Lisha's Shop," by ROWLAND E. ROBINSON. Cloth. Price, $1. When Uncle Lisha went West, Sam Lovel took Antoine as his partner, and the fortunes and misfortunes of the two as trappers are described with all the charm of our author's quaint style, while their friends and enemies, and all with whom they are brought into contact, in the course of the story, step on to the stage real living creatures.

### Pawnee Hero Stories and Folk-Tales,

With Notes on the Origin, Customs and Character of the Pawnee People. By GEORGE BIRD GRINNELL. Cloth, 417 pages. Illustrated. Price, $1.75. New edition, revised. Like most Indian tribes, the Pawnees are story tellers. They have a vast fund of folk-tales and traditions, which have been handed down from father to son, and transmitted from generation to generation. Years ago, when the tribe lived in Nebraska, the author of the present volume camped and hunted with them, and joined in their village life. The nights were given up to story telling, and many of the tales told in the lodge and by the flickering camp-fire were carefully translated and written down. When published they excited great interest. They are tales of daring and adventure, weird accounts of magic, mystery and the supernatural; relations of the ways of life in the old, wild days; stories of war and the craft of war parties, the history of the tribe as treasured by the very old men. There is mother-wit in these stories, they are full of humor, sentiment, pathos and human nature.

### Blackfoot Lodge Tales.

The Story of a Prairie People. By GEORGE BIRD GRINNELL. Cr. 8vo., $1.75. In this volume the story of the Blackfoot tribe is told by a friend, one who has hunted with them on the prairies, slept in their lodges, lived in their camps, and shared their daily life. The stories which constitute this history have been taken down by the author from the lips of the narrators, and are given without change as told to him. There is a singular and charming freshness about the stories, which give the history of renowned warriors of ancient and modern times, show how ancient customs arose, and explain natural phenomena. The account of the daily life, customs, and history of the Blackfeet presents a series of graphic pictures of savage life in peace and in war.

### Our New Alaska;

Or, The Seward Purchase Vindicated. By CHARLES HALLOCK. Cloth, 209 pages, illustrated. Price, $1.50. Mr. Hallock's writings are always vivid and full of life.

## THE KENNEL.

### Dogs: Their Management and Treatment

IN DISEASE. A Study of the Theory and Practice of Canine Medicine. By ASHMONT. Cloth, 208 pages. Price, $2.00. The *Forest and Stream* says that this is one of the most valuable treatises on canine management and therapeutics that has appeared on this side of the water.

### Kennel Record and Account Book.

Boards, $3. An indexed volume of 180 pages, consisting of a series of carefully prepared blank entry forms suited to the registration of all kennel events and transactions.

### Dog Points and Standards.

First Lessons in Dog Training, with the Points and Standards of all Breeds of Dogs. Paper, new edition, 106 pages, revised to date. Price, 50 cents.

### Training vs. Breaking.

Practical Dog Training; or Training vs. Breaking. By S. T. HAMMOND, Kennel Editor of *Forest and Stream*. Revised and re-written. To which is added a chapter on training pet dogs, by an amateur. Cloth, 165 pages. Price, $1. A book for dog owners, who, by the instructions here plainly given, can successfully train their hunting dogs.

### Modern Training;

Handling and Kennel Management. By B. WATERS. Illustrated. Cloth, 373 pages. Price, $2. This treatise is after the modern professional system of training. It combines the excellence of both the suasive and force systems of education, and contains an exhaustive description of the uses and abuses of the spike collar.

### House and Pet Dogs;

Their Selection, Care and Training. Paper, price 50 cents.

### Lee's Modern Dogs.

History and Description of the Modern Dogs (Sporting Division) of Great Britain and Ireland. By RAWDON B. LEE, kennel editor London *Field*. Illustrated, 584 pages. Price, $6. This is a standard work by an acknowledged authority, and is up to date. It treats all sporting breeds exhaustively. The illustrations are idealized portraits of typical specimens.

### Kennel Secrets.

How to breed, exhibit and manage dogs. By ASHMONT. The dog from the time he is conceived to the time he curls himself up for his last long sleep is treated from every standpoint that could possibly occur to a man of wide experience with dogs. Every important subject that has engaged attention has been fully discussed, generalities being held practically valueless and misleading. Illustrated, 344 pages. Price, $3.00.

### The Spaniel and Its Training.

By F. H. F. MERCER. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, $1.

### Scientific Education of Dogs for the Gun.

By H. H. Cloth. Price, $2.50. The instructions are the result of the author's amateur practical experience of 37 years. *Forest and Stream* says: "This work is a very well written treatise upon the subject, containing some new ideas and much that is interesting and instructive to the new beginner as well as not a little that will be beneficial to even old hands to study."

## YACHT AND CANOE.

### Small Yachts.

Their Design and Construction, Exemplified by the Ruling Types of Modern Practice. With numerous plates and illustrations. By C. P. KUNHARDT. New ed., 470 pp. of type and illustrations and 87 plates. Size of page, 14½×12½. Price, $10. This book is intended to cover the field of small yachts, with special regard to their design, construction, equipment and keep.

### Steam Yachts and Launches;

Their Machinery and Management. By C. P. KUNHARDT. With plates and many illustrations. New ed., 267 pp. Price, $3.00. A complete review of the development and present status of the marine engine and boiler as applied to steam yachting.

### Canoe and Boat Building.

A Complete Manual for Amateurs. Containing plain and comprehensive directions for the construction of Canoes, Rowing and Sailing Boats and Hunting Craft. By W. P. STEPHENS, Canoeing Editor of *Forest and Stream*. Cloth. Fourth and enlarged edition, 264 pages, numerous illustrations, and fifty plates in envelope. Price, $2.00.

### Canoe Handling.

The Canoe: History, Uses, Limitations and Varieties, Practical Management and Care, and Relative Facts. By C. BOWYER VAUX ("Dot"). Illustrated. Cloth, 168 pages. Price, $1.00.

### Yacht Architecture.

By DIXON KEMP, Associate of the Institute of Naval Architects and Member of Council. Second edition. Super-royal 8vo., 530 pages, numerous plans and designs. Price, $16.80.

### A Manual of Yacht and Boat Sailing.

By DIXON KEMP, Associate Institute of Naval Architects (Member of the Council), 750 pages, with numerous plans and designs. Price, $10.

**THE ILLUSTRATED CATALOGUE OF FOREST AND STREAM BOOKS WILL BE SENT FREE.**

# FOREST AND STREAM.

## A WEEKLY JOURNAL OF THE ROD AND GUN.

TERMS, $4 A YEAR. 10 CTS. A COPY. SIX MONTHS, $2.

NEW YORK, SATURDAY, NOVEMBER 17, 1894.

VOL. XLIII.—No. 20. No. 318 BROADWAY, NEW YORK.

CONTENTS.

**Editorial.**
A Form of Buck Fever.
End the Joke.
The Howell Case.
Snap Shots.

**The Sportsman Tourist.**
Another Moose.

**Natural History.**
Do Foxes Climb Trees?
Was it Suicide?
Some Unnatural History.
A Peculiar Partridge Trap.

**Game Bag and Gun.**
A Maine Hunting Trip.
Wisconsin Wanderings.
Chicago and the West.
Texas and the Southwest.
A Floating Battery Taken in.
The Long Island Deer Season.
Boston Shooters.

**Sea and River Fishing.**
Trout in Colorado Springs.
Taking Salmon with a Spoon.
Angling Notes.
Rainbow Trout in the South.
The Big Pike-Perch.

**Fish Culture.**
The Vermont Commission.
A Greenwood Lake Poacher Taken In.

**The Kennel.**
The U. S. Field Trials.
Brunswick Fur Club Trials.
International Field Trials.
Altcar Club Meeting.
Dog Chat.

**Yachting.**

The FOREST AND STREAM is put to press on Tuesdays. Correspondence intended for publication should reach us by Mondays and as much earlier as may be practicable.

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

SEE REDUCED HALF-TONES IN OUR ADVT. COLUMNS.

The plates are for frames 14 x 19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream** *one year and the set of four pictures*, **$5.**
**Forest and Stream** *6 months and any two of the pictures*, **$3.**
Price of the pictures alone, $1.50 each; $5 for the set.

Remit by express money order or postal money order Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

### *A FORM OF BUCK FEVER.*

SOME time ago when one of the accident insurance companies was introducing the coupon system of free insurance, there was some talk of providing a thousand-dollar policy to be given to every holder of a copy of the *Game Laws in Brief*. The plan was abandoned for good and sufficient reasons; yet we are inclined to believe that such a policy attachment of the *Brief* would have filled a long felt want for the Long Island deer hunters.

The conditions of hunting down there are peculiar. The available area is restricted to a ridiculously small territory. The open season is extremely short, and the hunters come in droves. The man who goes deer hunting on Long Island veritably takes his life in his hands, and before setting out he should arrange his business affairs, make his will, take leave of his family, provide himself with an accident policy for a good round sum, and abandon hope. If the hazard attendant upon the sport shall be augmented during the next five years as it has been in the last five seasons, and the New York law shall remain which makes attempted suicide a crime, the lawyers will have to determine whether the sportsman who voluntarily goes deer hunting on Long Island does not thereby render himself subject to the penalty for intended suicide. When a member of the FOREST AND STREAM staff went down to Long Island last Saturday he made the perilous trip purely as a performance of duty, and when he returned thanked his stars that he had come back whole.

On the following Monday a fatal accident occurred on the Long Island deer grounds. A hunter was mistaken for a deer and mortally wounded by one of his companions. The man fired without knowing what he was shooting at, and a cry of agony told him the result.

It is the old story of reckless shooting that comes up again and again, and than which there is no class of shooting accidents more to be blamed—not even the "didn't know it was loaded" class. Of course the man who did the shooting is overcome with grief, and the genuineness of his sorrow has no doubt brought public opinion over to his side and exonerated him so far as public opinion can, but nothing will ever undo the work of that one rash moment. A human life has been sacrificed with less than trivial excuse. It is hard to imagine what in the realm of sanity can prompt a man to shoot at something not seen and not perfectly recognized.

Such disregard of all laws of common sense and prudence can only be accounted for by the theory that this is a sort of temporary insanity produced in certain minds by excitement, which overpowers and annuls their better judgment. It is as a fearful and fatal phase of "buck fever;" and one that is all the more horrible because the victim of the malady is not the individual who is himself possessed of devils, but some other innocent and unsuspecting person upon whose devoted head the subject's temporary aberration wreaks its woe. We have recorded now and then an instance of the ordinary type of "buck fever" so severe that the afflicted person has died of heart disease. These cases are extremely rare; but this form whose victim is another is distressingly frequent; we have noted its occurrence scores of times; we shall have occasion to record new cases so long as deer hunters shall lose their wits. In large assemblages of hunters, such as those which annually come together on Long Island during the deer season, there will always be found some irresponsible and criminally foolish individuals who are a menace to the safety of all others.

### *THE HOWELL CASE.*

THE case of Edgar Howell, who killed the buffalo in Yellowstone Park last winter, was to have come before the court in Cheyenne this week.

When Howell was arrested by Scout Burgess, it will be remembered, he was taken to Mammoth Hot Springs and put into the guard-house, where he was kept for a period and then escorted out of the Park with an admonition from Capt. Anderson not to come in again. Subsequently he did go into the Park, and was arrested, confined several days in the guard-house, and then taken before Commissioner Meldrum, and tried upon the charge of having disobeyed Capt. Anderson's order not to enter the Park. Of this he was found guilty and was sentenced to confinement for thirty days in the guard-house and to pay a fine of $50 and costs. He took an appeal to the United States District Court of Wyoming, giving bail for his appearance at Cheyenne. Subsequently entering the Park he was again summarily ejected.

In the present stage of the case the original offense of killing buffalo in the National Park is not involved, except in so far as this was the occasion of Howell's confinement and expulsion. The point to be determined—and a very interesting point it is—relates to the interpretation of the regulations made by the Secretary of the Interior providing for the expulsion of offenders from the Park. Under this rule Howell was expelled. What did that expulsion mean? Capt. Anderson, on the one hand, has held in practice that when a man is expelled he must remain without the Park limits. Howell, on the other hand, bases his appeal upon the contention that once put out of the Park he had in being expelled paid the penalty; and was then free to go back. The precise language of the regulation reads that an offender shall "be summarily removed from the Park." As to whether he may turn right around and come in again with the guard that escorted him out, or whether he must stay out for a year or for all his life, there is absolutely nothing in the regulations.

ONE who is described as an "active, thoughtful shooting man and a thorough sportsman withal," relates that on three occasions within the past dozen years he has observed hawks in full and fierce pursuit of grouse, and he therefore wants the State to provide a bounty which shall encourage the destruction of the hawk tribe. That was once the accepted attitude of hostility to the hawks, maintained and justified by most people. It is no longer held by intelligent and well-informed people. Careful and systematic study of hawks has demonstrated the fact that their services are of decided usefulness to mankind. They may kill some game but they destroy vermin as well, and could ill be spared by the farmer and fruit grower.

### *END THE JOKE.*

THE FOREST AND STREAM has nothing to do with politics, that is to say, it should have nothing to do; and as a matter of fact it would let politics alone, if politics would let alone those special interests with whose promotion this journal is concerned. When a fish commission is made the sport of political schemers, and when a game protective force is controlled in any degree by considerations of party or factional advantage, it is high time for some one—even if he be not a partisan—to speak out.

We will not go into the recent history of the New York Fish Commission. Most people who know anything of it will recall that a few years ago the most intelligent and efficient member of the board was ousted from his place because he did not train with the political adherents of the Governor then in office. And it is a familiar piece of history, too, that the places once filled by men interested in the work of increasing and protecting the fish supply have been filled in one instance at least by men who took their appointment as a huge joke and have so regarded it ever since. A commission constituted of joke commissioners is a joke commission. The fisheries and game interests of the State of New York are of altogether too high importance to be intrusted to the jocular administration of jokers.

Is it not about time to have done with the New York Joke Fish Commission? Now that there is to be a change of administration in the State, and that numerous commissions are to be made over new, would it not be well to give some attention to this board? There ought to be some new timber in it. Whether the new material be Republican or Democrat or Prohibition does not matter, so long only as it shall be sound and serviceable. But for one thing give us no more joke.

There are too many members in the board now. The work is done practically by one man. A single-headed, responsible, accountable, paid commission would be more efficient than any other. If we cannot have that, reduce the number to three.

It will require legislation to institute such a new order of things. The Legislature of 1895 will deserve public gratitude if it shall rid us of the jokers.

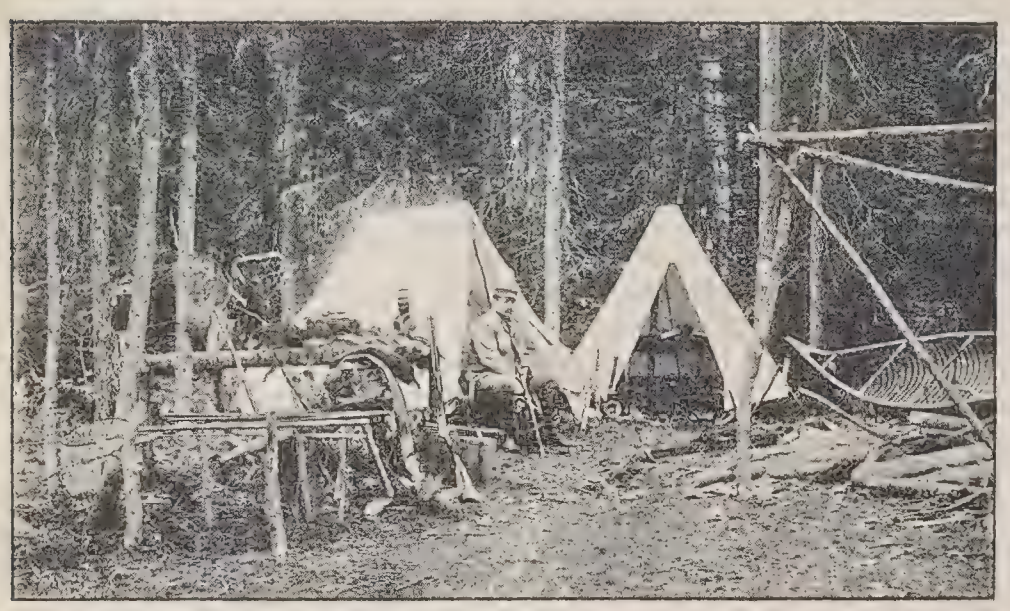
### *SNAP SHOTS.*

DR. WILLETT KIDD, of Newburgh, N. Y., tells us that in September of this year he saw a flock of some forty wild pigeons just west of Orange Lake, in Orange county. Several flocks have been reported as seen this year in Sullivan county, and it is said that the birds were so numerous in the neighborhood of Rome, N. Y., that the netters set about netting them. Is the wild pigeon coming back, even in feeble numbers, to the old-time Eastern haunts? If there is any probability of this, we should lose no time in adopting measures to give it protection.

The American Ornithologists' Union held the twelfth annual congress at the American Museum of Natural History, in this city, Nov. 13 to 15. Fifteen active members were present. The officers chosen for the new year are: President, Dr. Elliott Coues; Vice-Presidents, Wm. Brewster and Dr. C. Hart Merriam; Secretary, John H. Sage; Treasurer, William Dutcher; Council—Dr. J. A. Allen, C. F. Batchelder, C. B. Cory, D. G. Elliott, Frank M. Chapman, R. Ridgway, Dr. L. Stejneger.

The assertion by Gov. Woodbury in his letter accepting the resignation of Fish and Game Commissioner John W. Titcomb, is not a whit exaggerated. Mr. Titcomb's retirement from the office will be a decided loss to the Commission and to the State; he was one of the most intelligently interested, active and enthusiastic men of the day holding such office. Together with all who have noted the progress of the Vermont fishcultural and protective interests under Mr. Titcomb's admihistration, we regret that he should have given up active direction of the work. We need more Titcombs in our fish commissions.

About the jaybird and his Friday trips to the infernal regions—have any of our Southern readers other versions of the tale than those already given by correspondents as current among the negroes of Florida and Louisiana? In Florida one story has it that the birds carry with them each a grain of sand; and in another version they carry corn. In Louisiana the sand story is told, while others aver that the bird carries bits of wood to add to the fires. It would be interesting to compare the varients of the story as told in different parts of the South.



# The Sportsman Tourist.

## ANOTHER MOOSE.

SOMEBODY has said that "History repeats itself." It so happens that exactly one year ago to-night I sat at this same desk and endeavored to answer your question of how I got "my first moose," the story appeared in your issue of Nov. 4, 1893. Well, as they say in the circus, "Here we are again." You may recall that the killing of that moose occurred at about seven o'clock on Tuesday evening, Sept. 19, last year. The game I shall tell you of to-night I called down, and shot *at* on the same day of the week, the same hour in the evening, and on nearly the same day of the month this year, and it seems to me that in this case, history has made a very creditable effort to sustain prophecy.

Moreover, this year's moose is very nearly the counterpart of that of last year, the antlers being almost exact duplicates as to spread and size, and the weights of the two moose were, I should judge, very nearly the same.

Another summer has come and gone, another vacation season has passed. How differently men have spent it. I speak, of course, of the business or professional man—not the man of leisure—but of him who toils with muscle, wit, or brain, for forty or fifty weeks in the year, and counts himself fortunate to find leisure for a few weeks or even days. To such a man the word vacation has a deep and gladsome meaning. To him it means for a brief season, emancipation, freedom from care, cessation of toil, rest for the brain.

"OUR COZY LITTLE TENT."

I have often been struck with the diversity of tastes existing among business men as to the manner of spending their vacations, and with the fact that so few of them adopt the woods, camp and trail.

Of course it is a case of "every man to his taste." There is undoubted pleasure in the ocean voyage, recreation and delight at the seaside resort, and in the mountain retreat.

The tour of the pedestrian, the cycler or the rider all have fascinations and delights peculiarly their own. But to me, it seems that nothing in the way of an "outing" can for a moment compare with the hunting of "big game." Here, in fact, we have almost all the recreations rolled into one—the journey by rail or boat, staging, or coaching if you please, tramping—or shall I say pedestrianism?—boating and canoeing, fishing and shooting, for where big game abounds there may you look for the wily trout and the toothsome partridge. For the photographer, painter, botanist or scientist, where can be found a better field than that afforded by the vast wilderness of forests, lakes and mountains of our own State of Maine or our neighbor's Canadian wild woods? Here we have vast pleasure grounds really very accessible, all things considered, whither the artist, scientist, sportsman or mere lover of nature may easily repair when his short season of leisure is at hand. And yet, as I have said, how few comparatively of our business men avail themselves of these magnificent forests for the purpose of recreation or hunting?

Feeling thus, I need hardly tell you that when the time for my vacation came, my mind was made up as to where and how to spend it.

Did you ever go into camp for the purpose of hunting or fishing? If so, you will know how a man feels when he realizes that the day for his departure from the city for a taste of life in the forests is near at hand. How his hunting "toggery" is pulled out of nooks and closets and repairs made or new pieces added; the fishing tackle is taken down and rubbed up; rifle and shotgun br ught forth, inspected, cleaned and oiled. How impossible for him it is at this time when walking the street, to pass a window where these things are so temptingly exposed for sale without stopping to look at them. To a man about to start on a hunting and fishing trip the humblest of "sporting goods" windows have an almost irresistible attraction, and he is resolute indeed who can pass on without entering the store to inquire about some new trinket that has caught his eye. A great many things are to be thought of at such a time. There are the camp supplies to be bought. It is not an easy thing to know just what to provide for a given number of men for a given time—just what to buy, how much to buy and what not to buy. But there is one thing that should always be steadily borne in mind, which is that in moose, caribou or deer hunting every pound of whatever nature (and this of course includes tents and canoes) will have to be carried more or less. I know of no good hunting grounds where this is not the case. Hence luxuries should be rigorously excluded and necessities reduced to the minimum. What are necessities? I should say in a general way flour (which should be "self-raising"), and of this you may confidently provide one pound per day per man, bacon, pork, potatoes, sugar, tea and coffee. Canned beans are palatable, nutritious and convenient, but heavy to carry. Dried beans are preferable if you know how to prepare them in camp. Where big game abounds partridge and trout are pretty sure to become a prominent part of the daily menu, and with the provisions I have named a most excellent meal can always be prepared. Butter, of course, must be classed under the head of "luxuries," but I am free to confess that it is the one luxury I cannot exclude. Of course we must not forget the condiments, but they are inconsiderable as to weight.

Then there are the guides to be engaged, and arrangements made as to time and place of meeting them. All these things, and many more are occupying the mind of the prospective hunter long before the day of departure arrives, but all is a pleasure, and, indeed, I sometimes doubt just where the greatest pleasure of a vacation of this nature really lies; whether it is in the anticipation, the realization or the retrospection. Of a fairly successful trip I am inclined to the last, for anticipation may be alloyed with much doubt, and realization is certainly shared with considerable physical effort, and it may be with some keen disappointments, but when all is over, obstacles overcome, the end sought attained, or even partially attained, you are home again, life's thread again taken up, and you look back upon the trip as a whole, the whole becomes a pleasure, and a pleasure, too, with very little alloy.

I left New York this year on Saturday evening, Sept. 15, for Montreal, my destination being Deux Rivieres, Ont., a station on the Canadian Pacific Railway, some 300 miles west of that city, where I arrived early on Monday morning, the 17th. I had written Mr. Richardson, who keeps a small hotel in the place, to have a buckboard in readiness to take me in to Hurdmann's lumber depot, sixteen miles north from there, where I was to join a friend who had preceded me, and where all supplies had been sent, and where I was to meet my guide. Consequently I went in "light," as we say, having only my rifle, trout rods and photographic outfit to carry, and the journey was made in about six hours. "Six hours for sixteen miles" you say? Yes. Wait till you see that road, and you will not doubt my statement. The road is very rough, and it matters not how light you may be, it is impossible to go at a faster gait than a walk.

At Hurdmann's I met my friend and two guides and an extra man we had engaged for cook and general utility man. Geo. Crawford, a famous guide in those parts, guided my friend, and Peter Le Claire was assigned to me. He is another most excellent man, half Indian, and a hunter of the very best class, indeed, I think I have never met a man in whom the hunting instincts were stronger or more unerring. His is the eye of the hawk, the ear of the hare, the quickness of the cat, and the endurance of the camel. Israel Tailleur was our cook and extra man. A good-natured fellow is Israel. As sure as he opens his mouth he says something, and as sure as he says something he laughs. I really believe that man was born with a broad smile upon his infant face, which he has never been able to overcome. I somehow conceived the idea when I first saw him, that his name was Hiram, and in spite of all I could do "Hiram" he remained to me during the entire trip. These three men are all from Mattewa, Ontario, and were furnished us by Mr. Rankin, the agent of the Hudson's Bay Company at that place.

An early start was made from Hurdmann's on Tuesday morning, and, after a hard day's work by canoe and portage we reached our camp on Hamilton Lake, some twelve or fourteen miles further north, just at nightfall. This lake, which is about four or five miles long, and from one to two miles wide, is one of the most beautiful bodies of water I ever saw. It contains a number of small islands, all of them rocky, but covered with a picturesque growth of birch, maple, tamarack and fir, and is surrounded on all sides with mountains, or perhaps I should say high ridges, covered with a similar growth from their summits down to the irregular rocky shores. In late September, when the early frost has tinted the hillsides and islands, the lake presents a gorgeous picture of almost indescribable beauty. We had hunted moose upon this same lake last season, and although unsuccessful at this particular place, had seen many signs of the animal on and near it. Especially was this the case in what we call the Thoroughfare, a tortuous stream a mile and a half long connecting it on the south with Rascicot Lake, but we were greatly disappointed this year by the almost total absence of signs either about the lake or in the Thoroughfare. However, we considered it the most likely place for moose, and Wednesday, Thursday, and Friday evenings were spent there in calling. But the week ended with no results, and with all signs of a storm approaching, signs which were fulfilled, for Saturday, Sunday and Monday, were spent for the most part in our cozy little tent. Stormy, blustery weather is the moose caller's especial aversion. Othello like, "his occupation's gone," and, for one whose time is limited, and who is intent on moose and moose only, such days are apt to drag. An occasional tramp through the wet bush for partridge, or an hour or two of casting or trolling for trout, alternating with some "yellow back" literature and a great deal of tobacco, made up the sum total of those three gloomy days.

Tuesday dawned, still storming, but it proved to be the lucky day. Toward noon cloud and sunshine had a struggle, and by 1 o'clock sunshine had the best of it, and Old Sol once more gladdened us with his genial face. The wind, which had been blowing a gale, gradually subsided, and the evening was clear, cold and still. Moose calling that night was of course strictly in order. My friend and Crawford chose the thoroughfare, while Peter and I started for the lower end of the lake.

A moose caller's outfit should consist of a canoe, a rifle, a jack lamp and a moose horn. The canoe should be light, but not cranky; that is to say, it should be as steady as possible to have it, in order that you may sit easily and comfortably, and have the free use of your body and arms. Remember, you are now going upon an expedition of silence and strategy, and the loss of a moose might easily be the result of a slight tip of the canoe, causing foot or rifle or paddle to make just a little noise. If the canoe is cranky, put in some ballast. The rifle, well, there are many good ones, but for moose it must be of large caliber, with plenty of powder behind the bullet. Mine is a .45-90 Winchester, full magazine, and as it has never failed me, of course I pin my faith to it. The jack will probably be a Ferguson if you buy it in these parts, for I find no other on sale. The horn is made of birch bark, and is usually about 15 or 20in. long. Such was my outfit as Peter and I left camp at about 5 o'clock on that Tuesday afternoon. What occurred I will try and tell you in the plainest possible way.

As we paddled away from camp, around the first point, and turned our canoe northward, I was struck with the perfection of the evening. Scarcely a ripple stirred the bosom of the placid lake. The wooded ridges on either side of us were clearly outlined against a cloudless sky; the tall and shapely spruce tops stood like rows of steeples, motionless and sharp. The merry crackling of our campfire died away behind us, and all was silence save the gurgle of the water at the bow of our canoe. Two or three miles of paddling lay between us and our intended calling place at the lower end of the lake. "Beautiful evening, eh, Peter?" I said as I plied the paddle from the bow end of the canoe. "Yes, it is," replied Peter from the other other end, and he lost a stroke or two while he quietly knocked the ashes from his pipe, and tucked it in his pocket. I presume it had struck him that it was just as well to have no unnecessary incense floating around when going after moose, which idea, if he had it, I most thoroughly indorse. Then dead silence for at least a mile. "Likely night for calling," I remarked.

"Fine," said Peter.

"And oh, Peter, I have intended to say this to you before, but I will say it now: in case I ever get a shot from the canoe, no matter where or when, always remember to swing the canoe around so that I can shoot to my left, if it is a possible thing to do so."

"Oh, I understand that," replied Peter, "good deal easier to shoot that side."

"That's the idea; and I thought you might not think of it when the time came."

I think this was every word that passed between us until the extreme lower end of the lake was reached. Some time before reaching this point I had stopped paddling and quietly handed the paddle back to Peter so that he could place it behind me without noise. Then I took up my rifle, noiselessly opened the breech to see that the cartridge was in its place, cocked it without letting it click and laid it across my lap. At this time the canoe was just moving a little and Peter was propelling it with the paddle without taking it from the water, so that not even the sound of a drop of water disturbed the almost absolute silence. I motioned to Peter with my hand to stop, took up my moose horn and made the first call. I wish I could describe the stillness that followed the echo of the call, but that is impossible. You must imagine yourself away from civilization, in a spot where no human sound is heard. Then picture a clear, cold, absolutely still night, above you the blue starlit sky—every one of the myriads of stars seeming unusually bright in the immense dome above; beneath, the bosom of a silent glassy lake; on every side the gloomy shores, and back of them the dense and silent forest. If you can imagine this, if you can imagine the total absence of anything human, you can possibly realize the hoarse call of the moose horn, abruptly breaking this intense stillness, you can hear the reverberating echoes rolling across the lakes and resounding from the hillsides, until they die away in the distance.

"SUCH WAS MY OUTFIT."

Imagining this, you will understand that, should there be an answer ever so faint or ever so far away, your straining ear would be keenly attuned to catch the slightest sound. After an interval of about ten minutes I called again. How the echoes rolled away among the hills! I listened with bated breath. Hark! What was that? An

answer! No, it cannot be! But, yes, it is! Twice have my ears caught the sound. Now my heart begins to jump. Who can pen the thoughts that rush like mad through the brain at such a moment? How will this end? Can I keep still and make no noise that will give him warning of his danger? My nostrils become inadequate for my breathing. I find that my mouth is open, my chest heaving and my heart thumping like a trip hammer. But I speak not a word, nor does my guide. Listen! I have not heard him for some moments. Could I have been mistaken after all? I will call. Ah! there he is again. All doubt now vanishes. The moose is coming. I shall certainly see him, at any rate.

Yes, nearer and nearer he comes. Hear him grunt! Hear the antlers ring as they strike the trees. Oh, this is too good! How unerring have been his instincts. It seems to me that I can see him as he rushes down toward the lake in a straight line for the spot where we lie in our canoe snug up to shore under the overhanging bushes. And still on he comes. And yet not one syllable has passed between Peter and myself; not the faintest suspicion of a sound has either of us made. Once more the moose is still, and for one instant doubt and fear enter my mind. I know that he is very near us now, probably not more than 300ft. away, but the dense growth of alders along the shore of the lake makes it impossible to see him in the gathering darkness. "Were it daylight," say I to myself, "I might see him." And then I think, "What if he should see us, or smell us?" Thank heaven, there is absolutely no wind, but that doubt and fear will not down. I am afraid to call for fear he will discover the trick. And so I sit and watch and wait. Peter has kept the canoe close to the shore, and we are pretty well hidden by the bushes.

My excitement is all gone, lungs performing their functions in a perfectly natural manner now. Doubt has taken the place of every other feeling. I am afraid he is suspicious and is going to give us the slip. He has not made a sound for several moments. He is still; so are we. But great Scott! Hear that! He suddenly gives one unearthly grunt, and at the same moment I see the broad shovels of his antlers above the bushes, not 200ft. away. I feel the blood rush to my face. Instinctively my finger seeks the trigger of my rifle, and my left hand closes with a tighter grip upon the barrel, but I cannot shoot yet, I can see nothing but those antlers. And I still sit and wait and watch them. The moose is straight ahead of me, and I begin to think I had better estimate for his body and fire. One fatal sound now and all is lost. I am sure he is suspicious or he would step into the water. He is wary and is listening. Just now I feel that the stern of the canoe is slowly swinging outward. I recall the conversation with Peter, and I interpret it to mean that he too, thinks I had better fire, and that he is swinging the canoe around to make it as easy for me as possible. This decides me, and I raise the rifle deliberately to my shoulder. There is still sufficient light to see both sights plainly, and, guided by the antlers, which are all I can see, I aim for what I think will be his left shoulder, and press the trigger. The echo of my piece is not repeated before I have pumped in another cartridge and have sent another bullet speeding after the first.

As the smoke cleared from in front of me I caught sight of the head and antlers some 20ft. to the left of where he had stood when I first fired, and without a moment's hesitation I fired a third shot. This time he gave a quick jump and disappeared in the bushes. With a few strokes of the paddle Peter sent the canoe flying across the little bay in which we were to the spot where he had disappeared. As the boat touched the shore we both leaped upon the bank and entered the woods, but only darkness confronted us, we could not see nor hear anything of the moose. Peter started into the thick underbrush without a word and I followed him as best I could, but darkness had now made walking very difficult. At every few steps he would stop and peer into the gloom ahead, and listen intently, but we saw nothing and heard not a sound. Finally I whispered to Peter: "Do you think I hit him?"

"Of course you did," said Peter, in the most assuring tone, "didn't you see him jump?"

"Well, what shall we do?"

"Wait here a minute; I'll go in a little further and see if I can see anything." And he disappeared for a minute or two into the now thoroughly darkened woods. He soon returned, however, and a whispered discussion ended in the conclusion that if I had killed him he was safe. If I had severely wounded him we could certainly trail him in the morning, and if I had missed him altogether it was useless to attempt to follow him that night. This being settled, we went back to our canoe and rapidly paddled to camp, where we were soon joined by my companion and Crawford, who eagerly inquired, "What luck?" As an illustration of the clearness of the atmosphere upon the night of which I write, and the distance sound will travel across these lakes, it is worth while recording that although my friend and myself were separated by the entire length of the lake and nearly the length of the thoroughfare, my three shots had been very distinctly heard by him, although the distance was surely five and perhaps six or seven miles.

You may be sure there was much discussion in camp that night before we retired as to the chances of my securing my moose; all of the details of the calling and shooting were gone over, explained and commented upon, and I think that all agreed that my chances were good. But as for myself I must say that I was full of doubt, and I am free to confess that my sleep during the night was not of the soundest. The moose was on my mind and for a long time the thoughts of him and the excitement of calling him down banished sleep. As I lay upon my bed of fragrant fir boughs it seemed to me that I was back upon that quiet little bay sitting in my canoe and again listening for that echo-like answer. That I was again waiting and watching to get a shot at the wary game. In fancy's realm I was already tracking him in the early morning. Peter and I were back at the spot where I had last seen the moose. I could fancy how cautiously we would follow the trail. All that my experience in woodcraft had taught me, all that my guides had ever told me, and all that I had ever read of trailing and "still-hunting" passed through my mind. How that silence, absolute silence, when trailing, is the first consideration. The smallest details all came to my mind as I lay there trying to forget myself in sleep, how that in stepping into or out of a canoe you must make no noise. When you step in the canoe you must put your foot squarely in the center of the boat, toe toward the bow, the weight of the body perpendicularly over the foot in the boat, and then she settles squarely into the water without tipping or swaying, and no noise. In stepping out, again there is method if you wish silence—yes, and

"He Rolled upon his Side—Dead."

comfort and safety, too; rise upon the leg the last to leave the canoe, the foot again squarely in the center—step out sideways, but remember, the canoe, relieved of your weight, is going to follow your foot upward, so remove the foot slowly until this has happened, and the trick is done—no noise, no splash, and no wet feet. In picking up the rifle or paddle when in the canoe lift them gently and squarely, don't drag them toward you. Then the trail, all the little points to be observed seemed to marshall themselves through my mind as if to prompt me for the task when the day should dawn. Here, even more than in the canoe, must silence be observed. Carry nothing that will clang or rattle, the rifle in front of the body, not over the shoulder, where the barrel will strike trees or branches. Step over, not upon, twigs, stones, or dead sticks. Avoid brushing against bushes and branches, but take them in the hand as you approach and bend them out of the way, gently releasing them as you pass. And so my thoughts ran on. I thought of the shooting, and wondered if I had observed the rules I have always laid down for myself. You can't hit anything if you are over excited. You must see both sights upon your rifle, and you must settle your eye carefully into both before you press the trigger. You must hold steady, and you must pull with the finger, not with the arm, or the chances are you will pull the rifle off the mark. Had I shot carefully? It is true my shot had been under adverse circumstances. Had I hit the moose at all? These and a thousand other thoughts crowded through my mind ere slumber came, but I rather astonished myself, and I think both Peter and "Hiram" too, by being up and dressed at six minutes past three in the morning! Our good-natured *chef*, however, soon had the camp-fire going, and Peter and I tucked away a substantial breakfast of fried bacon, potatoes and coffee, and a few minutes after four saw us again heading for the scenes of the night previous. We were certainly on time, for when we arrived at the little bay it was not yet light enough to trail our game, but we landed at the spot where we had last seen the moose, and Peter soon began to scan the ground, and now I was to be shown my guide's wonderful acuteness in following a trail. As we stepped from the canoe to the shore the dawn of day was just rendering distinguishable small objects upon the ground. We advanced a few paces into the woods, Peter with his eyes carefully scrutinizing the ground at each step, while I was eagerly looking ahead of him with the hope that I might see the moose. We had gone but a very few paces when he stooped, and, picking up a little piece of moss, looked at it a moment intently and then whispered, "Blood." I shook my head doubtingly, for I thought he was mistaken, and that what he thought was blood was really maroon-colored moss, but at that moment my eyes fell upon the fallen trunk of a white birch tree over which the moose had stepped, and I could plainly see upon the bark a great red blood splotch as large as the crown of my hat, and to which I eagerly called Peter's attention. I was now convinced that he was right about the blood-stained moss; and from that instant, hope and confidence took possession of me, for I felt sure that the moose was too badly wounded to escape us, and in fact from the additional blood spots upon the leaf strewn ground which we were now finding at almost every step, I began to think that it would be a dead moose when we found him. At every turn I expected now to come upon the animal, stretched there dead in the gray of the early morn. But it proved I had misjudged the wonderful tenacity of the moose, for we tracked him through the dense forest for a good two miles before we found the first signs of his having halted in his retreat, and it was over this exciting trail of two miles through what appeared to me at times an almost impenetrable thicket that Peter's wonderful powers as a tracker were so impressed upon my mind. Where the ground was soft, of course it was comparatively easy to track the moose, but often we would come out upon a wide area of open timber, upon firm ground, and this too covered with a thick carpet of freshly fallen leaves where the foot of the beast, to the unpracticed eye left not the slightest imprint. Even Peter's wonderfully trained sight would occasionally be at fault, but crouching close to the ground he would describe a circle about the last distinguishable footprint and would soon again strike the trail. To me it was simply wonderful. At the end of about three miles we were rewarded by finding three imprints of the moose's body where he had lain down as many times in a comparatively small area, and confidence immediately became conviction that he was a badly wounded beast, that our "scent was hot" and that his capture was certain. And so it proved, for not 100 yards from this spot we came upon him. Peter saw him first — halted and pointed straight ahead. My eye followed the direction of his finger, and there I saw the object of our search walking quite rapidly from us, his huge body and antlers swaying to and fro as his enormously long legs carried him with great strides through the thickly growing timber. I do not think he had heard us.

Instantly I raised my rifle and fired two shots in rapid succession. One shot at least took effect, and at the sting of the bullet he threw down his head, and with an angry snort swung sharply around toward us; but as he turned I dropped upon my knee and a quick shot sent a bullet into his right side, in the region of his heart. He was about ten rods ahead of us and I could see the blood spurt from his side in a stream as thick as my finger, as with one mighty grunt he fell headlong toward us. One desperate struggle of his mighty frame to regain his feet, and he rolled upon his side—dead.

The chase had been an exciting one, and the interest had never flagged since my ear caught his first answer to the call of my horn the night before. As I stood over his prostrate body I thought I could indeed say with Tartaran, "This is hunting!"

The spot where the moose had fallen was very near the water's edge in another bay upon the same lake, and Peter immediately went back to bring the canoe around. I had put my camera in the canoe, and when Peter came back, accompanied by the others from camp, who had started out an hour or two later to learn of our success, some pictures were made, as well as some accurate measurements with the tape line. I copy from a piece of birch bark whereon a record was made upon the spot, the following figures:

| | |
|---|---|
| Length, center butt of horn to round of rump | 7ft. |
| center butt of horn to end of nose | 1ft. 10in. |
| (Making length over all, 8ft. 10in.) | |
| Height, at shoulder (including hair) | 7ft. |
| at shoulder (against body) | 6ft. 9in. |
| point of hoof to knee | 2ft. 2in. |
| knee to top shoulder | 4ft. 7in. |
| at rump | 6ft. 4in. |
| point of hoof to center of shank | 2ft. 5in. |
| shank to rump | 3ft. 3in. |
| Spread of antlers | 3ft 8¾in. |

Such was the animal and such the manner of his capture. Another trophy is secured to become a lasting joy. For those who have hunted this finest of game, what I have attempted to describe may recall pleasant recollections of like experiences of their own; and if what is written here shall be the means of inducing some amateur sportsman to try his hand at "big game," resulting in the pleasure to him that I have just experienced, I shall feel that in an humble way I have been of some benefit to my fellow man.

L. C. Ivory.

New York, Oct. 12.

## Shooting Positions.

When hunting deer or other large game, just how do you take aim, when you have opportunity for a deliberate shot? There is Lew Wilmot, a more than average shot; and he sits down and shoots with a knee rest. Tell us how you do it.

# Natural History.

## FOXES CLIMB TREES.

In the northern part of New York city (which is city only in name) is a certain long strip of woods, through which runs a brook that converts the woods into almost a swamp. The brook is the stream which feeds Van Cortlandt Lake. This lot of woods by reason of its inaccessibility in parts, seems to be, or have been, a favorite nesting place for crows and probably hawks, although the New York & Putnam Railroad runs close along the eastern edge thereof.

About seven years ago (the incident was published in detail at the time in an obscure quarter; the publication not being at hand, I write from memory) I was passing through this place, particularly to find some early hawk's nest. I found a large nest in an oak tree about 35ft. (a low estimate) from the ground. The tree was an oak, about a foot in diameter at the butt, and was one of several that grew from a common base. I was examining the nest with a field glass, when I observed something fur-like, it seemed, softly waving in the wind. I hadn't the most remote idea what it was, so I began to pound the trunk. Evidently it was not a bird, for it did not stir. Then I commenced to thrash the shrubbery about, making all the noise at my command. But in vain. Then I resolved to climb the tree. I cut a green stick a yard long and started up—not the tree with the nest, but one of its fellows, which was so close that I saw that when I got there I would not be over 6ft. distant from the other. The green limbs of any size did not begin short of the altitude of the nest, but along the whole length of the trunks were dead limbs about as big as one's thumb. These limbs grew at short intervals, except at the bottom, so that the level of the nest was reached without trouble.

It was a little exciting, for I didn't know what I may have run up against. When I reached the level I saw nothing but a big round mass of red fur. It was the color and appearance of a red fox, but not even a foot or a bit of tail was visible to me. Then I climbed a few feet higher until I could look down upon the situation, and mapped out a plan of procedure. I saw that I could not use the club effectively, because several limbs grew over the nest so as to prevent a blow being struck from my position; so preparing for anything to happen I reached over the length of my arm and gave the thing a poke with the stick. It was a rude awakening or else the most magnificent piece of bluffing I ever saw. The fox—for such it was—rose upon its feet with the most astonished look. It all happened quicker than I can tell. The fox simply jumped up with the aforesaid look of astonishment and then to my dismay, without apparently waiting to think of the consequence, it sprang out of the nest or rather it tumbled into the air, and fell with a smack, not upon the ground, but fortunately into a large pool of water (for the woods were partially overflowed). Then I watched it slowly crawl out of the shallow pool with dragging brush, apparently none the worse for its long fall. The fox crawled into a thick place, and I came down, I am sure, as astonished as the fox.

That old crow nest undoubtedly had been the fox's home, to which it was accustomed to ascend. I could easily understand how it got out, but how it commonly got down it would be interesting to know. Hardly less extraordinary is the fact that the railroad track was but a hundred feet away, and many trains were passing daily.

But from the very day when I cautiously ventured to tell some intimate friends what I had seen, my reputation for accuracy of statement (which may never have been too good) passed beneath a cloud, I am sure. I feel that a person has no business to observe extraordinary things like that when alone. It certainly hurts his reputation.

Even now, when I am telling some little yarn to a friend, without the requisite affidavit and witnesses, I fancy I see a pained expression in his face, or else a certain absent-minded look in his eyes as if he were performing the necessary mathematical calculations to determine how much to shave off.

Now at length a gentleman, in Forest and Stream of Nov. 10, has come to the rescue, and he has done nobly, in having at least vouched for chasing a gray fox up a tree—strangely enough at a spot only a few miles distant from the scene of my own alleged discovery.

And now I learn that it is not uncommon for gray foxes to take to such trees as they can climb when hard pressed by dogs. Tappan Adney.

### Some Unnatural History.

Interlachen, Fla.—*Editor Forest and Stream:* I send you a rather curious bear story in case you might like to print it:

The garden of a Florida cracker was visited quite regularly by a bear early in the mornings. He seemed to wish for his breakfast at about the same time each morning, and would swim across a stream of water running between a thick hamak and the cracker's garden. Several mornings a big alligator tried to head him off and catch him, and those mornings the bear would turn around, swim back and disappear in the hamak and go without his breakfast. For several mornings he was watched by some of the settlers in hopes that there would be a fight between bear and alligator, but each time the bear preferred to lose his breakfast rather than to fight. Finally one morning the watchers were rewarded by seeing an alligator appear behind the bear soon after he entered the stream, apparently to keep him from turning back, and another alligator at about the same time appeared swimming toward him in front. The bear started to turn, but seeing an alligator behind he decided to keep on and fight the one coming to him in front. When they met the bear at once hugged the alligator and they sank together. The people watching saw bubbles coming up and quite a disturbance of the water. Suddenly the bear appeared near the garden shore of the stream, walking on his hind legs on the bed of the stream with the alligator hugged tight to him by his front paws. After the bear had walked to dry land he threw down his burden as violently as possible in disgust, and would have entered the garden, had he not been disturbed by the report of a gun which killed the alligator. The next shot brought down the bear as he started hurriedly back. Pretty rough on the bear, I think, after his victory. R. L.

### But Was It Suicide?

New Orleans, La., Oct. 24.—*Editor Forest and Stream:* Some time ago I read with interest in your paper the account of the suicide of a snake, and I have often wondered since then if animals do commit suicide. Last Monday I became convinced that they do.

A party of four of us left this city the other Saturday evening on the cutter yacht Elaine for a trip across Lake Pontchartrain to Mandeville, and reached that port a little before sunrise. After breakfast four of the party went fishing in a bayou near by, but caught nothing except an opossum, which they had treed and smoked out. The opossum was brought on board, dangling from a small pole, his tail having been passed through a split in one end of the pole.

After loafing around for several hours we decided to start for home, and the opossum was placed in the yawl boat for safety. We arrived at West End at 1 A. M. next morning, and tied up to the revetment in the new canal.

The next morning when we came to look at the opossum he was found hanging on the side of the yawl with his head under water; and on the side of the boat furthest from the revetment. He was dead, of course; but why he had allowed himself to drown I will leave to your readers to determine.

I consider that suicide is the proper verdict in this case, for I cannot see why the opossum should have taken the wrong side of the boat if he was trying to get to land, and even though he had done it through mistake and had fallen into the water, the pole held him in such a way that he could easily have climbed up on to the gunwale of the yawl.

We had supplied him with plenty of pecans and water, so neither hunger nor thirst could have driven him to desperation, and I do not think the pressure of the split pole could have hurt him very much as we had seen him asleep or "playing possum" the previous afternoon during our sail home. H. Harrison.

### A Peculiar Partridge Trap.

While out for a day's gunning recently through some favorite cover of mine that extends to the shore of Belfast Bay, I came out on the bank after having worked over most of the cover and meeting with fair success in getting what birds I found. I had six points from my dog and got five woodcock. Two partridges got up very wild, but a lucky shot stopped one of them which was handsomely retrieved by Victor. It was a lovely October day, quite cool in the early morning, but as the sun got well up overhead it became rather warm for rapid work, and as I came out to a small clearing on the bank overlooking the bay, I could not resist the temptation to sit down and rest, and admire the beautiful scenery. There was hardly a ripple upon the water, and the atmosphere was so clear that the hills in the distance and the villages and farm houses could be clearly seen, although many miles away across the water. While I was sitting there enjoying the bright sunshine, my attention was attracted by the action of my dog. He seemed to be trying to tear to pieces, or get into some lobster pots that had been left along the bank about 100yds. from where I was sitting. I called him away but he soon went back again. After watching him for a while I got up and went over where he was, thinking perhaps he had seen a squirrel or some other animal go in among the pots; but when I got there I was surprised to find a partridge in one of them. It was dead. It could have been dead but a short time. It was very poor, and evidently been starved to death. How it happened to get into the trap is a mystery to me.

I went to several small covers after this and managed to pick up three more woodcock and one more partridge. I got home about 4 o'clock in the afternoen, having passed one of those enjoyable days that long live in memory. Eight woodcock and two partridges are a fair day's bag for this section. Bob Black.

# Game Bag and Gun.

## WISCONSIN WANDERINGS.

On the steamer going from Green Bay to Sturgeon Bay a gentleman at my elbow pointed to a tiny steam yacht covered with wild rice stalks and remarked, "There is a law-breaker." Then a few more remarks established the fact that both of us were fond of field sports, and also both lovers of Forest and Stream. I learned later that the gentleman was Mr. Geo. F. Peabody, Wisconsin's Fish Commissioner, and a most genial companion. A remark that I intended to look after some partridge at Sturgeon Bay brought on a talk of them, their habits and the sport of hunting them, which lasted an hour, and at the end of it Mr. Peabody declared that we had had a very fine partridge hunt right here on the boat, better, perhaps, than if we had been having it in the woods, and I answered that at any rate we did not have to regret leaving any crippled birds in the woods.

At Little Sturgeon Mr. Peabody left the steamer to look after the State's whitefish interests, and intended to drive to Sturgeon Bay that evening, saying he would expect partridge of my shooting for breakfast. Arrived at Sturgeon Bay business was first and partridge next, but in ten minutes the business was arranged, and in thirty minutes more I was behind a good team and beside a driver who said he knew where the birds were.

We drove out four miles and stopped at an abandoned house. The driver got out and went a rod or two toward the stable, when up went three partridges. I was still at the buggy and could not see them, but knew what direction they went and started after them. Just after passing the spot where they rose one got up nearly behind me and flew back. Turning quickly I had a most beautiful shot, and the king cock partridge of that woods thumped the ground and bounced ten feet. The driver yelled "Good boy!" threw his hat in the air and let off a whoop that filled the woods with noise. I verily believe that fellow enjoyed it more than I did. He had a gun, and was so enthusiastic that I really was not "in it" any more. He put me in mind of a wild setter that scares up everything in the country, but the fellow enjoyed it so immensely I hadn't the heart to call him down. He told me where the two flushed birds went, and while I was looking them up he flushed two more a hundred yards to one side. I think he knew just where they were and wanted a shot at them himself. It was impossible to follow them, for the ground was so covered with logs and fallen tree tops, and the bushes were so thick and tangled that nothing but an axe could make its way.

The old logging roads were the only places we could go. Following one of these for half a mile we came to an abandoned field somewhat grown up with bushes. At its further edge six birds got up wild. The driver, as usnal, was ahead, and had the pleasure of two shots at them. I tried one shot to no purpose, so they were six good birds yet.

The driver plunged into the brush after them, while I walked along the road, hoping he might scare one my way. I had just turned into a side road, when one flew from the side of the road I had been walking in. Had I come ten steps further on this road, there would have been a fair, open shot, but as it was there were lots of bushes between me and the bird, but I remembered to not see the bushes and use both barrels, and cut some feathers out of the bird, but did not stop him.

Passing through a narrow strip of woods we came to another field, and walked along the edge of it, staying in the field, because walking in this tangle of brush could not be done. Presently two birds arose from the short grass 50ft. out in the field and 30yds. in front, flying off to the right, clear above the brush. Now for a double to be proud of, thought I, as the gun was thrown up 2ft. ahead of the foremost one, but I led him too much and only hit him in the head, whereat he turned and flew back, falling dead 40yds. out in the field. In anxiety to get this bird I did not shoot at the other one. It seems that in partridge shooting the unlooked for is always happening, and nearly always to the partridge's advantage too. Back yonder I had just stepped aside from an easy shot, and here, holding about 6in. too much, had lost me another good shot. I felt a little bad over it, but took comfort in the thought that I was not a game exterminator, and that two partridges were a very nice bag any way.

The driver said we would now follow the path that led to the Lake Michigan beach, then along the beach a quarter of a mile to a road that would take us to the team, but he did not know as much about it as he thought and could not find the road, so we walked along the beach for a mile and a half to a road that led back to the team. By this time dark came on and we drove to town. Mr. Peabody had arrived and it was worth something to see his enthusiasm when he was shown the big cock partridge. It was evidently an old patriarch, for we tried to eat it next morning and found it too tough to be chewed.

The sight of the birds and my acconnt of the afternoon's sport, stirred Mr. Peabody up so that when I offered to lend him some clothes and get him a gun for to-morrow, he could not resist the temptation, and we had a very nice day together over the same ground of the afternoon before, though very few birds were seen; Mr. Peabody getting one and I none.

Now, to the man who never does kill enough to satisfy him, this looks like a mighty poor hunt, and if killing was all there is to shooting, it would have been a poor one, but to the true sportsman, the man of manly sentiment, killing is very little of what there is to shooting. Verily, there is a wide difference between the killer and the sportsman. The killer goes out simply to kill. If he don't kill, and lots of it, he isn't satisfied, and I doubt if he is even when he does. What did I go for? To get away from the clang of locomotive bells, the everlasting rush and roar and strife of the city, to rest a brain tired with the battles of business competition, to get away from artificialities and be with nature, to be filled with pleasant expectations, and perhaps to make a shot or two, on which I may reflect with pride while I sit dreaming by the winter evening's fire, or even as I am whirled along in railway trains—and I had all I went for, though only two partridges were killed. I really think now that I am better satisfied than if I had killed two dozen. During that long walk along the beach, the killer would have fretted, and perhaps swore, at the loss of time and the long walk for nothing, while the sportsman would have fallen into the same train of thought and enjoyment as if he had come out on purpose for a ramble along that wild shore. Which, think you, enjoys his outings most, the killer or the sportsman?

Mr. Peabody and myself left on the boat for Green Bay that night, and there were two men on that boat whose wave-rocked sleep was sound and dreamless, and while they awoke a little sore in body, they were refreshed and strengthened mentally.

At Green Bay I called on and introduced myself to Mr. John Hanlon and his good setter dog. They both love shooting and are great on woodcock and partridge, both of which have been reasonably plenty this fall within a few miles of town. John regretted (and so did I) that his foreman was away on a deer hunt, so he could not spend two or three days with me.

Eighty miles west of Green Bay is Wood county, almost in the geographical center of the State. The southern half of this county is an almost unbroken wilderness of hardwood forest and marshy prairie. A year ago I had good reports of many partridges and sharp-tailed grouse in this region, but at Grand Rapids, in the same county, I was told that fire had swept everything and there was no hunting there. It is supposed that many of the birds perished, as in more than one instance they were seen to get bewildered in the smoke and fall apparently into the burning grass.

I was told there were many partridges at Arpin, eighteen miles northwest, and that George Goodman had a good partridge dog and was acquainted at Arpin. After a long walk I at last found George in the woods chopping poles, and told him what I wanted. He said he would like to go but could not spare the time. I asked him if he meant that the work must be done, or that he must have the wages; he said the wages were all that he was after. "Then shoulder that axe and get ready to go to Arpin on the afternoon train," said I. A big smile broke out all over his face and he shouldered the axe; evidently the proposal just suited him. At train time George and his dog were at the station. The dog looked to be somewhat on the spaniel order, but his legs and body seemed to be misfits. He was 8in. high and 2ft. long, not including his tail. George must have thought that I looked at the dog rather disparagingly, for he said, "Topsy ain't much for looks; but if there's any pa'tridge in the woods he'll tree it." On the way I asked George if there was a hotel at Arpin. George said "No, only the saw-mill boarding camp; but there's a house half a mile from

there that an old bachelor lives in. He's away loggin' now, but he told me where he leaves the key, and we can get some grub at the store."

It was dark when we got there and we went to the company boarding house for supper. We went into the dining-room where nearly one hundred lumbermen were eating supper. As I still wore my "store clothes" I instantly became the observed of all observers, and one fellow yelled, "Take him out," at which some of them laughed. Then I turned toward the fellow and said, "Foreman, send that chap to the office for a cross haw," and the laugh turned the other way. There is no tool known as a "cross haw," and the usual way of suppressing a smart Aleck is to tell him to go to the office and get a cross haw.

After supper it was very dark overhead and all around, and very muddy underfoot, as we floundered along to the house which was nearer a half mile than a quarter. When at last we got there, George could not find the key, but after a while managed to get in through a window, lighted a lamp and let me in. Except that it was not very clean it looked comfortable. A good stove stood in the center of the room with a pile of dry wood behind it, and at one side of the room was a spring lounge supplied with mattress and blankets and there was a sleeping bunk up-stairs. In the "linter" there was a good cooking outfit, but no provisions. After making a fire and drying our feet, I retired to the lounge and George to the bunk up-stairs, taking Topsy with him, but Topsy refused to sleep up-stairs in a house not provided with fire escapes, and came down to my room, got under the lounge and spent the night scratching and biting by turns at fleas. I thought if he was as industrious at hunting partridges as he was after fleas, he must be a good one. At last, in spite of the novel surroundings and Topsy's noisy flea hunting I fell asleep, lulled by a pouring rain which began soon after we got into the house.

In the morning I sent George to the store after coffee, sugar, butter, bread, bacon, eggs, and canned peaches; he got all except the eggs, and all were of excellent quality. Both of us were fair cooks, and had good appetites, so we voted that it was a mighty good breakfast, after which we washed the dishes, put bacon sandwiches in some of our pockets and cartridges in others, shut up the house and went into the woods, which surrounded us for ten miles on every side.

Considering his lack of legs, Topsy was a phenomenal goer. He went on a gallop, swinging his long tail with a peculiar rotary motion, as though he was trying to scull himself through the air. But the partridges were not there. We hunted them on the wet ground and on the dry; along the creeks and away from the creeks; in brushy grounds and where there was no brush. We hunted all day and found but four, two of which we bagged. Although not looking for squirrels, we saw twenty during the day and bagged nineteen of them, all gray and black ones, and the biggest, fattest ones I ever saw. They were actually too fat to exert themselves getting away from us. We came in at sundown; hungry? Well, I ate the backs and hams of two of those big squirrels, but George was too hungry to eat squirrel and stuck to bacon. Coffee disappeared to the extent of more than a quart, and bread and butter and canned peaches in proportion. Topsy may have scratched fleas that night, but I did not hear him.

Next morning it was cloudy and very windy. Partridges were too scarce to be worth tramping after and it was a very poor day for squirrels, but we went into the woods and sat on logs and took it easy while Topsy ran about and occasionally treed a squirrel, and once in a while we would see one, so that when sunset came we had twenty-five. I had had enough of shooting, so next morning George was sent home with the squirrels, with orders to divide them among the poorer ones of his neighbors, and no doubt eight or ten families had a treat, for they were the fattest, tenderest, juiciest squirrels that ever were.

We saw a number of porcupines, and out of curiosity I shot one, finding him the hardest animal to bring down that I ever shot at. He was barely fifty feet high, but it took four charges of No. 6 shot to get him down, and he was not near dead then. Many of my readers not acquainted with the animal will be interested in a brief account of it. They are some larger than a raccoon, and of similar shape, except that they are thicker-set in body. They are rodents, and in head and teeth resemble a muskrat. They are covered with quills that grow out of the skin just like the hair. These quills are two to three inches long and one-sixteenth thick, the tips being sharp-pointed and set with minute barbs that make them hard to pull out when they have penetrated the skin of a dog or other animal. Their manner of defense is to roll themselves into a ball and switch their tails. Their food is the bark of trees, and one will stay in the same tree for weeks, perhaps not coming down till the bark is exhausted or the tree dies. When not eating bark he sits on a big limb, day and night, summer and winter alike, seeking no shelter in the coldest of weather, although poorly protected by the thin coat of hair which grows among his numerous quills. He is neither handsome nor harmful, and finds his chief safety in his utter worthlessness. What particular function he performs in the grand system of nature has never been determined. Perhaps the man who said the chief purpose of the dog was to breed fleas, can tell us what a porcupine is good for.

O. H. HAMPTON.

### Stars and Gobblers.

WILLOW SPRINGS, Mo.—I have had fair success with the turkeys, having bagged six, and am in hopes of downing a big gobbler to have mounted to keep company in my hall with the elk antlers, Mongolian pheasant and puma skin. We have been having the loveliest weather ever manufactured, and if it wasn't delicious to be in the forests in the "darksome woods" when the stars twinkled with undimmed brightness, and watch the beautiful unfolding of the day, and listen for the *keouk* of the noble bird, I don't want a cent. But now a cloud has appeared, a big frown upon the face of nature, the winds sough sorrowfully and fill the air and carpet the earth with faded rustling leaves, and Dr. Hicks of St. Louis says it is a "storm period." Just 's like 's not. O. O. S.

*The* FOREST AND STREAM *is put to press each week on Tuesday. Correspondence intended for publication should reach us at the latest by Monday, and as much earlier as practicable.*

## THE LONG ISLAND DEER SEASON.

THE deer law for New York State in general practically closed Oct. 10, when the hounding season expired. A few deer were killed after that by still-hunting up to Nov. 1 and by hounding in Sullivan county, but then the deer season closed for the entire State except in Long Island. On Long Island at that date the hunters were just beginning to make ready for their short season—the shortest by the way of any open season on the statute books of any State.

The Long Island sportsmen may pride themselves that their season opens at a much more sensible time than that of the rest of the State, for from Nov. 10 to 16 the deer are at their prime. They are in good coat, sleek and well fed, and can stand a sharp run with the dogs. When killed they are as far removed from the poor, ill-favored specimens killed elsewhere in the State early in the season as January is from June.

The Long Island hunters have only one objection to the season as it stands at present. That is, that the law permits the shooting of all other game after the first of November.

This furnishes an excuse for evil-minded persons to be upon the grounds ten days before the deer season opens with gun and dog, and while ostensibly hunting rabbits or other game to pot a deer now and then. That this is occasionally done there seems to be little doubt, and every season one hears many rumors of illegal killing. This preliminary hunting, even though strictly honest, tends to frighten the deer and drive them into the neighboring club grounds where they cannot be shot, so it is naturally unpopular with most of the deer hunters.

As told in the article printed in FOREST AND STREAM Nov. 18, 1893, the Long Island deer grounds lie between Ronkonkoma on the east and Central Islip on the west and north of the South Side Sportsmen's Club to the farming lands about Smithtown. The railroad just outside the club property skirts the southern limit, and along it in former years many deer have been killed. This year, however, few deer seem to have reached it. They have either been killed before they got so far, or else the fence which has recently been put along the track has prevented their attempt to cross. It seems likely that the former supposition is the correct explanation, as the fence is scarcely high enough to prove an obstacle to a deer in a hurry. The best known crossings are mostly on or near the railroad. Beginning from the east, perhaps the most celebrated is Oxhead Crossing, near which most of the deer have been killed in the last few years. North from the railroad runs a road skirting a low chain of hills known as the Pond Hills, and this road for half a mile or more is always lined with hunters during the season. Further west is the Connetquot River, the famous trout stream of the South Side Club, which above the railroad flows through a marsh 60 rods or more in width.

On both sides of this marsh are good crossings where the deer may be stopped on their flight southward. Sooner or later if not killed they always take that direction, which brings them to final safety in the grounds of the South Side Club. The river is the reason for this, for their natural instinct tells them that it will furnish them a means of throwing off their canine pursuers. West of the river is the "Whistling Post" where the deer have been accustomed to cross the railroad on account of the fact that the level of the track is nearly that of the country on both sides. Half a mile further is Foote's Crossing, which is near the western range of the deer at present. Years ago the deer ranged on both sides of Central Islip, and were more abundant west of Foote's Crossing than east. A forest fire, however, destroyed their cover, and now very few are found on that side. Saxon's Swamp, south of Brentwood, used to be an infallible point to start a deer, and the old Suffolk Road and the road from Islip to Central Islip were then the best stands. Report has it that deer are again straying back into these old-time haunts and that numerous tracks have been seen crossing both these roads.

From Foote's Crossing to Oxhead is probably about two miles along the railroad track. In this stretch many deer have been killed in recent years and tons of venison carried away. Along this stretch also deer are occasionally killed by passing trains. Two such cases have been reported in the last two years.

There are many other crossings or stands both east and west of the club grounds and north of the railroad. A well-known one is the "head of the brook," where the Connetquot rises.

The Long Island deer hunting is unique in many ways, but in none more so than the hour of starting for the chase. When other honest men have long hours of sleep ahead, these island hunters are afoot. The tracks of their game are found by lantern light, and often the game is afoot and flying for its life before the sun has gilded the tops of the hills.

Last Saturday, the first day of the season, a FOREST AND STREAM representative found himself upon the road at 4 A. M. He had been roused from a comfortable bed an hour before, and his companions—John Trainor, proprietor of Trainor's Hotel, and Messrs. Burr and Lamb, of King's Park—had not been to bed at all, but had whiled away the hours previous to the hunt with games of cribbage. The night was dark as Pharaoh's Egypt and damp as the vault of a crypt. The horse that drew the party seemed to push his way through a tangible wall of watery darkness. The heavy atmosphere was saturated to overflowing, and every now and then gave up a little of its water in the form of fine rain.

To assist us in making way through the blackness, we carried a lantern that shed a faint light on the road, and occasionally during the drive we saw other lights ahead or behind, that indicated other parties likewise bound for the hunting grounds. It was a dismal night, and the prospects for a clear day were very slight.

We reached a group of pines near the Oxhead Crossing just as it was beginning to pale a little in the east preparatory to a cold gray dawn. Already a deer was afoot and the dogs in hot cry. The horse was hastily driven in among a number of wagons drawn up between the trees "camp meeting style," tied and blanketed, and seizing our guns we hastened to points where we hoped to intercept the quarry.

But early as we were, the ground was well occupied. Everywhere in the darkness were hunters, some hurrying like ourselves, others content to wait where they were on the chance that the deer would cross the road in their neighborhood. For a quarter of a mile or more, the road was guarded by a cordon of hunters.

Before we had fairly gotten our positions the chase was upon us and had passed—two frightened deer bounding through the scrub oaks as if on springs, closely followed by the eager hounds.

From my position on a hill I had an excellent opportunity to overlook the chase, though it was too dark to see to shoot with any certainty. The deer looked like big "cotton-tails," and their white sterns made them easily recognized, though the dogs could not be seen. Around the base of the hill they swung in hot flight, and from the hill a broadside of shots was given, but the deer were too far off to be hurt. Presently one veered its course and made a dash for the Oxhead road. Out of the darkness directly ahead shot a flame of vivid fire, and the first deer of the day had fallen to the gun of George Thompson.

It began to grow lighter rapidly, and the hunt waxed fast and furious. North and south the dogs were driving, and the shooting was nearly continuous. It resembled the cannonading that goes on during the morning flight on a ducking marsh or at high tide during the rail and reed bird season. Far away to the east a chase would start. First the dogs could be heard voicing their uncertainty as they untangled the nocturnal wanderings of the deer. Faint distant and disjointed baying, gradually growing more nervous and excited and surer as they solved one puzzle after another. Then the wild burst of melody as the deer was jumped, and the continuous strain as they brought him hurrying along. A short period of expectancy would be followed by sudden, sharp reports that smote upon the chill, thin air viciously. Then a momentary calm—soon to be broken by other chases and other shooting.

Off to the south at one time during the early morning the shooting was incessant for several minutes. It could be compared to nothing more fittingly than the noise of a pack of firecrackers going off. Some shots lapped over on others, and there was no break. Shooting was done by the O'Berry party, of Stony Brook, who later were credited with five deer.

About seven it began to rain. For some time a thunder storm had been approaching from the west, and it now vented its fury on the unsheltered hunters. The wind rose and carried with it a dense pall of black clouds that shut in the nether world with impenetrable gloom. Torrents of rain fell, varied occasionally by volleys of stinging hail. Silence again brooded over the land. The baying of the hounds was hushed, and for the best part of an hour no shooting was heard. Then the rain gradually ceased and the storm had blown over. Thereafter the weather was good and the pursuit of the deer began again. Previous to the rain I had seen five running deer.

During the day the usual quota of deer were killed—about fifteen. Besides those mentioned, Luther Hallock, of Smithtown, killed one, a Terryville party got another, Fred Nichols, of Hauppauge, shot two, but another party got one of these in a wagon and carried it off. A Patchogue party in camp in the woods just east of the Connetquot River had one hanging up, and Ed. Randall, of Echo, also got one. A Greenpoint party were credited with one, and other parties from Sayville, Islip and Babylon no doubt got others.

There was a good deal of hard feeling during the day owing to disputes over the possession of deer. It frequently happens that deer are shot at by more than one party, and in certain cases it would tax a Solomon to decide to whom it finally belonged. At other times the party which has started a deer and whose dogs are on it when it is killed will fail to get the share of the venison to which they are entitled by the unwritten law of the woods.

A case of the latter kind occurred early in the day. An old gentleman from Babylon named Munsey, had ridden out on horseback with two hounds and started a deer. This he followed by hard riding for an hour and a half before it was killed. He carried no gun and was out merely for the sport of the chase. Just before the deer was shot he had lost his hat and spent some time in recovering it. When he got to the spot where the deer had ended its race the party that had killed it refused to give him any share of the venison. A war of words was the result between some hunters who espoused the old man's cause and the erring party. Hen Smith of Smithtown told them in plain and naked terms what he thought of them, and when they finally refused to make reparation, he offered to add to his verbal "dressing off" a good physical thrashing, but none of the guilty party accepted his challenge. The old gentleman had meanwhile stood by a quiet spectator.

Such scenes, and the crowding of the hunters, tend to take away much of the pleasure of the hunt; but there does not seem to be any way of getting rid of them. In some localities there is considerable danger to human life from reckless shooting, but a merciful Providence has so ordered that in recent years no serious accidents have been recorded.

I left at 3 o'clock, before the hunt was over, Joe Harris of the Branch Hotel, kindly consenting to carry me over to Smithtown. Just as we were starting the news spread like wildfire through the group of 30 or 40 hunters that had collected by the wagons near the Oxhead Crossing that a deer was coming. They scattered in a twinkling to head it off if possible, and this was my last glimpse of the hunt. Away we bowled at a good speed, and soon my experience of the '94 deer season was a thing of the past; but the memory of that sage-green pine-clad plain with its border of low brown scrub oak hills, and in its heart a clear, rushing stream, will long remain a bright and cheering picture. J. B. BURNHAM.

NEW YORK, Nov. 10.

### Long Island Ducks.

BROOKLYN, Nov. 8.—Noticing your little sign, "Report your Luck with Gun and Rod," I take pleasure in giving my report for near at home shooting on the Great South Bay, which I think will be of service to some of your readers. Instead of traveling hundreds of miles at great expense, a friend and I went down to Lindenhurst Sunday night, ready for Monday morning's shooting. We stayed there Monday and up till Tuesday noon of Election Day, when we came home to vote. We killed 22 birds, comprising broadbills, sheldrakes, but mostly black ducks. Now that is not bad for a little sport within 90 minutes of New York. Our guide was Mr. Chas. Robinson, who has a boat large and roomy and well heated, and understands his business. Any one of your readers going out with him will get the full benefit of a good day's sport.

# CHICAGO AND THE WEST.

## The West of the Present and the Past.

[*From a Staff Correspondent.*]

HELENA, MONTANA.

CHICAGO, Ill., Oct. 8.—The West of to-day is a land of contrasts, and in it the present is intimately and oddly mingled with the past. Take, for instance, the city of Helena. Its lofty and well constructed buildings are provided with every modern convenience. Its city transportation facilities are up to date in every respect. Each feature of its municipal government is modern and advanced, and quite as one would find it in a town of equal size in the East, even I suppose, to the extent of the features of political humbug and political corruption. Look at Helena from the outside, or live in Helena on the inside, and I doubt not one would find it extremely similar to any city of its size in any portion of the country, with perhaps the exception that he would discover Helena to be unduly rich in its proportion of educated and cultivated persons, and also materially rich beyond the usual city of its size. Helena is probably the richest city of its population in the world.

As one passes along the busy streets of this thriving commercial town, and notices the energy, thrift and industry of its citizens, he cannot realize that the history of this town is different from that of any other whose features are the same. In a present so prosperous he cannot suppose a past so boisterous, and from his look at the ordinary spectacle of quiet and steady commercial activity he cannot picture to himself the fact that the city's past was once a fever of the wildest speculation, that the city itself rests on ground from which the most fabulous wealth was once taken out. Yet it is a fact that the whole plain on which Helena rests, or rather the foot-slope upon which the greater part of the city is built, has been turned over and over in the search of gold, and has yielded untold fortunes. The main street of Helena looks like any other city street, with its street car tracks and its long lines of substantial buildings. Yet under that same street more than $1,000,000 of gold were taken out. Many and many is the cellar dug in Helena whose dirt has been washed out and yielded gold enough to give the house itself a substantial start. As to the total amount of gold taken from the Grizzly Gulch and its companion gulch, which makes off up into the mountains to the right, no man on earth can tell with any exactness, but that it was millions and millions of dollars is known very well. It is an unique experience to go to the top of some lofty building in Helena, and look out over what was once the greatest placer belt of the world. You can see now small traces of the early days, but here and there you can see the smoke of the stately residence of some man who made his millions almost by the turn of the spade in those glorious, golden days of a past which still is young. The wealth which lay under the grass roots has been transformed into more tangible and useful shape.

Those early days of Helena were wild times enough, but the Helena of to-day does not boast of them, though many of her leading citizens figured prominently therein. Helena has cut down the famous Hangman's Tree, which used to have a fresh corpse every morning in the vigilante days, and refers to the subject deprecatingly even when it is first broached by a visitor. But buy a book describing the incidents of those vigilante days, and you will get some notion of the stirring times of '63 in Montana. Certainly those days of action, and the recountal of their happenings furnishes a tale which it would puzzle one to call whether a chapter of horrors, or a chapter of heroism. But that is in the past, the very extreme and remote past of 20 or 30 years ago. Helena has outgrown all that. She is the capital of the State. The head fountain of law and order rests to-day exactly on the scene of what was once the most supreme example of lawlessness and disorder ever known even in the wildest days of the West. To-day you walk through the corridors of a lofty stone building, which is the home of justice, instead of through tent or cabin where once sat impromptu courts which passed on life or death. You do not now partake of the hospitality of the miner's hut, but are offered with equal freedom the elegant courtesies of a luxurious modern club house. All this within a couple of decades. Where else but in America, and where but in Montana shall you find contrast so striking?

### A City of Contrasts.

Montana, and her capital city of Helena, are very proud of their years, and refer to the past as though it had all happened hundreds of years ago instead of a few months, so to speak. Indeed, this reluctance to admit a youth, which no longer remains in evidence, has led Montana to feign forgetfulness of the past, and to claim a need for proper reminders of it. Hence the extensive and elaborate collections of the Montana Historical Society, whose well filled rooms are as interesting an attraction to the visitor within the walls of Helena as any offered by the city. There you can see the contrast of the present and the past still more vividly portrayed. You can see books telling of the old days. You can see specimens of the miners' tools mingled in close juxtaposition with the weapons of the Indian who so stubbornly fought the miner. You can see all kinds of Indian implements and Indian trophies, and all kinds of white men's makeshifts, born of the necessities of the early days. You can look, read and think, ponder on the past and easily imagine yourself back there in the midst of it rather than in the halls of an elaborate edifice of to-day.

The Historical Society has published one volume of the earlier records of Montana and will soon put out a second volume, embodying some papers of the most thrilling and graphic interest, describing as they do the exploits of the first settlers of this wild part of the mountains. These volumes, and the book descriptive of the vigilante days, of which I have made earlier reference, constitute almost the entire available fund of literature on Montana, and a subject so unique and intensely interesting certainly deserves more than this scanty treatment affords. The principal of the local schools, Prof. R. J. Young, is endeavoring to get together some of the stories of the early days, mostly by way of the personal recollections of Mr. James A. Oldham, one of the very few '63 men available for such a purpose. Certainly if the book tells all that Mr. Oldham can tell of simple fact and actual occurrence, it will in interest rival the wildest romance of border days.

I saw and talked with Mr. Oldham myself for a time, finding him a very quiet and pleasant man, betraying in his speech and dress none of what are supposed to be the border characteristics. Yet certainly he has tasted all the spice of life as seen in the days of Indians and gold. I asked him to tell me what he considered one of the most exciting episodes of his experience, and he made answer in the following story:

"I don't know that I can think of anything so very exciting," said he, "but I remember something which always seemed to me a little bit amusing. I will tell it as though it happened to myself; the other party who had a hand in it I would rather not name, but he is one of the leading citizens of Helena to-day, and I saw him on the street not long ago. We were the only two parties concerned in the matter except a lot of Indians, and there are none of those Indians now any more who are concerned in it at all.

"My partner and I were out prospecting in the mountains; I won't tell you just where it was, but it was a long way northeast of Helena, in a country which at that time no one knew anything about. In those days men made long trips all over the mountains in search of paying diggings, and they took all kinds of chances in doing it. My partner and I were afraid of meeting Indians in there, but we concluded to chance it. We had three horses and the usual prospectors' supplies, including flour, a little salt, etc. We had our rifles, of course, and a trap or two, and about an ounce of strychnine, which we had along for the purpose of poisoning wolves. You may depend there was nothing in our outfit which we did not need in our business, and nothing with which we were willing to part.

"We were pretty well through our trip, and thinking of coming back home, if we could be said to have a home, when one day we were held up by a party of Indians, of what tribe it will not be necessary to tell. It happened that our horses were hid up in a little willow thicket, but such supplies as we had were at our camp when we were jumped by the Indians. There were sixteen of them and only two us, so we didn't have much show. They pulled down on us and made all kinds of threats of killing us. We stood them off with our rifles and they knew very well that if they actually came to the scratch of firing on us, some of them would get killed, although of course the next minute it would be all over with us. Time and again I thought the shooting would have to begin, for they crowded around us, and put their guns and arrows right at our breasts. It isn't a pleasant sensation to have an iron-pointed arrow drawn to the head in a stiff bow and shoved up against you by an Indian who is calling you all the tough names he can think of in his language. We were pretty mad, but it didn't do us any good, though we told their head man that if he didn't get away pretty soon we would begin to shoot. At length he offered to compromise, saying that he would take away his men if we would give him all our supplies. To this we finally agreed, seeing we could do no better, and they took all our flour, not leaving us a mouthful, and took every bit of salt we had, and you know salt was valuable to us in those days and in our situation. My partner tried to hold out a lump of salt from the bag, but the chief made him put it back, under the threat of killing him if he didn't. So they just turned us loose on foot, so far as they knew with not a morsel of food, and not even an ounce of salt to use on any fresh meat we might kill.

"They took everything we had, even down to the strychnine. I never could tell just how it happened, but somehow or other they got the strychnine in combination with the flour. We had about half a sack of flour, and I suppose the strychnine must have got spilled into the flour in some way. We didn't mind losing the strychnine so very much, but thought if we were going to lose everything else we might as well let that go too, so we didn't say anything about it to the Indians.

"You know Indians are mighty fond of good flour, and as quick as these fellows got hold of our flour they pulled off down the valley about a half a mile and built a fire and went to cooking bread for themselves. Their method of doing this was to pour water into the sack of flour and mix up the dough in the sack; then each one of them took a stick and rolled it around in the dough until he got a wad of it on the end of the stick. This wad he would hold in the flame until it was cooked, when he would break it off and eat it.

"My partner and I crawled around back of their camp and watched their method of cooking for a while. About ten of the Indians were cooking and the others had gone down the valley a little further with the horses. The ones around the fire were having a great time, talking and laughing and enjoying our flour. At least they enjoyed it for a while. Each fellow of them had made himself up a couple of balls or so of the dough and I suppose they all thought they had struck about the biggest picnic they had ever had in their lives.

"All at once we saw one of the Indians drop his dough stick and sit still, looking rather thoughtful like. Then he clapped his hand on his stomach. Then he turned his head around and said something to the other Indians. About a minute after that he gave a whoop and jumped up straight into the air, and came down flat on his back.

"In ten minutes or so after the first Indian went over there wasn't an Indian left sitting up around the fire, and of all the wriggling and kicking you ever saw, I expect that was the worst. By the time the Indians who had the horses had come back up the valley, three or four of the Indians at the fire were dead. We slipped up close to the camp and turned loose with our rifles on the Indians who came back with the horses and killed every one of them. Then we went down to the fire where the bread makers were and tried to see if we could do anything to help them along. They had a piece of old broken iron skillet at the fire, and we took this and went and got them some water at the creek. Of course, after they drank the water they very quick lay still, as water and strychnine don't seem to work very well for an Indian.

"We killed the entire sixteen of them, and then got to our horses and rifles and left the country as fast as we could. At that time our consciences never troubled us very much over what we had done, though I cannot say that I would do it over again now. I am telling you the story to show what kind of days those were, and not by way of boasting. It is a fact, however, and it is a further fact that from that time to this the Indians of that tribe have held that little valley in awe, as being an accursed place, and they never go through it or pass near to it, but have given it a wide berth ever since the time their brethren robbed us of our flour. I have heard that later on that there was something found out and said about this matter by Government officials, but I reckon it is too far in the past now to bother about a few Indians more or less."

### They Were Hard Men to Kill.

Oldham has no particular reason to be fond of Indians, for they more than once evinced a perfect willingness to put an end to him. He thinks the nearest call he ever had was at the hands of Chief Joseph's Nez Percés. Oldham and a man by name of Cowan were on a sort of pleasure trip through the Yellowstone Park at the time old Joseph crossed the Bitter Roots and made for the east over the mountains of the Park. There were ladies in the party, one of them Cowan's wife, and the story of their later escape is known through reports of the Nez Percé campaign. Of the assault made upon the party it will be best to let Oldham tell the story. It shows well enough of what stern stuff some of these old-time mountain men were made.

"We had gone about twelve miles from our last camp," said he, "at the time we were stood up by the Indians, who were the advance guard of the main band. They whaled away and shot us both. I was shot through the head—you can see the scar where the ball came out through the jaw. It knocked me down, but I got up and ran, holding on to my rifle and got into a thicket, where the Indians concluded to let me alone and not come in after me, though they tried to shoot me again in there. Cowan was hit in the thigh and it knocked him off his horse and numbed him. He lay on the ground, and his wife took his head in her lap, and the Indians thought he was dead at first. One of the Indians came up to him, and made signs to his wife to ask her if the man was shot through the breast. This was the same Indian who shot me, and he was a short, mean fellow, with his hair cut square across his forehead—I know him, because a long time ago I had lent that same Indian a jack-knife, and he never brought it back. I saw him have it while we were talking to them before they shot us. This Indian came up to where Cowan was lying, and looked over his wife's shoulder, and saw he wasn't dead. He pushed his gun over the woman's shoulder and shot Cowan again, this time square in the forehead. That was rather a hard situation for a woman, wasn't it? After they shot him that time, this party of Indians left him lying for dead, and they took the woman and went on. I didn't know how my friend was, but supposed of course he was dead. Really, the second bullet had glanced and only cut his forehead open without going into the skull.

"There was another little party of Indians just back of the ones that shot us, and as these came up they saw Cowan sort of move. One of them got off his horse and came up to him, and seeing him all bloody and shot in the head concluded, I suppose, that it wasn't worth while to waste another shot on him, so he picked up a big rock and smashed Cowan in the head with it two or three times, fairly driving his head down into the ground with it. He then went on and left him for dead again.

"It must have been some little time after this when the next bunch of the Nez Percés came along, for by that time Cowan had made up his mind not to die after all, and he was sitting up in the trail, and I don't know but what he had crawled a little way on up the trail. When he was seen by this last outfit one of the Indians drew on him with a .50cal. needle gun and mowed him down, almost cutting him in two, I might say, for the bullet cut an awful gash clear across the abdomen, although it so chanced that it did not go quite deep enough to prove mortal.

"When he got this last shot Cowan fell over again, and as he was now looking bad enough for any dead man, this last lot of Joseph braves went on and left him lying on the trail, once more abandoned for dead.

"Cowan was not really dead, at least he says he wasn't, though he certainly had had enough to kill any man. Shot up as he was, he actually crawled back twelve miles over the trail to our last camp, and here he stayed two days. He found some coffee that we had spilled on the ground when we were there, and he scratched around and got up enough to make himself some coffee in a tin can we had left there. That was all he had to live on, but he lived. He was found by Howard's men when they came across after Joseph.

"As for myself, I had no picnic—to my notion. My jaw was broken and I couldn't eat, and I didn't have anything much to eat anyhow. I lived till Howard found me, entirely on crickets—these big black fellows, as big as the end of your thumb. I can't say I like them as a regular diet. They have a flat, sweetish, milky taste. But they were better than nothing, and kept me alive. I have eaten coyote, too, in my time, but I never did learn to like it." (Tom Laforge said he rather came to like coyote; I suppose it is a matter of taste.)

Both the men who passed through the above experience are alive and well to-day. Old Bill Hamilton told me the sequel of Oldham's story about the women of this party. He says that the older heads among the Indians did not want to kill these women, as the young men did when they found they could not be taken along. Chief Joseph sent some of these young men back up the trail on some excuse, and while they were gone he put the women on horses, showed them the way out through the mountains to the north and told them to hurry. They made their way out all right and finally turned up at Bozeman.

### A Heroic Suicide.

"But if you are talking of hard places and trying situations," said Oldham, continuing in his reminiscent vein, "I think there was one thing happened in the old days which deserved to be called a piece of true heroism, if ever there was such a thing. That was the suicide of Henry Geery, which happened on the big expedition made up at Virginia City to go over and explore the Little Big Horn country for gold. This was a large party, led by Jim Stuart, and they had all kinds of trouble with the Indians. It was one continual fight with the Indians all the time, and the party was followed for day after day, and had to keep up a running fire for mile after mile of their retreat. Geery had the misfortune to shoot himself accidentally with his own revolver. He was shot in the breast and knew the wound was mortal. That was right in the morning, while the party was getting ready to leave that spot as fast as their horses could take them, for they knew that if they stopped the Indians would soon get them all, as the Indians were close up in large numbers. Geery knew he couldn't live, and knew he couldn't travel horseback, and he wouldn't hold the others back

on his account. In those days men wouldn't leave their partners, and he knew very well that every one of his friends would stay with him as long as he could breathe. This meant their own death, and he resolved to prevent that and to hasten his own end for that purpose. He calmly bade all his friends good-bye and told them what he was going to do. They did all they could to persuade him not to; but he had his revolver in his hand, and he smiled and said it was no use talking.

"He was going to shoot himself again through the chest, but one of the boys said, 'Oh, don't do that, for it might only just wound you worse. Shoot yourself through the head.' 'All right,' he said, and he put the pistol to his head, but it only snapped. He took the pistol and looked at it in surprise. 'That is the first time I ever knew that gun to go back on me,' he said. Then he cocked it again and the next moment blew out his brains. Every man in that outfit cried like a baby at this, and they weren't hardly a crying crowd either. They stopped long enough to dig him a grave. I think if ever a man deserved to have his grave searched out and a monument put over it, Geery does, for he was the nearest to clean grit of any man I ever heard of, and the nearest to being a noble fellow."

The above incident is strictly true. It is described in detail in the volume of the Montana Historical Society. Drury Underwood—I think the same Drury Underwood who was long so prominent and beloved a sportsman of Kansas City, and who was killed at that city by being run down by the railway cars—was one of the same expedition, and was shot through the breast in one of the night attacks by the Indians. This is not such a big world after all, for I myself knew Drury Underwood, though I never heard him speak of having once had part in any of those tragedies of the old frontier.

909 SECURITY BUILDING, Chicago. E. HOUGH.

## BOSTON SHOOTERS.

BOSTON, Nov. 10.—Mr. L. W. De Pass is just back from a very successful wild goose shoot. He was accompanied by Mr. A. J. Mackintosh. These gentlemen had an invitation from the Attleboro Duck Club to enjoy their facilities whenever the conditions were favorable for wild goose shooting. On Thursday it was snowing heavily, and they started. The shooting camps and blinds of the club are on the borders of Winneconnet Pond, about three miles from Norton. Embarking in Boston, by afternoon train, they were on the grounds in season for the night shooting. Mr. De Pass got three noble wild geese, and Mr. Mackintosh also had good luck. There were three members of the club in the shoot that night and in the morning, and thirteen geese and five ducks were taken in all. The boys were back at the Chamber of Commerce on Friday morning in season for business, and much pleased with the good luck they had had, and also with the hospitality of the club. The club has a large number of live decoy ducks and three live wild geese.

Gov. Greenhalge left Boston Thursday morning, after election, for Castle Harmony, Harmony Lake, Me. He goes as the guest of Gen. O. A. Davidson of his staff, president of the Wild Goose Club. They will spend several days in duck shooting, which is said to be good at that point. The recent snow and unusually cold weather has caused the birds to start south earlier than usual, and they all stop in the larger lakes and ponds in Maine to rest and feed. Chairman Sam Wilson and a few other personal friends accompanied the Governor. A late report says that Gov. Greenhalge has struck some excellent duck shooting. The heavy snowstorms all along the coast of New England and the Provinces has started the birds south very early, and they are stopping to rest in the lakes further inland than usual.

The Boston markets have seldom been as bountifully supplied with wild geese as at the present time, and a few brant are also noted, with ducks innumerable. The latest reports indicate that there have just fallen 3 and 4in. of snow in the interior of Maine, the snows the first of the week having been confined to along the sea coast. Dispatches say that the conditions for tracking big game are excellent. Another crowd of hunters will now be on the go. Several Boston parties, made up months ago, will be off this week after moose and deer. They have been waiting for snow. SPECIAL.

## A MAINE HUNTING TRIP.

MR. A. B. F. KINNEY, that cosmopolitan sportsman, has just returned from a hunting trip in Maine and New Brunswick. The trip was made largely for the purpose of seeing the country, for though he has hunted and fished in Maine before and in the interim hunted all over the American continent, Mr. Kinney had never previous to last month made the trip from Moosehead to the St. Johns.

The other members of the party were Thos. Martindale, who is prominently mentioned as a candidate for mayor of Philadelphia, and his sixteen-year-old son James. They outfitted at Greenville, and with three guides put their canoes into the West Branch of the Penobscot Sept. 21. They followed the usual waterways to Umbazookius stream and the lake of the same name via Chesuncook Lake. Thence over a carry of two and a half miles into Mud Pond, which lies in the St. Johns water-shed. From Mud Lake they descended to Chamberlain Lake and then through Eagle Lake and Churchill Lake into the Allaguash River. This latter they descended to Long Lake, where they established a hunting camp.

There Mr. Kinney shot his moose. He saw eight more and was within easy rifle shot of five, any one of which he could have killed. The head of the one he shot was fairly good, though excelled by others in his possession. The moose was in his prime and his head black and handsomely formed, but the horns were not in any way remarkable. Mr. Martindale shot two deer and a caribou, and his son a buck caribou and a small bull moose. They had ample opportunity to kill a dozen deer a piece had they so desired, but they were thorough sportsmen and took nothing they could not use or give away to the lumbermen or others they chanced to meet. In addition to the big game, they shot all the partridges they cared to with a .22 Winchester and caught what trout they needed.

On leaving Long Lake the party descended the Allaguash to its junction with the St. Johns, and down the latter to Fredericksburgh, where they took the railroad home via Bangor. The entire trip lasted four weeks, of which two were spent at Long Lake. During that time Mr. Kinney rode 1,000 miles in a canoe and did not walk ten.

For a distance of seventy-five miles from Moosehead they found the woods full of hunters; but after that they entered a wilder country and had things more to themselves. The timber about Long Lake is mostly primeval woods, with the exception that the pine and spruce have been taken out by the lumbermen. Mr. Kinney says that game is undoubtedly on the increase. Eighteen years ago he camped on part of the same ground and did not see a single deer. At present all kinds of game are very abundant. This is principally due to the improved observance of the game laws, which prevent the natives killing on a crust. There is plenty of territory about Long Lake for game to last and increase, and it is not likely to ever be materially decreased by legitimate hunting.

J. B. BURNHAM.

## TEXAS AND THE SOUTHWEST.

### At Gum Hollow.

NOTWITHSTANDING that I knew it was forcing the season I proposed a trip to the coast to Mr. 24-gauge Critzer on the last day of the month just passed. We both had sniffed the frosty ozone straight from Jack Frost's boudoir and we were both morally certain that the ducks made the night hideous with quacks in the neighborhood of Gum Hollow.

When thirty miles away from San Antonio the warm sun rather melted away our exaggerated expectations of good duck shooting, and as we neared the equator the feeling came stronger than ever that we were too early in the season.

At Kenedy we found but one change—the lunch counter was short one blue-eyed, flaxen-haired girl. She had married a young farmer. The black-eyed little Jewess still presides, but the light has gone out of her eyes, and amid our laughs and happy sayings the poor little thing managed to sob out that she had just lost her best friend—her husband had died three months ago. Great, large tears welled from her heart and our levity ended right there.

As we sped south we noticed a great many improvements on the line of road. The grass is somewhat longer than it was last winter; the water holes were all full; taken altogether this will be a better season for game than last.

At Rettin's we were informed that turkeys are more plentiful than ever known before, and at Linton, our friend, Geo. Scofield said that his pasture was alive with quail. In another week I shall give it a trial.

### The First Canvasback.

He came buzzing along at peep o' day, while I was up to my middle in the center of Gum Hollow. I hit him with the center of the load. He was a late arrival, judging from his thinness. A few more ducks came in later on, but very few. A flock of white brant flew over the 20-gauge, and one was left to take back to San Antonio.

I'll try it again as soon as the next norther comes.

### A Fine String.

By far the largest string of the biggest bass ever taken in Texas waters was brought in by Messrs. Micheljohn, Charles and Jim Dignowity and Dr. Hines last week. There were about forty beauties in all, the smallest weighing about 2lbs. and the largest about 4. Mr. Micheljohn says they were all caught with small sunfish as bait, about fifteen miles from San Antonio, a few hundred yards south of where the Leone Creek empties into the Medina River.

### The 10-Bore Crank.

The sportsmen's world was undoubtedly shaken from center to circumference at the startling statement made in a Chicago paper of recent date by a San Antonio 10-borer that the small-bore shotguns crippled and did not kill game, and that a law should be passed making it a misdemeanor to shoot anythin g smaller than a large 10-bore. By way of parenthesis it would be well to state that there are a dozen small-bore men in San Antonio who are aching to meet this iconoclast who proposes to relegate modern ideas and implements to the shades of the past. They would make him very tired in a race either at artificial targets or live pigeons. They would also like him to disclose his identity so they could jump on him in good earnest.

### Somebody Erred.

In my letter which appeared in the issue of Nov. 3 is made a mistake. As the type read in the anecdote referring to Dr. Jesse Bell, of this city, the doctor fired three times at a quail on a limb with a rifle, and then the bird dropped dead. There is nothing startling about that. The way the item should have read is that the doctor, after firing three times at the bird with the rifle, dropped the weapon, picked up a stone and punched the life out of it. The point I tried to make that while the doctor was a good shot with the rifle, he could do much better with a stone. TEXAS FIELD.

### Holeb Lake Game and Fish.

LEBANON, N. H.—A party from here have been to Birch Island House, Holeb Lake, Me. They had good luck. Amos Gee shot two deer; so did Frank Rendrick; some of the other boys killed one deer, and the last I knew the junior editor of the *Free Press* had not put in an appearance, supposed to be waiting to get all the law allows, viz., one moose, two caribou and three deer. I was up to the same place the last of August and the first of September, and I never knew the fishing so poor in Canada or Maine the past twelve years. Two of us in a part of three days only got twenty-four trout that would not have tipped the scales at 8lbs. But there were plenty of deer; you could hardly shake a bush but one or more would run out. We counted twenty-two at one time on one of the Turner ponds, six miles north of Birch Island Camp.

MASCOMY.

### A Maine Game Resort.

EUSTIS, Me., Nov. 2.—There have been taken at our camps during the month of October one caribou, one bear, thirteen deer, one bull moose (wounded, but lost) and 314 partridges. Sportsmen have not been many as yet, but several are booked for the two months that are left. Still we have a few cabins that are not engaged yet. The game has never been so plenty as this season. All wishing to have a few days' shooting should apply at once to us. DOUGLASS O. WITHAM.

### A Floating Battery Taken In.

GAME PROTECTOR MARSHALL was notified last Monday night that a floating battery, a device to facilitate the slaughter of wildfowl in violation of the game laws, had been placed at the head of Long Pond. Accompanied by an assistant, Constable Marshall made a night trip to the pond in search of the poachers. Upon reaching the pond the game protectors drew their boat into the rushes and awaited developments. About 8 o'clock they were suddenly startled by the discharge of a gun. Out on the pond not far from them was the man with the gun and they went out and cautioned him that he must not shoot at game at such a distance from the shore.

"Didn't mean to do it," replied the man in the boat. "The hammer caught on the seat and the gun went off accidentally. But I'd like to know what chance you think a man has got to get any ducks on this pond by legal methods with such a thing as that over there to buck against," and the man pointed over to a fine lot of decoy ducks floating on the water while in their midst was what appeared to be a small innocent looking raft.

"My, but that's a nice flock of ducks," exclaimed the constable with never a smile to show that he was joking; "Now why don't you row in a little and shoot at those?"

"Ducks?" echoed the hunter with a look of disgust. "Them ain't ducks; them's decoys. And right over there in the middle of them is a man down under water in a tin tank a-watchin' fur ducks to get caught by the scheme, an' when they do he'll pepper 'em."

"Is that so?" replied Constable Marshall, "I guess I'll go over and see the thing."

Making his way among the decoys the constable suddenly saw a head pop up apparently out of the very center of the board raft. It stayed in sight for an instant and then disappeared. Then it popped up again and a voice sang out:

"Here, what do you mean? You are knocking those decoys all around."

"Can't help it," cheerily responded the game protector. "I want to make you a call and this seems to be the only way in to your little place."

This is what the constable found: A sort of raft made of a few planks joined together and resting flat upon the surface of the water. In the middle was a hole about 6ft. in length and 1½ft. wide, into which had been let a sheet iron box. The raft was pointed at one end to facilitate movement through the water, and on either side was an oarlock. About this craft at a short distance away were scattered a half hundred decoys. The sheet iron box, of course, was the hiding place of the hunter while in wait for ducks, and to the most intelligent wildfowl the device would suggest nothing more than a few floating boards without the least possibility of danger.

After looking the strange outfit over, Constable Marshall informed the occupant that he had violated the State game laws by venturing out into the pond a greater distance than 50ft. The device was lying fully 100 rods from the shore. The constable assisted his prisoner to take up his decoys and then ordered him to put the "craft" back where he had got it and to appear for trial before Justice Rigney at Charlotte.

On the night fixed for the trial Mr. Little appeared with Lawyer Stull as his counsel and D. C. Feely appeared as the people's attorney.

John Luke, a Charlotte boat builder, and Henry Kirke, a carpenter who went to Long Pond and looked at the odd craft, testified that the device was not a boat, this evidence being for the purpose of proving that the hunting was in violation of the law. Constable Marshall told the story of the capture and then the defendent took the stand. He admitted everything except the illegality of his hunting methods. He held that the craft was a boat and that therefore it was not a violation of the law to use it.

Justice Rigney ruled against the defendant, however, and sentenced him to pay a fine of $20 or serve twenty days in the penitentiary. Lawyer Stull gave notice that he should probably appeal the case and a stay was granted. Yesterday it was announced that an appeal had been decided upon. Charles Pierson, of Canandaigua, who built the craft, is interested in pushing the case to a high court in order to make a test.—*Rochester Herald.*

### California Small Game.

LOS ANGELES, Cal., Nov. 1.—*Editor Forest and Stream:* Although the duck season has now been open for six weeks yet there are very few northern birds in. The flight is gradually working down, but we need a heavy "norther" or cold snap to drive the main body of fowl south. Last week I noticed some canvasback and widgeon, all northern birds.

Quail shooting in this section has been unusually poor this fall and places where last season one might have counted on at least a fair bag, now yield but poor sport indeed.

I have not yet noticed any jacksnipe on any of my weekly hunts, although their feeding grounds are greatly restricted, owing to the exceptionally dry season, and therefore the chance of finding these uncertain birds is better than usual.

The Cerritos and Nigger Slough gun clubs have enjoyed some fair shooting at home-bred ducks this season, but I think the largest bag made so far by one gun in a day's shoot is of sixty-two, by Mr. Ed. Tufts, on Sept. 15, the opening day. CULPEPPER.

### Moose in Alaska.

SEATTLE, Wash.—The summer here has been good for all kinds of game, grouse especially being reported numerous. An occasional bear runs against a bullet and loses his pelt to some Indian. I have a friend just returned from a summer in Alaska, who reports moose, caribou, elk, deer, bear and small game numerous and gold scarce. He says that the Yukon headwaters are well stocked with moose and that they have not been hunted much. This country is reached via Juneau by canoe and pack horse.

EL COMANCHO.

### Is this the Adirondack Record Buck?

TROY, N. Y., Nov. 9.—*Editor Forest and Stream:* Last month at Lewey Lake, Hamilton county, my wife killed a buck weighing 287lbs., the antlers having 24 points. Dou you know of any larger deer being killed in the Adirondacks this year? H. F BONESTEEL.

*The* FOREST AND STREAM *is put to press each week on Tuesday. Correspondence intended for publication should reach us atthe latest by Monday, and as much earlier as practicable*

# Camp-Fire Flickerings.

"That reminds me."

**Active Pelts.**

"HANK" HALLSTEAD had the name at Nicholson, where he lived, of being "as sweet as his brother Bill," who now manages the D., L. & W. R.R., at a salary greater than that of the President of the United States. Henry was keeping a village store there about 1870, and like most country stores then, the establishment took peltry and game, as well as butter, eggs, etc., in the way of trade. "Bog" Pickering, in coonskin cap and homespun came down to town one day for a supply of shorts, tobacco, powder, caps, etc., and rubbing his hand over a fox skin that lay on Henry's counter, drawled out: "That's a fine pelt, Hank; what did ye give for it?"

"Twelve shillings in trade." Then after a few minutes, "Have you got some fox skins, Bog?"

"Ya-as."

"How many?"

"I b'leve there's five up there now."

"Nice ones?"

"Yes, two big ones and three littler ones." This time it was Bog who resumed the talk. "Do you want them skins, Hank? What'll you give fer 'em?"

"Well, if they're not too small they ought to be worth a dollar in trade."

"Well, Hank, two of 'em is bigger than this one here, and if you want to take the lot, big and little, just as they run, at ten shillin' apiece, you can have 'em and let me have some trade on 'em to-day?"

"All right, Bog."

A month later. "Bog, did you bring down them fox skins?"

"What fox skins?"

"Don't you remember I bought five of you?"

"Ya-as, so you did. I said they was five of them, didn't I?"

"Yes."

"And you paid me a dollar and a quarter fer 'em, big and little, just as they run, didn't you?"

"Yes."

"Well, they're runnin' yet, for all I know, and if you want to be sure of 'em you'd better go up and shoot 'em, or git some one to do it fer you, 'cause I've seen some other chaps up there with guns. I want to see you git 'em so you can pay me the other twenty shillin's."

Hank said the $3.75 did not matter so much—part of it was profits, anyway, but it cost near $10 to set 'em up properly for the boys, before he heard the last of it.

CAPOUSE.

# Sea and River Fishing.

## TAKING SALMON WITH A SPOON.

SEATTLE, Wash., Oct. 29.—I have had another salmon experience to-day, which is a puzzler for me. About noon I went down to Lake Union to try for trout, which are abundant and of good average size. Salmon roe is about the only bait used here and about the only thing they will take at this season. Being unsuccessful in coaxing any lake trout out I got in the boat and went to the portage between this lake and Lake Washington to try for salmon trout (so-called), which are now running in from the salt water through Lake Union and into Lake Washington by way of the logging canal cut through the portage. Arriving at this canal I found three boats trolling, as I supposed, for lake trout. Imagine my surprise on seeing a fish about 3ft. long being pulled in over the side of one of these boats. That I knew was no trout, so I rowed over to investigate. I found five salmon in this boat and two more in another. I examined the tackle used and found it was a small nickeled spoon used without any bait or feathered hook, just a plain Kirby 5-0 hook and 60ft. of heavy cotton line and no sinker.

I abandoned the trout proposition and dug up a similar spoon from my outfit, tied it on my silk trout line, ran out about 60ft. and let the 6oz. lancewood rod do the rest. In a few minutes I got a strike and lost my fish, then got another and landed a small one. In a little while after I got another fish weighing about 4½lbs., which fought as gamely as any salmon does in salt water.

They were jumping all around me in every direction, as is usual with a school of salmon in salt water. I opened and examined the stomachs of eight individuals caught in this lake to-day with a spoon, and in every case the digestive organs, intestines, etc., were in a shriveled, shrunken state, and entirely empty. I examined both males and females, both ripe for spawning, and found exactly the same state of affairs in regard to the digestive organs.

I had several strikes on a "spinner" cut from a chub belly, but did not land any of my fish, as my hooks were too light, being only small trout hooks, and in every case were torn out before I could get my fish. These were the same fish that were taking the spoon, as I could see them in two or three cases very plainly. The gentleman who had the five informed me that he had only caught one salmon in this lake before this season, and had taken that on a fly. This season he has caught quite a number with a spoon. Several other fishermen with whom I have talked on the subject say they never knew it to happen on this coast before, and were much surprised that they would take anything at all in fresh water. It seems to be a common belief beyond dispute here that salmon will not bite anything after entering fresh water, yet I find them taking a small spoon and a spinner readily, even greedily, in Lake Union, five miles from salt water, to-day.

Can some of the fishermen of FOREST AND STREAM throw any light on the subject? Why were they taking a spoon? Why did they not take some of the thousands of chub minnows in the lake instead of striking a "spinner"? Why should they strike at anything when the stomach showed conclusively that they were not feeding? Maybe these things be past "any feller's findin' out."

The salmon I should judge were identical with the "jack salmon," of the sound, and of those seen three would weigh about 7 or 8lbs. each, two about 4 to 5lbs. and the rest from 2 to 4lbs. I saw jumping many which appeared much larger; I think they would weigh about 10 or 12lbs., but none of these were caught. Perhaps they were silver salmon; I could not identify them in the brief circle they made out of water. Those caught were muddier colored than those in salt water, lacked the silvery gleam of scales and were of a reddish color all over. This I think is due to their being in fresh water instead of salt and am informed that it does not detract from their table qualities in the least, and they are apparently healthy. The ones that I caught I examined closely and could find no indications of inflammation about them in any way. The color seemed to be in the skin the same as in any other fish and the whole color of the body conformed so closely to the color of the lake water that they were hard to see until very close to the boat. This may be only another instance of the changeable quality of the color of a fish's skin, which readily adapts itself to the general color of the water and surroundings, just the same as the tree toad colors himself to conform with the leaf or bark he rests on, or it may be due to "change of climate," or rather water, from salt to fresh, which may cause an irritation producing redness of the skin. At any rate the fish are red, whatever the cause may be.

For the last three years I have heard of a "red trout" which ascends a certain stream flowing into Lake Washington at about this time of the year in multitudes. They will not bite in the stream, but are caught with grabhooks and are so plentiful that I know of one catch of sixty dozen taken in this way in a single day by one man, and yesterday a young man just returned from there told me that he "caught a butter firkin full in two hours."

As near as I can find out these are the same fish which I caught to-day in Lake Union, but are the smaller size, from 1 to 2½lbs., and their more slender form and general make-up looks more like a trout than a salmon; however, this is only my opinion, as I have never had an opportunity of seeing one of them yet, because I have never been to the creek in question. The first one I see I shall examine closely, and if they are not the same fish I will make a water color drawing of them and send it in for identification. Leaving this piscatorial lore to those better versed on the subject for dissection I will pause to state that I'm going to tackle 'em again in the near future.

EL COMANCHO.

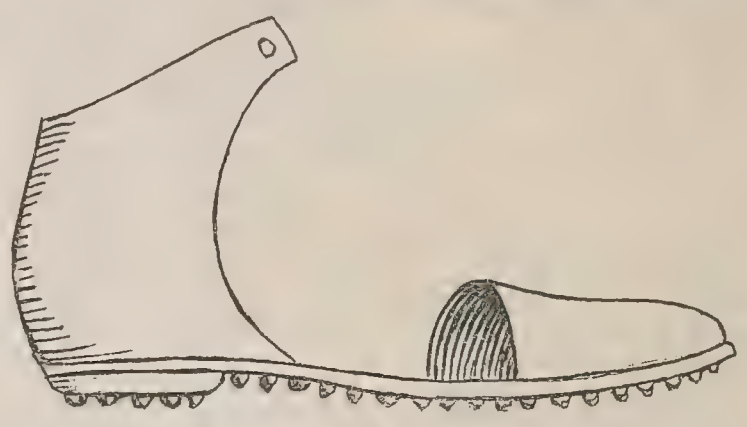
## RAINBOW TROUT IN THE SOUTH.

FLORENCE, S. C., Nov. 3.—*Editor Forest and Stream:* In your issue of Oct. 27, your correspondent, A. S. Newberry, of Cleveland, O., seems to have made a very long journey just to find that the rainbow trout is not what it has been "cracked up" to be, and has come to the conclusion that they are inferior to the *Salmo fontinalis* in game qualities. I would hint that trout of all kinds vary much in their habits, coloring, etc., according to the kind of waters they are found in, and more especially the season in which one fishes for them.

If Mr. Newberry had taken a much shorter journey into the mountain region of western North Carolina, and had hunted up the Culusagee River in the month of June (before the water gets too warm), he would have found thousands of rainbow trout, of which I will buck any 8-inch specimen against the best 10-inch speckled trout that ever was spawned.

To find this trout in perfection, it is necessary to seek streams high up in the mountains, abounding in rough rocky bottoms, rushing cascades, and little or no dull sluggish pools or ponds. I agree with Mr. Newberry, that when found in ponds they are much inferior to the *fontinalis*, pound for pound. I have been fishing for nearly a quarter of a century in many lands, but have yet failed to find any trout that will out-match the rainbow for game qualities, provided the environments are as stated. The dash with which they take the fly, the thrilling way in which they leap from the water—not once but repeatedly; and the long stubborn fight which they make, in fact till they are stone dead, cannot, in my estimation, be bettered by the trout family.

I would, however, sound a warning note to those who love the native brook trout better, but may be tempted to plant rainbow trout among them as an experiment. Let them forbear. Close observation on the Culusagee River proves that as the rainbows increase in size the native fish decrease in number. In this stream seven years ago it was no trouble to kill a creelful of the beautiful *fontinalis* in a few hours, but every year since they have been gradually getting scarce and more scarce, until this past summer the creel would not contain 10 per cent. of this species. I cannot assign any other reason for this than that the rainbows, being a fiercer, more voracious and much more active fish, are steadily cleaning them out by preying on them.



My outing for trout this summer has been over for some time, but it had been so uneventful that I have foreborne to annoy your readers with the same old story of fine catches, monsters lost, etc. The season has been one of the driest that I have ever experienced in the mountains, and as long as I remained the streams, except in a sudden freshet, never came within a foot and a half of the good fishing condition. In fact, during June the streams were so low that I found no difficulty in wading entirely through pools that no man ever waded before. Of course this was against good fishing, but yet it gave me access to many points where hoary-headed old veterans had been hiding away for years in security.

I am sorry to say that one of the finest streams in these mountains, the Horse Pasture, has been almost ruined as a trout stream, by the operations of the Georgetown Gold Mining Co., who have reopened some ancient workings and are searching for the main lead with 8in. hose. This has sent tons of mud and sand down stream and ruined the lurking places of the speckled owners of the stream. I don't wish the company any bad luck, but I do hope they may discover that the lead is in some far distant part of the State, and that their labors may be rewarded by their finding it.

I fished this year, for the first time, the Chatooga River (the head waters of the Suhannah), near where it takes its rise under the frowning 2,000ft. precipice of Whiteside Mountain. I found some good sport here, with the fish rather larger and more plentiful than in surrounding streams. This is largely owning to the protection extended to them by the owner of the land, Mr. Tom Grimshaw. One of the most delightful features of that trip was the pleasure derived from being domiciled with Mr. Grimshaw's family. It is quite a surprise to the weary angler, thirty-five miles from the nearest railroad, and isolated from civilization, to stumble on this most beautiful place and meet such people. Mr. Grimshaw is the son of an Englishman who settled here seventeen years ago, bringing with him all his English manners, tastes, family relics, paintings, books, etc., and even after so many years retaining them intact. To those of your readers who have had the pleasure of accepting an invitation to an English house party at an old country seat, the surroundings of this home and family would be very familiar.

Mr. Grimshaw is a good angler and very fond of showing his guests where the best fishing is to be had. On this stream I had the pleasure of having, for the first time in this country, as a fishing companion, a lady who was not afraid to wet her feet when in pursuit of trout. But she hailed from the mother country.

Apropos of wading, I had made for myself this summer a pair of wading shoes to wear over the stocking feet of my mackintosh waders. They worked to a charm, and as we as a class are not jealous or niggardly, I give a description to my brother anglers. They are very simple, being nothing but a double-soled sandal with low heel, filled from end to end with hob-nails. A toe-cap of canvas extending to the ball of the great toe and a

counter at the heel extending well up on the ankle and fastened by a thong passed through single eyelets on the two lugs, constitutes the whole thing. The advantages I found in them were lightness for carrying when one has a ten miles tramp to or from the fishing grounds, being open to the sole on each side, sand and pebbles were not retained in them to grind out the waders. In having them made I took the precaution of having the hob-nails driven into the outer sole before it was sewed on so as to prevent a stray point finding its way through my waders.

The hunting season is now on us down here, and quail and deer are reported plentiful, but I don't shoot.

W. M. BROWN.

## TROUT IN COLORADO STREAMS.

MR. A. S. NEWBERRY writes in FOREST AND STREAM, under date of Oct. 27, concerning what he calls "rainbow trout," caught by him in certain Colorado waters. Mr. Newberry is, I judge from his interesting article, "a stranger within the gates," hence I extend my hand to him and beg leave to correct his impression concerning the trout of Eagle River and the Yampa. From the description given by him of the trout taken in the Eagle, I conclude they must have been one of our native varieties of mountain trout. We have five at least. I think—in fact I am quite certain—that the rainbow has never been planted either in the Eagle or the Yampa; his description does not tally at all with the rainbow, but does answer for the lighter variety of our natives. The Eagle empties into the Grand River, and I am familiar with the waters of the last named stream, which I have fished above the confluence every summer for the past twenty years. I have never seen or heard of a rainbow in the Grand, into which stream they certainly would have found their way from the Eagle, had the latter stream contained them.

There are a number of cañons on the Yampa, and I do not, of course, know to which cañon he refers when he writes that he "camped in the Cañon of the Bear." Yampa is the Indian name for this stream, and I have a weakness for the Indian names; they are much more beautiful in sound and are quite as appropriate, if not more pertinent, than the names usually bestowed by the so-called civilized white man. But the Yampa, from its headwaters in the Main Range and the Roan Range to the vicinity of Steamboat Springs (the distance being about fifty miles) affords many still reaches, pools and riffles that are a delight to the angler. This stream is one of the homes also of the Rocky Mountain whitefish, a sturdy fighter, who rises readily to the fly and is very toothsome withal. I wonder that he did not kill some of them. The Yampa has several smaller tributaries between the headwaters and the Springs. One of the most delightful in name and piscatorial wealth is Walton Creek, emptying into the Yampa some two miles above Steamboat. I have caught many a pound and two-pound trout in Walton Creek; its banks are bush-lined, its current not too rapid for comfort, and its waters rarely too deep to wade. I commend it to my brother with that love which attends the recollection of delightful hours spent in the wilderness. Should he ever again cross the Gore Range or find himself on the Yampa, he should not fail to visit Walton Creek.

A 4oz. trout in the Eagle, however, would have served for bait only, in the olden time. Before the railroad was built down this ideal trout stream I passed many a day of pleasure along its banks and on its riffles. Four and 5lbs. native trout were common then, and 1, 2 and 3lbs. fish made up the sum of a few hours' catch. Permit me to quote from a little story written and published ten years ago of a forenoon's experience on the Eagle: "Going down stream about a quarter of a mile, I saw a huge boulder imbedded in the bank, with a great mass of drift piled upon and against the upper side; out in front, a few yards up stream, several other boulders just out of the water, with the swift current rushing between them to become a little quiet below for three or four rods. By the side of the big boulder was a narrow, sandy beach from which I could step into a niche, and thence to the top. If I had had the designing of it, I could not have arranged it better. There were a few willows growing on the bank, but when I was on the top of the rock they were out of the way. I stepped upon the big boulder and dropped the brown-hen almost at its base. A trout there advised me that he was looking for something of the kind, and came out on the beach shortly after never to go back. Each time I lengthened the line a little and reached out for undisturbed waters, and each time with success,

"I thought the creel, getting a little inconvenient, would better be laid aside, so I left it under one of the willows in the shade. The next time I undertook to put a trout in the accustomed hole it would not go in, and I opened the cover and was surprised to find the creel quite full. Three more trout and it was packed so that it would not hold another ounce. I had weighed the creel full of fish more than once, and was ready to swear to 15lbs. of trout. I had been stepping up and down from the boulder scarcely three-quarters of an hour and had lost but one fish. * * * I took out six more, threw them up the beach and let our host take them off. * * * When we reached home the catch was counted by him and he reported twenty-five trout, weighing just 20lbs. I took off the brown-hen that had served me so well; she was somewhat ragged, but I marked and put her carefully away as a memento."

Brother Newberry reminded me of that morning, and the difference between my day and his. I could not resist the desire to hunt up the old brown-hen, and when I looked upon the remains I felt an irresistible temptation to repeat a part of my old story, trusting that it might not prove uninteresting. I wish my brother to transfer his "respect for the rainbow trout" to our native denizens of the stream.

LEWIS B. FRANCE.

DENVER, Col.

## THE BIG PIKE-PERCH.

"OH I'm the boss fisherman; I've caught the biggest wall-eyed pike." Thus Jack taunted me and exulted all the day long. It was a very hot day too, and he had awakened me early in the morning with, "Come get up. Let's go a-fishing. Get out or I'll pull you out." "Of course you want to go fishing now, you feel so big since you caught that big pike-perch yesterday." "Who would'nt feel big. You never caught a 4-pound wall-eyed pike in your life."

It was true I never had, and only the day before Jack had caught one. We had been out all day but the wind blew so that we had no success. At last, tired with beating about in the wind we ran in behind a point of reeds, and as we lay there, Jack put a fresh minnow on his hook and made a cast far out into deep water. He allowed the bait to settle down pretty well, then commenced to reel in and immediately was fast to the big fish. It gave him a battle royal before he tired it out and I dipped it up in the net. Jack exulted all the way home and all of the evening, and here he was, rejoicing and with another trip planned before I was out of bed.

We went down into Lake Sally and then made a portage over into Fox Lake. Here we fished without any great success until a little after noon, when Jack hooked and, after a long and desperate fight, landed an 11lbs. pike, or pickerel as they are usually called here, then he added to his war song: "Oh I am the boss fisherman; yesterday I caught a 4lbs. pike-perch and now I have an 11lbs. pike, whoopee." I was very much subdued by all this but recovered somewhat as I hooked and landed a couple of small-mouth bass weighing about 1¼lbs. each. My rising spirits were soon checked as Jack caught a double, which when landed proved to be almost exact duplicates of the two I caught.

"Two doubles! Hurrah!" he said. "Did you imagine that you were going to get ahead of me, old man?"

I feebly answered that I had never entertained such a thought.

"You hadn't better," he cheerfully responded.

I caught one more bass, then he one more, when we concluded that we had better start for home as it was an eight-mile row with two portages to make. We made the portages into Lake Sally and started for the lock when we saw the tug coming with three empty barges in tow.

"I say," Jack exclaimed, "let's hook on behind that tow and go around in Melissa and stay all night at Mollie's (Mollie is Jack's sister) and fish in Melissa to-morrow."

"That's just the thing," I replied.

"And we'll have Mollie bake the big 11-pounder for dinner to-morrow," he said.

We pulled out to meet the tug. Running up close to the last barge in the tow I threw our anchor aboard, the long anchor rope serving as towline, and away we went, across Lake Sally, down the river and into Lake Melissa, only we did not get towed all the way. In turning a bend in the river the barges swung far to one side and our boat, obeying the law of bodies in motion that makes it so interesting to the tail boy in the game called "cracking the whip," went around further than the barges, the tow-line took a loop around a stake that stuck up a foot or so from the water, and there we were. Fortunately we did not capsize. The tug went puffing on, and as soon as we righted ourselves we rowed on, and just as the sun was setting reached our destination and were warmly welcomed and a supper quickly prepared.

The next morning we started across the lake for Rocky Point, a noted bass haunt. By the time we reached the point the sun was shining down very hot. "Not much use trying to fish," growled Jack. We did try, however, and caught several pike-perch and now and then a large-mouth bass.

Suddenly my rod bent and the line began to go off the reel very fast. I checked it a little, and the little rod bent nearly double.

"What are you hooked to?" asked Jack.

"I don't know. It is not a bass or pickerel. It acts like one of those big mascallonge we used to catch."

"By the great horn spoon!" exclaimed Jack, as the fish came in sight, "It's the biggest wall-eyed pike I ever saw. Don't you let him get away."

It was the largest pike-perch I had ever seen, and he was a fighter to the very last. At length, with a whoop of triumph, Jack got the net under the fish, and then it was ours. It was a beauty. In color it equaled any of the so-called golden pike that I have ever seen, and it weighed 6lbs. good and strong two hours later.

"Who is the boss fisherman now?" I asked Jack.

"Oh, well, you seem to have come out ahead, but I am going to catch a bigger one or else swear that I caught that one, and you dare not say I didn't."

We caught several more fish but no large ones, 2lbs. seeming to be about the average. We went back in time for dinner—at noon. The pickerel was baked in fine style and we did ample justice to it. Many of the people in the cottages around the lake came to see the big pike-perch. Every one said it was the largest pike-peach ever caught in the lake with hook and line.

After dinner we started on our long row home. As we made the portage at the lock Jack said: "Right here was where I first saw you. You and Stephens were caught in a shower while making the portage, and had turned your boat up against a stump and were sitting under it, snug and dry, eating bananas and oranges. Do you remember it?" I did remember it distinctty, and the further fact that we caught no fish that day, as the rain continued all the afternoon.

MYRON COOLEY.

DETROIT CITY, Minn.

## ANGLING NOTES.

### The Leap of the Salmon.

A FEW years ago I had occasion to say something about the leaping powers of the Atlantic salmon, and what I said was criticised by a well known angling authority. I mentioned that it was reported that salmon in Norwegian rivers had jumped up and over an obstruction 16ft. high. My friend and critic contended that salmon could not jump to exceed 6ft. I then brought forward evidence from a number of anglers, fishing inspectors, fish commissioners, etc. in this country and in Europe to show that salmon had made leaps ranging from 10 to 16ft. and still my critic was not convinced.

Under date of Oct. 23, 1894, Prof. A. Landmark, Inspector of Fresh Water Fisheries for Norway, writes me from Christiania about his experiments in marking salmon and sea trout for the purpose of observing their migrations, and he has this to say about the leap of the salmon:

"Concerning the height that salmon can jump under favorable circumstances there is in one place in Norway undeniable evidence that salmon sometimes have made a perfectly clear jump of 16ft. (perpendicular height). As to the details of these jumps I refer you to page 3 of my pamphlet on "Salmon Passes", a copy of which I send you by book post. No doubt a jump of the said height is quite unusual; but having myself examined the spot, where the occurrence had taken place, and heard the evidence of persons who have themselves witnessed it, I cannot doubt the fact." The pamphlet mentioned has not yet been received, and later I may have something to say about the details it contains of jumping salmon.

### Habits of Landlocked Salmon.

A New York morning newspaper mentions my name in connection with the planting of yearling landlocked salmon in the tributaries of Lake Champlain for the U. S. Fish Commission, and it gives some further information in these words:

"It is the desire of the U. S. Fish Commissioner to hold the salmon in the streams until maturity, when they could go down to the lake to spawn, and need not return to the rivers. In the selection of rearing waters, therefore, this element was not considered important, and the range of choice was wider."

Where the paper got such information I do not know—certainly not from me, although I was charged with the selection of the streams in which to plant the fish. Streams were selected free from all obstructions in the shape of dams and insurmountable falls so the salmon could enter them from the lake for the purpose of spawning, for it is in the streams that they spawn, not in the lake. It is true, as the late Prof. Baird pointed out when he was U. S. Fish Commissioner, that if the salmon planted in a lake were cut off from the streams for any reason, they would select sand bars or gravel beds where springs bubbled from the bottom and there deposit their spawn. Landlocked salmon do not come to maturity in the streams where they are born or planted. They are but a few ounces in weight when they run down into the lake from the streams, and they come to maturity in the lake and return to the streams to spawn.

I think the bulk of the landlocked salmon remain in the stream until they are two years old, although some may run down at eighteen months. I have seen them in planted streams the second summer and autumn, and could not discover that any were missing from the plant to account for some having run down at a year of age. In selecting rearing waters for landlocked salmon every possible element must be considered to insure success; the failure to consider one may be fatal, and until one seeks for such waters he may be blissfully ignorant of how few there are of streams now suitable for planting with these fish. For instance, in Lake Champlain are streams flowing which were once the home of the sea salmon, and in which the sea salmon have been planted within recent years, and they have done well, too, but their streams are wholly unsuited in their present condition for landlocked salmon. Fishways in some of the streams would fit them for salmon of both kinds, sea and landlocked, if I may be allowed to separate them, but until fishways are built over the dams in them they are useless for planting. It is a great pity that fishways are not built in two of the streams near Plattsburgh, for they have demonstrated that sea salmon will again thrive in them and afford fishing and food. I say again thrive in them, for both were once salmon streams within this century.

### A Retraction.

I am always careful about every statement I make in these columns, that it shall be correct in fact, but I am but human and liable to errors, and now I am wrong about one statement, and the only manly way is to acknowledge it.

In FOREST AND STREAM Oct. 13, under the head of "Amateur View of It," I said: "I am reliably informed that one man has caught from his steam launch this year nearly one ton of lake trout, and his guide has sold most of the catch."

A friend and hotel keeper on the lake in question tells me that I am "off on this statement," for he paid the guide only $200 for his fish, and I promised to correct it. I find by figuring the market price of lake trout that my friend got only 1,333lbs. of trout for his $200, and I must admit that 1,333lbs. is not "nearly one ton." But my friend did not open his hotel until the very last of June, and the trout fishing opened May 1, and in May more trout are caught per man or steam launch than during any other month, and the guide I referred to was steadily selling trout miles away from my friend's hotel long before the last of June, so I think from this later evidence he has furnished that I should have said one guide has sold considerably over one ton of lake trout, and this will allow the owner of the launch to have a few fish for his own eating. Thanks for calling my attention to the "error."

### Salmon in the Adirondacks.

Superintendent John G. Roberts, of the Adirondack station of the New York Fish Commission, writes me that he recently caught some landlocked salmon in a seine for hatching purposes and two of the fish weighed 7lbs. each. One was a male and the other a female full of spawn. These fish have grown from a lot of salmon fry planted in 1887, and while the growth is good it is not up to that which I reported from Pleasant Pond, N. H., which was remarkable.

### Will Salmon Take the Fly?

A gentleman writes to me from the University Club, New York city, as follows:

"Having read in a recent issue of FOREST AND STREAM your interesting article on Pleasant Pond, N. H., I write to inquire if the landlocked salmon you refer to in the paper mentioned are likely to be taken with the fly. As the salmon in other lakes in New Hampshire and Maine can be taken only with live bait or a spoon, I suppose it is only reasonable to conjecture that such will be the case in Pleasant Point. However, I should like to have your opinion on the subject in some issue of the FOREST AND STREAM.

What the landlocked salmon may do in the way of taking the artificial fly in Pleasant Pond, when the season opens next May, is purely guess work, except as we reason by analogy, for up to this time they have not had fly or bait offered to them. It is reasonable to suppose that what the landlocked salmon have done they will keep on doing, and in Sunapee Lake, which furnished the stock for Pleasant Pond, landlocked salmon have taken the fly when it has been offered, but as near as I can learn the fly has rarely been presented to the fish for their acceptance. In May, after the ice goes out of Sunapee, and well into June, the landlocked salmon are at the surface of the water, but nearly every one fishes for them by casting a smelt bait or trolling a spoon, and as this suffices to take many fish, the fishermen are satisfied with their methods, and the fly is not cast for them, except on rare occasions.

Sidney Bickford, the artist, while casting the fly (for trout, I think) near the shore of Soo-Nipi Park, hooked a salmon of 10lbs. Buck fever struck the angler when the fish leaped, but he managed to drag the salmon into shallow water, jump from his boat, haul the fish on shore and kill it. It is a matter of fact that the artist was so prostrated from excitement that he required the services of a nurse during the night which followed, so that is not a good way to fish if one is subject to fish fever. The late Prof. Trowbridge was casting a brown hackle in June for black bass, along the shore of Sunapee, and Prof. Quackenbos was rowing the boat. The latter tells me: "Almost the first cast Gen. Trowbridge made, within 200ft. of the stove on which Prof. Campbell's supper was cooking; at Owl Nest, brought from the water a giant salmon which missed the fly and went down with a great splash. It was the grandest rise I ever witnessed, and was twice repeated, but in vain. The trout flies were too small for that mouth which we both estimated belonged to a 10-pounder."

Mr. W. L. Craig, of the New York Board of Health, struck a salmon supposed to weigh 7lbs., but the fish took his fly, so the weight could not be confirmed. As late as July 11 a gentleman was casting his flies for black bass off of Owl Nest Point, when he hooked and killed two salmon of 4½ and 6lbs. The fly in this case was a golden-doctor. William Young, the dramatic writer, says that the toodle-bug, small Rangeley Lake size, is a killing fly in Sunapee Lake for salmon and large trout. Ladies have not infrequently taken salmon in Sunapee with a small fluted spoon, No. 2. The wife of Prof. Dunning, of Columbia College, has taken a number in this way, as have the members of Prof. Quackenbos's family. Last season his young daughter Carrie hooked a 6-pounder and brought it to the net but not into it, and there the curtain drops on a pot-pourri of silver leaf, rattled girl, smashed leader and tangled landing net.

From this and other similar evidence, I believe that landlocked salmon will take the fly when they are at the surface of the water next May and June if it is offered to them. It will be observed that most of the salmon taken with the fly in Sunapee Lake have been taken on trout or black bass flies while fishing for the fishes named, and so far as I know there has been no systematic effort made to take the salmon with the fly, and until such effort is intelligently made I shall feel that landlocked salman will rise to the fly early in the season in Pleasant Pond and other New England lakes which they inhabit.

### Hatchery Notes.

I hear frequently about the hatching operations at Sunapee Lake and Pleasant Pond, and so far more salmon have been taken for breeding in Pleasant Pond than in the parent lake. In one of the last letters from the superintendent he said that 130 large trout had been taken in the nets at Pleasant Pond, all of which confirms what I have said in these columns that there will be some extra fine fishing there next May when the close season of five years expires. At the hatchery on Sunapee Lake the men are taking eggs which they estimate will amount to a round million by the time they finish. The saibling run larger in average size than in any previous year, and the schools are very large in numbers on their mid-lake spawning beds.

The brook trout and salmon when hatched at this station are planted in two streams running into the lake. In October the superintendent reported that the young trout were working down stream into the lake, and at least 40 had come down into a pool near the hatchery. Although he does not say so, I assume that these are yearling trout, that is, hatched a year ago last spring, for I saw a large number of these fish, with those of this year's hatching, when I examined the two streams in the summer.

A. N. CHENEY.

### Texas Tarpon.

SAN ANTONIO, Tex., Nov. 6.—Messrs. W. M. Lewis, H. H. M. Wallis and D. K. Bull of Racine, Wis., accompanied by their wives, have been spending a few days on the coast at Rockport, and have made the largest record ever known as tarpon fishers, capturing twelve tarpon in one day—Mr. Wallis five, Mr. Bull three, Mr. Lewis three. Now where are your Florida tarpon fishers that can down that? This is ample proof that Florida is not "in it" for tarpon. We are having splendid weather in Texas and lots of game this season.

L. F. M.

### Playing and Landing a Man-Fish.

TAMPA, Fla., Oct. 18.—*Editor Forest and Stream:* Some time ago I read an account, somewhere, of an angler who undertook to play and land an expert swimmer in the pool of one of the athletic clubs—in New York, I think—but who failed to land his man, though he used a heavy striped bass rod, or a salmon fly-rod—I forgot which; at all events the swimmer seemed to have it all his own way, and eventually smashed the tackle after a long struggle. Having often performed this feat successfully, heretofore, I again essayed it last week at an entertainment of aquatic sports at the Natatorium in this city, an account of which from the Tampa *Daily Times* I inclose. On this occasion I used a 10oz. rod (similar to my Little Giant rod), a Julius Vom Hofe light striped bass reel and a Natchaug braided silk line. The line was tied to a muslin band around the neck of Capt. La Penotiere, who, by the way, is an excellent and expert swimmer, and has charge of the Natatorium. After giving him line to the full extent of the pool, I had no difficulty in bringing the Captain within reach of the landing-net in ten minutes, though he exerted himself in every manner to break away by swimming, diving and imitating the motions of a hooked fish, to the great delight of the large audience assembled. In a private trial the day before, I landed him in seven minutes. I invited any expert swimmer in the audience, to follow the Captain, but no one offered. The pool is 40×80ft., and from 3 to 12ft. deep. In open water I should use a Henshall 8oz. rod, Kentucky reel and No. 4 silk line—in other words, ordinary black bass tackle. J. A. HENSHALL.

### Squibnocket Bass.

PHILADELPHIA.—In September, by invitation of Mr. R. W. Crocker, of Vineyard Haven, Mass., I spent a few days bass fishing with the Providence Club, at Squibnocket. My catch was one bass weighing 17½lbs., one of 38lbs., one of 29½lbs., and one of 24¾lbs. The one weighing 29½lbs. was hooked through the socket of the right eye. Although he was landed in about the same length of time as the others, he hugged the bottom so persistently that it tested the rod and line to the utmost, and only when reeled in under the stand was he made to show himself at all. I have stolen other kinds of fish before, but to catch a striped bass in that manner seems to me to be so unprecedented as to be worthy of being recorded. N. H. P.

### Salt-Water Fishing.

NEW YORK, Nov. 7.—Though the salt-water fishing season is practically over, and most enthusiasts, with the exception of striped bass fishermen, have put up their tackle for another year, there is still a little sport to be had in the waters about New York. On Election Day I spent a couple of hours fishing from a dock at Pleasant Plains, which is on the Bay side of Staten Island, and took 20 fish, including 4 blackfish and 2 flatfish. The rest were bergalls or cunners, which though diminutive, make excellent pan fish. For these small fish light tackle is needed, and small hooks. I used sand worms for bait. J. B. B.

## Fishculture and Fish Protection.

### The Vermont Commission.

*To His Excellency, Governor Woodbury:*

I hereby tender my resignation as Fish and Game Commissioner, to take effect when my successor is appointed. As you are aware, this action has been contemplated, owing to the fact that my time is so fully occupied at the St. Johnsbury Station of the United States Fish Commission, that I cannot give the State work the attention it deserves.

I shall continue to have the best interests of the State at heart, and particularly so with reference to the development of its department of fisheries and game. In my position as superintendent of the station at this place I shall be ready to co-operate with the State Commission in furthering the interests of their department, and in making this statement I am pleased to say that the offer is made with the advice and consent of the United States Fish Commission.

I trust that the increased interest throughout the State in matters pertaining to fish and game legislation will not receive any set back owing to past errors, but that its development will continue as its importance becomes more and more apparent from results already obtained.

I trust you will pardon me if I take this opportunity to make some recommendations which could not be placed in the recent biennial report to you without feeling that personal motives might be ascribed. It is a fact that at the present time the work being done by the two Commissioners is frequently enough to keep one man thoroughly occupied. Still there are many bodies of water which have never been examined by any one who is competent to judge as to their needs. Under the present system the appropriation is too small to warrant its being expended in such work. It has for a long time been demonstrated that almost any given acreage of water can be made to yield more productively than the same acreage of farm land. Under our present system many such bodies of water are unproductive, simply because it is necessary to have strict legislation covering all waters alike. If a Commissioner could give his undivided attention to the department of fisheries and game, more liberal laws could be made, a license system could be inaugurated whereby whitefish, ciscoes, suckers, mullet and pan fish, not cared for by the sportsmen, might be of commercial value to the State, and at the same time better enforcement of the laws protecting both fish and game would ensue. To sum up the whole matter, I would say that the predominating interests in Vermont are those of the sportsman and farmer, because it is their interests which attract most money to the State. If we can have but a meager appropriation, let it all go to that interest to obtain the best returns for money invested. If, however, the Legislature should at some future time feel like making a more liberal appropriation, I would make the following suggestions, based upon previous remarks:

Employ one Commissioner at a salary of not less than $1,500 per annum. Have him reside at the State hatchery and be its superintendent. All time not occupied there could be devoted to investigating the needs of our forests and streams, and supervising the work of restocking them; investigating and presenting for prosecution cases in violation of the game laws; educating the people to a proper respect for the laws in rural communities where they are now disregarded. The enforcement of the game laws is not difficult in communities where the necessity for them is understood; licensing commercial fishing in waters where game fishing would not be injured, etc. There should be one or two more commissioners to act in an advisory capacity, and render services for nominal expenses and actual time expended by them.

For such a system I estimate that, aside from the expenses of constructions, an annual appropriation of $7,500 would be adequate to do the work. This is not a large sum, when the returns from such an investment are considered. The State pays in bounties on obnoxious animals an average of over $4,000 per year. The returns from commercial fishing under proper restrictions can be estimated at $25,000 per annum to citizens of the State. The returns from the development of the farmer's and sportsman's side of this question have been fully discussed, and are beyond power of fair estimation. They are to be considered first, however.

I do not say this because I am a sportsman and the pleasures of hunting and fishing are as dear to me as to all my brotherhood, but from a practical, business standpoint. The money brought into the State is very thoroughly distributed among all classes and trades.

These suggestions are supplementary to the recommendations for legislation contained in the 12th biennial report of the Fish and Game Commissioners, and no more liberal laws than are now existing will be beneficial to the greatest number unless more liberal appropriations accompany such legislation. J. W. TITCOMB.

ST. JOHNSBURY, Vt., Nov. 3, 1894.

*John W. Titcomb, Esq:*

Your favor of the 3d instant, covering your resignation as Fish Commissioner, is received and carefully noted. I quite agree with most of your views relative to the work of the Commission in the future, and trust that the State may be further benefitted by your experience and ability.

You have brought to the work a great deal of enthusiasm and knowledge, and your retirement will be a loss to the Commission and to the State.

I accept your resignation, which some two months since you informed me you intended to tender me, upon the terms stated in your letter. U. A. WOODBURY.

MONTPELIER, Vt., Nov. 5, 1894.

### A Greenwood Lake Poacher Taken In.

ONE of the most notorious poachers at Greenwood Lake, Leonard McCloud, is in the Passaic county jail in Paterson, N. J., with every probability of his remaining there for an indefinite period. McCloud formerly resided at the New Jersey end of the lake, and here he carried on his violations of the law in an open and defiant manner. Game Warden Charles A. Shriner prosecuted him on a number of occasions, but McCloud always managed to raise enough funds to pay his fine. In the spring of 1893 it got too hot for him, for Warden Shriner had two warrants out for his arrest on two complaints. A number of attempts were made to capture him, but McCloud had skipped out of New Jersey and taken up his dwelling in New York, where the land company which owns one side of the lake and depends on lovers of the rod to buy its property, kindly permitted him the use of the abandoned Warwick Woodlands Hotel as a domicile. McCloud continued in New York as he had been doing in New Jersey, until Game Protector Kidd got after him and made complaints against him. Seeing imprisonment staring him in the face he communicated with Game Warden Shriner offering to turn state's evidence against some New Jersey violators of the law if the warden would permit him to return to New Jersey. Warden Shriner paid no attention to these overtures, knowing that it was only a question of time before McCloud would necessarily put his neck into the halter. This time came a little sooner than had been anticipated.

On Friday night of last week Leonard McCloud and John Prall, the latter of whom has been in the employ of William C. DeGraw, the proprietor of the Willow Point Hotel at Greenwood Lake, for some time, took a wagon and a team of horses and drove to Echo Lake, a beautiful sheet of water in Passaic county. In the wagon were a number of gill nets. McCloud and Prall worked faithfully during the night, and when each had secured a large bag of black bass, pickerel and perch proceeded to get back home. They got but a short distance from the lake when they ran into Constable Frank C. Williams and three confederates who had been watching for them for some time, as this was not the first visit of these poachers to Echo Lake. They were at once taken to Paterson and there arraigned on complaints made by Warden Shriner. The violation of the law being flagrant, and McCloud having been convicted before, Justice Senior fined them each $100 and costs. This was more money than they could raise and so they were committed to jail. Before being sent there on the complaint charging them with netting in Echo Lake, McCloud pleaded guilty to the two complaints made against him by Warden Shriner in the spring of 1893. He will be sentenced on these whenever such a course is deemed advisable.

The team of horses and wagon were placed in a barn near Echo Lake, and their owner, Mr. William C. DeGraw, proprietor of the Willow Point Hotel at Greenwood Lake, was notified to come and get them. McCloud and Prall say they were employed by DeGraw to net the fish on a promise of a share in the proceeds, and that the gill-nets used belong to DeGraw. The latter declares that he knew nothing of what was being done, that he was away from Greenwood Lake at the time, and that the team and wagon were taken without his consent, but it does not appear that he has preferred any charges of the larceny of his property against Prall and McCloud. DeGraw is the individual against whom two charges of having shot ducks from his steam launch are pending in Paterson, and who acted as guide for the judicial party who were recently arraigned on a similar charge, and who are now trying to wriggle out of it by means of the law's delays and technicalities.

### To Florida and the South.

THE popular route is the Southern Railway, "Piedmont Air Line" via Washington. This great system comprises nearly 5,000 miles of railway, and extends from Washington, D. C., reaching all prominent Southern cities and winter resorts. Operates the only solid Pullman vestibule train from New York to the South. Through Pullman service from New York to Atlanta, Ga.; Montgomery, Ala.; New Orleans, La.; Birmingham, Ala.; Memphis, Tenn.; Asheville, N. C.; Hot Springs, N. C.; Savannah, Ga.; Jacksonville, Fla.; Tampa, Fla.; Augusta, Ga., and Aiken, S. C. If you are going to any point, South, Southeast or Southwest, to get quick time, sure connections and the comforts of first-class travel, see that your tickets read via "Southern Railway." For rates, map of route, etc., call on or address R. D. Carpenter, General Agent, or Alex S. Thweatt, Eastern Passenger Agent; W. A. Turk, General Passenger Agent, Washington, D. C.—*Adv.*

### Appreciation.

BOSTON, Mass., Oct. 20.—*Editor Forest and Stream:* Under date of Aug. 22, you mailed me a recipe for my dog, which I gave it, and am happy to say that he recovered and became as he should be. I take this opportunity to thank you for your kindness and promptness, and I also must apologize for such a tardy report, but I have been away from home and this caused the delay. W. L. SCHLEGELMILCH.

### FIXTURES.

DOG SHOWS.

1895.

Feb. 19 to 22.—Westminster Kennel Club's nineteenth annual show, at New York. James Mortimer, Supt.

Feb. 26 to March 1.—Mascoutah Kennel Club, at Chicago. J. L. Lincoln, Sec'y.

FIELD TRIALS.

Nov. 19.—Eastern Field Trials Club, at Newton, N. C. All-Aged, Eastern Subscription and Selling Stakes. Entries close Oct. 1. W. A. Coster, Saratoga Springs, N. Y., Sec'y.

Dec. 17.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.

### THE U. S. FIELD TRIALS.

TRIALS A of the United States Field Trials Club commenced on Nov. 5 at Bicknell, Ind. They were not quite the success anticipated, owing to poor grounds, though they were far removed from a failure.

In reference to the quality of the competition, it was of an inferior order, taken all in all, as compared with that of previous years, particularly in the Setter and Pointer Derby. Undoubtedly to this condition the early date on which the trials were held contributed largely, since the vegetation was still rank and in many places heavy.

The weather, too, had been hot, which prevented the handlers giving their dogs the necessary experience and training. Then again, the grounds greatly aggravated the defective work. There were but few places where a consecutive course could be followed for a few minutes at a time. The fields where the dogs could work were generally small, and were nearly always adjacent to great cornfields, dense weeds or woods wherein the birds could seek shelter. Wire fences or heavy rail fences were obstructions met every few minutes. Some fences could be crossed, but in many instances, where there were wire fences, it was necessary to dismount and send the horses around to points where the judges could mount again. The owners of some fields objected to the horses being brought in, so in those fields the judges walked.

The work was often exceedingly difficult to see, owing to the heavy cover, which had not suffered much from frost, and nothing from heavy storms.

It will be noticed that the point work was much less than that of previous years. This is explained by the fact that the bevies when flushed went to cornfields or to cover where no satisfactory work could be gotten with the dogs. The available grounds for work were so limited that the same ground was worked more or less each day. What with wire fences, small fields, little corners and pockets, heavy cover and the almost constant necessity of turning back and forth, it could not be expected that any dog could make a good showing. Some delay, too, was caused on the first days by not knowing precisely all the club grounds. It seems that the matter of grounds had not been properly arranged before the trials began.

As the whole section was largely planted in corn, with here and there small tracts of weed fields which could best be used for the trials, the available ground was limited. In short, while the grounds never were proper grounds for a large field trial, this year they were worse than ever.

The judges were Major J. M. Taylor and Messrs. J. M. Freeman, J. B. Stoddard and G. T. Kerr. Mr. Stoddard took the place of Mr. Royal Robinson, who had important business matters to look after. Mr. Kerr judged in the All-Age Setter, and All-Age Pointer Stake in which Mr. Stoddard had an entry. They attended to their duties conscientiously and skillfuly. Their work was uncommonly difficult owing to the unfavorable grounds and conditions, but they got through with credit. It is worthy of mention that it is incomparably more difficult to place five winners in a stake than to place three. Their decisions too, were generally well received.

The following sportsmen were present: Messrs. P. T. Madison, G. T. Kerr, Indianapolis; St. Mark M. M. Mundy, Louisville; Ed. S. Shultz, St. Louis; J. E. Isgrigg, of Montgomery Ward & Co., Chicago; Joseph H. Hunter, Washington; W. H. Wright, Indianapolis; Arthur W. du Bray, Cincinnati; Norvin T. Harris, St. Matthews, Ky.; J. L. Barker, Racine, Wis.; G. H. Reed, Washington, Ind.; R. Merrill, Milwaukee; L. Rausch, St. Louis; F. S. Harris, Cairo, Ill.; F. F. Bock, Battle Creek, Mich.; John Hunter, Bloomington, Ind.; Mr. E. A. Burdette, Chicago; H. Hulman, Jr., Thomas G. Beggs, Albert Baker, Will Parrott, Terre Haut, Ind.; D. P. Ritchey, John M. Lily, H. S. Humphrey, C. E. Gilbert, Indianapolis; J. L. Adams, Louisville; Geo. G. Wharton, Marion, Ind.; E. H. Bisby, Chicago, and others.

The grounds were infested with rabbits, which were a great hindrance to the work on quail of some dogs. In some fields it was not uncommon to start a rabbit at every few steps.

Fairly good weather for field work prevailed during the week.

The meeting passed off pleasantly.

The number of starters might have been greater, but considering the hard times the showing was passably good.

#### MONDAY.

#### The Pointer Derby.

The trials began with this stake. The competition in it was hardly up to commonplace. Much of it was decidedly poor. No doubt the unfavorable weather conditions which prevailed before the trials and the unfavorable grounds during the trials, had much to do with the poor showing. The exceedingly dry weather had made the preparatory work difficult. The handlers assured me that nearly all the preparation of their dogs was done after the recent rains, about a week before the commencement of the trials.

The cover is still partially green and heavy. There have been no frosts sufficiently hard to kill the heavy weeds and no heavy storms to beat them down. No dog does his best under such conditions.

A large part of the field grounds are taken up with great cornfields which afford excellent shelter for the birds. Any attempt at work in such cover is most unsatisfactory, both because it is extremely difficult for the dogs to do good work under such conditions, and difficult for the judges to see it when done. The fields are small. There is hardly enough ground anywhere in one body wherein a dog of fair range could much more than get started before he would be out of it. Instead of good opportunity for consecutive effort, the dogs are held down to working in nooks and corners. Wire fences are plenitful; ground on which horses are not allowed is by no means scarce and good cover for the birds to hide in is within easy reach everywhere. The grounds are of such a peculiar nature that they do not afford a scope for a really good dog nor do they afford much opportunity for a display of what is called bird sense. A compromise dog of the mousehunter sort with fair ability in point work would fit the grounds well.

There were ten starters drawn to run in the following order:

John T. Mayfield's liver and white bitch Belle (King Don—Vinny's Tribulation), owner, handler, *with* W. B. Stafford's liver and white bitch Dell S. (Manitou—Pride), owner, handler.

H. K. Devereaux's liver and white dog Tamarack, Jr.

(Tamarack—Maud Graphic), Geo. Gray, handler, *with* J. T. Mayfield's liver and white bitch Day Dream (Ossian—Hops II.), owner, handler.

T. L. Tinsley's liver and white dog Roderick T. (Dash Ranger R., Jr.—Fanny Kennerly), Frank Richards, handler, *with* W. B. Stafford's liver and white dog Rex-fast (Rex—Mosey), owner, handler.

L. W. Blankenbaker's liver and white bitch Lad's Lady (Lad of Rush—Lady Margaret), E. Garr, handler, *with* C. B. Lockhart's liver and white dog Hal Bredan (Ossian—Vic), B. W. Butterfield, handler

Hempstead Farm's liver and white dog Hempstead Don (Sandford Druid—Merrylegs), J. M. Avent, handler, *with* W. T. Hunter's liver and white bitch Lady Peg II. (Rip Rap—Lady Peg), Frank Richards, handler.

The day was cool and clear, with a stiff breeze blowing—not a bad day for work, so far as the weather conditions were concerned.

*First Round.*

BELLE—DELL S.—They were worked nearly an hour before any birds were found. On a marked bevy, Belle roaded and pointed it, and was backed. Both were unsteady to wing. The birds were followed and Belle pointed and was again backed. Belle chased. They started at 8:03 and were ordered up at 9:26. Their speed and range were poor, though Belle was the better. Dell needed a lot of urging to keep her at work.

TAMARACK, JR.—DAY DREAM started at 9:30 and ran 56m. Tamarack made a point to which nothing was found. Day Dream pointed a bevy. Mayfield ordered her on and she flushed it. The birds were followed, and Day Dream pointed a single. Tamarack crossed a fence close by and pointed a bevy. Worked on the scattered birds, he flushed one. He moved on about 100yds., pointed and waited till his handler got near him, but then moved on and flushed. Tamarack was the better in range and speed and other qualities. Both were obedient.

A fox had been jumped and there was a suspension of the running while some hounds were brought from a house close by and put on the trail. One old hound is described as closing on the fox very fast, the latter getting into cover in time to save his brush.

RODERICK J.—REX-FAST.—They were started at 10:58 and ran 1h. Quite a while they searched without finding. On some scattered birds, Rex pointed. As his handler walked up, Rex jumped in and flushed the bird. He made another flush on a single. The running was stopped and the party went to lunch. In the afternoon this brace was given a further trial.

LAD'S LADY—HAL BRADEN were started at 1:07 and ran till 1:38. Hal flushed a bevy with the wind in his favor. Lady made a good point. Hal heedlessly ran across her point and flushed two birds. He made two more flushes and Lady made a good point in cover, showing some quick, sharp work. Hal made errors carelessly.

HEMPSTEAD DON—LADY PEG II. started at 1:44 and ran 34m. After working across a stubble into a cornfield Don was missed. He was found roading in the cornfield. He took a cast out into the stubble and found and pointed the bevy, doing a good piece of work. On the scattered birds Peg secured a good point and Don backed, then Don pointed one and Peg backed. Next he pointed another single, and next he made a point to which nothing was found. Then Lady made a good point on a bevy.

RODERICK T.—REX-FAST were put down for further trial at 2:23, and were worked on birds which were marked down in the previous heat. In corn, Rod pointed a single bird. Rod in corn pointed, then flushed a bird. He was steady to shot. Rex made two flushes. Rod pointed a single bird in woods. Up at 3:11. Neither showed a wide range, though Roderick was the better. They were diligent and obedient.

*Second Round.*

Five were left in the second series.

TAMARACK, JR.—LADY PEG.—They were cast off at 3:52. Lady going down wind flushed some scattered birds. Tamarack, Jr. was suspiciously close to a bevy which flushed. He held a point on a remaining bird and Lady backed. At the edge of woods, working on the scattered birds, Tamarack pointed nicely. He was steady to shot. He got two more good points. Lady going down wind flushed a single, Tamarack pointed in the open and was backed. He then took a short cast across the fence closely and pointed a bevy, Lady close behind backing. Tamarack had the advantage in range. Lady quartered her ground with much regularity. Both were under good control. Up at 4:28.

HEMPSTEAD DON—LAD'S LADY were started at 4:30. Don in this heat showed poorly. He was often trailing rabbits and showed indecision in all his work. He roaded at first a long way on a rabbit trail. As the handlers were walking down wind they flushed a big bevy. Don was roading in an uncertain manner. He roaded to a flush on some remaining birds and was steady to shot. The flush was excusable, as he did not have the wind in his favor. Next he pointed a rabbit and pottered on its trail. Up at 4:55. The heat was a poor one in every respect.

## TUESDAY.

Clear, cool weather prevailed during the greater part of the day. Birds were found in plentiful numbers, but in such unfavorable places that the work on them was limited. There was little test on single birds, owing to the difficulty of working the heavy cover. Much time was lost in stopping the competition to go to different fields wide apart. There were delays, too, occasioned by dismounting to work out small field or fields on which the owners would not permit horses to be ridden. The quality of the work was decidedly inferior.

HEMPSTEAD DON—LADY PEG—Were started at 8:03 and ran till 8:49. A single bird was seen to flush in the open field, and on going to the place Don was found pointing a bevy. Lady passed close by the bevy but did not catch the scent. On the single birds she got three or four points. Don showed indecision and pointed listlessly on the footscent.

*Third Round.*

RODERICK T.—BELLE II. were cast off at 9:26. Belle was going down wind near a bevy when it flushed wild. On a single bird she pointed for a moment, then chased it. Roderick showed much the better quality, though far from high class in his work. Up at 9:43.

HEMPSTEAD DON—TAMARACK, JR.—Both caught scent of a single and drew to a flush. Plenty of birds were scattered about, but the dogs failed to take advantage of the opportunities. Don showed over-cautiousness, was slow in roading and pointing on footscent. Tamarack was superior in every way, though his work on birds was meagre. The heat ended at 10:05.

The winners were announced as follows: Tamarack first; Hempstead second, Lady Peg II. third, Roderick T. fourth, Lad's Lady fifth.

The conditions of the stake were as follows: For pointers whelped on or after Jan. 1, 1893. Entries closed June 1, '94. First forfeit $10, Sept. 1 $10 additional, $10 to start.

First $200, second $150, third $100, fourth $75, fifth $50.

The competition as a whole was inferior. The winners showed no special work of excellence.

### The Setter Derby.

This stake was started immediately after the Pointer Derby was ended.

There were twelve starters drawn in the following order:

Avent & Thayer's black, white and tan bitch Clementina (Roderigo—Norah III.), Frank Richards, handler, *with* Minnesota Kennels' liver and white bitch Norah IV. (Roderigo—Norah III.), Frank Richards, handler.

Minnesota Kennels' black, white and tan dog Jock Scott (Paul Bo—Canadian Lill), Geo. Richards, handler, *with* Blue Ridge Kennels' blue belton bitch Nellie Fox (Antonio—Can Can), D. E. Rose, handler.

Avent & Thayer's black, white and tan bitch Cynosure (Roderigo—Norah), J. M. Avent, handler, *with* Blue Ridge Kennels' black, white and tan dog Tony Boy (Antonio—Laundress), D. E. Rose, handler.

Fox & Seiler's black, white and tan dog Iroquois (Antonio—Can Can), J. J. Johnson, handler. *with* Norvin T. Harris's black, white and tan dog Dixie's Flag (Wun Lung—White Wings), E. Garr, handler.

Geo. A. Reed's blue belton dog Wun Lung's Pride (Wun Lung—White Wings), J. H. Johnson, handler, *with* H. R. Edward's orange and white dog Harvard (Dan Burges—Gay), Geo. Gray, handler.

Fox & Seiler's black, white and tan bitch Toney's Gale (Antonio—Can Can), J. H. Johnson, handler, *with* Blue Ridge Kennels' black, white and tan bitch Lady Mildred (Antonio—Ruby's Girl), D. E. Rose, handler.

The conditions and prizes of this stake were the same as those of the Pointer Derby. The work in the first round was imperfect so far as finding and pointing are concerned, yet superior to the work of the Pointer Stake, and, in regard to range and speed, greatly superior. Several of the competitors showed much natural merit, which with further experience may result in a better showing in field work.

*First Round.*

CLEMENTINA—NORAH II.—At 10:28 they were started in an open field, which was soon beaten out. Skirting along woods in a hollow, Clementina found and pointed a bevy well and was steady to shot. Soon afterward, at 10:43, the dogs were taken up and the party went to other grounds. The dogs were up 40m. On one of some birds which had been flushed by spectators Clementina got a good point. Next at the edge of a cornfield, both got a point on the same bevy. Next, Clementina pointed a bevy in corn, and afterward pointed another bevy which had been marked down in a fence corner. Nora flushed a single. Clementina was the better ranger, was sharper in her point work, remained out better at her work and was the better finder. Up at 12:06.

No more running was done till after lunch.

JOCK SCOTT—NELLIE FOX.—They were cast off at 1:05. Nellie was first to find. She pointed well a bevy in corn. Jock went in ahead, and at the report of the gun both were a bit unsteady. Nell in woods made a good point on a single bird. Next, in the open field, Jock stopped to a point on a bevy. The heat ended at 1:37. Nellie maintained a more uniform speed and range, and showed better point work. Jock started well in ranging, but had shortened his fling before the end of the heat.

CYNOSURE—TONY BOY.—Their heat began at 1:42. Cynosure was not quite independent at first. Both showed good speed. They had a large field in which to show their range and judgment in beating out their ground. Before they had well begun to beat it out Cynosure took a long, straightaway cast. She was seen suspiciously near a bevy which flushed fully a third of a mile away. In the meantime Tony was worked on and worked under control. On part of the bevy, presumably which had been flushed, Cynosure got a point and two points on singles. The dogs were afterward brought together. A bevy was marked down in heavy weeds. Cynosure caught scent and was drawing when the birds flushed wild. Again sent on in a large field, both dogs left it without working more than a small part of it, they taking a long straightaway cast. After a while they were found and again brought together. On a marked bevy Cynosure got a good point and Tony backed. Each in woods got a point on single birds. Next Cynosure pointed a single in woods. The heat ended at 2:41. While both showed good speed and capabilities in point work, though in ability Cynosure was easily the better, they were faulty in their range. Cynosure in particular beat out her ground with no observance of regularity, and in searching for bevies did not properly work to the gun. With more experience this fault will be corrected. Both were fast and maintained their range to the end of the heat.

IROQUOIS—DIXIE'S FLAG.—They were started soon after the last heat was concluded. Iroquois flushed a bird in open weeds, then moved on and flushed two or three more. It was a very faulty piece of work. At 3:02 the dogs were up and the party went to new grounds. The trip took 21m. Sent on, Iroquois flushed twice in an orchard. Dixie made a stylish point; nothing found. It may have been on footscent, as some scattered birds were marked down near by and some spectators said a single had flushed from the place a few moments before the point was made. Iroquois pointed a rabbit. Both showed good speed and fair range. Dixie had the merrier action and carried himself with much dash. On birds he had but little opportunity, the luck favoring Iroquois. Up at 3:46.

WUN LUNG'S PRIDE—HARVARD.—They were cast off at 3:50. Each flushed a single, Harvard showing some unsteadiness. Next Harvard in open weeds went through a bevy, half drawing, and the judges, following along, flushed it. It was a bad error. Each made a point to which nothing was found. Harvard was suspiciously close to a bevy which flushed in heavy weeds. Pride made a good point on a single bird and afterward flushed one. He was the better ranger, carried himself stylishly, and he showed better judgment and ability on birds. Up at 4:22.

TONY GALE—LADY MILDRED.—At 4:26 they began a most unsatisfactory heat. Tony was soon lost and was not found when the heat ended at 4:47. Lady got one point on a bird of a scattered bevy and was steady to shot. No estimate of the work could be made.

This ended the day's work.

## WEDNESDAY.

A dismal morning, with prospects of a cold rain, greeted the field trial party. The sky was dark and overcast. A drizzling rain set in soon after the work began. Birds were found in sufficient numbers. The work was about ordinary, with hardly a bit of remarkable incident in it.

TONY GALE—LADY MILDRED were started at 8:10, to resume their unfinished heat of the previous day. A large field was worked out, whereafter it was necessary to take the dogs to other grounds. They were up 22 minutes. Lady pointed and Gale backed. Lady moved on to locate better, when the bevy flushed wild. In the open field, she pointed at the same moment the bevy flushed. At 9:13, Lady was taken up and Tony was run alone. In woods Tony wheeled prettily to a point, and started to chase when the birds flushed. Next he pointed in woods; nothing found. Up at 9:20. He ranged fairly well, but his point work lacked finish.

Six were retained in the second series.

*Second Round.*

CLEMENTINA—NELLIE FOX.—The dogs were called up to start, but no available ground being near and there being every prospect that the rainfall would be greater, the judges announced that there would be no further running till after lunch. At 1:07 the dogs were cast off. A light rain fell during the heat. Nell pointed a bevy well and Clementina backed or pointed. The birds were followed. In corn, Clementina got one point on the bevy and two points on single birds. In a cornfield Nell pointed a bevy. Each made points to which nothing was found. Rabbits were very numerous and frequently were worked by the dogs, to the detriment of their work on birds. The heat ended at 2:11. Both ranged well. Clementina was difficult to control and sometimes worked to the gun, sometimes not. In this respect Nellie was the better.

CYNOSURE—WUN LUNG'S PRIDE.—On a single of some scattered birds in woods, Pride made a good point. New ground then was necessary, and it required 26 minutes to transfer the dogs to it. On some scattered birds in weeds, Pride made a good point, and on some remaining birds, Cynosure pointed and was steady to shot. She showed a great deal of self-will and did not work regularly to the gun, though showing excellent natural ability. Pride flushed a bird in woods and Cynosure chased it. They started at 3:06 and ran 29 minutes. Pride had graceful action and worked well to the gun, but was short of experience in finding and pointing. Cynosure was speedy and sharp on birds.

LADY MILDRED—DIXIE'S FLAG.—At 3:44 they were cast off in an open field. Lady pointed a bevy and when the gun was fired she started to chase, Mr. Rose explaining that it was after a rabbit which ran a moment after the birds flushed. The circumstances seemed to bear out his statement, as she made most of her chase in a different direction from the flight of the birds. In thick cover in woods, Lady made a point on a single, after which both roaded to the edge of the woods, about 40yds., where the birds flushed wild. Each then made a good point on a single bird in the open. They were ordered up at 4:00. Lady was the wider ranger and was more successful in her point work. Dixie was very stylish in his work, and will improve greatly with more experience. This heat ended the stake and the work of the day.

The judges announced the winners as follows: Clementina first, Nellie Fox second, Cynosure third, Lady Mildred fourth, Wun Lung's Pride fifth.

### The All-Age Pointer Stake.

This stake showed better work, though at the best there was nothing brilliant in it. The best work, a few exhibitions by two or three dogs, was sharp and clean.

Mr. G. T. Kerr, of Indianapolis, acted in place of Mr. Stoddard, who had a dog to run in the stake. The competition was skillfully handled and the dogs well placed.

Following is the order of running of the ten starters:

E. O. Damon's liver and white dog Strideaway (King of Kent—Pearl's Dot), Geo. Gray, handler, *with* L. W. Blankenbaker's liver and white bitch Lad's Lady (Lad of Rush—Lady Margaret), Ed. Garr, handler.

Hempstead Farm's liver and white dog Hempstead Duke, J. M. Avent, handler, *with* R. J. Martinez's liver and white dog Romp III. (Coney's Fritz—Dolly), R. J. McCartney, handler.

W. T. Hunter's liver and white bitch Lady Peg II. (King of Kent—Lass of Bloomo), F. Richards, handler, *with* Stoddard & Kidwell's black and white dog Tick Boy (King of Kent—Bloomo), J. B. Stoddard, handler.

W. N. Kerr's black and white bitch Queen Regent (King of Kent—Vickery's Daisy), Frank Richards, handler, *with* J. H. Alexander's liver and white dog Dick Beaufort (Spotted Boy—Gip Beaufort), B. W. Butterfield, handler.

W. N. Kerr's liver and white dog Little Ned (Ridgeview Dazzle—Kate Claxton), F. Richards handler, *with* D. P. Ritchey's liver and white dog Don (Trinket's Coin—Moulton Patti), Ed. Garr, handler.

The conditions of the stake were as follows: For pointers which had never won first in an All-Age stake in any recognized field trial in America. First prize $150; second, $125; third, $100; fourth, $75; fifth, $50.

Strideaway ran in good form and showed excellent capabilities, though his work was not uniformily up to the best standard. He ranged fast and beat out his ground with fair judgment. The bird work was difficult, owing to heavy cover, therefore too much should not be exacted for a standard of good work.

Little Ned also displayed excellent capabilities. His speed and range were good though he did not beat out his ground always with the best of judgment. On birds he showed good sharp work and was easily second to Strideaway.

Lad's Lady improved greatly on her Derby form, and made a creditable showing.

Lady Peg II. ran much better than in the Derby and showed some meritorious work.

Trick Boy was not runniug in his best form, but showed good qualities.

*First Round.*

LAD'S LADY—STRIDEAWAY.—From the start at 8:20 in a large weed field, it was plain that Strideaway had not fallen off in form from last year. He ran strong and fast. They ran ten minutes, when the field being worked out it was necessary to go to other ground, which transfer consumed ten minutes. In woods, Strideaway pointed and Lady backed. No bird was found, but it was explained that a rabbit had run close by and two squirrels were in the tree overhead. Sent on, next Lady pointed well a bevy and Strideaway backed or pointed. Both were steady to shot. Rabbits were so plentiful that they were a nuisance in the competition. In a hollow in heavy brush, Lady pointed, roaded about 50yds. and pointed a bevy. The dogs were widely separated. In the meantime Strideaway had pointed some birds. The dogs were brought together, and Strideaway pointed some remaining birds of the bevy Lady had pointed. The heat ended at 9:47. Strideaway was the speedier and wider ranger, and both had done good point work.

HEMPSTEAD DUKE—ROMP III.—The heat began at 6:53 on some scattered birds of the last heat. They failed to find, though Duke pointed where the birds had lit. Romp pottered constantly, carried a low nose, showed no working speed and rarely went 20yds. from his handler. He showed no ability on birds. It was said that Romp was going through the circuit. It is only fair to say that he can not win in any company, and no doubt Mr. McCartney in a spirit of fairness will tell Romp's owner the same. Both roaded in heavy cover. The birds were running and nothing decisive in the way of point work was done on them. Duke pointed twice on singles in woods; Romp backed. Next, Duke pointed, roaded, pointed, and gave it up—no birds. Up at 10:25. Duke did not work above ordinary.

LADY PEG II.—TICK BOY.—They started at 10:45 in open weeds. Tick showed some lameness in his foreleg. He took a cast, pointed a bevy and was steady to shot. Lady flushed a single and stopped to wing and pointed the rest of the bevy, which flushed wild. In the open stubble Tick roaded down wind to a flush on a bevy. Next in woods on scattered birds Tick pointed and was steady to shot. Each pointed in woods and nothing was found. Tick in open weeds pointed a single. Both pointed at the same time, moved on and Lady pointed the bevy; Tick backed. Lady flushed some scattered birds. In the open field Tick wheeled prettily to an accurate point on a single. Up at 11:18. Lady's point work was mixed, good and faulty. She showed fairly good range and speed. Tick did not show first-rate judgment in beating out his ground, and his point work was pretty good and partly poor. His range was wide.

QUEEN REGENT—DICK BEAUFORT.—The heat was a poor one, neither showing much merit. Queen ranged wider than Dick, though a narrow ranger herself. She pointed a single in woods, then moved on and flushed it. Afterward she made two flushes. Up at 11:48.

The party went to lunch.

At 12:53 the heat was resumed. Queen made a point on a bevy in corn and was steady to shot. Up at 1:26.

LITTLE NED—DON.—At 1:29 they started in the open. Don pointed in corn, and was held some moments till a judge came up. Then he began roading. About 80yds. further on in the cornfield Ned pointed a bevy, but whether Don was roading it at first or not it is impossible to say. In woods

on scattered birds each made two points. Up at 2:27. Both ranged fairly wide at good speed, Little Ned the better. The point work was fairly good.

*Second Round.*

Six dogs were retained. The selection was skillfully made.

STRIDEAWAY—TICK BOY.—They started at 2:37. On some scattered birds which lit in the open and along a fence, Strideaway was first to point; Tick backed. Next, Tick, standing out in field, pointed a bevy by a fence. Strideaway coming along the fence pointed the same bevy. Tick then broke his point and flushed the bevy. Following along the fence Strideaway pointed and Tick backed and a single flushed. Strideaway pointed in open weeds and nothing was found, and next he made a flush on a bird. Next he pointed scattered birds. Up at 2:54. Most of the work was on scattered or marked birds and the range was about alike, the advantage, if any, being with Strideaway.

LAD'S LADY—LITTLE NED.—They started at 2:58. A circle was made through a large field, then they were worked back to a marked bevy in open cover. Lady pointed the bevy and Ned backed nicely. Next Ned found and pointed a bevy in weeds and was steady to shot. In open both pottered some on scent and pointed; nothing found. Up at 3:30. Both ranged well and had speed, Ned the faster.

LADY PEG—DON.—In a weed field they started at 3:36. Peg pointed nicely in the open facing toward a cornfield. Richards failed to flush, ordered Peg on to locate. Don was sent in, crossed the fence into the cornfield and, the birds being but a few yards away, he soon pointed them. The find was Peg's and she should have had the opportunity to locate without competition. Still, it is probable that she got credit for both the find and point. Both ranged well in the beginning but slowed up toward the end of the heat.

*Final.*

STRIDEAWAY—LITTLE NED.—They began at 4:10. Ned was roading birds near briers. Some of the birds flushed wild. In corn, Ned pointed a single, left it and was returning when the bird flushed. He probably was trying to locate it better. Each pointed a single. Ned in dry leaves pointed a bird, drew cautiously to it till it was under his nose, then pounced and almost caught it. Up at 4:32. Strideaway had the best of the heat, which was good, closely and well contested.

The dogs were placed as follows: First, Strideaway; second, Little Ned; third, Lad's Lady; fourth, Lady Peg II.; fifth, Tick Boy.

They were quite correctly placed, on a fair and just estimate of their work.

### All-Aged Setter Stake.

The winners were: First, Rodfield; second, Blue Ridge Mark; third, Gleam's Sport; fourth, Dan's Lady and Allene; fifth, Topsy's Rod, Minnie T. and Dan Burges.

B. WATERS.

[Comments on the running in this stake will be given next week.]

## INTERNATIONAL FIELD TRIALS.

### Nov. 6 to 9.

THE fifth annual field trials held by the International Field Trials Club were brought to a successful close on Friday morning. The trials were held again on the grounds surrounding the village of Mitchell's Bay, Ont., the old grounds at Louisville not being available on account of the scarcity of birds.

Though the entries were not so large as in former years the trials were a success and passed off without a hitch. Birds were found in quite sufficient numbers after the first day when too small an area of country was covered. The quarters at Mitchell's Bay were very comfortable, hosts Raymond and McDonald doing all in their power to make the visitors' stay pleasant. The Garner House, in Chatham, was the club's headquarters this year, genial Bill Peck, of the Kankakee House, the friend of the field trial men in this section, having left town.

The judges were Messrs. W. T. Tristem, of Detroit, Mich.; Thomas Guttridge, of Chatham, and John Davidson, of Monroe, Mich. They worked hard and cheerfully, and their decisions in the Derby were correct. There was some kicking over the award of first to Dash Antonio, but I think most of the kickers were converted to the judges' way of thinking before the trials closed. Undoubtedly he was rightly placed for his work, aside from the first heat which the judges did not (and rightly) take into consideration, was what might be termed brilliant and far ahead of anything in the stake.

The attendance this year was small as compared with that of other years, the bad weather on the second day keeping many away who would have attended.

Those present were Messrs. J. B. McKay and Geo. Armstrong, of Detroit; Mr. Richardson, Saginaw, Mich.; T. G. Davey, H. Marshall Graydon and Jack Armstrong, London; R. Bangham, Windsor, Ont.; J. R. Harrington, Kingsville, Ont.; Sefton Hallam, Leamington, Ont.; Dr. Totton and J. Huddleston, Forest, Ont.; Allen Newbury, Ed. Warner, New York; Harry Anderson, Mr. McLaren, W. B. Wells, J. Spracklin, James McGregor, A. Wells, Chatham, Ont.; B. Hayman, Chicago.

At the meeting of the club held the night before the trials the following officers were elected: President, Dr. Totton; First Vice-President, T. G. Davey; Second Vice-President; R. Bangham; Secretary-Treasurer, W. B. Wells; Executive Committee: Thos. Guttridge, Dr. Nichols, C. R. Atkinson, of Chatham; J. G. Armstrong, W. D. Tristam, F. W. Eddy, S. J. Miller, of Detroit; Thos. Johnson, Winnipeg, Man.; L. H. Smith, Strathroy, Ont.; Wm. Brailsford, Whitechurch, England.

### TUESDAY.

### The Derby.

For setters and pointers whelped on or after Jan. 1, 1893. Forfeit $2.50 and $2.50 additional to start; 40% of entrance money to first, 20% to second, 15% to third, and 10% to fourth. Eleven starters. The dogs were drawn as follows:

T. G. Davey's pointer Forest Quail (Donovan—Forest Nell), *with* Dr. Daniels's pointer Plain Sam (Hal Pointer—Kent's Star).

J. B. McKay's Irish setter Kellane (Kildare—Ruth), *with* Dr. Totten's English setter Hanna (J. E. D.—Carrie J.).

T. G. Davey's pointer Faustina (Ridgeview Faust—Peggie), *with* Stagmen's English setter Judy (Sport—Bell).

W. J. Gardiner's pointer Engerita (Molton Banner—Graphic's Diana), *with* W. B. Wells's English setter Manitoba May (Jacob Staff—Manitoba Bess).

Sidney T. Miller's English setter Rosebud (Roy of Colehill—Toledo Queen), *with* R. Bangham's English setter Dash Antonio (Antonio—Lady Lucifer).

J. B. McKay's Irish setter River Roe (Kildare—Ruth), a bye.

*First Series.*

The weather the night before the trials began looked anything but prepossessing for a successful start on the morrow, heavy falls of rain and snow flurries alternating for two or three hours, and made things look blue. However, about midnight the sky cleared and a north wind set in. The start was made from the Garner House at about 8 A. M. for our long drive of 14 miles. Game promised to be very abundant, three bevies being found in about 40 minutes; after that the quail dodged us very successfully for the balance of the day, only six bevies all told being found.

FOREST QUAIL—PLAIN SAM.—Quail handled by Allen, Sam by Hallam. Put down at 10 A. M. in a large stubble, both started fairly well but Sam had the wider range and the more independent manner of working out his ground. Quail generally followed close in the others footsteps. In some brush and weeds a bevy was flushed, Sam was in the near vicinity but whether he or his handler was responsible for this it is impossible to say. On singles some slovenly work was done, then along a fence row Quail pointed a single which his handler failed to flush; then Sam pointed two or three times along the same fence row and dogs up at 10:30.

KILLANE—HANNA.—McGregor had charge of the former, Huddleston the latter. They were cast off at 10:45. After three or four fields had been drawn blank, Killane flushed a large bevy in an open stubble field with the wind in his favor and appeared quite unconcerned about it although he moved at a quicker pace afterwards. Then Hanna, to even matters as it were, flushed another large bevy rather more excusably. In the thicket on the singles of the last bevy no creditable work was done, although abundant opportunities were offered. Killane did make a couple of uncertain tail-wagging points on singles and quite a lot of birds were flushed in a reckless manner. The heat was over at 11:20. Hanna probably had the best of the poor race.

FAUSTINA—JUDY.—Handled by Armstrong and McGregor respectively. Put down at 11:25. Faustina appeared with her leg tied up, the result of a barb wire cut. The second accident of the kind in the week, but it did not appear to affect her freedom action much. She was the first to find a single in a brush pile and behaved nicely to wing, and was well backed by Judy. Then Faustina got another point, and was indifferently backed by Judy to command. The heat wound up at 12:05 with a probable flush to Faustina.

ENGERITA — MANITOBA MAY.—Spracklin handled the former, her owner the latter. Down at 12:35. Both started at high speed; Rita was the faster. May in a thicket made what looked very much like a flush; then she pointed a single, and Reta jumped in and flushed it, and the unsteadiness of both almost amounted to a chase. Then May had some fun with a blackbird, and Rita flushed and chased a quail, and the heat ended in excitement. Up at 1:30.

ROSEBUD—ANTONIO.—McGregor handled Bud, Spracklin Dash. They were let go in a large cornfield at 1:40. Dash started at a clipping gait and cutting out his ground in fine style, knowing right well what he was after, soon appeared over a high dredge dump at one side of the field. The spectators on ascending this found before them a 40ft. ditch filled with water and Dash was on the other side working merrily on hot scent, pointing and drawing. Two birds flushed near him but he did not mind that, nor the furious clarions of numerous whistles that were rending the air. There being no bridge near a leaky scow was procured with difficulty and Bud and the party were ferried across. Dash in the mean time pointed a single, and there being no one near to flush for him he did the job himself, and chased to a thicket near by. When the trial was resumed he made amends by doing some quite good work, getting three points and retrieving nicely. Bud was slow; she made a savage snatch at a bird she flushed just before the call of time. Up at 2:15.

RIVER ROE a bye.—Down at 2:35, with McGregor as handler, to run a bye with Judy. In the same field they ran for an hour and thirty minutes without finding.

*Second Series.*

PLAIN SAM—FAUSTINA were put down at 4:25. Faustina appeared slightly lame, but went gamily. She was the first to find, a single, which she pointed nicely. Then she got a doubtful point on a bevy and Sam made an excusable flush; then he left a true point he had made, the bird being flushed afterward. Sam did not improve his chances materially. Up at 5:15. This finished the day's work, about three miles from the hotel.

### WEDNESDAY.

Heavy, low-hanging clouds promised bad weather this morning, and about 10 o'clock a snowstorm set in, making things very uncomfortable for man and beast, and compelling us to quit operations about 1:30 P. M.

RIVER ROE—JUDY, the first brace, were put down in the large open field behind the hotel at about 7:15. Roe had something of an advantage over Judy in pace and range this morning, but she pottered miserably while on game. Later on Judy did a pretty piece of work on a bevy in the open stubble and was indifferently backed by Roe, to command, then Judy was taken up and Roe was sent on to work on the singles alone; she succeeded in establishing one fair point and dogs ordered up at 7:45.

DASH ANTONIO—MANITOBA MAY.—Put down at 8 o'clock and ran an hour and thirty minutes. Both ranged well at high speed, Dash the better, though sometimes out of hand, as also was May. Dash picked up the only bevy found, in a thicket, just before they were taken up at 8:45.

RIVER ROE—FAUSTINA were sent away in the same old weed field that had been worked out a dozen times before and where the dogs could not be seen ten feet away. Faustina got a point on a single after considerable work and Roe made an apology for a back.

JUDY—DASH ANTONIO.—Down at 10:35. The judges were apparently determined to make Dash run the gauntlet of them all. Of course he outranged Judy and missing for a few moments found a bevy in pretty style in a weedy creek bottom. Judy not near to back. Later Judy had a chance on another bevy in the same creek bottom but flushed it.

PLAIN SAM—MANITOBA MAY were ordered down to try them on some birds marked down in a large stubble; both dogs were soaking wet and ranged poorly; they failed to get a point and the spectators flushed the birds. Up at 11:30.

DASH ANTONIO—FAUSTINA.—Down at 11:40 to decide on first place. Dash was now wet and did not go with his usual vim but he did better than Faustina. They ran for ten minutes without a find and were ordered up at 11:50. The Judges then announced the winners:

Dash Antonio first, Faustina second, Judy third, Plain Sam fourth.

The winner is a rather fine-looking dog, of good quality, possessed of great speed and dash, and is a very promising puppy. Faustina, second, is a small-sized pointer bitch, of good bench form. She ambled through the heat without an error in bird work, but she does not impress me as being a very bold and fearless ranger. Judy, third, is a plain-looking English setter, with fair hunting ability. Plain Sam, fourth, is a large pointer dog that will probably improve in his work.

### All-Age Stake.

For pointers and setters. Forfeit $5, and $5 additional to start. First, 40 per cent. of entrance money and cup, presented by Sir Casimir Gzowskie and Christopher Robinson, Q.C. (cup to be held yearly until won thrice by same kennel or owner; won last year by W. B. Wells with Cleopatra); second, 30 per cent., and third, 15 per cent.

The dogs were drawn as follows:

R. Bangham's English setter Doc (Bangham's London—Nea) *with* Dr. Wesley Mills's pointer Chiara (Ridgeview Rumor—Frivolity).

H. Marshal Graydon's English setter Monk's Fanny (Monk of Furness—Fayette) *with* W. B. Wells's English setter Cleopatra (Mingo II.—Cambriana).

W. B. Wells's English setter Luke (Toledo Blade—Cambriana) *with* R. Bangham's English setter Dash Antonio (Antonio—Lady Lucifer).

T. G. Davey's English setter Brighton Tobe (Locksley—Leddersdale II.) *with* Eddy & Armstrong's English setter Toledo Bee (Toledo Blade—Maggie Bee).

Dr. Daniel's pointer Beppo's Maid (Beppo III.—Duchess Graphic) *with* Dr. Totton's Warwick Nellie (Canadian Dick—Fancy Free).

Fred W. Shaw's pointer Margaret Kent (King of Kent—Margaret) *with* W. B. Wells's English setter Luna (Cincinnatus—Daphne).

Dr. J. L. Nicholls's English setter Lady Locksley (Locksley—Armstrong's Kate).

No time was wasted in commencing the first series, the draw having taken place the night before. The miserable weather continued.

*First Series.*

DOC—CHIARA.—Spracklin had charge of Doc, McGregor of Chiara. Down at 12:40, in a heavy slashing. Both started well, but Doc took the heavy cover with more courage than Chiara, and was not long in finding and pointing a bevy at a brush pile, behaving nicely to wing; Chiara not being near to back. Then he pointed a single under a log and Chiara backed; Doc a little unsteady to wing; then he nailed part of the first bevy at another brush pile and behaved nicely. Ordered up at 1:20 with the heat in favor of Doc.

We then adjourned to the roadside and partook of a cold "hand out" in a blinding snow storm and pretended to enjoy it.

MONK'S FANNIE—CLEOPATRA.—Fan handled by owner and Cleopatra by Spracklin, were called at 1:20, and put down in a large stubble. Cleopatra, the heroine of last year's stake started with her usual joyful vivacity, and Fannie also ranged well. Cleopatra soon nailed a brace under a log, and this was quite a clever piece of work under the circumstances. Fannie would not back, though given the opportunity, and after a little more birdless work they were ordered up at 1:35. The judges now decided that the weather was too stormy to continue the trials, much to every one's satisfaction, and we all stepped along the road three miles to the village.

### THURSDAY.

On looking out this morning the prospects for a start did not look very bright, for the snow was still coming down. About 8 o'clock the sky showed signs of clearing and a start was made from the hotel at 9:15.

MONK'S FANNIE—CLEOPATRA were put down at 9:20 to finish the heat of yesterday; neither seemed to relish the snowy going but Cleopatry ranged the best; no bird work was done and they were ordered up at 9:45.

DASH ANTONIO—LUKE.—Dash handled by Spracklin, Luke by owner, were put down in a large open field at 10:05. Both ranging wide and fast, Dash slightly the best in speed, Luke in method. Sent into a weedy creek bottom, Luke going at full speed stopped on a positive and stylish point on a bevy. On the flush Dash, in the field beyond, chased the flying birds with vigor. Further along the same creek Luke secured two good points and Dash a false one. No more work on birds was done though considerable country was thrashed out. Up at 10:40 and a move was made to new grounds.

BRIGHTON TOBE—TOLEDO BEE.—Armstrong had charge of the former and Tom Allen the latter. Put down in slashing at 10:52. Both ranged well but Tobe was the better. He began the bird work by roading a bevy a long distance to a good point—a clever piece of work. Then he got three good points on the scattered birds and on the last one Bee coming up probably got credit for a flush, but I do not think he saw the pointing dog, which was behind a log. Up at 11:20.

BEPPO'S MAID — WARWICK NELLIE.— Hallam handled Maid and Huddleston Nellie. Down at 12:50. It stubble both seemed intelligent and busy workers and very much alike. They ranged for half an hour through a variety of country, mostly wooded, without finding. At last Maid came to a good point at a brush pile on a single; Nellie brought up would not back. After the bird had got out Maid moved round the same pile and pointed again, and a bevy was flushed; Nellie had resumed her ranging. Then Maid nailed another single in good style, and ordered up at 12:30. Maid's range at the close was very limited indeed. We now had lunch.

MARGARET KENT—LUNA.—Down at 1:05. Margaret was handled by Huddleston and Luna was handled by Spracklin. Margaret started ranging very fast—quite as fast as anything in the stake so far. Luna also showed that she is possessed of speed as well as pretty bench form. After quite a run Luna, in a wood, began roading a bevy in a positive but slow manner for about 100yds.; and just as she came to a point Margaret ran up and the bevy flushed; both were a little unsteady. Then both got independent points about 50yds. apart. Margaret held the bevy, Luna a single; both steady to shot and wing. Then some quick, sharp bird work was done, both getting two points on singles, but were a little unsteady on some of their flushes. Ordered up at 2 o'clock with honors about even.

LADY LOCKSLEY, A BYE.—Handled by Spracklin, she was put down at 2:10 to run in the bye, accompanied by Warwick Nellie. Lady ranged out quite well, though not very fast. In cornfield Nellie pointed a bevy and Lady backed. Both behaved nicely. Sent on to heavy cover to work on scattered birds, a lot of flushing was done, six or seven grouse breaking cover. Nellie was credited with two points on singles, but Lady seemed off nose. The heat wound up at 2:45, while Nellie was treating a rabbit like a cat does rats.

*Second Series.*

BRIGHTON TOBE—CLEOPATRA were put down at 3 o'clock and ran for 1h. 15m., and a great deal of interest was taken in the race between these two well known workers. In the woods beyond the stubble Star was not long in nailing a ruffed grouse in good style, and was well backed by Tobe. Sent on into the open Cleo roaded shortly to point and was moving on probably to locate when some spectators flushed a bevy close by. Tobe coming up pointed in the place that Cleo had left, and she on her way back refused to notice him. Sent on into woods on scattered birds Tobe pointed a black squirrel. Then in a meadow Cleo made a pretty road to a bevy and a bad flush. Then Tobe flushed a single. A single got up near Cleo which she perhaps ought to have pointed, and she was steady to wing. This did not count to her discredit. Then Tobe made a good point on a brace in brush pit, and Cleo coming up from the opposite direction, went in and the birds flushed. Both had a reef or two in their speed when they were ordered up at 4:45.

LUKE—DOCK.—If there had been any birds in the large stubble field where these two were put down at 4:20 Luke's beautiful systematic quartering would have given them little chance of escape. Dock was also good in this respect though not so speedy as Luke. In woods, having little undergrowth, Luke roaded a bevy about fifty yards, going at nearly full speed, to a pretty point with one foot on a log. Dock, coming up after the bevy had flushed, backed him in style, making the prettiest picture of the trials. Both were going strong when ordered up at 5:15.

### FRIDAY.

This morning dawned with the snow coming down in heavy flakes making things look blue for an early start. At 8:20, during a lull, a start was made.

MARGARET KENT—BEPPOS MAID were sent away in a stubble field at 8:30. Margaret was the best in speed and range and soon came to a point on a bevy, Maid coming up backed prettily, Margaret then broke point before the handler could get to her and rushing in, flushed, thus spoiling a very good piece of work. Maid remained staunch under the trying circumstances. Up at 8:50 without any more bird work.

LUNA—WARWICK NELLIE were put down at 9 o'clock in a cornfield and both showed good speed. In a thicket Luna roaded to a point on a bevy in treetop, broke her point and went in lively to a flush and was unsteady. Then along a ditch both pointed, but Luna's was a true one, though she was again unsteady to wing. Up at 9:15.

*Third Series.*

LUKE—BRIGHTON TOBE.—Put down in stubble at 9:25 to run for what proved to be first place. This was probably done to conform to the rule. This rule should be remodeled. It should read "first and second winners shall run together and be tried on birds." Tobe had the best of in speed in a four-minute run.

WARWICK NELLIE—BEPPO'S MAID.—Down in the open at 9:35. Nellie out-ranged Maid and had better style, but the latter was the first to find—a single in treetop. Nellie did not back, though she had the chance. Maid steady to flush. Both failed to do any more point work and up at 9:55.

DOT—TOLEDO BEE were put down in stubble at 10 o'clock. Why Toledo Bee was called down at this stage of the game will probably remain one of the dark, unfathomable mysteries in the history of field trials. Doc showed the most intelligent method of working out his ground. Bee was erratic in range and speed. Up at 10:10.

WARWICK NELLIE—BEPPO'S MAID—Were sent away at 10:15. It apparently took the judges a long time to gauge the capabilities of this pair. Several fields were drawn blank, then along a creek bottom Nellie pointed a bevy in style, and was well backed by Maid. Then Nellie false pointed and was again backed by Maid. In orchard where birds had been marked down both pottered on footscent and made false points. Nellie was the principal offender in this respect. They failed to get a point on the only bird found, though both had the opportunity. They simmered down to very ordinary going at 1:15, when they were ordered up. This heat finished the trials, for on our arrival at Raymond's the judges announced their decision. Brighton Tobe first, Duke second, Warwick Nellie third.

First and second winners are too well known to require description, Brighton Tobe having won the All-Age at the Manitoba trials. Nellie is a small-sized pointer of good form.

I do not agree with the awarding of first and second in this stake. On the work done, Luke should have had first, his work aside from that ridiculous four minute heat was superior to Tobe's. He made two good bevy points and two singles with probably half Tobe's opportunities on birds. His speed was nearly if not quite equal, and his quartering very much superior to Tobe's. If Tobe and Cleo had quartered their ground properly, as Luke did in the large stubble (in which, by the way, he was put down directly afterward), that bevy would never have been flushed by spectators. Furthermore, his style on point and way of carrying himself were very much superior to Tobe's, and moreover, did no doubtful work.

Tobe's work lay in speed, range, a good road and point on bevy, four singles and three or four backs. He is good on this and from a distance. Doubtful work—missed opportunities on two bevies, scattered in small area; passed quite close to a bevy that Cleo flushed, pointed too much on foot scent and was somewhat erratic in range at times. Bad work—flush of single in heat with Cleo.

Nor do I agree with the award of third to Warwick Nellie. Doc having done better work for the place by reason of his excellent bird work in the first heat under trying circumstances; his courageous manner of working out the heavy cover and his free ranging in the open. A. W.

## New England K. C. Terrier Show.

[*Concluded from page 409.*]

DANDIE DINMONTS.—These were entirely confined to one kennel, that of the president. In challenge dogs King o' the Heather won over his kennel mates Amphion and Ainstey Daisy, both the dogs are faulty in front, the bitch being truer there, but I think Amphion's greater length and strength of head and better body might have pulled him into first place. In open dogs Laddie was the only competitor. Gyp V. was not considered good enough for first, and in fact is a poor sort. We should advise the Heather Kennels to give these open dogs away and start afresh. Mr. Brooks not competing for specials these of course did not fill.

BEDLINGTON TERRIERS.—Only two, and these well known; both were rather short of coat, the Professor especially. Mount Vernon Tibbie repeated her former wins.

SCOTTISH TERRIERS.—There were plenty of Tam o' Shanters round the club grounds, but few real oatmeal Scotchmen; had there been, what memories of their native braes and cairns the sight of such a row of sharp, prick-eared little customers at this show would have brought to mind. These terriers grow on one. At first sight nine out of ten will say, "What a comical little dog. What is it?" But get them into your eye and see a number of good ones together, and if their sharp, intelligent faces, knowing, cocky walk and general air of "devil come may" do not excite your interest and admiration, then you have not a touch of sporting blood in you. There is another thing about the breed, they seem to come more evenly than most breeds, that is judging from those of the Wankie Kennels, who, of course, with the large number they breed, are enabled to even up their exhibit. Still, they seem to be breeding with good judgment, for the results are to be seen, but they will soon require new stock for outcrosses. Messrs. Little and Willard Clarke are also doing good work with the breed, though the latter cares more for their woodchuck punishing powers than anything else.

In challenge dogs it was Tiree, Rhudaman and Kilroy. Since he has changed hands Rhudaman has improved so that verily Tiree must look well to his laurels or he will win few more, though his much straighter front will always be a great advantage. Kilcree has not yet been found. In bitches Wankie Diana had a walkover. Open dogs was a hot lot; there really did not seem to be a bad one, though one or two stood out prominently, they were very sorty. First went rightly to Wankie Tam, whose smart, long, keen head and compact body are very taking. The new dog, Bellingham Bailiff, came second; he is a nice sort, looked a trifle light in loin, but boasts a good coat, long, punishing head, good front and bone. Kilbar, Jr., third, is a little long and light in body, not depth enough. Kilrain, reserve, is not long enough in head and ears look large, faulty in front, good coat and body. Wankie Dandie and Masher were vhc.; the former is a nice-shaped one that did not show very well. Masher carries his brush too gay, and should be lower to the ground. Wankie Caddie, hc., also gets his tail too far over, and is not deep enough in loin. Newcastle Sandie and Allan, hc., were at Boston last spring; the former is too round in skull and coat should be harder, and Allan is too coarse and broad in head; good otherwise. The same may be said of Indiana Scottie, should be cleaner in head and show more smartness and quality. In bitches, a capital one by Tiree and Culblean did not shame his parentage; good coat and length of face, well carried ears; seemed in whelp. Vorda, second, was at Providence, and Wankie Daisy and Cambria have both been commented on in these columns. In the American-bred classes the winners have all been described above except Miss Ted, a fairish sort, with a soft coat. In puppies the winners were Kilbar, Jr., and Miss Ted, with Hazelcroft Sheen vhc., a rather light-bodied one, and not strong enough in head, and too short. Wankie Kennels took the kennel prize.

IRISH TERRIERS.—There was little improvement seen here, the old winners need not be alarmed, they seem well able to hold their own. The majority of entries seem to lack quality, are not clean enough in head, broad skulls, light eyes and large-sized ones predominating. Merle Grady had no difficulty in beating champion Boxer IV. in challenge dogs, though a little open and ragged in coat. Dunmurry, nicely shown, enjoyed her honors alone in the corresponding class. In open dogs eleven came forward, but they were a mixed moderate company. Jack Desmond, a neat little good-fronted dog, whose ears should fold closer, won from Martin Shamrock, the new dog, a racily built one, good carriage of ears, but head rather coarse and too wedgy looking, too much hair on head and quite large enough. St. Blaise, reserve, is a little short in muzzle, but his nicely turned body and good coat and well carried drop ears are in his favor. Regent St. Mike, vhc., is light in middle piece, fair head, but big in ears and faultily carried. His Honor's light eye and broad skull are familiar faults; he looked well. Mike Murphy is too coarse in skull, nice ears, turns his feet out a bit and crouches at stern. Tubbs, c., is coarse in skull. In bitches (3) the judge had an easier task. Banty Norah won from Brina, being a little better in coat and body, ears should be carried closer, both have weak, short muzzles. Brina's bag hung down and did not add to her appearance. Daisy, vhc., was short of coat, has too much stop and is full in brow, short-faced and feet turn out, so she is not a very good specimen. The Hempstead Farm Kennels benched about half a dozen N. F. C., among them their new importations; they seem a good lot and we were particularly struck with Lady Eva's beauty and quality.

BLACK AND TAN TERRIERS.—At a terrier show these should have been better represented, for with the exception of Broomfield Sultan, looking fit as a fiddle, there was not a good one in the lot. In open dogs (2), Rochelle Rush must thank his stars Jasper has gone so coarse and heavy in head and front. In these particulars he wins, though none too good himself in forelegs. Lady Prudence, the Providence winner, had a walk over in the next class; she is poorly cropped, coarse in head, and washy in tan.

SKYE TERRIERS.—Only two where there should have been a dozen. Both are well known, looked in fairly good coat, especially Maggie, and were alone in their classes.

YORKSHIRE TERRIERS.—A nice-coated little silver, a bit mixed in color, brought the catalogue to a close.

SPECIALS.

Bull-terriers, best kennel, F. F. Dole. Boston terriers, best kennel, Bayonne Kennels. Best dog, Jack. Best bitch, Countess. Fox-terriers, best kennel of four smooths, Blemton Kennels. Ditto wires, Hill Hurst Kennels. A grand challenge cup, value $300, for best fox-terrier in the show, Blemton Victor II. Best kennel of ten fox-terriers, L. & W. Rutherfurd. Best pair, dog and bitch, Cribbage and Surrey Janet. Best in puppy classes, Beverly Rally. Best American-bred smooth dog under two years, Beverwyck Royalist. Best kennel of four wire-haired terriers, Hill Hurst Kennels. Best wire-haired dog shown with two of his get, Brittle, with Mister Great Snap and Brittle Beaut. Best wire-haired dog or bitch, Cribbage. Best wire-haired dog in open class, Mister Great Snap. Best wire-haired bitch in open class, Surrey Janet. Best wire-haired puppy, Hill Hurst Trick. Irish terriers, best kennel, Walter J. Comstock.

NATIONAL BEAGLE CLUB FIELD TRIALS, 1894.

# DOG CHAT.

Mr. Frank S. Anderson of Chicago, Ill., has lately imported the great Dane bitch Norah and she is said to be a good one. She was bred to champion Melac Nov. 1, and her union with this crack should be productive of good results.

The Terra Cotta Kennels did not keep the Russian wolfhounds Odrooski and Inkerman which they purchased recently from the Marlborough Kennels. Dr. Drummond of Montreal purchased Odrooski and Dr. J. Parker Vosburgh of the same city bought the pup. Odrooski has won a number of prizes.

This week we are called upon to report four important field trials, a state of affairs that happily has never occurred before, and therefore a number of letters and Dog Chat paragraphs are crowded out.

We are also compelled to hold over a letter from Mr. John Bateman, in which he informs us of the cruel shooting by a farmer of his two beagles on Thursday, Nov. 1, while hunting on Staten Island. The dogs were shot at the edge of a swamp and left to die at leisure. The S. P. C. A. people will probably be called upon to look into the affair, as well as the National Beagle Club.

The beagle Ringleader, first at Providence 1894, is the sire of the English dog Herongate Forester, winner of the champion prize at the Kennel Club show held at the Central Palace, London, recently.

Mr. John M. White, of Brookville, Pa., has purchased the well-known pug bitch Peggy Pride, in whelp to Happy Tobey, and Judge Alex. M. White, of the same place, has purchased Young Douglass, second puppy class Pittsburgh, from Al. Eberhart, Cincinnati, O. We understand that these purchases form the nucleus of a pug kennel the Messrs. White intend to form.

Speaking of the dachshunds at the late Kennel Club show in London, *Stock-Keeper* remarks that the caricatures of the hound type were less prominent than on former occasions, and the judge seemed to keep Pterodactyl in mind when he was at work, and this dog is the type. The absurd domes, beaks that are points, long hanging flews, heavy dewlap, long thin drapery ears, and the man-of-war chest are not dachshund characteristics and Pterodactyl has not got any of these Basset hound qualifications. Pterodactyl won the championship.

Mr. Redmond seems to have a rising fox-terrier (we do not mean that he is following the modern type) in his pup Dame Fortune by Despoiler—Dame D'Orsay. At the Kennel Club show he was offered $750 for it which offer was refused.

An American bred deerhound, Hillside Penelope, took hc., in novice bitches at the Kennel Club show. As her name denotes she was bred by Mr. J. L. Thayer, Lancaster, Mass.

The bulldog Found It, that, it will be remembered, Miss Maie Byrne imported from Mr. Pebody's kennel and which did so well at New York last spring, was also a competitor, but had to lower his flag to Guido, although, according to *Stock-Keeper*, he has improved on his English form. Found It is revisiting the old sod in company with his mistress.

Mrs. Foster is now showing a Yorkshire terrier that is described as simply perfection; and as it only weighs 3lbs., this fact makes the dog all the more remarkable.

The Ladies' Kennel Association was very much in evidence at the Kennel Club show, and it is stated that they will hold a special show at the Ranelagh Club, London, for dogs owned by members only. The *Ladies' Kennel Journal* is now to be published by the Association as a monthly, price 25 cents. Is Mr. Marples to be the editor? We see that his connection with the *British Fancier* has been severed. Mr. Marples has put in some downright hard work on that journal, and its position to-day must be a matter of no little pride to that gentleman.

Whether Mr. Raper's bulldog is as good a specimen as that well-known veteran imagines him to be or not, the fact remains that, though a big one, his name is in every one's mouth these days. The art of advertising is not entirely confined to Americans.

Changes have taken place lately in the staff of the *British Fancier*. Mr. Theo. Marples has severed his connection as editor and Mr. Geo. Raper as reporter-in-chief. We should think their places difficult to fill as both names will be inseparably connected with the evident success of that journal. Another kennel journal, to be called *Our Dogs* is shortly to be published under a rather distinguished directorate. Mr. Marples is to be the editor and we presume Mr. Raper will be head reporter. The paper will be issued weekly at a price of one penny (two cents). The capital stock is to be $25,000 in $5 shares.

In common with other journals we have received a copy of Mr. Geo. Bell's answers to the additional charges preferred by the A. K. C. against him, but as these charges have not been published and the case is still *sub judice* and the answers simply take the form of denials and abuse, we do not see that any good end will be served by their publication in these columns. When the case is decided we shall publish the result as a matter of news.

The Pacific Coast Field Trial Club will hold their next trials at Salinas, commencing Jan. 14. The judges are Messrs. W. Dormer, A. Jackson and D. Thorn. The club has also decided to run an amateur stake after the All Age stake is concluded, open to dogs trained and handled by amateurs. Dogs that have been trained by professional handlers but have not been in their charge for six months previous to the trials are, however, also eligible for this stake, a fact that upsets to a great extent the purely amateur intention of the stake.

The next quarterly meeting of the American Kennel Club will be held at the club rooms, 44 Broadway, New York, Dec. 6, at 3 P. M.

Two hundred and fifty dogs were registered with the A. K. C. during the month of October. Pointers, English setters, St. Bernards and fox-terriers lead the list, with collies and cocker spaniels close up.

The *Breeder and Sportsman* reports: "It is rumored that a well-known Eastern judge has been commissioned to purchase a crack bench show winning English setter stud dog for a party not far from San Francisco." Yes, and a well-known Eastern judge received a letter from a Californian intimating that as he (the judge) would very likely be asked to judge out there next spring, would he buy him a certain dog that he would guarantee to win first prize. The judge answered as a self-respecting man would do, and the commission will be placed elsewhere, if at all.

The following paragraphs were unavoidably crowded out last week:

Mr. James Robinson, manager of the Woodlawn Park Kennels, sends us some capital pictures of their new bulldogs King Orrey, Hucknell Gipsey, Mischief and Grosvenor Lass, which make a very acceptable addition to our bulldog album. King Orrey's head is a study, and he is sure to create a sensation when he comes out at New York next spring. We may also look for some more phenomenal litters from this kennel, as Grosvenor Lass is heavy in whelp to King Orrey, also Rock Rose II., who we trust will prove as good a matron as her mother did. The Woodlawn Park Kennels have now a great team of "bulls," and the dogs, we are happy to hear, are doing well. The two collies shown at Providence are coating up well and will be shown in the sweepstakes at New York. Duchess of Fife has just been mated to Conrad II., who sired their Sunset, and Flora May went to Woodmansterne Trefoil last week. A litter out of their Marigold by Sefton Hero is "a sight for sore 'een" as they say in "Jim's" native district. The kennels will dispose of their fox-terriers and "Irishmen," and will breed nothing but collies and bulldogs in the future—a very wise arrangement. No kennel should have more than two breeds.

Mr. Wilmerding showed a capital stamp of old time cocker in his office the other day. It seems just the stamp for work. Plenty of daylight, good straight legs and smart in appearance. It is by Rollo out of a bitch that goes back to Black Prince, from whom he gets his field merit, for he is trained and is a good worker. Mr. Wilmerding sets a good example in working his spaniels. He has been selling a number of pups lately, particulars of which will be found in Kennel Notes.

Mr. H. L. Kreuder offered $125 for Mr. Reid's beagle Buckshot before he ran at Hempstead, and he did not make a bad bargain, for the dog won the All-Age Stake, and besides being well built is a hummer in the field. Our prediction that he would win at Hempstead was true, for we expected the style of country would just suit him. If only Jean Val Jean had been there what a race these two would have given the judges!

Mr. Geo. S. Thomas sailed for England three weeks since and will spend the winter there, coming back for the New York show with, we hope, a team of winners.

Mr. A. E. Foster, owner of the well-known field spaniel Judex, purchased from Geo. S. Thomas the crack field spaniel Staley Baron, winner of a number of firsts since he was imported last spring. Mr. Foster has entered into partnership with Mr. W. W. Watrous, and their kennels, known as the Wee-Wah Kennels, will be at Tuxedo, N. Y. Among the new dogs they have are Staley Baron, Midnight III., Night, Dame Trot, etc., making a good team of blacks.

Those who were at the Terrier show sympathized with Messrs. L. & W. Rutherfurd in the loss they sustained by the death through suffocation of their well-known fox-terriers Warren Layman and Dusky II. The dogs were in one box, and were all right when placed in the baggage car. The railway people, with their usual intelligence, heated the train as if they were preparing for a blizzard, while the night was one of the mildest.

We are sorry to hear that Mr. Theo. Marples's field spaniel Manuscript met with an untimely death last Thursday week. It seems he strayed off from the Hempstead Farm Kennels and must have got on the trail of some pointers that had been walked out earlier in the day. He was found dead in a lot near a house within a mile or two of the kennels, and had evidently been treated to a load of shot, none of which, however, had struck a vital spot. Mr. Marples sent the dog over last spring to be shown and sold by the Hempstead Farm.

The owners of good bulldogs, if they wish to advance the interests of the breed should advertise their dogs more conspicuously and this week we are pleased to see that Mr. Matthews avails himself of our business columns to bring his dogs more prominently before the public. He has just purchased the bulldog Reve Royal from Mr. J. R. Gilmore, East Orange, N. J., and with Bathos places him at stud. Mr. Matthews has had his eye on this young fellow for a year or more, ever since he won first at Newark, 1893, beating Romance and other good ones. His breeding includes the blood of Rustic King on the sire's side and Grabber by his dam. His own sire Rustic Swell is a dog of considerable reputation and is well known for certain bulldog properties desirable to perpetuate. Reve Royal is a well boned dog of 50lbs. weight, very large skull, good face, exceptional body, and has only one fault; his stern is carried a trifle too high to meet the views of the fastidious. His age (3 years), his strength and activity make him a desirable dog to use for breeding, and he has one especial merit which is valued highly; he is a pure brindle of perfect color, not a white spot on him, and he gets brindle puppies. Mr. Matthews writes: I am delighted with this new addition to my kennel, and hope soon to put some royal pups on the bench and increase the proportion of good old brindles and improve the quality of American-breds in particular. Old Bathos has done good work in the stud and is considered the best pure white dog in America. Reve Royal is by Rustic Swell out of Claudia and was imported last fall by Mr. Gilmore."

The Seacroft Kennels are having busy times these days with over eighty dogs in the kennel of which Turner has sole charge. Last Monday their Damson whelped seven to Starden's King and four wolfhound matrons are due to whelp within two weeks.

This kennel also purchased from Geo. Thomas before he left the noted black and tan terrier Gypsey Girl that has beaten every terrier of that breed in America. They also bought the Irish terrier Sissy, a greyhound bitch by Gem of the Season ex Bestwood Daisy, and the bull-terrier Griffo.

The Preston—Morris affair has at last been settled. As we mentioned some time since the case never came to court but was withdrawn on the agreement that Mr. Mortimer should value the bitch Lola as she was May 1, 1894. This he did on his return and appraised her at $135, which we expect is considerably more than either party expected.

We draw attention to the fact that Messrs. L. & W. Rutherfurd will sell a draft from their fox-terrier kennel this Friday, Nov. 16. A number of valuable brood bitches, dams of bench winners, will be disposed of as well as a number of young dogs. As this sale takes place during horse show week, there should be a good attendance of out of town buyers. The sale commences at 2:30 P. M.

The reporter of the Boston *Herald* remarked at the terrier show that dog men seem to know why one dog is entitled to a prize and another is not, and they will not give away the secret. Microscopic droops of a jaw, lops of an ear, wobbles of a tail, slants of a back or sets of a foot settle the question of supremacy. The judge will courteously point out the differences, but, like Dr. Holmes's gentleman, it takes four generations to even see these differences.

After the serious business of the week in the dog show tent was over and each fancier knew the color of the ribbons he had won, the club members who were horsily inclined—and there was no exception in that—took part in the different tandem, saddle horse and jumping competitions on Thursday afternoon. H. H. Hunnewell, Jr., threw a double thong over a sporty looking tandem, H. W. Smith was up in the jumping contests and landed first with a gaunt looking, ewe necked, deceiving beast, Willard Clark rode a good old-fashioned sort in the saddle horse contest and won second. In fact it was a jolly time all round.

It is said that among the ancient Germans the mode of assessing damages was very curious. For instance, he who killed another man's dog was to hang the slain animal up by the tail with the nose just touching the ground and to cover him with wheat so that not a hair could be seen, and this heap of wheat was the compensation due the owner.

Mr. Clarence Rathbone, the owner of the well-known Beverwyck Kennels, receives some curious questions in the many answers to his advertisement in FOREST AND STREAM. Color is a great stumbling block. For instance, he was told the other day that a fox-terrier could not possibly be thoroughbred unless it had an evenly marked black and tan head and a spot at root of tail. Another one, in speaking of a ticked dog, said that if the ticks were only on the hair it was all right, but if the skin beneath was also black, it was "very bad"! Weight, too, is a hard nut to crack. He had an inquiry lately for a bitch, but as a *sine qua non*, it must weigh at least 25lbs.! To save himself the trouble of answering these and similar questions, he has arranged a circular, which, as it affords so much information in small compass, we consider it worthy of publication:

*Ears.*—Should be V-shaped and rather small, of moderate thickness, and drooping forward closely to the cheek.
*Nose.*—Should be black.
*Teeth.*—Should be level and strong. Never undershot.
*Legs.*—The forelegs, viewed in any direction, must be straight. They should be of strong bone throughout, the elbows working freely just clear from the sides. Both fore and hindlegs should be carried straight forward in traveling.
*Feet.*—Should be round, compact and not too large, the toes moderately arched and turned neither in nor out.
*Color.*—White should predominate. Brindle or liver markings are objectionable. Otherwise this point is of little or no importance.
*Coat.*—Should be smooth, but hard, dense and abundant.
*Chest.*—Deep, but not wide.
*Weight.*—Weight within certain limits is not a criterion of a terrier's fitness for his work. Roughly speaking, it may be said he should not scale over 20lbs. in show condition. (It must be remembered that this weight is put as the "limit," but in the opinion of those best qualified to judge, from 16 to 17lbs. is considered the best weight for a dog, and a pound or two lighter for a bitch.)
*Fox-Terrier Pluck* is a point much misunderstood. It should be remembered that he is not intended or wished to be a dead game dog, or a fighting dog, as is a bull-terrier; but he should be the best of vermin dogs, and if his size will not allow him to kill the larger vermin, such as badgers, foxes or coons, yet he should keep up his attack and worry them as long as he has strength to stand. Always remembering that even a fox-terrier needs some education or experience before he should be expected to be a first-class worker.

In looking over Paul Bo's stud card we see that he also won second in the Southern Field Trials Club's All-Age Stake in 1892.

Mr. Eberhart's well-known pug bitch, Lady Verne, winner of first novice, Lexington, Ky., second Columbus and Chicago, died three weeks since in whelping to Bradford Ruby II., supposed to be the only living son of old champion Bradford Ruby. Two puppies were born dead, but five were saved by giving them to Mabel E., who is raising them now. This bitch's death is quite a loss to the kennel, as Mr. Eberhart had refused $150 for her soon after being bred.

"The Scottish Terrier" and "The Irish Terrier" is the title of a neat brochure just received from the author, Mr. James E. Green, the well known manager of the Wankie Kennels, West Medford, Mass. The author in bringing this little book before the public does not claim to have unearthed anything new, but the idea was simply to gather together in compact form everything that has been written on the two breeds by those best qualified to do so. The old Scotch terrier is described and the gradual changes noted in the type of this game little dog, through the writings of D. I. Thompson Gray, Youatt, Hugh Dalziel, Rawdon B. Lee and H. J. Ludlow—men well qualified to afford the very truest information on the breed. The Irish terrier has been treated in the same manner. Judging from our experience in the past there should be a demand for such a book, as it gives information not easily obtainable by the average dogman interested in the breeds and should therefore meet with a ready sale.

Dr. Wesley Mills has finally won his suit against the Montreal Exposition Co. for payment for services rendered in superintending the show of 1892. After working hard for the good of the show the company refused to pay him anything. Dr. Mills did not go into it for money, but after the great success of the show, financially and otherwise, he did not expect an exhibition of such meanness, and was so disgusted that he determined to make them pay and sued them. The judgment of the court was against him on the ground of no written agreement, though the value of services was held to be great and the amount claimed ($125) very moderate. The Court of Review (three judges) has unanimously reversed this decision, awarding the amount claimed with all costs, on the ground that it was not to be presumed that such work was to be done for nothing. The Toronto *World* has also paid up for the libel they published some time since, so Dr. Mills is coming out better in his suits than was at one time expected. The Mercer—Mills suit will come off in January, we are told, if not again postponed by the plaintiff.

Mr. Freeman Lloyd has just published a book on "The Whippet and Race Dog," that seems to treat on the training and racing of whippets in an able manner. A fuller review will be given later. With the meeting at Brookline, the book came at an opportune moment, and during terrier week a number of copies were ordered through the Forest and Stream Pub. Co.

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

*Jessica Snow.* By J. E. Slattery, East St. Louis, Ill., for black, white and tan ticked English setter bitch, whelped June 6, 1894, by Halcyon (Gath's Mark—Clara) out of Fantasma (Gath's Hope—Lady Lit).

WHELPS.

☞ **Prepared Blanks sent free on application.**

*Ramona.* Columbus Coursing Kennels' (Huron, N. D.) greyhound bitch Ramona (Lord Neversettle—Partera), Aug. 13, nine (six dogs), by their Miller's Rab (Waterford—Nancy McPherson).

*No Mercy.* Columbus Coursing Kennels' (Huron, N. D.) greyhound bitch No Mercy (Wild Tick—Show Mercy), Sept. 14, eight (four dogs), by E. H. Mulcaster's Jim o' the Hill (Pinkerton—Glenblossom).

*Sylph.* John J. Pulligan's (Milwaukee, Wis.) Irish setter bitch Sylph (Glencho—Ashmont Norah), Sept. 8, eight (six dogs), by his Elcho's Lad (Elcho, Jr.—Mollie Bawn).

SALES.

☞ **Prepared Blanks sent free on application.**

*Wake.* Black, white and tan beagle bitch, whelped March 13, 1893, by champion Fitzhugh Lee out of Lady Novice, by A. D. Fiske, Worcester, Mass., to Jos. Wood, Pawtucket, R. I.

*Pilot of Lorain.* Black and tan Gordon setter dog, whelped July 27, 1890, by Murkland Ranger II. out of Bell, by Lawn Gordon Setter Kennels, Chicago Lawn, Ill., to E. Wilshire, St. Joseph, Mo.

### Gordon Lost.

*Editor Forest and Stream:*

My Gordon setter was stolen from No. 40 Fourth street, Dover, N. H., Oct. 25. License No. 708. Three years old and answers to the name of Phil.

Any FOREST AND STREAM reader will confer a favor if he will advise owner if such a dog is seen in their neighborhood.

S. L. HALLAM.

## ANSWERS TO CORRESPONDENTS.

H. G. W., Bethlehem, Pa.—St. Bernard Bevis is by Alton (19,212) out of Hilda (19,191).

J. J. M., Boston, Mass.—Feed a little flour of sulphur mixed with the food every alternate night.

W. T. B., Hartford, N. J.—The A. K. C. requires three generations before admitting a dog to registration. FOREST AND STREAM subscription price is $4.

E. W. C., Philadelphia, Pa.—The beagle Grayburn Daisy is by Joe out of Grayburn Gyp, by Krueger's Racket out of Kate, by Sport out of Fannie. The pedigree can be extended if you wish.

P. B. D, South Bend, Wash.—We do not advise where to buy dogs. If you will consult our advertising columns, or better still, state your want in a "Kennel Special," you will no doubt be able to secure such a dog as you require.

M. M., Winston, Ont.—We scarcely know to what you refer. Newfoundlands or a cross with great Danes would make good teaming dogs. Wurtemburg Kennels, Welland, Ont., have great Danes, and Typical Kennels, Sunnyssde, Toronto, have Newfoundlands.

A. H., Paterson, N. J.—Feed your dog on boiled rice mixed with the other foods you give her. The proportions you give are those of a fairly good-sized bitch for her age; St. Bernards keep growing till two years old, and sometimes a little longer. Any of the advertised vermifuges should rid her of the worms.

J. H. C., Cincinnati, O.—Use Persian insect powder for the fleas. Dust well into the coat and allow the powder to remain on the dog. Stand the dog on a newspaper so that when the operation is concluded you can burn the fleas that drop on to it. If the kennel can be made perfectly airtight burn a pan of powdered sulphur in it for an hour or two so that all the vermin may be destroyed, then whitewash thoroughly.

W. H. W., Chicago Lawn, Ill.—The pedigree of the Irish setter, Bess III., as given in the A. K. R., does not extend further than the sire and dam—Dan—Nellie. Dan was owned by Cyrus W. Field and was out of a bitch imported by Robert Bonner. Nellie was owned by David Simpson, 96 Greenwich avenue, New York, and Bess III. was registered and owned by Dr. J. E. M. Lordly, 230 West Thirty-eighth street, New York. Probably if you write to these persons you might get some further information.

A. C., Comstock, N. Y.—1. You must never use carbolic acid on dogs for fleas unless well diluted; better use benzine and keep the dog out of draughts and away from the fire when treating. Persian insect powder you will find most efficient. 2. Dash and Maggie are not registered, so we can give no particulars. 3. Yes, they were field dogs but their descendants have not distinguished themselves at public trials, the only means we have of determining this point. 4. There is only one stud book in America, that of the American Kennel Club, 44 Broadway, New York. Fee for registering $1. Send to that address for registering blank, which gives all information.

# Hunting and Coursing.

## FIXTURES.

FIELD TRIALS.

Nov. 19.—National Foxhunters' Association's meet, at Olympian Springs, Ky. H. L. Means, Sec'y, Louisville, Ky.

## BRUNSWICK FUR CLUB'S TRIALS.

Nov. 5 to 9.

THE Brunswick Fur Club held its sixth annual field trials at North Acton, Mass. The weather, as noted below, was wretched, election day fell on Tuesday, and all this conspired to keep many hunters and hounds away from the meet. The judges were John Emmons, West Paris, Me.; S. B. Mills, Needham, Mass.; A. M. Gerry, So. Paris, Me.; F. H. Gledhill, Lewiston, Me., and J. N. Goss, New Market, N. H. These gentlemen are all well-known fox hunters and during the week they did a vast amount of hard work following the pack through the rough, snow-covered pastures, thick woods and wet swamps, constantly exposed to such weather as would have driven less hardy lovers of the chase to the comfortable smoking room of the Nagog House, where the club made its headquarters.

The sport was dull until Friday and then we were so fortunate as to have a run which for excitement, terrific pace, splendid trailing and decisive work has seldom if ever been equalled in New England. The only chase in the history of the Brunswick Fur Club which approaches it was the one at Ossipee, N. H., in the trials of '92, when the fox, hard pressed, went to earth only to leave his brush in the teeth of the hound leading the pack. Had it not been for the great run of Friday it is probable that the judges would have been unable to award the prizes and the trials of '94 would have been a failure; as it was their decisions were reached with little difficulty.

Zack, the winner of the highest honors, is a handsome white, black and tan Goodman hound. He has the best of legs and feet, strong body and good head and was brought to the trials in splendid condition by A. B. McGregor, manager of the White Oak Hill Kennels. He was bred by W. M. Hoffstetter.

Fury, the winner of the Derby is a small, well built bitch, lemon and white in color. Her head is bad, being of the pointer type. She was bred by Mr. Whitlock and is owned by L. A. Dennison.

Among those present at the trials were N. Q. Pope, Poland, Me.; W. Hanscom, E. Richardson, Brooklyn, N. Y.; W. B. Stone, L. A. Dennison, L. E. Conant, C. A. Schaffer, C. L. Wellington, Waltham, Mass.; A. B. McGregor, Geo. Holmes, Poland, Me.; Henry O. Stanley, F. K. Dexter, Dixfield, Me.; E. H. Bragg, No. Sidney, Me.; A. B. F. Kinney, O. A. Benoit, Worcester, Mass.; J. M. White, Millbury, Mass.; J. Wm. Jones, Needham, Mass.; O. F. Joslin, Oxford, Mass.; Bradford S. Turpin, Boston, Mass.; Geo. E. Carr, Holliston, Mass.; J. H. Vogt, Chicago, Ill., and the judges whose names are given above.

The charming climate of New England has so often shown the members of the Brunswick Fur Club its wonderful power to produce startling changes and nasty weather, that it was more in disappointment than surprise that we watched the light clouds of Monday morning grow thick and heavy, the warm air become raw and chilly, the rain turn to sleet and then to snow, and the landscape in a few hours exchange the glories of autumn for the bleakness of winter. The sudden change in the weather was an unfortunate one for the trials as far as the number of entries and the enjoyment of those present was concerned, and the deep snow kept many at home who would otherwise have been at hand with their hounds.

A meeting of the club was held at the Nagog House on Monday evening, President Pope in the chair. The club voted unanimously to open the Derby to all foxhounds whelped on or after Jan. 1 of the preceding year. Noel E. Money, of Oakland, N. J., was elected to membership. The entries for the Derby filled as follows:

### The Derby.

HUSKIE—R. D. Perry's white, black and tan dog, whelped May 23, 1893 (Walker).

FURY—L. O. Dennison's lemon and white bitch, whelped April 4, 1893 (Whitlock).

KATY DECATUR—White Oak Hill Kennels' white, black and ticked bitch, whelped Aug. 4, 1893 (July).

POLAND POACHER—White Oak Hill Kennels' black, white and tan dog, whelped July 7, 1893 (Goodman).

The meeting adjourned at a late hour. Then to bed with gloomy prospects for hunting on Tuesday.

TUESDAY.

The snow ceased falling at daylight, but heavy clouds covered the sky and a cold wind blew fiercely from the west. No attempt was made to hunt in the morning. In the afternoon the wind did not blow as hard and the sun came out. Everybody was tired of inaction and all were glad when the judges ordered out the Derby hounds, though the chances of starting a fox were reduced to a minimum.

On the west side of Magog Lake a fox track was found in the snow. It was evidently made early in the morning, and there was no scent left in it. The hounds could not take it by nose and knew nothing of following by sight. So the party undertook to start the fox and slowly picked out the track, following carefully in the drifted snow over a hill to a swamp, and then to a burrow, where reynard had gone to earth. By the time his whereabouts were learned it was too late to hunt for another track, and we all returned to the hotel, where a smoking hot dinner awaited us.

In the evening the entries for the All-Age Stake were made as follows:

The All-Age.

CLINKER—R. D. Perry's black and tan dog (Fox III.—Fanny), 5yrs. old, Avent strain.

TRAILER—R. D. Perry's black and tan bitch (Bonnie—Maggie), 2yrs. 6mos. old, Conant strain.

BILLY—C. L. Wellington's black and tan dog, 2yrs. 5mos. old, native strain.

NED—J. M. White's black and tan dog (Sam—Lena), 3yrs. old, native strain.

FLY—J. M. White's white, black and tan bitch (Crook—Doisy), 2yrs. 6mos. old, Walker & Crandall strain.

LOGAN—J. M. White's black, white and tan dog, 3yrs. 6mos. old, Pooler strain.

BEN BUTLER II.—L. A. Dennison's black, white and tan dog (Ben Butler—Flirt), 4yrs. 3mos. old, Buckfield-Byron strain.

DUKE—White Oak Hill Kennels' white, black and tan dog (Rabbit—Fannie), 4yrs. 5mos. old, Goodman strain.

CLAY—White Oak Hill Kennels' white, black and tan dog (Scully—Bessie), 6yrs. 4mos. old, Goodman strain.

PEALER—White Oak Hill Kennels' black, tan and white dog (Traveler—Vick), 4yrs. old, July strain.

ZACK—White Oak Hill Kennels' white, black and tan dog (Jacobin—Ruby), 3yrs. 4mos. old, Goodman strain.

STEVE—White Oak Hill Kennels' white, black and tan dog (Jacobin—Ruby), 3yrs. 4mos. old, Goodman strain.

SUNMAID—White Oak Hill Kennels' white, black and tan bitch (Traveler—Flash), 4yrs. 6mos. old, July strain.

WEDNESDAY.

The sun rose in a cloudless sky. A cold west wind swept over the wintry landscape, 6in. of dry snow covered the ground, and there was little to tempt us outside our comfortable quarters. However, breakfast was over at 6:30 o'clock, and then the hounds entered in the All Age Stake were brought out for the inspection of the judges. It is no easy task for one unacquainted with the individual members of the pack to learn to distinguish one from another, and it was some time before the judges felt that they were capable of so doing. Then the line of march was taken for our hunting ground of last year, and at 7:30 the pack was cast off on the west side of Magog Lake. The hounds dashed away through the drifted snow, tonguing and inclined to run riot; but all were veterans and play soon gave way to work. At first all but Billy, Pealer and Duke swung to the shore of the lake. These three, however, worked to the west and soon struck a track. Their tonguing quickly drew all the pack to them but Trailer and Clinker, who meantime had found another trail which they followed away toward the south. The main pack trailed toward the west, watching the scent here and there in a way which promised sport. But disappointment awaited us. We struggled along over the walls and fences and plowed our way through the snow in the wake of the pack to the summit of a large hill.

Here we found the hounds widely scattered and striving to untangle a network of trails which covered the hill and led in all directions. Most of the pack worked eagerly, swinging and casting and trying in vain to find a drag fresh enough to be carried. But either the scent was bad or the foxes were all underground, for the pack was unable to make a start, try as hard as they would. The majority of the hounds worked with the wind, and it was not long before they disappeaerd in the cover to the southwest. The hunters could hear nothing in the stiff breeze which was now blowing, and the only way to keep in with the hounds was to follow their tracks in the snow. This was hard work and not the kind of hunting we are used to, but field trials come but once a year and if any work was to be done we were all anxious to see it. So we pressed on, and two of the party had the satisfaction of seeing a fox. The rascal was running as if for his life and passed close by Judge Goss and R. D. Perry. An hour after reynard had disappeared, Clinker, Trailer, Billy and Ned came slowly along on his track, picking it out with great difficulty, and finally losing it altogether in a road. This was the only fox seen during the day and all the party were glad when 3 o'clock put an end to this uninteresting hunt.

In the evening the judges announced that all the hounds in the All-Age stake would be ordered out again on Thursday morning. Every one was tired with the long day's work and at an early hour all retired.

THURSDAY.

Ill fortune still pursued us. The snow melted little if any on Wednesday and still lay on the ground to the depth of six inches or more. That which covered the trees and underbrush, however, had been softened by the sun and fallen off, making in places an icy crust which would not hold the scent and facilitated the escape of the foxes which we were fortunate enough to jump. At daybreak there was every promise of a fine hunting morning, but heavy clouds soon gathered, gradually hid the sun from view and by 11 o'clock a few straggling flakes of snow gave warning of the approaching storm. The flakes came faster and faster and at sunset they were still falling steadily.

When the party left headquarters at 7:30 the conditions for sport seemed more favorable than on any day of the week. There was no wind, and at least we should be able to hear the hounds if any work was done, and should not be compelled to learn their whereabouts by following their tracks as was the case on yesterday.

Twelve of the hounds of the All-Age Stake were ready to start when acting master of hounds R. D. Perry ordered them out. Peter, the thirteenth—unlucky number—had not yet returned from yesterday's hunt. It was just 7:55 when the pack was lined up for the throw-off on the ridge between One Island Pond and Magog Lake. They did not start away as boisterously as on Wednesday, though none of them seemed unwilling to hunt. Even Zack, who had not reached home until 10 o'clock in the morning, appeared as full of life as any of his companions.

The pack held together along the shore of the pond and gave tongue vigorously on a trail which led off to the south. But soon the hounds separated. Trailer, Clinker and some others continued toward the south while Billy, Fly, Ned and others found another track which swung off to the east. The music for some minutes was most inspiriting, but then came a lull and neither pack seemed able to pick out the trails beneath the pines where they had carried them. All the hounds harked back toward the starting point and for a time nothing was heard but the heavy voice of Ben Butler II. as he pounded away on a cold track which he was trying to carry alone.

Soon, however, we caught sight of eight hounds swinging wide through a pasture beyond the pond. They crossed the road, disappeared for a few minutes in a strip of pines, and then came to a large mowing where the leading hounds tongued sharply on a warm trail. They worked beautifully, now swinging for the track and again picking it out without a break in the music. As the pack trailed into the thick woods which bounded the meadow, the scent grew hot, and at 9:15 the sharp, angry notes of the pack told us that the fox was afoot. Logan and Zack crossed the open fields, cutting to their companions, and reynard found himself pursued by as fine a pack of hounds as New England boasts. They were hot on his trail and he was not more than a couple of minutes ahead of them when he came out of the cover and into an orchard intending to cross the road. Here Judge Emmons in his anxiety to get a glimpse of the chase, turned the fox back. The sharp turn gave him a chance to increase his lead a trifle, and a few minutes later he crossed the road a quarter of a mile below and just out of sight of the judge and his companions. The fox now entered a large tract of heavy cover and thick underbrush, and if he held his line would soon be in the open country and give us all a fine view of the chase. But he had no intention of so doing. Just how he escaped the hounds is uncertain. Probably he turned sharply back and the hounds overrunning were unable to find his track on the crust. However that may be, certain it is that this promising race ended after a half-hour's sport. The pack worked hard to get on even terms with reynard again, but all to no purpose and he easily escaped.

Not long after this race came to an end Judge Goss saw Billy and Trailer working in a pasture. They soon jumped a fox and carried him off toward the south and were quickly out of hearing. The hounds came back not long after and either lost or drove their fox to ground.

The judges gave notice in the evening that they would call out all the hounds in the All-Age class on Friday morning, and also the Derby entries. Recitations, songs and stories made the evening pass all too soon.

FRIDAY.

The heavy storm clouds of Thursday still hung over us, but no snow fell till about 11 o'clock, and then it was scarcely more than a drizzle and did not interfere with the hunt. The thermometer stood higher than it had at any time since Monday, the snow was damp enough to hold the scent well, the wind had nearly died away, and all the old tracks had been obliterated by the freshly fallen snow.

By an arrangement made on Thursday evening, the Derby entries were to be given till 10 o'clock to show their quality, and then the All-Age hounds were to be ordered out for the last race of the trials. Accordingly, we started away with the youngsters at an early hour. It was their first experience on snow, and the Master of Hounds, L. O. Dennison, desired to give them every possible chance to make a successful run. It was not till 8:35, however, that a promising track was found. It led up hill through an orchard to cover. The Derby entries were lined up and cast off. They scarcely knew what to do. One or two poked their noses into the track and then took no further interest in it. It was much pleasanter, they thought, to race and gallop through the light snow and enjoy life, and they willingly followed us down the road when we returned to the farmhouse where the All-Age class was kenneled.

As it was desirable to make the awards in the Derby if possible, it was now decided to cast the youngsters off again with the old hounds. So we started once more with a pack of sixteen—for Pealer was still absent—and on a hill a couple of miles or more west of Magog Lake we let them all go. The All-Age hounds immediately took to the thick cover which extended down the hill, and the pups followed their example and went with them. The wind had now begun to rise, and standing about in the snow waiting for a start was but poor sport. Occasionally the sharp ear of some hunter could catch the distant note of a hound far in the swamp. Then all would be silent, and our spirits, which at no time had been high with hope, fell steadily to zero. Two or three of the party returned to the Magog House and thereby missed the finest chase in the annals of the Brunswick Fur Club.

A number of us had just succeeded in lighting a fire and getting it well to burning when the eager tonguing of the pack attracted every one's attention. A moment more and the short, choppy notes of the hounds told us that reynard was seeking safety in flight. The swamp and thick cover where the fox was jumped covered but a few acres and it took the hounds only a few minutes to force reynard to take to the open. When first seen Logan and Billy were in the lead with Zack close by. After circling once or twice in the valley, the chase swung over the crest of the hill on which the hounds had been cast off, and here Sunmaid was pressing the leaders and every hound in the pack was hot on the scent. As the eight couples in full cry streamed down the hill to the swamp at its foot, Logan was in the lead by 30yds., then came Zack and Sunmaid neck and neck, and close behind the pack. The fox was but little ahead of his pursuers. The scent was breast high, and even thus early in the race it was easy to see that he must run as he never ran before if he would save his brush.

Away toward the north sped reynard, and the music of the hounds grew faint in the distance. Climbing to the top of the hill, three of us found the whole region spread out at our feet like a map. Faint as a whisper rose the cry of the pack, and far away—so far that they looked like mere specks on the snow—could be seen the hounds sweeping over the open fields. The pace was wonderful—there was no break in the ringing music, no checks in the running. From the summit of the hill not a movement of the pack escaped us, and not for many a day will we forget that glorious run. The fox now came nearer to us, and tried in vain to throw off the pack in a swamp on the shore of One Island Pond. Failing in this, he made a turn close by the barn whence we had started in the morning, and then ran down the east shore of the pond only to return again to the orchard. His circles were growing smaller. He had no time to think. He lost his cunning. The terrific speed of the leaders now began to tell on the pack. Some hounds dropped behind—what ones we could not tell in the distance—but still those three flyers could be seen in the lead apparently running with the same speed and ease as at first. We knew from the dodging tactics which reynard had now adopted that it was all up with him. Making a last quick turn in the orchard, he found the stragglers from the pack in his front. He was surrounded but he made one more break for freedom. Over the stone wall into the road he went—all in vain. A moment later and the lead hounds ran into him. An instant after and the whole pack was worrying him and the hounds of the Brunswick Fur Club had accomplished a feat rarely done in New England—they had killed fairly on the ground in a chase lasting an hour and a half a fine old dog fox. To be sure the running conditions could not have been better. The scent was perfect and the snow probably impeded the fox more than it did the hounds. Yet though everything was in favor of the pack, the race remains a remarkable one and honors every hound that was in at the kill. The mask and brush of the fox—the first to be run into by the B. F. C. pack—will be handsomely mounted and kept among the trophies of the club.

When we reached the fox he lay stretched out in the road on the blood-stained snow just as the hounds left him. Most of the pack was still there and Logan's muzzle was covered with blood from a sharp bite just below his eyes. His wonderful speed had doubtless carried him first to the fox and this honor should be added to the list of those won in former years.

In the evening the judges announced the awards as follows:

ALL-AGE STAKE.

Hunting Class—First, White Oak Hill Kennels' Zack; second, C. L. Wellington's Billy; third, R. D. Perry's Trailer.

Trailing—First, White Oak Hill Kennels' Sunmaid; second, White Oak Hill Kennels' Zack; third, R. D. Perry's Trailer.

Speed—Fist, J. M. White's Logan; second, White Oak Hill Kennels' Sunmaid; third, White Oak Hill Kennels' Zack.

Endurance—First, White Oak Hill Kennels' Zack, second, R. D. Perry's Trailer; third, J. M. White's Fly.

Tonguing—First, White Oak Hill Kennels' Sunmaid; second, J. M. White's Fly; third, White Oak Hill Kennels' Zack.

Style—First, White Oak Hill Kennels' Zack; second, J. M. White's Logan; third, J. M. White's Fly.

THE DERBY.

First, L. O. Dennison's Fury; second, R. D. Perry's Huskie; third, White Oak Hill Kennels' Katie Decatur.

SPECIAL PRIZES.

Highest general average medal and *American Field* cup to White Oak Hill Kennels' Zack.

A. C. Heffenger's hunting medal to White Oak Hill Kennels' Zack.

N. Q. Pope's trailing medal to White Oak Hill Kennels' Sunmaid.

R. D. Perry's speed medal to J. M. White's Logan.

A. B. F. Kinney's endurance medal to White Oak Hill Kennels' Zack.

R. D. Perry's engraving, "A Promising Litter," to L. O. Dennison's Fury.

A club meeting was held in the evening. L. O. Dennison, R. D. Perry and Bradford S. Turpin were appointed a committee to select date and place for the winter meet. S. B. Mills, Needham, Mass., was elected to membership. The meeting then adjourned and the field trials of 1894 were ended.

BRADLEY.

## Altcar Club Meeting.

THE Altcar Club's coursing meeting at Lacrosse, Kan. commencing Oct. 30, was a great success in spite of weather conditions. B. Hayman of Chicago judged very acceptably and Mr. Taylor attended both slips in good form. The results are as follows:

### Altcar Cup.

For all-age greyhounds at $10 each (non-members $12.50); $100 added by the Altcar Club and 50 per cent. of entrance money to first, 25 per cent. to runner-up, 12½ per cent. to third.

*First Round.*

G. Macdougall's black and white dog Twister (Lord Neversettle—White Lips) *beat* St. Patrick Kennels' fawn bitch Olicana (imported) (Miller's Rab—Slander).

H. C. Lowe's white and black dog St. Lawrence (Lord Neversettle—White Lips) *beat* St. Patrick Kennels' white and black dog Beau Brummel (Dingwall—Miss Kitten).

D. C. Luse ns. (D. M. Slade's) fawn dog Laughed At (Norwegian—Bueneretiro) *a bye*, D. C. Luse's red bitch Fascination (Norwegian—Bueneretiro) drawn.

H. C. Lowe's white and black bitch Princess May (Lord Neversettle—White Lips) *beat* Eastern Coursing Kennels' black dog Judge Burnaby (Burnaby—Drytime).

Q. Van Hummell's brindle bitch Viola (Babazoun—Verdure Clad) *beat* Eastern Coursing Kennels' black dog Will o' the Wisp (Burnaby—Drytime).

H. C. Lowe's red dog Lord Douglas (Lord Neversettle—Partera) *beat* R. S. Howard ns (A. Johnson's) black and white dog Rhaon Dhu (Major Glendyne—Daisy Dublin).

H. C. Lowe's white and black dog Prince Charlie (Lord Neversettle—White Lips), *beat* S. W. Vidler ns. (C. Walker's) red dog Vanness (Babazoun—Verdure Clad).

Q. Van Hummell's brindled dog Van Tromp (Lord Neversettle—Partera), *beat* J. Andrews's fawn dog Punch, pedigree not given.

Eastern Coursing Kennel's brindled bitch Miss Dollar III. (Eden Castle—Miss Harkness), *beat* St. Patrick Kennel's white and black dog Border Ruffian (Dingwall—Miss Kitten).

Eastern Coursing Kennel's black and white bitch Southern Belle (Laocoon—Axis), *beat* Q. Van Hummell's brindled bitch Valkyrie (Lord Neversettle—Partera).

M. Harrison's red dog Boundaway (Lord Neversettle—Partera), *beat* Eastern Coursing Kennel's white and fawn dog Jim Roy (imported) (Page Boy—Park Lane Beauty).

D. C. Luse ns. (L. M. Airhart's) brindled dog Ketchem (Major—Clipper), *beat* St. Patrick Kennel's white and black dog Boomerang (Lord Neversettle—White Lips).

*Second Round.*

Twister beat St. Lawrence.
Princess May beat Laughed At.
Viola beat Lord Douglas.
Prince Charlie beat Van Tromp.
Miss Dollar III. beat Boundaway.
Ketchem beat Southern Belle.

*Third Round.*

Twister beat Princess May.
Prince Charlie beat Viola.
Ketchem beat Miss Dollar III.

*Fourth Round.*

Prince Charlie beat Twister.
Ketchem, a bye.

*Deciding Course.*

Prince Charlie beat Ketchem, and won.

### The Colorado Stakes.

For dog puppies at $10 each ($12.50 non-members), $5 added by the Altcar Club and 50 per cent. of entrance money to the winner, 25 per cent to runner-up, 12½ per cent. to third.

*First Round.*

R. L. Lee's red dog Donald (Babazoun—Tony) *beat* Q. Van Hummell's white and fawn dog Van Dee (Lord Neversettle—Verdure Clad).

St. Patrick Kennels ns. (H. B. Hersey's) white and brindle dog Baron (Boomerang—Pearl of Pekin) *a bye*, St. Patrick Kennels' red dog Billy For Short (Miller's Rab—Comedy) drawn.

J. Andrews's blue dog Moses (pedigree unknown) *beat* Q. Van Hummell's brindle and white dog Van Tine (Lord Neversettle—Verdure Clad).

H. C. Lowe's black dog High Curly (Lord Neversettle—White Lips) *beat* Sunflower Kennels' red dog Extra Dry (Glenkirk—Scandle).

Eastern Coursing Kennels' fawn dog Dakota (Glenkirk—Gilda) *beat* St. Patrick Kennels' blue dog Brother Jonathan (Dingwal—Novenery).

Sunflower Kennels' red dog Sorrento (Glenkirk—Scandal) *beat* S. W. Vidler's fawn dog Valdimir (Miller's Rab—Comedy).

Q. Van Hummell's white and brindle dog Van Otjen (Lord Neversettle—Verdure Clad), *beat* L. Peebler's red dog Lambright (Norwegian—Bueneretiro).

S. W. Vidler's black dog Vizier (Miller's Rab—Comedy), *beat* R. L. Lee's red dog Montana (Babazoun—Tony).

Q. Van Hummell's brindle and white dog Van Aafke (Lord Neversettle—Verdure Clad), *a bye*.

*Second Round.*

Baron beat Donald.
High Curly beat Moses.
Dakota beat Van Otjen.
Van Aafke beat Sorrento.
Vizier, a bye.

*Third Round.*

Baron beat High Curly.
Van Aafke beat Vizier.
Dakota, a bye.

*Fourth Round.*

Van Aafke beat Dakota.
Baron, a bye.

*Deciding Course.*

Baron beat Van Aafke and won.

### The Kansas Stakes.

For bitch puppies at $10 each (non-members $12.50). Prize, same as in Colorado Stakes.

*First Round.*

H. C. Lowe's white and black bitch Lady Alko (Lord Neversettle—White Lips) *beat* St. Patrick Kennels' red bitch Blister (Glenkirk—Innocence).

Eastern Coursing Kennels' red bitch Butterflies (Royal Crest—Drytime) *beat* R. S. Howard ns. (D. M. Sidle's) red bitch Siddie Secret (Laughed At—Lady Maud).

Dr. Q. Van Hummell's brindle and white bitch Van Ollie (Gem of the Season—Wild Rose) *beat* C. Audas's brindle bitch Queen Victoria (Spot—Lulu).

R. S. Howard ns (D. M. Sidle's) black bitch Lizzie Lee (Norwegian—Dick's Darling) *beat* H. C. Lowe's brindle and white bitch Lonely (Lord Neversettle—Partera).

D. C. Luse's fawn bitch Fascination (Norwegian—Bueneretiro) *beat* S. W. Vidder's black bitch Valletta (Miller's Rab—Comedy).

Dr. J. M. Norman ns. (J. P. Cochran's fawn and white bitch Pearl (Laughed At—Lady Maud) *a bye.*

*Second Roudd.*

Butterflies beat Lady Alko. Pearl beat Fascination.
Lizzie Lee a bye; Van Ollie dr.

*Third Round.*

Pearl beat Butterflies. Lizzie Lee a bye.

*Deciding Course.*

Pearl beat Lizzie Lee and won.

B.

[Our report not having arrived on time we can only give the results this week.]

# Canoeing.

## A. C. A. Executive Committee Meeting.

*Albany, N. Y., Nov. 12, 1894.*

### Official Reports 1893-4.

The twelfth annual meeting of the executive committee of the American Canoe Association was held in Albany on Nov. 12, Com. Witherbee presiding. The meeting was called to order at 10 A. M. in a parlor of the Hotel Kenmore, the following officers and members being present: Com. W. C. Witherbee, Sec.-Treas. C. E. Cragge, Librarian W. P. Stephens; Atlantic Division, Vice-Com. H. L. Quick, Purser Thos. Hale, Jr., ex-Com. I. V. Dorland, J. K. Hand and H. H. Smythe; Central Division, Vice-Com. C. G. Belman, Purser W. S. Hackett, ex-Com. W. R. Huntington; Eastern Division, Vice-Com. R. Appollonio. Purser Cutler by proxy, A. W. Dodd, ex-Com. Dr. G. L. Parmele; Northern Division, Vice-Com. W. L. Scott, Rear-Com. J. W. Sparrow. Messrs. Wilkin, Butler and Winne of the board of governors were present, while Mr. Edwards was represented by Mr. Scott. There were also present Messrs. F. A. Nickerson, F. H. Metcalf, J. R. Robertson, L. W. Francis, L. B. Palmer, W. L. Dudley, R. A. Wadsworth and W. B. Davidson.

The minutes of the previous meeting not being at hand, a motion was carried to dispense with the reading of them. The reports of the secretary-treasurer and the camp-site committee were then read and accepted. The report of the Atlantic Division was read, and ex-Com. Dorland called attention to the interpretation therein of the word "receipts" in Chap. I., Sec. 2 of the by-laws, under which the back dues for previous years collected in 1894 were not included in the total receipts to be paid to the A. C. A. treasury. After remarks by several members, the following motion was offered by Vice-Com. Quick, seconded by Dr. Parmele:

*Resolved*, That it is the sense of the executive committee that Par. 2, Sec. 2, Chap. I. of the by-laws be construed as follows: "The receipts for the Division in which the meet is held shall include all moneys received during that year; and the percentage due the Association from the other divisions shall be figured on the total of all dues and entrance fees received during the year."

On motion of Mr. Dorland, the report was ordered returned to the purser for correction, there being still due to the A. C. A. treasury some $25 more under the above ruling.

The reports of the Central, Eastern and Northern Divisions were then read and accepted. The proposal of Sec'y-Treas. Douglass, published in the FOREST AND STREAM of Oct. 27, to amend the Constitution in Art. V., Sec. 2, par. 8, to make the terms of the Division officers concurrent with those of the Association officers, from Oct 1; was taken up after discussion was carried.

Com. Witherbee then announced the following committees for 1895: Camp Site: W. R. Huntington, chairman; J. R. Robertson, L. W. Francis and Clarence Asbenden. Regatta: M. V. Brokaw, chairman; F. A. Nickerson, H. R. Tilley. Transportation: C. V. Winne, J. K. Hand, F. H. Metcalf, R. E. Burns. Signal Officer: Dr. C. A. Neidé. Fleet Surgeon: Dr. W. M. Nellis.

Mr. Huntington then made a verbal report for the new campsite committee; the following motion, by Mr. Dorland, seconded by Vice-Com. Belman, being passed after a brief discussion: Resolved, That the report of the camp site committee for 1895 be accepted, and that their recommendation, that Bluff Point, on Lake Champlain, be selected as the site of the 1895 camp, be concurred in. Considerable discussion followed over the matter of the date, whether from Aug. 9 to 16, or Aug. 9 to 23, the latter being finally adopted. Mrs. H. V. Backus, of Rochester, was elected an associate member; other names presented too late for publication in advance being left for a vote by mail.

Mr. Winne tendered to the canoeists present, on behalf of the Mohicon C. C. an invitation to a "Commers" at the Fort Orange Club in the evening, which was accepted with a vote of thanks. Mr. Stephens, as chairman of the special committee on future camp sites, then called the attention of the executive committee to the motion of Mr. Wilkin adopted at a meeting of the persons in camp at the last meet, instructing the executive committee to discharge the committee; requesting that this be done. Mr. Wilkin spoke on the question, again urging the discharge of the committee. After a little discussion, a motion to adjourn was carried, and all went to lunch with Com. Witherbee in the hotel dining room. When the meeting re-convened at 2.40 P. M. Mr. Dorland brought up the question of the site committee, speaking very strongly of the work expected of the committee, and of the discourteous reception which their efforts had met, finally moving, in accordance with the wishes of the different members, that the committee be discharged, which was done.

The report of the retiring regatta committee was not at hand, but the chairman, Vice-Com. Quick, introduced a proposal to institute handicaps by classes in those races outside of the trophy, record and unlimited, the general plan proposed being to place the racing men in one of three classes, with a fixed allowance for each class. Several plans were suggested by which the three classes could be made to finish without time allowance to be added afterward. The plan met with general approval, and the following motion was adopted, as offered by Vice-Com. Quick: Resolved, That it is the sense of the executive committee that the regatta committee shall make all races as far as possible handicap races, except the trophy and record races; and that the handicapping be made in difference of time in starting. All the details will be left to the new regatta committee. Vice-Com. Quick then called attention to the growing practice of giving valuable prizes, presented for the purpose to the Association, in addition to the silk flags as called for by the racing rules. No action was taken.

A long discussion followed over the revising of the list of lady members, being ended at last by a motion to instruct the vice-commodore of each division to appoint a special committee from the division executive committee with power to revise the list for that division, to report to the secretary-treasury by Feb. 1. The matter of omitting the flags of the various canoe clubs from the Year Book was discussed, and it was decided that in view of the considerable cost of revising and correcting the present plates, the flags be omitted. The meeting then adjourned.

A meeting of the Board of Governors was held at 4 P. M., there being present Com. Witherbee, Sec.-Treas. Cragge, Pres. Wilkin, and Messrs. Huntington, representing Mr. Winne, the recorder, Butler and Scott, the latter representing Mr. Edwards. After a full discussion of the finances of the Association, it was voted to set aside the present balance of about $650 for a temporary sinking fund, and to apportion 80 per cent. of the income for 1895 for the expenses of the year, the balance to be added to the sinking fund. To accommodate the secretary-treasurer until the next year's dues are collected, the sum of $250 was advanced from the sinking fund, the balance to be deposited in the hands of the president and recorder. It was resolved that in cases where a meeting may not be necessary, a mail vote may be taken, and that no money shall be appropriated for any purpose except upon the affirmative vote of three members of the board.

At 7:30 the committee and visiting canoeists to the number of 42 assembled in one of the hotel dining rooms as the guests of Com. Witherbee, a very elegant dinner being spread for them. When the dinner terminated at 10 o'clock, a delegation from the Mohican C. C. was in waiting to escort the entire party to the Fort Orange Club, where an elegant and substantial cold spread, with pipes and beer, was prepared in a large inclosed piazza of the club house. The orchestra from the hotel dining room was already in position in a high balcony when the guests reached the club house, and played throughout the evening. Among the large number present were many old A. C. A. men, and the whole affair was a most enjoyable reunion of old friends. The fun kept up with songs, stories and dancing until the visitors from out of town departed to catch the early morning trains, long after midnight, all carrying with them a lively appreciation of the hospitality both of Com. Witherbee and the Mohicans.

### Report of Camp Site Committee.

BROOKLYN, Oct. 23.—*Irving V. Dorland, Esq., Commodore A. C. A.:* In accordance with the custom your camp site committee beg to hand you its annual report of the expenses attending the arrangements of the camp located at Croton Point on the Hudson, 1894.

The committee's expenditures in full were as follows:

*Expenditures.*

| | |
|---|---|
| Labor, 15 men in all, and also for teams, etc | $371 87 |
| Lumber | 379 03 |
| Three pumps, nails, tubing, etc | 16 85 |
| Flag poles, etc | 29 20 |
| Printing receipts, etc., also for postage and expenses at camp | 12 50 |
| Making change | 70 |
| | $810 15 |

*Receipts.*

| | |
|---|---|
| Receipts from Geo. P. Douglas, Sec'y-Treas | $315 15 |
| From members for labor and lumber | 439 50 |
| From W. A. Underhill Brick Co., lumber, pumps, flag poles, etc., sold | 55 50 |
| | $810 15 |

Of the above expenditures your committee feels that it is proper to call your attention to one item, namely, that of the work done and material used for headquarters, which was $45.80.

The balance of the charges were for the benefit of every member of the camp, and this item we feel, should stand by itself, so as to become a record for future administrations.

Your committee further report that it has in hand outstanding bills of $2.50, two of which it is unable to locate, and one which is contested, and in regard to these matters we recommend that no further action be taken.

Trusting that the work of the committee has met with the approval of the members this report is respectfully submitted.

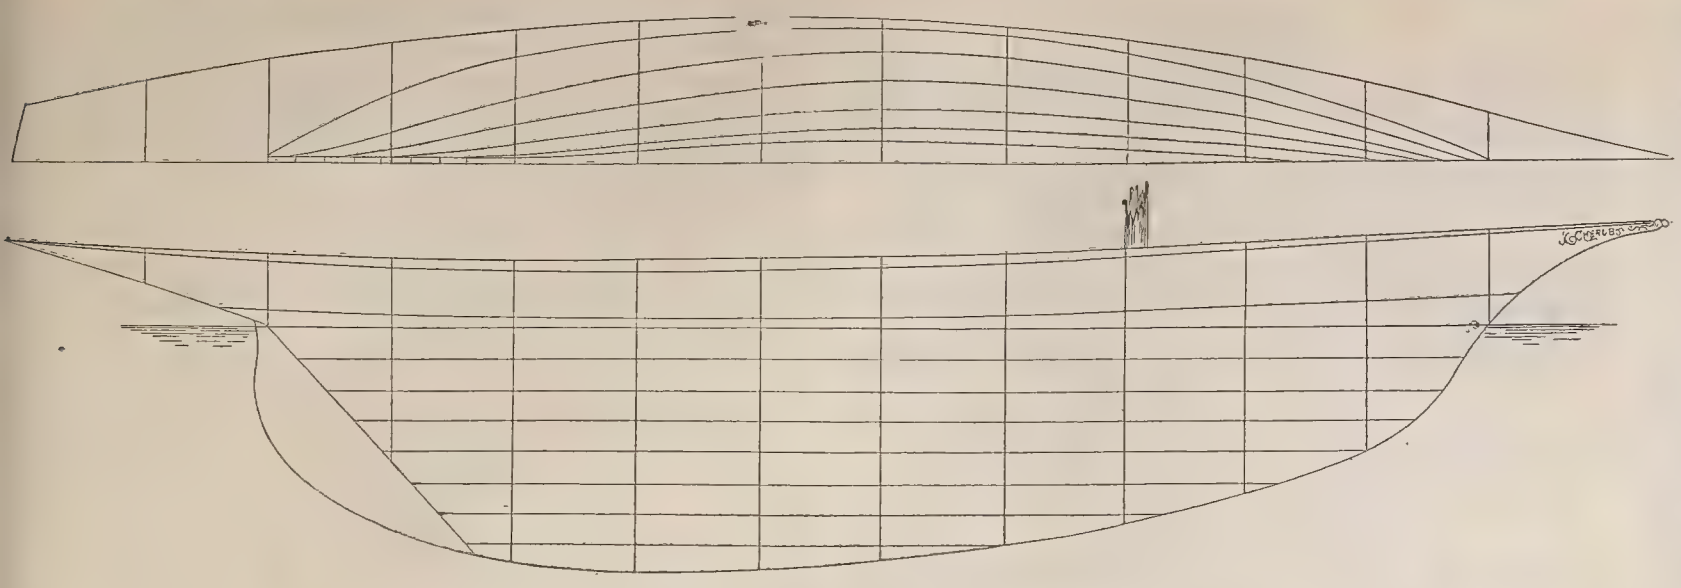
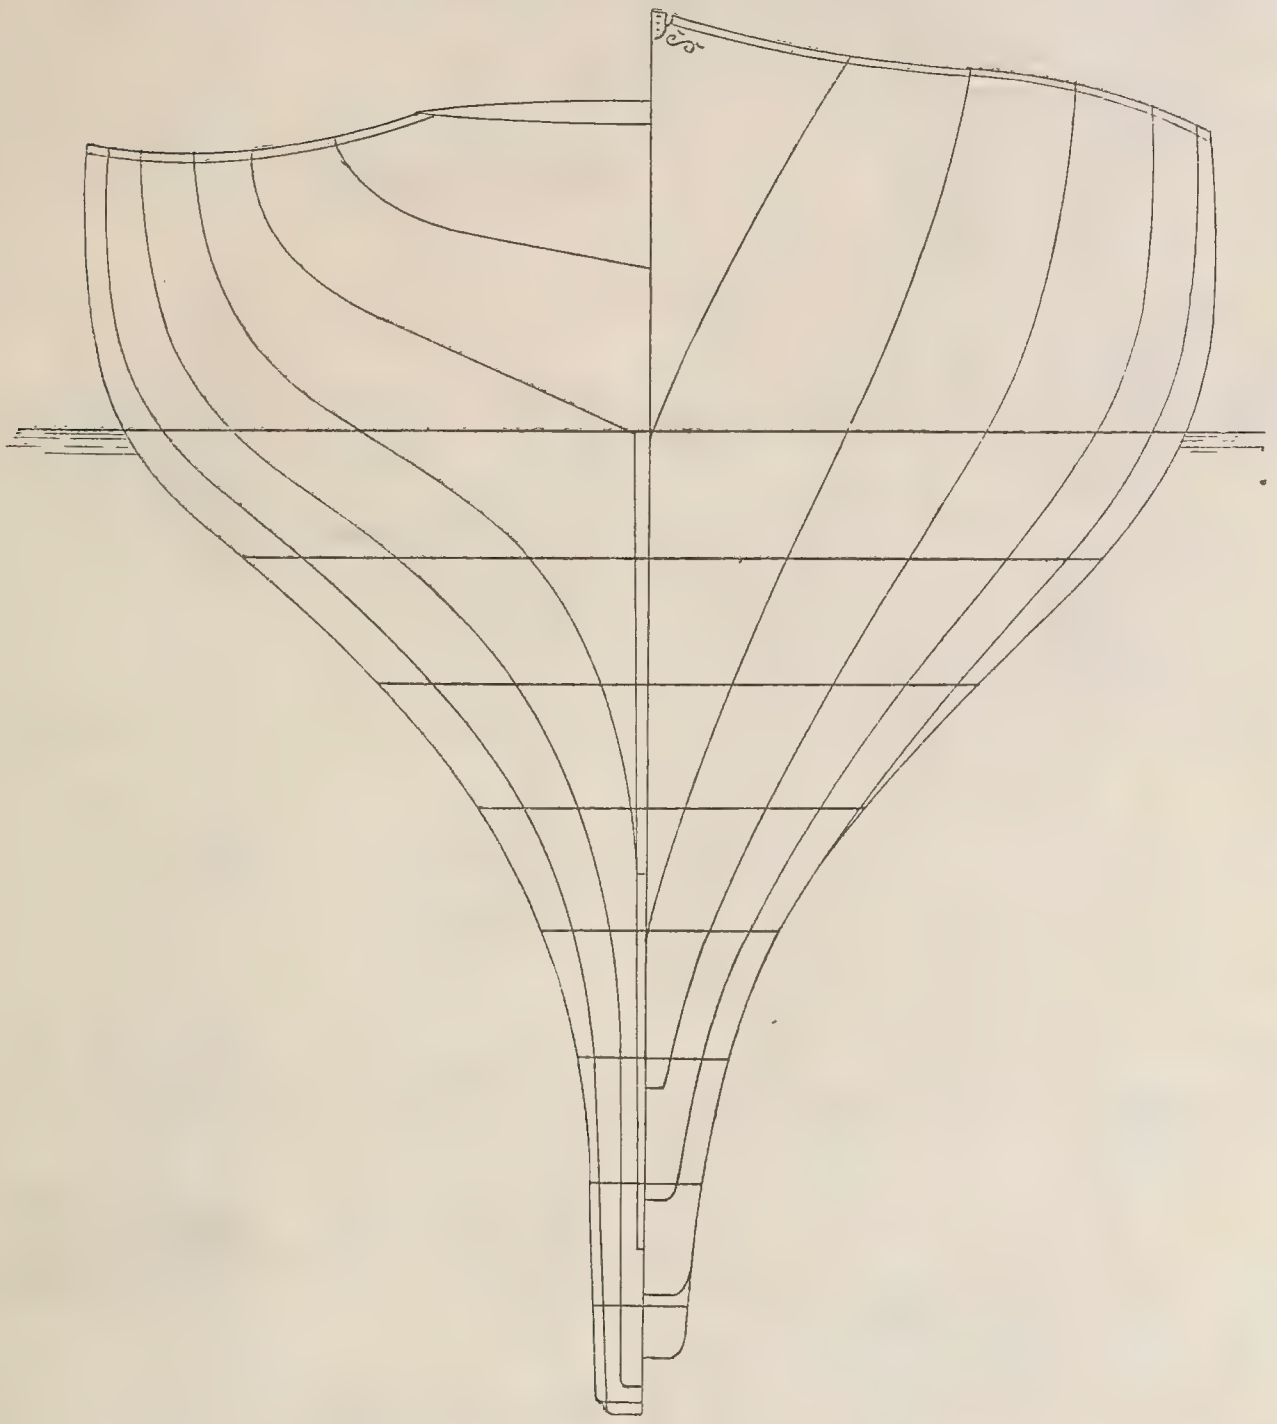
# Yachting.



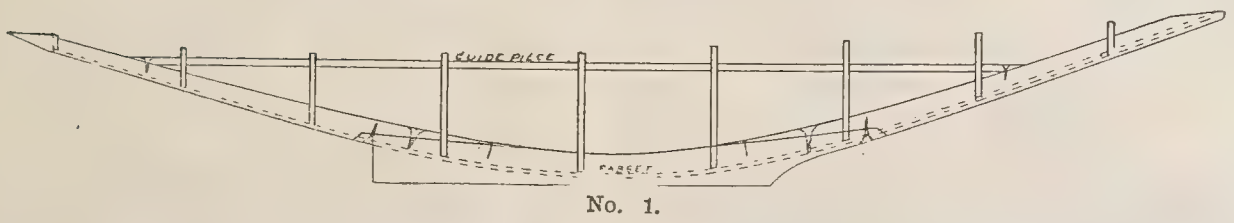
LORD DUNRAVEN'S request for the marking and measurement of the load waterline and the limitation of crews is not only fair and reasonable, but the necessity for some such measurer was made plain by the case of Vigilant's "ballast crew." If no limits be fixed and the rules be left in their present imperfect state, the only result will be an inducement to further evasion by both parties, destroying the equality of prime conditions which should exist in such important international contests; and leading to disputes over interpretations of obscure and defective rules. If an unlimited crew can be used to advantage in such big craft, then the challenger will doubtless be prepared to go quite as far as the defender in the future; and we may see the plan in practice which was seriously discussed on Vigilant in the last cup races, of slinging the crew in life lines outside the rail. All the details of crew, measurement and ballast should be governed by fixed rules, made before the yachts are designed.

THE request that all windward and leeward matches be started dead to windward is fair in itself, in fact, such a stipulation was carefully inserted in the new deed of gift; but such a start is often difficult to obtain without going far off shore. It is quite unlikely that the Cup committee will be any less anxious for a windward course than Lord Dunraven himself; but to agree positively on a start dead to windward would mean still more numerous failures and postponements.



THE question of a limit to size and sail area is an important one to both parties, and should Lord Dunraven's request be acceded to, either by the adoption of a sailing length limit or, what would be much the same, by a mutual agreement not to exceed a certain area of sail for a waterline of not over 90ft., the races would be more interesting and both parties would be the gainers by the removal of the existing incentive to outbuilding and overcanvassing. The records of the past four contests show that the defender has always gained by having the more powerful boat and the larger sail plan; but just as soon as this advantage is appreciated by the other side, it must disappear, the challenger also availing himself of it. There is every indication at present that Mr. Watson and Lord Dunraven will profit by the experience of Valkyrie with Vigilant and by the knowledge of the latter boat gained this year; and that the new challenger will be up to the 90ft. limit and sparred and canvassed for Sandy Hook and not for the Solent or the Irish Sea. Should this prove to be the case, the margin for overpowering the challenger, which has been utilized so successfully in the cases of Puritan, Mayflower, Volunteer and Vigilant, will have disappeared, and while challenger and defender must share equally the risks attendant upon over-sparring, neither can gain materially from an excess of size.

If it can be assured that, even in going to the 90ft. limit, Mr. Watson would build a yacht of Valkyrie's power, leaving the defenders free to again outbuild, it would be good judgment for the club to decline to place any limit on sail. All the circumstances, however, point in the opposite direction of a very large and powerful boat as challenger; so large that a new attempt at outbuilding will involve dangerous risks to spars and gear. It rests with the New York Y. C. to place the entire contest on a fairer footing, with advantage to both parties, by removing the existing premium to a dangerous rivalry in overpowering.



LORD DUNRAVEN'S letter clearly shows that nothing final has been done, and that the design is still open to changes, according to the conditions to be agreed upon. With the matter in this state, a word from the New York Y. C. would no doubt remove the competition to a smaller class than 90ft., an advantage to the defender rather than the challenger, but which the latter would probably agree to. Whatever appens, the '87-footer" of 1893 is out of date, as much so as May

ENGLISH DESIGN FOR MODEL YACHT—1893.

BODY PLAN OF ENGLISH DESIGN—ONE-HALF SIZE.

No. 1.

flower or Puritan; the only logical choice is between the voluntary selection of such a length as 70 or 80ft., and the building to the limit, 90ft.

---

THE request for a change of location from New York to Marblehead we can only look upon as most unreasonable and unwise. Apart from the almost absolute certainty that the request would be refused, it is one that, if granted, would be of no special benefit to the challenger, though causing much unnecessary trouble and expense to the defender. The chances of Valkyrie or a new boat off Marblehead would not be one whit better than off Sandy Hook; there is no more certainty of strong winds or even moderate breezes such as would make a race within the time limit. The gain in distance to the starting line, while an advantage over the Sandy Hook course, would be more than offset by a fleet of small sailboats that would be more dangerous by far than any big steamers. It is safe to say that on such an occasion Massachusetts Bay could turn out a fleet of 300 craft under 30ft., catboats and fishing craft, that would crowd the course in a way to make all sailing of 90ft. yachts a most dangerous proceeding. Something of this kind, unknown about New York on account of the distance, was seen in 1886 when Mayflower sailed her first race, and a year later when she raced with Galatea. As long as Americans want to witness the races and are willing to pay liberally for the privilege, so long will steamers be found to carry them, whether at New York, Newport or Marblehead, and a change to the latter place would show no improvement in this respect. The danger of an interference with a race, if not of collision, is as serious; but it is no worse outside the Hook than it would be elsewhere; in fact, as we have noted, the distance from a secure harbor keeps the small boats away, and the steamboat inspection laws to a certain extent keep off the smaller steam craft with only inside licenses. The great trouble lies with the largest and fastest steamboats, owned by large corporations, the heads of which in several instances are members of the New York Y. C. The first cause of the crowding and blanketing lies in the desire of these companies to secure a few more passengers at so many dollars per head, the spectators soon finding out and rewarding with their patronage the boats which crowd closest to the yachts regardless of fair play. The disciplining by their employers of one or two captains of the more flagrant offenders would exercise a wholesome restraint on the whole fleet of passenger boats.

It is probable that Lord Dunraven has been misled by the clamor of interested parties into the belief that yachtsmen generally would favor the sailing of the races elsewhere than in New York. In making this request, however, he has weakened the whole force of his letter.

---

THE proposal for the selection of the challenger from a fleet, by means of trial races, the privilege now allowed only to the defender, is only in accord with modern and advanced racing methods, in putting all parties on the same footing. While the time will probably come when the challenger for the America's Cup will be selected in this way it is quite clear that no such proposal would be agreed to now, and it might better have been omitted altogether.

---

WHILE not a direct challenge for the America Cup, Lord Dunraven's letter may be taken as a positive assurance of his intention to challenge provided no disagreement may arise over the conditions. Under a literal construction of the new deed of gift, the letter, not being a challenge in due form, the club is under no obligations to recognize or reply to it. At the same time it is such an overture for a mutual agreement as must constitute the foundation of every fair match between any two parties, the first step to a challenge under the true deed of gift. While it has already been characterized as a demand upon the New York Y. C. for more "generous concessions;" it is only fair and just to admit that a man who stands ready to put a small fortune into a yacht to sail five races should at least have the privilege of intimating his wishes as to the terms. As long as there is maintained even a pretense of a "mutual agreement" there can be no justification for the cry of "generous concessions" which has been raised whenever a challenger has ventured to ask for a departure from terms which, as is now clearly recognized, were from the beginning unlawful and unfair.

---

TAKING up the letter in detail, the first striking point is the entire omission of the vital question between challenger and holder, the terms upon which the cup, if won, shall be held. The allusion to the "terms and conditions governing the Vigilant-Valkyrie matches" fails to cover the point, for the reason that nobody knows what these terms were in the matter of holding the Cup. If it is assumed on all hands that Lord Dunraven is merely coming over for the sport of racing, with no hope of winning the Cup, then it makes no difference as to the conditions on which it might be held if won. So far from this being the case, it is plainly evident that Lord Dunraven has strong hopes of success in the new venture, and in that case he is no less concerned in the holding than in the winning of the Cup. The matter is one which should be finally settled, either by the formal recognition by Lord Dunraven and the club which backs his challenge of the new deed as a legal document; or by the formal abrogation by the New York Y. C. of some of the more objectionable of its provisions. If this is not done and the challenger should win, there must inevitably be a dispute over the delivery and holding of the trophy.

---

## Model Yacht Building.—II.

*(Continued from Page 413.)*

THE design for a built-up model should have the cross section lines not over 3in. apart, and if the planking is to be very thin, say 1/8in., 2½in. is better, as these lines represent the distance apart of the frames. The design should also show the rabbet line, marking where the planking joins the stem, stern and keel.

The first thing to do is to make your body plan, showing the sections for both the fore body and after body. This done cut a pattern for each section, out of heavy paper or cardboard, and then cut off as much from the outer edge as would be equal to the thickness of the plank.

Instead of the body plan given last week, showing but one-half of each section, it will be necessary to draw one full plan for the fore body and one for the after body; each showing the two corresponding sides of each section. Draw a line straight up and down on the paper you have prepared for a body plan, and a line across at the waterline, now lay your pattern down and mark one side, turn the pattern over and mark the other, being careful to keep the center and waterlines at their proper places. After you have all the sections marked off in this manner draw a line parallel with and above the waterline about ½in. below the upper end of the lowest section in the after body plan, and at the same point on the forward body plan, this we will call the guide line, as by this line all the guides are set up. This line should also show on the profile plan for marking the keel. We are now ready to commence work.

This description is for a yacht built entirely of white cedar, although some model yacht builders use other woods for keel and frames, yet cedar is generally used for the planking.

Select a clear, straight-grained board of white cedar 12ft. long, 1¼in. thick, and about 10 to 12in. wide, this is sufficient, if properly cut, to make the entire boat. Have this planed on both sides and then cut in two at the middle, making two pieces, each 6ft. long. The better of these, the one that is freer from knots and straight in the grain, should be sawed into strips 3/16in. in thickness, and sawed with the grain; these strips, which will be 1¼in. wide, or nearly so, must be sawed once more through the center. This is your planking, 3/16in. thick, and a little over ½in. wide. Lay it aside to dry while you are setting up the frame.

Now mark and saw out the keel on the other piece of the plank, which should properly be in three pieces, joined as per diagram, by screws and glue. The object in making the backbone in three pieces is to have all parts of the keel straight with the grain of the wood. After it is all together plane down to the thickness required by the design, the after end or dead wood to be tapered down until it is the proper thickness at the sternpost, otherwise the rabbet line will not be correct, nor will the frames of the counter set in their right position.

Now lay the keel on the design and mark at each end where the guide line comes; get out a square piece of pine the same size square as the thickness of the keel, bevel the ends so that it will fit nicely in the keel, with the upper side exactly on the guide lines at each end, and fasten with screws. (See No. 1.)

Now lay the keel on the design and mark each cross section line on the keel and also on the guide piece. Then mark the rabbet line on the keel and cut out to the depth required for the thickness of the plank. Care must be taken in cutting this line to keep a square corner at the bottom and at the proper angle for the plank to lay in, as it comes in different places along the keel and overhang.

Now mortise for the frames. Those in the forward body must be cut from the line forward the width of the frames, and those in the after body cut aft of the line.

Now take the pieces that were left from sawing out the keel and have them resawed to one-half the thickness and planed down to three-eighths or seven-sixteenths. Take the pattern from your body plans and mark with a fine-pointed pencil all the frames on these pieces, being careful to keep them with the grain of the wood as much as possible, and have them sawed out with a fine band saw. Number each frame as you mark it out, and also mark the guide line and each diagonal line on every frame.

Bevel the frames, taking the bevels for each frame from the diagonal lines and deck lines on the half breadth plan. After the frames are beveled tack a strip on each pair of frames, of the length to hold them the right distance apart, the under side of the strip even with the guide line. Mark the exact center of this strip and place this mark over a center line drawn on the guide piece of the keel, then fit the ends of the frames in the mortises until the strip just touches the guide piece. Tack the strip to guide piece, and set the ends of frames in keel with glue, fastening with screws or wire nails.

After the frames are all in cut out the stern piece for the end of the overhang; this is to be made of some moderately hard wood such as cherry or light mahogany. It should have a rabbet line cut on the underside for the ends of the plank, and should be deep enough to form a part of the rail around the deck. Fit to the end of overhang by mortising and set in glue with screws to fasten.

Now take two of the plank strips and fasten them temporarily around the upper ends of the frames, with small screws fasten an end of each plank to the stern piece, then spring them together at the center and tie them by passing a stout string around them. Beginning at the stern, screw them to the frames, one screw to each frame is sufficient to hold them in place, one screw on each side alternately, until you reach the center, then remove the string and spring the plank together at the bow and tie, being very careful to spring them evenly; then finish screwing them on, cutting the forward ends so that they will lay in the rabbet line, when the last screw on each side fastens them to stem of the keel.

You are now ready to commence planking. The first plank, called the garboard, requires considerable care to make a good fit. Take a short piece just long enough to lay into the rabbet line, so that the ends will work into the line at either end, the upper edge to be perfectly straight; cut away the lower edge until it fits nicely into the rabbet at the lowest point and both ends are an equal distance down from the temporary sheer plank. Fasten with ½in. No. 1 brass screws; where the plank is wide enough use two screws to each frame, one at the top and one at the bottom, and on this plank put one screw between each of the frames, screwing the plank to the keel. Use a small brad awl to make a hole through the plank, and just enter the point into the frame, then turn the screws in until they countersink themselves a little below the surface, so you will not hit them when planing off. When the garboard on one side is set, turn the boat over and put one on the other side in the same manner.

Next fit a plank on each side by simply trimming the ends to fit the rabbet line, and if necessary, on account of curve of the frames, bevel the lower edge to a fit to the garboard, this should be done wherever necessary all the way up the side so that the plank will touch each other both inside and outside. Place only one plank on each side at a time, carrying both sides up together, fasten each plank with two screws to each frame, and two in each end to the keel or stem.

Plank about one-third the way up on each side, using the straight plank. Then stop and measure the distance that remains to be planked on each frame. Take the longest distance you find and see how many planks it will take to finish. Then divide the distance on each of the others into the same number of equal parts. This will give you the width of the planks at different points. Cut one of the planks down to use as a pattern, and mark and cut the others by it as you go along. Plank about half of the remaining distance up, and then measure over again to see if you are going to come out right at the top. The object of this is to keep the planks as nearly as possible of a uniform width at the ends. When you have planked as far as you can go, take off the temporary sheer plank and finish up to top of the frames. A good way to hold the planks in place while fastening them is to have about a dozen small screw clamps. Hold the plank with these to every second frame. Put the screws in the intermediate frames, then remove the clamps and put in the balance of the screws.

Now cut away the surplus wood at the stem, and with a small block plane, set very fine, go all over the boat, taking off any sharp corners where the planks are joined, and sandpaper down smooth.

Now take some heavy muslin and cut into strips wide enough to just cover the inside of the planks between the frames, and fasten these pieces in with glue or thick shellac, rubbing them down smooth with the hand. After they are thoroughly dry, the whole inside of the boat should have three coats of white lead mixed with oil and turpentine and a little lampblack, just enough to give it a slate color. Allow each coat to get perfectly dry before applying the next one.

The next thing to do is to place the deck beams in position; there are several ways of putting the deck on a model yacht, but I will only describe one—the simplest of all. First screw one of the planks to the inside of the frames so that the upper edge is ½in. below the upper edge of the sheer plank. This forms a shelf or support for the deck beams, and at the same time stiffens the whole boat, use the pieces of plank which you have left from the planking, cut the upper edge to the curve you want for the rise of the deck; cut them of the length to reach across inside of the sheer plank and rest them on the inside plank and put one screw in each end to the side of the frames. As

fast as you put in the deck beams remove the strips which are under them, and when all are in, loosen the guide piece and draw it out. Insert two pieces of the plank to form the sides of the hatch, nailing them securely to the deck beams that form the forward and after ends of the hatch.

Now get out the covering boards; these should be of oak of the same thickness as the deck proper, which may be of pine or mahogany. The cover boards are to be 1in. wide; it is better to make them of two pieces to each side to avoid too much cross-grain. Cut one piece to lay on from the bow to the center of midship frame; the second from midship to stern, lay them on the top of the frames and mark for screw holes; then drill the holes with a twist drill through the covering board and countersink them so the head of the screw will be below the surface, use ¾in. No. 4 screws, put one in each frame.

Next cut and fit some thin pieces to fit underneath the covering board between the deck beams and to project about ¼in. toward the center of the boat and glue them in, these are to support the edge of the deck while caulking. Cut notches out of the center of each deck beam to let in a strip about 1in. wide and $^{5}/_{16}$in. thick as a support for the center of the deck. Cut out and fit closely one-half of the deck, cut out the place for the hatch, and nail the half deck on to the deck beams, using ½in. No. 20 wire nails, not over 1in. apart, then cut and nail on the other side of the deck in the same manner. You will need some one to help you in putting on the deck, to hold a small weight under the deck beams while you are nailing.

To make the boat perfectly watertight it should be caulked. The tools for caulking consist of two small wheels set in handles, in the same manner as tracing wheels are set. One of the wheels has a V-shaped edge for opening the seam, the other a square edge about $^{1}/_{20}$in. wide, you will also need a putty knife. For caulking use coarse knitting cotton, cut a piece the length of the seam you are to caulk, lay it on a board, and with a small brush rub some white lead well into it. With the V-shaped wheel open the seam by rolling it along back and forward with a slight pressure, lay your cotton over the seam, with the putty knife press the end into the seam, then with the square-edged wheel roll it in the whole length. Caulk every seam in the boat, not omitting the one under the covering board and caulk the seams in the deck, then with a small pencil-brush and white lead touch every screw and nail head.

As soon as the lead is dry go over every seam and screw and fill up smooth with good white lead putty. Give the putty a week or so to dry that it may be perfectly hard, and then sandpaper off. The boat is now ready to be painted, or, if you prefer it, varnished in the natural wood; if this is done, however, you must be very thorough in your sandpapering to remove every spot of white lead, except such as show in the seams and on the screws.

The design shows a model yacht of the English type, a prize winner in a designing competition for a model of 10-rating held by the *Model Yachtsman and Canoeist* last year. The dimensions are: Length over all, 54½in.; l.w.l., 40in.; beam, 9⅛in.; draft, 7⅞in.; displacement, 21.13lbs.

[TO BE CONCLUDED NEXT WEEK.]

## Lord Dunraven's Letter.

A SPECIAL meeting of the New York Y. C. was held on Nov. 8, with Vice-Com. Brown in the chair, to consider the letter from Lord Dunraven, which reads as follows:

DUNRAVEN CASTLE, BRIDGEND, GLAMORGAN, Oct. 25, 1894.

DEAR MR. ODDIE—I should have written you before now on the subject of challenging for the "America Cup," but that I was anxious before doing so to ascertain what alterations if any were to be made in our Y. R. A. rating rule However, as time is running on, it would be well I think, that certain preliminaries should be discussed without committing myself definitely to a challenge.

The terms and conditions governing the Vigilant-Valkyrie matches would be quite satisfactory to me, with the following modifications.

First, as by length on the l.w.l. is obviously meant length on which a vessel sails, I think yachts should be measured with all the weights on board, dead and alive, which they intend to carry during a race, and should be marked, that no alteration should be made in the amount of those weights and no ballast trimmed without notice given to the sailing committee not less than twenty-four hours before a race; that the committee should be entitled to take any steps they may think fit to ascertain that the vessels do not when racing exceed their measured length and that a limit—a generous one—to the number of persons on board should be fixed according to l.w.l length or rating.

Second, that all dead to windward and leeward matches should be started to windward.

The superiority of a sailing length (rating), limit over a length on the l.w.l. limit has been advocated, I notice, both in the United States and here. If, in the opinion of the New York Y. C., a fairer test of the relative merits of yachts can be so obtained, the sailing length according to your rule, instead of the l.w.l. length to be furnished by the challenger.

I do not think it possible to find a naturally better place for sailing the matches than the outer bay of New York; but it is open to two disadvantages. First, the distance from port, and second, the overcrowding, and for those reasons I should prefer Marblehead. The superiority of Marblehead in the first respect is, I believe, undoubted. To what extent it possesses advantages over New York in the second respect it is difficult for me to say. Obviously the New York Y. C., or any committee appointed by them, will be more capable of judging. I hope you will clearly understand that I attribute no animus whatever to the steamers, but I am sure the members of the late committee will agree with me as to the extreme difficulty experienced in trying to keep a clear course last year. It is of the utmost importance that the elements of uncertainty derived from a crowded course should be as far as possible eliminated, and if there is even a probability of reducing it by sailing at Marblehead I hope the New York Y. C. will consent to do so.

It appears to me somewhat unfair theoretically that a challenging club should be confined to one vessel, while a challenged club can select a champion from an indefinite number. In practice, if a challenger should be inferior to another vessel of his nationality, a contest for the America Cup would have no interest or importance as an international test. I would therefore suggest that both parties should have equal rights of selection.

Will you kindly submit this to the New York Y. C. at the earliest opportunity, and as in the event of challenging it is desirable that I should have a speedy answer to the question whether l.w.l. length or sailing length should be given, I should be greatly obliged if you would cable me "Length" or "Rating," according to the decision of the club.

I remain, dear Mr. Oddie, yours very truly, DUNRAVEN.

After the letter was read, a general discussion took place, resulting in a resolution that the races for the Cup shall be sailed off New York. As is customary in all matters relating to challenges for the Cup, ex-Com. James D. Smith then moved that a committee be appointed to consider Lord Dunraven's propositions, which motion was carried. The committee appointed, which will continue through the year in the event of a challenge, includes ex-Com. James D. Smith as chairman and Messrs. Latham A. Fish, Chas. J. Paine, Philip Schuyler, Gouverneur Kortright, A. Cass Canfield and J. F. Tams. The first five gentlemen on the new committee were all members of the special committee of 1887 which, with ex-Com. Gerry, drew up and signed on behalf of the club the "new deed of gift."

## American Model Y. C.

BROOKLYN—PROSPECT PARK LAKE.

*Tuesday, Nov. 6.*

OWING to the deep interest in the election and the strong N.W. wind, the last races of the season of the American Model Y. C. were far from being a success, only four yachts of the third class going over the course laid out by the regatta committee, from Sister Island to a point east of Tar Path, a beat to windward and return of about three-tenths of a mile. The yachts with their small topsails had all they could do to claw to windward against a heavy sea and wind to the turning mark, and when well around it and before the wind, including a white ash breeze by the skippers, made quick time for the finish, as the times below will show. Jennetta was handicapped by having no automatic steering gear, which explains her poor performance:

FIRST ROUND.

| | Start. | Elapsed. | Corrected. |
|---|---|---|---|
| Jennetta, G. W. Lyon | 1 02 00 | Failed to round buoy. | |
| Dolphin, John Smith | 1 03 10 | 0 14 40 | 0 16 08 |
| Marjorie, Herbert Fisher | 1 01 22 | 0 12 52 | 0 14 34 |
| Ida May, H. E. Davis | 1 01 52 | 0 13 18 | 0 14 30 |

Ida May winner of round.

SECOND ROUND.

| | | | |
|---|---|---|---|
| Jennetta | 1 26 25 | Did not finish. | |
| Dolphin | 1 27 25 | 0 13 53 | 0 14 51 |
| Marjorie | 1 26 25 | 0 12 45 | 0 14 17 |
| Ida May | 1 25 45 | 0 18 45 | 0 20 57 |

Marjorie winner.

THIRD AND FINAL ROUND.

| | | | |
|---|---|---|---|
| Jennetta | 1 51 45 | 0 13 15 | 0 14 35 |
| Marjorie | 1 51 25 | 0 12 30 | 0 13 42 |

Dolphin and Ida May withdrew.

Marjorie wins first prize, Ida May second.

The club has just issued its annual book, containing the constitution, sailing rules, etc. The fleet includes 6 schooners and 34 cutters and sloops.

## The Lake George Y. C.'s House Burned.

THE Lake George Y. C.'s building, on the west shore of Basin Bay, about two miles south of Bolton Landing, was burned to the ground yesterday. The fire is supposed to have been of incendiary origin. The building was a handsome two-story structure, erected four years ago at a cost of about $8,500. The officers of the club are: John B. Simpson, New York, Com.; LeGrand C. Cramer, Troy, Vice-Com.; W. H. Tippetts, Glens Falls, Sec'y, and Chas. F. Smillie, New York, Treas. The building was insured for $5,000.—*Glens Falls (N. Y.) Star, Nov. 7.*

## YACHT NEWS NOTES.

Mr. Howard Gould, pursuant to the intention announced some time since, has placed an order for a 20-rater by the Y. R. A. rule with the Herreshoff Mfg. Co., and the yacht will be ready to ship to England in the spring. She will be similar to Dacotah, with a fin of Tobin bronze, and it is stated that she will be manned entirely by Americans.

# Rifle Range and Gallery.

## Greenville Rifle Club.

GREENVILLE, N. J., Nov. 12.—The second annual gallery tournament of the Greenville Rifle Club was brought to a successful close last night. Michael Dorrler again distinguished himself in his usual "get-there" style. Michael got the first prize as well as the trophy for the most points. Scores:

German ring target, tickets three shots, the three best tickets to count for first five prizes. The two best for all others; 18 prizes from $30 to $1:

| | | | | | | |
|---|---|---|---|---|---|---|
| M Dorrler | 74 | 73 | 73 | J Dodds | 69 | 69 |
| F Ross | 75 | 72 | 72 | L P Hansen | 69 | 68 |
| W Rosenbaum | 74 | 72 | 72 | Val Horn | 69 | 67 |
| L Flach | 72 | 72 | 72 | G Purkess | 68 | 67 |
| L Buss | 72 | 71 | 71 | H Gotthardt | 70 | 63 |
| W C Collins | 72 | 70 | | J Filaramo | 68 | 65 |
| J Boag | 72 | 70 | | C W Agneau | 66 | 66 |
| W H Robidoux | 70 | 69 | | C Scheeline | 68 | 61 |
| L Vogel | 70 | 69 | | C H Chavant | 68 | 61 |
| C Boag | 69 | 69 | | | | |

Premiums: M. Dorrler first, diamond trophy; W. Rosenbaum second, $5; F. Ross third, $3; J. Dodds fourth, $2; L. Flach fifth, $1.

*Nov. 9.*—At the weekly shoot of the club for the class handicap prizes the appended scores were made by the members present. Scores: Dorrler 237, Collins 240, J. Boag 236, Scheeline 233, Purkess 238, C Boag 239, Plaisted 237, Lutz 230, Agneau 238, Chavant 231, Fagin 229, Charlock 230, Chase 228. Graef 212, E. Wuestner, Jr. 223, E. Wuestner, Sr. 199, Renker 208, Holzapfel 229.

## Champion Match for 1894.

THE second annual champion match for the Wissel trophy and the honors for making the best 100-shot score was shot off at Wissel's Cypress Hills Park on Election Day, Nov. 7, and won by F. C. Ross. The weather was clear and cold, with a strong gale blowing from 11 to 2 o'clock. There was considerable of a falling off in the entries as compared with the match of 1893. The principal cause for this is said to have been due to the acute congestion (political) of Connecticut, New York and New Jersey, which kept many of the contestants in last year's competition from taking part in the shoot this year.

Twenty-four men were entered in the race on Nov. 4, and on the morning of the shoot twenty of those entries were on hand to take part in the contest. From 8:30 until 10 A. M., the hour for opening the match, there was a continuous influx of shooters and others interested in the contest. The high wind which was prevailing was a matter of much concern to every man entered in the coming race, and as each new arrival came into the shooting house the query was put to him as to the probability of its continuance during the day. The report of each new arrival was that it was to be an all-day affair, and "you fellows with the small calibers had better look out for flukes."

The wind was such that it was impossible to have the shutters open, so recourse was had to the winter or storm ports, which were just large enough to admit the rifle. The interior of the shooting house was kept in a comfortable condition by a combination composed of mine host Wissel, a hot fire and a large supply of spirits, wet and otherwise.

The match was under the management of the two brothers, Charles G. and Barney Zettler, and George W. Plaisted; the conditions, 100 shots per man. The Wissel trophy, presented by that popular boniface, Charles C. Wissel, was to go to the man who made the highest 10-shot score in his 100 shots.

The match last year resulted in a tie between Chas. Hutch and Louis Flach, each with 230, in the shoot off, 3 shots each, Flach won by 3 points. The unusual weather conditions which prevailed this year made it somewhat of a conundrum as to who would carry off the honors for 1894. Under favorable weather conditions, Ross was conceded to be a pretty sure winner of both the trophy and the honors for the highest total for the hundred shots, but large slugs of lead and a gale of wind sometimes upset the best holding when combined with the small caliber and the light bullet. Such were the conditions on Tuesday morning when as the hands of Barney Zettlers "Waterbury" pointed to 10 o'clock his melodious voice filled the house with the expression: "Time gentlemen! the match is now open."

The twenty contestants were distributed on 6 targets. There was Harry M. Pope, from Hartford, Conn.; Michael Dorrler, from Greenville, N. J., Geo. W. Plaisted, from the same burrough, and Geo. Krauss, of Williamsburg, posted at one end of the shooting house and occupying the first target. At the opposite end of the line were to be seen J. E. Smith and Raymond Rudd, from Portchester, N. Y.; L. P. Hansen and W. K. Clynes, of Jersey City. The right and left center was well supported by Fred C. Ross and Ignatz Marten, of Williamsburg; C. G. and B. Zettler, Henry D. Muller, Wm. Rosenbaum ("Buff"), Louis Flach, R. Busse, Dr. C. E. Grosch and Philip Feigel, of New York city. Then there was Geo. Schlicht from Little Germany (Guttenburg), and last but no wise least came the representative from the Harlem district—Henry Holges.

The match was hardly under way before some of the contestants found their bullets wandering from the straight and narrow path. Michael Dorrler was the first to claim the sympathies of his co-laborers, his third shot was a 12; in the early part of his second string Michael again set in motion the lachrymose tendencies of his immediate neighborhood by sending one of his bullets into the outer edge of his target, thereby scoring a 2. This was so much of a strain upon the nerves of the old veteran that he felt compelled to go down to the target in order to work off his internal congestion; with his pinkey inserted in the path of the erratic bullet, he remained in a brown study until a long drawn out protest came floating down the range in the form of a command: "Put up that target, Mike!"

Dorrler was hardly back to the shooting before Charley Zettler found one of his bullets straying into the target frame. Then came L. P. Hansen with a shot clean off the target. This brought the three unfortunates into such close lachrymal relation that they were seen to wander off into the immediate neighborhood of mine host Wissel and his bureau of panaceas, where they were soon joined by others of the group, for as the match progressed there was not one man in the race that did not feel the need of a little bracing up through the effects of bad pulling or the fluky wind. The shooting of every man in the match was way below his average, nearly everyone of which attributed the cause to the wind. Of the twenty men in the race only one was able to get a total of 2,100 or better, while in the match last year eight men had totals of 2,141 or better. In this year's competition Fred C. Ross made the highest score of the twenty entered, his score being 2,142. His score last year was 2,194. The second man, George Schlicht, made a total of 2,070; in last year's competition he made 2,148. The third and fourth men, Geo. W. Plaisted and Michael Dorrler tied, each with 2,067; last year they made respectively 2,083 and 2,181. The fifth man, Harry M. Pope, made 2,054; his score last year was 2,138. The sixth man, Louis Flach, made 2,016; his score last year was 2,146. The seventh man, L. P. Hansen, made the same as Flach, 2,016; last year his score was 2,150. The eighth man, R. Busse, made 1,991; last year his score was 2,078. The ninth man, Henry Holges, made 1,990; his score last year was 2,141. The tenth man in the race, and the last to come in as a prize winner, Ignatz Martin, made 1,986; he was not in the race last year.

The best ten-shot score for the Wissel trophy was made by Fred C. Ross: his total for the ten shots was 231; the score was made in the middle of his 100 shots and was what Ross himself claimed to be a lucky score from the fact that some of his shots scored very much in his favor owing to the wind. Michael Dorrler was the second man with 228. The scores of the other contestants ran down the scale in rapid and somewhat erratic order. With each and every man's score finished there came the usual order of packing up and cleaning up of the rifles; in the meantime a rapid fire of conversation was going on as to the results of the contest and the whys and wherefores of the many disappointments that came to the surface during the day. Before the packing up was completed the general conversation had drifted into match making, the result of which will be found recorded in Rifle Notes. From the shooting-house to the Park Hotel was a short journey, and when there the tired and hungry marksmen found the dining room tables laden with an abundance of that which goes to cheer the inner man. Geb Krauss, vice-president of the Zettler Rifle Club and ex-captain of the Williamsburg Shooting Association, was, with due ceremony, installed in the chair of honor at the head of the dining hall. As presiding officer President Krauss gave entire satisfaction to all, and if it had not been election night the session would have been somewhat protracted. As it was there were many interesting speeches by Messrs. Krause, Dorrler, Ross, Wissel, Maynard, the Zettler Bros. and others. A vote of thanks, a hearty cheer (no tiger), was extended to Mr. and Mrs. Wissel, and the assemblage adjourned to meet again in 1895. Scores:

H. D. MULLER.

### Miller Rifle Club.

HOBOKEN, N. Y., Nov. 8.—The regular meeting of the Miller Rifle Club, R. W. Dewey, captain, was held last evening at 423 Washington street. There was a large attendance. The following scores were made: Geo. Schlicht 243, E. Fisher 237, B. Vogel 232, C. Hepke 231, J. Meyer 230, A. Vanderheyden 226, L. Kammel 226, D. Miller 238, A. Meyns 232, L. Sohe 231, F. Branolt 232, R. W. Dewey 228, W. Rogers 226, W. Taylor 225, A. Stadler 225.

## RIFLE NOTES.

When the farmer turns his steers into the barn-yard on a frosty morning there is usually a little elevation of the caudal appendage and more or less locking of horns of the frisky bovines, a sort of by-play as it were to start the circulation. A group of riflemen gathered in the shooting-house after a day at the butts are not unlike the farmer's steers. While we can only work in the horns and the caudal appendage in a figurative sense as applied to the genus rifleman, there is much in the peculiar antics of the two that lead to the simile.

Following the finish of the champion match at Wissel's Cypress Hills Park last week and previous to the adjournment from the shooting-house to the hotel, some one prodded Ignatz Martin in the ear with the query: Why don't yon challenge Busse for a hundred shot match? That was enough; immediately Martin's horn (challenge) was prodding Busse's ribs, and there was fun in the shooting-house. In the meantime while Busse and Martin were prancing round both Mike Dorrler and Fred. C. Ross each got a prod in the ribs from some one. This brought these two worthies into the fracas, and from this point there developed an argument in which Martin and Ross were lined up on one side and Dorrler and Busse on the other. The final outcome was a 100 shot match, for stake of $50 a side to be shot off on Thanksgiving day in Cyress Hills Park. Some of the other riflemen who were present and were dissatisfied with their scores made during the day made the proposition that an open sweepstakes shoot be gotten up to take place at the same time, the same to be open to all comers, 100 shots each, $5.00 entrance. Here is an opportunity for some of the unfortunates of the election day shoot to get consolation.

Wm. Armbruster, proprietor of the Greenville (N. J.) Schuetzen Park, is putting the shooting house in shape for open practice shooting during the winter. Last season there was shooting in this park on every Saturday during the winter.

Barney Zettler in his remarks to the shooters assembled in Wissel's dining room Tuesday evening said: "Charles and I are back numbers about ready for the shelf or the waste basket. But! We'll shoot any two old men of our age for fun or gelt." Charles says, "I second that motion." Are there any O. F.'s to take up this gauntlet?

As a matter of interest to our rifle cranks, we have gathered the following information relating to the style of rifle, powder, charge and bullet, used by the contestants in the Cypress Hills Park match on Election Day.

Messrs. Ross, Holges, Flach and Hansen use the Ballard action fitted with the "Schalk" barrel .32-40, using about 36grs. Hazard powder F. G. These rifles vary in weight from 12 to 15lbs.

Harry M. Pope is another disciple of the late Geo. Schalk, of Pottsville, Pa.; he uses the Winchester action with a Schalk—Pope barrel, .35cal. Mr. Pope at times varies the monotony of the shooting range by the use of nitro as a priming charge or otherwise.

Geo. W. Plaisted uses a Ballard .38-50 old style rechambered for 55-grain new shell. This shell swelled out to chamber, holds nearly 60grs. of powder. Bullet 300grs. The powder charge used by this crank varies according to his humor and the weather conditions. Sometimes it is 8grs. nitro and 40grs. black powder Hazard F. G., then again it is 3grs. nitro and 55grs. black powder. Sometimes when in a dyspeptic condition he drops the black powder and fills up with all nitro, on such occasions his companions generally move over to the other end of the shooting house in order not to be brought into complications with the Coroner, in case the combination should open up long expected developments.

Michael Dorrler, another crank of long standing, and who is said to have been pretty well up in shooting matters in the early history of American rifle shooting, still retains his Ballard action, into which he has fitted a relic (barrel) which he discovered some time since while delving for something better than there was on the surface. This relic is a .38-55 Remington "special" barrel in its early days, was made for Henry Oehl. Mr. Oehl is by the way one of our retired experts. He used to make it warm for the boys in times past. His shooting history antedates that of Dorrler's somewhat. But the barrel, unlike the shooter, has retained its youth or at least its shooting qualities, and at the present time is capable of doing excellent work. Mr. Dorrler uses the 255 patched bullet (home made), his powder charge is 55grs. Hazard's FFG powder.

R. Busse uses a Ballard action with a "Phillips" barrel .40-55cal. This barrel was originally fitted into a muzzle action and was built for the late Major Geo. Arey. This rifle is capable of good work when properly held.

Next we come to the Zettler brothers, Charles and Barney. These two old veterans never come on to the range twice with the same equipment. Their stock of rifles is so large and varied that they are never able to get hold of the last one the next time. About the only thing that comes to them consecutively is the bullets, these are always "Zettler," one and the same.

Geb Krauss and Ignatz Martin both use Ballard .38-55 recut by the Zettlers and use the Zettler bullet, weight 270.

### New Rifles.

THE Marlin Fire Arms Co. have just brought out a .25-20 repeater. This cartridge is loaded with the regular 86grs. bullet and with FFFG powder; its penetration is greater than that of the .32-20. The rifle is furnished in the model 1894 and at the same discounts as the regular rifles of this model, and can be furnished with any length of barrel or style of magazine. In the case of pistol grip rifles, however, it will be furnished in the 1889 model for the present. This is the only .25cal. repeater on the market.

Improvements have also been made in the cartridges for the model 1891 .32cal. rifle. These cartridges are still kept at the same price as the old .32, although they are much improved. In their improved form they are manufactured by the U. M. C. Co.

The Winchester Repeating Arms Co. in their latest catalogue for November, announce a new repeater "model of 1894," to take the .32-40 or the .38-55 cartridges. This gun is a light-weight, varying from 7¼lbs. to 7¾lbs., and is operated by a new system. It will no doubt be extremely popular.

An addition to this catalogue is an instructive table giving the velocity, penetration and trajectory of all Winchester rifles.

In the catalogue also is listed for the first time fixed ammunition charged with smokeless powder. These cartridges include the old .38 Win., the .38 S. & W., the .32 Win., and the 32 S. & W., as well as the .30cal. army and the .236cal. navy cartridges.

## Trap-Shooting.

**All ties divided unless otherwise reported.**

**If you want your shoot to be announced here send in notice like the following:**

### FIXTURES.

Nov. 22-23.—PEORIA, Ill.—Peoria Parget Co.'s handicap tournament.

Nov. 28.—Central New York Trap-Shooters' League, eighth tournament, at Syracuse.

Nov. 29-30.—WILMINGTON, N C.—Eastern Dog and Game Protective Association's tournament; targets.

Dec. 20-21.—ELIZABETH, N. J.—Two days' shoot of the Elizabeth Gun Club; first day, targets; second day, live birds.

1895.

Jan. 1.—NEWARK, N. J.—Fifteenth annual New Year's Day tournament of the South Side Gun Club. W. R. Hobart, Sec'y.

Jan. 17-19.—HAMILTON, Canada.—Hamilton Gun Club's annual tournament; $1,000 added money. J. W. Bowman, Sec'y.

April 3-5.—WILLARD PARK, Paterson, N. J.—Interstate Manufacturers' and Dealers' Association's third annual grand American handicap at live birds, at New York; $1,000 guaranteed, all surplus added.

May 8-10.—WEIR CITY, Kas.—Ninth annual owl shoot of the Amateur Trap-Shooters' Association of Missouri and Kansas; $200 in cash added. W. W. McIlhany, Sec'y.

May 14 16.—DAYTON, O.—Ohio Trap-Shooters' League annual meeting and tournament under the auspices of the Buckeye Gun Club, of Dayton, O. Ed. Taylor, Sec'y, 8 West Third street, Cincinnati.

May 21-24.—Knoxville (Tenn.) Gun Club's fourteenth annual tournament; $1,500 added to the purses.

May 30-31.—GRAND RAPIDS, Mich.—Valley City Gun Club's annual tournament; targets; added money announced later. C. F. Rood, Sec'y.

June 4-7.—MEMPHIS, Mo.—Memphis Gun Club's annual tournament; $2,000 added money.

June 19-21.—CLEVELAND, O.—Chamberlain Cartridge and Target Company's second annual tournament; $1,200 in cash added.

Aug. 29 31.—HOT SPRINGS, S. D.—Hot Springs Gun Club's second annual tournament.

Oct. 3-6.—Pennsylvania State Sportsmen's fifth annual tournament, under the auspices of the Keystone Shooting League of Philadelphia, John C. Shallcross, Sec'y, Frankford, Pa.

## DRIVERS AND TWISTERS.

*Club secretaries are invited to send their scores for publication in these columns, also any news notes they may care to have printed.*

The London *Field* of Oct. 27 states that the following arrangements have been made for the pigeon shooting season at Monte Carlo: "The sweepstakes shooting will commence on Dec. 10, and will continue each Monday, Wednesday, and Friday until Jan 11. The preliminary contests will begin on Tuesday, Jan. 15, and terminate on Monday, the 28th, the international prizes being shot for on Jan. 30 and Feb. 1, 4, 5. 7, and 9, the Grand Prix itself being fixed for the 4th and 5th (Monday and Tuesday). There will be a second and third series of competitions from Feb. 11 to March 15; and there will be the usual pistol and target shooting competitions throughout the winter, with the same liberal prize list, which has made this meeting so famous."

J. L. Brewer left New York city at 2 P. M. on Saturday en route for Chicago, where he this week meets Dr. W. F. Carver in a series of three 100-bird races for the championship of the world. The dates set were Nov. 13, 14 and 15. Before leaving Brewer said that he expected to be back in a week's time, as he had finally decided not to go to Kansas City for a race or two with Elliott for merely $100 a side each race. "If I defeat Carver," he said, "and I feel just as confident of doing that same thing as possible, Elliott can come to New York and shoot me a series of races for the championship. Budd and Grim are said to be in Chicago waiting for me, but I don't expect to shoot any more matches there than the three with Carver." Of course Brewer may change his mind before Saturday.

Mr. N. A. Hughes, the president of the State Sportsmen's Association, called a meeting of the committees at the Commonwealth Hotel, Harrisburg, Pa., Nov. 10, at 2 P. M. The following members were present: N. A. Hughes, Williamsport; J. O'H. Denny, Latrobe; Jas. Wolstencroft, Philadelphia; Wm. H. Wolstencroft, Philadelphia; Jas. H. Worden, Harrisburg; H. M. F. Worden, Harrisburg; W. L. Powell, Harrisburg, and Harry Thurman, Germantown. Work of value to Philadelphia sportsmen who are interested in the protection of game birds and animals, was the result of this meeting. Another meeting of the different committees will be called at Harrisburg early next year, when the bills intended to be fathered by the Association will be in shape for presentation.

KINGSTON, N. Y., Nov. 6.—The Pansy Gun Club of this place, held a shoot on Saturday last. The badge contest resulted as follows: Reddick, 30 out of 41; Smith, 23 out of 25; Elbac, 22 out of 25; Ten Broeck, 22 out of 39; Kenyon, 19 out of 25; Hume, 18 out of 25. A team race, three men to a side, 25 live birds each, resulted in favor of Smith's team. Scores: Smith 23, Kenyon 19, Hume 18, total 60; Elbac 22, Reddick 19, Haut 16, total 57.

The proof reader played the mischief with the Work—Brewer match reported in last week's issue. Brewer's last 25 was killed straight, his 100th bird was not missed as given in the score; the total also was carried out as 95 instead of 25. In Brewer's account of the race it should have been 97 birds of George Work's 98 could have been gathered within a 21-yard boundary, not 87 as it was made to read.

Dr. W. A. Little won the Pfaender badge of the Coney Island Rod and Gun Club at the club shoot held at Dexter Park, L. I., on Wednesday last, Nov. 7. The shoot was at 7 live birds, club handicap; Dr. Little killed all his birds. A curious feature of the race was the fact that J. B. Voorhees, Adam Eppig and Fred Pfaender also killed all their birds, but each lost one dead out of bounds, thus scoring 6 a piece.

Billy Mills, the Dexter Park (L. I.) trapper, showed on Election Day that he can shoot pigeons equally as well as he can retrieve them. In a three-cornered match at 100 birds each, he stood at 30yds. while his opponents, James A. Hollwell, a veteran, was at 28, and Hank Gilbert, a novice, stood at 25. Mills scored 96, Hollwell 91 and Gilbert 84.

The eighth tournament of the Connecticut Trap-Shooters' League, advertised originally for Oct. 25, postponed on account of a heavy rainstorm until Nov. 9, has again had to be postponed on account of bad weather. No date has yet been fixed for the shoot, but it is understood that an early day will be chosen.

W. R. Hobart, of the Winchester Repeating Arms Co., and secretary of the South Side Gun Club of Newark, N. J., is doing a good deal of hustling just now looking to the ultimate success of his club's fifteenth annual New Year's Day tournament.

The Forest Hill Gun Club of Philadelphia, Pa., will hold an all-day shoot at targets on Thanksgiving Day, Nov. 29. The club's grounds are located at Twenty-seventh street and Lehigh avenue, Philadelphia. For programmes address Wm. Morrison, secretary, 1943 Ridge avenue, Philadelphia.

Justus Von Lengerke arrived back from Sullivan county, N. Y., on Wednesday morning with a nice string of ruffed grouse and rabbits. Gus Grieff also scored 11 on Election Day. N. B.—Why is it that some ruffed grouse have gray tails, others chestnut?

A match was made at Carteret last Wednesday, between George Work and L. S. Thompson. Both want a bicycle badly, so they agreed to shoot a race at 100 live birds each at Hollywood, on Nov. 13, Tuesday of this week. The winner buys a bicycle, the loser paying for it and the birds as well.

W. Fred Quimby is hunting quail in Maryland; Chas. C. Hebbard and M. F. Lindsley are after Bob Whites in New Jersey, while Justus von Lengerke added to his Sullivan county record by bringing into the city on Monday morning a nice string of ruffed grouse killed on Saturday in the Greenwood Lake district.

The second day's programme of the Townsend benefit shoot, which was postponed from Oct. 31 until Nov. 8, had to be postponed once more, owing to the awful weather which prevailed on that day. No day has yet been set for the carrying out of the programme.

During the "Williams"—Brokaw shoot at the Country Club's grounds on Thursday last, any number of ducks, coots, "old squaws" and black ducks were to be seen at intervals flying up and down the Sound.

John T. Mascroft, "the Mayor of Sutton," as he is called down East, better known in New York city and vicinity as the gentleman who is "a little nervous," shot a race with Tom Keller on Thursday, Nov. 8, at 25 targets. He was beaten by a score of 24 to 19. Nervousness will tell at times.

That was a warm squad of amateurs which competed for the Inter-Club cup at Carteret on Wednesday, Nov. 7. It was constituted as follows: Capt. A. W. Money, Messrs. J. Seaver Page, George Work, Fred Hoey, L. S. Thompson and J. Knapp.

Thursday of this week, Nov. 15, Eddie Hill, of Trenton, N. J., and T. W. Morfey, Paterson, N. J., will shoot a match at 100 live birds each for $100 a side. The match will take place at Charlie Zwirlein's grounds at Yardville, N. J.

The match between T. W. Morfey, of Paterson, N. J., and F. Batsch of Elizabeth, N. J., which takes place on Wednesday of this week, is creating a lot of interest. The shoot commences at 2 P. M., on the grounds of the Elizabeth Gun Club. Both men shoot on even terms.

Pennsylvania trap-shooters will be interested to learn that J. E. England ("Bessemer") has decided to give up target shooting altogether; he will in future devote himself to live birds whenever he has the time to spare.

The season for game shooting is notoriously a bad one for news in the trap-shooting world, so many trap-shooters taking advantage of every opportunity to steal a few days in the field or among the forests.

The Valley City Gun Club, of Grand Rapids, Mich., have claimed May 30 and 31 as the dates for their tournament in 1895. The amount of added money will be announced later.

C. Furgueson, Jr., and A. A. Hegeman are booked to shoot a race at 25 live birds, at Woodland, L. I., on Nov. 24.

The Boiling Springs and the Passaic City gun clubs will shoot a twelve-men team race on Nov. 17.

Miss Annie Oakley sailed for England on Saturday last, Nov. 10, on board the Mohawk.

### Live Birds at Carteret.

THE fifteenth contest for the ownership of the Inter-club cup, won by the Carteret Club, of Bergen Point, N. J., last year, took place on Wednesday last, Nov. 7, on the club's grounds. The conditions under which these contests are held are as follows: 25 live birds per man, club handicap rise, two competitions per month during the season; the cup to be won five times before becoming the property of any individual member of the club. Considerable interest centered in the outcome of last Wednesday's shoot, Capt. Money and Fred Hoey each having four wins to their credit. A victory to either of them meant the ownership of the $1,000 cup.

Six members put their names down on the list: Messrs. J. Seaver Page, L. S. Thompson, George Work, Capt. Money, Fred Hoey and J. Knapp. Each man killed his first five birds, the score board showing 30 straight kills; then came a batch of misses, Capt. Money and Messrs Thompson and Knapp each dropping their 6th bird; Knapp dropped another in the 9th round, Thompson following suit on his 10th bird. Mr. Knapp's 11th bird getting away from him he retired from the contest. Mr. Seaver Page was the next to spoil his string of kills, his 13th and 16th birds, both incomers, falling dead out of bounds; strangely enough both lodged on the club house roof. Capt. Money had hard luck with his 14th, a fast, low-flying, left-quartering incomer. The deadline is marked by a strip of wire netting about 18in. high; Capt. Money feathered his bird with his right, but seemed slow with his second; he waited just too long, the bird pitching stone dead on top of one of the small uprights which supported the wire and dropping on the wrong side of the little fence. Mr. Thompson missed his 16th and was practically out of it, although he shot along until the 21st round; Capt. Money having in the meanwhile let his 18th get away hard hit, also retired on the 21st round.

Fred Hoey, who had been doing good work and who had been drawing a remarkably hard lot of driving birds, dropped his 14th. This left George Work alone in first place with a straight score; as he was shooting in pretty much the same style as when he shot his race with Brewer on Oct. 30, he was looked upon as something like a certainty when he had killed 16 straight. He fell down, however, on a comparatively easy circling right-quartering incomer, his 17th bird. This made him a tie with Hoey. It was only for a few minutes, though, as Mr. Hoey, who was the last man in the squad, let another fast driver get away from him. Both men then killed out straight, Work winning with 24 out of 25. Mr. Page shot along until the 23d round, when he missed and dropped out.

This being Work's fourth win, he is now tied with Capt. Money and Fred Hoey; if either of the three wins the next race the cup will become his property. The first race was shot on Dec. 6, 1883, Capt. Money winning on that occasion. The following are the winners of the other races: Dec. 20, 1893, George Work; Jan. 3, 1894, J. Seaver Page; Jan. 17, J. Knapp; Feb. 7, George Work; Feb. 21, Capt. Money; March 7, Capt. Money; March 21, Fred Hoey; April 4, George Work; April 18, May 2 and 16, Fred Hoey; Oct. 3, J. Knapp; Oct. 17, Capt. Money. The score, including last Wednesday's race, shows Messrs. Hoey, Work and Capt. Money, four wins each; J. Knapp, two wins; J. Seaver Page, one win.

Two miss-and-outs, $5 entrance, closed the afternoon's programme. The first, with 8 entries, was divided between Capt. Money and L. S. Thompson. This decision was not arrived at without a long struggle, Mr. Knapp not dropping out until the 12th round, and Mr. Leigh, a guest of the club, forcing the ultimate winners to kill 17 straight. Mr. Leigh's work was extremely brilliant, when it is taken into consideration that this was his first effort at live birds from the traps. Notwithstanding this fact, and also the way in which he handicapped himself (particularly on incomers) by shooting strictly gun below the elbow, he made some really excellent quick kills on fast birds, being very sure with his second shell. The second sweep, which had only 4 entries, was divided at the close of the 4th round between Capt. Money and Mr. Ernest F. Thomas, a newly-elected member of the Carteret. Mr. Thomas is a Western man, hailing from Denver, Col. From his form, both on practice birds and in the sweeps, Mr. Thomas is likely to hold his own with most of the members of the club.

As for the birds, they were somewhat mixed; many were really good, fast birds, as good as anybody wants to see trapped; the balance were nothing out of the ordinary run. The wind, which was blowing strongly in the early part of the afternoon, came across the traps obliquely, helping right-quartering incomers to flap their way to the boundary. Mr. John S. Hoey acted as referee, and as usual, not a murmur was heard against his decisions. Scores:

No. 1, cup race, 25 live birds:

| | | |
|---|---|---|
| George Work (31) | 1111111111111111011111111 | —24 |

| Leigh (25) | 11111111111111110 | —15 | ..... |
| Thomas (25) | 110 | — 2 | 1111—4 |

(Owing to FOREST AND STREAM'S representative attending to the score board, the first and second barrel kills, as well as the direction of each bird's flight was not obtainable; hence the figure 1 above merely denotes a dead bird.)

### "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

## Wright Wins from Pier.

PATERSON, N. J., Nov. 7.—T. C. Wright and Eugene Pier shot their sixth match at live birds at Rogers's grounds on Nov. 5. Notwithstanding the heavy rain some fifty spectators were present. The birds, which were of course a selected lot, were great flyers. Wright outshot Pier on the 13th round, winning his fourth victory, the score now standing Wright four wins to Pier's two. It is stated that Capt. Money and T. W. Morfey will shoot a match against Pier and Keyheart on Nov. 29. The following is the score of the match, together with notes on the same:

Match, Wright vs. Pier, 15 live birds per man, trap and handle, Long Island rules, 30yds. rise, 80yds. boundary, $100 a side:

*Trap Score Type—Copyright 1894 by Forest and Stream Publishing Co.*

Wright.....0 1 1 0 1 1 1 0 0 1 0 0 1—7

Pier.....1 • • 1 0 0 1 0 0 0 1 0 0—4

For Wright: Trapper, Tom Rogers; puller, Arthur Bunn; judge, — Bunn. For Pier: Trapper, Robt. Boyle; puller, Tom Rogers; judge, Jim Burns. Scorer, Dutcher.

Details of the different shots, etc., as follows:

Wright's: First, low-towering twister, clean miss; 2d, extra fast left-quartering driver, fine kill at 40yds.; 3d, extra fast right-quartering twister, clean kill; 4th, extra fast left-quartering driver twister, hit lightly, went home; 5th, fast left-quartering towering twister, extra fine kill; 6th, extra fast left-quartering driver, well stopped; 7th, extra fast right-quartering driver, fine kill at 40yds.; 8th, left-quartering twister driver, very fast, hit lightly; 9th, extra fast right-quartering twister, hit lightly; 10th, extra fast driving twister, game bird, carried load to 67yds.; 11th, right-quartering driver, extra fast, hit lightly, got away; 12th, fast left-quartering twister, hit lightly, away home; 13th, extra fast driver, fine kill at 40yds., which clinched the match.

Pier's: First, extra fast driver, grassed at 40yds; 2d, extra fast left-quartering driver, hit hard, game till his wing broke at 90yds.; 3d, extra fast, hard hit, right-quartering twister, good, game bird, flew till he dropped dead at 100yds.; 4th, extra fast right-quartering driver, killed when well on wing; 5th, twisting driver, extra fast, hit lightly and got away; 6th, extra fast driving twister, hit lightly; 7th, extra fast right-quartering driver, fine kill; 8th, extra fast driving twister, clean miss; 9th, extra fast left-quartering twister, hit lightly; 10th, extra fast driver, shot under, clean miss; 11th, slow left-quartering driver, grassed at 40yds.; 12th, extra fast right-quartering driver, shot over, clean miss; 13th, driving twister, hit lightly.

On Nov. 2 Fisher and Clutze shot a race for $25 a side at Bunn's Hotel. Under the conditions Fisher was to shoot at 10 birds, Clutze at 15. The score was a tie, each killing 4. Score: Match, Fisher vs. Clutze, 10 live birds, trap and handle, Fisher allowing Clutze 5 extra birds to shoot at, Long Island rules, 21yds. rise, 80yds. boundary, $25 a side:

Fisher .....0 0 1 1 1 1 0 • 0 0 —4

Clutze.....0 1 0 1 0 0 0 0 0 1 0 0 1 0 0—4

*Nov. 3.*—At Willard Park the following scores were shot:

No. 1, 100 targets:

DUTCHER.

## The Williams—Brokaw Match.

THE match at 200 live birds a side between J. S. "Williams" and W. Gould Brokaw, which was shot on Thursday last, Nov. 8, at the grounds of the Country Club, at Westchester, N. Y., was a remarkable one in many respects.

In the first place it was remarkable from the fact that two men could be found who were willing for the sake of shooting their race to face the cold northeaster which drove the rain full in their left eyes as they stood at the score. Their contract was a big one; it's no light matter to undetake to shoot at 200 pigeons in one day under any circumstances, however pleasant they may be, but they stuck it out from 11:30 A. M. until somewhere in the neighborhood of 5:30 P. M. The darkness at that hour—thick darkness that might be felt—alone prevented their fullfilling that contract. Secondly, it was remarkable for the sustained interest created by the closeness of the scores throughout the race. Thirdly, it was worthy of note for the reason that Brokaw called no less than 59 "no birds." whereas his opponent only "no birded" 6 up to the time when he went to the score for his 192d bird, and was swallowed up in the gloom which enveloped the shooter, handler and referee. There was one other feature which made this race memorable; that was the question which arose at the close as to what was to become of the match, it being totally impossible to finish the race. For fully 10 minutes Mr. Williams had stood at the score; ten times had he called "pull," but the birds every time, bewildered by the darkness, had refused to dust. There they sat, each one in its turn, showing up like a diminutive snowball as it reflected the light of the lamps in the club house. Jordan L. Mott, Jr., the referee deputized by John S. Hoey, who had been obliged to leave by an early train, called the match off for that day, but refused to decide as to what was to be done with the match and the trophy in dispute, a silver cup of considerable value. No rule could be quoted as bearing on the subject and the referee's decision was reserved. After a great deal of discussion, and the citing of a case or two somewhat similar in circumstances, as precedents, it was agreed between the principals to leave the case in the hands of Messrs. Gideon Knapp and Jacob Pentz as arbitrators. The outcome of this race is likely to form a valuable precedent upon which referees in future can base their decisions; the result as it was, proves the need of some rule on the point.

he time set for the match was "as soon as possible after the arrival of the 10:49 train from New York." Mr. Brokaw and his handler, Walker Breese Smith, left for West Chester at an earlier hour, and were ready for business immediately on the arrival of the main body, composed of Messrs Williams, E. F. Thomas, his handler, and others. A more disheartening outlook than that presented from the windows of the small club house at the shooting grounds it would be hard to imagine. Immediately in front was the sodden lawn on which the traps were set; the boundary, which is only 41yds., was marked by a narrow strip of wire netting and by a few red flags on 5ft. staffs which tottered and swayed to and fro in the gale like mere reeds. Beyond the boundary lay the Sound, covered with whitecaps, which were obliterated from view now and again as a heavier rain storm than usual swept toward New York. To windward it looked very "dirty;" it was just such a day when it's good to be indoors, with a nice wood fire in the grate to toast one's toes at. And yet there were men who preferred to shoot pigeons and get wet through, rather than stay indoors and enjoy the comforts of home!

The question, "How are the birds?" brought forth this statement from Brokaw: "They sit on the traps, and when they do get up are nearly all incomers." He then and there stated that he would call every lingerer a "no bird." He did it; he was nothing if not consistent. Whether he was wise in doing so may be questioned. Certain it is that by adhering to his expressed intention he lost many an easy incomer, technically known as "owls;" certain it is also that by doing as above he took chances of getting screamers and of losing them, which, by the way, he did more than once. On the other hand, he showed that he was not very sure of incomers; the score shows that out of his 36 lost birds, no less than 22, or nearly two-thirds of the whole, had an incoming tendency; of the 22, 8 were direct incomers, while 6 were right-quartering incomers. Williams, on the other hand, waited patiently time after time for birds which refused to fly at once, the storm acting disastrously upon them, as far as flight went. He didn't mind getting a little wetter when he had a chance of something easy. After calling two no birds in his 12th round, Brokaw missed a fast incomer; in the 53d round he called three no birds and then had a right-quartering incomer drop dead out of bounds; in the 11th and 59th rounds he called four consecutive no birds, again in the 87th after two no birds, he drew a regular twisting driver that taxed his skill to the utmost; his 88th bird, an easy incomer, was missed after one other bird had been refused. In the second hundred he called fewer no birds, 49 having been scored to him in the first half of the race. His 141st bird was a low-flying driver which he killed well with his first barrel, having previously refused three birds which refused to fly the instant the trap was sprung. In the 183d round he called one no bird and was then beaten by an incomer which dodged both charges of shot. Brokaw had six birds dead out bounds while Williams had eight.

An incident happened in the 89th round that is noteworthy: Williams drew a strong right-quartering driver, which fell hard hit in the body just inside the boundary. Notwithstanding his caution not to let the dog go, the lad holding the dog did release it; the bird having no wing broken, flopped over the boundary when the dog made for it. The referee of course allowed another bird, which was killed with the first barrel. Mr. Williams's work with his first barrel was very sure throughout the whole race. The following figures tell their own tale: First barrel kills, Williams 93, Brokaw 38; used second barrel for safety, Williams 17, Brokaw 42. The longest run of straight kills was made by Williams in his third series of 25 when commencing on his 53d bird he killed straight until the 66th, he then missed three out of the next four. Brokaw's best work in his first hundred was a run of 16 in his third series of 25; he eclipsed this, however, in the second hundred, when the birds were really a far superior lot of flyers, by missing but one bird between the 128th and 163d rounds inclusive, making runs of 18 and 17.

Of course the match was a slow one, six hours being consumed in scoring 383 birds! It must be remembered, though, that Brokaw called 59 no-birds, while his opponent called 6, in addition to the 7 or 8 which refused to fly on the 192d round. The weather must also be taken into consideration when the time consumed by the match is under discussion. The time taken over the different series of 25 birds each was as follows: first series, 48 minutes; second series, 47 minutes; third series, 50 minutes; fourth series, 45 minutes; fifth series, 40 minutes; sixth series, 44 minutes; seventh series, 39 minutes; to the close of the match, 17 birds by Brokaw and 16 by Williams, about 47 minutes; total, 6 hours. The first bird was shot at 11:30 A. M. prompt.

The birds should have been a good lot; they were stated to have been picked for the shoot; in fact Jordan L. Mott, Jr., said he had made a wager that neither man would average 85 per cent. at the close; he won his bet easily, as Williams, had he killed his last nine straight, would have had but 168 to his credit. Had the weather been fine there is little doubt that the birds would have been above the average; as it was no birds could have flown well in such weather as that which prevailed on Thursday, Nov. 8. As a proof of how dark it was at the close of the match, it may be added that at the commencement of the 170th round, the red light on Stepping Stones Rock was gleaming brightly right ahead of No. 3 trap. At the 185th round the official scorer had to be supplied with an oil lamp so that he could see to make his records in the club score book. From that time on the flight of the birds was a mere matter of conjecture, based solely on the position of the bird when gathered by the dog which did the retrieving.

The decisions of both John S. Hoey, the referee, and of his deputy, Jordan L. Mott, Jr., were received without any dissatisfaction, notwithstanding the peculiar ending of the race. Scores:

Match, 200 live birds per man, 29yds. rise, 41yds. boundary:

Up to Monday of this week the arbitrators appointed to decide the question raised by the failure to shoot this match out on Thursday, Nov. 8, had arrived at no conclusion. Before rendering any decision, they wished to first of all see the original articles of agreement drawn up for the match. Their idea was to find out whether any provision had been made for postponement under any circumstances whatever.

## Coffeyville Gun Club's Tournament.

LITTLE ROCK, Ark., Nov. 9.—The two days' tournament of the Coffeyville Gun Club, held at Coffeyville, Kan., was not the success its projectors had hoped it would be, the attendance of visiting shooters being very slim. Independence and Weir City had promised to be there in force, but not a single shooter from either of these towns put in an appearance; in fact, there were only three visiting shooters present—that clever gentleman and congenial sportsman, Mr. A. H. Piety, of Topeka, Kan., who made a host of friends during his stay; W. R. Duley and the FOREST AND STREAM correspondent from Little Rock, Ark. The local attendance was good, considering that most of the local shooters had never taken part in a tournament before. Piety and Duley set a hot pace for the locals, and won most of the money in special prizes in the target events. Perry Landers did the best shooting in the live bird events, losing but one bird out of 27.

The weather was clear and bright, but a cold raw wind was blowing a gale during the entire two days. This made the shooting difficult, and was also very disagreeable to shooters and spectators alike, who found it a difficult matter to keep warm. The management spared no pains to make the shoot a success; 600 live birds had been provided for the shoot. The very moderate sum of 15 cents per bird was deducted from the entrance money. Targets were thrown at 2 cents, and everything was done to make it agreeable and pleasant for those in attendance. The club has a neat little club house, and also had erected a large tent in the rear of the score, where those who desired could seek shelter from the chilling wind. This was the most comfortable place on the grounds.

The grounds are very convenient, being only about six blocks from the heart of the town. The traps faced north, and there was a large, open tract of country with nothing to interfere with the view of the shooter. It was a sky background. The live bird grounds were located about 100yds. to the left of the target traps. The birds were of good quality, but the traps were poor ones, being nothing more than a tin box that tilted over; this made the birds slow to start. The grove of trees in rear of the deadline also worked against the birds, as this was the first thing to attract their attention; they would start for the trees, thus offering easy shots, as the majority of them were incomers.

Mr. A. H. Piety won the $5 premium for the best average in the programme events with 84 1/6%. Bluerock targets and expert traps were used. Purses were divided as follows: less than 10 entries, 3 moneys, 50, 30 and 20%; 10 or more, 4 moneys, 40, 30, 20 and 10%. Shooters were divided into two classes, experts and amateurs. Experts shot known traps, unknown angles, amateurs shot everything known. A shooter making 85% in one event would have to shoot as an expert in the next event, or until he failed to make 85%, when he could return to the amateur class if he so desired. Piety and Duley shot as experts throughout the whole shoot. American Shooting Association rules governed. The scores that were made are as follows:

*First Day.*

No. 1, 10 targets, entrance 50 cents: Duley 7, Kloehr 8, Lape 7, Lewark 4, Morris 6, Stewart 5, Landers 7.

No. 2, 10 targets, entrance 75 cents: Duley 7, Lape 8, Kloehr 7, Landers 9, Lewark 6, Stewart 8, Morris 3, Cox 7, Piety 9.

Na. 3, 10 targets, entrance $1: Duley 10, Lape 8, Kloehr 6, Landers 5, Morris 3, Stewart 8, Cox 1, Piety 9.

No. 4, 15 targets, entrance $1.50:

PAUL R. LITZKE.

## Courtney Meets a Surprise Party.

SYRACUSE, N. Y., Nov. 9.—The blustering and disagreeable weather of yesterday had a tendency to prevent a large attendance at the new series of medal shoots inaugurated by the Onondaga County Sportsmen's Club at Maple Bay. The few trap shots who did brave the elements got cold fingers and red noses for their pains, but it did not lessen the ardor with which each class medal was contested. The competition was extremely lively, especially in the Class A contest. A. G. Courtney, the winner of the previous medal, had a big surprise in George C. Luther. The latter shooter has not been at the traps for some time, and astonished the spectators by his good marksmanship. He tied Courtney with 45 out of a possible 50, and in the shoot-off Mr. Luther succeeded in smashing 49 straight, a most remarkable run. Courtney was in fine form and used his new ejector fer the first time, and broke 56 out of 60 to win the medal for the first series. Luther broke 51 out of 60 to win the medal for the first series. Luther broke 52 out of 60. James Montgomery, champion of the West Shore Gun Club, and James Boyd appeared as new candidates for championship honors. James Boyd was shooting his new gun, and will make a better record next time. Andrew S. White easily outshot Mr. John Cool for Class B medal, but John says he will get even next time. Boyd took the Class C medal. Scores:

First shoot for the new series of medals, 50 targets per man, known traps, unknown angles:

Class A.

A. W. BEATTY, Capt.

HARTFORD, Conn., Nov. 5.—At the shoot of the Colt Gun Club, on Saturday, Nov. 3, the following scores were made in an event at 25 targets per man: M. F. Cook 23, E. Sexton 23, F. Green 22, J. Pitkin 22, F. Olmstead 21, Owen Treat 21, S. Colt 19, J. Peard 17, P. Tinker 17, C. Stone 14, Francotte 13.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

The growing popularity and success of the EMPIRE TARGET are causing our competitors to renew their efforts to malign its qualities by calling it a "cheap imitation and inferior substitute," but it would seem by the enormous sales and the large list of leading jobbers and dealers handling the EMPIRE that their efforts were not "panning out" as they would wish. We are informed by the largest dealers that the Empire is giving better satisfaction than any other target they ever handled. The reason for this is that the Empire is a strictly first-class article and sold on its merits. It is manufactured under the management of experts, who have been in the business from its beginning, and made by the most expensive and perfect automatic machinery, from the very best composition that is possible to put in a target, and so shaped and constructed as to make the surest breaker and flyer, and we challenge our competitors to prove otherwise.

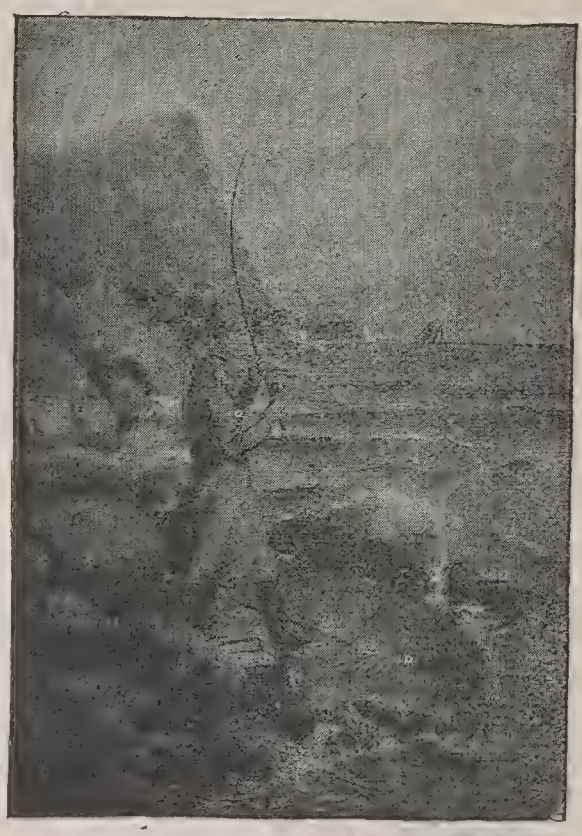
# Forest and Stream's Outdoor Scenes.

FROM ORIGINALS IN WATER COLOR AND OIL, PAINTED EXPRESSLY FOR THE FOREST AND STREAM.

HE'S GOT THEM.

### AS PREMIUMS.

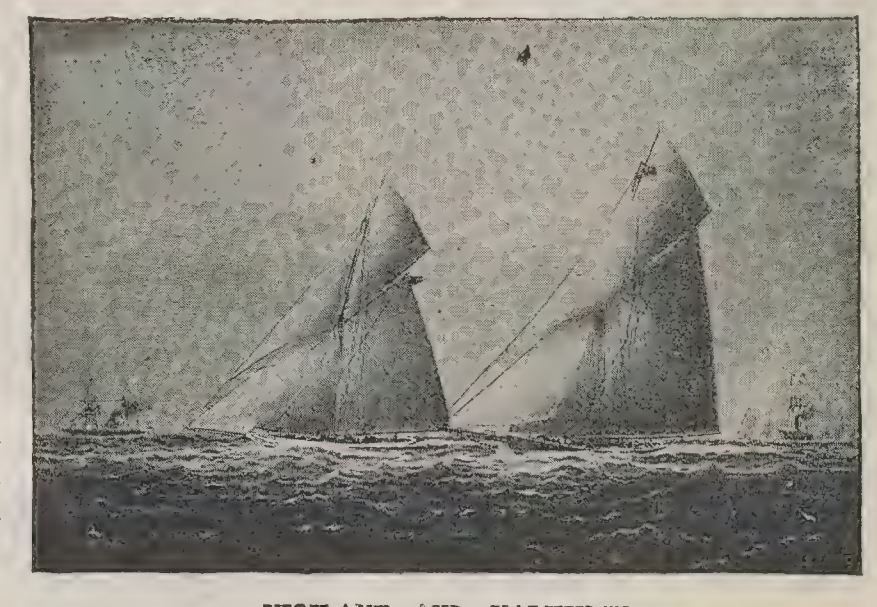


We have prepared as premiums a set of four beautiful and artistic reproductions of original paintings of realistic outdoor scenes. The art work is the best obtainable in New York; the pictures are rich in effect and are intended for framing. They are done in 12 colors. The yacht race is from an oil painting; the others from water colors. The scenes are shown in the small cuts herewith. The plates are 14¾ x 19in. The pictures are sent both to **new** subscribers and to **old** subscribers upon renewal, on the following terms:

**Forest and Stream** *one year and the four pictures*, **$5.**
**Forest and Stream** 6 *months and any two pictures*, **$3.**

If subscribing for 6 mos. designate by title the two pictures desired. Single pictures will be sold separately, price $1.50 each, or the set, $5. Remit by express or postal money order, payable to Forest and Stream Publishing Co., 318 Broadway, New York.

The pictures are sent by mail, postpaid, wrapped in tube.



Copies of them may be seen at this office, and inspection is invited.

# ROWLAND E. ROBINSON'S DANVIS BOOKS.

## CHRONICLES OF SPORTSMEN AND OTHER HUMAN BEINGS.

### Uncle Lisha's Shop.

LIFE IN A CORNER OF YANKEELAND.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies." The talk naturally ran much on hunting stories and wood lore, but although the stories told were generally good, their truthfulness was not always accepted without question, and the volume abounds as much in dialogue as in narrative. "Uncle Lisha's Shop" is brimful of quaint humor and sentiment, and there is an unmistakable touch of human nature in Uncle Lisha himself, and his good old wife, Aunt Jerushy; in Sam Lovel, the hunter, and in fact n all the other characters introduced.

### Sam Lovel's Camps.

UNCLE LISHA'S FRIENDS UNDER BARK AND CANVAS.

When Uncle Lisha went West, Sam Lovel took Antoine as his partner, and the fortunes and misfortunes of the two as trappers are described with all the charm of our author's quaint style, while their friends and enemies, and all with whom they are brought into contact, in the course of the story, step on to the stage real living flesh and blood creatures drawn with such fidelity to life that the reader never doubts that he would recognize any one of them from the description, should it ever be his good or ill fortune to run against him.

### Danvis Folks.

A SEQUEL TO THE SHOP AND THE CAMPS.

This volume is a collection into book form of the "Danvis Folks" chapters published in FOREST AND STREAM. It relates the further fortunes of Uncle Lisha, Sam Lovel, Granther Hill and other personages of the story whom we know so well. Mr. Robinson avers that his characters were of the old times and have passed away. That surely is a mistake. They are living to-day here in these three books, and the Vermont author has endowed them with qualities which will give them long life to come. If you already have on your shelves the Shop and the Camps, you have a place there for this third volume.

Sent postpaid, the Shop and the Camps, $1.00 each, the Danvis Folks, $1.25.

FOREST AND STREAM PUBLISHING COMPANY.

# One of the Branches

of shooting treated fully and well in Howland Gasper's "Complete Sportsman" is Wildfowl Shooting. The beginner will find Mr Gasper's instructions clear, readily understood, and helpful. The oldest gunner in the land will find them pretty close to what he would say himself. The "Complete Sportsman" is a book for wild duck and wild goose shooters. 227 pages, 17 illustrations, $2.00.

FOREST AND STREAM PUBLISHING CO.,

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

The plates are for frames 14 x 19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream** *one year and the set of four pictures*, **$5.**
**Forest and Stream** *6 months and any two of the pictures*, **$3.**

Remit by express money order, postal money order, or postal note. Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

### *SNAP SHOTS.*

WE suspect that Hon. W. S. Soule, a member of the present Vermont Legislature, is a sportsman who at some luckless period in his field career has been done out of the fox he was following by another hunter's slipping in and killing it ahead of him. That such an untoward interposition may not happen again, at least not under sanction of the laws of the State, Mr. Soule has prepared a bill, which the Legislature is now considering, to this effect:

SEC. 1. That any and all wild game in this State shall hereafter belong to and be the property of the person who first finds and starts said game, so long as said person finding and starting said game continues in actual pursuit thereof, with or without dogs.

SEC. 2. Any person shooting or otherwise capturing any game started by any other person, so long as the person finding and starting said game is in actual pursuit thereof, with intent to deprive the person finding and starting said game of his ownership thereof, shall be subject to a fine not exceeding three dollars and costs of prosecution, to be paid to the treasurer of the town in which the offense is committed, and be liable to the person finding and starting said game, in an action of trover for the actual value of the game so taken, with costs of prosecution.

The bill has been referred from the Committee on Game and Fisheries to the Judiciary Committee for consideration of the legal principles involved, and it is expected that the committee will report upon it unfavorably.

---

Legal principles aside, there is much to be said in support of the measure, and much against it. One's sympathy spontaneously goes out to the hunter who, after long and arduous chase, at last beholds his prey clutched by some lazy lout, it may be, who has undergone no hardship of the pursuit, but has just been lucky enough to be in position to intercept the other man's game. On the other hand, does not Mr. Soule impose altogether too severe a strain upon human nature, when he requires that one shall refrain from taking an offered shot at game simply because some one else has started the animal? Even so, a shooter is not going to stay his hand at thought of any three-dollar fine and action of trover—not if he is possessed of that gunning instinct which causes one on occasion involuntarily to take aim with an umbrella or a walking stick.

---

And then there is to be taken into consideration that ever present and potent element of chance. Suppose, for instance, that the man, to whom the game may be driven by the pursuer, does withhold his fire; there is no certainty that the original hunter will surely hit it when he shoots; his bullet may go wide of the mark and the game will disappear. If a person cannot make good his title to a deer when he shoots at it, how may he be given title to it before he ever gets within shot?

Again, in any given case of pursued and pursuer and interception by another, there might be re-enacted the old story of the hare and the hound—both run to a standstill, with the hare just ahead of the hound, and neither able to advance another inch; under such circumstances would not the other be justified in making the game his own?

---

If Mr. Soule's bill shall become a statute, we may look for some interesting cases in Vermont courts when the bear hunters shall go to law. The sympathy of court and jury would almost certainly be with the plaintiff defrauded of his bear pelt, but a smart lawyer for the defense might make out a good case on a number of points. He might show to the satisfaction of the jury (1st) that at the moment defendant shot the bear at the top of the hill, plaintiff was at the foot of the hill, sitting on a log, and clean pumped, and powerless to continue the chase, while the bear was still going at a good pace; or (2d) that defendant killed the bear in self-defense; if he had not killed the bear the bear would have killed him; or (3d) defendant didn't know it was loaded, and the killing was accidental; or (4th) the bear killed was not the animal pursued by plaintiff, but another one which plaintiff's bear had routed out from cover, plaintiff's bear having gone on into the next county.

---

The homicidal fatuity of the hunter who shoots at a movement in the cover thinking it game, and discovers it to be a human being, is not confined to any one locality. Last week our record was of a Long Island hunter who had thus killed a companion, mistaking him for a deer. This week it is of a Texas wild turkey hunter, who killed his comrade for a gobbler. In this case as in other wild turkey hunting casualties we have noted, the two men were calling for turkeys, heard and answered one another, each believing that the other was a real turkey, and both ready to shoot so soon as he could locate the sound; until at length seeing the cane shake one caller did kill the other. The victim was thus the victim of his own skill in simulating the note of the bird.

---

It would seem as if after having killed a companion by mistake for a deer, one would have no stomach for deer hunting; yet the papers recorded last week that the Long Island man who had fired into his human victim was out the next day following up the game.

---

Is it not about time that somebody took steps to put an end to the abominable cruelty practiced upon the hounds kept in the Adirondacks for deer hunting? The hounders have a notion, very likely well founded, that if the poor brutes are tied up short in filthy kennels, and deprived of food and drink until nearly dead, they will make a better chase when put on the trail. This of course is not true of all North Woods deer hounders, but it is true of very many of them, so many, in fact, that the sum total of the hideous cruelty is appalling. The question of deer hounding with respect to the deer is not involved; it is simply a question as to whether a lot of human brutes shall be longer allowed to outrage decency by inflicting these horrible sufferings, all in the name of "sport," and in a stage of civilization when we have humane societies to look out for the dumb creatures that cannot speak for themselves. Gen. D. H. Bruce, president of the New York State Association for the Protection of Fish and Game, is also, we believe, an officer of the Society for the Prevention of Cruelty to Animals; he would not be going outside of his legitimate duty as an official of either of these organizations if he should look into this particular phase of Adirondack cruelty, and take measures to suppress it.

---

Minnesota sportsmen are talking of a new State Association with headquarters at St. Paul. The originator of the movement is Mr. Wm. L. Tucker of that city, a gentleman well known to us as sincerely and disinterestedly concerned for the more efficient protection of fish and game. Associated with him is Mr. W. P. Andrus, the executive agent of the Fish and Game Commission, and the one man to whom more than to any other Minnesota owes its splendidly devised and effective system of protection. There is ample occasion for such an association as Mr. Tucker plans, to work in concert with Mr. Andrus and the official force of wardens. One practical field of effort for the association will be to promote a public sentiment in support of the game laws; and to this end the membership must not be restricted to sportsmen alone. Mr. Tucker has the right idea and expresses it in a letter to the *Pioneer Press:*

The gentleman sportsman, who devotes much time to the pleasures of field sports; the professional and the business man, who enjoys the companionship of his rod and gun during his all too limited vacation, and the farmer, whom we all recognize as the real propagator and protector of much of our game; all must take an active interest in all that tends toward the protection of the sport he loves, and should take pleasure in assisting in any movement that will secure this to him.

It should be our aim to cultivate the good will of those who make it possible for us to enjoy these pleasures, knowing as we do that there is an underlying antagonism to game legislation from those who consider game laws as made for the benefit of the city sportsman alone, who in the open season comes into his territory and ignores him. I must particularly dwell on this point in the attitude of the general farmer toward the city gunner. We all know that there is oftentimes justice in this show of resentment. Many a city gunner goes into the country; shows little regard for a proprietor's rights; at times abusing courtesy shown him; fills his bag, it may be, and without so much as a "thank you," returns to the city and leaves an enemy to the whole class of gunners, where he should have made a friend.

A co-operative game society, having its members in all parts of the State, coming in daily contact with our friends and antagonists, will surely the more strengthen the bonds of the one and weaken the barriers of the other.

This to my mind is the keynote for a successful State Game Protective Association.

Minnesota sportsmen are invited to correspond with Mr. Tucker, whose address is St. Paul.

---

Our notion is that when Game Warden Shriner, of New Jersey, offered the other day to end the prosecution of Judges Nixon and Inglis, if they would give him their word that they had not hunted ducks illegally, he opened a wide door for them to walk through; and the presumption is that if they were innocent of the charge and were good sportsmen they would gladly avail themselves of the warden's proposition.

---

An esteemed correspondent in the South complains that he has taken on so much flesh that because of his ponderosity he finds field shooting downright hard work. We know an enthusiastic trout fisherman who because of increasing avoirdupois was compelled to give up first fishing from land and then fishing from a boat, for he was so heavy that no one dared venture out in a boat with him. A harsher ill fortune has overtaken a New York man, in whose behalf the Charity Organization Society has just published an appeal for work and wages. This unhappy victim of his own greatness has been long out of employment as a book keeper only because employers are averse to engaging the services of a man weighing 300 pounds.

---

The members of the Vermont Fish and Game League held their annual dinner in Montpelier on Wednesday evening of this week. The League is one of the most energetic and useful associations we have, and it has actually accomplished great good for the fish and game interests of Vermont. Its moving spirit is Mr. John W. Titcomb, who has rendered good service in the Fish and Game Commission.

---

The sportsmen of Marquette, Mich., headed by Mayor Kaufman, of that city, have organized the Game Protective Association of Marquette, the ultimate purpose of which is to secure better laws and a better enforcement of them for the Upper Peninsula. The new association offers a local center for the formation of an organization to cover all of northern Michigan, and Secretary M. E. Asire, of Marquette, invites correspondence from individuals and clubs in other localities.

# The Sportsman Tourist.

## HOW THE SEASON OPENED.

WELL, Nov. 1 came at last, and the open season was upon us. The day dawned cloudless and just cool enough to be pleasant. The party consisted of the Skipper, who hurt the scales about 286lbs. when he climbed upon them for weighing purposes, the Clerk, supposed to be a Nimrod, but who, from his attenuated appearance, was called "Ramrod," and the Marine, who is a mighty hunter. Paris Island was the place, on the South Carolina coast, and the country just back of the Naval Station was popularly supposed to be full of snipe, and partridges, which further north would prove to be our old friend Bob White.

Notwithstanding his avoirdupois, the Skipper was ardent and enthusiastic. The Government mule was ordered to be at the door at 6:30 A. M., and after coffee and a light breakfast the party prepared to start. The Skipper was gallantly clad in an old gray suit, with his old shooting coat over that, sleeveless, as all shooting coats should be, with many pockets. His nether limbs were covered by long-legged rubber boots (recently built and launched by the Goodyear Rubber Company) measuring 22in. at the calf, to give entrance to the mighty limbs of the commander. The equipage was a two-seated wagon, called a "Democrat" here, which is appropriate, for Republicans are marked with a minus sign in these parts. There were two dogs; Bob, a liver and white pointer, knew his business well, but was slightly deaf; the other, more liver than white, was young, ardent and indiscreet.

The first act of the drama was to boost the mighty Skipper into the wagon. Scott, the colored driver, stood at the head of the mule so as to brace him up in case the whole menagerie showed signs of capsizing. The Clerk and the Marine took up advantageous positions, and with a "long heave, a strong heave and a heave all together," the ascent was accomplished, but the poor old Democrat was fearfully "down by the stern."

Then the rest of the party embarked, and the caravan began to move. The sun was just rising over the distant sea. The air was delightfully clear, and the heavy dew caused a charming fragrance to pervade it, and the dogs frisked about the party as the mild-mannered mule paced sedately through the cotton fields toward the grassy retreats, where the snipe most abounded and the partridge hid his plumage.

About a mile from the station old Bob came to a beautiful point at the side of the road, his hindquarters and tail visible in the grass and his nose steadfastly set toward a low piece with high grass and straggling trees about it. Subdued excitement at once pervaded the party. The Skipper extricated his feet from the vehicle, and when they were pointed just right, tobogganed to the ground in great shape. Guns were grasped, cartridges shoved in, and when all were ready, old Bob was "hied on" and in two minutes up jumped Mr. Snipe, and the Skipper's gun spoke out and down tumbled the bird. This seemed a good beginning. While the Skipper was putting another shell into his gun and mildly chuckling over the first bird, Mr. Ramrod, who was on the right, remarked in hesitating accents, "Was that your bird, sir?"

Now, history repeats itself. Many long years ago the Skipper and two companions landed at early daylight at Maldonado, at the mouth of the Rio de la Plata, to shoot partridges. As they tramped through the sleeping village, bound for the stubble fields beyond, many dogs greeted them with waggish, doggy smiles, and jumped about, and they wanted very much to go with those guns. The gunners were afterward assured that every cur of them all would point, retrieve and do anything else with great earnestness and ability in the field; but as sailors have little sense on shore, they sternly repulsed the canine advances, and trusted to the retrieving qualities of David Johnson, a mild-mannered darky wardroom boy. Consequence, about half the birds shot were lost; but the party picked up twenty-eight fine partridges—noble, great birds—in a couple of hours. Now on this occasion, while beating across a stubble field, a bird rose fair in front and the Skipper tumbled him over in fine style, apparently. "That's the way to knock 'em over," remarked the Skipper, as he proceeded to reload. "What's the way?" said the gallant officer on the left. "I killed that bird." "Not much you didn't," said the Skipper; "I did it with my little gun." Both parties were powerful disputants, and the surrounding country rang with their assertions, each insisting that he alone had shot and that the other had not, while the cynical Surgeon on the right grinned sarcastically, and much enjoyed the dispute. Being ultimately appealed to, he declared that both had fired simultaneously, and to this day no man knoweth who killed that bird.

Having a vivid recollection of this episode, when the Ramrod man hazarded his mild inquiry, the Skipper blandly asked, "Did you shoot?" "Yes, sir," was the answer, and here is another riddle to rattle down the ages of the future, alas! unsolved. The Marine tried to be loyal to the Commander, and insisted that he saw the bird tumble in the right direction to be killed by the Skipper's gun, while the Clerk mildly pointed out that the bird was wounded on the starboard side, which would seem to be in his line of fire. As one bird would not go far to satisfy the hunger of three ravenous and healthy daughters, the Skipper renounced his claim to the bird, which slipped into the pocket of the Ramrod man.

Two or three more birds were flushed in that spot, but no more were bagged, so the derrick was again rigged, and the Democrat loaded down by the stern once more. After proceeding a couple of miles further toward Broad River, the Marine proposed to try a likely piece of ground for partridges, while the others of the party remained in the wagon, to come at his call. Nearly on the margin of Broad River, where a thicket overlooked the stream, lo! the soldier raised his hand and beckoned, and the others started for him, across cotton and cornfields. Old Bob was at a dead point. To reach him it was necessary to struggle through enlaced vines as high as the waist, and very tough. It was a hard battle. The Skipper puffed and perspired, and his mighty heart pumped like an engine. Suddenly up they rose with a rush-two-three-four, and the air seemed full of feathers. Ramrod scored one; the Skipper and Marine missed. There were certain to be more birds in the bushes. The Marine entered to beat through and kept singing out to the Skipper to work in close to the edge of the bushes. Now, to work about 300lbs. of man, gun, and ammunition through an entangled maze of blackberry-vines, bushes and tough grass, reaching as high as the waist, is no slight exertion, especially when the man-power of it all is soft and flabby, and easily fatigued after long years of sedentary life; but the soul is strong and fearless and will undertake much, even though the flesh is weak. The Skipper plunged ahead in an elephantine way, but his panting must have been like unto the panting of a Mississippi steamboat (with one of which the Skipper once pursued and killed a great deer in midstream where Arkansas and Tennessee face each other across the Father of Waters—"but that's another story" as Kipling says) and probably all the quail were intimidated thereat. At last one frightened bird jumped up at his feet to avoid being trodden on, and sailed away over the land, while the Skipper wildly pulled the lock that was not cocked, and missed the bird when he found the right one. I am afraid at this point some language was used. The Ramrod man and the Marine were respectfully reassuring in their remarks, but the Skipper probably felt that they judged that his frantic attempts to drive the birds off the ground would be mildly successful later on.

The party emerged on to the Sandy River beach, and the Skipper opened his safety-valve, and tried to reduce steam to a safe pressure, and get his breathing engine into such shape that it would be useful again. It took some time. He was tired and sore from his unaccustomed exertions, saturated with perspiration, and was conscious of a longing for the old mule and the sybaritic comfort of the wagon seats. It is very probable that he was disgusted at his bad luck, or marksmanship, and that he did not consider quail and snipe very desirable birds, anyhow.

At last he rose, and started to find an easy place to scale the bank, and so to reach that heavenly mule. Having gone perhaps a hundred feet along the shore, and seeing a place to get up, a commotion at his feet excited his attention, and after a wild struggle, another quail took wing, nearly knocking the Skipper's hat off, and followed by a wild shot from the left barrel, which frightened the bird into the trajectory of the Marine, who promptly killed it and put it into his bag. The tired Skipper felt that his education had been neglected, inasmuch as he could find no language to express his feelings on this occasion, so he struggled again through the tangled vines to the carriage, unloaded his gun, lighted his pipe, climbed laboriously into the wagon and was carted home.

Then the other men ate some lunch in the shade of a tree, rested and fed the dogs, and began to hunt.

The Skipper was pretty badly used up. He is supposed to have wasted about 20lbs. of avoirdupois during the expedition, but, although his flesh failed, yet his spirit is still undaunted, and he has heard of a pond on St. Helena Island where marsh hens, teal and other "little divin' fowls" fly in, and he has planned to seat himself comfortably on the banks of that pond, on an old box carried for the purpose, and if any adventurous birds come in range, slaughter will surely intervene. When that trip is over, I will try to give you the Skipper's further adventures for your old sporting paper. C. H. ROCKWELL.

NAVAL STATION, PORT ROYAL, S. C., Nov. 5.

## A DAY WITH THE OLD DOG.

LAST Saturday was opening day for quail in Indiana, but it was anything else than an ideal autumn day. An inch of wet snow had fallen the night before, and stuck to everything it touched. The ground was covered, and every weed, bush and fence was wreathed in fleecy white, cold and wet, ready to drop at a touch. The sky was covered with gray clouds, and a northwest wind hunted the thin spots in the clothing of those who were out. It was much better weather for hunting quail at the grocer's than in the field, but as it was probably the only day I would have for the sport this year, it was decided to go.

Just across the road from the house is a 12-acre stubble, in which a covey of 14 had been seen only the day before, and right there old Joe and I went. I told Joe that it was doubtful if he proved good for much, for he was too fat and out of practice, for he had had no work for two years except on 24 quail last year, and he was getting too old, anyway. But Joe gave me to understand by whines and barks that he was going to do his level best, and cut a lot of capers to show that he was still as active as ever. Over the fence and into the weedy stubble he went, raced once around the field with high head and waving tail, then selecting the likeliest portions of the field, began a systematic hunt for the birds he had seen the day before and wondered why I did not shoot at them. Presently he came back to me, wanting to know why he could not find them to-day. I told him they had not come off the roost yet and were hard to find, so to go in and hunt them again, and he hunted them half an hour longer, but could not find them.

Thinking the storm might have made them go to the woods to roost, we left the field and went through a ten-acre clearing that cornered with the field. It was an ideal place for quail to fly to when disturbed, but otherwise none were likely to be found in it. Meanwhile guns were heard in several directions, and Joe and I began to feel that we ought to be getting something; but we didn't get a thing in the clearing, and started for another stubble, going along a bushy fence row between two fields of standing corn. Sixty rods down this fence I saw tracks—quail tracks—twelve of them; the most cheering sight the sportsman ever sees, except the sight of the birds themselves. I called Joe to me; he caught the scent at once and began to follow it. As he crawled after them with outstretched neck and nose and straight-extended tail, with legs bent till his body almost touched the ground, he looked nearly twice his actual length. Here was an opportunity to see just how he did it, as the bird tracks showed just where the trail was. Joe paid no attention to the footprints in the snow, probably did not know what they were; but got on the windward side of them, keeping a rod or more away from the trail, and every few rods stopping and smelling carefully, feeling, as it were, for the body scent. Once, when the birds had made a sharp curve toward the side Joe traveled on, he crossed the trail, and of course lost the scent; but instead of going forward to find it, he went back, and took it up two rods of where he crossed it. After the birds had turned they were going right with the wind, and here Joe crawled right on their tracks, because otherwise he could not smell them. Here he crawled along with extreme caution, stopping every few feet and looking back at me, as though to say, "Be ready for them. I can't get the body scent when they are going right with the wind." Presently the trail turned to the left, which brought it across the wind once more, which Joe soon discovered, and leaving the trail he traveled another half circle of 50yds., coming back against the wind and working for the body scent. He found it this time, and as I came to him he rolled his eye back to see what I was doing, and I imagined he winked at me. When the birds go up, one was killed and lay fluttering in plain sight of Joe, but he did not break. So much for thorough discipline in his puppy days.

The birds were marked down in the clearing we had come through, and once there Joe and I had a barrel of fun with them. By 10 o'clock we had eight and could find no more, so started to the house, going through the stubble again, and this time Joe found that covey we had not found in the early morning. They were still on their roost, dreading to put their feet in the cold snow. These birds went to the clearing too, and we had lots of fun with them till the cartridges were all gone. You see we only took twenty-eight for fear we might kill too many birds. The twenty-eight cartridges bagged just fourteen quail, and that was all we needed.

Winston Harris came over to see me about some birds on his farm and after dinner we went to get them but could not find them, and only got six during the afternoon. Winston said the quail reminded him of some great fly-fishing in which he used live quail for flies, but he would not tell me about it until I had promised it would not get into FOREST AND STREAM. Then he told the following:

"In 1847 I was living at Boonville on the Missouri River. Right opposite the town was a big bend, making half a circle four or five miles across. That fall there came hundreds of thousands of quail, traveling south, and when they struck the river they followed it till they came into the hollow of the big bend and then flew across, but as it was a mile, a good many of the weaker ones fell into the river, and those that got across were so tired that people just picked up all they wanted of them. There was several acres of very deep water in the bend and there were a good many big catfish in there that never would bite at any sort of bait. Well, these catfish got to snapping up every quail that fell into the water, so I got the blacksmith to make me a hook, got 200ft. of clothesline at the store, and tying a live quail to the hook threw it away out in the river, and something took it right off, and it would have taken me too, if the boys hadn't grabbed the line and helped. We pulled out a catfish that weighed 187lbs. strong, and he had nearly a bushel of quail in him. We thought we were going to have any amount of fun now, but the next morning dead catfish began to come to the top of the water and float down stream."

"What killed them?" I asked.

"Killed themselves trying to eat thirty quail in thirty days," said Winston. O. H. HAMPTON.

## GROUSE AND MEN.

SITTING by a warm cheerful fire on a cold night reading a book about the grouse, I heard the sweet strains of our fifty-year-old piano (just tuned for the hundredth time) playing "Woodland Echoes." I had heard both many times before, but never before with so keen a sense of appreciation, for I had returned but a short time before from my first hunt after grouse.

Away up in Monroe county, Pa., near the Pike county line, I had spent some days in the woods, on the hillsides, in the swales, breathing the mountain air, drinking from mountain brooks. There seems to me to be no place on earth where one can so effectually shut out the cares of this life and business anxiety, as in those mountains and sunny swales. It's the place to get nature's own remedy without the quack doctor accompaniment. My errand, however, was not entirely in search of health. A plow horse needs rest occasionally. I went grouse shooting, and as the old piano repeated "Woodland Echoes," I recalled, as I remember now, that first grouse hunt.

I left New York one bright day in October, with my newly purchased English setter dog, warranted to point grouse at 1,000yds., and retrieve from one county to another. At Mammkachunk I was joined by my companion of the trundle bed, the country school pard, the twin in all mischief and subsequent thrashing bees, my reverend brother. He, too, had a dog borrowed of a New Jersey farmer. Fannie's only experience in hills I am sure had been in a sweet potato patch. My dog Ned had seen hills before and didn't like them; but I am dead sure he had never seen a grouse. Neither had I—except the product of the pot-hunter in the market places on Barclay street.

At Mt. Pocono we went into camp in a deserted cottage, built exclusively for summer purposes. The first morning we successfully took our bath out of the second story window, from a pipe that ran up on the outside. We didn't do it any more. The pipe froze up. We built fires, cooked our meals (and the Doctor was an excellent cook), made beds, washed dishes (before we left) and hunted. Hunted dogs and grouse. Time can never erase from my memory the whir of those Nancy Hankses of the air. For cunning, they could give politicians points. The embarrassment of those green dogs helped me out considerably. The Doctor, however, began to bring them down, having been there before—many a time. He also got Fannie down to doing some very good work. Ned proved to be a great retriever, when there was anything to retrieve. I flushed as many as six birds before getting my gun off at all. They were so different from a New Jersey cotton-tail, that they unnerved me. However, I began to shoot on general principle. It was hard on the timber, but when timber land is only worth a dollar an acre, I didn't mind. In three days I had eleven birds (all grouse), six lectures caused in getting up after falling down (I always fell near the Doctor), a played out dog, and a pain from head to foot, besides a heap of practical experience. I have never yet told how I got those birds, and the Doctor never told but once; but for the benefit of aspirants after grouse shooting honors, I will now confess. I shot at fifty, missed forty-nine, bought ten. Came home happy, and in better physical condition than in years before, and for many months enjoyed a great reputation for prowess. Sold Ned for $10 ($45 lost), changed my 10-bore for a 12-bore, joined a gun club, got

elected field captain, have shot over 4,000 shells at clay pigeons. Bought an Antonio—Ruby's Girl pup and had it trained by Lewis.

And all for what? Just because I have a life-long pleasant account to settle with that wonderful game bird the grouse. He hides in such romantic places, feeds in such secluded nooks, gives you such unexpected surprises, dies so hard, drops with such a thud, runs so like a deer when wounded, taxes so thoroughly the quality of your dog, makes you so joyous when you conquer. I would rather bring to bag one grouse than five of any other game bird in existence.

I asked my friend and neighbor Mr. K., to go grouse shooting with me this fall. He declined, saying a man should be built with one leg shorter than the other to hunt grouse successfully. This may be true at Mr. K.'s time of life but not at mine. I do, however, believe a man should be under fifty and a shining mark for a life insurance company, for this sort of shooting. Nor do I think a man should live luxuriously eleven months in the year, and hunt grouse the other one.

It's a wonderful way and place to size up human and dog nature. After the first day's hunt you either love your companion or you never want to see him again. Your dog is no good or else not for sale. And in the meantime you get awfully well acquainted with yourself, and should any one yell, "Who killed dat caribou," retrieve the bird and say, "We have another."

Having had considerable experience in grouse shooting since my first attempt at making the woodland echo, I should like to say a word about field or woods companions.

An acquaintance asked me some time ago to take him grouse hunting. I firmly declined. I now respect him. If I had taken him along, I am sure that on the return my estimate of real value of him would have been less than that placed on poor Ned. The reverend doctor has been my constant field companion since we first played Indian together on the old farm many years ago. Of him I can only say, he is a sweet preacher, an instructive teacher, a faithful brother, and a good shot—effective with tongue and gun alike, except when the devil and a rhododendron thicket are in the way. I have never seen a railroad built through a rhododendron thicket. They always go around. It's easier.

The Doctor and I initiated two brother sportsmen into grouse hunting this fall with splendid results. We have known these men many years and have held them both in high esteem. Now they can have anything we have got, except our guns. (Joe fell down too often, George is a little slow and strains his gun.) I have known these two men to hunt two full days—results, one grouse, one woodcock, and then to kick because duties called them back to New York; but never to kick on account of the weight of their bag. They had had good full days in the woods, and had seen a number of birds, but were in unfortunate positions. I have never known George's dog to come to a stand that I wasn't shoved into the open, while he would break into cover to flush. Are they sportsmen? Yes, of the highest type, a lesson, I am sure, to many who may read of them. If a mule has a kink in his tail, a sure way of discovering it is to pull it. If a man has a mean trait in his nature, take him grouse hunting and it will reveal itself in a series of kicks that would make a mule blush. THOMAS ELMER.

NEW YORK, Nov. 12.

### A Memory of the Antarctic.

CHICAGO, Ill., Nov. 9.—*Editor Forest and Stream:* I note in the last issue of your paper an article on the breeding habits of king penguins, quoting as authority Capt. J. J. Fuller of the then sealing and whaling schooner Roswell King. Inasmuch as the names and subject mentioned brings to me a series of recollections of times long since past I deem that a few after words may not be considered amiss.

I cruised with Capt. Fuller, and owing to my fondness of the eggs of the penguin I can vouch for the facts mentioned. I particularly had cause to study the habits of the penguin during my search for their eggs (a choice morsel wit sailors).

It was a very common matter among us seamen to frequent their haunts from time to time to replenish our larder, with a whaleboat of eggs, an immense number being consumed daily by our crew of thirty odd always hungry men. We fairly had to force our way through the countless numbers of birds in our search for the immense quantity we desired and consumed. Often we found with the female two to five eggs, and in but few instances failed to find the one concealed as described by Mr. Hazard. This, however, we generally let alone, owing to the abundance of others, and somewhat to the fact that the fowl had an effective way of wielding their seemingly ungainly half wing, half flipper, when so opposed, a stroke of which seemed not unlike a crack from the soft side of a club in an antagonist's hands.

I recall the wreck of the Roswell King and the isolation of Capt. Fuller and her crew for some sixteen months on the dreary Desolation Islands, the subsequent mutiny of her crew and their privations amid an antarctic winter when even a search expedition failed to find trace of them. I recall too the fact that it fell to the lot of the writer first from the crow's nest to note their signal of distress, when by them we too were despaired of; how we picked them up, clothed in skins from head to feet; how we shared with them our bunk and biscuit, sailing from pole to ocean until we placed them in safe hands in Capetown harbor.

To the writer somewhat and to the Francis Allyn was due the rescue. And strange to say, Captain Fuller now commands the little vessel that so befriended him, the Francis Allyn. FRANCIS H. BUZZACOTT.

### Shooting Near New York.

YONKERS, N. Y., Nov. 15.—Our local sportsmen have had the best woodcock shooting in this vicinity during the past ten days that has been had for several years past. An acquaintance bagged fifteen on Friday within three miles of our city. Another party of three killed seventeen on Tuesday, just across the Hudson, on the Jersey side. There have been many scores ranging from five to eight. We think that the greater part of the fall flight has passed. Quail are very scarce, notwithstanding that we put out a great many southern birds this spring. It is a mystery what has become of them. J. T. W.

## Natural History.

### THE FIELD MOUSE AND THE SPIDER.

THE incident recorded, so far as the writer knows, is one by itself; although naturalists' notes are filled with accounts of the courage and ferocity of spiders, and it stands to reason that very many encounters such as the following must have taken place.

Spiders, on account of their spinning propensities, take the name by which they are known in natural history (*Arachnidæ*) from a Greek fable that tells how Arachne, an Athenian maiden, was transformed into a spider for attempting to rival Minerva in the art of weaving. This occupation, however, is not practiced for peaceful purposes by her descendants. They weave "snares for the falling:" their webs are traps for the unwary, and these creatures themselves, that have their brains in the breast and their hearts in the abdomen, are as spiteful as they are ugly. Fortunately all species are comparatively small, like most of the more fierce and dangerous inhabitants of our earth. If this were not the case—if such a being as the black, bird-killing tarantula of Surinam, for instance, could grow indefinitely, like some members of its family, it would be one of the most dreadful specimens of malignity and destructive energy alive.

The following events took place among the Smoky Mountains of Georgia, and were witnessed during the course of some scientfiic explorations of that region. It may be supposed by some people that pursuits of this nature entirely absorb those who follow them, but generally a little leisure is left for thinking about other matters—getting something to eat, for example. At all events, that was the object which led the writer into a lonely little valley with a large shallow pond at its upper end. Trees stood in the water and it was an excellent place to look for turkeys.

The wild turkey, most splendid of all the feathered game of America, is shy and wary to the last degree, and looks out for its own security with an eye quite as keen as that of the proverbial hawk. On this occasion, however, prudence was likely to be disadvantageous, because this man who had become discontented with pork and beans, noticed the trees, and knew for a certainty that no turkey would be so rash as to roost in the forest, when a resting place surrounded by water was at hand. Raccoons and wildcats that steal upon these lordly birds by night dislike to get wet, and in roosting amid marshes or ponds, this creature shows its discernment.

On the west of the valley rocky terraces clothed with brush rose to a considerable height, and seated on a sandstone slab the hunter silently waited for his expected prize. Not a breath of air stirred the boughs, an intense stillness brooded upon the scene and dark shadows from the mountains were lengthening across the glade, when a faint chirping sound near by drew attention to its cause; a tiny field mouse came over the rock's edge, going in a bewildered sort of way. It did not seem to notice the motionless figure resting there or perhaps was past making observations, for matters were evidently in evil case with it.

Ordinarily this animal lives in a dry, comfortable nest, eats its fill of grain and seeds and is plump and sleek and well-to-do looking as any creature can be. But now its eyes were dull and half closed, the coat was staring and it staggered in its gait. The cause of this discomfiture soon revealed itself, for a large gray spider, mottled with black, darted up from below and drew near the mouse with an unmistakably hostile mien. This new-comer also appeared to be unconscious of a man's presence. Probably notwithstanding the tarantula's eight eyes, he may have been too big to see or this denizen of wilds of nature did not recognize him for what he was. It is a popular fallacy to suppose that all inferior creatures know human beings and dread them instinctively. At all events, the spider paid no attention whatever to the intruder, but began circling round its enemy, who fronted the foe as it moved.

There are altitudes which betoken terror equally well with expressions of the countenance, and although it cannot be said that the field mouse looked as if it were overcome by fear, despair was stamped upon every motion that it made. Spiders have no proper heads, and consequently there would be a certain absurdity in speak- of the ferocious look of any being in such a condition as that. Nevertheless, no tiger bristling with rage, and with sinuous deadly movements making ready to charge, could have expressed his full purpose more plainly. When at length it rushed upon its adversary, both combatants became so mixed up in the struggle that it was impossible to see distinctly what happened. So far as could be distinguished, the mouse did not attempt to bite, though it has enough power in its jaw to press those sharp little teeth which furnish its mouth, through the body of any spider. All it seemed to do, however, was to throw off that fierce assailant whose arms clung to its body. Desperate efforts were made to this end, and they were successful, for the spider retreated, and the mouse stood swaying from side to side, and then fell down.

One cannot say exactly what ailed the animal. The chemical character and effects upon the body of those venoms belonging to poisonous Asiatic and American serpents are well understood. That of the only venomous lizard on this continent, the Gila monster, is "a deadly heart poison." In insects generally, formic acid is the active principle, but in this case, although nervous exhaustion, fear and fatigue, no doubt contributed to produce prostration, the symptoms did not correspond with those which could have followed injection into the system of any of the agents mentioned. After lying panting for a few moments, the mouse roused itself, was again attacked, and probably bitten anew. This occurred several times, its resistance gradually becoming more feeble, and the signs of distress more pronounced. At length it fell to rise no more. Two or three convulsive tremors shook its body, and it was dead.

Spiders live on blood or those juices that stand in place of blood, and now was the opportunity for this one to gratify any sanguinary tastes that it might have possessed. No exhibition of this kind took place, however. After walking around and over its victim, it seemingly became certain that the mouse was dead. Most likely the mouse had been assailed out of pure viciousness, and not because its murderer needed food or had any desire to make a prey of an animal of this description. Anyway it shortly walked to the edge of the rock and went down; a procedure which was not interfered with, partly for the reason that it is preposterous to object to any being for acting in accordance with its nature, and also because the observer entertained some hope that it might possibly return and do something else in the way of disposing of its victim's body.

The tarantula did not reappear, and the brief episode described was all that happened. There is, however, some uncertainty attaching to this. It is certain that poisoning caused the mouse to die, but the creature's behavior set at naught what is known of the action of venoms, which are continuous and cumulative. The same is true of any theory of fascination that might be formed; there would be no reactions while this state continued. Naturalists commonly repudiate the idea that animals charm their prey, and explain such facts as a bird's flying round and round a coiled snake in smaller circles until it is seized on other grounds. It is useless to speculate upon this matter, but the event itself was full of interest, and in that regard is given for what it is worth.

### Wild Pigeons.

DUNNVILLE, Ont., Nov. 16.—*Editor Forest and Stream:* I was much interested in the report which you say Dr. Willett Kidd, of Newburg, N. Y., made to you about a flock of forty wild pigeons seen by him in Orange county, in September last. This has been an interesting subject to me for a few years, having seen the wild pigeons when they were here in myriads, while now there are probably not forty passenger pigeons on the continent.

In September last a man came to me saying that a flock of "real wild pigeons" were feeding upon a pea field some miles away from here. My informant was so positive that they were pigeons, having shot hundreds when they were plentiful, that a friend and I were induced to take our guns and drive to the place. When we reached there, it turned out as I had suspected—a lot of mourning doves rose from the field which had been sown to peas and buckwheat.

It is strange that a man who formerly had known pigeons so well should make such a mistake, yet I find it very common among old sportsmen. The dove is very like the passenger pigeon in plumage, but is very much smaller. I would venture to ask might not the birds seen in New York State have been mourning doves?

While doves are common here and breed, there is no record since April 9, 1883, of wild pigeons having been seen. G. A. MACCALLUM.

[We are perfectly willing to accept Dr. Kidd's identification of the birds he saw as correct.]

### Black Squirrels Supplanted by Gray.

BELLEVILLE, Ont., Nov. 12.—The same process noted by your correspondent, F. M. Comstock, as taking place in New York, is going on here, namely, the displacing of the black squirrel by the gray. Twenty years ago a gray squirrel was a rarity in this region. Now they number, at a rough estimate, one to six. These two varieties of the family *Sciuridæ* are often found in company, and that they breed together is apparent from the black and gray coats of some of them. The assumption that the tail of the black is more bushy and its head more elongated than that of the gray are quite correct, as shown by my stuffed specimens, one of which, by the way, is cream-colored, but shows the distinguishing characteristics of the black. The tail of the gray is broader, flatter and more feathery-looking than that of its black-coated relative, and the hair is longer and finer. Belleville is, I may add, within about twenty-five miles of the northern range of the black squirrel. North of that the red has the woods to himself. R. S. B.

### Minnesota Buffalo.

THE Hallock *Enterprise* of Nov. 8 contains the following important statement:

"A two-year-old buffalo was killed near the Snake River, west of Warren, last week by Judge Lakin of that place and a Grand Forks gentleman. This is the first of the species running wild which has been seen in that vicinity for over twenty years. Where it came from or where the herd is from which it no doubt strayed is a mystery."

Warren is forty miles south of Hallock on the line of the Great Northern Railroad.

## Camp-Fire Flickerings.

"That reminds me."

WE were quietly floating down the Ouachita one day last season, when a shower of rain came up, and as it was near dinner time, we concluded to tie our little canvas-covered craft to the bank until after we had finished our repast. While ashore making a line fast the sailorman noticed a hollow log near by and remarked that it looked like a "possum log;" so we concluded to investigate. Investigations revealed nothing. Seeing a fallen pine we thought we would gather a little of it for kindling wood. This carried us further into the woods, and one of the boys exclaimed: "Here is a possum log sure." Upon thorough examination we came to the conclusion that he might be right. One of the boys cut a long pole and poked up the hollow and twisted it around a little, and when he brought it out it was covered with long white, grayish colored hair, which evidently belonged to none other than a possum. "Well, boys, I know he'll go fine, and as that cook of ours was raised down here in Louisiana, I know he can fix him into a fine dish. Give me that axe and I'll have him out in a minute." Sure enough, in about a minute the axe went crashing through the log, and the boys, gathered around all expectant, began to stand a little further back—"Gee! I guess that fellow has been eating something which ceased to exist"—and another lick of the axe revealed the animal in quest, with his nose drawn down between his forelegs, and coiled all up in a knot as dead as the hollow log in which he had been incased. We silently returned to our little boat. Bacon and beans were good enough for us. We carried our pine knots and disappointments, but we carried both in our arms, and they were soon disposed of when the cheerful crackling in the stove restored us to comfort and to yarns of other times. PLUMB-BOB.

## CHICAGO AND THE WEST.

### The West of the Present and the Past.

[*From a Staff Correspondent.*]

HELENA, MONTANA.

#### Joe Flick and the Yellowstone Park.

That it isn't such a big world I had further proof at Helena. I used to know away back in college days a tall, slim, innocent boy by name of Arthur Craven, of whom I lost sight as the years rolled by. I found him at Helena, the possessor of a nice home, a wife and family, and a good law practice. Everybody who goes to Helena gets rich, because it's in the air, under the ground and all around one. I told Craven I was looking for old-timers, and he took me a long walk up a back street leading up the famous Grizzly Gulch in search for a certain old-timer by name of Joe Flick, with whom Craven had made acquaintance in his earlier days in Helena. We found Joe Flick living by himself in a little old cabin, and taking what care of himself he could in the sufferings entailed by a bad attack of the mountain man's curse, inflammatory rheumatism. Poor Joe had been a very sick man, and he offered a sad sight, bundled up as best he could arrange it in his well-worn clothing. But he was gritty and cheerful withal, and gaily said he was much better and would soon be around again as good as new. I am sure I hope he is well now, for a spirit like his deserves good fortune.

Joe Flick is well entitled to be called an old-timer, for his experiences date back to the gold days, and he numbered among his friends Jim Stuart of beloved memory and others of that coterie. Flick says that Hayden, who made the most famous expedition into the country of the Yellowstone, was not any more entitled to be called the "discoverer" of the Park country than a hundred others. "All that country in there was known perfectly well to all of us, of course," said he, "only we didn't ever say anything about it. We went all over that range time and again in our trips to the country below and east of the Park. I remember that in the same year that Hayden went in there a party of four of us went over into that country just for the fun of looking it over. There was Jim Stuart and C. M. Jeffries, R. C. Wallace and William Moothy, and we were in there quite a while, and went into parts of the section we'd never been in before. I recollect that we went up that mountain they call Mount Washburn, or some of us did. Wallace, he got tired of climbing, and allowed he'd go back to camp, and we told him we'd go on up and then come down and meet him where we'd left the horses. About two or three hours after that I happened to be looking away off over on the side of the mountain, and about a mile off I saw a man just a-leggin' it up the side of the mountain as hard as he could go. I couldn't tell who it was that far, but I thought it must be one of our party, as we were the only ones in there, so I hollered to the fellow as loud as I could, and as luck would have it, the wind being just right, he heard me, and then you ought to have seen him start for me! It was that fellow, Wallace, and he hadn't ever got to camp at all, but was plumb lost. He was going in just exactly the wrong direction, and if I hadn't happened to see him just when I did, he nevsr would have had sense to stop till he was lost for keeps. Then he might have had a mountain named after him, like that fool, Everts, that got lost on the Yellowstone headwaters and turned up on the mountain near the Mammoth Hot Springs. Wallace didn't get lost enough to write a big magazine story about it, but maybe if I'd let him alone a little while longer he would. That's about as easy a way of getting a reputation as any I know—getting lost and writing it up. No, I never got lost; never had no such luck. Consequently, there don't nobody know anything about me."

#### The New Days of Sportsmanship.

There are a great many of these old men of whom nobody knows anything to-day. They are passing away, and will soon be gone, alike with the times which gave them birth and occupation. For a little time yet we may meet them and talk with them, and by their eyes see the West that was. I know of no occupation more pleasant. I do not love progress, and if it could be done without prejudice, I could wish that the gold of Helena were again under ground and that her lofty blocks were cabins, and that the hospitable Montana Club were a tent instead of a palace and that the smelters were out of the hills, and game back in them. But this wild wish can never be. The gold of the placers, the game of the hills and the old-timer of the frontier belong to the old order of things. It is over. The new era of commercial interest has set on, and with it must come the new ideas in sportsmanship. The day of protection and of the game preserve, the day of modern sportsmanship has now come.

In these matters of latter day sportsmanship, the city of Helena is naturally well in the front of progress. There is no touch of the backwoods in her trap clubs, and her anglers and game shooters have all the latest wrinkles in their equipments. Mr. M. K. Bryan, who keeps what seems to be the headquarters of the craft, keeps the boys well supplied with up-to-date sporting goods, and one can get anything in the world he needs there. By the same token, when I called at Mr. Bryan's store one morning, pretty well on in the morning, too, I found it closed. After a while Mr. Bryan appeared, and said he had been out of town for a day, up the railroad on a little fishing trip, and he could'nt get back any sooner. Now, I rather admire a man who will shut up his store when the trout begin to run, and go perform what is really his first and highest duty unflinchingly and with courage.

Helena is a leading member of the young Montana State Sportsmen's Association, and carries the honor of the vice-presidency, Mr. A. J. Fisk holding that office for the initial year. Such gentlemen as Mr. Fisk, Mr. Kennett, Mr. Balliett, etc., etc., are very much a credit to sporting circles, and we could use such in Chicago if they would come East.

#### The St. Mary's Country.

My friend Craven has not yet risen to the height of being much of a sportsman, in the sense of being wedded to rod and gun, but there are always hopes, and maybe he will do better after a while. As it is, however, he has not been able to escape the spell of the glorious mountain region about him, and makes pilgrimages to the hills with increasing regularity. He was of a party which a year or so ago went up into the little visited country about St. Mary's Lake and on the headwaters of the St. Mary's River. He can not say enough about the charms of that beautiful region, and is one of those who would like to see that favored corner of the mountains set apart as a government reservation, to be keat forever as it is, unhurt by the hand of man.

Judge DeWitt, of Helena, is another and prominent friend of the St. Mary's reservation idea. I saw him and asked if he thought there existed any practical obstacle to the accomplishment of the purpose, which is one much cherished by certain men in the East who have visited that grand mountain region and become infatuated with it. Judge DeWitt said:

"I know of only one thing which could prevent the establishing of reserve lines; that is to say, which would present any legal difficulties. Congress could not set it aside for such purposes if valuable mineral lands had been discovered there; but, so far as I can learn, no mineral has been found in the St. Mary's region, and it is fairly to be held fit to be set aside as a great and permanent forest reserve, like the several other national parks of the United States. I am sure there could be none more worthy or more beautiful."

#### How They Kept Their Feet Warm.

*Oct. 30.*—I always used to wonder how the old-time hunters and trappers who lived beyond the edge of the frontier, were able to keep their feet warm in the winter. It was not often that they got the chance to buy boots or shoes, and as a matter of fact they were obliged to depend largely on the moccasins. This, of course, in the really old time days, before the general advent of the frontier stores. Now a moccasin is a very nice thing to wear in dry weather, and I read all kind of things about the usefulness of the moccasin on a snowshoe trip, etc., etc., though what little experience I ever had with moccasins in the snow has led me to believe that they were better in the inside of overshoes than any other way. But the old-timers of the pass had no overshoes, and neither did the Indians, and the puzzle to me was how they kept their feet from freezing. So I asked some of my genuine old-timers out in Montana last winter about this, and this is what they told me.

"It would have been a good thing if the blame Indians had froze all their feet off," said Uncle Johnny Yancy, of the Yellowstone, "but they didn't, and they never wore anything but moccasins either, and they never heard of socks. The way they got along was to have plenty of moccasins, and when one pair wore out or got wet, they just put on another pair. You know every village had a moccasin maker, and in the old days there was plenty for the moccasin maker to do. Sometimes the squaws made the moccasins for their own men, but usually there was one maker who beat them all. When a war party started out on foot, a good part of their baggage was made up of extra moccasins, and if they went on any trip away from home, horseback or on foot, they usually were well fixed the same way.

"Of course this was all right for the warm weather when they made their hunting trips or went on the war-path, but when it came to cold weather and snow they had to do about the same way. The leather they made would not turn snow water, of course, so the way they did was to stay out of the snow. You know they wouldn't winter where the snow was deepest, and during times of snow they kept about as close to the village as they could, and they wouldn't go hunting until they had to. When a buck did have to go hunting or go anywhere else, he would go on horseback and keep his feet out of the snow that way. Mr. Injun wasn't walkin' when he could ride, you could gamble on that. Well, suppose'n he gets after some elk and makes a killing, he goes in and does all his skinning and cleaning, and then he piles his meat on top of his pony, puts on a pair of dry moccasins and climbs up on top of the meat. You can bet he ain't lettin' them feet of his'n touch the ground 'cept'n in the high places. As for getting out in the snow and wadin' in it all day, the Injuns didn't do it. Of course in dry snow they could get around some, but I 'low they mostly kept their feet dry by keeping close up ag'in the fire."

I asked Uncle Bill Hamilton the same question about the footwear of the old time days, and he talked to me at some length about it in his quiet way. "We all had to wear moccasins on the frontier, in the early days," said he, "because we couldn't get anything else. Of course there was all kinds of moccasins, and some of them made pretty good foot covers, though, as you say, none would turn water or wet snow very much. The moccasin itself is a pretty good protection against a dry cold, but sometimes the feet would get quite cold, even in the best of moccasins. We used to take some lengths of this long straight rye grass with a hard round dry stem, and we would break this up into lengths and put in the bottom of our moccasins as you would an insole. The friction of this rough grass on the bottom of the foot was the best thing to keep the feet warm we ever knew. It would surprise you to see how much this little idea would do toward keeping up the circulation of the blood in the feet. It saved us many a frozen foot on the plains in the old days. In those days when we were out in the weather so much all the time, we did not need so much clothing as people wear nowadays, and we got along with poorer dress in every way. There is a good deal in being used to a thing. If you were used to moccasins to-day and put plenty of wire grass in them you would find that you could get along a good deal better than you think."

There is a common belief that moccasins made of moose hide will turn snow water, but I have seen a good many that wouldn't; and indeed never saw anything which would, except pure and unbroken rubber, which of course is an impracticable foot covering even for the hunter of to-day. The shank skin of the moose, or even of the elk, however, made a legging which would turn snow, and this device seems to be much used even yet by Indians and hunters of certain regions. The poacher Howell, who was captured last winter in the Yellowstone Park, was very badly equipped for foot gear. He told us that at first he used elk shanks for leggings, but had worn them all out. When we saw him he had no shoes, no moccasins, and not even a decent pair of socks; yet he was managing to get along all right on his *skis* in snow that was 8 or 10ft. deep. On the top of his *skis*, where the straps are usually placed, he had tacked on a long, wide footstep or stocking made of grain sacking, which came up nearly to the knee. The bottom of this fixed stocking was protected by a foot or shoe of raw elk hide, which took up the harder grinding of the foot upon the snow. The top of the stocking was fastened tightly about the leg with thongs. When Howell got ready to travel, he wrapped his feet in layer after layer of gunny sacking (in the West called "California socks") until they were swathed up into the appearance of huge clumsy bundles, the gunny sacking coming well up the leg. He then thrust his feet down into the sacks or stockings, which he had nailed fast to his *skis*, and bound the stockings tightly about his legs by means of thongs. Of course, he could not get his feet away from the *skis* until he got ready to quit the trail; but he managed to get along somehow and did not freeze his feet. The worst danger on a snowshoe trip comes when one's feet have gotten wet in the thawing snow in the warmer part of the day, and when it comes off colder in the evening.

So it would seem that there are more ways than one of keeping your feet warm, and more proofs than one of the truth that necessity is the mother of invention, which means only that the creatures of nature will adapt themselves to their environment.

E. HOUGH.

909 SECURITY BUILDING, Chicago.

## A SEA TURN AT BRANT ROCK.

WALTHAM, Mass., Nov. 8.—*Editor Forest and Stream:* "You had better come down. A sea turn to-morrow. Flight will be good." This telegram was received from Brant Rock on Oct. 18. Having been there several times of late years I knew that a sea turn meant that the wind would be somewhere in the eastern board, which is considered the best for good shooting. I was not long in advising my friend. We left Boston at six for a long, tedious ride, not so long in distance as in time. Just think of it; nearly two hours in going thirty-seven miles. No Empire Express about that time. Just as we were pulling out from the station in came an old Irish woman loaded with bundles so one could hardly see her, and took the seat behind us. As soon as she recovered her mind she said, "I only hed tin minutes to come from Jardin-Mashes and I run all the way, and then I had to walk through two schmoking cars, and I can hardly see at all." She made lots of fun for all. I did not enjoy my FOREST AND STREAM until she had left us at Waymouth. At Marshfield we found the team waiting for us which took us to our hotel door. Of course our first question would naturally be, "How are the bird flying?" "Oh, there are no birds, neither will there be any as long as the wind holds west, but we shall have a sea turn to-morrow." We gave orders to have breakfast ready at five, then went to bed, but not to sleep much, for the strange, squeaking bed, with the roar of the surf, was not natural to our city ears. If it had been milk wagons clattering along we should not have minded it. I got up at two and found the wind was blowing strong from the east. The sea turn had come as predicted. Now I felt sorry I had not ordered breakfast earlier, for I knew there would be a rush for positions.

Four o'clock found us eating breakfast. Soon after we started in the dory, but we were too late; a long line of boats was there before us. We either had to go a long distance from shore or form the second line. We chose the latter, and put out our decoys. Hardly had we got into position when the first gun of the morning sounded. Soon the shooting up toward Scituate commenced. I have noticed through all my shooting there that the loons are the first birds to start; and to see an old fellow coming just as straight and then to hear the shooters bang all along the line and the loon keep right on, never changing his course nor seemingly quickening his pace made us both laugh. My friend had never shot a loon, so I gave the chances to him, but he did not get one, although he hit two very hard, but not far enough ahead. Most shooters shoot behind the loon. I consider 8 to 12ft. about right. I call to mind how my companion missed a big fellow with both barrels, and I shot him after that, and it seemed to me at that time that I was fully 16ft. ahead of the bird. The coots came in singles, pairs and bunches, and the shooting was quite lively for a while. How we wished for a position in the first line, but we had to content ourselves and take their leavings. "Mark!" my companion said, "close to the water, coming straight for you." The time was short, but up went the gun, and two were killed with the first barrel and the other badly wounded. Mr. P. looked at me and said, "Well, where do I come in?" He had his chance a little later, while I was fixing the anchor buoy. I heard him chuckle, then mutter to himself, "Now we are even." Instead of taking up our anchor when a bird is shot we throw over a large painted buoy which saves lots of time, as the water there is very deep.

We stayed out until 10:30, when the flight was over for the day. I feel sure that if we could have had a good position our total for the morning instead of being fourteen would have reached three times that number, for we were both doing good shooting. After having the inner man filled with coot stew we took a long walk to some marshes to try our hand on yellow-legs, but found none. That night we went to bed tired enough; and this time to sleep.

The next morning was all we could wish for. When we got to the shooting grounds we found two long lines of boats. We were the first to form the third line. Some of the men in the first line told me afterward that they had gone out at 3:30. Not any in mine, thank you.

The shooting commenced a little sooner than the morning before, but our position almost barred us out, we only getting eight. In the evening we went to the local fish market to hear about the good shots and bad misses. The market is kept by a Mr. Phillips, who is known as the best shot in that section of the country. He takes with him two guns, one 8-gauge, the other 10.

On Sept. 26 of this year he killed seventy-five coots, which is the largest number ever killed there in one day by one man.

The birds have been unusually plenty this year, and the local gunners have had some excellent shooting. Our short outing came to an end only too soon. We enjoyed every minute, and it will furnish us talk for the stormy winter evenings.

W. N. F.

## PLUCK AND GRIT.

YOUR editorial notice of a plucky hunter, who went into camp on crutches, reminds me of a somewhat similar case which I remember as having occurred many years ago, say away back in the forties, when most of the counties along the northern border of the State of Pennsylvania were unbroken forests. Of these were Potter and McKean, which were very sparsely settled by a few hardy pioneers who had pushed their way up several of the small tributaries of the upper waters of the Allegheny. In this region there was supposed to be better deer hunting grounds than in any other in the State, consequently it drew many hunters out of New York State, even from as far east as Rochester and intermediate towns.

There was one man, a well-to-do farmer, who came over from his home near Rochester and hunted every fall for several years in succession from a camp located on a branch of the Tuna Creek. Two miles below this camp lived a permanent settler, Mr. Degoalier, with whom the old hunter stopped occasionally over night, receiving some camp supplies, such as loaves of corn bread, etc. Mr. Degoalier said that he generally went into camp the 1st of November, and remained a month, more or less, until the first snows fell sufficient for good sleighing, when his son would come with a two-horse sleigh and load in the old man and his venison and return home. The average number for the season was from eight to ten deer; and Degoalier claimed that he was a skilled deer hunter and that he could easily have killed double that number had he made an effort to do so.

All this while the old man had been slightly crippled with a bad fever sore on his leg, and the last year except one that he came there it had grown much worse, and he went into camp against the advice of his friend Degoalier. The old hunter did not come out at the end of the week as usual, neither did he come out at the end of the second week, whereupon Degoalier started for the camp, where he found him unable to get out of the shanty; so he returned home for a team and hauled the old man out on an ox-sled. A young doctor was sent for who lived in Smithport, some twenty miles distant, and it was decided to amputate the leg to save his life, and it was said that the old hunter endured the cutting, sawing and mangling with stoical indifference, without the use of opiates or chloroform, as the latter article was hardly known or thought of in those days. The young doctor's surgical skill was a question of very much doubt. However, the man got well, and that very rapidly, and was able to ride home in a sleigh with his son some time in February.

But the most singular part of the story is that when the next November came around what should appear but a carriage drawn by a pair of horses and bringing the same old hunter, who went into the same old camp, where with the aid of a crutch he stumped in and around that shanty during the hunting season, which lasted three weeks or more, while his son hunted deer. That was the last trip he made to that hunting ground, and I never heard from the old man again after his return. ANTLER.

GRAND VIEW, Tenn., Nov. 13.

## DUCK SHOOTING AT WAPANOCCA.

ONE November morning six members of the Wapanocca Outing Club in Crittenden county, Ark., partook of a most savory and excellent 6 o'clock breakfast in their pretty cottage club house, where 45 booths or lockers bear the names of their owners, who constitute the club. The season for duck shooting was at its zenith and the sport was royal, for in November clouds and myriads of ducks and some geese and swan are drifting toward the Gulf, with the Mississippi River as guide, and lakes near its banks and brakes furnish abundant food and rest. Between 7 and 8 A. M. the wildfowl were settling, circling, streaming in from roosting to feeding grounds, almost literally grounds, as marsh ducks love the shallows and mud puddles where smartweed and peppergrass, moss and coltsfoot, snails, larvæ and chinquapin acorns are knee deep in water, and where the ducks noisily and greedily feed. Bright nights make poor shooting next day because ducks have fed chock full by the light of the moon, and frolic or doze in the day in sequestered pools.

But hark! the ball has opened hot! J. A. A. in Price's Lagoon threw out 12 cedar and 4 live decoys, and mallards (that he wisely refrained from firing at when they arose like a storm and swept all over and around him) now return in singles, pairs and small flocks, and dart ravenously to the mud flats, succulent bulbs and quacking decoys, confusing the gunner by bold sweeps and incessant, greedy pitching in. Sharply now his little gun is ringing out the death note to lordly drakes and russet hen mallards, grassing 30 before 9 o'clock and 74 by 3 o'clock, which were laid in his duck boat by the superb Bruno—smooth-coat Chesapeake Bay retriever. J. A. A. has the knack of natural blinds, live decoys and quick double shots. Crockett, his paddler, is named aright; he has genius in knowing where game is or is not, at different times of day, how to approach it and how to outwit nature's wariest sentinels. He walks the bogs like a spider, even with a backload of ducks, where the shooter dared not attempt to flounder and fails to retrieve.

My own share was eighty-five game ducks, shot in the central stand of Little Lake, opposite Crossarms, all retrieved by curly-coated Marengo. Reng (for short) is a prince of the house of Chesapeake, royal in looks, quick and tireless in work, a tiger to fight, allowing no one but the gunner to touch his pile of game, faithful unto death, he lives in the handsomest and best of sons and daughters.

One of the happiest times in a man's life is when all gather in the evening around the glowing log fireside of Wapanocca Club house, with jests and wit and heartiest friendliness and fraternity, congratulating and nobly dividing with the men who beat us, with many a toast and never a boast, brothers all, while Miles of New Orleans, James and Waters of Chicago, Fagin of Kansas City, Maddin of Nashville, Bethell of Denver, Bonnie of Louisville, Scott and Sullivan of Mississippi and Woods of England, with thirty-five Memphians, form one happy and cosmopolitan union, served in the best and politest come-again-and-stay-longer fashion by that chief of *chefs de cuisine* and champion club keeper and coffee-distiller, Col. Philip Gwin d'Afrique, long may he wave—at our Chickasaw Indian lake, "Wau-ke-wau-kee."

But in the riot of our joy we have run away from boon companions and must hark back to the foxy and alert champion of the day, lawyer U. W. M., whose sharp eyes had seen afar off the clouds of greenwing teal rushing into Walker's Cove, where he dropped anchor in grass and willows, 5in. of water and 8ft. of muck. Perpetually his double shots rang out from the spitfire until 110 plump teal loaded his boat like a tarpon. He was two hours then in a furious flight of swirling teal without a shell, studying their ways and means for future use. From Lond Pond stand came many twin electric shocks from the deadly tubes of the tall, genial Prof. J. G. H., who counts only what he bags, and honors the post of club secretary; his score was eighty-one, all retrieved by his crested Irish water spaniel Frank, who would dive out of sight for a crippled duck, and at command would bring in the decoys.

From far away Willow Poles Crossing came faintly the reports of Uncle George's new gun, and although the mallards fairly pelted him, one barrel of his gun proved useless and the mire and grass cut down his score to 39 ducks and a goose. The keenest gunner in Wapanocca Club probably is the silver-haired Vice-President A. C. T., whose 65 years have not dimmed the fire in his eyes nor paled his ruddy cheeks kept aglow by sports afield; he stood at the junction of Cross Arms and Big Lake, and although one of our deadliest shots with his ejector hammerless, he was out flight line and tied Uncle George. His retriever Topsy, wavy coated and strong, is the model form, size, coat, head and color, of all our Chesapeakes, and a most gallant and eager workman.

Heartfelt congratulations, and felicitations preceded supper. Never was mallard roasted nor teal broiled more daintily. A total of 430 ducks was the score of six men one day. Each gunner took five ducks; an express wagon divided 400 ducks among the five asylums and Young Woman's Boarding Home of Memphis. The limit now is fifty ducks per gun per day, and for every duck over this, the sportsman must drop a dollar in the slot of Wapanocca's treasury. But it is still the unwritten law and custom to give the bulk of the game to those who need it. GUIDO.

ON WAPANOCCA.

### Buffalo Shooting Ground.

BUFFALO, Nov. 17.—Sportsmen who have been out during the past four weeks say that jacksnipe and partridges were never scarcer in this vicinity than they were this fall. A few snipe were shot in the marshes down the river, but where a man might have counted on a large bag last season there was not a sign of a bird this year. Rabbits are more numerous. During the first fall of snow last week a large number were shot. Many of the shooters expect to go out for rabbit Thanksgiving Day.

Fred Gerot has had a taxidermist at work on the pelican shot recently by "Jake" Koch, and the strange bird now peeps out of Fred's window at the passers by. Stuffed, he is a magnificent specimen.

John O'Brian, of the Surrogate's office, and a party of local sportsmen went up into the interior of Canada this week duck hunting. They intended to visit Chatham where Ed. Bishop, former secretary of the Board of Public Works, has a berth as Consul. Ed is as nimble when out for duck as he is with his pen, and the boys under his tutorship ought to bring home plenty of duck and a batch of ghost stories. John promised that he would bring the Surrogate a squirrel if no ducks were sighted. H. J. B.

### Mr. Burrell has Dogs for Bear.

THE celebrated vermint dogs which Mr. Walter F. Burrel bought from an old hunter up the valley a short time since, have not had so much hunting of late as they have been accustomed to, and are getting sharp-set for bear or anything of that kind. Hearing that a bear was "using" out at the head of the Cornell road, Mr. Burrell went out there a few days since to give his dogs a little exercise. They soon picked up the trail of the bear and away they went after it. Mr. Burrell followed after, at the top of his speed and, in about half an hour, came up with the dogs, which had killed the bear outright and were sitting around when their master arrived, with a sort of give-us-something-harder expression on their countenance. From the marks on the tree at the foot of which the bear lay, it was evident that, being hard pressed he had tried to climb the tree; but the dogs had pulled him down and done for him on the spot. The dogcatchers will do well to look for the license tags on the collars of these dogs with a binocular before they undertake to catch them. —*Portland Oregonian.*

WHAT WE GO FOR.

## IN AUTUMNAL COVERS.

BOSTON, Nov. 4.—*Editor Forest and Stream:* We make many trips to the tangled thickets and sunny hillsides, hoping to get a fair snap shot at a swift-flying partridge, but we have not had our ambition realized as yet. If ever it shall be our luck to stop one of those wily birds, we know how we will prize it.

We love to hear the startling whir of the frightened grouse; but we love the grand old woods still more, and week after week we find ourselves heading for the fragrant pines; never disheartened, never wearied at our repeated failures. Perhaps when writing my next letter to FOREST AND STREAM I may have the pleasure of recording my first capture.

Two years ago one could stroll through the woods of the Russell Estate in Milton, and be entertained by the antics of the gray squirrels on the old stone walls and among the tree tops. But the grays have gone, and we experience a sense of sadness at the loss of the nimble tenants of the ancient woods. The partridge too have vanished. The ruthless hand of the gunner has succeeded in driving off our most noble of game birds. How much better if we would lay aside our guns for a few years, and use note book and pencil instead.

We could note the stock that is left remaining, and by careful observations would be pleased at the increased number of birds and small mammals in a few years. But I feel as though it were of no avail to expect such a state of things to occur, even though sanctioned by law. We have a class of shooters in Boston, who would be utterly incapable of understanding the wisdom of such a course. We have the Italian shooter with us, who is no respecter of person or life. Last Sunday while out for chestnuts through the woods of Hudson, we encountered three of those fellows with guns on their shoulders. And it would have been an extremely dangerous undertaking to have tried to stop them from gunning.

The gunners of our towns and villages are the ones to be appealed to. They know where the mother grouse hides with her yellow brood, also where the quail trains her young. They have observed the nests long before the young were hatched. And what an easy task to get the whole family, while the city man tramps over miles of ground looking for what is not there. I mentioned an instance last year of a farmer going behind his barn and shooting quail before the law allowed him to do so.

We have a club made up of boys from the office who confine their sporting proclivities to pickerel fishing. We had some gay old times on the ice last winter, and even now we are overhauling our traps and taking the rusty edge from our ice chisel, anticipating the pleasures of the first trip when the pickerel bite best. We took through the ice last winter some 5 and 6lbs. fish, and we are hankering to get at the "big mouths" again.

The "Dingbat Club" has one member on its books who was green last winter, so green was this fisherman that he sat at a trap watching it for half an hour, then turned his head for a moment, when looking again he had a flag up, and he exuberantly drew up a big tomato can.

My boy of eight years, at this moment asked me what a fish-hog was. He is reading a copy of FOREST AND STREAM and found the word in its columns. The boy is my companion on many of my trips, and he is fast developing into an enthusiastic lover of bird and wood-life.

I noted last week some curious traits as exhibited by our hornets. I climbed a tree over 50ft. high for one of their nests. And again I found a half-dozen nests within a foot of the ground. Some of high pretensions, and more others humbly inclined—just like humans.

JAY PEE.

## NEW ENGLAND GAME GROUNDS.

BOSTON, Nov. 17.—A meeting of the New England Fish and Game Commissioners was held at the State House on Friday. The object of the meeting was the discussion of fish and game laws in the several New England States, with the hope of some time arriving at something like uniformity in the same. A resolve was passed by the Massachusets Legislature last winter recommending such a meeting to be held annually. At this meeting every New England State was represented except Vermont. There were present: For Rhode Island, J. M. H. Southwick, Charles W. Willard, C. W. Williams, Henry I. Root; for Connecticut, R. E. Follett; for New Hampshire, N. Wentworth; for Maine, O. B. Whitten, Henry M. Stanley, Thomas H. Wentworth; for Massachusetts, E. A. Brackett, J. C. Young. Prof. Putnam, curator of the Peabody Museum, was also present as the guest of the Commissioners.

A good part of the ground covered by the game laws of the several New England States was gone over in the discussion, with various recommendations for uniformity. These recommendations were answered, pro and con, with all the difficulties of the climate and seasons dwelt upon. It was also suggested that several of the States in the southern part of New England required greater protection—if indeed not perpetual close time—than the more northern and eastern portions do, where the country is very sparsely settled. There was a general discussion, aiming toward the better protection of the lobster. The general opinion was that protection of lobsters under 10½in. in length was sufficient to save the species in fair abundance, though the Rhode Island delegation was in favor of a 10in. law. The meeting attended a banquet at Parker's after adjournment, subject to the call of the chairman.

Commissioners Stanley and Wentworth, of Maine, are greatly delighted with the increase in deer and other large game that has been going on in that State for the past 8 or 10 years. Both are in earnest and very enthusiastic in the work. While in Boston they visited the markets, and are reported not to have seen as many Maine deer there as they had been led to expect.

Mr. W. T. Farley with his friend Harry Clarke started for Andover North Surplus, on a deer hunt, Monday, Nov. 12. If they had good luck, taking a moose or a bear, they were to telegraph me. Saturday I got a telegram saying "Come at once! Having great luck." George H. Cutting, who has guided Mr. Farley so often at Camp Stewart, is guide. Andover North Surplus is some six miles from Andover Me.

Mr. David B. Blanchard has lately returned from a partridge hunting trip into Maine. He went this time to Patten, in Aroostook county, and on the line of the New Bangor and Aroostook Railroad. He had fair success in shooting, but he devoted more of his time to missionary work among the guides and citizens whom he was thrown in contact with. He comes out of the woods perfectly astounded with the slaughter of game that is going on in that section. The hunters reach the very heart of the forests from several of the stations on that road, and are within a few hours' walk or paddle with canoes of the game they seek. The woods are full of hunters He counted twenty-nine dead deer on the train he came out on, and this was explained to him as not a very great day for deer. He talked with the guides he met, and suggested to them that such slaughter could not be continued. He found them reasonable, and he believes that they will gladly sign petitions to the Legislature for some changes in the Maine game laws that shall regulate this killing of game. Many of the guides he met are of the opinion that one deer in a season is enough for a hunter, and nearly all are in favor of a perpetual close time on cow moose. He found they universally agreed that ruffed grouse should not be legally killed till the 1st of October. Guns in the woods should be prohibited till the full open season begins, and that should extend over but two months—October and November He found that they generally agreed that December is a dangerous month to the big game to be open, from the fact that the snows have so often become deep before the end of that month, and the animals have begun yarding.

SPECIAL.

## TEXAS AND THE SOUTHWEST.

### Ducks in Nueces Bay.

SAN ANTONIO, Tex., Nov. 16.—I don't believe that there are words in the English language that I can use to convey an idea of what A. B. Critzer, of San Antonio, and the writer saw on the 9th of this month while on a ducking trip up the Nueces Bay. There are more ducks this year on the Texas coast than ever known before. All day long, sharply outlined against the western sky, could be seen a swaying and continuous mass of flying bluebills, canvasbacks and redheads, headed for the sweet water of the Nueces River. We were shooting in the bay and only caught stragglers, but they came in so rapidly that we had a magnificent day of it.

As usual, the natives about the place made all kinds of fun of the 20-gauges, but we made them so tired before the day was over. We had plenty of ducks—not too many—not as many as the day last winter when we were accused of killing 812 to two guns, 20-gauges at that.

Mr. Gaston Naquin, of Rockport, brought in 63 canvasbacks and redheads as a result of three hours' shooting on Copana Bay.

### Deep Water.

A good story comes from Portland, once a town near Corpus Christi.

A real estate man and a party of Northern tourists were on the beach last winter watching the flight of bluebills and admiring the play of the mullet. The R. E. M. was expatiating on the virtues of the soil, extolling the advantages of the geographical position of the town and using such other arguments as might induce his hearers to buy land from the "Portland Town Co."

"How much water is there out in the bay?" asked one of the tourists, pointing out toward the shallows.

"About 18 to 25ft.," grandiloquently responded the R. E. M.

Just then one of these puttering, everlasting, long-billed cranes, just skipping the water, flew into the line of sight and gracefully alighted, the water hitting him about the "knees."

"By George!" said the tourist, "I am sure of one of two things. Either you are telling a lie about the depth of that water or that is the longest legged bird I ever saw."

They buried the real estate man right there in the sand.

### Moody's Fence.

Col. Moody, the market-hunting banker of Galveston, of rice-duck-farm fame hasn't drained his lake yet. He has been very busy of late repairing his fence. By actual measurement, the fierce barrier that repels the sportsmen of Texas consists of one wire, with posts 90ft. apart. If Mr. Moody succeeds in draining Lake Surprise, a company will be formed to hold back the waters of the bay so the rice in the Colonel's farm can flourish.

TEXAS FIELD.

### An Open Door.

IN the Paterson (N. J.) *Press* of Nov. 14, Wm. C. De Graw, the hotel keeper who was one of the party charged with unlawfully shooting ducks on Greenwood Lake, writes of the excursion in the steam launch:

In regard to the duck shooting case, "the worst lie ever invented, as the entire party will swear," there was not a duck shot in that expedition Not a gun was fired on that trip except one, and that was in New York State, shot by Judge Inglis, which he does not deny, and only did that remarking he had not unloaded his gun during the trip of one hour's time as a pleasure trip. I have not violated the law in any respect and will prove it.

In reply Game Warden Charles A. Shriner makes this proposition to open a door wide open through which all the parties to walk out:

In regard to that charge of shooting ducks from his steam launch I am sorry to see that Mr. DeGraw characterizes it as a fabrication. By so doing he calls into question the veracity of at least half a dozen persons residing along the shores of Greenwood Lake. If Mr. DeGraw was innocent why did he not stand trial? He certanly had most eminent witnesses. However this may be I desire to make a proposition. If the eminent gentlemen who were with him in his steam launch on the 17th of October will give me their word that they did not violate the law by sailing for ducks or by shooting at them I will disregard the proffered oaths of ten persons, and will recommend to the Fish Commission, at whose particular command the prosecutions were begun, to have the cases dismissed at once; if the Commission should decline to follow my recommendation I shall resign the office of warden, which would end the cases. I am perfectly willing to take the words of such men as Judge Dixon or Judge Inglis, and by accepting this proposition they can save themselves the annoyance of a lawsuit and also stand acquitted before the community of even an unintentional infraction of the law.

### A Modest Moose Hunter.

NEW YORK, Nov. 16.—*Editor Forest and Stream:* Yours of the 14th to hand and noted. I would like very much to accommodate the readers of your journal with a recital in detail of my moose hunt in the Maine woods, but the aversion of seeing my name in print, particularly in the capacity of a moose slayer, deters me from writing at all on the subject. I am naturally a bashful man, and a sketch of the hunt in question would give me just that notoriety I am only too anxious to avoid.

JAMES N. JARVIE.

### Stop the Sale of Game.

A PLATFORM PLANK.—*The sale of game should be forbidden at all times.*—FOREST AND STREAM, *Feb. 10.*

STOP the sale of quail. Yes, by all means stop it. When I think of the outcome of market-shooting and that it means destruction to our game, I realize that it is time something is done to put an end to it. I am aware that it takes time to get at things of this kind, but there should be some restriction in our game laws to prohibit the sale of game. If we don't awaken to the facts, and that very soon, too, we shall not need the advice of brother sportsmen in the choice of a gun, for there will be no use for one, unless one indulges in trap-shooting. To buy a gun to use on game will be useless and a foolish waste of money. It is a shame and an outrage the way our game is slaughtered and transported to market for money.

Stop the sale of quail, and the time will come, as in days of old, when we can go out and make a good bag without tramping one's legs off.—*Correspondence Evansville Tribune.*

*Editor Forest and Stream:*

Keep a-hammering away at your platform "Stop the Sale of Game." The Pittsburgh game dealers had rabbits and quail for sale for more than a week contrary to the game laws of Pennsylvania. Informations have been made against several of them, but they claim that they had them shipped from Indian Territory last December, 1893, and had kept them in cold storage ever since. But the bluff won't work with Fish Warden E. B. Todd, who is going after them with a sharp stick. These violators are going to take their cases into the courts, but their claims won't hold water. Mr. Todd is a new fish and game warden for Allegheny and Beaver counties.

P. F. S.

### The Persian Partridge.

*Editor Forest and Stream:*

I have read with pleasure in FOREST AND STREAM the statement that the Mongolian pheasant is to be placed in the Middlesex Fells of our new metropolitan park system. Allow me to call the attention of the proper authorities to a suggestion of Sir Austen Layard, of fame in the exploration of Nineveh. I find it in Frank Buckland's admirable book, "Notes and Jottings from Animal Life": "He [Sir Austen] regretted we had not yet introduced the gigantic partridge, the ourkakiek, the royal partridge of the Persians, or Caspian snow partridge."

This suggestion has in a way the indirect approval of that most sensible naturalist and warm-hearted lover of birds and beasts, Buckland, and is, at all events, worthy of serious consideration. It would be of interest if the Metropolitan Park Commissioners of Boston would give them a trial, either in the Middlesex Fells or in the Blue Hills, and I know of some one who would pay for the first pair if the Commissioners would procure the birds from Persia, which, I should think, might easily be accomplished by the aid of the United States Minister to Persia or of the American Consuls to that country. A. S.

### Some Oshkosh Ducking Ways.

CHICAGO, Ill.—*Editor Forest and Stream:* I have just returned from a trip to the marshes adjacent to Oshkosh, Wis., and found ducks scarce. No wonder at it, as in the mating season the mallards are shot off their nests and the nests robbed, the miscreant considering himself in great luck with a day's food ahead. In the hunting season the birds do not seek the marshes until after dark, and even then local hunters have developed the faculty of shooting them in the almost dark, and pick up the birds next morning. Those birds that rest in the marsh are out before daybreak and remain in the open lakes, where they are unapproachable. For these reasons hunting is poor. The weather was too warm for the northern ducks, and they had not arrived. Some bluebills were in, and these were being netted on their feeding grounds by fishermen, who ship them in barrels to market. The birds dive and get tangled up, and drown in the nets, set purposely for them. There ought to be some way to stop this netting of ducks.

A. H.

### With the Webfeet on Nigger Slough.

LOS ANGELES, Cal., Nov. 6.—On the 3d inst. Messrs. James Matfield and John Winston, both well-known sportsmen of this city, left for a day's shoot on the grounds of the Dominguez Gun Club, of which they are members. They opened the ball with the webfeet at 8 A. M., on the 4th, and after three hours shooting, picked up 101 ducks, principally teal and sprig. They shot from a blind in the tule, over a flock of fifty decoys. The Dominguez Gun Club controls the Nigger Slough, a body of water six miles long and about sixteen miles distant from Los Angeles. The above club numbers among its members some of the best duck shooters of this city, has a comfortable club house, boats and other accessories, and the members enjoy some capital sport during the season.

CULPEPPER.

### Christian County Hunting Club.

SEVENTEEN members of the Christian County (Ky.) Hunting Club are on the way to the happy hunting grounds of Quiver River. They carry with them a unique outfit, consisting of one coach carrying the hunters and two cars carrying 21 saddle horses, 34 hounds, wagons, feed for stock and food for man. They have six servants to do their bidding and to act as guides to camp, should any of them get lost in the woods. They carry with them their feather beds and chairs. This club is 43 years old. Captain Parrish said last night that he had taken, including this one, 42 annual hunting trips during his membership of 43 years. He was one of the charter members.—*Memphis Avalanche.*

### Barnegat Ducking.

BARNEGAT, N. J., Nov. 12.—Gunning continues to be good. Two of our gunners one day last week (William Chandler and Oscar Ridgway) killed twenty-five redheads, black ducks, broadbills and others.

WM. J. INMAN.

### An Adirondack Bear.

ELIZABETHTOWN, N. Y., Nov. 12.—Edgar G. Jenner, of Lewis, caught a 400-pound bear Saturday last. It was one of the largest bears ever caught in this section.

G. L. B.

### Louisiana Anticipations.

FRANKLIN, La., Nov. 12.—Everything points to an immense quantity of game this year. The snipe are coming into the prairies of Iberia and Vermillion parishes in great numbers. Quail are more plentiful than I have seen them for years. As soon as the cane is all cut we expect great sport with them.

Everyone gets a deer now whenever he tries, which shows either that they are more plentiful or that we are developing into better hunters.

I hear from an old hunting companion and chum, that the duck shooting in the marshes below Poydras, La., is already all that could be wished for. We are already discussing the "whys and wherefores" of our annual trip to Abbeville. F.

### Ontario Deer and Fish.

BELLEVILLE, Ont., Nov. 12.—Deer have been fairly plentiful this year, and nearly all the hunting parties have killed their quota. It is evident, however, that the season has been opened too early, as many fine animals were shot only to rot in possession of their slayers.

Several weeks ago a number of bears, driven from their forest homes by bush fires, made their way into the front townships. A number of them were killed.

Maskinonge fishing was good this season. Several that weighed upward of 30lbs. each—one of 48lbs.—were killed. R. S. B.

### A North Carolina Quail Country.

BESSEMER CITY, N, C., Nov. 17.—We have no fishing worth naming in this section. Of course there are a few trout and other small fish usually found in the small mountain streams. But I think the quail shooting in this county is as fine as any other section, and the quail are more abundant. We have here a good livery stable, the Mountain Park Inn, and a most charming place, with scenery unsurpassed. J. A. S.

### New Jersey's Game.

PERTH AMBOY, N. J., Nov. 17.—Quail are scarce in Middlesex county. Ruffed grouse may be found in fair numbers along the line of the Camden & Amboy Railroad, but are hard to get at. Rabbits are abundant. Woodcock were unusually plentiful during the week ending Nov. 10, and in excellent condition. Several shooters made large bags between here and Metuchen, five miles distant. J. L. K.

### Barnegat Ducking Poor.

BARNEGAT, N. J., Nov. 17.—Rabbit season has arrived and good bags are reported, seven, six and twelve being high. All parties respect the scarcity of quail, therefore none have been killed. Duck gunning is poor owing to low run of tide. W. C. I.

### Theatrical Note.

THE company playing "A Wild Duck" has ceased to wing its flight.—*New York World.*

### Political Note.

SOME queer fish came up on the tidal wave. One of them is Mr. Sauerherring, Republican Congressman-elect from Wisconsin.—*Chicago Herald.*

### Anthropological Note.

MAN, as a whole, is a considerable fool. He not only does not know that things are loaded, but he does not take the small trouble to learn, and when he is warned the becomes reckless and takes chances.—*N. Y. Commercial Advertiser.*

### Travel Note.

MR. AND MRS. FRANK SELOUS are now making a wedding tour in tents through Asia Minor, attended by five servants. The celebrated lion-killer and discoverer of Mashonaland is determined to shoot as many ibexes as possible.—*N. Y. Evening Post.*

### Piscatorial Note.

MINISTER—"So you say that you saw some boys out fishing on Sunday, Bobbie. I hope you did something to discourage them." Bobbie—"Oh, yes, sir, I stole their bait."—*Harlem Life.*

### Archæological Note.

A PETRIFIED cat from Arizona, with perfectly-preserved whiskers, is the most interesting object in Portland just now.—*Bangor News.*

### A Card from the Winchesters.

NEW HAVEN, Conn., Nov. 5.—*To whom it may concern:* Our attention has been called to the mutilation of some of our guns, apparently done for the purpose of concealing the number. We judge that the tangs are taken from the guns, softened, the numbers obliterated and the tangs re-hardened. Again, in some instances, the letters "W. R. A. Co." are placed upon that part of the gun from which the number has been obliterated.

As this cannot be done without injury to the guns, we urge that all parties handling or using Winchester guns should take notice as to whether or not the number on the tang or frame is intact.

We advise you not to buy guns, the numbers of which have been obliterated or altered, as they are undoubtedly second hand, refinished and wrongfully sold as new.

We cannot warrant such guns.

All guns going from the Winchester Repeating Arms Co. are numbered. See that your gun has not been tampered with. Yours respectfully, WINCHESTER REPEATING ARMS CO.

### North Carolina Winter Resort.

VISITORS to the South will be pleased to learn that the Hotel Chattawka was opened at Newbern, North Carolina, last September, and is now under the management of DeWitt Clinton Smith, late of Minneapolis, and proprietor of the Security Hotel, Seventy-second street, Chicago, during the Fair. Mr. Smith has had twenty-five years' experience in California and the Northwest, and will no doubt make his house an attractive resort, especially as Newbern has the finest climate on the Atlantic coast, with superior hunting, fishing and boating.—*Adv.*

### Excursion Rates to Florida and the South.

THE Southern Railway, "Piedmont Air Line," will put on sale Nov. 1 excursion tickets at greatly reduced rates to all prominent winter resorts in the Carolinas, Georgia, Florida and Cuba. For full particulars call on or address R. D. Carpenter, General Agent; Alex. S. Thweatt, Eastern Passenger Agent, 271 Broadway, New York; F. B. Price, Agent, 32 South Third street, Philadelphia Pa.; W. A. Pearce, Agent, 228 Washington street, Boston, Mass.; W. A. Turk, General Passenger Agent, Washington, D. C.—*Adv.*

### Southern Shooting.

THE Terminal Hotel at West Point, Va., is situated in a famous game country. It is on the York River, between the Mattaponi and Pamunkey rivers, and no great distance from the Chesapeake Bay. Game is found in unusual variety, and good fishing is also to be had. The hotel is heated by steam and lighted by electricity. It is supplied with artesian water and the table is excellent. It is easily accessible either by rail or water, the latter trip taking but one day from New York.—*Adv.*

### Squires's Catalogue.

HENRY C. SQUIRES & SON have just issued a new catalogue—No. 22—which will be sent free on application. This is one of the most complete catalogues of sporting goods published, and as it is systematically arranged and indexed it is an important reference book for any sportsman's library. The catalogue is bound in a tasteful cover, and low net prices are given on the articles listed.—*Adv.*

# Sea and River Fishing.

## GOOD-BYE, SWEET STREAM.

Good-bye, sweet stream, good-bye!
The day is spent; would that I might longer stay;
From thy embrace I reluctant turn away,
So fondly do I love and thee esteem.
Good-bye, sweet stream.

Good-bye, sweet stream, good-bye!
Fain down would I kneel and kiss thy rippling flow,
So surely thy charms hath set my heart aglow,
As glows the twinkling star with its bright beam.
Good-bye, sweet stream.

Good-bye, sweet stream, good-bye!
As fades this glorious day as night advances,
So vanish from my sight thy 'witching glances,
Only to fall upon me in my dream,
Good-bye, sweet stream.

Good-bye, sweet stream, good-bye!
Evening shadows creep along thy pebbly marge,
Vine-clad tree clumps in the twilight gloom enlarge,
The yellow moon looks down with silvery beam.
Good-bye, sweet stream.

Good-bye, sweet stream, good-bye!
Fragrant thoughts of thee will oft my bosom swell,
Unfading pictures in halls of memory dwell,
So beautiful do all thy windings seem.
Good-bye, sweet stream.

Good-bye, sweet stream, good-bye!
Summer days on sunny wings, alas, depart,
Joys of future hours thick cluster 'round one's heart,
Our lives with fond anticipations teem.
Good-bye, sweet stream.

Good-bye, sweet stream, good-bye!
Winter's cold may fold thee in its stern embrace,
Fling a snowy mantle o'er thy laughing face,
As 'cross thy bordering fields the wild winds scream.
Good-bye, sweet stream.

Good-bye, sweet stream, good-bye!
Smiling spring again at thy barred doors will knock,
Icy fetters with her magic keys unlock,
And flashing sunshine wake thee from thy dream.
Good-bye, sweet stream.

Good-bye, sweet stream, good-bye!
'Till then, farewell! And when once again we meet,
Gifts of gratitude I'll scatter at thy feet,
And dedicate to thee this rapturous theme.
Good-bye, sweet stream.

CANANDAIGUA, N. Y., Oct. 18. CHAS. T. MITCHEL.

## THOSE "RED TROUT."

A SIWASH canoe is not an artistic creation, nor would it take first prize at a beauty show, but when it comes to a question of speed it is entitled to a good deal more credit than it gets. That is the reason I picked out my old "skal-lal-a-toot" as the proper craft to make a twenty mile voyage of investigation for FOREST AND STREAM, and find out conclusively what constituted the "red trout" I had heard of for the past two or three years and mentioned in my last letter. This little canoe jaunt meant a paddle through Lake Union, then a quarter mile portage and a nine mile voyage and back again on the beautiful Lake Washington to an unknown creek in an unknown wilderness of big timber. I had made one attempt on foot to reach the only stream I could hear of which was inhabited by this particular fish and I had failed to find it, so I concluded to go by boat and find it if it was there, hence this voyage.

Starting while the day was young, we soon made the run to the portage, landed and hunted up a pair of wheels with gear made for boat transportation overland and soon had our light cedar craft loaded. Then commenced a pull up hill that tested our muscles in good shape before we reached the divide. From there on it was a sloping, sliding run down to the Lake Washington beach, where we unloaded and took to water again.

After considerable slow work among the lilypads and tules we settled down to work in good earnest, passing little islands, points, headlands, tule patches and the usual lake features in rapid succession as the light paddles sung a monotonous *pisht, pisht* in accompaniment to the purl of the tiny waves under the old skal-lal-a-toot's nose. Coots scurried out from among the reeds, leaving a wake like a sternwheel steamboat as they rose. Divers, big and little, popped up from the depths, looked about and sunk again like lead. A loon or two poked head out of water, sized us up as we passed, laughed a weird, derisive, insane kind of a laugh, totally devoid of a trace of merriment, and disappeared. A few ducks were seen, but they gave a shotgun lots of leeway, and went right along toward Oregon without giving us a chance to hail them.

At one place where we ran close to a point in passing, a lot of bluejays were holding a regular council about something and making a whole lot of noise apparently without accomplishing much. After a while the bow paddler remarked that his back was getting tired, but just about the time that I arose to inform him that my spinal column too was showing indications of exhaustion, we rounded the last outlying cape and pointed for a landmark that promised indications of that much talked of creek where there was "just thousands of red trout, where a feller caught sixty dozen of 'em with a grabhook in a day, an' another feller took out a butter firkin full in two hours."

We found the place and found the fish, slipped a net under a pair of them, and snaked them out on the ferns to look at. Two were all we got and all we wanted, for examination showed this state of affairs. They were the common lake trout, such as are found in both Lake Union and Lake Washington, but they were in a sadly dilapidated condition from pushing up stream through brush, over and under logs and the usual rubbish of all the smaller Washington streams. The fins and tail were rather whitish colored, ragged and worn out or worn to about half the size they should be, the body was bright red but from inflammation and irritation, which brought the blood to the surface and caused the whole body to look as if it had been sandpapered until almost but not actually bleeding. One specimen had a strip of skin about half an inch long worn off the nose, apparently from running against obstructions in the stream. A small white worm infests the gills, and a white leech-like parasite was found clinging under the fins in places. White spots having the appearance of a sore showed on different parts of the body, and the fish were very lean and slender in shape. The eye was bright and was the only feature about the whole fish that appeared to be in a normal state of health.

Taken altogether they present just such a worn out, sick and nearly dead condition as do salmon after traveling a long way from salt water on their spawning run, and I firmly believe that it is an exactly similar or parallel case and from the same cause as with salmon.

Both the specimens taken were males. I intended to get a female too, but we had very little time, so I failed to secure one. Small rainbow trout were in the same stream in abundance and appeared to be in good condition, darting about, as is their wont, when we appeared, but the "red trout" paid no attention to us at all, and I think that by our being careful they could be picked up in the water by hand.

At any rate, the "red trout" is nothing more nor less that a common lake trout diseased and battered up generally, and to that condition is due his color.

This is the fish that is caught by grabhooks now by the hundred and salted down for winter use by the ranchers in the vicinity, as they told me themselves, and pronounced a good table fish!

Excuse me while I shed a tear that such ignorance should exist among an otherwise enlightened people.

The only way out of it I see is to get them to take FOREST AND STREAM and become educated in regard to fish and game conditions, habits and life.

EL. COMANCHO.

## ANGLING NOTES.

### A New Book upon Angling.

IT gives me much pleasure to announce the forthcoming of a new angling work, which will bear the title "The Book of the Ouananiche and its Canadian Environment," and the author is Mr. E. T. D. Chambers, editor of the Quebec *Chronicle*, well known to the readers of FOREST AND STREAM through his contributions to this journal. Mr. Chambers is peculiarly fitted to write a book of this character, for he is a keen sportsman, a close observer, and a charming writer. He has long had such a work in mind, and for the purpose of studying the fish about which he writes in its native waters he has made repeated and extensive trips to and through the Canadian wilds and filled his note books with information at first hands. It was because of his wide information upon the subject that he was selected to write about Canadian sport in "Baedeker's Canada." He was the companion of Archibald Stuart, the Scotch explorer of Mistassini Lake on a trip up Mistassini River, and also of Col. Andrew Haggard on another trip in the region beyond Lake St. John, where the ouananiche push their way far northward to spawn. Familiar with the language of the natives he has not been dependent upon an interpreter for a knowledge of the legends, folk songs, etc., of an interesting people about which he writes as part of the history of the fish and fishing of Canada; and what he writes of the philology of the ouananiche is corroborated by the best living authority, Rev. Father Arnaud, missionary to the Montagnais Indians.

Mr. Chambers's book, now nearly completed in manuscript, cannot fail to interest and instruct the great army of anglers who have either caught or hope to catch that unequalled game fish, the ouananiche; and, further, it will serve as a correct guide to the region, and give other valuable information to sportsmen and tourists.

### Fly-Casting in One Lesson.

During the latter half of the month of October Mr. Elihu Vedder visited me, and almost upon the evening of his arrival he began to talk about fishing. Living abroad for the past thirty years, where he has had little opportunity for fishing, has not in the least dulled his fondness for the sport as practiced in his native country. I told him that the fishing season was practically over, that the trout fishing was closed by statute, that black bass were probably hybernating in the bottom of the lakes among the rocks, and had temporarily lost their game qualities, even if they would bite at all, and that this left pike and perch. He was game for any kind of fishing, though it resulted only in fishing and no catching; so we drove to a pretty little pond among the hills, clad in their fading autumn finery, prepared with a lunch of noble proportions to spend the day. The last time that I had fished the pond I was a boy, and fished through the ice for the so-called pickerel, and I went there on this occasion more for its beautiful surroundings than for the fish.

On our way we bought a bucket of minnows, and during the day we did manage to catch three pike and a number of perch, and Vedder rounded up all the species of fish the pond contained by catching a solitary, half-hearted black bass that came to the landing net with scarcely a protest.

"Is that the jumping black bass, the game black bass, the black bass that fights like a bulldog, and all that sort of stuff?"

"Yes, that is the fish, but it has its own season, the same as the oyster and the spring chicken and the crocus, and this is not the season when it displays its game qualities in this latitude. Come over another year when the bass are in season and you will find a fish that will make your blood rush through your veins when it jumps with your hook in its mouth. If I had my way I would close the bass season in this State the first of October."

"But I do not altogether fancy this sort of fishing compared with fly-fishing I have seen in England, and been invited to share in, but which I was obliged to decline because I could not cast a fly. At a country house on the Wandle where I was a guest a doctor came down from London on a professional visit and gave a few minutes to the patient and was off to the river with a fly-rod. Such fly-casting as he did seemed marvelous to me, and I have always desired to be a fly-fisherman."

"Well, you shall have a lesson in fly-casting when we return home, for the canal is near and I have fly-rods conveniently at hand for a trial."

The next day we went to a basin in the canal and mounting a fly-rod I showed Mr. Vedder how to do the trick. From the first his back cast was perfect, and his front cast bad. His line would go well up behind him,

curve properly, and then fell in a tangle on the water before him. Again I showed him, and he said I cast without apparent effort, while it tired him to cast five minutes. This was because he cast with his arm and his body, and not with the rod. Suddenly it came to him, and within an hour from the time he first took the rod in hand he was casting easily and gracefully over 50ft., and this without effort. On another day we went to the canal and he handled the rod like a veteran of many seasons. One measured cast was 63ft., and all his casting was done in a most workmanlike manner. In all my experience I never saw a man, green at the business, who handled a fly as he did in a few hours' practice. The moment he got the idea of proper time to be allowed for the back cast, and realize that the rod must be lifted with the tip inclined a little to the right and never carried back much beyond the perpendicular, then held in the same plane with the angler's figure and brought forward vigorously, as the fly straightened out behind, by the action of the rod itself, he was as much a fly-caster as though he had been practicing for years.

### The Stocking of Pleasant Pond.

In FOREST AND STREAM, Nov. 10, my friend Col. Webber refers to a note of mine in FOREST AND STREAM of Oct. 12 and says, "Now, with all due respect to Mr. Wentworth, I think he was entirely mistaken in supposing that he made the first plant of these fish (landlocked salmon) in Pleasant Pond." I shall have to ask Col. Webber to read the note again, for I did not say, or even intimate, directly or indirectly, that Col. Wentworth supposed anything of the sort, and certainly in the extract from Col. Wentworth's letter which I quoted, the subject of who stocked the pond is not referred to in any way. As I was about to clear the matter up as best I could from the records I received a letter from Dr. J. D. Quackenbos, which tells the story in its entirety and makes the history of the stocking of the pond clear to all who may read:

"Please call the attention of anglers interested in the growth of landlocked salmon in Pleasant Pond, New London, to the fact that Col. Webber and not Commissioner Wentworth is the one who is 'entirely mistaken' regarding the early plants in that charming little body of water. Col. Webber asserts in his letter of Nov. 2 that if his 'memory serves him right' his colleagues on the Fish Commission, the late revered Albina H. Powers, put a few hundred fry into this pond in 1879 or '80. Now, Commissioner Wentworth has never made any claim to the credit of having stocked Pleasant Pond with anything; the lake was stocked before he became Fish Commissioner, by Lieut. Ransom F. Sargent, with the knowledge and approval of Commissioner E. B. Hodge. Trout and salmon fry from the Sunapee hatchery were placed in the tributary brooks in the spring of 1890, and these brooks were closed by a special act of the Legislature in 1891. A year ago last fall, while I was at Sunapee, Mr. Sargent corralled in the mouth of one of the inlets some thirty landlocked salmon weighing from 5 to 6lbs. each. As salmon were unknown in the lake previous to 1890, these fish have attained their size in three years and six months from the egg. Last September a four-year-old was taken weighing 12lbs.

"Now as to Mr. Powers having abstracted salmon from the large lots sent to Sunapee in 1878 and the succeeding years, to smuggle into neighboring ponds without making any public announcement of the fact, I am extremely skeptical. 'Among ponds so stocked,' says Col. Webber, that is, stocked without public announcement, 'were the Compton Ponds in Sandwich'; but if the Colonel will consult the Report of the Fish Commissioners for 1879 he will find the Sandwich ponds named among twenty-three differant bodies of water that were stocked with landlocked salmon. So that argument will not hold water. Star Pond in Springfield, not far from Sunapee Lake, was stocked repeatedly by Mr. Powers. It was close to his home in Grantham, and he enjoyed fishing its cold, deep waters. His plants were successful, and many large salmon have been taken there, but I am sorry to record that many more have responded with their life's blood to the poacher's spear. There is a Pleasant Pond in Springfield, not far from Star Pond, and this Pleasant Pond was stocked by Mr. Powers with black bass. Possibly this explains the milk in the cocoanut. If not to Col. Webber's satisfaction let me remind him that there is a third Pleasant Pond in Francestown, and this has been stocked and restocked with landlocked salmon until the fishing ought to be superb. There is no reason whatever to believe that A. H. Powers did anything underhand. Pleasant Pond, New London, is remote from his late home and favorite haunts. He had no interest in it, and he would never put salmon into it without my knowledge—he could not have done so without the knowledge of the residents of Scytheville. The 12lbs. ouananiche that we had in the tanks is just 4 years and 6 months old, and for the sport of those anglers who are planning to fish these waters on May 1, 1895, while they are still virgin, I hope he has many coetaneans of equal size and pluck."

This simply confirms what I personally learned about the planting of Pleasant Pond when I was on the spot last summer, but it is very pleasant to have it confirmed in view of the fact that I have quoted the growth of the fish in the pond to those who contemplate stocking other waters, and in various other channels than FOREST AND STREAM.

### October Black Bass Fishing.

In this column I have said that if I could have my way I would close the black bass fishing in this State Oct. 1, although perhaps I did not mean on that particular date. My idea is to stop the fishing for bass after they have gathered together in winter quarters on the deep, rocky shoals. The fish at such times are not game as they are in summer, and I believe that those which are caught find their way to market, as a rule.

Since I made the memorandum in my note book on this subject two large catches of black bass have come to my notice, made in the same lake, and both by professional fishermen, who know the shoals and winter quarters of the bass far better than any amateur, in fact, few anglers know anything about where to fish for black bass after they are in their winter quarters, for they have no occasion to seek them. The two strings of bass that I refer to consisted of very large fish; one of them, I think, far larger than any like number taken during the summer. The lake is one in which black bass fishing has fallen off to the point that restocking has been commenced; and yet, if these two strings of bass had been left to spawn next spring the lake would have received more benefit than it will receive from all the bass that have been planted within the past two years. Black bass are not a fish to be propagated artificially, and the supply must be kept up in any water by caring for the adult breeding fish. Over and over I have called attention to the fact that the present law in this State does not protect the black bass during their breeding season, and if the fall fishing goes on the candle will be burned at both ends. I do not wish to pose as an alarmist, but I firmly believe that to keep up the stock of our so-called game fishes, in some waters, if not in all, we must enact a law limiting the number or weight of fish to be legally taken in a day or a season.

A case of over-fishing was reported to me recently. A "city sportsman" caught 60lbs. of trout from Terrill Pond in the Adirondacks one forenoon, and at that time there were 150lbs. of trout in camp with only three people to eat them. When the man started out fishing in the afternoon the camp keeper (and I know he has not hesitated to take trout from their spawning beds for his own table), was so alarmed at the waste that he forbade fishing in the pond, and this resulted in a row which ended in rifle shooting on the part of the camp keeper and flight through the woods on the part of his guest. If camp keepers who have persistently violated the law in regard to taking trout out of season, and killed deer contrary to law as well, are alarmed at the number of trout taken legally by a so-called sportsman, is it not time for the sportsmen themselves to give some thought to the subject of over-fishing our waters by those who do it in a legal manner in the open season? Many complaints of this nature have come to me of late, and if the whole truth could be known it would occasion great surprise.

### Owls in the Fishing Business.

Did any one know that owls did a right smart business in the fishing line when they had the chance? The Fish Commissioners of New Hampshire have discovered that owls have been stripping the spawning saibling off the beds in their State. Naturally the fishing is all done at night, and the water on the mid-lake spawning grounds being very low has given the owls the chance which they have improved. Quite likely the saibling expose some portion of their bodies above the water, and the noise they make in the water attracts the night birds, and every morning the spawn takers have found evidence of their visits.

A. N. CHENEY.

## ROMANCE OF TWO PONDS.

### I. Potter Pond.

WE love nature and believe in the true Apostolic succession. Hence we were in the Adirondacks for vacation and when the Dominie said "I go a-fishing," the Scribe and the Professor each responded, "I also go with thee." We went. It was a magnificent day, but warm. Baskets were packed, fishing tackle looked over, the boat loaded hastily and we were off. A four-mile row down the lakes, and nearly opposite Ned Buntline's "Eagle Nest" the boat was drawn ashore and turned bottom up in the forest shade. Then a tramp of three miles, much of the way by a trail marked only by blazed trees, up hill, down hill, side hill, under hill, across swamp and through thicket, brought us "weary and heavy laden" to the pond. A hasty lunch, a little rest, and we put to sea with craft little better for our purpose than the caravels of Columbus were for his voyage of discovery. We also were discoverers. We discovered much that we did not anticipate. The Dominie took one raft, the Professor and Scribe the other. Neither craft had sufficient buoyancy to keep the feet of the crew above water, and as for navigability, the floating debris of a sawmill pond would move about as quickly and as well. But we pushed off with the slow, majestic movement which belongs to great bodies and great occasions, and which is the only dignified way of poling across a muddy pond. Arrived in water too deep for poling we "cast anchors out of the stern and wished for"—a bite. Attention was divided between fishing and keeping right side up. Catching was not yet. The trout were in springholes and we had not yet discovered them. The storm-swept Adriatic of Paul's memorable voyage was not more thoroughly sounded by the imperilled sailors than was that mountain pond by us. Suddenly the line, rod and nerves of the fishermen seem one. A strike! And as the rod bends despite the spinning reel, we realize that these are no ordinary trout we have come after. Yonder the Dominie is playing one almost large enough to tow the raft. A cheer goes up as he is landed. But thunder! Yes, just that, but far away. Shut in by forest and hills on every side, we scarcely heed the gathering advance of clouds till the batteries of heaven and the fountains of the deep seem at once concentrated upon us in the fury of the storm. The blackness was like the "All ashore that's going ashore," just before the boat starts for Albany, and night set in much quicker. We were ashore; we started a fire; it would not burn. We tried again; it went out; again and again, but everything was wet. The Scribe made shavings with a big knife; they were wet before he could put them on the fire and we could not get blaze enough to dry them. For two long hours in the darkness we fought the elements—the rain, to keep it from going in—the fire, to keep it from going out. Finally when despair was settling like gloomy night upon the camp, the Dominie's hat fanned the dampness out and the fire in. Exultant we heaped on fuel, and as the flames rose higher and higher our spirits rose with them. The victory was ours; so were the fish. We feasted, then lay down to dreams, principally waking. The extemporized bark roof and the roaring fire kept us dry—too dry, thought the Professor, who was next the fire. He and the Dominie changed places. A deer was heard walking on the hillside, and the early mists of morning dampened the locks but not the ardor of the watchful Dominie, who leveled his rifle at a log, but saw his mistake in time to save the cartridge. Hot coffee, more fishing, then breakfast and we start homeward; not by the trail, but the outlet stream. We fancy roaming the woods without a guide. We are bound to discover something; we do it. We find how easy it is to get lost. How did we do it? By leaving the stream and following a supposed shorter route. Then it rained. Shades of Noah and all his family (including the animals)! Forty days such raining might even drown the deluge. The sun is completely obscured. We can no more tell our direction than the Adriatic seamen, when during fourteen days neither sun nor stars appeared.

The Scribe has a compass. *Cui bono?* He cannot read it. Long disuse has made him forget which end of the needle points N. The laugh is on him—the seriousness on all. Miles away are shelter, comfort, loved ones—but where? Every step in the bushes is almost like wading, and figuratively we are "out of sight of land."

Wearily (those great trout have grown heavier since placed in the baskets) we turn to retrace our steps if possible. Kind Providence interposes, and for one brief moment the clouds part sufficiently to show where the sun is. This gives direction, and within a mile the boat—dry clothing and tea at 6:30. Next morning the entire party enjoyed a trout breakfast.

### II. Sargent Pond.

The Dominie and Scribe had been there, and like the spies in Canaan, "brought back of the fruits of the land." Fish and venison borne over the mountains seemed heavier than grapes of Eshcol. The ladies at the cottage said "It is not fair for you gentlemen to have all the sport. We are abundantly able to go up and possess the land." They set off in high hopes—five of them (five ladies—the hopes were five thousand) accompanied by the Scribe, the Dominie, his son and a guide. To most of the ladies it was their first experience in camping out. Arrived, some catch fish for supper, some arrange the camp, others roam the woods in that joyous sense of freedom found only in glad and reverent communion with nature. The evening quickly passed in campfire chat, song and story. The latter are appropriate to the woods and soothe the feminine nerves like a Thomas concert on the garden wall. Their startled imagination can almost hear a bear in every forest sound or catch the gleam of a panther's eyeball in the reflected stars. A midnight tread arouses the would-be sleepers. 'Tis only the Domininie tramping around the fire, a frying pan in one hand, a fishbone in the other. He did not have enough supper and is vainly trying to make up the deficiency. Morning brings a glorious day, good spirits, water lilies, watching for deer. The ladies are taken to the island as the best "watch point." The Dominie and guide stay with them to do the watching and the shooting. The sun is watching too. The ladies try to escape his scrutiny by seeking shade. Alas for the coveted opportunity to see a deer! Just then one comes to water and boldly plunges in. The Dominie sees him—the guide ditto. Ladies are forgotten in the desire to secure that buck. "Hand me the rifle." But at the guide's first step in obedience the buck sees him and turning swims rapid y for the shore. No time is to be lost. "Throw in a shell and kill him yourself." Quick as thought the rifle is leveled, the range is short, the aim is true, the trigger finger pulls, and——the deer swims on. The rifle is new, has a combination set and hair trigger—the guide does not understand it and with all his pulling there is no report. The buck mounts the bank and disappears withnot a single gun in honor of his escape. Then the ladies are called and politely shown where the deer was—— ! ! ! ——The sun poured down his rays mercilessly, but that was nothing compared with what was poured upon that Dominie and guide. Yet the ladies all declared they had had a good time and wanted to go again.

*Hæc meminisse juvabit!*

J. C. ALLEN.

### Texas Tarpon and Bass.

MR. FRANK HATFIELD, of the Seaside Hotel, Ropesville, Texas, sends us some further particulars of the large tarpon scores noted in our last issue. He writes: "Mr. H. M. Wallice had forty-eight strikes by tarpon and broke the record by landing five tarpon. Mr. W. M. Louis had twenty strikes, landed three. Mr. F. K. Bull had thirty strikes, landed four. This made twelve tarpon for three men in one day, with rod and reel. It breaks the record for this season. Mrs. F. K. Bull caught and landed fifteen trout and redfish in one day; and Mrs. H. M. Wallice landed sixteen redfish and trout, a very good average for our fisherwomen."

SAN ANTONIO, Texas, Nov. 12.—A jolly party returned this morning from Rockport and Aransass Pass where they have spent a few days the past week tarpon fishing and doing a little shooting. The party consists of Messrs. James Barker and wife, R. W. Maguire, E. O. McCormick, N. W. Thomas, E. P. Rodgers and W. G. Crush. Mr. McCormick led by catching the largest one, weighing 234lbs. Mr. Maguire was not slow to follow with one tipping the beam at 153lbs. Next in line was Mr. Thomas with one pulling down the beam at 125½lbs. Mrs. Barker brought in the same afternoon 48 very fine redfish, some as large as 12lbs. Mr. Crush in three hours killed 160 snipe, and in two days 251 ducks. Now where is your Florida boomer? What has he got to say to this and to the last week's catch made on these same fishing grounds by the three gentlemen of Racine, 12 tarpon in one day? If there are any more doubters, let them come to San Antonio and we will take them to the bay and convince them that the big herring are at home every day.

L. F. M.

SAN ANTONIO, Tex., Nov. 16.—Messrs. Hardie, Allan Irvin, E. J. Coward, W. W. Wooldridge P. Wooldridge, A. W. Meek and E. Sengg, of San Antonio, made a pleasant party on the yacht Connie, off Aransas Pass. The party caught over 300lbs. of fish in one day. Mr. James Mamer landed a fine 85lbs. tarpon off Rockport. Mr. Cobolinn, the manager of the Union Fish House, at Rockport, has secured some fine and rare specimens. Among the lot was a sturgeon 8ft. long—an entire stranger in Southern waters.

### Great Bass.

My last letter contained an account of a large catch of big bass at the hands of Messrs. Micheljohn, Diynowity Bros. and Dr. Hines. One of the party told some one else that the big fish were caught at the head of the San Antonio River, another pictured a beautiful scene at the mouth of the Medina, another sent a batch of ambitious fishermen on the Salado, and so the stories radiated in all directions save the right one. Murder will out. So will black bass catches. In an unguarded moment Jim Dignowity went fishing. He took Galley Newton, who has just been elected to the judgeship of one of our district courts. Jim made the judiciary swear by the holy snood never to divulge the finny secret, and he took him to Elmendorf Lake, within fifteen minutes' ride of the center of San Antonio on a street car. There they caught 3 and

4-pounders, until the wearer of the judicial ermine, covered with mud and glory, was very tired and they came back to town. That night a fisherman friend of Galley's who lives next door to him heard him talking in his sleep, and then and there discovered the secret that there is fine black bass fishing in Elmendorf Lake.

O. C. G.

### Description of the No-Shee Trout.

A NEW SUBSPECIES OF TROUT FROM M'CLOUD RIVER, CAL.

*Salmo gairdneri stonei.* subsp. *nov.*

ALLIED to the form called *Salmo irideus*, but distinguished by its small scales, the number of scales in a transverse series being about 155, 82 before dorsal, where they are small and imbedded, 25 above lateral line.

Teeth fewer and smaller than in var. *irideus*, those on the vomer in a single zigzag series. Axillary scale of ventral small. Pectoral 1⅓ in head. Eye large, 4½ in head. Maxillary 2-10. Upper part plain greenish. Spots small and sparse on dorsal, adipose fin and caudal; a few spots only on posterior part of the body. A faint red lateral band; cheeks and opercles with red, no red between branches of lower jaw. Depth 4 in length. Anal rays 11. Described from a specimen 14in. in length, collected by Livingston Stone, in McCloud River, at Baird, California.

This form is well known to the Indians, and to the fishermen on the Upper Sacramento. According to Mr. Stone, the Indian fishermen say that it is abundant in the McCloud River about eight miles above Baird. They are larger in size than the ordinary *irideus*, one having been taken weighing 12lbs.

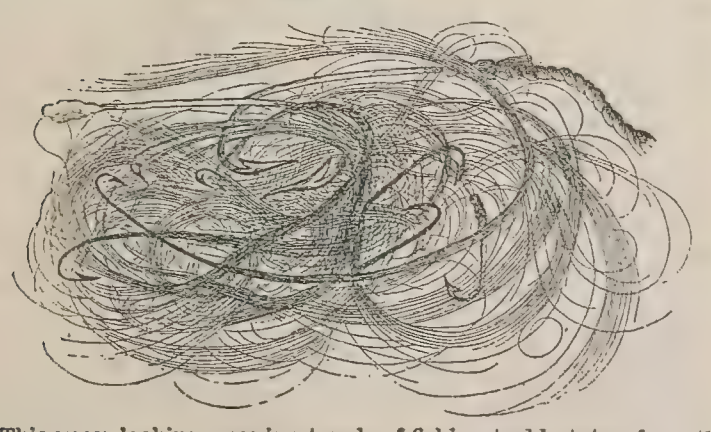
(Named for Livingston Stone, Director of the U. S. Fish Hatchery at Baird.)

### Lamper Eels in Iowa Waters.

VINTON, Ia., Nov. 5.—*Editor Forest and Stream:* Living on the sunny prairies of Iowa, hundreds of miles from the ocean, and knowing that the lamper eel is a salt-water fish, it is with much misgiving and no little timidity that I send you this communication.

Mud Creek runs through my farm and empties into the Cedar River a mile below Vinton. Every spring for about five years fishes have ascended the creek, and of a kind that puzzles me. They are from 4 to 8in. in length, and the longest ones are ⅓in. in diameter. They have a sucker mouth, and the head is from ½ to 1in. long, somewhat larger than the rest of the body, and it has a row of eyelets on each side. They have no scales. They have fins, but I cannot now describe them, and although I have not seen them "rise to a fly," yet they will suck on to the rocks in a genuine lamprey way.

I do not like to expose my ignorance, but as I have seen in the Iowa State Museum at Iowa City the tusk of an elephant that was found on the banks of the Iowa River, a tooth supposed to be that of a mastodon found in a slough a short way from here, and pieces of something that I believe to be parts of the tusk of an elephant taken from the creek a few rods from my place, I am almost prepared to see 'most anything, even lamper eels, coming to Iowa to live.

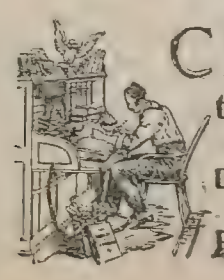


MOUNT TOM.

[Jordan says that the range of the small black lamprey is the Great Lakes, upper Mississippi and Ohio Valley.]

### Try the Fly on Pleasant Pond.

NEW YORK, Nov. 14.—*Editor Forest and Stream:* If the landlocked salmon of Pleasant Pond are anything like their schoolmates of Lake St. John, the query as to whether they are likely to take the fly can best be answered by the classical expression, "Well, I should smile!" In May and June, when they are playing at the surface they go splashing about in small schools earnestly hoping from hour to hour that some one will kindly cast a fly among them. When the fly does alight the ones that don't get there first are all mad about it and nervously await their turn. It is best to use only one fly, for if two or three fish are hooked at once the leader is not even a follower. It seems to sort of explode. In my experience the silver-doctor is the best fly. When I am doing well with other flies I always have the feeling that I might be doing better with the best fly. It does not pay to cast indiscriminately over water in which landlocks live. It is better to hunt around for a school and then go directly to them, just as you would go straight up to a hill of potatoes to dig it.



ROBERT T. MORRIS.

This queer looking mess is a tangle of fishing tackle taken from the stomach of a codfish by French fishermen. The illustration is from *La Nature*, and was sent to us by Mr. H. Stewart.

### Paintings of Fish.

MR. THOMAS SEDGWICK STEELE is giving an exhibition of his recent paintings of fruit, flowers, fish and still-life, at his studio in Hartford. In the list we notice several trout pieces, a branch of work in which Mr. Steele excels.

## Fisheulture and Fish Protection.

### Landlocked Salmon in New Hampshire.

HUDSON CENTER, N. H., Nov. 16.—*Editor Forest and Stream:* Mr. Webber of Charleston in his article of Nov. 2 states that in my letter to A N. Cheney I claim the stocking of Pleasant Pond in New London with landlocked salmon. If we claimed the stocking of Pleasant Pond it would be false, as the pond was stocked for the first time before any of the present Commissioners were on the board.

What I intended to write Mr. A. N. Cheney was this: That the pond had been stocked with landlocked salmon four years and eight months by the New Hampshire Commission, and made note of the remarkable growth they had made during that time, which is not more remarkable than Mr. Webber claims for the specimens that he and Commissioner Hodge took from Sandwich Pond, 12in. in two years' growth and weighing probably 1lb. It is very well known that after a trout or salmon attains that size with plenty of smelt for food, as there are in Pleasant Pond, their growth is very rapid. Mr. Webber says his colleague abstracted a few from one of the large lots sent to Sunapee about that time and placed them in two other ponds in the vicinity; "One of them I know was Star Pond in Springfield, and the other I think was Pleasant Pond." Further on he says, "I am sure it was made in 1880, and this will account for the 12lbs. fish to-day."

Since reading this article for the first time, I have written to R. F. Sargant, of New London, one of the best fishermen and sportsmen New Hampshire can produce, a man whose land runs to the shores of the pond, and who with L. J. Cheney has had the interests of this pond at heart more than any other two men in the State. They are the men who went to Sunapee Lake with the permission of Commissioner Hodge, and took *aureolus* for the purpose of stocking Pleasant Pond and did it at their own expense. I will quote a part of Mr. Sargant's letter which I have received to-day: "I am very much surprised that any one should question your letter in regard to the growth of salmon in Pleasant Pond, for it can be proved beyond a doubt by the people of New London, that they were never introduced prior to 1890. My own knowledge goes further than this, as I was very well acquainted with Mr. Powers, and he told me when speaking of Pleasant Pond, that he was never on, or very near it, but according to my description, would be a nice place for salmon. I heard him speak repeatedly of stocking Star, and think Sid (Mr. Powers's nephew) must remember if any other pond was stocked at that time. We have seen the growth of these fish from the time of introduction. And with different talks I have had with Col. Hodge, he said it was no uncommon thing, everything being favorable, landlocked salmon grew very rapidly. We have watched the brooks, and last fall was the first time spawning salmon was ever seen there, which proves conclusively that there had been no plant there previous to 1890."

Mr. Sargant also says: "We have taken but two sizes this fall; one ranging from 5lbs. to 7lbs. (evidently the plant of '91), the other from 7lbs. to 10lbs.—the first plant. Now, if they had been introduced fourteen or fifteen years ago—out of 35 fish taken there would have been a greater variety."

Another point I will make, these brooks running into Pleasant Pond previous to four years ago had always been open to trout fishermen, and we have never heard of a landlocked salmon being taken in these brooks. At any rate they are there in quantities, and no doubt there will be as good fishing there as in any part of the State while it lasts. Landlocked salmon in my opinion are the coming fish.

N. WENTWORTH.

### "Newfoundland As It Is in '94."

*Editor Forest and Stream:*

I should be obliged for space to reply to the remarks made in a late issue of your paper respecting a former letter of mine on the above heading, by the Rev. Moses Harvey, of St. Johns, N. F. Mr. Harvey's letter is to a certain extent a mere reproduction of former attacks made on me in the St. Johns papers, on account of what I said at a meeting of the Royal Geographical Society in London, his account of which differs very much from what actually took place (*vide* the journal of that institution).

Mr. Harvey very foolishly asserts that I know very little about the interior of the island, and adds that I only visit the high barrens, the hunting grounds. Well, but these high barrens are for the most part situated right in the interior. To get there, unless a man has wings he must traverse the lower portions. In this country the natural highway is up the rivers, which I have ascended and descended several times.

Mr. Harvey calls in the official reports to his aid. Now, these reports do not bear him out in some of his most extravagant statements, such, for instance, that "the great barrens in the interior are a splendid ranching country, equal as a cattle and sheep raising district to the foothills of the Rockies in Montana or Alberta," or "that this island compares favorably with Ireland or Scotland in natural resources." Now, I have yet to learn that official reports are necessarily free from error or even bias. Not that for one moment I wish to throw any doubt on the *bona fides* and honesty of the compilers thereof. Further, a man may be a good geologist, but not had much knowledge of practical farming.

Mr. Harvey, I perceive, has recourse to a plan sometimes pursued by an adversary for want of a better; he attacks my motives, which he tries to make out are of a sinister kind, a plan I think at once feeble and to be deprecated as by no means of a high order. He is kind enough to assert that my letter was instigated by indignation at the recent game laws, which limit the stags to five, not "six," and enforces a license. Now, so far from being averse to, I cordially agree with this law, as keeping out pot-hunters who formerly often came here, men who never held their hands but fired at anything on four legs; the license money is also much needed to provide funds wherewith to prosecute poachers, who are many, and kill deer out of season, etc.

I now come to a paragraph in the reverend gentleman's letter which passes the bounds of all fair controversy between two gentlemen, as being the publication of a gross and cowardly calumny, viz, that I, "some two or three years ago, with some friends, slaughtered some seventy or eighty deer on that island." A yarn somewhat akin that now circulated, and equally untrue, appeared a few years ago in the St. John (N. F.) press, and was contradicted by me in detail in one of the papers of that city, and it is not unreasonable to presume that the circulation and my denial came to the notice of Mr. Harvey. As Mr. Harvey says, I have visited Newfoundland for the last twenty years, not annually, as he with his usual incorrectness states, but on seven occasions, shooting. Now, during these seven trips only once did my own bag exceed eight deer (which be it noted is the limit now imposed by law); at that time my bag was eleven, but sometimes it only reached five to seven, had I wished it might have been more, and that when no game law existed. The largest number of deer ever killed by myself and a friend in one season was thirteen. I never shot with more than one companion. Since the new law I have been out twice and killed but five deer on each occasion. I never cared to shoot any but real big stags, and consider that half a dozen or so should satisfy any sportsman. So much for his attempt to discredit me as a true sportsman.

RICHARD DASHWOOD.

### "Forest and Stream" Fan Pedigree Blank.

FOR some time past breeders of dogs have demanded a pedigree form that would afford spaces for a more extended pedigree than those hitherto published. The difficulty has been in arranging a form that, while admitting the required extension, would be compact and not too large for mailing. This difficulty has been solved in the "FOREST AND STREAM Fan Pedigree Blank" which is so arranged that a dog's pedigree can be recorded for eight generations, and the spaces radiating from a center, the reader is enabled to trace at a glance the different strains which lead from sire and dam. Spaces are also provided for recording the name of dog, its breed, color, sex, breeder and address, dates of birth and purchase, from whom purchased, E. K. C. and A. K. C. Stud Book numbers and certification. These blanks are for sale at $2 per hundred, 30 cents per dozen, by the Forest and Stream Pub. Co., 318 Broadway, New York.

## The Kennel.

### FIXTURES.

DOG SHOWS.

1895.

Feb. 19 to 22.—Westminster Kennel Club's nineteenth annual show, at New York. James Mortimer, Supt.

Feb. 26 to March 1.—Mascoutah Kennel Club, at Chicago. J. L. Lincoln, Sec'y.

FIELD TRIALS.

Dec. 17.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.

### Beagles Shot.

*Editor Forest and Stream:*

It is with sadness I write of a most unmanly case by which I have lost two valuable beagles. I have hunted with them the past three years and was much attached to them. My custom has been for the past thirty or more years to visit friends and have a rabbit hunt on Staten Island, near Huguenot station. I have had permission from the late Larry Kerr to hunt on his farm and the adjoining land occupied by the Excelsior Fishing Club, and was also permitted to shoot by the adjoining farmer, Mr. Cornelius Andronet, of the shore. In fact, I have gone where I pleased over the land and swamps without let or hindrance. Between these owners a farmer has bought or leased a strip of land and is engaged in raising poultry. I was hunting with my beagles last Thursday week and was on this party's property for about two hours. He saw me with the dogs, but did not object or tell me I was trespassing. I saw them working around the house and they saw me with my gun and heard and saw the dogs. I looked for signs or notices on the trees, but saw none. (Permit me to say here, having hunted for years, I ought to know when land is posted. I never knowingly trespass on land when I see it posted, but go in a manly way and ask permission, which has seldom been refused).

My dogs were running a rabbit in a swamp, part of which is on this man's property, and about 600ft. from his dwelling. As the sun was going down I told my companion it was time to get home, especially as the dogs had lost the scent and stopped tonguing, and that the dogs would follow at the sound of the whistle. We left this man's property and then heard seven distinct shots from, as I thought, a revolver. I thought it strange my dogs did not show up, but started for home, calling for them. I expected the dogs would follow, as they would always take my track and follow home wherever I was staying.

In the morning, my dogs not having come in, I started to find them. One of the young men with me mentioned that a sign had been put up a few days back, which read: "Private Property—No Trespassing—No Hunting." This sign was about one mile from the house or the swamp. I soon found the farmer and apologized to him for unknowingly trespassing on his property. He then told me of this one sign. Also that he had shot two dogs the day before down in the swamp. I asked him to show me the dogs, and he led the way to the swamp. There lay my dog Lee, quite dead. The man said the other dog—Sedgwick—was further in the swamp, where we found him still alive. As I spoke to the dog he looked up appealingly with his beautiful hazel eyes, and I saw that the bullet had fatally wounded him, but this man seemed surprised that the dog was yet alive. I then asked him where he was when he shot the dogs. He replied on his house stoop, which is about 400ft. away. He then went home for his rifle and shot Sedgewick dead. After shooting the dogs the evening before he never went near them to ascertain if they were dead or merely wounded. I gave him my address and stated that I was a member of the National Beagle Club, and in all probability the club would take hold of this case.

Now, this man may have all the law on his side through having this one sign up about one mile away, but his land is open with only a fence here and there. If the law justifies him no sportsman's dog is safe from being killed. I cannot conceive why I was not told to leave the grounds when hunting, but he seems to have waited until I left for home, and then shot my dogs. I almost wonder that he did not take a pot-shot at me. I have given you the facts without any embellishments or falsity.

JOHN BATEMAN.

GRAVESEND BEACH, Nov. 5.

### Foxhounds at Providence.

*Editor Forest and Stream:*

I have been asked by my friends to tell about the foxhounds at Providence. I am an American and am proud of the fact, and a charter member of the American Foxhound Club. We have no American dog but the Boston terrier, and I am not in love with them. I see no reason why we cannot have a foxhound that any tyro can say at sight is an American foxhound, and the only way to do it is to get away from the English and the cross-road kind.

I do not claim the honor of being the first to recognize a distinct type of American foxhounds; it was C. H. Mason, who, when judging hounds as hounds, saw the general difference between the English and American, and he sat down heavy on the short ears and broad heads.

The head gives type and character, the best type we have is a distinct type. A narrow head, prominent occiput and long folding ears. Elite was the nearest to my ideal in the challenge class and I gave him first and I stuck right to that type to the end. Ranger II. is a fair dog, but too English.

We all know what a kicker Tom Aldrich is. Well, Tom did kick about Commodore. He said any dish-faced hound should be disqualified; and Tom was right. Who ever heard of any kind of dish-faced hounds?

Commodore lacks type or character, the same may be said of Tom Aldrich's Jowler; it had a short broad head, short ears and was shown hog fat; he would hunt for nothing but a soft place to lie down. Some of the dogs were good but too English, most of them were like Commodore and Jowler, just a cross-road type, for you can find that kind at every cross-road in the United States. They have no type, they are just hounds. It would make no difference to me if the High-Mucky-Muck or the King of Corea said they were a good type of American foxhounds, I would not believe them, common sense should teach any one better.

I am bigoted enough to think I have done my share for the good of working spaniels. All who entered dogs in my classes at Providence knew who was to judge, that I am a crank for type and that I have some ideas of my own and they took their chances. It came near being a serious affair to me, the Doctor wanted to have me hung, the Captain wanted me shot, the Dago wanted to cut me and the farmers to lick me; some thought they could talk me to death, but quit when they had to write it. Your "Uncle Dick" ain't dead yet, he expects to live to see good American type foxhounds and working cockers bred and win as they should at all the shows.

I wish to be distinctly understood that I am not now and never shall be a member of the Judges' Protective Trade Association. The boys can kick and kick all they want to, it does them good and don't hurt the judge, but I reserve the right to protect myself in the sporting papers, not through the A. K. C. Yours for type and work,

J. OTIS FELLOWS.

HORNELLSVILLE, N. Y., Oct. 27.

## THE U. S. FIELD TRIALS.

(*Concluded from page 430*).

### The All-Age Setter Stake.

THERE were a number of famous dogs in this stake of 18 starters. Of their high merit there is no doubt. This test at Bicknell is little of a criterion to judge by, as both weather and grounds were bad. The judges did the best that they could, and did well under the adverse circumstances.

Rodfield was easily first in the stake. His work was quite finished and high class in every respect. He ranged well and with judgment. His speed was uniform and well sustained, style fair. On birds he was quick, sharp and accurate, and he worked to the gun. In short, he was a sound worker and defeated his competitors beyond question. His game and skillful race was under the disadvantage of running with a badly cut leg which had not yet healed.

Blue Ridge Mark is well known. His range, speed and style were good, but his point work was a bit faulty.

Gleam's Sport was deficient in style. He was wise in his work, and accurate and successful in pointing.

As between Dan's Lady and Allene, the second prize winners, Allene was the sharper in her point work on single birds. Dan's Lady was the better finder and wider ranger.

Of the three which divided third, namely, Topsy's Rod, Minnie T. and Dan Burges, Minnie T. was much the better in her work on birds, she showing excellent ability to locate and point.

A bitch which showed excellent work on birds was Mattie.

It is probable that no field trial was ever run under more difficult adverse conditions. With judges of less skill, the stakes would have been mixed up and bungled beyond mending. The judges did remarkably well under the circumstances. All the work possible that the grounds afforded was gotten out of the dogs. That the competition was not more perfect was due to poor and insufficient grounds and bad weather.

Probably after this year the club will abandon its grounds at Bicknell.

Mr. Freeman had a dog in this stake. Mr. Kerr judged in his place.

The conditions and prizes were the same as in the All-Age Pointer Stake.

Following is the order of running:

H. H. Maberry's black and white dog Maberry's Gabe, L. G. Howell, handler, *with* Avent & Thayer's black, white and tan dog Tate (Jean Val Jean—Mamie Avent), J. M. Avent, handler.

J. M. Freeman's black, white and tan dog Dan Burges (Dan Gladstone—Lilly Burges), J. Mayfield, handler, *with* Blue Ridge Kennels' black, white and tan bitch Bessie Shoupe (Gath's Hope—Countess Rush), D. E. Rose, handler.

Major J. W. Renfroe's black, white and tan dog Gleam II. (Gleam—Tube Rose), Frank Richards, handler, *with* Avent & Thayer's black, white and tan dog Topsy's Rod (Roderigo—Topsy Avent), J. M. Avent, handler.

W. W. Titus's black, white and tan bitch Minnie T. (Dick Bondhu—Bettie B.), F. Richards, handler, *with* Blue Ridge Kennels' black, white and tan dog Blue Ridge Mark (Gath's Mark—Ollie T.), D. E. Rose, handler.

Arthur T. Ely's black and white bitch Mattie (Dick Bondhu—Bettie B.), Frank Richards, handler, *with* Blue Ridge Kennels' black, white and tan bitch Allene, D. E. Rose, handler.

Eldred Kennels' black, white and tan bitch Antonia (Antonio—Miss Nellie Y.), Geo. Richards, handler, *with* Manchester Kennel Co.'s lemon and white dog Gleam's Sport (Vanguard—Georgia Belle), A. P. Gilliam, handler.

Manchester Kennel Co.'s black, white and tan dog Gleam's Pink (Vanguard—Georgia Belle), A. P. Gilliam, handler, *with* Dr. G. Chisholm's black, white and tan dog Blue Dan (Harry Blue—Santa), L. G. Howell, handler.

Dr. Geo. Eubank's black and white dog Dan Bryce (Bryce—Dora Gladstone), L. G. Howell, handler, *with* J. H. & J. A. Hunter's orange and white bitch Daisy Hunter II. (Antonio—Daisy Hunter), J. H. Johnson, handler.

Theo. Goodman's black, white and tan bitch Dan's Lady (Dan Gladstone—Lilly Burges), J. H. Johnson, handler, *with* P. T. Madison's black, white and tan dog Rodfield (Antonio—Nellie Hope), John Mayfield, handler.

#### FRIDAY.

The weather was most disagreeable. A strong cold wind blew from the west, and a sprinkling of cold rain fell betimes during the forenoon. The sky was heavily overcast with dense black clouds. Every sign indicated bad weather, but toward noon the sky cleared up and the rain ceased. The afternoon was sunshine and cloud. The cold wind grew stiffer and colder toward night. Birds were plentiful. They were hard to work. On the whole, however, the work was better than on any previous day.

*First Round.*

MAYBERRY'S GALE—TATE.—Their heat began at 7:45. Tate was much the wider and faster ranger, though he appeared to dislike close work. Gale flushed twice excusably, a single bird each time, once down wind and once across wind. Tate got one point on birds. The heat lasted thirty minutes.

DAN BURGES—BESSIE SHOUPE.—At 8:26, they were cast off. Bessie going down wind flushed a bevy in open weeds. Each next pointed in corn; nothing found. Dan next pointed in open weeds; nothing found. One of the judges flushed a bevy and Dan pointed a remaining bird. Next Dan secured a good point on birds and was steady to shot. The heat ended at 9:25. Both were speedy. Dan was hard to control and devoted more attention to rabbits than was desirable. Bessie beat out her ground irregularly and her range was moderate in scope.

GLEAM II.—TOPSY'S ROD.—They were cast off at 9:45. Gleam made some difficult roading on a bevy which was running in weeds. He pointed stylishly and roaded accurately. The birds did not lie to his points and flushed wild. Next he roaded and pointed then roaded the bird to a flush in weeds. The dogs were widely separated. Topsy pointed near a fence in the open; nothing found. Topsy was much the wider and faster ranger, though Gleam covered a good deal of ground. Both worked to the gun.

MINNIE T.—BLUE RIDGE MARK.—They were cast off at 11:08. Both pointed in corn. Then they drew about, pointing betimes. Mark pointed the bevy in corn. At the same time, Minnie forty yards away pointed toward the same bevy. Minnie next took a cast in the woods toward where the scattered birds went and got a good point. In corn, Minnie roaded accurately some yards on the trail of a bevy which one of the judges flushed. She showed great precision and quickness in following birds. Mark made a point on a bevy and one on a single bird, after which he made a point to which nothing was found. Both ranged well, showed good speed and judgment, Minnie the better. Up at 2:02.

Lunch was served after which the competition was resumed.

MATTIE—ALLENE.—They were started at 12:48. Mattie pointed a bevy in the edge of a cornfield. The birds flew further into the field and were followed. On the scattered birds both did some excellent work in roading and pointing. On the opposite edge of the field Allene pointed a bevy. Mattie made a good point on a single in corn, at the same time Allene pointed and nothing was found. Up at 1:32. Allene was the faster and wider ranger. Mattie did not range independently at all times.

ANTONIO—GLEAM'S SPORT.—They began at 1:58. Gleam's Sport got a point on a single bird of a bevy marked down in open weeds; Antonio backed well. Antonio next pointed, probably on footscent. Sport next pointed a single bird, after which he found and pointed a bevy well in open weeds, and Antonio backed well. Each next made a point, to which nothing was found; and each backed the other's point. Antonio next got a good point on two birds. Sport was the better ranger and was better in bird work, though his style was poor. His pointing was accurate and fairly quick.

GLEAM'S PINK—BLUE DAN.—They started at 2:58. Pink made a good point in woods, and Dan going in, flushed it unintentionally. Dan made several false points during the heat. Pink flushed or pointed a single in weeds. One of the judges flushed a bevy in woods and it lit in an open weedfield. Pink got two good points on them. Don showed some unsteadiness to shot. Pink was much the better in every respect. Up at 3:55.

DAN BRICE—DAISY HUNTER II.—Dan pointed a bevy in weeds. On the scattered birds in woods Daisy made two or three flushes. The heat ended at 4:10 with the advantage in Dan's favor. Both ranged moderately well. Mr. Howell handled his dogs well and was observant and gentlemanly. It was his *début* in field trial competition. His dogs were outclassed, and no skill on his part could compensate for that.

DAN'S LADY—RODFIELD.—They were cast off at 4:27. A bevy was seen to flush out of heavy weeds, but the error could not be attributed to either dog as they could not be seen. Lady coming in pointed where the bevy flushed. There was some very good point work done thereafter. Rodfield made three or four excellent points on single birds, Lady made one good point on a single and flushed a bevy up wind in an open field, a most careless blunder. Rodfield made one point on footscent. He showed superior quickness and accuracy in locating and pointing birds, and his judgment was excellent. He was erect and stylish on his ponts, and worked out his ground quite skillfully. Dan's Lady was a pleasing worker, showing good speed and a merry manner, but her point work was faulty. The heat lasted 30 minutes.

#### SATURDAY.

The weather was most unfavorable. A light snow storm, a cold wind and a dark sky were the existing conditions at the start, but gradually the snow storm dissipated. The raw wind grew somewhat milder. Birds were not moving and were difficult to find. The conditions were unfavorable for good work. What with poor grounds and bad weather the test was quite unsatisfactory. Still the judges could do no better.

*Second Round.*

DAN BURGES—MINNIE.—They were cast off at 8:20. A bevy was found and was seen to flush, but whether either dog did it or not could not be determined, as the cover concealed the dogs. Up at 9:19.

BLUE RIDGE MARK—GLEAM'S SPORT.—They were started at 9:20. Both roaded in corn. Sport pointed a single in corn. Down 34 minutes.

TOPSY ROD—RODFIELD.—They began at 10:12. Down 33 minutes. Rodfield far excelled Topsy in sharp and accurate point work. He first pointed a bevy nicely in woods, and was backed by Topsy. Both were steady to shot. Rodfield pointed in open, and at the same time Topsy pointed; the former had a rabbit. Topsy pointed in woods, and it was said a bird was flushed near his point after he had moved on. Topsy again pointed; nothing found. Rodfield pointed; probably on foot-scent, as it was near where birds were marked down. Both were fast and good rangers.

ALLENE—DAN'S LADY.—A bevy was marked down in corn and was followed. Both pointed a bevy in corn and were steady to shot. Allene in the open pointed a bird nicely on ground almost bare. At the same time Lady pointed and nothing was found. Next, Allene made a good point on a single bird. Each made a point at the same time about 40yds. apart; nothing found. Up at 11:43. Each had good speed and range.

MATTIE—GLEAM'S PINK.—Off at 11:47. Each got a point on a rabbit. Mattie pointed a single bird by a fence in thick cover. Up at 12:20.

The running was suspended and the party went to lunch.

BLUE RIDGE MARK—RODFIELD.—They were cast off in open fields at 1:39, apparently to test their range. Both went wide and fast. Mark in the beginning pointed a bevy in open weeds, moved on to locate and flushed. Up at 1:48.

This ended the trials.

After reaching town the judges announced the winners as follows: First, Rodfield; second, Blue Ridge Mark; third, Gleam's Sport; fourth, Dan's Lady and Allene; fifth, Topsy's Rod, Minnie T. and Dan Burges.

B. WATERS.

---

## NEW ENGLAND FIELD TRIALS.

### Members' Sweepstake.

SOME men have a hobby in horses, others for football, while many derive pleasure from the companionship of their dogs—in fact, nearly every man nowadays seeks relaxation from business cares in some kind of sport. A number of sportsmen profess to enjoy field trials—they may if their dog wins, but it would require a very lively imagination for any one, winner or loser, to fancy he was enjoying himself at the trials just held by the New England Field Trials Club for the benefit of its members. Not that he would not meet a jolly lot of fellows and all that, such men you will find always and everywhere among sportsmen, but the grounds! It would be difficult to picture to oneself anything more discouraging from a field trial view than the territory which the club protects at Assonet Neck, Mass. Even in nice dry weather the working parts of the grounds are swamps chiefly, but to add to the discomforts this year, snow had fallen to the depth of several inches in some parts, and recent rains had flooded most of the low-lying ground. This was bad enough for dogs and men, but when you have more snow and heavy rain thrown in one must indeed be of a cheerful and hopeful disposition to extract any pleasure from following the dogs for two days under such conditions. This is not the fault of the club, it is their misfortune, for on this account the club will never assume that importance which its interests entitle it to, until these conditions are changed either by the selection of other grounds or a better protection of the birds.

The nature and lay of the country is such that really no true test of a dog's merit can be arrived at, either in speed, range or cover work. If the dogs do once in a while come across birds in the open they make at once for the swamps or very thick briery cover, where dogs have to crawl in and out, sometimes up to their bellies in water, and thus with such weather as we experienced last week, the setters especially are soon chilled through. Under these conditions, the ground being mostly gullies, swamps and upland, the range is very much restricted and the hunting simply a series of twisting and turning here, there and everywhere, so that really a slow, pottering sort of dog stands as good if not a better chance than the style of dog we wish to encourage at field trials.

Birds were fairly plentiful in the worst part of the grounds, but they were well scattered and were runners from Runnerville in that wet weather. Some birds were turned down the first day on the upland, but when we came across them in the Gordon Stake they could scarcely fly, several being caught by spectators and dogs.

On Monday evening, Nov. 12, the members and their friends met at the City Hotel, Taunton, and after a banquet the club held a meeting, when the draw for the Members' Sweepstake took place in the parlor. A convivial pleasant evening was afterward spent.

On Wednesday morning an early start was made, two barges conveying the company to the club grounds, eight miles away. Among those present were Ed Brooks, Hyde Park, Mass.; Dr. Heyward, John C. and A. R. Sharp, and C. W. Davenport, Taunton, Mass.; F. H. Miller, of the Bingham *Journal*, and Elisha Burr, of Bingham, Mass., the latter gentleman ran one of the dogs in the first heat of the first Eastern Field Trials at High Point; C. P. Curtis, Taunton; Joe Whipple, Central Falls, N. Y.; E. W. Amory, B. S. Turpin, Boston, Mass.; "Bob" Leslie, Lynn, Mass.; W. Tallman, Plainfield, N. J.; Harry Tallman, Greene, R. I.; L. E. Pearl, Hampton, Mass.; Chas. R. Taylor, Providence, R. I.; H. Merriam, Weston, Mass.; Samuel F. Roberts, Pawtucket, R. I.; Geo. W. Lovell, Middleborough, Mass.; Ames L. Orr, Dwight, Ill.; C. E. Davis, Boston, Mass.; D. A. Goodwin, Jr., Newburyport, Mass.; S. N. Ellis, Harwick, Mass.; E. S. Gordon, Attleboro, Mass.; J. S. Treen, Mansfield, Mass.; H. D. Babbitt, Watertown, N. Y.; H. B. Richmond, Lakeville, Mass.; E. Knight Sperry, New Haven, Conn., and a few others whose names we could not get.

Mr. N. Wallace, of Farmington, Conn., was the judge, and having experience with these grounds—he has judged here before—he was able to arrive at a pretty fair estimate of the dogs' work without wasting much time. He is very painstaking, and following the dogs close up he misses very little of their work. It is very certain that no other judge at a field trial in America has to work nearly as hard as one who assumes that position at Assonet. We have seen pretty nearly all the field trials grounds, even at Mitchell's Bay, Ont., and they are roadside rambles in comparison. No leather that was ever tanned could withstand half a day's sloshing round in these swamps, and the lucky wearers of hip-high rubber boots had often to carry those less fortunately provided across the deepest places on their backs. Oh! it was fun—but few shirked it after the first wetting. Anon some unlucky wight would slip and sit down in the slush; but no one envied him.

The dogs were drawn to run as follows:

W. C. Baylies's English setter dog Tennessee Vandal (The Corsair—Effie Hill), handler, A. R. Sharp, *with* Hobart Ames's English setter dog Rolla (Roderigo—M'Liss), handler, E. S. Gordon.

Geo. W. Amory's pointer dog Bounce (Bob—Sal), handler, H. Tallman, *with* Bayard Thayer's English setter bitch Polly II, handler, E. Brooks.

Hampton Kennels' Echo of H. (Don M.—Mac's Fly), handler, L. A. Pearl, *with* Oakland Farm's English setter bitch Our Pet (The Corsair—Schula), handler, A. R. Sharp.

Cohannet Kennels' English setter dog Kent II. (Count Howard———), handler, Dr. Heywood, *with* H. Merriam's English setter dog Freak (Rowdy Rod—Eve), handler, owner.

Hampton Kennels' Gordon setter bitch Jolly G. (Clark's Jake—Daisy M.), handler, L. A. Pearl, *with* D. A. Goodwin, Jr.'s English setter dog Bradley (Rowdy Rod—Breeze Gates), handler, E. A. Ellis.

Harry Dutton's pointer dog Duke of Kent II. (Tempest—Nadjy of Naso), handler, C. E. Davis, a bye.

#### TUESDAY.

*First Series.*

Heavy, dark clouds were hanging over the horizon, giving every indication of a snow fall; happily the promise did not amount to much, although at intervals during the day a drizzly sort of snow fell, although not sufficient to interfere with the work. The snow that had fallen days before did that, for it lay on some stretches of the ground from 3 to 5in. deep. The roads were hard as a brick from the night frost, and taken altogether the conditions for good scent and an enjoyable day were just about as gloomy as could be wished. The barges containing the members and visitors arrived at the grounds from Taunton about 9 o'clock, and a start was at once made with the first brace.

TENNESSEE VANDAL—ROLLA.—Down at 9:15 and working down to the inevitable swamp, at the edge of cover Vandal stopped on a single and was held for a back, but Rolla did not respond. Another bird was flushed by the judge. A lot of twisting work was done in swampy cover, but neither dog was able to find. Vandal got out to his work more intelligently, and cut out what little open work was done in a fair manner, and proved the faster of the two. It was at once apparent that the condition of the ground and the lack of open country precluded any opportunity for brilliant work. Up at 9:51.

BOUNCE—POLLY II.—These were put down at 9:53 in corn patch. Working over a swamp thickly covered on the hill at the edge, Polly pointed stylishly and held it until Bounce came up and completed a pretty picture with a stylish back; birds had flushed, however, and Bounce broke his back and worked round in front as Mr. Brooks went in over the hill into a likely gully, where Bounce pointed unsteadily; birds were running and shortly flushed, Bounce being steady to wing. After working around for some time in swamps and gully dogs were ordered up at 10:27. Bounce was under good control and seemed to hunt with some snap and vigor in spite of his low condition. Polly was inclined to be heedless, and had a will of her own. She had not the range and speed of the pointer. Several rabbits were seen in the gully and Mr. Brooks got some satisfaction out of the heat in bowling one over in good style.

ECHO H.—OUR PET.—Down at 10:39 in open on hill. The ground covered in this heat was mixed to a degree—snow-covered upland, ankle-deep swamp and bare ground. Birds were seen, but there was no actual bird work done. Our Pet, who is a known good performer, cut out what little open ground she met with in an able manner and was smart and intelligent in her endeavors to locate in the swampy cover work, and it was easily seen she would get another chance. Not so with Echo, who dilly-dallied round her handler and seemed afraid of either being drowned in the swamp or of losing herself.

KENT II.—FREAK.—Down at 11:05. Directly after starting Freak nailed a large bevy of "natives" and was steady to subsequent work. Working on the singles Freak nailed one and another got up in front of Kent, who was steady—he could not be otherwise; he is too sedate and circumspect in his actions. In thicket Freak acted puppyish on footscent, pointed once or twice, but failed to score. Taken out of woods after marked birds from this bevy Freak flushed and chased. On rising ground above, two birds got up to one side of Freak that he should have nailed. Snow began to fall lightly about this time, and soon after the dogs were called up. Time 11:27. It was a slow pottering sort of heat. The going, of a sort, was in Freak's favor, but he was slow and pottered round a good deal in cover, not being very sure of his nose. Dear old Kent II. did not like it at all. The snow bothered him, for he did not want to get his feet chilled; went along at a mincing walk most of the time and seemed as if he didn't want to rush his handler too much.

JOLLY G.—BRADLEY.—Down at 11:30. This brace livened us up a bit, for both got out to their work with some speed, especially Bradley. Down in swamp Bradley made a nice cast and swung round to a pretty point but spoiled his work by rushing in at the wild flush, stopping instantly, however, to caution. Bradly worked all round the other in open. Getting further into swamp Jolly G. had her turn and nailed the birds nicely, but Bradley coming across in front birds flushed, both steady. A lot of swamp was worked out, and all followers who were not provided with hip-high rubber boots were soon soaking wet. Then Bradley pointed a bevy at edge of woods out of swamp, which the crowd flushed. Birds were very wild and nothing was done on the singles, and dogs were called up at 12:40. Bradley had much the

best of it in speed and range and cut his open ground out more intelligently. Jolly was quite at home in the tangled cover, and though some may say she pottered a bit, still it seems her style is about what the conditions here require if birds are to be found. A good deal or it is simply in and out crawling through the briers and water-soaked sedge.

Lunch at the old barn and the hot coffee and several-years-ago chicken sandwiches kept us busy for a time.

DUKE OF KENT II. (a bye).—This was run with Our Pet, and they put up a fairly good heat. Going into swamp again, Pet pointed a single in a thicket and balance of bevy flushed. Into the open again both showed speed and range, Duke having the best of it, but did not hunt out the likely spots with the intelligence of Our Pet. This closed the first series, and Tennessee Vandal, Bounce, Bradley and Our Pet were kept in.

*Second Series.*

TENNESSEE VANDAL—BOUNCE.—Down at 2:08 in stubble. After covering considerable mixed ground Bradley pointed rather slouchingly at the side of a hedge and Vandal honored him stylishly, but nothing came of it. Crossing swamp and on the hill, Vandal pointed a fence rail. Some said there was a flush, but the nature of the ground made it difficult to see. The setter seemed handicapped by the wet and heavy going, while the pointer cut through in a rather snappy manner and had a little the best in speed and range, while his cover work was the more intelligent, and he was under better control than the other. Briers and thickets did not scare him.

BRADLEY—OUR PET.—Down at 2:48 in open field. Ranging over hills Bradley was first to score at the edge of swamp. Pet coming up to back, the dog moved and a bird flushed, then another, at which he was cautioned. Making a cast round the swamp Pet pointed stylishly on three, but rushed in at Sharp's flush. To the right Bradley roaded up to another but was not steady to wing. Taken out into the open they were called up at 3:04. Both dogs ranged far and wide but the cover work was in Pet's favor. Bradley was under best control, in fact there was little to choose between them. The judge knew just how they stood and announced his decision at once:

Our Pet, first; Bradley, second; Bounce, third.

We did not waste much time in congratulations but made for the barges and a sharp drive of, eight miles to the City Hotel at Taunton, brought us once more to comfort and civilization. Everyone was wet through and there was a great run on chest protectors which were served hot.

---

After we had dried ourselves thoroughly and partaken of a hearty supper, the word was passed round that the Gordon men were expected to meet in the paalor, where the filling and draw for the Gordon Setter Club's stake was to take place. It resulted as follows:

Hampton Kennels' bitch Jolly G. (Clark's Jake—Darby M.), handler, L. A. Pearl, *with* Noyes Billings's bitch Minnie T. (Ranger B.—Diana), handler, J. S. Treen.

J. B. Blossom's bitch Belmont (Dasher—Blanche IV.), handler, W. Tallman, *with* S. A. Nickerson's dog Count Noble (Ben Butler—Belle), handler, C. R. Taylor.

Alex. G. Cochrane's dog Mac's Paul (Don—Challie), handler, W. L. Striegel, *with* Dwight Kennels' dog Heather Lad (Heather Nap—Heather Rose), handler, A. L. Orr.

J. B. Blossom's dog Heather Bruce (Comus—Heather Bee), handler, W. Tallman, *with* Atwood Collins's dog Shot (Ben—Skylark).

Noyes' Billings's Range B. (Tom II.—Nora), handler, J. S. Treen, *with* J. B. Blossom's bitch Beaumont's Belmont (Beaumont—Belmont), handler, W. Tallman.

M. Jean Van de Putte, of Ghent, Belgium, and his dog Speck did not turn up, much to the regret of the visitors, who wanted to see in what language he would point. Herr Putte, it was said, had sailed on the Champagne that arrived last Sunday, but anyhow he failed to connect and missed a hearty welcome and a good deal of unwholesome physical labor that would have given him a wrong impression of America.

A pleasant evening was spent, Mr. E. Knight Sperry filling the chair most acceptably with beaming smile and generous hospitality. "Billy" Tallman was in good form and gave us some reminiscences of old field trial work "down souf," while Dan Goodwin's ecclesiastical recitation brought down the house. When we retired for the night it was raining hard.

## WEDNESDAY.

### Gordon Setter Sweepstake.

An early start was made for the long drive to the grounds, and though there was no rain the heavy clouds gave no promise of fine weather.

Mr. A. R. Sharp had been prevailed upon to judge, and he makes a capital one; his temper is accommodating and he was willing to allow the dogs every opportunity to get birds if they show the slightest inclination that way. Of this stake, as a whole, we must say that there were dogs entered which did, under vastly harder conditions than prevailed last year, work that was superior to that which was done in the last Gordon stake, and Mac's Paul, Minnie T., Ranger B. and Jolly G. are dogs that would hold their own with the best that have run on these grounds.

Shot did not put in an appearance, so Heather Bruce ran his bye with Minnie T.

Several of the dogs, for instance Heather Lad, did not seem accustomed to this choppy style of hunting, and were at a disadvantage. The weather was execrable. Fine when we started from Taunton, the dogs had no sooner been cast off in the first heat when it commenced to rain, and with little let up did so all day, thoroughly soaking us through before we had been going more than half an hour. There was some thought of postponing the running after lunch, but as there was little more to do, we kept at it, and finished early. The grounds were wet enough yesterday, but with the heavy rain during the night were more so to-day, and it would have been difficult even to imagine hunting under more adverse circumstances. The wind was northwest, but little of it.

*First Series.*

JOLLY G.—MINNIE T.—Down at 9:10 in cabbage field. After working in cover on bottoms we moved to upland and Jolly G. pointed, roaded a bit but could not locate—two birds flushed, and further on she pointed again on footscent. Birds were running and it was difficult to nail them close. A man with a hound had scattered the birds and they ran in all directions. Little more was done and dogs up at 9:50. The hunting conditions were so poor that little test could be made of the dog's capabilities. Jolly G. had the best of it in range, speed and style, but Minnie did better in cover.

COUNT NOBLE—BELMONT.—Down in stubble 9:58. Count Noble was seen to have the speed and range though at best both were limited, Belmont notwithstanding her years and obesity was able to keep up a fair gait. Getting into cover, Count pointed and Belmont swinging round, 50yds. further on in the open pointed and roaded the running birds that were seen. Then Noble got in ahead and flushed and chased the birds. Following the marked birds Count pointed on footscent and birds afterwards flushed from the trees—as we passed beneath. Neither dog did good work and were not under good control. Belmont while not ranging so well was fairly wise in the work and showed better nose. Up at 10:25.

MAC'S PAUL—HEATHER LAD.—Down at 10:30 in pasture edge of woods. A lot of open and mixed ground was covered, both dogs getting out fairly well, but Paul showed more judgment in his casts, while Lad came back to his handler too often. Crossing the "prairie," a wide, bare stretch of exposed fields, gave them chance to show their speed, but they did not take advantage of it. Down in a hollow in hedge Paul pointed a bird and Lad, called up to back, did so. Paul, sent on to locate, caught the bird, which could not fly. It was one of the lot turned down yesterday. We met several of these during the day, and they reminded us of the first year's trials. Bob Leslie caught one of the birds. Further on a few yards Paul nailed another, and Lad coming up, refused to back and walked all round the pointing dog, who held steady on a weak bird that was found just after. This was poor work for Lad and destroyed his chances. All the work was clearly in Mac's Paul's favor, and besides, he showed a useful familiarity with the style of country. The Heather Bruce-Shot heat was called next, but Shot did not respond, so

RANGER B.—BEAUMONT'S BELMONT were put down at 11:15 in open ground. Beaumont's Belmont at once made a wide cast of half a mile and gave us the only taste of so-called "high class" ranging seen during the trial; after her spurt she was more amenable but did not heed her handler as she should have done. She has been trained in the South and was only in Mr. Tallman's care a few days. Ranger B. ranged out quite snappily and with wisdom; he is familiar with the country and knows where to look, but was rather unlucky; getting into thick swamp birds were seen running and one flushed ahead of B. Belmont, and at edge of corn another flushed as B. B. went through the thicket. Then after B. B. had passed along Ranger nabbed the running birds; these were some of the poor weak ones spoken of. Ranger pointed again but B. B. instead of backing walked round him and came up to him as Ranger left his point, and directly one of the weaklings made a flutter and Ranger chased a yard or two and grabbed it, but stopped to command; rather excusable, however, under the circumstances. A lot more ground was covered but nothing transpired. Up at 12:15. Ranger was much superior in style and intelligent seeking, and as his work was only on those turned down birds that give little scent yet, he should have had another chance, as he was clearly the most finished worker in the stake. B. Belmont will be spoken of further on.

HEATHER BRUCE, A BYE—Running with Minnie T., they were put down in open at 1:03. Getting to the swamp again Minnie pointed and birds flushed wild, being marked to the hillside, where Bruce was found on a sort of point in thicket, or stopped on a flush, as the birds were seen to flush immediately before. Minnie roading, the birds flushed wild again and a lot of backing and filling was done with no decisive work, until getting over a ridge Minnie drew carefully to a point on five birds, which her handler flushed; steady to shot and wing. In fallen trees Minnie exhibited a good deal of "local" sense, for calmly scanning the top branches and seeing nothing, she roaded carefully through thicket to a point, but bird was running and was put up to one side. Minnie did nearly all the hunting, Bruce sticking to his handler and showing little inclination to hunt. Up 1:39.

*Second Series.*

MAC'S PAUL—JOLLY G. Down in stubble at 1:50. Both ranged out well though Paul's range showed better system, cutting out his field nicely. While down in swamp Minnie T. on chain with her handler winded birds on the bare open stubble and the heat dogs being called up Mac's Paul made a couple of good, wise casts and swinging in across wind stiffened stylishly on a large bevy which his handler flushed. This was a good strong covey of "natives." Jolly G. backed indifferently. After the scattered birds in swamp Jolly pointed and Paul honored her but nothing was found; but sent on to locate she did so nicely and both were steady to shot and wing. Then Paul swung round and located another. Leaving there we worked through swamp and upland for some time and dogs finally up at 2:30.

The stake was practically decided now, but the judge was prevailed upon to give Beaumont's Bellmont who had come with something of a reputation, though the reason was not apparent to the naked eye, another chance on birds to see if she would point. A bevy had been marked in open and she was worked to it, but as she was in swamp below birds flushed from the field above, and she was never able to locate afterward, though given every opportunity. The judge flushed one at edge of orchard. The bitch instead of working through a thicket where the birds here are likely to be, would run round it, shirking her cover work almost entirely. She seemed to have no nose, and if she did not smell the money it was no fault of judge or handler, they gave her every opportunity, displaying much patience, wet through and running over as we all were. Called up at 3:20, and walking a mile to the old barn the judge rendered his decision to the bedraggled company: Mac's Paul first, Jolly G. second, Minnie T. third.

Mac's Paul's win was a popular one and he deserved it, and had the judge seen all of Minnie's work, I think she might have displaced Jolly. Ranger B., who as far as manner of hunting and sense displayed was the peer if not superior to anything in the stake, and by comparison high class should have had another ten minutes when we struck the good strong birds. As working on these marked birds was no fair test, still in the work actually done the judge's decisions are entitled to respect.

The boys were only too glad to bundle into the barges and start for home and dry clothes, vowing once more never to walk over those grounds again. But we shall all meet there again next year if nothing happens. H. W. L.

---

### The Rutherfurd Fox-Terrier Sale.

A GOODLY crowd assembled at the American Horse Exchange, New York, on Fridey, Nov. 16, attracted by the announcement that Messrs. L. & W. Rutherfurd would dispose at auction of a draft of their well bred terriers. Mr. William Easton handled the mallet, but even his well known persuasive powers failed to bring the bids up to anything like the proper values. It must be said, however, that with few exceptions the draft was an ordinary lot, many of them being on the coarse side. The majority were whelped this year. The highest price obtained was $32, for a Warren Safeguard—Warren Daisy bitch pup with black and tan markings on one ear, and whelped May 2, 1894. She now belongs to Mr. C. D. Bernheimer, of New York. A dog pup, whelped Jan. 23, 1894, with the Safeguard markings, by Warren Safeguard—Warren Pansy, she by Pitcher, brought $25 from Mr. J. R. Kennedy. A litter sister to Mr. Bernheimer's purchase brought $22. Two Safeguard pups went for $14 each, and a dog pup by Charlton Verdict—Refuge, brought $18. The balance ranged from $11 to $1, several being sold for almost the price of chain and collar. Reprieve, by champion Result, and dam of Warren Regent, and Warren Pansy, by Pitcher, dam of Warren Romper and Prancer, the winning pup at the Terrier show, were cheap at $7 and $5 respectively Mr. A. C. Bradbury picked up a bitch by First Flight—Refuge, a sure breeder, for $4. In all the sale brought $261.50 for twenty-nine sold, an average of $9.

---

There was some discussion at the New England Field Trials about white on a dachshund and the amount that would pass without being penalized on the bench. The cause of this was Mr. Manice's Princetta, who had white on forefeet, and our contention is upheld by a little correspondence now going on in the *Stock-Keeper* (Eng.) on the same point. That journal remarks that German judges inform them that, "except a little touch of white on the chest, that marking is most objectionable in black and tan, red or liver-colored dachshunds. Some judges will shut their eye to a speck on the hind toes, but after that all tolorance should end, and white shirt fronts, white on heads and white feet should be barred."

## POINTS AND FLUSHES.

*[By a Staff Correspondent.]*

IN FOREST AND STREAM of Oct. 6 I noticed Mr. Wells's kindly expressed explanation concerning the matter of his decision of third prize in the All-Age Stake of the Manitoba Field Trial Club's trials.

I had no intention to join issue with Mr. Wells in reference to his decisions. I beg to show him that he wrote the following under a misapprehension: "As to Mr. Waters's contention that Ightfield Diana should have been in third money," etc.

The paragraph itself, which Mr. Wells refers to and which was a part of the report of the Manitoba trials, published by FOREST AND STREAM, was as follows: "I fancied the two pointers, Ightfield Diana and Tick Boy, for third, they being her superior in judgment, range and work on birds, taking one heat with another, though she (Allene) excelled in style."

This was advanced simply as my opinion, and not set up as a contention against the judge's decision.

In this connection, I desire to reiterate what I wrote in my report of the trials, namely, that Mr. Wells handled the stake with great skill, was painstaking, and his decisions were well received. When a judge, single-handed, can decide two stakes with so much credit as Mr. Wells justly won for himself at the Manitoba trials, it is difficult to bestow proper praise without appearing fulsome.

Mr. Stoddard, in a letter published in FOREST AND STREAM of Oct. 27, a letter which I trust is happily auspicious for a better future in respect to kennel literary contributions, since it is kind and tolerant, adverts to the flush and chase mentioned by Mr. Wells. He explains that the flush was across wind, and that Tick Boy marked the bird and followed it. I remember well this circumstance. Tick was roading a running bird across wind. The bevy had split up. The dog's work then was most difficult. The remarkable feature, in my judgment, was that he did it so well. The flush I considered as almost unavoidable and of no importance whatever as an error.

This must not be construed as any contention in regard to the decision. Mr. Wells is a gentleman of experience in such matters, and of unquestioned integrity. When a gentleman has proved himself competent and reliable, a difference of judgment is simply a difference of judgment. No reporter should attempt to override the judgment of a gentleman so experienced or as competent as himself. Still a difference of udgment does not impugn a decision in the least.

### Field Trial Reports.

Apropos of nothing at all, I realize clearly that reporters may make mistakes, they being mortal, too. If there were nothing else to show in support of this view, the fact that their opinions differ from each other betimes would be evidence enough. No doubt there is room for improvement. The mere act of taking a pencil in hand and making notes does not clothe the reporter with the functions of a court of last resort. The *ex cathedra* tone of some of the field trial reports of past years was not well taken. In a few of them there was no justification for the arrogation of the power of final review and readjusting of the judge's decision. As a matter of opinion, differences were not improper. This, in respect to reports in general. There have been, however, a few instances in which sharp criticism has been just and wholesome, and where the soundness of decisions has not been beyond question. But the times have changed. The old cast-iron, unsympathetic standard of reporting, applied indiscriminately to all alike, is out of place in the present day, for the judges are in most instances thoroughly trained. No judge can hope to succeed if he is inexperienced. It would be just as reasonable to assume that he could sail a ship, or manage a bank or a railroad without any special training, as to assume that he could judge without any experience. When a reporter comes across a gentleman in a saddle who is incompetent from inexperience, natural unfitness or indolence, there is then a just subject for criticism. Neverthe less, criticism may be just without being caustic or peevish. Where a new club is holding its first trials and the judges are new, a reporter may have in some instances greater knowledge consequent to longer and wider experience. This, however, is less noticeable with each recurring year, since the field trial patrons and judges are now quite thoroughly trained, and expert in their duties.

### Barring All-Age Winners.

Mr. Wootton, Sec-Treas. of the Manitoba Field Trial Club, did me the honor in FOREST AND STREAM of Oct. 27, to reply to my comments on opening the club's All-Age Stake to All-Age winners which had not won two firsts in All-Age stakes. His reply impressed me as being imperfect. He considered but a small fragment of the matter. His argument is entirely *ex parte*; it is from the standpoint of the man who owns a first-prize winner, though I do not imply that because Mr. Wootton, Mr. Ellis and Mr. Avent own first-prize winners that such interests are the grounds of their arguments. I mean simply that the argument is one-sided, from the standpoint of the owners of winners, not from the standpoint of the best interests of all concerned, namely, the club members who put up money and do the work, the amateur who pays in his fees and competes for the love of the sport, and the professional, who engages in the competition as a detail of his business.

There are more interests to be considered than those of the men who own some first-prize winner.

As the matter is of some importance, I will take up Mr. Wootton's reply in detail. He being the secretary of the club, no doubt the views he published are the official views of the club.

He says: "I am and have been for years in favor of allowing a dog two wins before being disqualified, and I think that I am safe in saying that three-fourths of our members who attend and take part in the trials are in favor of it."

Now, how many "members attend and take part in the trials?" Would not from four to six be the correct number? How many do not attend and take part? Should not the wishes of those who do not attend, be considered?

But Mr. Wootton's main plea is in the following: "Why bar a dog from competition after winning one first prize? If he can repeat his performance under another judge and with the same and other dogs in competition, we are fully assured of his quality, and it gives us a chance to know more about him before breeding to him. Many times there is little or no choice between the first and second dog in a stake. If you bar one, why not the other?"

Has not a dog proved his quality when he wins one first prize in an All-Age stake? If the first win proves nothing conclusively, what constitutes the potency of the second win? Why not insist on a third or fourth win, etc., to determine the dog's quality? In what manner do two wins fully assure one of a dog's quality? There are more than the wins to be considered in breeding to a dog.

Mr. Wootton shows the extreme difficulty of a dog winning twice, when he says that there is little difference between the first and second dog in a stake. The first-prize winner might compete all his life and never win again when competing against able other first-prize winners besides other competitors. If breeders wait till a dog has won two firsts in an All-Age stake before breeding to him, the list of available stud dogs will be exceedingly limited. There is but one such important All-Age stake, I think, wherein a dog can get two wins if he can and that must serve for competition for its winners and the winners of all other All-Age stakes, some half-dozen in number, to score the desired two wins in

it. Winners are barred from all other All-Age stakes after one win, therefore the Manitoba Club's stake is the only one in which they can compete.

Mr. Wootton asks why, if the first prize winner is barred, the second prize winner is not barred also, since they are nearly equal in quality. The answer is simple. First, second, third, fourth, etc., may be equal. The equality may be apparent to those who witness the competition, but it is not at all apparent in the records. To those who go by the records, and such men are of the great majority, the winner of second is a defeated dog; the winner of first is undefeated. The undefeated dog is the one which the amateur dislikes to meet. The amateur is the gentleman who is a club member, who generally pays the current expenses of the club, guarantees the prizes and gives full moral support to the management, or participates in the competition. It is of some importance why club secretaries should know the reason of these things. Let any one take up the records of ten years ago and determine from the records if second was equal to first.

Mr. Wootton asks why a dog should be barred after winning one first prize. That point I touched on fully some weeks ago. A win establishes that a dog has to a high degree the quality of a working dog. If he, after winning, is permitted to enter into future All-Age competitions, he thereby deters owners from entering their dogs in those competitions. Clubs must have a certain number of entries to warrant them in holding trials. An All-Age winner cuts down the entries if he competes.

A dog competing continually does not add materially to the knowledge imparted at the time he first won. Moreover, he may have competed a number of times before he won first. The life of a dog is short at the most. New material must be constantly coming to the fore to replace what is lost by old age, disease and death. There, too, must be abundance of material for the vast breeding interests to select from. Permit the winners to compete and the breeding interests are "cribbed, cabined and confined."

The second win is not necessary as a measure to determine whether or not a dog is worthy of being engaged as a sire. The sportsmen's journals give quite full criticisms of the dog's work, his faults and excellence, and there is ample opportunity at a trial to see him work in private if a breeder so desires. Still, there are a few things to consider in breeding, over and above a dog's winnings. Some very ordinary performers have proved to be excellent sires, and some excellent winners were not satisfactory in the stud. The record as a sire and the record in pointing quails may be widely different.

Again quoting from Mr. Wootton: "He seems to forget that for the two years—1891-2—our All-Age Stake was open to the world without any restrictions, yet Mr. J. M. Avent, with two champion dogs entered—Orlando and Novelist—only secured third place with the latter, Mr. Ellis's Duke of Manitoba getting first and Betty S. second." That might be a good argument were all the years after 1891-2 to have the same field trial conditions. As matters stand, it is not well taken. That instance was but one transitional stage in the club's progress. The club's trials at that time were not so well known, advertised or patronized as they are at present. There was then a good deal of local enthusiasm and support from an amateur element.

In 1892, the Derby had 8 starters, of which 3 were owned by Mr. Avent, and he was the only expert professional handler in that stake. Mr. Pickering, who also handled in it, was a resident of Manitoba, and had not one-hundredth part of the experience of Mr. Avent, so that the latter in this connection may practically be considered the only professional expert handler present in that event.

The All-Age Stake had 13 starters, of which 4 were owned by Mr. Avent. Except him the handlers were amateurs. They may so be classed, Mr. Avent's dogs were Novelist, Betty S., Orlando and Rupert. Thus, out of the 13 starters, 9 were owned by amateurs.

Is Mr. Wootton sure that leaving the All-Age Stake open to winners was a benefit to it then?

But he seems to forget the next year. In 1893 the professional element was but little stronger, yet in the two stakes, all but one-half of third in the Derby went to one handler. The All-Age Stake was won by dogs of some reputation, namely, Count Gladstone first, Chevalier second, Betty S. third. This strongly sustains what I advanced in a previous article, namely, that a stake without any restrictions is at the mercy of dogs with records or dogs of sufficient merit to campaign. Mr. Wootton should follow the records of all years; one year does not prove all.

Let us come now to the club's trials of 1894. Of the 15 entries in the Derby, 10 were handled by expert professional handlers of national reputation in America, namely, Capt. McMurdo, Messrs. Rose, Avent, Spracklin of Canada, J. Armstrong, an expert handler with a successful reputation in England; then came Mr. Pickering, who had acquired a good deal of experience in the trials, and who is a professional trainer and field trial handler. I do not make any invidious distinction against Mr. Pickering. The comparison is in no wise a reference to skill; my aim is to show how the club drew to itself the strongest professional element of America. The only two amateur handlers in the Derby were Messrs. Wootton and Ellis.

In the All-Age Stake there was not one amateur handler.

The All-Age winners were all dogs which had reputations before that competition. First, Brighton Tobe; second, Topsy's Rod; third, Allene. With such records staring them in the face, is it probable that the amateur can keep up his enthusiasm and support? Now, wherein are the conditions of 1891-2 at all similar to those of 1894?

Were there not enough of second and third prize winners and dogs with reputations as competitors, without letting down the bars to all winners? It should be borne in mind that each event was a stage of transition. In 1895, with fewer restrictions, there will come in still many more dogs with records. The amateur will lose interest, will stay at home and will withhold his contributions. As the campaigners come in and make the stake more difficult, the amateur makes it easier for himself by going out. A stake under the present conditions of that of the Manitoba Club is a cinch for the professional.

Mr. Wootton's reference to the Waterloo Cup is hardly pertinent. There is no parallel, save that both events are competitions. The Waterloo Cup is a big stake. The prizes are large. The number of entries is large and assured. Breeders of greyhounds in England are in hundreds. Dogs of poor quality are killed. There is an abundance of good ones left, and from these the very best are called. But in coursing, only two qualities are necessary, speed and ability to stop and turn quickly, powers which all dogs possess in common and nearly alike. Intelligence in the greyhound is not desired. Education is unnecessary. It is a competition wherein from the abundance of good material and the simple test of speed and power to turn short, all dogs are nearly equal.

But in a field trial, all is different. The dog's intelligence, elaborate education, functional powers of nose, speed, experience and skill in working to the gun, are all elements of the competition.

There is not an abundance of material in respect to setters and pointers from which to select. Owners must run what they have. It is unnecessary to go into the particulars of the great value of a win in the Waterloo cup event, its importance in the betting world and the humble value, comparatively, of a field trial prize with its non-betting features.

Mr. Wootton misunderstood my reference to the trotting and running competitions. I realize that they are simply a test of speed. That I did not refer to. I referred to the fact that a horse was in some way protected by classification or weight. The manner of judging them is another affair. For instance, how many horses would enter in a 2:40 class, trotting event, if it were known that there were three horses in it which could trot in 2:10? Supposing all horses trotted in one class, no weight or time handicap, how many races would there be? I referred to these as a principle of handicap which obtains in one way or another at all competitions. At field trials, the only protection is to bar All-Age winners.

In conclusion Mr. Wootton says: "Should we find the new rule to work injuriously, it will be quite easy to change it another year," etc.

It is quite easy to change the rule if it is found that it works an injury, but it is not at all easy to change public sentiment. A rule may be changed and public sentiment may not change for a decade thereafter. I only advance these ideas for consideration. What the club in its wisdom may do, I consider well done, from my personal standpoint of viewing it. From a field trial standpoint I think they are wrong. I have a belief that the causes which in the States produced certain effects under certain conditions will do the same in Manitoba under like conditions. Once drive the amateur out and he does not return very numerously. Simply changing a rule does not revive the enthusiasm which is gone. It is much better to go right than to make experiments.

---

Mr. D. F. Pride, once a resident of Chicago, but now a resident of Santa Ana, Cal., leaves for his home to-night (Oct. 27). Mr. Pride was one of Chicago's most popular trap shots. Time has not dimmed the friendships he has made. He never was a good dogman, but we cannot lay that up against him. No man can travel the circle of the sciences at once. I can only say he is a first-rate shot and a gentleman.

---

Messrs. Adams, Harris and Madison were appointed a committee to investigate grounds in Kentucky, Elizabethtown and vicinity, for the next fall trials of the United States Field Trial Club. The grounds at Bicknell were not favored by anybody.

---

Mr. Madison was the recipient of most hearty congratulations over the victory of his excellent setter, Rodfield. He took his honors modestly. Everyone seemed glad that he won. Rodfield was so far ahead of the rest that his victory was palpable to everyone before the decision was announced. Mr. Madison has been a hard worker in field trial interests, and has been largely the life of the U. S. F. T. Club from its inception. Let us hope that his good luck will continue.

---

Mr. Norvin T. Harris of St. Matthews, Ky., has bought of Mr. J. M. Avent the bitch Cynosure, which has made so good a showing in the field trials this season. She possesses excellent natural qualities and needs only more experience to make a first class performer. If the signs indicate that Mr. Harris will again give field trials his support, field trial sportsmen can congratulate themselves on the occurrence. Mr. Harris also bought Tone Boy, a puppy of much promise.

---

Mr. H. Hulman, Jr., of Terre Haute, Ind., has announced his intention of withdrawing from active kennel interests. He has for many years been a chief owner in the Blue Ridge Kennels, and therefore a strong supporter of field trials. Wherever there was good competition the dogs of the Blue Ridge Kennels could there be found. That they owned and bred winners the records will readily show. Their victories in the past few years are too recent to recount, for they are within the knowledge of all who are interested in field trials. Their dogs are now all for sale. The withdrawal of Mr. Hulman leaves some gaps in field trial interests—an important one in respect to the competition, but a greater one in the ranks of the true gentlemen sportsmen. B. WATERS.

909 SECURITY BUILDING, Chicago.

### Eastern Field Trials.

NEWTON, N. C., Nov. 19.—*Special to Forest and Stream:* The Members' Stake of the Eastern Field Trials Club was an excellent one both in numbers and quality of the competition. The handling was a model of finished skill, far excelling that of professional handlers. There were ten starters, members being permitted to start any dog or dogs they chose, regardless of ownership. Keen interest was shown in the competition and its results by the visiting sportsmen. The work was remarkably free from errors. A. B. Duryea handled Roi d'Or and Lochinvar, F. R. Hitchcock handled Sandstone and Topaz, Pierre Lorillard, Jr., handled Leonar, Antoinette and Lady Araminta, W. B. Mears, Jr., handled Linwood and Joyful, and J. E. Orr handled Shot. The judges were S. C. Bradley and W. S. Bell. N. Wallace will be present to judge the public competition which begins on Wednesday. The weather was pleasant and birds in fair numbers. Quite a number of prominent sportsmen are in attendance. The trials promise to be a great success. B. WATERS.

## DOG CHAT.

Mr. W. W. Brown of Springfield, Vt., in placing his new purchase, the well known Irish setter Henmore Shamrock, at public stud through the medium of our business columns, takes occasion to inform us of his plans in regard to the breed. He is just starting a kennel of "reds" and has completed commodious kennels of the most modern style and has a competent kennelman in charge. Although Shamrock's services are placed at the low fee of $15 there are few dogs of the breed that are better bred, as he is by Muskerry, sire of Signal, Blue Rock, Tearaway, etc., out of Avoca, thus tracing back to Champion Bob, Palmerston, Dash, Rake, etc. Shamrock has the further advantage of being well broken and a good fielder. Mr. Brown also purchased from Mr. Cheney the bitch Onota Peg, third in novice class at New York this year, and she will be shown next spring. Mr. Brown is also thinking of purchasing Rosamond from Dr. Jarvis and with a young Kildare bitch and three or four Elcho brood bitches this gentleman seems to have made a judicious start, and we shall hope to hear of nothing but success.

---

Mr. H. F. Longnecker of Allentown, Pa., has sold the pointer King of Hessen (32,924) to Dr. J. M. Hoffman of the same place.

---

We have received a copy of a new kennel journal called *Dogs*, which is published by the Stock-Keeper Co., 77 Fleet street, London, E. C. In welcoming this little twelve-page paper we may say that it is intended to explain the devious ways of dogdom to the uninitiated and cater to the one-dog man rather than meddle with the "fancy," which to-day is so well looked after by the present journal, the *Stock-Keeper*. *Dogs* is intended to encourage the love for dogs among the populace, treat of their home life and guide the novice into the realms of "fancy" by pointing out that a well bred dog costs no more to feed than a mongrel. A pretty picture by Moore enhances the appearance of the first page. There is a large field for such a journal and its progress will be watched with some interest.

---

"Canada Gray" went home in good running condition and found lots of inquiries for Buckshot and Nell R. breeders. He can now ruminate through the long Vermont winter on the good time he had, and the fact that his team won two seconds and a third at Oxford, and three firsts, two seconds and a third divided at Hempstead. After the latter trials he stayed a day or two with Mr. H. L. Kreuder, and they say the Nanuet cottontails are stiff yet, from the hustling the Vermont dogs gave them.

---

Mr. C. O. D. Iselin, of New Rochelle, N. Y., purchased a couple of prize-winning Dalmatians in England. They will be used for carriage work and will be shown at New York next spring. They are said to be very handsomely spotted, clear and round. The odd specimens of the breed that have appeared at dog shows in past years were not up to form, most of the spots running in, and the sight of a brace of really good ones will probably bring the breed into better favor. They certainly add tone to a stylish turnout.

---

Mrs. Jagger's noted St. Bernard bitch Wandley Stephanie had a good innings at the Crystal Palace, taking first in winners, first in open and the championship prize, and finishing up with the St. Bernard Club's 100 guineas cup for best bitch in the show.

---

Dr. Sherwood, who was installed as the FOREST AND STREAM veterinarian when he arrived from England, is, we are pleased to hear, making rapid strides in his profession. He was one of the "vets." at the big horse show just held in this city, and it is probable that he will be attached in a similar capacity to the S. P. C. A. He deserves his success.

---

We regret to hear of the death of the well known mastiff Cardinal Beaufort, owned by Mr. Lynn, of Port Huron, Mich. The dog was purchased from Mr. James Whitney by Mr. E. H. Moore while the latter was in England three years ago, Mr. Lynn getting the dog at the dispersal of the Flour City Kennels.

---

The Kennel Club Show at the Crystal Palace was notable in many varieties. Bloodhounds are increasing in the number of owners, according to the *Stock-Keeper:* "Mastiffs produced a sensational new light in the brindle Peter Piper (Tom Bowling—Selina), exhibited by the breeder, Mr. Woolmore. St. Bernards, which we reported at great length, did not bring out an unexpected star. Newfoundlands are somewhat stationary, and the interest in Great Danes continues to lag. Deerhounds, as our reporter noted, are returning to public favor, and Borzois were a noble collection. The sporting classes did much to retrieve the ground lost by the Kennel Club at their previous show. Collies utterly lacked excitement. Mr. A. C. Jackson beat the record in bulldogs, and no entry was more interesting in detail, Mr. Sellon's and Mr. Shirley's new faces coming in for considerable attention. Bull-terriers hold their own. Charwood Marion was the talk of the fox-terrier men. The Skye terrier benches did not lack visitors, whose curiosity has been aroused by recent correspondence. The schipperke display was a victory for the Belgian type, but the other little dogs in that quarter of the show were not up to the average, on account of the dissatisfaction of owners with the classification provided.

---

We learn, unofficially, that at the advisory committee meeting held at 44 broadway, New York, Nov. 14, the Ben Lewis case was dismissed, as, Mr. Watson's witnesses not putting in an appearance, he was helpless in the matter. Lewis had several witnesses on his side. In the Bell case the committee decided to disqualify him indefinitely. In regard to the Howard bribery case Mr. Howard will not be considered as a delegate to the A. K. C. any more.

---

At the Northampton show, recently held, the special for best in show fell to Smith & Baker's St. Bernard Duke of Florence, Mr. Redmond's fox-terrier debutante Dame Fortune getting the reserve card. At the same show report speaks well of another young dog that came out, Vincet, by Venio.

---

Mr. Ellis is willing to lend his noted bulldog Guido for the purpose of another gentleman making a match between that dog and Mr. Raper's Rustic Phenomenon. Guido's backer is willing to lay $500 to $250 on his chance.

---

Not only has Mr. Jos. Lewis sustained a severe loss personally through the death of his beagle dog Robino, but the beagle breeders who were so much taken with the dog and intended to breed to him will feel the loss, too. It seems that the dog was in Mr. Louis Contoint's care, and he was about starting with the dog for Moodus, Conn., Mr. Lewis's home. A young man was exercising the dog in the street and it is said that a butcher boy with malice aforethought drove deliberately over Robino, injuring him fatally, the dog dying the same evening, Nov. 10. All concerned were much cut up over Robino's sudden death and Mr. Lewis has instituted proceedings for $250 damages. Mr. Lewis has our sincere sympathy, for having only recently purchased the dog he can ill-afford such a loss. A number of services had been spoken for. It will be remembered that Mr. Mortimer brought Robino over from Mr. Joachim's kennels just before the Providence show. Breeders still have Ringleader, whose merits as a stock dog we reverted to last week. Miss Kreuder's Blanche, that did so well at the field trials, was to have been mated to Robino, and Mr. Reed was sending his Nell R.

---

Mr. C. A. Pratt, of the Argyle Kennels, Little Rock, ha imported the rough-coated St. Bernards Le Prince and La Princess, by Young Bute out of Rustic Beauty. Both the new-comers are well known in Great Britain, where the Prince has just won the championship at Edinburgh, and the Princess has taken many firsts. The dogs were seen by Mr. James Mortimer in the kennels of Messrs. Smith & Baker, and he was commissioned by Mr. Pratt to make the sale. The dogs came on the Bovic last Monday.

## Hunting and Coursing.

### Whippet Racing.

THE following table giving the starts required by dogs of different weights in a 200-yard handicap so that each dog will be on equal terms, will be found interesting. It is from Freeman Lloyd's book on "The Whippet and Race Dog."

| Weight of dog or bitch. Lbs. | Start for dog. Yds. | Start of bitch. Yds. |
|---|---|---|
| Over 28 | | |
| Over 28 | 1 | 0 |
| Over 27 | 2 | 1 |
| Over 26 | 3 | 2 |
| Over 25 | 4 | 3 |
| Over 24 | 5 | 4 |
| Over 23 | 6 | 5 |
| Over 22 | 7 | 6 |
| Over 21 | 8 | 7 |
| Over 20 | 9½ | 7½ |
| Over 19 | 11 | 8 |
| Over 18 | 12½ | 9½ |
| Over 17 | 14 | 11 |
| Over 16 | 16 | 13 |
| Over 15 | 18½ | 14½ |
| Over 14 | 21½ | 17 |
| Over 13 | 24½ | 20 |
| Over 12 | 27½ | 23½ |
| Over 11 | 31 | 26½ |
| Over 10 | 35 | 30 |
| Over 9 | 39 | 34 |
| Over 8 | 43 | 38 |
| Over 7 | 47 | 43 |
| Over 6 | 52 | 48 |
| Over 5 | 58 | 54 |

### Northwestern Beagle Club Field Trials.

THE second annual field trials of the N. W. B. C. began at Columbus, Wis., Nov. 7. The club's headquarters were at Hotel Tremont, which gave us better accommodations at a much less rate than at either the N. E or N. B. C. field trials. The grounds are ten miles from town and situated in the township of Hampden. They could not be improved on and fully equal those at Hempstead and there is more game.

The following well-known beagle men were present, nearly all of them staying throughout the trials: G. A. Buckstaff, Louis Steffen, E. H. Rummelle, E. Bardoe Elliot, Truman Sears, E. and F. H. Bender. H. A. Dillingham, Ed Marshall, R. Engelman, R. Hintz, C. Niss, Jr., T. S. Maxwell, F. F. Merrill, Julius Finch, A. J. Warren, P. H. Woog and the judges, C. C. Sidder and W. S. Clark.

The best of feeling prevailed throughout the trials, and the awards were well received. The weather throughout could not have been worse, but the Western beagle men are a game lot of sportsmen and held out to the very end. From what we have seen they are the leading club of the kind in the country to-day and are still growing. They are in it for the sport they derive from it and the worst kind of weather has no effect on them.

The first class to run was

#### Class D—Derby—For Dogs and Bitches 15in. and Under.

Truman Sears's Dick *with* Dillingham & Rummelle's Esther C.

R. Engelman's Buckskin *with* Dillingham & Rummelle's Ruth C.

G. A. Buckstaff's Spotted Chief *with* T. S. Maxwell's Jim Lee.

R. Engelman's Black Hawk a bye.

WEDNESDAY.

*First Series.*

At 8 o'clock the barge left the hotel, and after a tedious drive through the snow we arrived at the Wm. Bush farm, and at 7:55 the first brace,

DICK (handled by owner)—ETHEL C. (by Finch), were cast off in open pasture and worked through a low stubble, but no signs of any game. Working through scrub oaks to low ground again, a rabbit was kicked out and both dogs took hold, Esther leading, and they ran him to hole in short order. Further on another one got up and they ran him nicely, the judges having to move around lively to follow them. He also went to ground. One more was started, which they ran to a loss in oak woods. Ordered up at 10:55, with the heat in Esther's favor.

BUCKSKIN—RUTH C.—This brace were cast off at 11:05. Buck handled by Engelman and Ruth by Finch. They got to work at once. Working to low ground covered with marsh grass and reeds, a hare was kicked out, but holed after going a few rods. Another one was soon moving, both dogs getting on. Buckskin took the lead, and catching all the turns did some phenomenal work; in fact, the best Derby work we ever saw. Ordered up at 12:20, Buck having decidedly the advantage.

SPOTTED CHIEF—JIM LEE.—Chief handled by Bender and Jim by Maxwell. Were cast off at 12:30 in light cover. The former is a great hustler, but does not work out his ground as he should. Jim did not appear to like the crowd, and the dogs had been down some time before he was seen, and he appeared to be sulking. At the discharge of the gun he bolted, and the dogs were ordered up at 1:30.

Lunch was served in the Bush farmhouse kitchen, and was an excellent one.

BLACK HAWK, A BYE, handled by Engelman, and Spotted Chief were put down in an alder thicket where a rabbit had just been seen. Black Hawk hit it off at once, and both did well, but soon lost in oaks. Hawk picked it up later on, and they led us a hot chase to a loss; probably rabbit going to hole. One more was run in the same manner, and they were ordered up at 3:10, Black Hawk having the best of it.

*Second Series.*

BUCKSKIN—ESTHER C.—They were cast off at 3:20 in the open where a rabbit had been seen. Getting on at once, Esther led for a short time; then Buck picked up the loss and had it his own way for a while; then both together drove hot for a few minutes, and we were treated to a sight chase which was exciting for a few moments, but was soon over. Ordered up at 3:45, Buckskin having the best of the heat.

BUCKSKIN—BLACK HAWK.—They were cast off at 3:55, and for the next hour no livelier nor better work was ever seen at a field trial. Several rabbits were up during the heat, and gave some very exciting work, and for some time it was a close thing between them, Buck eventually having the best of it. Ordered up at 5 o'clock. We all started for the farmhouse, where the barge was waiting to convey us back to town, where we arrived about 7:30, pretty well tired out. Every chance was given us to dry our wet clothing, and after supper a very enjoyable evening was spent, the boys being introduced for the first time to "Canada Gray."

#### Class C—All-Age Stake.

The drawing in class C, All-Age dogs and bitches, 13in. and under, resulted as follows:

Theo. Zschetzsches's Prince II. *with* Tomman Sears's Dick.

Ed. Bender's Little Cooney Duke *with* T. Zschetzsches's Judy.

Middleton Kennels' Fancy M. a bye.

THURSDAY.

*First Series.*

The weather looked bad, and all signs pointed to more snow, but at 9 o'clock we were on the grounds, and fifteen minutes later the first brace in Class C was called.

PRINCE II.—DICK.—Prince II., handled by Rummelle, and Dick, by Sears, were cast off in scrub oaks. A lot of ground was worked over and some distance away Prince seemed to have one going. Dick harked to him and they drove well, Dick not so fast as the other but quicker to pick up the losses. Dick started another and both drove nicely. Prince is a little too tonguy, but quite fast on a straightaway drive. Ordered up at 10:25.

LITTLE COONEY DUKE—JUDY.—Duke, handled by Bender, and Judy, by Rummelle, were cast off at 10:35, where one had been seen to go. Duke, put on, tongued a little but could not carry it. Judy got on and hit it off prettily, and both drove well for some distance. They lost for a short time, Duke picking it up on the open field near an oak thicket, but lost in the cover. They had quite a number of runs in this thicket, and did some very good work and also enjoyed several sight chases. Ordered up at 11:20, Judy having the best, Dick's failing being that he is too tonguy and he back tracks considerably, still for all that he is a very merry little hound and full of hunt.

FANCY M.—DICK.—Fancy M., the bye dog, handled by Marshall, was put down to run with Dick at 11:25. Dick working to woods saw a rabbit and gave us a pretty sight chase across the open field. Fancy joined him but did not tongue on the trail. They soon lost but had another started, Dick doing all the work. Up at 12:05.

*Second Series.*

JUDY—PRINCE II.—They were cast off in oak thicket at 12:15 and soon a rabbit was afoot, both dogs working him well, Judy being the truest and catching the losses quicker. Ordered up at 12:45 for lunch.

After lunch and a short rest

JUDY—DICK were cast off at 1:45 in the oaks and worked for some time when game was started by a spectator. It was some time before the dogs got on but finally Dick hit it off with Judy right at his heels, and they did some pretty work, going back and forth through woods and pasture until they finally lost. Ordered up al 2:55 with Judy having a little the best of it.

The judges held a short consultation and awarded the prizes as follows: First prize, Judy; second prize, Dick; third prize, Prince II; reserve, Little Corney Duke.

#### Class B—All-Age Stake—For Bitches 13 to 15in.

The drawing in this class resulted as follows:

C. Niss, Jr.'s, Pearl Caroline with Glenrose Kennels' Marguerite.

Dillingham & Rummelle's May Fly with Barrows Bros.' Blossom.

Dillingham & Rummelle's Panic with F. W. Bender's Lottie.

PEARL CAROLINE—MARGUERITE.—Pearl Caroline handled by Niss and Marguerite by Steffen were ordered down at 3:05 in oak woods. Both ranged well and Marguerite did better work than at Oxford. Marguerite made game and trailed to light cover but did not start. They were called up to where one had just gone and got on at once, leading us a long chase till they finally lost. Once more they were put on and again hit it off but soon lost. Both are good workers but seemed to be too fast for their nose, never finding the track after once losing. Ordered up at 4:20.

MAY FLY—BLOSSOM.—They were cast off at 4:25 in oaks, both getting away at once. May Fly soon began trailing, probably the rabbit lost by previous brace, and trailed to cornfield where she drove prettily for some time and lost on cornfield. Working back toward the farmhouse May Fly did some fine work and eventually started, and Blossom soon joining in they gave us some beautiful work; try as he would the rabbit could not shake the little bitch May Fly, her work excelling anything I have ever seen at a field trial. She has the most peculiar voice, sounding more like a tin whistle than anything else. They were ordered up at 5:15.

Starting for the barge we were soon on our way to town. The weather this afternoon has been fine but to-night snow is falling and it looks bad for to-morrow.

FRIDAY.

Nothwithstanding the snow had been falling all night and was still falling, and that the wind was very high, the boys were in favor of going out and a vote being taken on it, we were on our way to the grounds at 8:15 A. M. The first brace on the list not coming to time, the first brace in Class A were ordered down, which will be spoken of later on.

PANIC—LOTTIE.—Panic handled by Dillingham and Lottie by Bender were ordered down at 11.20 in cover of oaks and briers. Near the road a rabbit was seen to cross and go into a corn field. Dogs worked to the track and Lottie tracked to corn field and started him out into the open and back into cover again. They drove for some time first one finding then the other, but Lottie had the call. Ordered up at 12:05.

*Second Series.*

MAY FLY—LOTTIE.—They were cast off in same place last brace were down. Lottie soon had a start, May Fly joining her at once and taking the lead driving prettily, but she soon lost. Another one was soon up however, and we had another nice run. Rabbits seemed to be very plenty and dogs were at work all the time and such work as was done was worth going miles to see. Ordered up at 1.15, May Fly having a little the best of the run. After lunch,

PANIC—BLOSSOM were ordered down at 2:50 in the brier patch. Both got to work at once, and Panic getting a start drove to corn field then back to thicket again, Blossom joining in but Panic soon ran away from her and had quite a little run all to herself; ordered up at 3:30. The judges after consulting a few minues announced the winners as follows: First prize, May Fly; second prize, Lottie; third prize, Panic; Reserve, Blossom.

#### Class A—All-Age Stake—Dogs 13 to 15in.

The drawing for this class was as follows:

Hintze Bros.' Riser, *with* C. Niss, Jr.'s, King Lead.

R. Engelman's Buckskin, *with* Dillingham & Rummelle's Base.

T. Zschetzche's Model, *with* Middleton Kennels' Adam.

F. F. Merrill's Stormy, *with* Dillingham & Rummele's Alderman.

G. A. Buckstaff's Royal Rover, *with* L. Steffens's Tony W.

R. Engelman's Black Hawk, a bye.

RISER—KING LEAD.—Riser, handled by Hintze and King Lead by Niss, were the first brace put down this morning, as spoken of before. They were put down in blackberry bushes where game was soon on the move, both dogs getting on at once and driving well, King seeming to have the better of it, being quicker to pick up the losses, and is a good worker. They had several runs, and were ordered up at 11:15.

BASE—BUCKSKIN.—This rattling brace were cast off at 3:40 in the briers, and Base soon had a rabbit up and hustled him through the briers at a lively rate, showing he had not forgotten the art of rabbit hunting since he ran at Nanuet, two years ago. He had a good running mate in Buckskin, however, who gave the old dog a good rub, but experience told, and the heat ended in favor of Base. Ordered up at 5 o'clock for the day. If the weather is good to-morrow the judges will have their hands full to finish up, but should it turn out poor it will be impossible to get through.

SATURDAY.

A fierce snow storm set in before the grounds were reached and the wind was very high. Every one was anxious to finish up to-day and were willing to face any kind of weather.

BLACK HAWK—MODEL were the first brace down, and they soon had a start, Model doing the work. Black Hawk was not up to his form of a few days ago. Ordered up at 10:05.

STORMY—ALDERMAN.—This brace were cast off at 10:10 in the same place. Stormy handled by Merrill and Alderman by Dillingham. They soon had a start, and the rabbit went to roadside, Stormy following a little way and lost; but he never quit tonguing the remainder of the heat. It was snowing hard, and rabbits did not seem to be moving about much. Alderman getting on one for a moment, forced it into the brush pile. Ordered up at 11 o'clock.

TONY W.—ROYAL ROVER.—It seemed sheer folly to keep on hunting, as the weather was getting worse all the time; but the next brace, Tony W., handled by Steffen, and Royal Rover by Niss, were cast off in a snowdrift among the briers. A rabbit was driven out of the brush pile, and Rover getting on drove a few rods, then lost, and did not find. After lots of beating about, the dogs were taken up and we went to lunch.

After lunch the same brace were taken on to other grounds, and after some tramping a rabbit was seen near a hedge of willows and dogs called on. Rover worked the trail backward, and Tony trailed some little distance where the rabbit took to hole. Moving on, a big territory was gone over without results, and we finally returned to the farmhouse, arriving at 3 o'clock, and an hour later were on our way to the hotel. It was a very long, tedious drive, as the snow had drifted badly and it was impossible for the four horses to go faster than a walk.

At the club meeting, held in the evening, it was voted that the judges should place the dogs from what running they had already seen. The owners of the last brace of dogs down were allowed to withdraw them, which they certainly were justified in doing under the circumstances.

The awards was placed as follows: First prize, Base; second, Buckskin; third, King Lead; reserve, Model.

Absolute winner, May Fly.

SPECIAL PRIZES.

Best in Class A, gold medal, value $25—Base.

Second best, 10lbs. can E. C. powder, value $7.50—Buckskin.

Best in Class B, D. B. shotgun, value $25—May Fly.

Second best, stud service, value $10—Lottie.

Best in Class C., 10lbs. can E. C. powder, value $7.50—Judy.

Second best, one ad. in *Dog Fancier*, value $7—Dick.

Best in Class D, parlor chair, value $10—Buckskin.

Second best, hunting shoes, value $5—Black Hawk.

Best in Class E, oil painting of winner, value $200—May Fly.

Best voice, steel engraving of winner, value $15—Stormy.

Best trailer, one year's subscription to *American Field*, value $5—Lottie.

Best ranger, stud service, value $15—May Fly.

Greatest speed, hunting shoes, value $5—Black Hawk.

Beagle (male) with best voice, cash $5—Stormy.

Best trailer (female), stud service, value $10—Lottie.

Dog or bitch showing best hunting sense and best finder, one year's subscribtion to FOREST AND STREAM, value $4—May Fly.

This finished the beagle field trials for 1894, and without doubt they were the hardest on record. Everyone left town for homes on the 1 A. M. train, and the boys are already talking and laying plans for the trials of 1895, which will probably be held earlier in the season. W. S. CLARK.

• • • •

### Northwestern Beagle Club's Annual Meeting.

THE annual meeting of the N. W. B. C. was held at Columbus, Wis, Nov. 8, and called to order at 10 P. M., President Buckstaff in the chair. The following members were present: Messrs. Buckstaff, Steffen, Sears, E. and F. H. Bender, Dillingham, Rummelle, Niss, Elliott, Merrill and Engelman.

Minutes of last meeting read and approved. Mr. Peter Woog of Scott, Wis., and Ed. Marshall of Frankfort, Mich., were elected to membership. After the regular routine business had been disposed of the election ef officers took place, which resulted as follows: President, G. A. Buckstaff of Oshkosh, Wis.; First Vice-President, E. H. Rummelle of Sheboygan, Wis.; Second Vice-President, F. F. Merrill of Milwaukee, Wis. Executive Committee, R. Engelman of Milwaukee, Wis.; Ed. Bender of Oconomowoc, Wis.; C. Niss, Jr., of Milwaukee, Wis.; Secretary-Treasurer, Louis Steffen of Milwaukee, Wis. Adjourned at 11 P. M.

• • • •

## HUNTING AND COURSING NOTES.

The ways of some dog men are devious. A clipping from a local paper has been sent us from Thorndale, Pa., in which we find the following: "At the meeting of the National Beagle Club at Hempstead, L. I., Spot R., a beagle owned by A. D. Heald, this borough, won second place in the Derby class, and he will receive a premium of $40." Mr. Heald attended the trials at Hempstead for two days, but did not enter a dog, and while the above little piece of ingenuity may be very pleasing in a local way, we feel compelled to throw some cold water on the case in the way of facts. Spot R. was bred and is owned by George F. Reed, of Barton, Vt. Her Derby days are over long since, and her place is now in the champion class, where, although she was quite off nose, she ran second to Laddie at Hempstead. The same local journal also states that "an effort will be made by the Pennsylvania members to have the club hold its annual meeting here next year."

• • • •

Mr. C. S. Wixom, of Covert, N. Y., tells us that on Nov. 7, he went out with his little beagles Nibs, champion Ava W. and Dorele and he and a friend, killed four grouse and seven hares ahead of them. He adds, rather naïvely: "Perhaps you were not aware that beagles would hunt grouse; well, the fact is a dog that is bred right and has brains, can be taught many seemingly unheard of things. But we did have a most enjoyable day in the field. The dogs did perfect work, started several cotton-tails that did not seem to admire the music following close on their heels, so went to ground with whole hides.

I trust you have noted the fact that champion Royal Krueger's get have won more field trial prizes than the get of any other beagle. Just look it up a bit. Nibs, champion Ava W., Stormy, Ilwaco and Laddie. With Stormy and Dick running last week in N. W. B. C. trials—I have not heard the result—and I bred and broke them all except Stormy. He never needed breaking. He had seventy-six rabbits killed ahead of him before he was seven months old—and then some people say that the Hornell—Harmony beagles are only show dogs."

## Yachting.

UNTIL Lord Dunraven shall have received the letter mailed to him on Nov. 16, nothing will be known on this side as to the action of the committee on his various suggestions. Conjecture as to the nature of this action ranges from a compliance with several of the suggestions and the denial of the majority down to a distinct intimation that no challenge will be received that is not in strict accord with the letter of the new deed. Bad as the new deed is, the club in arranging the last races with Lord Dunraven, pursued a course so irresolute and inconsistent as to lose even the respect of the opponents of the deed; and it would in one way be more satisfactory to all parties if the present committee should have the courage of its convictions, and stand by every letter of the document for which a part of its members are personally responsible, and which they still profess to believe in. If the new deed is fair and just, then the club had no reason, as it had certainly no legal right, to waive the demand for all the dimensions of the challenger under the forced and absurd construction which has been put upon the "mutual agreement" clause. If, on the other hand, the objections to this clause and others, are well grounded, then the only honorable course is to throw overboard the whole rotten fabric, rather than to risk the further contempt of yachtsmen by efforts to patch and fit it to meet objections whose fairness is conceded. Even though a complaisant challenger may be satisfied by a sop or two of exceptions, and accept the document as legal in its entirety, such a course as that of 1892-3 is beneath the dignity of a great club. Either it is right and will stick to all it has done, or it is wrong and will do differently; it cannot be right and at the same time continue to make exceptions and special rulings which prove it to be wrong.

WHILE there remains undecided such an important question as whether the club can legally recognize a challenge which does not give specifically the dimensions called for in clause six of the new deed, there is no need, in our opinion, of discussing the details of starting a race or method of measuring. Further than this, after the

MODEL YACHT NEOLA—SAIL PLAN.

repeated repudiation by the Royal Yacht Squadron of the new deed, a challenger, in our opinion, is wasting his time in arranging petty details, when he has no positive assurance that the New York Y. C. is prepared to depart from the plain and explicit wording of the twelfth and final clause of the new deed, prohibiting any transfer or delivery of the Cup to a possible winner until he has legally executed an agreement to recognize all the terms of that document.

If we can read correctly the plain English of the new deed, two very serious differences must inevitably have followed a victory by Valkyrie over Vigilant; in the first place any member of the New York Y.C. would have been legally justified in opposing the transfer of the cup to the Royal Yacht Squadron, on the ground that its challenge on behalf of Lord Dunraven was not in accord with the plain and positive requirements of clause six, and did not give the dimensions of Valkyrie. In the second place, entirely apart from this point, had it not been raised, the New York Y. C. would not have delivered the Cup until the Royal Yacht Squadron had signed a formal indorsement of the new deed, which would have completely stultified that august and honorable body.

---

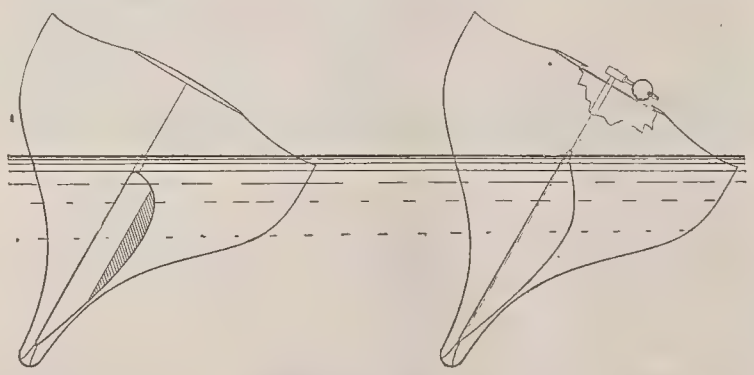
We are in every way desirous of a race next year, but we can foresee and appreciate the danger of discord and dispute which must attend any attempt at an agreement on the present lines, of a definite understanding on trivial points and a mutual misunderstanding on vital ones. Better no international contest than one which shall result in ill feeling on both sides. As matters now are, it is far more essential to us than to England that there should be a race in 1895. With no race it is easy to foretell the work of next season. Jubilee will lie ashore at Quincy Point, Colonia will continue to rust at Tebo's, Vigilant will probably remain abroad, and Navahoe will have Queen Mab and Katrina to race with at times. Wasp and Gloriana, with Minerva and Gossoon, may or may not continue their thrilling and exciting races; a schooner or two may be added, to race with Emerald and Ariel, and some new fad will replace the 21-footers. Building, racing and improvement will be as dead as they were last year.

On the other hand, Messrs. Fife and Watson, keen and alert to profit by Vigilant's races this year, have already three large yachts on the stocks, with a probability of others; so that, in the event of no Cup race until 1896, or later, they continue to experiment and improve in the large classes, while American designers are hunting for orders for 21-footers and "knockabouts." Let us have a race, but let it be only on terms that are fair, open and definite, clearly understood and agreed to in advance by defender and challenger.

---

While the Forest and Stream has often had occasion to score the centerboard, and especially the peculiar model once exclusively associated with it, we have never gone so far as Mr. Nixon, in the article quoted elsewhere. The ethical question which he raises is a new one, but far less important than the practical one of whether the assumed advantages of the ballast board are sufficient to justify its further use in the face of the mechanical difficulties and the serious danger attending the carrying of a loose weight in a vessel at sea.

---



## Model Yacht Building.—III.

*(Concluded from Page 436.)*

The hull proper being completed, the lead keel is cast by making as a mould a hollow box of the required form to contain the keel. The inside of the mould is rubbed with chalk or plumbago, the lead is melted in an iron ladle or pot until it is just in a fluid state, without being hot enough to burn the mould; and is then poured slowly and steadily until the mould is full. After the lead is cold it is removed from the mould and cleaned off, being finally planed with a small smoothing plane until perfectly smooth and of the correct shape. It is not necessary that the mould should be made with great accuracy, so long as it is large enough: as lead can be very easily cut and planed, the only precaution necessary being to grease the sole of the plane, otherwise the lead shavings will stick to it. The holes for the screws are sometimes cored as the keel is cast; but they may be readily bored with a gimlet bit, such as is used for wood.

In the ordinary keel model the lead keel is fastened to the hull by long brass screws. The construction of a fin keel is the same as in the large yachts, the fin is cut from sheet brass, and bolted between two brass angles, each screwed to the wood keel or bottom of the hull; the lead bulb being cast in two halves and bolted through and through, one on each side of the fin.

The distinctive feature which, more than any other, separates the model yacht from the full-sized craft is the steering gear. In place of the hinged rudder, held and controlled by the tiller in the helmsman's hand or by the steering wheel; the model yacht is sailed to windward practically without a rudder, yachts intended only for windward sailing sometimes having no rudder at all, except that the fixed deadwood is continued out in the outline of the rudder; while in the majority of cases in which there is a hinged rudder, it is either taken off or left free amidships; the sails are so balanced that the model will steer

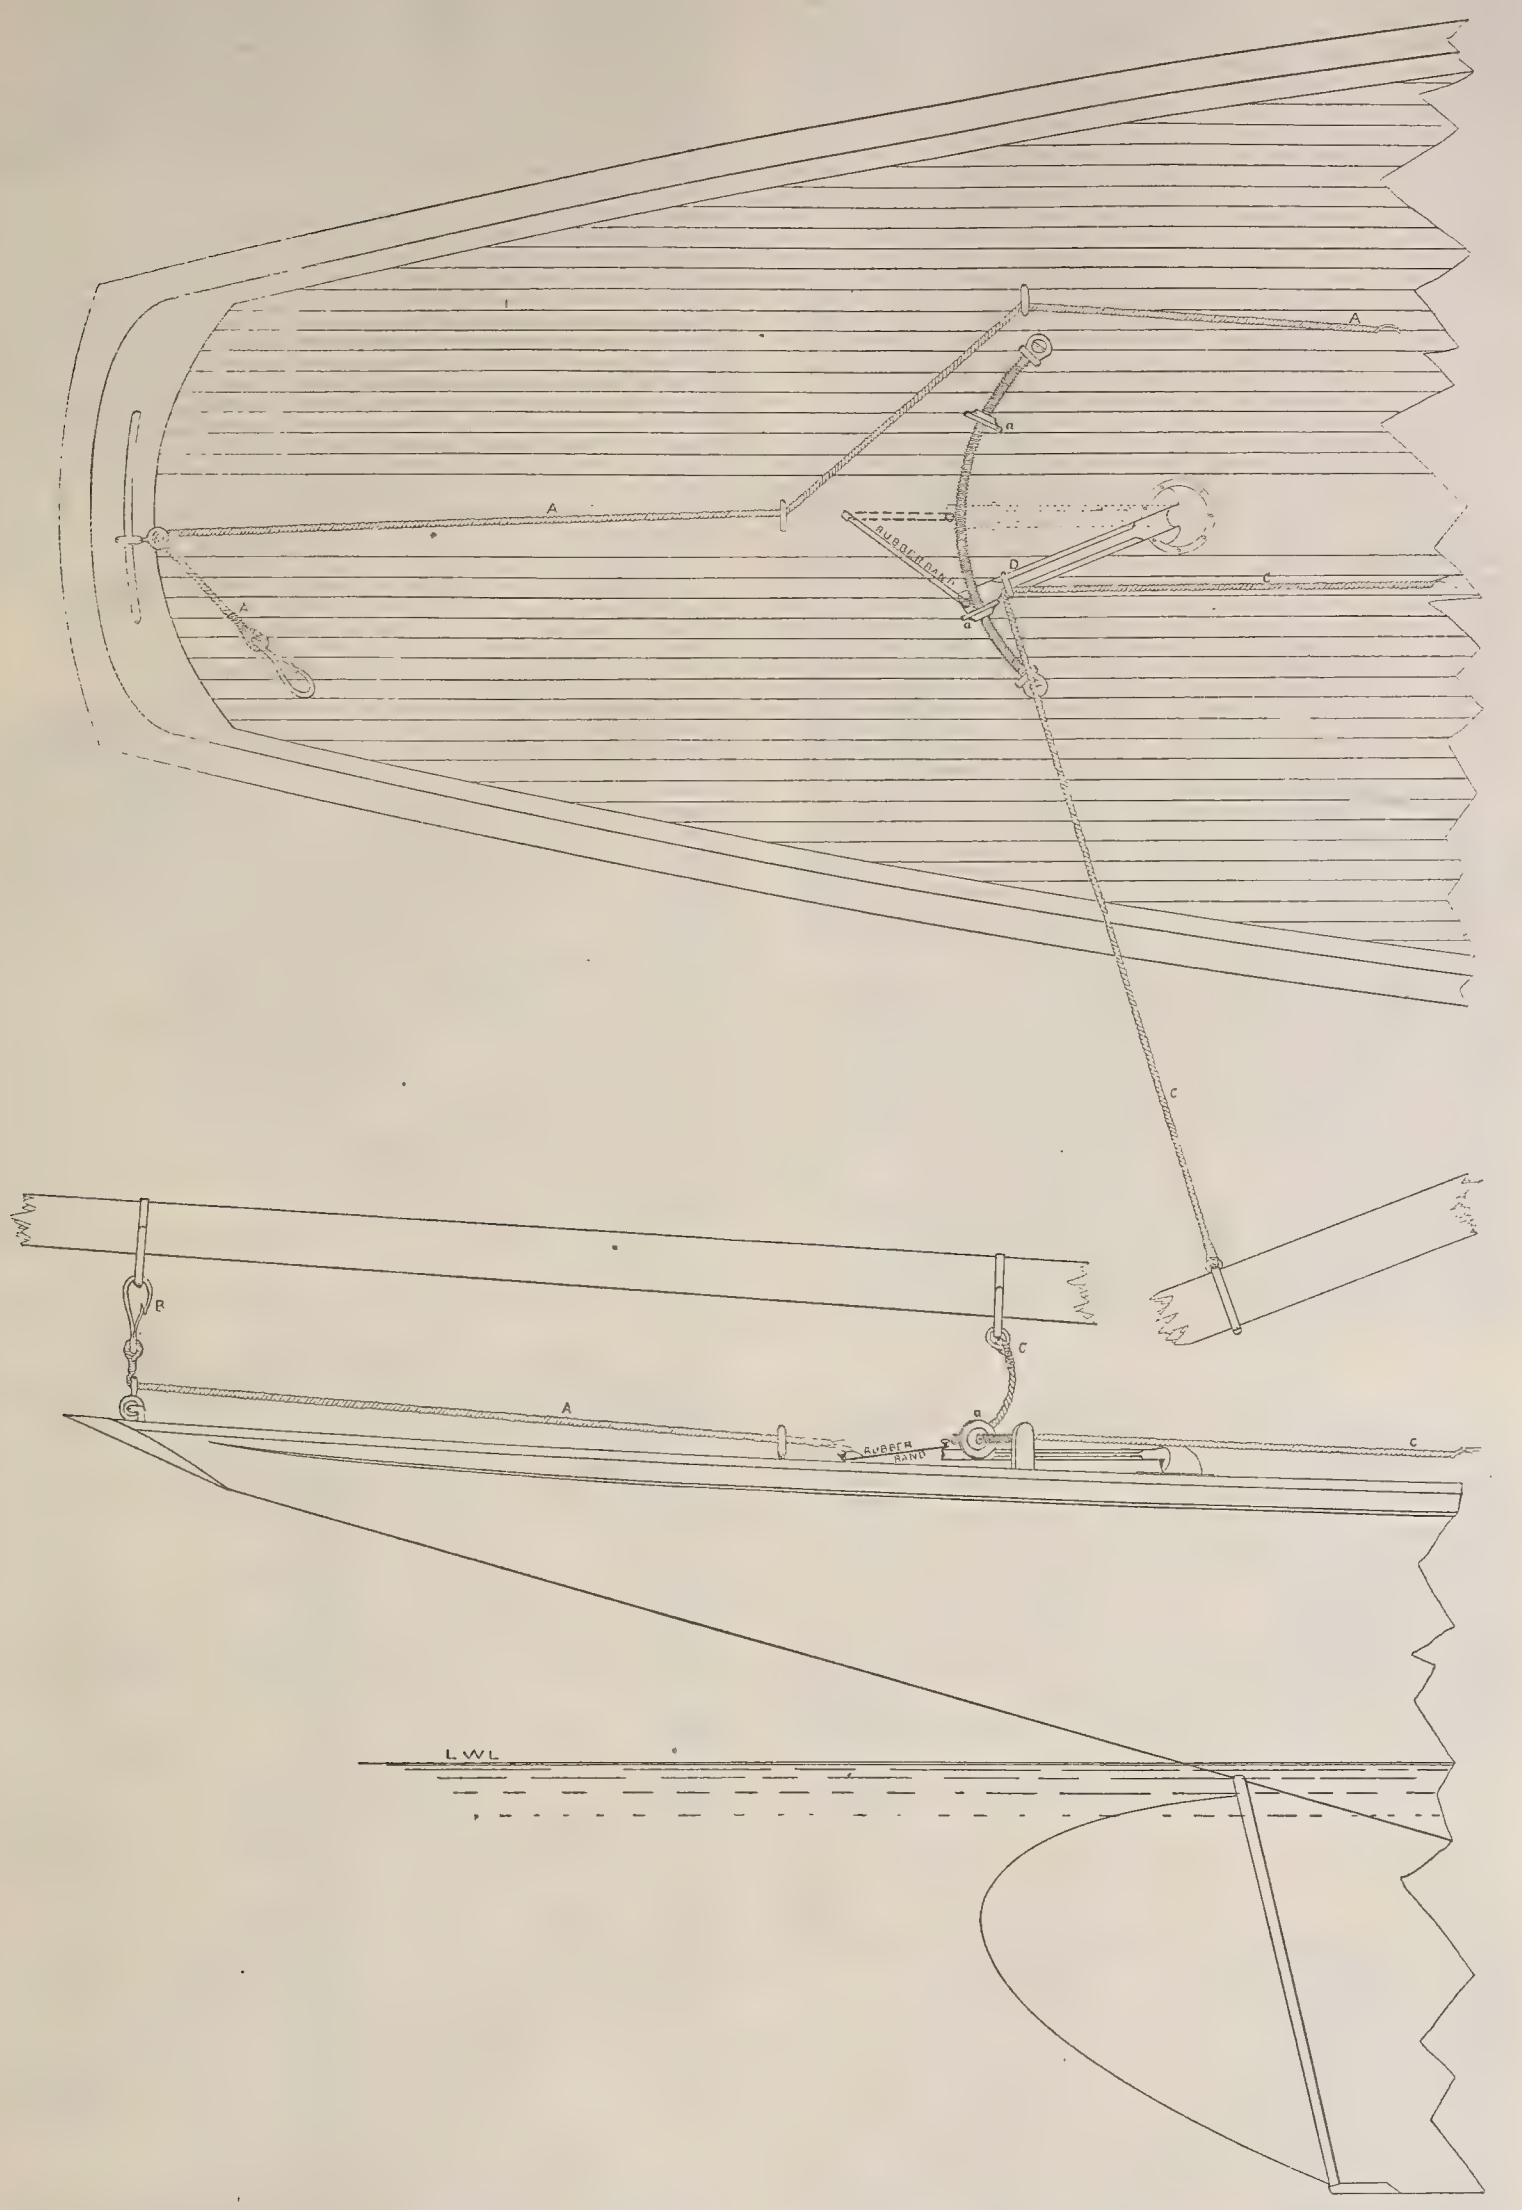
WEIGHTED RUDDERS.

herself to windward by them alone. In sailing free or reaching some means of steering the hull is necessary, and two methods are employed. According to the English plan, the rudder is weighted, in some cases by a piece of lead cast in the back of the rudder; four or more rudders of different weights being carried by the owner and used according to the course and wind. The weighted rudder is shown in Fig I. and another plan in Fig II., but one rudder being used, with a short tiller running aft instead of forward from the rudderhead. This tiller has a screw thread out on it, a lead ball fitting the thread, so that it may be shifted and held at any distance from the rudderhead: thus exerting a varying leverage on the rudder.

The steering gear used by the American Model Y. C. is quite different from both of these, as shown in Figs. III. and IV. A short tiller running aft is still used, but without the weight, though a light rubber band serves to hold the rudder amidship when the sheet is slack. Near the end of this tiller is a ring, *D*, for the sheet, *C*, which is led forward to a cleat rack and made fast by a pin, being left quite slack. Just over the free end of the tiller a threaded wire segment is fitted, each end carried by a small brass standard projecting from the deck; and on this segment are two round thumb nuts, *a a*. The play of the tiller from side to side is limited by these two nuts, which may be moved toward or from the center until the tiller is just far enough over to balance the boat, the pull of the sheet of course keeping the tiller to leeward on each tack, and the boat's head out of the wind.

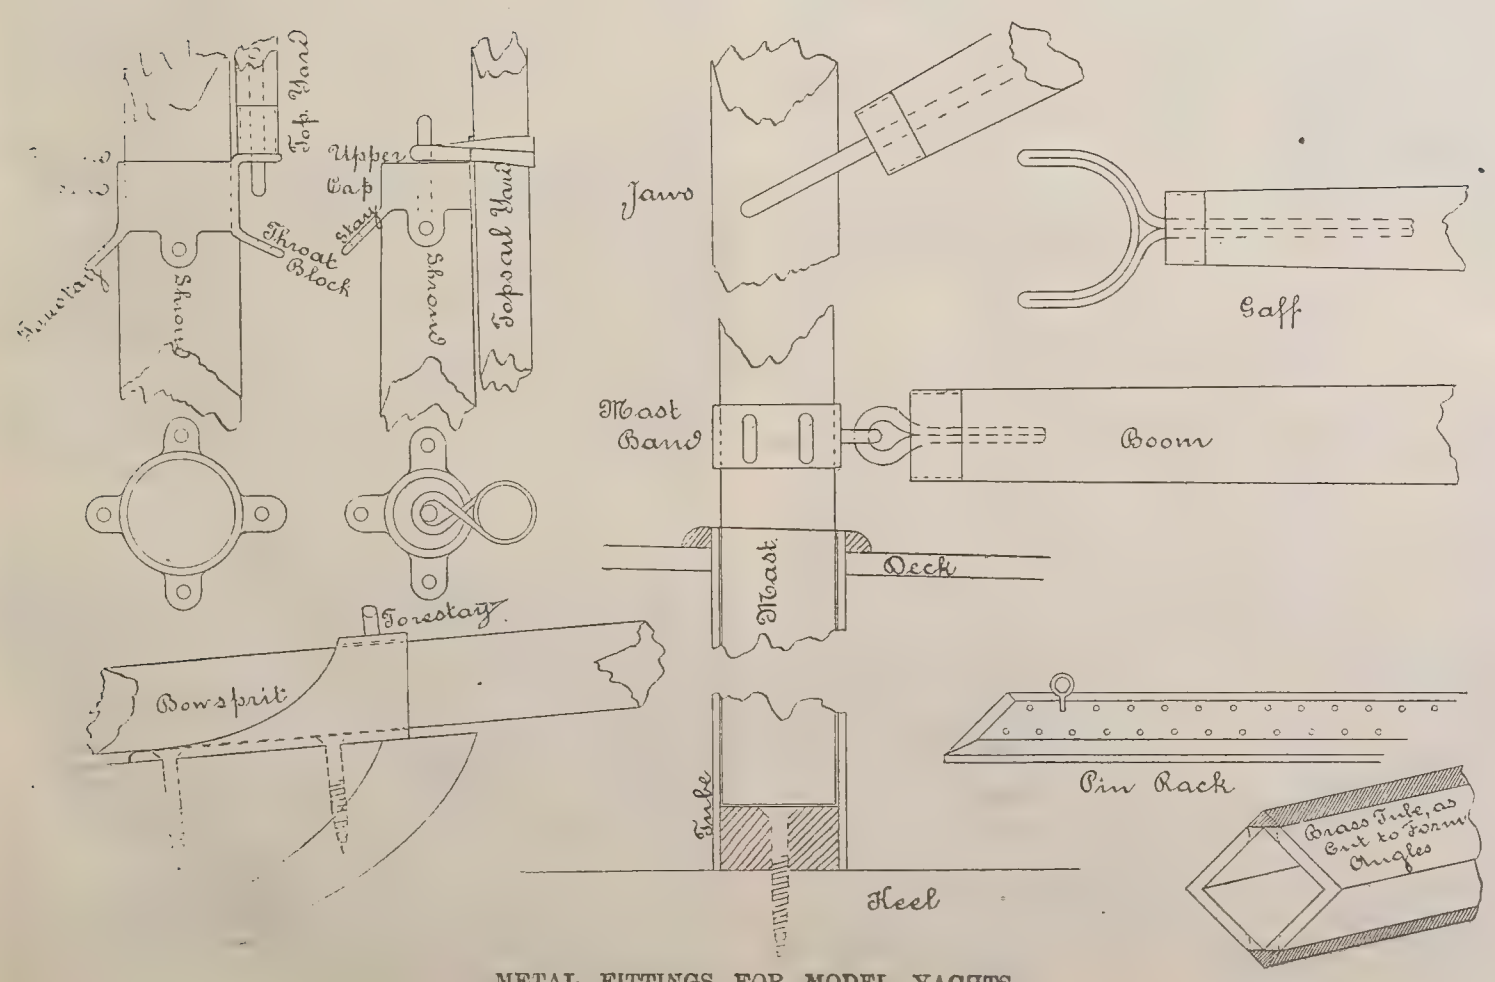
In running or reaching, the craft can be steered to a nicety by the automatic gear. When on the wind, a second sheet, *A*, is used, led through a ring on a traveler on the counter, and fitted with a spring snap, *B*. The forward end leads to the cleat rack, and the sheet is set up quite taut. When coming on the wind, the sheet, *A*, is snapped to its traveler on the boom, and the sheet, *C*, is left as it was, the rudder consequently being held fast amidships by the pressure of the rubber band.

Clear, straight-grained spruce is used for the mast, boom and gaff, the bowsprit being of hickory or ash. The mast is stepped in a brass tube, from the keel to the deck; the lower end of the tube being fitted with a tight plug of wood, through which is a brass screw into the keel. The mast will vary in diameter from ½in. for a 35in. model to 1in. for a 60in. model. The simplest form is the pole mast, one stick from heel to truck, dispensing with the weight and complication of a separate topmast.



The various metal fittings are easily formed from brass in wire, tubing and sheets, all of which may be had, of all sizes and in small quantities, at machinists' supply stores. The necessary tools are a pair of shears or snips, a drill stock and half a dozen drills, a fretsaw, a hacksaw, a pair of round-nosed pliers, a riveting hammer and a few files. A metal vise is also required, very good ones for this work being now made as a part of a small anvil. The mast bands are made of drawn brass tubing, the required length being cut off with a file or hacksaw, the work marked out and the holes drilled, then the necessary lugs are shaped from the body of the tube and bent to the proper position. The main hound band has a lug on each side for the shrouds, a lug on the fore side for the forestay and one aft for the throat halliard block; also a lug just above the latter to take the heel of the topsail yard. The peak halliard and jibstay are carried on a similar band. The upper cap of topmast band has but three lugs, for shrouds and topmast stay. The topsail yard has a ferrule on the lower end, and a short wire pin driven in, which ships in the hole in the lug on the band. At the height of the topmast head is an eye, made of a piece of brass wire flattened on the ends and bent into a "figure of 8," the two flat ends encircling the yard and the middle eye going over a pin in the head of the topmast. The spreaders are made of brass wire, passing through a hole in the hound band and mast, the ends hammered flat and drilled. The wire is soldered to the band. The shrouds are of strong waterproof fishing line, twisted until taut and hooked to eyes in the deck.

The boom is fitted with a wire eye, the two ends of the wire flattened and driven into the spar. On the mast is a section of brass tube with a wire eye fitted in its after side to form, with the eye on the boom, a gooseneck. On each side are two wire hooks for the halliards. The jaws of the gaff are made of flat strips of brass or of half-round brass wire, bent as shown and driven into the end of the spar. The bowsprit ships through a gammon iron formed of a section of brass tube, fastened to the deck and stem by two screws; and a similar tube may be fitted further aft for the heel. The bowsprit end carries a cranse similar to the hound band, with lugs for the bobstay, bowsprit shrouds and headstays. The mahogany cleat or pin rack is shown in the drawings, being from 6 to 12in. long, each sheet having its own pin.



Almost anything in the way of metal work for a model may be made from the stock shapes and sizes in which brass is sold, avoiding the trouble and expense of making patterns and castings. A method of cutting two angles for a fin-keel from a length of square brass tubing is shown; if a circular saw is at hand, a cut along each of two opposite angles does the work without waste of metal; but the same end may be accomplished with a file, two opposite corners being filed away until the square tube is in two pieces, each an angle bar, then the interior edges of each flange may be further rounded with the file. A good material for sails is the best quality of Lonsdale cambric, soft finish, the sail being cut so that the selvedge runs parallel with the leech. The dimensions of Neola's spars are as follows:

| | |
|---|---|
| Mast from end of l.w.l. | 19 in. |
| deck to hounds | 46 in. |
| masthead | 7½in. |
| Topmast | 42 in. |
| Bowsprit beyond l.w.l. | 35 in. |
| outboard | 19 in. |
| Boom | 54 in. |
| Gaff | 34 in. |
| Topsail yards | 17 and 37 in. |
| Jib, club | 28 in. |
| Foresail club | 24 in. |
| Tack to peak | 68¾in. |
| Clew to throat | 65 in. |

In sailing model yachts as practiced in England, the sailing ground is a small pond, the owner of each yacht walking or running around the margin armed with a stick, which by the rules is limited to 4ft. length, with which he puts his craft about as she nears the shore. In this country, however, both crew and yacht are afloat, the former in

AUTOMATIC STEERING GEAR FOR MODEL YACHTS.

METAL FITTINGS FOR MODEL YACHTS.

a small flat-bottomed punt, with a pair of short oars. After the race is started each owner rows after his yacht, and when he judges that she has gone far enough on a certain course, he rows sharply up under her lee, drops one oar and seizes the yacht, trimming sheets or putting her on the other tack, the main point being that he is penalized 10 seconds for each time he touches the boat. The rules of the American Model Y. C. as follows will prove useful to those interested in forming clubs.

CHAPTER I.—*Club Signals.*—Sec. 1. The distinguishing signal of the club shall be a pointed burgee, its width being two-thirds of its length, the field of white, with a border and "V" shaped cross-piece of navy blue.

Sec. 2. The commodore's yacht shall fly a pennant similar to the club signal, with three blue stars in the white field.

Sec. 3. The vice-commodore's yacht shall fly a pennant similar to the commodore's, except that it shall have only two stars instead of three.

CHAPTER II.—Sec. 1. Each yacht shall carry a distinguishing signal flag.

Sec. 2. The flag of each yacht shall be swallow-tail shape, one-twelfth the length of loadwaterline, width two-thirds the length; the point to be one-third the length, and the same distance apart.

Sec. 3. Each yacht shall have a distinguishing number, which shall be assigned to it by the measurer.

Sec. 4. The private signal of each yacht shall be registered with the measurer, and no two members shall have the same device.

CHAPTER III.—*Regattas.*—Sec. 1. There shall be three (3) regattas in each year, spring, summer and fall.

Sec. 2. The date of the spring regatta shall be the thirtieth (30th) day of May, the summer regatta the fourth (4th) day of July, and the fall regatta the first (1st) Monday in September.

Sec. 3. A committee of three members shall be appointed at the April meeting to make arrangements for and direct the same.

Sec. 4. An appropriation, if necessary, shall be made for defraying the cost of the prizes for the regattas, and all other expenses appertaining to the same.

CHAPTER IV.—*Challenges.*—Sec. 1. After a yacht has been defeated in a race for a challenge prize, the owner can challenge with the same yacht, for the same prize, for a race to be sailed on or after the fourteenth day after the date of his defeat, but not sooner.

CHAPTER V.—*Voting.*—Sec. 1. All changes or alterations in the Yachting Regulations, or Sailing Rules, must be submitted in writing at the regular meeting in September, and seconded, and be voted upon at the regular meeting in October of each year. Such changes or alterations as are made to go into effect the following season, and remain in force throughout the season.

No proposition to change, alter or add to the yachting regulations or sailing rules will be entertained by the club at any other than the above stated meetings.

Sec. 2. All active members that are in good standing in the club are entitled to a vote on the yachting and sailing regulations, and if unable to be present at the meeting may register their vote in writing, over their signature, and send the same to the secretary of the club, prior to the date of the meeting at which the vote will be taken.

Sec. 3. The secretary shall send to each and every active member a *verbatim* copy of each motion submitted and seconded at the September meeting of each year, which in any way relates to the yachting regulations or sailing rules.

Sec. 4. Members voting in writing over their signature must so designate by their signature on the back of the envelope containing their vote. Envelopes so designated to be opened only at the meeting at which the vote is to be taken and by tellers appointed by the chairman. Votes sent in envelopes not indorsed, or so indorsed and not properly sealed, will not be considered.

CHAPTER VI.—*Change of Ownership.*—Sec. 1. Any member, on selling or transferring a yacht, shall give notice of the same to the measurer.

Sec. 2. Any member purchasing or coming into possession as owner of a yacht, shall give the measurer thirty (30) days' notice before he can enter such yacht in a race.

Sec. 3. Any yacht which is not registered on the club records in the names of the owner or owners, shall not be entitled to representation in the club.

CHAPTER VII.—*Measurement.*—Sec. 1. No yacht shall be represented in the club, unless in has been measured and duly registered by the measurer, specifying its dimensions, rig, etc.

Sec. 2. Any member wishing to enter a new yacht in a regular club race must notify the measurer at least ten (10) days before the date of the race, otherwise the yacht will not be allowed to enter the race.

Sec. 3. After a yacht has been measured for a race no person shall alter the rig or trim of the hull of such yacht until after such race, and then he must give notice of such change to the measurer, and such yacht must be remeasured previous to entering in any race sailed under club rules and regulations.

Sec. 4. The rule for measuring loadwaterline length is that all length of boat below the l.w.l. in excess of l.w.l. be added to the l.w.l. the same to be the l.w.l. length.

Sec. 5. Yachts shall be measured for time allowance according to the following system, viz.:

To the square root of the actual sail area of the largest suit of sails carried add the l.w.l. length and divide by 2, the result being corrected length for calculating time allowance.

CHAPTER VIII.—*Alterations.*—Sec. 1. Any alteration in a yacht (hull or rig) must be reported, and said yacht measured previous to the next race, and any yacht shall be remeasured at the written request to the measurer of any two yacht owners.

CHAPTER IX.—*Ballast.*—Sec. 1. All yachts shall have only stationary ballast in a race, and at the meeting previous to any race the registered weight at which any yacht shall be sailed, and the position in which the ballast will be carried in that race shall then be named.

CHAPTER X.—*Registered Weight.*—Sec. 1. The total weight of a yacht (with largest suit of sail set) shall be its registered weight.

CHAPTER XI.—*Limit.*—Sec. 1. No yacht under thirty-five (35) inches length on loadwaterline shall be recognized in the club.

Sec. 2. All yachts belonging to the club must be named.

### SAILING REGULATIONS.

RULE I.—*Classification.*—Sec. 1. The sloop yachts shall be divided into three (3) classes, as follows:

First class—All yachts of forty-eight (48) and under fifty-three (53) inches loadwaterline length.

Second class—All yachts of forty-two (42) and under forty-eight (48) inches loadwaterline length.

Third class—All yachts of thirty-five (35) and under forty-two (42) inches loadwaterline length.

Sec. 2. Schooners—One class only, viz.: From forty-eight (48) to sixty-three (63) inches inclusive, loadwaterline length.

RULE II.—*Time Allowance.*—The rule of time allowance shall be as follows:

The larger yacht shall allow the smaller yacht time, in which the corrected length only shall be taxed, it to be taxed at the rate of ten (10) seconds to the inch for a one-mile course.

RULE III.—*Objections.*—If any objections be made in regard to the class or sailing of any yacht in a race, such objections must be made in writing to the regatta committee before three (3) o'clock P. M. the day after the regatta.

RULE IV.—*Limit of Time.*—The limit of time for making a race over the club course shall be for first class yachts twenty (20) minutes, for second class yachts twenty-two (22) minutes), and for third class yachts twenty-five (25) minutes.

RULE V.—*Interval Between Classes.*—Sec. 1. An interval not exceeding thirty (30) minutes shall be allowed between the races for different classes, at the expiration of which time any yacht not ready to start will be ruled out of the race for that class.

Sec. 2. At least three yachts must start in a class or no prize shall be awarded in that class.

RULE VI.—*Racing.*—Sec. 1. All regular races of the club shall be sailed over a given course to be established by the regatta committee on the day of the race.

Sec. 2. The races shall start from or across an imaginary line drawn between two anchored buoys, thence to and around a buoy anchored not less than one-fourth of a mile distant from line of starting, returning over the same course, and finishing at the starting line.

RULE VII.—*Buoys.*—Starting and finishing buoys shall be set about fifty (50) feet apart, at right angles with the line of the course.

RULE VIII.—About fifteen (15) feet behind the starting line a buoy shall be set which will fly a white flag, astern of which all yachts shall be released, and shall cross the starting line under full headway.

RULE IX.—The setting of all buoys, and the direction in which all yachts shall pass between or around said buoys shall be left entirely to the discretion of the regatta committee, they to notify all persons participating in such race before the start is made.

RULE X.—There shall be a preparatory signal given, and shortly after the starting signal shall be given.

RULE XI.—A limit of two (2) minutes shall be allowed for the yachts to cross the starting line.

RULE XII.—The time of each yacht to be taken as it crosses the line within the limit of time.

RULE XIII.—The time of all yachts that cross after the time limit shall be taken as having started at the expiration of the limit.

RULE XIV.—*Fouling.*—Should any two or three yachts foul during a race such race must be sailed over again, unless, in the opinion of the regatta committee, said yachts did not stand a fair chance to win such race.

Sec. 2. Should any yacht while in a race foul a buoy such yacht must be sailed around said buoy again from the proper direction, provided the owner desires to continue in the race.

RULE XV.—*Touching Yachts.*—Sec. 1. When in a race if any person touches the yacht he is sailing, he shall be taxed ten (10) seconds for each time he touches his yacht.

Sec. 2. This rule shall apply to all races sailed by the club, and be enforced for every touch either by hand, oar or skiff, or other means by which the movement of the yacht could be controlled.

RULE XVI.—*Pushing or Towing.*—When yachts are sailing a race no person or persons shall be allowed to push or tow any of such yachts either when sailing on a leg or when going about, and if any person or persons should perceptibly push or tow any of such yachts, such yacht or yachts shall be ruled out of such race by the referee, or by a protest made in accordance with Rule III. of the Sailing Regulations, by any person sailing a yacht in such race.

RULE XVII.—*Right of Way*—Yachts in tow to give way to yachts under sail. Yachts close hauled to give way to yachts going free (this for obvious reasons). Yachts on the port tack to give way to yachts on the starboard tack.

RULE XVIII.—*Prizes.*—Sec. 1.—There shall be a first and second prize for each class that fills.

Sec. 2. When there are three (3) or more yachts sailed in a series of races the first yacht winning two of the races shall be awarded the first prize.

Sec. 3. The second prize shall be awarded to the yacht having the next highest number of points. A first finish counting three (3) and a second finish counting two (2) points, and a third finish counting one (1) point.

Sec. 4. Prizes or prize money to be handed to the winners at the first regular club meeting after the date of the race or races

RULE XIX.—*Captains*—When competing for club prizes each yacht must be sailed by one owner only.

RULE XX.—*Referee.*—The referee to be sole judge of all yachts while in a race; his decision to be final in all cases; he shall have the power to enforce the Yachting and Sailing Regulations according to his best judgment.

In conclusion we quote from a letter written by Mr. Thos. A. Bruce, editor of the *Model Yachtsman and Canoeist*, published in Hull, England, to a model yachtsman in this city:

"As regards the pastime and recreation of model yachting, yachting, cricketing, football, cycling, etc., are all means of getting exercise, recreation, and health. Yachting stands pre-eminent above all in my opinion, as there is more pleasure to be had from yachting when separated from its competitive features than any of the rest. Model yachting comes next, as you may get considerable pleasure from the exercise of skill and ingenuity and the beauty of model yachting, independent of its competitive features, although the latter form a considerable enhancement to the pleasure, and add zest and spirit to the pursuit of the sport.

"Cricket, football and such sports are nothing when separated from the competitive features, and a man going through the motions that belong to them by himself would be considered a moonstruck imbecile. Cycling of course has its keen cruising pleasures.

"Such being the case, I claim for model yachting that it may stand on its own basis as advantageous to the community for health, for pleasure, for the development of the mind, as exercise in constructive skill and workmanship, and for bringing people together into companionship with a common object that shall entertain them and promote friendship.

"No frivolous objects, these, in times when business cares, worries and suspicions make it necessary that a man should have a hobby that shall bring change and relaxation.

"What is a middle-aged, gentle-mannered man to do? Is he to give up all pastime because he no longer delights in rougher sport? Is he to be obliged to always go and watch others, and never have a hand in anything himself? No! Model yachting provides a healthy channel for him yet to have sport and recreation, and so may it flourish.

"I hope my gossip may repay you for sending me news from America, for which I am much indebted. With greeting to all model yachtsmen of America, THOS. A. BRUCE."

## Society of Naval Architects and Marine Engineers.

SECOND ANNUAL MEETING, NEW YORK, NOV. 15-16.

THE second annual meeting of the Society of Naval Architects and Marine Engineers was opened on Nov. 15, with President Clement A. Griscom in the chair, at the house of the American Society of Mechanical Engineers, West Thirty-first street, New York; the lecture room and parlors being well filled with naval and professional men. Mr. Griscom, after calling the meeting to order, addressing the members as follows:

GENTLEMEN—I accept with pride and pleasure the honor you confer by again selecting me to preside over the Society of Naval Architects and Marine Engineers.

The time which you will require to properly consider the large number of important and valuable contributions to our proceedings, which will be laid before you at this meeting, warns me to limit myself to a few general remarks.

The gratifying progress and encouraging condition of this Society demand notice. We begin our second year with an addition of 8 new members and associates, making our membership at present consist of 460 members and associates, and 6 juniors, a total of 466.

Your Council has regarded the publication of a volume of the transactions of the Society at its first meeting, such a volume as would be of substantial value to the members, as its most important function since your last meeting, and they hope (notwithstanding the unfortunate delay in its issue), that the volume meets with your approval.

You will note from the report of the treasurer that practically the whole expenditure has been for printing and such services as must be obtained by other than patriotic considerations, and it should be borne in mind that, to maintain the standard we have adopted, it is necessary and desirable that our membership should continue to increase.

In a brief introductory address it is not my intention or desire to burden you with any statistics of ship building progress during the past year; indeed it would be a mournful recital, for this branch of industry has suffered severely from the general depression that has prevailed throughout our land, but from papers announced to be read you will doubtless derive some very definite idea as to what we need for the development of our naval and mercantile marine.

The increasing love for yachts and yachting, and especially the very great interest taken in the recent international yacht races, are sure indications of our natural love of the sea, and with the growth of this spirit must surely come the natural ambition to see the American flag flying upon American merchantmen in every harbor on the globe.

The naval battle which has recently occurred in the war between Japan and China is of surpassing interest, not only to naval men and members of this society, but also to our citizens in general as establishing the value and necessity of an adequate naval force.

The information at present at hand, though sufficient to arouse some controversy as to the value of types of ships, cannot be regarded as sufficient to form an opinion, or even to lead to serious question as to the relative advantages of battle ships and cruisers.

It will be necessary to have accurate information in regard to more than one battle before the confidence of naval men is in the least shaken in the greatly preponderating efficiency of armed vessels.

There are points of the highest and most essential value, however, brought out by the battle of the Yalu River. Those which most impress me are, the immediate strategical and actual results, due to the fact that Japan possessed a large and capable modern fleet, and that it was thoroughly prepared for actual service, not only with munitions of war, but also with skillful and well-trained officers and men.

These are the lessons which can be brought home to our countrymen. It should be understood that a modern naval force, with all its multitude of equipment, arms, munitions and accessories, cannot be produced on the spur of the moment, but is the product of naval architects, steel-makers, and a host of others whose skill can only be obtained by experience.

It must not be overlooked that the personal element in warfare, as in peace, is an all-powerful one, sometimes predominating, sometimes secondary, but always of the greatest importance, and, therefore, an adequate navy is necessary, not only for the actual representation of power and force, but also to secure to our officers and men those superior nautical aptitudes only to be obtained by such continued experience at sea as made heroes of Hull, Decatur and Farragut.

The full development of a naval force, however, is not possible unless the growth of the merchant marine has kept pace with the naval development. My quotation of the words of Sir Nathaniel Barnaby in my address to you last year: "No nation could maintain an efficient navy without a prosperous commercial marine to support it," has still the force of an axiom.

And it should not be overlooked that in time of war the conversion of fast mail steamers into armed cruisers is generally recognized among all maritime nations as a most formidable means of offense or defense for any country so fortuate as to possess them.

Moreover, to provide the expansion of naval *personnel* rendered necessary in time of war, there must be a well-trained merchant marine to draw upon, and those nations which have not encouraged shipbuilding and shipowning in times of peace must inevitably suffer from their short-sighted and narrow policy when confronted with a powerful and hostile fleet.

A technical society of this kind has no *raison d'etre* if there are no ships to build, and, if its labors in a purely technical field result in reawakening general interest in the development of our great maritime resources, there will be little doubt that the inception and growth of a society of this kind is a national blessing.

The opening paper, "Some Suggestions of Professional Experience in Connection with the Naval Construction of the last Ten Years—1884—1894," read by Rear Admiral Richard W. Meade, proved to be the most interesting of the whole two days, evoking a warm and lengthy discussion. Admiral Meade spoke first of the reluctance and delay in this country in abandoning wood for iron construction and of the recent progress in the manufacture of steel. He then took up the question of the vessels necessary to the navy, especially from the point of coast defence, suggesting seven different classes: Armored ships, high speed rams partially armored, torpedo vessels of at least 3 classes, high speed cruisers, to be drawn from the merchant marine, cruisers of moderate speed with good auxiliary sail power, gunboats of light draft, and finally store and training ships, practice vessels, tugs, etc. A very thorough outline of this scheme was presented, the essential qualities of each class being ranged in order of merit. In discussing the 4th class, Admiral Meade criticised the new triple screw vessels, expressing a doubt as to their claims of economy, and also as to their ability to overhaul such passenger steamers as the Majestic and Teutonic; as well as their superiority in battle over such a vessel as the American Liner New York, when fitted for war purposes as a commerce destroyer.

The discussion which followed the paper was both animated and interesting, the especial point of attack being Admiral Meade's criticism of the triple screw vessels. The second paper was on "The Use of Small Models for the Determination of Curves of Stability," by Mon. E. Bertin, Director of the French Government School of Naval Design; after which followed one on "Some Obstacles to Shipbuilding and Owning in this Country," by Geo. W. Dickie, Esq., Naval Architect, San Francisco, Cal., both read by Sect'y Capps in the absence of the authors.

A particularly interesting paper was read by Mr. S Dana Greene late ensign U. S. N., on "Electricity on Shipboard—Its Present Position and Future Development," "Cellulose and Its Application to Warships," was the title of a paper by Mon. E. Cheneau, Philadelphia, Pa., the day's session closing with Engineer-in-Chief Melville's paper on "The U. S. Triple-screw Cruisers Columbia and Minneapolis."

The first paper on Friday was entitled "A Dynamic Steam Engine Indicator Tester," by Professor Cecil H. Peabody and Assistant Professor E. F. Miller, Massachusetts Institute of Technology. Chief Constructor Philip Hichborn, U. S. N., then read a paper on "Experience Gained with Our New Steel Ships as Regards Care and Preservation," which brought out an interesting discussion on experiments in the preservation of iron and steel, and in composite construction. The paper on "The Present Status of Face-Hardened Armor," by W. T. Sampson, Captain and Chief of Ordnance, U. S. N., was read by Sec'y Capps, following which was one on "Hydraulic Power for Warships," by Naval Constructor Albert W. Stahl, which provoked considerable adverse discussion. Naval Constructor Baxter's paper, "Notes on Launching," was listened to attentively, the details of the launching of some of the new naval vessels being very interesting.

Yachting was represented by a paper on "Yachts in England and America" by Mr. Lewis Nixon, the designer of the Cramp Shipbuilding Co., in which the methods of measurement and the typical yachts of the two nations were compared. Mr. Nixon spoke very strongly in favor of the "one-gun" start, and also against the centerboard. In the discussion which followed Col. E. A. Stevens, the son of the late Edwin A. Stevens, and nephew of the late John C. Stevens, the founders of the New York Y. C., and builders of the Maria and America, criticised the conditions under which the America's Cup is now offered under the new deed of gift, comparing them with the original conditions under which the Cup was first devoted to the encouragement of international competition. The session closed with the reading of a paper on "The Accessibility and Circulation of Water Tube Boilers," by L. D. Davis, inventor of the Davis boilers, and one on "Recent Light-Draught Gunboats of the U. S. Navy," by J. J. Woodward, Naval Constructor, U. S. Navy. A paper by Prof. Durant was read by title, after which the meeting adjourned. The annual dinner of the Society took place at the Brunswick in the evening.

## The Centerboard.

THE following remarks, by Mr. Lewis G. Nixon, chief designer of the Cramp Shipbuilding Co. in the course of his paper on "Yachts in America and England," read before the Society of Naval Architects and Marine Engineers last week, are likely to give rise to considerable comment and discussion among yachtsmen.

"We find that the yachts of England and America are becoming more and more alike, or in other words, that points of superiority are quickly appropriated by rival designers.

"On one point, however, we find a very radical difference—that is, in the use of the centerboard. While for shallow harbors and cruising work a centerboard is a convenience, it is unfortunate that it should be considered essentially American, or that our success should be so often attributed to it. A heavy centerboard like that of Vigilant is a positive drawback. It greatly increases the draft, and where a vessel with a deeper draft than Vigilant could have gone, we find her striking the bottom when her centerboard was down. Its great weight (3½ tons) when lowered was doubtless an aid to stiffness, but the same amount of stiffness could have been obtained in another way. The attention required tends to detract the mind of whoever is in charge, and it requires men to handle it who might better be employed otherwise.

"There is another and, in my estimation, more important objection to the centerboard than any yet suggested. It is a device which, so far as the true aim of yachting is concerned, is neither seamanlike nor sportsmanlike.

"The true aim of yachting or yacht racing is to develop alike the art of the naval architect and the skill and alacrity of the sailor in turning to use nature's own motive power at sea—the wind. This aim presupposes a hull of simple lines and sections which shall be permanently uniform or the same under all conditions; that is to say, a keel boat The centerboard violates this principle flagrantly. It is a mechanical device not properly a part of the vessel, disturbing the interior economy of the boat, creating problems in design and construction that are extraneous and alien to the true art, and requiring appliances and practices in maneuvering that do not in any sense pertain to seamanship proper. In a word, it is the introduction of mechanics into a science which is intended to deal purely and primarily with the forces and the difficulties of nature alone.

"From this point of view I do not hesitate to declare that in any international race calculated to contest the question of supremacy in maneuvering sailing vessels, it would be quite as sportsmanlike for one party to provide his boat with a surreptitious storage battery to operate a small auxiliary propeller to help along in a drifting match, as with a device whereby he can increase or decrease at will the wetted surface, and with the lateral or longitudinal resistance of his boat according to the requirements of his point of sailing. One is quite as mechanical as the other, and hence they would be equally unsportsmanlike and unseamanlike."

The centerboard, Mr. Nixon stated, originated in a clumsy device of the early navigators of the North Sea, whose boats were simply tubs, and the only way they could be kept on any course was by hanging a barn door over the lee rail. "Surely such a device, originating from such conditions, cannot be a good pattern for sportsmen in efforts to develop naval architecture. While it is true that there is the expedient side of this question, which is that a vessel of 13ft. draught or over is of but little use, except for international racing, it is also true that, even with a centerboard, to be successful in future international races it seems almost necessary to go to greater depths in order to lower the ballast. If this is so, it seems desirable to cut loose and design an American keel boat for international racing."

## Lord Dunraven's Letter.

ON Nov. 13 the special committee to consider and reply to Lord Dunraven's letter met for the first time at the office of ex-Com. Jas. D. Smith, who presided, there being present Messrs. Canfield, Fish, Tams and Kortright. Both Gen. Paine and Mr. Philip Schuyler notified the committee by letter that they would be unable to serve, and Messrs. Archibald Rogers and C. Oliver Iselin were elected to fill the vacancies. The discussion of the Dunraven letter was private at this meeting, and at a second one on Nov. 15, at which all of the committee were present but Mr. Rogers. At this latter meeting a letter to Lord Dunraven was drawn up, which he will probably receive about Nov. 26, the contents in the meanwhile being kept private. According to a published interview, Gen. Paine approves of the suggestion that the challenger be permitted to select the fastest of several yachts, and also of that of a measurement with crew aboard, but not of the one-gun start. From all reports, Mr. Watson has not completed a design for Lord Dunraven, and no work has been begun. It is reported, but without confirmation, that the Prince of Wales has ordered a new cutter, narrower than Britannia, for next year. Britannia is now out at Hansen's yard, Cowes, where her copper has been stripped and replaced by new; and she will fit out in season for the Mediterranean races.

## YACHT NEWS NOTES.

Giralda, Capt. McCalmont's new steam yacht, is credited with a speed of 21 knots with little vibration on the trial trip. She will take part in the Mediterranean regattas in March.

Alcyone, steam yacht, of Philadelphia, is reported at Guantanamo, after being towed into Baracoa a derelict.

On Nov. 9 a club called the Revere Y. C. was organized at Revere, Mass.

The regular meeting of the Seawanhaka C. Y. C. was held on Nov. 13 with Vice-Com. Benedict in the chair. The meeting happened by chance to fall upon the birthday of Mr. L. F. d'Oremieulx, ex-secretary of the club, and the principal event of the evening was the presentation by Mr. Tams of a very handsome silver loving cup, with the following inscription: "Presented to Leon F. d'Oremieulx, 'Our Sec.,' by some of his fellow members in the Seawanhaka-Corinthian Yacht Club, as a mark of esteem and affection and of their appreciation of his ten years of service as secretary from 1884 to 1894." After the routine business had been disposed of, on motion of Mr. d'Oremieulx a committee was appointed to confer, if possible, with committees of the New York, Atlantic and Larchmont clubs over the revision of the code of yacht routine.

The largest sailing yacht in the world is now preparing for a pleasure cruise among the South Sea Islands. It is the Vine, owned by John Burns, of San Francisco, and she is being made ready in the estuary off the foot of Washington street. She is of 500 tons burden, with a length of 120ft. She was built three years ago in Tacoma for a merchantman and traded between that city and Central and South America until last spring. At that time her owner decided that he wanted to turn her into a pleasure yacht. The style is that of a revenue cutter, and very heavy. She carries 8,000 gallons of water, and when the deck house is completed will carry 45 passengers nicely, with a crew of 11. They will touch at Hawaii, Marquesas, Union, Ellice, Gilbert and Marshall islands, making fully 10,000 miles. The equipment will cost fully $40 000 when she is ready for the trip. Mr. Burns expects to set sail about Dec. 1.—*San Francisco Chronicle.*

# Rifle Range and Gallery.

## New York Schuetzen Corps.

NEW YORK, Nov. 17.—The New York Schuetzen Corps, Capt. Henry Offermann, inaugurated its winter gallery practice in the Zettler gallery last night. There was a large attendance of the shooting element of the corps and the result was a most satisfactory evening's sport. Up to last winter the corps had never given any attention to gallery practice, but had confined all rifle practice to outdoor shooting on the 200yds. ranges during the summer season only. Early last winter some of the active members of the corps decided to bring the members together for gallery practice. Accommodations were secured with the Zettler Bros. in their gallery, and a system of bi-monthly shoots inaugurated. The shoot was carried on independent of the corps itself and funds received from the members participating was held as a reserve for the purpose of purchasing prizes to be distributed among the members participating at the end of the season.

The result of the shoot last season was so satisfactory that when the outdoor season closed this fall Capt. Offerman and his board of officers decided to make this winter's shoot a corps affair and if possible bring all of the members into the competition.

The coming National Shooting festival which opens in Glendale Park, L. I., next July, is a strong lever which is being used to bring the members of the corps into line for this season's shoot. The gallery rifle is the best possible medium with which to educate the inexperienced shooter, and the Zettler gallery, its appointments combined with the experience of the two Zettler brothers, is by far the most favorable location to secure such education.

The programme of the corps for this winter's shoot is of such a nature as to place the novice as near upon a par with the expert as it is possible to put him.

Included in the programme is a series of team shoots which takes place at each meeting in which all the members present are divided into two teams.

It was our pleasure to be present at the opening shoot on Friday night. We congratulate Captain Offerman and his shooting committee upon the success of the opening event. We append the scores of the teams shooting in the two matches shot during the evening. Capt. Offerman's team against Capt. Tholke, two matches, scores:

FIRST MATCH.

| | | | |
|---|---|---|---|
| Tholke, Captain | 230 | Offerman, Captain | 212 |
| Zettler | 237 | Seigel | 233 |
| Grosch | 237 | Schmidt | 229 |
| Strate | 224 | Bonn | 235 |
| Krumsieck | 231 | Lempke | 182 |
| Kuhlman | 232 | Christian | 232 |
| Galle | 197 | Plump | 213 |
| Bindewald | 207 | Michaelson | 224 |
| Mann | 177 | Wilkins | 225 |
| Woodbrook | 215 | Hainhorst | 227 |
| Bovestedt | 215 | Mohrman | 229 |
| Burflend | 230 | Gobber | 211 |
| Facompre | 232 | Killian | 201 |
| Decker | 223 | Hoops | 202 |
| Meyn | 158 | Doris | 182 |
| Beckerman | 204 | Lohden | 186 |
| Wehrenberg | 224—3673 | Geibelhaus | 218—3642 |

SECOND MATCH.

| | | | |
|---|---|---|---|
| Tholke, Capt. | 234 | Offerman, Capt | 213 |
| Feigel | 237 | Zettler | 242 |
| Schmidt | 225 | Grosch | 237 |
| Strate | 225 | Bohn | 238 |
| Christian | 234 | Krumsieck | 210 |
| Facompre | 232 | Kuhlman | 218 |
| Hainhorst | 211 | Moohie | 220 |
| Decker | 212 | Wehrenberg | 217 |
| Geibehaus | 230 | Binewald | 234 |
| Galle | 200 | Norbrack | 216 |
| Meyn | 191 | Gobber | 197 |
| Mau | 191 | Killian | 219 |
| Lohden | 210 | Plump | 223 |
| Hoopes | 208—3057 | Berestein | 212—2859 |

## The Zettlers in the Gallery.

NEW YORK, Nov. 14.—The Zettler Rifle Club headquarters last evening was a scene of lively interest to the many riflemen who were present. It was the regular monthly meeting night also for the weekly gallery competition. There was the usual group of regulars who can always be found lined up ready for business when there is a prospect for a little argument with the rifle. One of the interesting features of the club meeting was the election to the membership of the club of Justice Geo. F Roesch. Judge Roesch in one of his characteristic speeches spoke of the Zettler Club as the most famous of all American rifle associations, and that he joined the club with the hope that he too might in the future become sufficiently proficient in the use of the rifle as to class himself as one of the experts. With the adjournment of the meeting came the competition for the club prizes in the winter season shoot.

Messrs. Holges, Ross and Dorrler who thus far in the weekly competitions have had a close race for first position were on hand and by good holding put up some fine scores. Holges got rather the best of the argument on the total for the best five scores.

In the competition for the champion medal for the best score on the first entry, the honor was divided between Messrs. Dorrler and Flach, each with 245. Holges and Flach tied for the high score of the night, each with 247. Scores:

Championship medal, first entry: R. Busse 242, Dorrler 245, Engel 244, Grosch 228, Klein 205, Ross 242, C. G. Zettler 238, H. Munz 219, Buzzini 227, Downs 230, Flach 245, Holges 243, Muller 231, B. Zettler 243, B. Walther 244, Krauss 224.

Five best scores: Holges, 243, 244, 247, 246, 246; Ross, 242, 242, 246, 246, 246; Dorrler, 245, 243, 245, 244, 244.

Best 10 shot score: Flach 247, Ross 246, B. Zettler 244, Downs 233, Muller 239, Krauss 239, Grosch 241, Ross 246, Holges 247, Engel 245, Busse 214, Klein 209, C. G. Zettler 246, Buzzini 236, Walther 244.

## In the Gallery.

GREENVILLE, N. J., Nov. 20.—There was a close and interesting gallery match between four members of the Greenville Rifle Club shot on the club ranges on Saturday night of last week. The four men were divided up into two teams, Dorrler and Chavant against Plaisted and Collins. The conditions of the match called for 100 shots per man. The stakes, refreshments for the club members present. Colin Boag referee and scorer. The club house was well filled with enthusiastic Greenville riflemen. The result of the match was a victory for the Dorrler-Chavant team by the small margin of nine points Scores:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| M Dorrler | 236 | 240 | 241 | 242 | 240 | 240 | 245 | 240 | 243 | 239 | —2406 |
| C H Chavant | 232 | 231 | 239 | 238 | 241 | 237 | 234 | 235 | 232 | 241 | —2360—4766 |
| G W Plaisted | 230 | 240 | 238 | 240 | 240 | 239 | 233 | 240 | 242 | 239 | —2381 |
| W C Collins | 237 | 237 | 237 | 236 | 241 | 236 | 242 | 238 | 238 | 234 | —2376—4757 |

## Greenville Rifle Club.

GREENVILLE, N. J., Nov. 17.—The Greenville Rifle Club held its weekly gallery shoot at headquarters last night. Geo. Purkess upset the nerves of his competitors by putting up the fine score of 246. The scores are appended: Purkess 246, C. Boag 237, Collins 236, J. Boag 234, Charlock 230, Agneau 227, Spahn 228, Chavant 227, Fagin 224, Hill 222.

### New York Central Schuetzen Corps.

THE New York Central Schuetzen Corps, Capt. D. Meersse, held their monthly meeting Nov. 14 at their headquarters, West Forty-seventh street. There were about 100 members present, this being the first meeting after their last outdoor shoot. This meeting has always been devoted to the distribution of the medals and money prizes to members who competed in the outdoor shoot. Forty members received prizes. The prize winners invited all present to join in a fine supper at their expense. Following are the winners:

Ring target—Champion Class—1, H. D. Muller; 2, F. Schmidt; 3, F. Schroeder; 4, D. Meersse; 5, J. Reitwasser; 6, G. Zimmerman; 7, P. Schmidt; 8, F. Schill; 9, H. Kroeger; 10, W. Ross.

Class I.—1, J. Eisenhardt; 2, C. Pletz; 3, W. Seppenfeldt; 4, J. Dux; 5, A. Rode; 6, E. Richard; 7, J. Brendel.

Class II.—1, E. Berkman; 2, J. Jorden; 3, W. Koch; 4, W. Teschmaker; 5, C. F. Gennerich; 6, F. Bauman; 7, M. Teschmaker; 8, W. Gagan; 9, H. Grannermann.

Class III.—1, M. Ficken; 2, J. Forsch; 3, H. Holsten; 4, J. Loewe; 5, J. Schneiss; 6, A. Ficke.

Class IV.—1, J. Tonjes; 2, F. Jutgen; 3, A. Richter; 4, A. Luck; 5, J. Ehlenberg; 6, A. Bosch.

Point medals—Champion Class—H. D. Muller, F. Schroeder, F. Schmidt, J. Reitwussner, G. Zimmerman.

Class I.—A. Rode.

Class II.—E. Berkman, J. Jorden, W. Koch.

Class III.—M. Ficken, J. Forsch, J. Schneweiss.

Class IV.—F. Jutgen.

Man Target: H. D. Muller, champion medal; F. Schmidt, second medal; J. Eisenhardt, first money; F. Schroeder, second; M. Ficken, third.

Class medals: Champion Class, H. D. Muller; Class I, J. Eisenhardt; Class II., E. Berkman; Class III., M. Ficken; Class IV., F. Jutgen.

HENRY D. MULLER.

### On the Greenville Range.

GREENVILLE, N. J., Nov. 17.—There was a small gathering of riflemen in Ambruster's Park this afternoon, but the weather conditions were not such as the target shooter delights in. There was a preponderance of rain and mist, so much so that the targets were at times somewhat indistinct.

The main feature of the afternoon's sport was a fifty shot match between M. Dorrler and G. W. Plaisted. In the match at Cypress Hills on election day these two men occupied second and third positions each with a total of 2067 points for the 100 shots. Since then there has been some good natured chaffing between the two as to their relative ability as marksmen. The result was the match shot to-day.

At the finish of the first twenty shots Dorrler was fourteen points behind. By brilliant work in the third string Dorrler reduced the lead to a tie and by continuing his good work he was enabled to win the match by fourteen points on a total of 1090. Plaisted made a good effort to down his competitor, making fifty black shots, but Dorrler had too much reserve force in stock to-day for him to overcome the old veteran. Scores:

50 shots, distance 200 yards.

| | | |
|---|---|---|
| Dorrler | 23 19 22 20 17 25 21 23 17 17 | —203 |

## RIFLE NOTES.

There appeared in the *Staats Zeitung*, one of our German papers, last week, a challenge from a Brooklyn rifleman to champion Gus Zimmerman, offering to shoot Zimmerman a 100-shoot match at 200yds. for a stake of from $1,000 to $5,000. Later developments have elicited the fact that the challenge was given out by Joe Weigler of Brooklyn, and the man he was going to put up against Zimmerman was that expert marksman Fred C. Ross. We do not expect to see such a match.

We learn that the shooting-house in the Union Hill Park was destroyed by fire a few days since. The destruction of this old landmark will be a matter of regret to the army of riflemen who have had the pleasure of shooting on this old and popular range. We are also informed that the Plattdeutsche Verein has purchased the park property, paying $100,000 for it as it stands. The park will continue to be used as a shooting park and picnic ground as well as a home for indigent Germans.

We learn that there is a new rifle association formed in Brooklyn known as the Unique Rifle Corps; its membership is said to comprise the most prominent of Brooklyn's many marksmen.

It is reported that the Greenville (N. J.) Rifle Club have in contemplation the holding of a prize shoot in Armbruster's Park on New Year's Day, 1895. If the weather should prove not too frigid on that day there is not much doubt but what all the local cranks will be on hand to answer the roll call.

The query has been put to us as to whether Barney Koenig had any facilities for heating the shooting house in his Glendale Park. At this moment we are unable to answer this query. This reminds us that there is to be a meeting in Glendale Park in December for the purpose of laying the cornerstone for the new range shooting house. As yet the date has not been made public. We heard tae suggestion made some days since by one of the cranks that on the day of the cornerstone laying it would be a good idea for Mr. Koenig to open up the present range and invite the riflemen to bring their rifles along and finish the day with rifle practice.

The Empire Rifle Club is holding a three-days' gallery tournament on the Zettler Brothers' ranges. The shoot closes to-night (Saturday).

## Trap-Shooting.

**All ties divided unless otherwise reported.**

**If you want your shoot to be announced here send in notice like the following:**

### FIXTURES.

NOV. 22-23.—PEORIA, Ill.—Peoria Parget Co.'s handicap tournament.

NOV. 26.—WEIR CITY, Kas.—Fall tournament of the Business Men's Gun Club. W. W. McIlhany, Sec'y.

NOV. 27.—LOUDONVILLE, N. Y.—All-day live bird shoot, under the auspices of the Loudonville Gun Club. Richard J. Lynch, Manager.

NOV. 28.—Central New York Trap-Shooters' League, eighth tournament, at Syracuse.

NOV. 29.—SOUTH ORANGE, N. J.—First tournament of the South Orange Field Club, under the management of W. N. Drake; targets.

NOV. 29.—CANAJOHARIE, N. Y.—All-day shoot of the Canajoharie Rod and Gun Club. Chas. Weeks, Sec'y.

NOV. 29.—RYE, N. Y.—All-day shoot of the Rye Gun Club; live birds and targets; shooting commences at 10 A. M. E. J. Pope, Sec'y.

NOV. 29-30.—WILMINGTON, N. C.—Eastern Dog and Game Protective Association's tournament; targets.

DEC. 20-21.—ELIZABETH, N. J.—Two days' shoot of the Elizabeth Gun Club; first day, targets; second day, live birds.

1895.

JAN. 1.—NEWARK, N. J.—Fifteenth annual New Year's Day tournament of the South Side Gun Club. W. R. Hobart, Sec'y.

JAN. 15-17.—HAMILTON, Canada.—Hamilton Gun Club's annual tournament; $1,000 added money. J. W. Bowman, Sec'y.

APRIL 3-5.—WILLARD PARK, Paterson, N. J.—Interstate Manufacturers' and Dealers' Association's third annual grand American handicap at live birds, at New York; $1,000 guaranteed, all surplus added.

## DRIVERS AND TWISTERS.

*Club secretaries are invited to send their scores for publication in these columns, also any news notes they may care to have printed.*

The following challenge has been received by the Harvard Gun Club: "The Yale Shooting Club hereby challenges the Harvard Gun Club to a match to be held Friday, Nov. 23, at the Colt Gun Club grounds, Hartford, Conn., provided these can be obtained. The same conditions as usual must govern the match, namely, five-men teams, thirty keystone targets per man, three traps at three unknown angles and American Association rules. Henry G. Miller, Jr., Capt. Y. S. C.; W. S. Miller, Pres., Y. S. C." The challenge has been accepted by Harvard. Princeton's gun club has been invited to take part in the above contest and will probably accept. Of last year's Princeton team the following are still in college: Wadhams, '95; Lewis, '95; Cresson, '95.

The South Orange Field Club has made a new departure in its career; It will hold an open tournament on Thanksgiving Day, Nov. 29, the tournament being under the management of Mr. W. N. Drake, of the Maplewood Gun Club. The programme consists of a 25 target race, a merchandise event; three 20 target races, two known angles and one unknown; three 15 target events, one at known angles, another at unknown angles, the third under expert rules, and five 10 target races, all at known angles. The grounds are only three minutes' walk from the South Orange station on the D. L. & W. R. R.; luncheon will be served free to all shooters. Loaded shells can be bought on the ground. Under Mr. Drake's management, with a programme as varied as the above, this initial tournament of the South Orange Field Club ought to be a success.

The Newark handicap is the title of a live bird race which W. H. Green, secretary of the Newark (N. J.) Gun Club, is promoting under the auspices of his club. The handicap is to be a duplicate as to conditions of the Empire City handicap of the Emerald Gun Club, which was such a great success. The conditions, therefore, will be 25 live birds per man, handicap rise, $10 entrance, first 15 birds to constitute an optional $5 sweepstake. It is proposed to hold this shoot on Erb's grounds during the second or third week in December. Judging from the success which attended the Empire City handicap with its 51 entries, the Newark handicap ought to have no difficulty in filling.

The Herron Hill Gun Club of Pittsburgh, Pa., has decided to hold a series of four live bird events during the winter. Each event will be at 25 live birds per man, $10 entrance, and will take place in Exposition Park on days to be selected later. These events will be handicaps, class shooting, three moneys, all shooters in western Pennsylvania, eastern Ohio and West Virginia will be invited. At the meeting of the club at which the above shoots were decided upon, the resignations of four well known shooters, who objected to the club's method of handicapping, were accepted without discussion.

In view of the recent Seaver Page—Brokaw match, which was left in an undecided condition owing to darkness, as told in last week's issue of FOREST AND STREAM, the following item from the Pittsburgh (Pa.) *Leader* of Nov. 12 will be of interest: "The live bird match of Bessemer and J. O'H. Denny, at 100 to 105 birds, which was postponed at Pittsburgh last week, with Bessemer 82 and 2 birds to shoot, and Denny 77 and 5 birds to shoot, was finished this morning at the Latrobe live bird meet. It was won by Bessemer."

The fall tournament of the Business Men's Gun Club of Weir City, Kan., is set for Nov. 26. Monday of next week. Shooting commences at 9 A. M. Secretary McIlhany has issued an interesting programme which calls for 105 shots in the regular events. Special features will be a live bird race at fifty pigeons each for $100 a side, between McIlhany and Wilkinson, and a team race for an oyster supper which will bring the day's sport to a close; teams will be picked and captained by the two men who make the best average during the day's shoot.

At the conclusion of the Climax Gun Club's monthly shoot on Thursday, Nov. 15, at Fanwood, N. J., "Dutchy" Smith gave an exhibition of his powers as an ambidextrous writer. Taking a piece of chalk in each hand he wrote the first name that came into his head. With both hands simultaneosly he wrote a name upside down with his left, backward way with his right. His most difficult feat was when he wrote his own name, Charles Smith, writing Charles with his right and Smith with his left, both written simultaneously and upside down.

An all-day shoot at live birds will be held on Tuesday next, Nov. 27, on the grounds of the Loudonville (N. Y.) Gun Club, 350 birds guaranteed. The shooting will consist of open sweeps with optional entrance fees. Ample shelter, warmed by a stove, will be provided, and dinner will be served at the house of Mr. Jack Long. Route: Take the 9 A.M. Belt Line train from Albany or Troy for Menands, where conveyances will carry all shooters to the grounds. Richard J. Lynch, manager.

A new gun club was organized Nov. 6 at Augusta, Me., under the title of the Gardiner Gun Club. The following officers were elected: Dr. W. P. Gidding, President; O. M. Blanchard, Vice-President; G. B. Barstow, Secretary and Treasurer; W. S. Whitmore, G. D. Libby, G. H. Holmes, F. W. Harrington, Directors. The club consists of twenty-five members and will meet for a regular shoot on their grounds next Friday afternoon.

The Empire Rod and Gun Clu had a live bird shoot at Dexter Park on the afternoon of Nov. 12. This was the Empire's first attempt at a regular club live bird shoot, the organization having previously devoted its attention to target breaking. Patrick Malone won the club medal at 7 birds with a straight score; in a 3-bird sweep that followed Malone again killed all, winning on the shoot off, miss and out, with 3 more.

The first 100 birds trapped on Tuesday afternoon last at Hollywood, N. J., proved very conclusively that if money enough is paid for pigeons, birds of a very superior quality can be obtained in the East. The pigeons in question were a specially selected lot shipped from Philadelphia, and cost f. o. b. just 35 cents each. They were well worth the money.

The live bird shoot held at the Latrobe (Pa.) Driving Park on Nov. 12 was an entire success. Among those who took part in the shoot were J. O'H. Denny, Frank Denny, A. H. King, W. S. King, "Bessemer," W. M. C. Jones, John Shafer, Wilson, Hamilton, etc., of Pittsburgh and vicinity, making altogether pretty warm company for anybody to tackle.

The two days' tournament of the Eastern Dog and Game Protective Association of Wilmington, N. C, which is to be held on Nov. 29 and 30 promises to be well attended. It is a gala week in Wilmington from Nov. 26 to Dec. 1. Those who attend the shoot will find lots to interest and amuse them outside of shooting targets.

An all-day shoot of the Rye (N. Y.) Gun Club will be held at the club grounds Thanksgiving Day, Nov. 29. All shooters are cordially invited to attend. No regular programme has been arranged; 300 birds and a good supply of targets will assure all shooters attending a good time.—E. J. POPE, Secretary.

The Essex Gun Club has decided to change its headquarters from the old grounds of the Jersey City Heights Club at Marion, N. J., to Erb's grounds at Newark, N. J. The Endeavor Gun Club is now the only organization regularly located at Al. Heritage's grounds at Marion.

On Tuesday, Dec. 4, the Paterson, N. J., and the Elizabeth, N. J., gun clubs will shoot a team race at live birds, 5 men to a team, 15 birds each man, $50 a side and the price of the birds. The match will be shot at Willard's Park, N. J.

It is a long time since any match has created so much talk in New Jersey as the Morfey—Batsch race, which came off on Nov. 14 at Elizabeth, N. J. The outcome of such shoots cannot but be hurtful to the sport of pigeon shooting.

The Philadelphia Gun Club is said to have bought the country seat of Richard S. Austin, near Andalusia, on the Delaware River, for a game preserve. Possession of the place, which cost $40,000, will be taken on Dec. 1.

The Gun Club at Canajoharie, N. Y., will hold an all-day shoot at live birds and targets on their grounds on Thanksgiving Day. The club extends a cordial invitation to anybody and everybody.

It is Yale's turn this year to make the arrangements for the annual shoot with Harvard; the Cambridge men are trying to have the event brought off at New Haven.

John Watson must have provided some great birds for the big sweep on Nov. 19! Kleinman 91, Brewer 89, and Elliott retiring on the 78th round.

The last few Saturday afternoons have been disastrous ones so far as target or live bird shooting with any degree of comfort was concerned.

Scott Tremaine won the Crescent Club's monthly handicap at 7 live birds on Nov. 10, the shoot taking place at Dexter Park, L. I.

The second day's programme of the Townsend testimonial benefit will be shot off during the first week in December.

As will be seen in the list of fixtures for 1895 the Hamilton (Ont.) Gun Club alters its dates from Jan 17-19 to Jan. 15-17.

### Kleinman, the Champion.

CHICAGO, Ill., Oct. 16.—There is a new champion in the little world of pigeon shooters. It is scarcely necessary to state that there was no crying need for another champion, because there has really been a superfluity of champions for a long time. We have had champions galore, and we have seen the term used so much that we are quite tired of it. For months past, the columns of the shooting papers have been filled with challenges and counter challenges from champion to champion, and we have had sarcasm, abuse and boasting in nauseating doses. Champion Carver has sneered, Champion Brewer has stormed and Champion Elliott has bragged, and the result of it all has been a rise of a brand-new champion, who has earned his title fairly and squarely in a hard, gamely-fought battle against all the would-be champions whose principal weapon has been the pen and not the gun. And the new champion is none other but FOREST AND STREAM's old friend, Brother George Kleinman, who used to have fun with Champion Elliott two or three years ago.

The trouble all started with Jim Elliott and Dr. Carver. After Elliott's brilliant victories in his recent series of matches with the erstwhile "Evil Spir of the Plains," James again heard the buzzing of that championship bee which bothered him so much four years ago.

It was sweet music to his eager ears and, like the siren's song, it lured him again to his undoing. He consented to come to Chicago, which has so often been the scene of defeat for him. Dr. Carver had arranged to shoot a large number of matches in Chicago, and had announced his intention of reaching here Nov. 6, and remaining as long as he could find people to shoot with. As the Doctor had not displayed invincible form in his races with Elliott, Budd and Crosby, and was supposed to be well supplied with money, quite a number of pigeon shooters concluded to visit Chicago about Nov. 6.

Charley Budd of Des Moines and Charley Grim of Clear Lake, Iowa, were the first to arrive, and then came Elliott and Harvey McMurchy and S. A. Tucker. On Sunday last, Capt. Jack Brewer came to town from New York, full of bluster and confidence apparently. On Monday the Doctor appeared on the scene. There was a meeting of champions, and they talked and blustered and got plenty afraid of each other, and drew down their various forfeits (all of which it seems, were provided with suitable strings for the purpose). Then the whole business looked like a huge fizzle, and we outsiders were beginning to get disgusted.

Dr. Carver, however, finally proposed a way out of the difficulty. He proposed that all the aspirants for championship honors enter a sweepstake of 100 birds to each man, with an entrance fee of $50, with but one money, and that the winner receive a medal made of iron, possessing no intrinsic value, but to be known as the "Cast Iron Championship Emblem," and to be forever subject to challenge every sixty days. In future contests the amount of the stake is to be $100 a side, except in the case of a foreign challenger, when the stakes shall be $500 a side. To this no one objected but Elliott, and the following promptly put up their money: J. L. Brewer, Dr. W. F. Carver, C. W. Budd, Charles Grim and Ed. Bingham. It was agreed to shoot on Thursday and to leave entries open until the morning of that day. Elliott at first positively refused to enter but finally did so and he, George Kleinman and Mr. R. S. Mott (a well known local amateur) joined the list of contestants.

The match began shortly after 10 o'clock at Watson's Park, Burnside. The day was an absolutely ideal one for the sport, being clear and with a very heavy wind blowing from the southwest. The birds were a good lot, most of them being as fast as ever flew from a trap. When fairly in the wind, it was almost impossible to stop them in bounds, and many got away without being touched. It was the kind of shooting to fairly test a champion's ability, and the lowness of the scores proves the quality of the birds, when the reputations of the men as shooting cracks are considered.

The shooting of George Kleinman throughout the contest was of the highest order, with the possible exception of his last seven or eight birds, when it was growing quite dark. He displayed remarkable judgment and centered his birds almost invariably. Many of his kills were simply wonderful, although the same can be said of each of the contestants. George fairly won the money and the title of champion by squarely outshooting his opponents.

Brewer seemed to be handicapped in his shooting through his evident intention of having fun with Elliott and Carver. He spent most of his time between shots talking to one or the other of them or to the crowd; he is certainly far from being a pleasant man to shoot with. The applause of the crowd over Kleinman's victory undoubtedly was heartier because of Brewer's defeat. Brewer had no sympathizers.

Elliott shot a quiet, gentlemanly race, but whether intimidated by Brewer's talk or simply lack of practice, he seemed out of confidence, of which he usually has no lack. Some of his misses were almost inexcusable, he withdrew after losing 11 out of 58. Carver shot a ragged race and was at no time dangerous. He must improve much over his present form to be considered the equal of Elliott, Brewer or Kleinman. Grim shot in great form up to his last 20, but lost 7 of them and fell below Carver. Many thought his gun had become leaded, as it seemed to be doing very poor work at the end. Bingham was over careful, and instead of shooting very quick as usual with him, he was slow and lost birds he should have killed. He, with Budd and Mott withdrew on the 69th round to give the others a chance to finish before dark.

Uncle John Watson as usual acted as referee, and the birds were retrieved by his two sensational pointers, Cyclone and Rush. Their work was much admired.

At the conclusion of the race, Elliott caused much favorable comment by being the first man to step up and congratulate George Kleinman, the new champion. It was a neat and graceful thing for him to do.

Detailed scores follow, with the flight of the birds indicated:

Championship of the United States, 100 live birds per man, entrance $50, one money and the championship medal:

W. P. MUSSEY.

### Carver Beats Kleinman.

CHICAGO, Ill., Nov. 19.—*Special to Forest and Stream:* Dr. W. F. Carver and George Kleinman, champion of the United States, shot a 100-live bird race this afternoon for a stake of $100. The day was a good one for the match, and the birds were all that could be desired. Carver won by killing 90 to Kleinman's 87. W. P. MUSSEY.

## Dropping for Place.

Mr. Hough's letter on the dishonesty and crookedness practiced at trap-shooting tournaments which appeared in Forest and Stream of Oct. 27 was a hummer. While agreeing with Mr. Hough in part, I must add that such pessimistic views as he has advanced will hardly receive many indorsements. The first three lines of the following paragraph seem a little too strong:

"I submit that the sport of shooting at the trap as practiced in the great American tournaments to-day is more dishonorable, more corrupt, rottener than ever horse-racing was. I submit that the rounder at the trap tournament who sails under false names and false records is as disreputable and should be as odious among gentlemen as the ringer at a horse race. I submit that the men who pool, combine and drop for place in the class shooting of our trap tournaments are as dishonest and as unworthy of the recognition and the society of gentlemen as the men who arrange in advance the results of a racing competition."

Having had no experience in tournaments west of the Ohio River, it is not for me to say what is the status of affairs out West. So far as the East is concerned, and from what tournaments I have attended in the South, I must enter a somewhat tardy protest against those first two lines and a half. "The rounder at the trap tournament who sails under false names," etc., is a person I have yet to meet; that is, to know him as such.

There are three propositions propounded by Mr. Hough in the said paragraph. Taking them categorically the first has been answered in the negative. Mr. Hough has evidently had but a limited acquaintance with either one or the other of the branches of sport he names—horse racing or trap shooting; it is only fair to presume that his information in regard to horse racing has been confined to newspaper reports of race meetings. If he had been fortunate enough to have seen much of horse racing, running and trotting, he would scarcely have been so unfortunate as to class trap-shooting as practiced to-day in "the great American tournaments" as "more dishonorable, more corrupt, rottener than ever horse racing was!" It is true that dropping for place does exist and that such dropping for place is really dishonorable; but my claim is that it merely exists, does not pervade the whole system. There are many reasons for this. In the first place the men who are best able to practice it on account of their skill are the men who belong to the expert class. Eighty per cent. of this class enter all through the programme, paying the whole amount asked in a lump sum at the beginning of each day, and are entered and shoot in the same squad throughout that day. With probably twenty-five or thirty more shooters to follow them, how can they divine into what hole they should drop? Those men do not need watching. It is the expert who hangs around and enters last, or nearly last, on the list, as Mr. Hough says in another paragraph. He is the man to be watched, and he is watched; I may add that I have also seen him. The practice of receiving entries up to the time of the last squad going to the score, sometimes later, is to blame for his being able to practice his crooked work. Is there, then, not a partial preventive right here? Could not a rule be made, and adhered to, that no entries in any event would be received after the first squad has completed its string? Then shoot experts first, semi-experts next and amateurs last. The latter is generally lucky when he gets a pice of the purse; his chances are greater of dropping out altogether rather than into a place.

The second proposition, in regard to the "rounder at the trap tournament," is all right. Such a man would naturally "be as odious" as "the ringer at a horse race."

The third proposition may be dismissed as summarily as the second. There's no fault to be found with it.

Where Mr. Hough and I disagree is as to the degree of crookedness which exists in the trap-shooting tournaments of the present day. On this point it would be very interesting if Mr. Elmer E Shaner, the gentleman who has so ably managed for the past two seasons the tournaments of the Interstate Manufacturers' and Dealers' Association, would give his views on the subject. Anything Mr. Shaner might say (and trap-shooters will agree that this is no mere flattery) would have weight. Intimate connection with the ins and outs of at least a score of large tournaments during the past two years must have left him with some idea as to the status of trap-shooting at the present time; and will also probably have caused him to think out some plausible scheme to prevent this evil of dropping for place. Dropping for place must first be attacked. Get rid of that, or reduce it to a minimum, and then tackle the pooling or combining parties. The latter will be a tough nut to crack; but with dropping for place done away with, it might almost be tolerated as an evil that cannot be downed.

Further down in his letter Mr. Hough says: "There are more than fifty shooters in America." Yes, there are, thousands of them, and new gun clubs are being organized every week solely for the purposes of trap-shooting. The misfortune is that all of those thousands are not either wealthy men of leisure or expert shots. None but the latter can ever go to a tournament and expect to come out whole or nearly so. The money left behind at large tournaments is considerable. Take the expenses of a three days' target tournament that took place this summer: 22,000 targets at 3 cents each were thrown=$660; hotel bills, etc., for 3 days at $3 per day (an extremely moderate figure for that "etc."!) for 30 shooters=$270. We thus have a sum of $930 absolutely left behind by the shooters, no account being taken of what was taken away by some of them. Trap-shooting is a sport, but it's a mighty expensive sport as shown by the above figures, to which could be added the cost of about 20,000 cartridges at an average cost, including expressage, of probably 3 cents each; add also the price of the railroad tickets. Figures undoubtedly talk, and such figures as those given above speak very loudly.

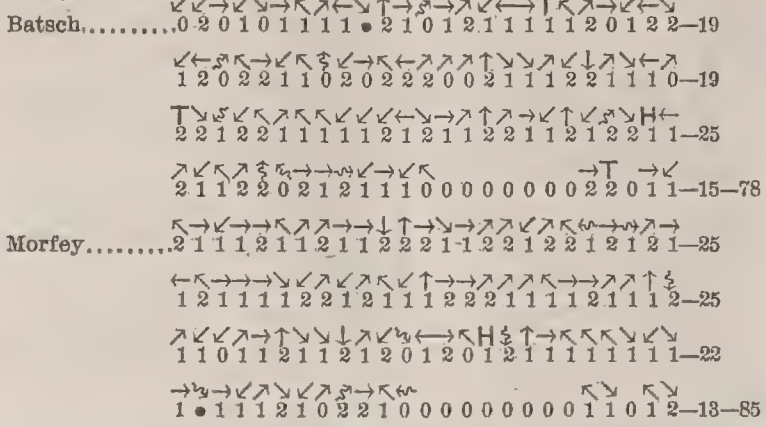
It is this expense, together with the ties of business, that keeps down the attendance at our tournaments far more effectually than either the crooked work or the "rounder" may do. It is the necessary expense incurred by attending and shooting at any tournament which forbids that tournaments being "really open to all, and not only open to a few." Edward Banks.

## A Public Outrage.

It is a most fortunate thing for the welfare of pigeon shooting that such matches as the Morfey-Batsch race at Elizabeth, N. J., on Nov. 14, are seen but seldom. The finish of that race was a disgrace to the principals and to those who in any way participated in the shoot. It is also most unfortunate that a young and enterprising club, such as the Elizabeth Gun Club, should receive such a black eye through the work of some of their fellow members. Although the match was a private one, and not in any way promoted by the gun club, yet it was held on the club's new grounds and the authorities should have seen to it that nothing should inure to the discredit of their organization. In this they were negligent, thereby losing a certain amount of caste in the trap-shooting world. The story of the race is decidedly unpleasant writing.

In the first place the match was stated to be for $100 a side, Morfey giving his opponent 20 dead birds. Morfey refusing to give Batsch these odds, the race was shot on even terms. That fact alone created some suspicion as to whether the shoot was to be a square one or a fake. That Batsch, an untried man, should be backed against a man like Morfey at even terms for $100 a side looked like either a piece of foolishness or a fake. I am afraid it was the latter, as I am told on good authority that there was only $15 a side on the race: that is, each side was running the risk of losing $15 besides the cost of the birds on the chance of winning what? Just the sum of $15! Two hundred birds at 25 cents each cost $50! There may have been gate money in it; there probably was, as 25 cents admission was charged at the gate. About 100 persons were present at the shoot and I suppose the majority paid the admission fee. Now that wouldn't pay expenses. Anyway the race was started, Morfey running away from Batsch right on the start; he shot in really fine form, killing his first 52 straight, a good score although the birds were nothing extra. At the commencement of the 53d round Morfey was 12 birds in the lead. Out of his next 13 he dropped 3 while Batsch went straight; Morfey's lead was thus 9 birds. Just about this time, the 66th round, Morfey openly made a bet of $20 that he would beat Batsch by 10 birds. It looked as if he meant it as he afterwards made a remarkable run of one barrel kills; several of his friends put up money on the same terms, Morfey assuring them that he was going to beat Batsch 10 birds if he could. He told me personally that such was his intention.

The race was an interesting one to watch, both men shooting in good form. From the 50th to the 88th round Batsch missed but one bird, Morfey having dropped five meanwhile was only 6 ahead. Then came a break. Morphy had missed his 87th bird, whether intentionally or not I can't say; it looked to me as if he feathered it with his first barrel. Batsch went to the score for his 88th bird and fired both charges of shot into the ground between the score and the traps; the bird was a left-quartering driver from No. 4 trap! Each man then missed 8 in succession, neither one making any pretense of aiming at the bird; sometimes they even saved a shell, firing but one barrel. Batsch's 90th gave him some trouble to lose; the bird could hardly fly at all; in fact, although not a pellet of lead hit it, it was unable to fly out of bounds. Batsch elected to go and gather it himself. What followed was disgraceful. He could have gathered the bird a dozen times, he had it in his hands once and it should have been scored to him; finally, however, he chased it out of bounds. It was a nearly impossible feat, but he did it. Some of Morfey's friends, who now smelled a rat very strongly, urged him to kill; he said he'd not kill till Batsch did. The score shows that when Batsch did at last kill Morfey did the same.



Some people may not understand all this missing. Very little explanation is necessary. It seems, from Morfey's own statement made openly in the club house after the shoot, that he (Morfey) had bet $40 that he would not beat Batsch by 10 birds when he "saw which way things were going." As soon as Batsch found, or suspected, that Morfey's money was going up in a different way to that first $20 bet, he determined, as the race was lost anyhow, to try and protect his friends. He therefore missed intentionally, but Morfey had the whip-hand; he had but to miss whenever Batsch did to win his "$40."

I must say that Morfey was not getting all that was coming to him: at any rate during the last half of the match. It required no wizard to spot Batsch's trap every time he went to the score; an eye on the pulling ropes was all that was necessary. Two wrongs, however, never make one right, and Morfey's actions in the latter part of the race will be hard to excuse. It was a deliberate throwdown in a few cases; a matter of diamond cut diamond in the remainder.

In order to give this outrage on those who paid to see the match more prominence, the full score is attached. The flight of certain birds is not given for the obvious reason that neither shooter tried to kill those birds. Score:

Match, 100 live birds a side, $1— a side:

*Trap score type—Copyright, 1894, by Forest and Stream Publishing Co.*

In justice to Mr. Robert E. Chetwood, the president of the Elizabeth Gun Club, and to what he terms "a large majority of our club members," it is only fair to state that he, as president of that club and on behalf of the majority, has written a personal letter to Forest and Stream repudiating the actions of the principals in the above match, and expressing mortification at the outcome of the shoot. Mr. Chetwood states that resolutions had been passed a few days previous to the match, forbidding absolutely any betting or drinking on the premises of the club. He adds that these resolutions will be strictly enforced in future and will have to be adhered to; otherwise "we will not belong to the club, but will withdraw from it if liquor is obtainable and open betting is carried on. * * * We have not changed our intention in that respect." Edward Banks.

## Watson's Park.

Scores made during this month are as follows:

*Nov. 5.*—Von Lengerke and S. Parker, 100 empire targets, 5 unknown traps:

## The New Utrecht Gun Club.

The third contest for the cup presented to the New Utrecht Gun Club by Capt. Money and his son, N. E. Money, of the American E. C. Powder Company, was decided on Saturday, Nov. 17 on the club's live bird grounds at Woodlawn, L. I. Morfey, C. Furgueson, Jr., and C. A. Sykes killed their ten birds; on the shoot off, miss and out, Morfey missed his third bird and retired; Furgueson then killed his fourth and won, Sykes dropping his bird. Scores:

American E. C. Powder Company's cup contest, 10 live birds per man, club handicap, ties divided, miss and out:

## Hill Lost by One Bird.

Trenton, N. J., Nov. 16.—Eddie Hill lost by one bird in his match at Yardville, N. J., with T. W. Morfey, of Paterson, N. J. The scores of 93-92 show that both men were shooting in good form, Hill really losing the match at the start, dropping his 4th, 5th and 6th birds. The birds were first-class and the time taken to shoot the match, one hour and 39 minutes, proves that there were very few loiterers; of course a lot of time was saved by the retrieving of Charlie Zwirlein's black setter dog Nig. Frank Class acted as puller, while Cubberly worked the indicator. Scores:

## Rockaway Point Gun Club's Scores.

The following scores were made by the Rockaway Point Rod and Gun Club members at their regular monthly shoot, the entrance money being nominal in all events:

No. 1, 10 targets, everything known: Scott 6, E. Bourke 2, Spott 3, Place 5, Jennings 3, Schorty 8.

No. 2, same conditions: Scott 3, Schorty 10, Heyer 7, Spot 5, Place 6, Colman 4.

No. 3, same conditions: Scott 4, Place 7, Schorty 8, Colman 3.

No. 4, same conditions: Floyd 6, Scott 6, Place 6, Schorty 9, Loeble 6, Horstman 0. Ties for second and third shot off and won by Floyd and Scott respectively.

No. 5, same conditions: Loeble 6, Floyd 9, Scott 9, Place 8, Sabin 2, Schorty 8.

No. 6, same conditions: Scott 4, Floyd 8, Place 8, Loeble 9, Schorty 8. Loeble first, ties on 8 divided second.

No. 7, club shoot, 25 singles per man, sweep included, 3 moneys:

| | |
|---|---|
| Tiernan | 1111100010011111011111111—19 |
| E Bourke | 0100101100100000011010100— 9 |
| Schorty | 1111111111011110101110111—21 |
| Loeble | 1100010111110101111101001—16 |
| Lyons | 1011110110101001110011011—16 |
| Weeks | 1000000000100000000000000— 2 |

| Floyd | 1111110011111011111111011—21 |
| J Meyer | 0010110001100000001001000— 7 |
| Bowen | 1000011011111001100010001—12 |
| Spott | 0010000010011010101010000— 8 |
| Place | 1000000111111111010010001—13 |
| Sabin | 1001101101111010001111101—16 |
| Steinbrucker | 0000000101101010101101000—10 |

Floyd and Schorty first, Tiernan second, Loeble and Lyons third.

No. 8, 10 singles, everything known: Tiernan 6, Schorty 9, Prindle 1. Floyd 9, Bowen 8, E. Bourke 3, Lyons 4, Sabin 2.

No. 9, same: Stoney 3, Schorty 7, Floyd 9, Bowen 1, Tiernan 7, E. Bourke 1.

No. 10: Floyd 7, Tiernan 5, Schorty 8, Woods 7, Bowen 6.

No. 11, 5 pairs empires, one money: Tiernan 5, Schorty 4, Bowen 3.

Half Shell.

## Boiling Springs Gun Club.

Rutherford, N. J., Nov. 10.—The scores given below were made this afternoon at our monthly club target shoot. The wind swept across the traps, giving the targets a very erratic flight, this accounts in a great measure for the low scores made. Scores:

Club shoot, 25 targets, unknown angles:

| | |
|---|---|
| James | 1110101100000110000101101—12 |
| Richmond | 1111111100110101111101011—19 |
| Huck | 1111011110011110111011101—19 |
| Frank | 1101101000111100101011000—14 |
| Jeanerette | 0001011111111111011110011—18 |

| Chaffee | 1111101111111011001111110—20 |
| S E Wolff | 1010010000000000010100001— 6 |

The following sweeps were also shot:

No. 1, 10 birds, 50 cents: Richmond 6, Huck 8, James 5.

No 2, 10 birds, 50 cents: Huck 8, Richmond 7, James 6, Jeanerette 6.

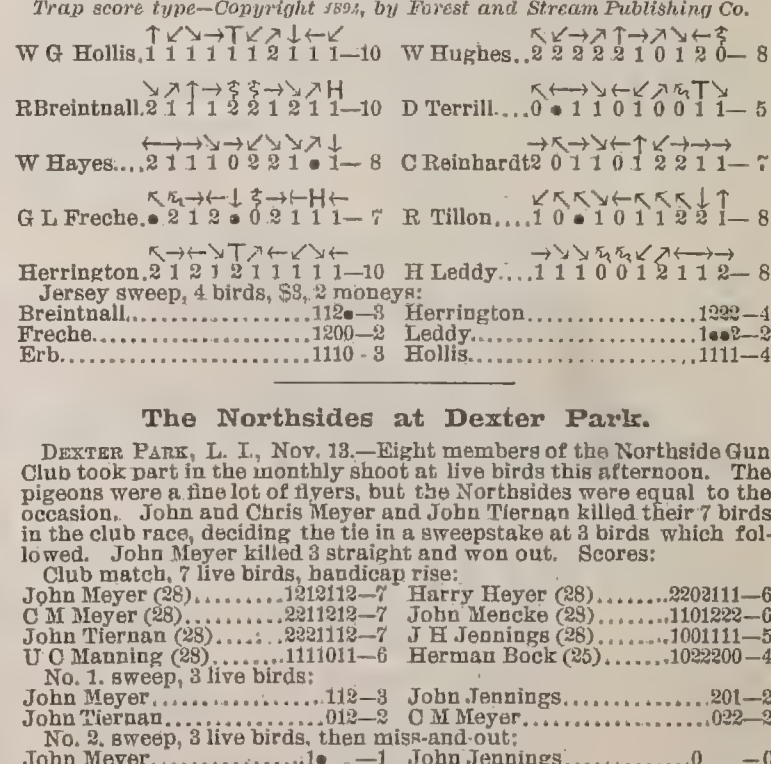
No. 3, 10 birds, 50 cents: Richmond 7, Huck 8, Van Dyke 9, Collins 7, Jeanerette 3 Paul 5.

No. 4, 10 birds, 50 cents: Van Dyke 9, Paul 7, Huck 8, Richmond 9, Collins 8, Chaffee 6.

No. 5, same: Richmond 7, Huck 6, Van Dyke 8, Collins 6, Chaffee 5, Paul 3 DeWolf 6, Jeanerette 5, James 7.

No. 6, same; expert: Richmond 6, Huck 6, Paul 5, DeWolf 6, Van Dyke 7.

No. 7, 10 birds, 50 cents: Richmond 8, Huck 7, Collins 6, Van Dyke 9, DeWolf 6, Chaffee 6 Jeanerette 5, Paul 7.



No. 8, same: Richmond 6, Huck 10, Van Dyke 9, DeWolf 4, Frank 7, Paul 8, Chaffee 5.

No. 9, same: Richmond 8, Huck 8, Van Dyke 8, Collins 7, Jeanerette 3, Paul 10, Chaffee 5, DeWolf 7. Wm. H. Huck.

## Shooting Live Birds at Erb's.

Newark, N. J., Nov. 15.—The Essex Gun Club held its club shoot at live birds at Erb's grounds this afternoon. There were 10 entries for the club race at 10 birds. Reinhardt shooting with the club for the first time since '92. Among the shooters also was D. Terrill, the veteran of the club, who will be 80 years old next spring. His 50 per cent. score is largely due to the fact that he was rather tired after a two days' hunt during which he had played out both his sons! Breintnall, who is suffering from his hands being swollen through rheumatism, and Herrington, whose gun broke down, both shot well. Herrington after the mishap to his gun shot with Hollis's gun, which its owner has got into such good training that it can't help but point straight. In the Jersey sweep, which followed the club race, Leddy was unfortunate enough to lose 2 birds dead out of bounds; he says that if he "had known it was only 50yds. boundary," he'd have killed them with his first barrel sure. Scores, club shoot, 10 live birds:

*Trap score type—Copyright 1894, by Forest and Stream Publishing Co.*

Jersey sweep, 4 birds, $3, 2 moneys:

| | | | |
|---|---|---|---|
| Breintnall | 112•—3 | Herrington | 1222—4 |
| Freche | 1200—2 | Leddy | 1••?—2 |
| Erb | 1110 - 3 | Hollis | 1111—4 |

## The Northsides at Dexter Park.

Dexter Park, L. I., Nov. 13.—Eight members of the Northside Gun Club took part in the monthly shoot at live birds this afternoon. The pigeons were a fine lot of flyers, but the Northsides were equal to the occasion. John and Chris Meyer and John Tiernan killed their 7 birds in the club race, deciding the tie in a sweepstake at 3 birds which followed. John Meyer killed 3 straight and won out. Scores:

Club match, 7 live birds, handicap rise:

| | | | |
|---|---|---|---|
| John Meyer (28) | 1212112—7 | Harry Heyer (28) | 2202111—6 |
| C M Meyer (28) | 2211212—7 | John Mencke (28) | 1101222—6 |
| John Tiernan (28) | 2221112—7 | J H Jennings (28) | 1001111—5 |
| U C Manning (28) | 1111011—6 | Herman Bock (25) | 1022200—4 |

No. 1. sweep, 3 live birds:

| | | | |
|---|---|---|---|
| John Meyer | 112—3 | John Jennings | 201—2 |
| John Tiernan | 012—2 | C M Meyer | 022—2 |

No. 2, sweep, 3 live birds, then miss-and-out:

| | | | |
|---|---|---|---|
| John Meyer | 1• —1 | John Jennings | 0 —0 |
| John Tiernan | 21021—4 | C M Meyer | 21020—3 |

## The Buffalo Audubons.

The members of the Buffalo Audubon Club held their annual live bird shoot at Daw's Park, Nov. 9. The shoot began at 10 o'clock in the morning and lasted all day. Fifteen birds was the limit, and there were 33 entries. The score was as follows: C. S. Burkhardt 14, first prize, $5 in gold; A. Kobler, L. Fries, L. W. Bennett, 13; Kobler was the lucky man and won a shell loader; L. Fries captured $2 in gold; J. H. Ball, G. Fleischman, C. Oehmig, A. C. Heinold, Kirkover, R. Hankins 12; Hankins won a gun case, Kirkover $2 in gold; A. Zoeller, E C. Burkhardt, McMichael, J. Feist, Willett 11; A. Zoeller won a shell case, J Feist $2 in gold; A. Forrester, Wm. Brennan, A. Combs, J. O'Brian 10; O'Brian took a case of stuffed birds, Forrester $2 in gold.

Thanksgiving Day the club will shoot at keystone targets. The prizes will consist of turkeys, ducks, geese, chickens and other birds. The club has some expert marksmen, and there is talk of a match with a gun club in Rochester. H. J. B.

Pittsburgh, Pa.—There will be a handicap sweepstake shoot at the North Side Gun Club grounds, Marshall avenue, Allegheny City, Pa., Thanksgiving afternoon, Nov. 29. Programme: 15 targets, entrance $1.30; 15 targets, handicap, entrance $1.30; 15 targets, handicap, entrance $1.30; 15 targets, handicap, entrance $1.30; 15 targets, entrance $1.30. Handicap races will be shot under the following rule: Experts will shoot from five unknown traps, semi-experts from three unknown traps, amateurs known traps and known angles. Shooting will commence at 1 P. M. sharp. Lunch will not be served on the grounds. Elmer E. Shaner, "Old Hoss," Fagan Montgomery, handicap committee. N. B.—The amateur will be protected.

## The Effect of the Wadding Material Upon the Performance of Shotguns.

BY ARMIN TENNER,

Superintendent American Testing Institution.

THE question as to what extent the performance of shotguns is governed by the quality of the wadding material employed in the ammunition has time and again been made the subject of more or less exhaustive experiments. So far as the results of these tests are known they did not tend to bring this rather complicated problem very near to a satisfactory solution. In the majority of cases the work performed lacked a systematic basis, the means and methods employed were, as a rule, inadequate for the occasion, and consequently the results either did not serve as a foundation for arriving at a correct conclusion, or the conclusions drawn from them rested upon false premises.

The problem at issue is of a much more intricate nature than is generally supposed by those who believe to have penetrated the mysteries surrounding the theory of shot shooting, when, in fact, they have barely touched its surface.

In dealing with the subject we must take numerous factors into consideration, and endeavor to find something like a satisfactory explanation for the many strange phenomena by which we are confronted in trying to explain and to bring into harmony cause and effect. But for the very reason that this task is quite a difficult one, the problem at issue presents an everlasting charm for the student of ballistics and the sportsman, and incites to continuous researches and experiments. Prompted by such an impulse, I have recently conducted a series of comparative tests between the different wadding materials as they are in the American market and at the disposal of the sportsman, and herewith submit the results of this trial to the American shooting fraternity.

I hope that my report will prove of general interest, and to serve to shed some light upon the much discussed and certainly important question referred to.

I do not claim that the problem has been solved definitely and conclusively through me, but if the reader will kindly take note of the figures quoted he will, I think, at least admit that neither time nor expense has been spared to do the subject full justice.

I can modestly assert that, to my knowledge, no wadding material test has ever been made before in this or any other country on so broad a scale as the one carried out at Dexter Park during the past three months. Whether, after all, the results achieved stand in any proportion to the sum of work performed is quite another question, and one the reader must decide for himself. It is sufficient to say, that in all over 5,000 rounds of shots were fired, and not less than 1,000,000 single pellets counted on the 30in. circle of the target.

The wadding material inserted between the powder and shot charges in shotgun ammunition serves various purposes. In the first place, it is intended to prevent the gases generated by the exploded powder charge from penetrating and disturbing the shot column. This object may be accomplished with any elastic, gastight material, whether dry or lubricated. By means of its elastic nature the wadding material is expected to neutralize or at least diminish, to a certain extent, the effect of the often violent push exercised by the generated gases upon the shot charge, and thus prevent, especially when we are dealing with a very quick-burning powder and an abrupt cone of the cartridge chamber, one of the chief causes for balling of the shot; *i. e.*, that the rear portion of the shot load be driven into the foremost part of the shot column The lubricated wad serves, in addition, to diminish the tendency of fouling of the barrels through the residue of the burned powder deposited in the bore of the gun.

The shotgun wad should possess a certain degree of elasticity, or, if several wads are employed, one of them at least, without assuming a spongy nature. It should neither be too heavy nor too light in proportion to its size or thickness. Although pretty satisfactory results are occasionally obtained with imperfect wadding, yet even—as will be shown later on—with one cardboard wad over the powder only, the quality of the material ought to be such as to impart to the wad both sufficient density and cohesive properties. A wad really deserving to be designated as a superior article, should leave the gun barrel with no or little apparent sign of damage. It should not deform much in its travel through the barrel, not lose its original shape, and certainly not blow to pieces. It should be as near circular as possible, of uniform thickness individually, and when compared with other wads of the same kind and bag, and its cohesive qualities ought to be such as to withstand the attempt to pull it in two between the thumb and forefinger of both hands.

The material now principally employed for wadding is either hair felt, a mixture of hair and wool felt, and in some cases wool felt. Various other materials have been substituted from time to time for felt; but up to the present the felt wad has not found its equal. Cork, leather and various other materials have been selected to take the place of felt, and recently a wad composed of fine ground cork, linseed oil and other ingredients has been placed in the market. Many advantages are claimed for this new composition wad, and the reader will find in the report whether or not the new wad really possesses any marked superiority over felt.

In order to secure the best possible service from a shotgun, the diameter of the wad should conform as near as possible to the bore of the individual gun. The diameter should not be below that of the bore, nor greatly in excess to the latter. In the last case it is liable to cause undue friction in the barrel, and to absorb a portion of the propelling force developed by the powder charge at the expense of the shot load. Too large wads frequently accompany the shot column a distance of 140ft., or much further than necessary and desirable. If too small, the wad may fail to serve as a gastight cushion between the powder and shot charges, especially in such cases where a 2⅝in. shell is used in a gun chambered for a longer cartridge case. The wad should fit the shell tightly, and also the bore of the gun. It should offer a slight resistance to the cleaning rod when pushed through the barrel, from the cone of the chamber to the muzzle.

The diameter of the bore of guns of the same caliber are by no means uniform; they vary considerably. Thus, for instance, the diameter of 12-bore guns vary between 0.704736in. to 0.783478in. It is, therefore, evident that a wad just sufficiently large to fit and suit a barrel with a minimum dimension of the bore will hardly be adapted for a bore measuring 0.078742in. more.

In view of these differences of the bore, wad manufacturers now generally cut their wads a trifle larger than the regular gauge. The most popular, and, perhaps, best adapted diameter for a 12-bore wad is 0.748045in. This dimension is still a trifle below the maximum dimension of 12 bore guns; but since these large dimensions are rare exceptions, and considering that the elastic wad, when pressed against the shot column by the force of the gases, naturally expands, the small difference between the diameter of the wad and that of the bore of the gun is easily overcome. Wads larger than the gauge, especially when consisting of a hard material, are apt to bulge the shell, and this may cause annoyance. The U. M. C. Co.'s wads labeled 12-gauge are all 0.748045in. in diameter, or about as large as the Eley 11¾ wad and the several kinds of Hurlingham wads offered by Von Lengerke & Detmold, and designated as 11¾ gauge wads.

Full 11-gauge, and especially 10-gauge wads, when employed in 12-bore guns, frequently prove too large. In some cases they appear to exercise a detrimental effect instead of a beneficial one, as compared with the regular 12-gauge wad.

Guns of a faulty bore may sometimes necessitate the use of an 11-gauge wad; but there is hardly ever any occasion for employing a still larger wad in a 12-bore gun. A hard 10-bore wad may, under certain conditions, be instrumental in bulging a gun at or near the choke, and the same may be said of a very hard and thick cardboard wad if used either over the felt or as a top wad. They increase the recoil and the gas pressure. The moment the shot column quits the muzzle of the gun the usefulness of the wad is at an end. The wad should now soon come to a point of rest; it should fly to one side or drop to the ground after having followed the shot cloud from 30 to 80ft.

Lubricated wads, as all intelligent sportsmen know, ought not to be brought in direct contact with the powder charge, for the reason that the powder has a tendency to absorb a portion of the lubricant contained in the wad, especially when shells are stored for a long period. A cardboard, field or trap, or any other thin, dry, preferably moisture proof wad, should be placed on the powder charge, unless a so-called express wad is used, which is covered on both sides with a moisture proof cloth. This express wad answers particularly well in all cases where economy in space must be exercised, and when the trouble of loading several wads is to be avoided.

Some powders appear to be more susceptible to inferior wadding than others, and the same rule applies to guns. It is quite difficult, yes, almost impossible for the individual sportsman to determine these last named peculiarities for himself. They can be established in anything like a satisfactory manner only with the aid of the requisite ballistic instruments and by comparisons with several powders, guns, wadding material, shells and primers. The reader will now understand why, in this test, all kinds of powders, shells and five different makes of guns were employed. The trial would hardly have amounted to much if only one kind of powder, one particular shell, and one make of gun had been used.

The American Testing Institution has been established and is maintained for the principal object of serving the interests of American sportsmen and American industry. In view of this fact I would have preferred to employ in this test chiefly American-made guns. I used, among others, an American-made gun at Chicago, and have been subjected to a great deal of unpleasant comment by the representative of that gun because I neglected at the time to apply to the manufacturers directly for a gun for that occasion. It was openly charged that I thus indirectly discriminated against the American gun. Although I never intended to favor any particular gun, and have not the least preference for any gun, powder, shell or wadding material, I made it my object to guard against any similar criticism, and therefore requested four American gun manufacturers to furnish me a gun each for the test; I even offered in one case to have the shooting done by their own representative, and, of course, invited them all to witness the trial. I am sorry to say that only one firm complied with my request. The New York agents of the Remington Arms Co. cheerfully placed one of their $20 grade 12-bore hammer guns at my disposal, and this was taken at random from the stock. I called attention to the fact that the gun would be subjected to a very severe test in point of strength, inasmuch as I should use very heavy loads in it, but the representative did not hesitate to loan the gun under these conditions. On the contrary, he stated that I should try the gun under precisely the same conditions as all others and the higher grade guns. This was done, and I may here say that the gun stood the test well. I owe the reader this explanation, for he might otherwise wonder why I used four foreign guns and only one American, for at least a large portion of the trial. The test carried out was not a gun, primer or powder test proper. It was a comparative test of wadding materials; but such a trial will naturally likewise serve to draw pretty correct conclusions in regard to the qualities of the various guns, powders and shells. It may perhaps also be considered the most exhaustive gun and shell test ever carried out in this country, and is to some extent, although not intended as such, a repetition of the Chicago powder test.

For pattern all shots were fired from muzzle rest. The figures quoted in parentheses under this heading represent the number of pellets counted in each case in the skeleton of a pigeon placed in the center of the target at 40yds. The main values given constitute the number of pellets counted within the 30in. circle (not selected). All shot charges were counted, not measured. The powder charges were measured with the regular dip measures. Tatham's chilled shot No. 7 regular was used throughout the test. Velocities and gas pressures were taken simultaneously, the former at 25 meters=82ft. from the muzzle of the gun, the pressures at the cartridge chamber. The velocity values should not be compared with those obtained in the Chicago powder test where the velocity was taken at 40yds. Five rounds of shot were fired, each for velocity, pressure and pattern. The velocity, pressure and pattern values quoted represent in each case the average of five shots with the greatest differences from shot to shot. Four pellets in the skeleton of the bird may be considered equivalent to a kill. All the wadding materials, guns, powders and shells were tested under precisely similar conditions. A sheet of muslin was spread between the muzzle of the gun and the target to facilitate the gathering of the fired wads, which was done for the purpose of examining them in regard to condition.

The shooting qualities of the guns or the properties of the shells should not be compared in those cases where "purely experimental" wadding was employed. No gun, or shell, or powder can be expected to do good work, for instance, when only one cardboard wad is used between the powder and shot charges. It must further be borne in mind that some of the guns employed were chambered for longer than the 2⅝in. shell as principally used, and the performance of these guns can therefore be judged correctly only in comparing the values obtained in the standard and the shell for which they are chambered.

One kind of black powder was used only, namely, DuPont's Eagle Ducking, but it can fairly be presumed that all other black powders are governed by the same conditions in regard to wadding as Du Pont's.

For the guidance of the reader I will here quote the average pattern and velocity values considered as standard.

12-GAUGE GUN, SHOT NO. 7, 1⅛ OUNCES.

Common cylinder barrel—135 to 150—36 to 41 per cent.
Improved cylinder barrel—145 to 162—38 to 44 per cent.
Light choke barrel—155 to 195—42 to 52 per cent.
Medium choke barrel—185 to 225—50 to 60 per cent.
Full choke barrel—215 to 240—58 to 65 per cent.
Extra full choke barrel—230 to 250—60 to 66 per cent.

### Standard Velocities.

16-GAUGE GUN.

2½drs. E. C. powder, 1oz. shot No. 7, 835ft.
2½drs. Schultze powder, 1oz. shot No. 7, 890ft.
2½drs. DuPont's smokeless powder, 1oz. shot No. 7, 905ft.
2½drs. American wood powder, 1oz. shot No. 7, 890ft.
25grs. Walsrode powder, 1oz. shot No. 7, 885ft.
2½drs. DuPont's Eagle ducking black powder, 1oz. shot No. 7, 880ft.

12-GAUGE GUNS.

3drs. E. C. powder, 1⅛oz. shot No. 7, 960ft.
3drs. Schultze powder, 1⅛oz. shot No. 7, 965ft.
2¾drs. DuPont's Smokeless, 1⅛oz. shot, No. 7, 955ft.
3drs. American wood powder, 1⅛oz. shot No. 7, 960ft.
3drs. DuPont's Eagle ducking, 1⅛oz. shot No. 7, 950ft.
29grs. Walsrode powder, 1⅛oz. shot No. 7, 955ft.

10-GAUGE GUNS.

3½drs. E. C. powder, 1¼oz. shot No. 7, 933ft.
3½drs. Schultze powder, 1¼oz. shot No. 7, 930ft.
3½drs. American wood powder, 1¼oz. shot No. 7, 925ft.
3½drs. DuPont's black, 1¼oz. shot No. 7, 960ft.
38grs. Walsrode powder, 1¼oz. shot No. 7, 940ft.

It will be seen that the 12-bore gun gives the highest mean velocity of the three bores. The figures obtained recently at Dexter Park do not quite agree with the velocity values obtained in England, where the 16-bore gun developed the highest velocity of the three gauges. I can, however, assure the reader that with the quotients of loads as here given, the values obtained by me are correct. By using less shot in the 16-bore gun the velocity of the latter can be increased to the average of the other two guns.

### Gas Pressure or Bursting Strain.

I employ a spring device for ascertaing the bursting strain in shotgun barrels. I can on the same apparatus also determine the pressure by means of the crusher gauge. My experience, however, teaches me that the crusher gauge is not adapted for shotguns. The spring device generally indicates higher pressures than the crusher gauge, but I believe that those of the former come nearer the truth than those of the latter.

A substantially-built gun, providing there is no flaw in the barrel material, which escaped the notice of the maker, should withstand a gas pressure of 13,000lbs. This is the strain I subject every gun to which is proved by the American Testing Institution. It is the same strain to which finished guns are put abroad. No gun, however, will withstand such a strain for a long period. It may withstand a strain of 10,000lbs. to the square inch for a while, but for every day use 8,000lbs. may be regarded as the limit to which a gun should be subjected. Many guns do not burst suddenly, but gradually, and hence a gun which did not go to pieces with a strain of 10,000lbs. for a certain period may finally come to grief with a lower strain, and then the shooter will wonder why his gun has been damaged with a service load.

### American Weights and Measures.

Americans enjoy all the world over the reputation of being both practical and progressive. In point of our systems of weights and measures, however, we are not entitled to this reputation; we are not leading, but are away behind the rest of the civilized nations, England excepted. Everywhere on the European continent, Russia excepted, and in many other states outside of Europe, the metric or decimal system for weights and measures has been adopted; but we still adhere to our confusing and antiquated so-called standards of weights and measures.

We have long ago emancipated ourselves from England in the way of money, but still cling to its old-fashioned weights and measures. We forget that for many weights and measures we have no fixed standards. We find ourselves at sea, for instance, when we are called upon to say what constitutes a dram of this or that powder. The centimeter is now recognized as the unit of length, the unit of velocity. The gram is the unit of mass. But not enough that we have one bad system of weights, we really use two, one as bad as the other—avoirdupois and troy. For the former we have at least a fixed standard; it is for one pound the weight, at the temperature of 62° Fahrenheit, and under the atmospheric pressure of 30in. mercury, in the latitude of London, and at or near the level of the sea, of a certain piece of platinum which is kept in the Exchequer office at Westminster.

Now, suppose one sportsman employs the avoirdupois, one the troy weight for their shot charges. They will wonder at the difference of the number of pellets of say 1½oz. The latter will load about one-fourth more than the former. Mistakes of this kind are frequent; they have also happened to me.

Avoirdupois Weight.

| Drams. | Oz. | Lbs. | Qrts. | Cwts. | Ton. | Grams. |
|---|---|---|---|---|---|---|
| 1= | .0625= | .0039= | .000139= | .000035= | .00000174= | 1.771846 |
| 16= | 1= | .0625= | .00223= | .000558= | .000028= | 28.34954 |
| 256= | 16= | 1= | .0357= | .00893= | .000447= | 453 59 |
| 573440= | 35840= | 2240 = | 80= | 20 = | 1 = | 1,016,048 |

Troy Weight.

| Grains. | Dwts. | Oz. | Lbs. | Grams. |
|---|---|---|---|---|
| 1 = | .04167 = | .00208 = | .0001736 = | .0648 |
| 24 = | 1 = | .05 = | .004167 = | 1.555 |
| 5760 = | 240 = | 12 = | 1 = | 373.242 |

7000grs. troy ..... 1lb. avoirdupois.
175lbs. troy.....144lbs. "

The same complication applies to measures for capacity, and it is even worse when we come to long measures. How much simpler and easier is the metric system, where we are only dealing with decimals!

### Gas Pressure or Bursting Strain.

In my report the term gas pressure is liberally used. Gas pressure means the pressure or tension developed by a certain load in the gun barrel. This pressure is generally denoted by atmospheres. An atmosphere means the pressure exercised upon one square centimeter. As a unit for pressure, either water at a certain temperature or mercury are employed. In this country we use the term pounds. The figures given in pounds mean the pressure upon one square inch. To make this point still more comprehensive to the reader I may here quote a comparative table of pressures in atmospheres:

| Atmospheres. | Pounds on square inch. | Pounds on square foot. | Feet of water. |
|---|---|---|---|
| 1 | 14.7 | 2116 | 33.9 |
| 10 | 147 | 21163 | 339.0 |
| 1000 | 14700 | 2116300 | 33900.0 |

The proof-house charge of the American Testing Institution for a 12-bore gun develops a gas pressure of over 13,000lbs. No gun would stand such a strain for any length of time. About 10,000lbs. may be considered of touching the safety limit, and for some guns even as hazardous. A load giving about 8,000lbs. pressure and less is better suited for the average gun and everyday use.

I employ a spring for ascertaining the pressures in shotguns. This device gives more accurate values than the old crusher gauge, which, again, is better suited for high pressures in military rifles than the spring device The values obtained with the spring are, as a rule, about 25 per cent higher than those secured with the crusher gauge, a fact to be borne in mind when comparisons are made with pressure values established at the American Testing Institution and those obtained by others. The figures herein quoted were taken in the cartridge chamber, where the pressure is highest.

### Velocity.

Velocity is live force, energy, penetration; it is the rate of change of position; it involves the idea of direction as well as that of magnitude. Velocity is uniform when equal spaces are traversed in equal intervals of time. The unit of velocity is the velocity of a body which moves through unit distance in unit time, or the velocity of one centimeter per second. Momentum is the quantity of motion in a body, and is measured by mass plus velocity.

A velocity of No. 7 shot of 800ft. per second may be regarded suitable for targets. For game shooting 950ft. constitutes the minimum, and for live pigeons a still higher velocity is considered desirable. The maximum velocity of No. 7 shot and a 12-bore gun is reached with 1,100ft. per second.

Table of converting feet per second into miles per hour:

10 feet per second= 3.409 miles per hour.
300 " " " =204.540 " " " "
1000 " " " =682 " " " "

For those names which occur quite often in these reports, abbreviations will be used as follows:

v. for velocity,
gpr. for gas pressure,
drms. for drams,
gr. for grains,
pwd. for powder,
smokl. for smokeless,
ga. for gauge,
av. for average,
great. diff. for greatest difference,
DP. for DuPont,
Sch. for Schultze,
cork comp. w. for cork composition wad,
Wals. for Walsrode,
blk. for black,
cb. for cardboard,
ft. for feet,
ft. sec. for feet seconds,
l. for load,
U. M. C. for Union Metallic Cartridge Co.,
V. L. & D. for Von Lengerke & Detmold,
Winch. for Winchester,
Am. W. for American Wood.

### Description of Guns Employed.

1. Parker hammerless, No. 79,217, Damascus barrels, 30in. long, chambered for 2¾in. shell, $80 grade, both barrels choke. The Parker gun was only used during a part of the tests. In its stead a three-barreled gun was employed for the remainder of the trial, and both of these guns will therefore figure as gun 1. Due notice will be given at what juncture of the test the exchange took effect.

1. Teschner, 3-barrel gun, center-fire, 28in. Damascus barrels, chamberedfor 2⅝in. shell, both barrels choke; maker, Collath, in Frankfurt-an-der-Oder, Germany; owned by the writer; No. of gun 8061; price, $65; weight, 8lbs.; diam. of chamber, 0.791353in.; diam. of bore, 0.704611in; diam. of choke, 0.631084in.

2. Remington, $30 grade, hammer gun, steel barrels, 30⅛in. long, chambered for 2¾in. shell; weight, 8lbs. 7oz.; loaned by Hartley & Graham; diam. of chamber, 0.811038in.; diam. of bore, 0.738202in.; diam. of choke, 0.74611in.

3. Francotte hammerless ejector gun, No. 22,190; weight, 7lbs. 4oz.; Damascus barrels, 30in. long, chambered (tapering) for 3in. shell, loaned by Von Lengerke & Detmold, grade not given; diam. of chamber, 0.791353in.; diam. of bore, 0.722454in.; diam of choke, 0.693268in.

4. Greener gun, No. 34,993, loaned by Charles F. Floyd, 30in. steel barrels, chambered for 3in. shell, grade not given, weight 7lbs., hammerless; diam. of chamber, 0.789385in.; diam. of bore, 0.710643in.; diam. of choke, 0.692925in.

5. German made gun, No. 11,714; owner, Tenner; weight, 7lbs. 1oz.; 31½in. Damascus barrels, chambered for 2¾in. shell; diam. of chamber, 0.789385in.; diam. of bore, 0.708674in.; diam. of choke, 0.693103in.

It appears that my gun, No. 8,061, was both the smallest bore and choke of all the guns, while the Remington gun approaches an open bore gun closer than any other. The bore of my gun has about the same diameter as the choke of the Remington. The bores of all the guns are below the diameter of the U. M. C. and V. L. & D. wads for 12-ga. guns. The diameter of the V. L. & D. Hurlingham so-called 11¾-ga. and the 12-ga. wadding of the U. M. C. has previously been given as 0.748045in. All these guns would therefore not require any larger size wadding than the sizes quoted. The test will show whether the shooting qualities of the guns are improved by employing in them larger wads.

[TO BE CONTINUED.]

## Rye Gun Club.

RYE, N. Y., Nov. 10.—The second monthly club shoot was held at the club grounds on Nov. 6. The 150 birds trapped were up to the average, the drivers owing to a strong wind blowing directly from the score proved unusually hard birds to kill. The gentlemen from Connecticut who attended the shoot proved their shooting abilities by winning the principal sweepstakes and killing nearly all of the birds shot at by them. Following are the scores of the shoot:

| | No. 1, 5 live birds. | No. 2, same. | No. 3, 3 live birds. | No. 4, 7 live birds. |
|---|---|---|---|---|
| S Gedney | 20212—4 | ..... | 201—2 | ..... |
| R Ingersol | 10021—3 | 21022—4 | 022—2 | ..... |
| P Martin | 20022—3 | 02002—2 | 212—3 | ..... |
| H Downs | 10022—3 | 00000—0 | ... | ..... |
| M Hill | .... | 02120—3 | 201—2 | ..... |
| E J Pope | .... | 22102—4 | ... | ..... |
| J A Budd | .... | ..... | 122—3 | 2112122—7 |
| R Beck | .... | ..... | 210—2 | ..... |
| E B Lyon | .... | ..... | 201—2 | ..... |
| W C Lyon | .... | ..... | 020—1 | 2201202—5 |
| R Tuttle | .... | ..... | 000—0 | ..... |
| L E Gamm | .... | ..... | ... | 0121010—4 |
| F Field | .... | ..... | ... | 102102•—4 |

Target sweeps were shot as follows:

No. 1, 10 targets: R. Ingersol 8, P. Martin 7, M. Hill 7, E. B. Lyon 6, H. Downs 9.

No. 2. 10 targets: P. Martin 7, R. Ingersol 5, M. Hill 9, H. Downs 10, E. J. Pope 6.

No. 3, 10 targets: P. Martin 8, R. Ingersol 8, M. Hill 9, H. Downs 9, E. J. Pope 10.

No. 4, 10 targets: R. Ingersol 10, P. Martin 8, M. Hill 18, E. B. Lyon 8, H. Downs 7, J. A. Budd 6, F. Field 5, S. Gedney 6, E. J. Pope 7,

No. 5, 10 targets: Ingersol 6, Martin 8, Hill 6, Downs 9.

No. 6, 10 targets: Gedney 5, Hodgins 6, Field 4, Budd 8, Pope 9, Gamm 4, Tracy 4.

No. 7, 10 targets: Gamm 3, Field 4, Hodgins 8. E. J. POPE, Sec'y.

## Live Birds at Willard's Park.

PATERSON, N. J., Nov. 14 —The following scores were made in the club handicap medal races shot this afternoon and in two miss and out sweeps that were shot at the same time and place. Scores:

Club handicap medal shoot, 10 live birds:

Morfey (30).....1222222222—10 Hopper (28).....1121212121—10

DUTCHER.

## E. N. Y. League Tournament at Saratoga.

THE fifth tournament of the Eastern New York Trap-Shooters' League, and the final one of the present year's series, was held at Saratoga, Tuesday, Nov. 13, under the auspices of the Saratoga Gun Club. There was a good deal of disappointment felt by the managers that this the winding up event of the season should not draw a better attendance. That so few shooters were present can only be attributed to the financial depression that the brethren of the trap and trigger seem to have felt so severely in this quarter of the State. There has seemed to be no lack of enthusiasm among shooters, for they have been hammering away at the clays on their own home gun club grounds all the season; but when it comes to attending open tournaments, with their heavy drain upon the pocket for entrance fees, etc., it is only a few that can stand the pressure. So it has come to pass that instead of holding twenty successful tournaments on the League circuit, as in 1893, we have just squeezed through with only five fairly well attended events in '94.

At the event of last Tuesday at Saratoga there were a number of the old reliables of the league clubs present, the West End Club of Albany leading in the representation with J. B. Sanders, C. A. Arnold, William Wadsworth and the FOREST AND STREAM correspondent, who had run up on the early morning D. & H. train, and joined a rather cheerful appearing gathering at the shooting lodge in the cold gray atmosphere of one of the dingiest of our lowering November days. Inside the old wigwam there was a grateful warmth diffused by a big stove, performing its mission of thawing out congealed humanity and devouring sawed cordwood. As one after another of the well-known knights of the trigger drifted in, hearty greetings were exchanged with Dr. B. D. Mosher of the Granville (N. Y.) Gun Club, and M. F. Roberts, president of the same club, though he resides in the near by town of Rupert, over the line in Vermont. Another Mosher, surnamed George A., appeared soon afterward, and was received with the warm welcome that is everywhere extended to the popular manager of the Syracuse Arms Co. George had a little bit of a gun with him that was eyed with a great deal of curiosity and not a little suspicion on the part of the "solid gun" men, but, all the same, when it was demonstrated later that the "pea shooter" could perform as well as the "big twelves," Roberts succumbed to its merits, and exchanging therefor some few shekels, lugged the featherweight off to delight the inmost soul of some favorite juvenile kinsman. Of the local experts present Saratoga displayed the best of her many skillfu shots in the persons of H. M. Levengston, Jr., Dr. J. E. Pearsall, J. Nelson Ramsdill, J. E. Hodgman, Wm. Hay Bockes and Wm. H. Gibbs. I missed "Wash" Coster, who is away attending the field trials at High Point, N. C., but the distinguished presence of an ex-Congressman gave the necessary *éclat* to the occasion.

It was now 10 o'clock, the time set for opening the shoot; there was no one coming in save an occasional straggler from the village, and Levengston broke out with: "Don't it beat the dev— Dutch, that the league towns don't turn out more shooters? we counted surely on Troy! but 'Uncle Sammy' Goggin and his colleagues are not going to show up. I also expected that Chief Cheney and several of his Mohican braves would swoop down from Glens Falls in their war paint, but as yet no gleam of a tommy-axe has been seen, nor has a single whoop been heard in our land. There's only a few of the old stock left, anyway, so put down the names of the gang on hand and let's get to work."

Thus adjured, your correspondent hastily indited the names of those who wished to enter, and while this was being done, J. H. King, of Saratoga, was chosen referee. Chief trapper John Alsavor marshalled his forces, and pretty soon the battery of five electric traps were speeding the king birds into the motionless air. The steady flight of these five flyers, in the dead calm that prevailed, undoubtedly helped the leaders to make the splendid averages that distinguished the day's shooting. The excellence of their performance can best be judged by a perusal of the detailed scores:

No. 1, 10 singles, $1.30 entry:

| | | | |
|---|---|---|---|
| Levengston | 1111111111—10 | Dr Mosher | 1111111111—10 |
| Sanders | 1111111101— 9 | McGinness | 1111011111— 9 |
| Arnold | 1111111111—10 | Roberts | 1111111111—10 |
| Wadsworth | 1001111111— 8 | Mosher | 1111001111— 8 |

No. 2, 10 singles, $1.30 entry:

| | | | |
|---|---|---|---|

AWARDS FOR HIGHEST AGGREGATES.

For every bird thrown, one-half cent was donated by the club to form a purse which was divided 30, 25, 20, 15 and 10 per cent and awarded to the contestants making the highest aggregate scores in events Nos. 2 to 11 inclusive. A contestant shooting through the events to qualify for the purse had to shoot at 135 king birds. The names of the winners, their scores and percentages are herewith given: Levengston, Saratoga, 133, 98.5 per cent, won first money; Arnold, Albany, and Roberts, Rupert, Vt., 129, 95.5 per cent, divided second; "Peters," Saratoga, 123, 91.1 per cent, won third; Dr. Mosher, Granville, 121, 89.6 per cent, won fourth; "McGinness," Saratoga, 120, 88.8 per cent, won fifth.

LIVE BIRDS FOR THE WIND UP.

At the termination of the kingbird events, several crates of pigeons were brought on the ground and a live bird sweep was started, 5 birds, $5 entry, the purse divided 60 and 40 per cent. J. Nelson Ramsdill was the choice for referee of the five men who entered the event. The score follows:

| | | | |
|---|---|---|---|
| Geo Mosher | 22111—5 | Arnold | 1e001—2 |
| Peters | 21210—4 | Wadsworth | 00110—2 |
| Roberts | 21011—4 | | |

Then two well known league shooters, Arnold of Albany and Peters of Saratoga began to yearn for the notoriety of appearing in the trap columns of FOREST AND STREAM as the principals in an individual match; they agreed to shoot at 35 birds each for $25 a side, the loser to pay for the birds. Such "yaller" shooting as followed it has seldom been your correspondent's lot to chronicle; these two men, who are rated in the league as at least 85 per cent. shoots, showing as much lack of form with the breechloader as a clam digger would with a cavalry saber. Well might they weep tears of contrition when they look at the appended score:

| | |
|---|---|
| Peters | 1•112110111011111•121110201011111•12—27 |
| Arnold | 111•1•111•011010101101012121000020•—20 |

When the horror engendered by this dreadful exhibition had somewhat abated, four men were found who were not to badly blown to enter the final event of the day, a scrub sweep, 5 birds, $5 a corner, the purse divided 60 and 40 per cent. The score:

| | | | |
|---|---|---|---|
| Levengston | 1•111—4 | Peters | 10110—3 |
| Wadsworth | 10211—4 | Arnold | 010•1—2 |

The next gathering of the shooting clans of this region will be at the live bird tournament of the Loudonville Gun Club, Tuesday, Nov. 27.

HORACE B. DERBY.

## Truly Championship Form.

THE shooting done by George Work at the Gun Club grounds, Hollywood, N. J., during the afternoon of Tuesday, Nov. 13, was something remarkable. The Hollywood grounds are proverbially fast; probably they're the fastest in the country. It is a rarity also to have a weak bird at Hollywood. On the day in question all were good birds save one or two, while the first 100 trapped were extraordinary birds. Add to the quality of the birds the brisk southwest wind that made the 21yds. boundary extremely small for left-quarterers, and Geo. Work's total for the afternoon of 111 kills out of 121 birds shot at is truly championship form. It is safe to say that had he quickened his time in his first 30 birds in the match, and shot at them in the same time he did his last 70, the score he might have made would have been phenomenal under the existing circumstances. Thompson, on the other hand, shot in good time until well on in his first 25. After losing his 18th bird, a straight driver, he seemed to slow up and lose his time almost entirely, bracing up at intervals during the race and knocking down every bird that came to him. During his run of 28 out of 30, between his 43d and his 72d birds, he did some work as brilliant as any put up by his opponent. His total of 10 dead out of bounds could have been reduced to at least 6, and his score of kills increased to 86 by more rapid work with his second barrel on four birds. On an inclosed ground, fence boundary, probably 9 out of the joint total of 14 dead out of bounds would have been scored as good birds.

It is noticeable that whereas George Work is credited with only 29 first barrel kills, Thompson has but 6 in his score. The reason is not far to seek. The boundary at Hollywood is marked by a 2-foot strip of wire netting; the wind was blowing briskly; it was, therefore, unsafe to run any chances with birds that had any kick left in them. Hence second barrels for safety was the order of the day. Work used his second barrel for safety 32 times, Thompson 38 times. The above figures conclusively prove the superiority on this occasion of Work's first barrel over Thompson's; Thompson's slower time was undoubtedly the cause of this in a great measure. It is only fair to the loser to state that he was shooting a gun not his own, although it was a gun of his own chosing for this match; it was the weapon which Capt. Money handles so effectively at live birds. After missing his 87th bird, the match being lost beyond all possibility of recapture, he took Fred Hoey's gun and knocked the spots off the next 12 birds. Both men were shooting E. C. powder in U. M. C. shells.

After killing 22 out of his first 25, and then losing three out of his next four, two dead out of bounds, Work quickened his time considerably. So rapid was his work that it was frequently extremely hard to properly gauge the direction of the dead bird's flight, especially if they went out against the wind like English snipe. The benefit of this change of time showed itself in the result of his succeeding 71 shots, out of which he scored no less than 68 times, one his 95th, being dead out of bounds behind the score. Had the boundary fence been but two inches higher it would have counted as a dead bird; as it was it struck the top strand of the little wire fence very heavily with its breast, falling dead two yards on the wrong side. His 84th bird was a corker. It was a dark blue in color, almost a black, in fact; as soon as the trap was high enough for it to slip out it started south like a golf ball freshly smitten by a golf stick in the hands of John Hoey. Quick as a flash Work was on to it, apparently crumpling it up with his right, following it up with a quick second. That was just what the bird had been looking for. No sooner had it touched the grass than it sprang up again as if made of india rubber, and continued its journey south as if it had merely been playing possum with George Work. Thompson went to the score and had killed his 85th bird before the spectators had fairly closed that portion of their features which had been driven wide open through amazement at the black cyclone's actions. The bird? Where was it? After flying just far enough to see Asbury Park in the distance, it turned and, after circling back over Long Branch, had finally concluded, from its desert-like aspect, that Hollywood was good enough for it, and that George Work was easy. In that conclusion it made a gross blunder, as well as more history for itself. As Work stepped to the score for his 85th bird it came rocketing over from the rear. Turning in his tracks the shooter doubled it up with his right, making a Philadelphia squab out of a remarkable bird of uncertain age.

To return to the match. The time taken to shoot it was exactly 1 hour and 48 minutes! Commencing at 2;20 P. M., the first 50 were disposed of in 28 minutes, the second series of 50 was shot at in even less time, 26 minutes; the third series took 27 minutes, the closing series being shot in just the same time, the match being over at 4:08 P. M., with Work in the lead by 9 birds. According to the conditions of the match, Thompson now has to buy Work a bicycle and pay for the 200 birds as well. Another item of interest is the flight of the pigeons. In a match with such a score as this under the conditions (21yds. boundary) almost anybody would be justified in saying, "They must have been a slow lot of birds." As a matter of fact they were of a class very seldom seen on this side of the water. Those present at the match who had shot English bluerocks at Hurlingham and the Gun Club were of the opinion that there was but little to choose between them and the English bird, that is, among the first 100 trapped. A glance at the flight of that 100 birds will show that but 7 showed any incoming qualities. In the last 100 there were 21 with incoming tendencies, Thompson drawing 7 in his third 25, Work having 9 in his last quarter of a century. Curiously enough the 28 birds in question were evenly divided between the two shooters, each having 14. As to color, it would have been a hard matter to make a decent white dress for any naked bird that might have wanted one; it would have been decollete at that. They were a fine lot of small blue birds.

The match attracted quite a small gathering of spectators considering the deserted condition of Hollywood and its neighbor, Long Branch, where horses are busily engaged cropping the late fall herbage that decks the lawns of the principal residences of that summer resort. Several ladies graced the club house during the progress of the match. Among the gentlemen present were John Hoey, who, of course, acted as referee, Fred Hoey, Capt. Money, P. Daly, Jr., Mr. Leigh, of London, England; Mr. Wallack, official scorer of the club, etc. Details of the score are as follows:

Dead out of bounds, Work 4, Thompson 10.

After the conclusion of the race, it being yet early, a miss and out $5 entrance was started, this had six entries, Work and Fred Hoey dividing on the sixth round. No. 2 was a precisely similar event, with this difference, however, that Capt. Money divided with Geo. Work after each had killed 6 straight. No. 3, another of the same kind, was of short duration, the same two shooters dividing the pot after the third round. No. 4, another of the same, had only four entries, Fred Hoey, Capt Money, Thompson and Work. Money and Work missed their first birds, but were permitted to re-enter after handing over another "five spot;" Work won with five straight. Scores:

## Climax Club's Scores.

THE Climax Club held its regular shoot on Thursday, Nov. 15. Thirteen members took part in the club point handicap for prizes. The handicap is one of targets, the limit man in the contest given below being allowed 10 targets, shooting at 35 to the scratch man's 25. The conditions of the contest are of a character calculated to bring out the shooting members of a club. To win a prize a shooter must compete in the majority of the regular club handicaps each season. The shooter scoring the greatest number of points at the end of a season takes first prize, and so on in rotation. Points are scored as follows: For each score of 21 one point is scored; 22 counts two points, 23 three, 24 four, and 25 counts five; that's the limit; no man can score more than five points in any one shoot, whether he breaks 26 targets or more while shooting his string. Of course, those who attend the greatest number of shoots stand the best chances of coming out near the top at the end of the season. Result: increased interest and a good atendance. On Thursday last the strong southwest wind made the targets somewhat erratic. They "dipped" out of the load many times. The background, too, although the day was bright and clear, was none of the best, the timber in front of the traps spoiling any chance of a sky line. "Dutchy" Smith, T. H. Keller and Brantingham were the scratch men, Swody the limit man; when it is seen that the three scratch men scored but 60 out of 75, the statement that the shooting was difficult needs no other backing. Small sweeps and private races were also shot, as well as a race at live birds, each man paying for his own birds. All target events were at unknown angles. In the Brantingham-Edwards match at doubles, both used Van Dyke's Winchester for the first 5 pairs. Brantingham then returned to his own gun, Edwards using Darby's gun as in the match with Van Dyke.

Club handicap, 25 empires, unknown angles, handicap allowances:

## "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

# Answers to Correspondents.

### No notice taken of anonymous communications.

J. S. S., Stratford, Ont.—Deer shed their horns every year. The horns are shed completely. The time of shedding runs from December to March.

P. N. S.—Write to the United States Fish Commission, Washington.

REMLAP, Pottsvile, Pa.—What difference in velocity and penetration would changing a shot charge from 1⅛oz. to 1½oz. make, 10-gauge gun, 4drs. powder? Ans. The velocity and penetration would be lessened. We have no figures as to the exact decrease of velocity, but should say roughly it would be in the neighborhood of 40ft. per second.

G. D. B.—What do you consider the best caliber for an "all around" rifle to be used for most everything? Is a .32cal. rifle large enough for Adirondack deer? Ans. In our opinion there is no satisfactory "all round" rifle. A .32cal. rifle will kill deer, but not so cleanly and quickly as one of larger bore. For deer or large game we would advise the largest bore that can be used consistently with the comfort of the hunter.

J. G. H., Manitou, Col.—I notice on page 348 of the FOREST AND STREAM of Oct. 20 issue, an article headed "Killing Power of the New .30cal. Military Rifle." Can you tell me where they are for sale or who to correspond with regarding them? Ans. The new U. S. .30cal. military rifle is not for sale, and other military .30's cannot at present be bought in this country (except possibly of Hartley & Graham, New York). You can, however, get a .30cal. single shot rifle for this cartridge from the Winchester Repeating Arms Co., New Haven.

J. B., West Park, N. Y.—1. What kind of a duck is it that weighs about a pound and a half, has a very short neck, a very dark brown back, a gray breast, and two light spots on its head (one above and back of the eye, the other just in front of the eye)? 2. In reloading shells should the powder (Hazard's ducking) be pressed much? 3. It is commonly believed that the ducks go from the Hudson to the near ponds to roost; is this true? 4. Would ducks alight by decoys placed near a brush covered boat used as a blind, in open water? Ans. 1. Probably a female of one of the surf ducks or coots. 2. Sufficient pressure to seat the wad firmly is all that is necessary. 3. We do not know. 4. They would not be likely to do so. Your boat should be concealed near shore. The law forbids placing bough-houses beyond 50ft. from shore.

## Hoofs, Claws and Antlers of the Rocky Mountains.

UNDER this title Mr. Frank S. Thayer, of Denver, Col., publishes a volume of half-tone reproductions of photographs of wild game. Most of the photographs were made by Mr. and Mrs. A. G. Wallihan, of Glenwood Springs, Col. The Wallihan subjects comprise deer, elk, antelope and cougar. There are also reproductions from photographs by unnamed persons of beaver, wildcat, coyote, bear, buffalo, jack rabbit, mountain sheep, mountain goat, sage hens, prairie dogs; and a rattlesnake coiled to strike, which we recognize as the work of Mr. A. S. Bennet, of Axial, Col. The plates have been enlarged to 7×8 prints on a page 10×12; and the thirty-six pictures make up a handsome and interesting volume, to which Hon. Theodore Roosevelt contributes a prefatory note. The work done by Mr. and Mrs. Wallihan shows some of the happiest triumphs of photographing game in its native haunts; and the collection has decided value for the true pictures it affords of Western wild life. The enlargement of the plates has involved much touching up, which necessarily detracts from the effect of genuineness; and some of the plates by other photographers strike us as open to doubt as to their genuineness. Mr. and Mrs. Wallihan deserve much credit for their skill and perseverance in securing these pictures; we trust that they may be rewarded abundantly by the appreciative reception sure to be extended to the volume. The price is $5.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

# ROWLAND E. ROBINSON'S DANVIS BOOKS.

## CHRONICLES OF SPORTSMEN AND OTHER HUMAN BEINGS.

### Uncle Lisha's Shop.

LIFE IN A CORNER OF YANKEELAND.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies." The talk naturally ran much on hunting stories and wood lore, but although the stories told were generally good, their truthfulness was not always accepted without question, and the volume abounds as much in dialogue as in narrative. "Uncle Lisha's Shop" is brimful of quaint humor and sentiment, and there is an unmistakable touch of human nature in Uncle Lisha himself, and his good old wife, Aunt Jerushy; in Sam Lovel, the hunter, and in fact n all the other characters introduced.

### Sam Lovel's Camps.

UNCLE LISHA'S FRIENDS UNDER BARK AND CANVAS.

When Uncle Lisha went West, Sam Lovel took Antoine as his partner, and the fortunes and misfortunes of the two as trappers are described with all the charm of our author's quaint style, while their friends and enemies, and all with whom they are brought into contact, in the course of the story, step on to the stage real living flesh and blood creatures drawn with such fidelity to life that the reader never doubts that he would recognize any one of them from the description, should it ever be his good or ill fortune to run against him.

### Danvis Folks.

A SEQUEL TO THE SHOP AND THE CAMPS.

This volume is a collection into book form of the "Danvis Folks" chapters published in FOREST AND STREAM. It relates the further fortunes of Uncle Lisha, Sam Lovel, Granther Hill and other personages of the story whom we know so well. Mr. Robinson avers that his characters were of the old times and have passed away. That surely is a mistake. They are living to-day here in these three books, and the Vermont author has endowed them with qualities which will give them long life to come. If you already have on your shelves the Shop and the Camps, you have a place there for this third volume.

Sent postpaid, the Shop and the Camps, $1.00 each, the Danvis Folks, $1.25.

**FOREST AND STREAM PUBLISHING COMPANY.**

**One of the Branches**

of shooting treated fully and well in Howland Gasper's "Complete Sportsman" is Wildfowl Shooting. The beginner will find Mr Gasper's instructions clear, readily understood, and helpful. The oldest gunner in the land will find them pretty close to what he would say himself. The "Complete Sportsman" is a book for wild duck and wild goose shooters. 227 pages, 17 illustrations, $2.00.

PRICE, $1.00.

**The Gun and its Development.**

**By W. W. GREENER.**

PRICE, $2.50.

These volumes have been for some time out of print, and new editions revised by the author have just been received. There is scarcely any one whose utterances with regard to shotguns and rifles are entitled to as much weight as Mr. Greener's, for he has been making these arms for many years. To his great knowledge of them he adds a pleasant and clear style in writing, which adds to the value of his books. Every American who uses a gun ought to read these books. Sent postpaid on receipt of price.

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

SEE REDUCED HALF-TONES IN OUR ADVT. COLUMNS.

The plates are for frames 14x19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream** *one year and the set of four pictures*, **$5.**
**Forest and Stream** *6 months and any two of the pictures*, **$3.**
**Price of the pictures alone, $1.50 each; $5 for the set.**

Remit by express money order or postal money order Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

### *CONTROL OF TRAP-SHOOTING.*

IN a report of a shooting match in our trap columns last week it was stated that one of the participants had purposely missed certain of his birds in order that he might make a lower score than he would have made if he had shot honestly; and it was alleged that his object in resorting to this trickery was to win money from some of his friends. The person thus accused sends us a note, which is printed elsewhere to-day, in which he resents the charge of having betrayed his friends, and ingenuously asserts that he lowered his score in order to protect those friends in their betting. That he did purposely miss the birds he acknowledges, but defends this on the plea of it having been done with good intent. From all of which it appears that when this particular individual is engaged in a trap-shooting match the affair is not a straight and square competition of skill between sportsmen, but is an underhanded manipulation of the score for the plucking of unsuspecting outsiders. In short, it is crookedness, and crookedness of a piece with marked cards, loaded dice, fixed rowing races, and such like tricks and devices resorted to by schemers and sharpers.

Now it goes without saying that the honest sportsman does not want this sort of business in trap-shooting; and what is more, he will not have it. If trap-shooting cannot be kept clean, so that one may take part in it without feeling that he is participating in an industry of gamblers, he will say good-bye to trap-shooting and leave it to the professional tricksters. The FOREST AND STREAM proposes to report upon, expose and denounce every instance of crooked work at the trap, when detected among shooters who are not known to be manipulators of their scores and at trap events where only honest sportsmen are supposed to be present. There is of course a certain grade of trap-shooting with which we do not concern ourselves, for it has no recognized place among decent people and does not come within the scope of a sportsman's journal.

This case of the Morfey-Batsch match is one example of numerous trap shooting occurrences which should come under the notice of some constituted authority empowered to deal with them as they deserve. We need in trap-shooting some court of appeal or board of review, such as controls almost every other branch of amateur sport. There is for rowing the National Association of Amateur Oarsmen, for trotting the National Trotting Associatian, for kennel interests the American Kennel Club and for canoeing the American Canoe Association. Each of these constitutes a court before whom charges may be made respecting the unsportsmanlike conduct of individuals or clubs. The court takes the evidence, considers the case, finds the verdict and imposes the penalty. There should be just such a court for trap-shooting, and the time has come for its provision. Trap-shooting has suffered seriously already from the doings of old offenders in this line; the very fact that there has been no recognized authority to deal with abuses has given immunity to men of devious ways, and because not brought up with a turn they have grown bolder, until the public patience has been exhausted. When one comes to think of it, what a commentary it is upon the license of crooked trap-shooters when a man comes out, as in this case, and defends himself for dropping his birds on the ground that it was to help his friends win money.

FOREST AND STREAM'S scheme is something on this order: Let an organization be formed by some of the leading gun clubs and associations, and the membership of all other gun clubs and shooting associations be solicited. Out of that organization choose a judicial board of examiners to whom all complaints shall be referred. The membership fee to such an organization might be merely nominal; enough to pay the expenses necessarily attending the duties of the board and the officers of the association. All good and solid organizations which have the interests of trap-shooting at heart would join it. Let the board rule off, suspend or permanently disbar from all tournaments held by any gun club that is a member of that organization, any shooter found guilty of crooked work.

That is the scheme. Why would it not work to the advantage and purification and upbuilding of trap-shooting?

### *CENTERBOARD AND KEEL.*

WITHIN the past ten days the centerboard, after its recent sudden and mysterious disappearance, has, so to speak, come to the surface again, and furnished a lively topic of discussion. First Mr. Lewis J. Nixon, naval constructor of the Cramp Co., has denounced the centerboard as an unscientific and unjustifiable makeshift; then Mr. A. Cary Smith, the noted yacht designer, comes forward with a tribute to the excellent seagoing powers of the new keel-ballast-board type represented by Vigilant and Navahoe; and finally comes a report from London that Lord Dunraven and Mr. Watson are at serious odds as to the question of a centerboard in the next challenger, the former contending for the board and the latter for the keel alone.

The important question of the value of the centerboard, whether light or loaded, in a racing yacht of over 80ft. has not yet been discussed from a purely technical standpoint, and in a broad and unprejudiced manner, the parties on either side contenting themselves with superficial deductions from a few selected facts.

The positive good qualities of the deep centerboard type of recent years, represented by Iroquois, Lasca and Volunteer, have been established beyond dispute; but where racing is the sole consideration, the type must give way to modern forms. A moment's consideration will show that in the only class in which the type is represented, the schooners of 80 to 90ft., a *carte blanche* order to the Herreshoffs for an up-to-date racer would outclass Emerald and Ariel in one season. So far as mere speed and racing is concerned, the type would disappear as completely in the 80ft. class as it has in the 30, 40 and 46ft.

When the discussion is limited strictly to speed, the chief argument for the centerboard, that advanced by Mr. Smith, of the results in all the late Cup races, is a most superficial one. In every race from 1885 to last year the centerboard representative has been the superior of the keel in so many vital points as to destroy the argument that its success proves the superiority of the board in the face of all evidence to the contrary. In adaptability of model to American conditions, in superior power and sail area, in better opportunities for attaining the best racing form, the superiority of Puritan, Mayflower, Volunteer and Vigilant over their keel rivals would alone account for their victories; and in no way can these radical differences be ignored and the sole credit given to the centerboard over the keel.

The fairest test yet made of the two types in the large classes was that of Vigilant and Colonia. The two were of similar model, designed and built side by side by the same man, of similar construction and ballasting, with rigs almost identical in size and construction. The same equality maintained in skill of skippers and crew and in the minor details. The points of inequality were all in favor of the centerboard boat, a Tobin bronze instead of a steel bottom, a heavier crew further out to windward, a special steam tender to carry the "cruising trim," and above all, the careful working up at the hands of the designer. Added to these was the vital fact that while Vigilant, drawing at least 13ft. without her board, was an extreme development of her type; Colonia, with no centerboard, drew only 18in. more, making her lamentably deficient as compared with such standard keel craft as Wasp and Gloriana.

With all these facts in mind, let those who witnessed the bold but hopeless struggle of Colonia say whether it proved the incontestable superiority of the centerboard over the keel, or whether, on the other hand, it was not the best of evidence that Colonia with the depth of keel which her length and model demanded would have been the equal or superior of Vigilant.

Without taking up the performance of Valkyrie, or even that of Britannia this year, we are content to rest the case of the keel type on the positive performances of Kathleen, Minerva, Liris, Wasp and Gloriana in the smaller classes, and in particular on the negative argument of Colonia's defeat by Vigilant in 1893.

### *SNAP SHOTS.*

In the well-told story of his moose of 1894 Mr. L. C. Ivory noted the coincidence that this moose was called and shot at on the same day of the week as that of the year before, at the same time of the day and on almost the same day of the month; that the horns were almost a counterpart of those of last year, and that the story of 1894 was written on the third day of November, the date of the writing of the former one. Now to carry further these curious details comes a letter which a Harrisburg, Pa., correspondent sends to Mr. Ivory setting forth, in brief: "I am not a regular reader of FOREST AND STREAM, but about a year ago I dropped into a news stand and bought a copy of Nov. 4, '93, in which I found your article, 'How I Got My First Moose,' which I have read and reread many times, always enjoying it. Last week I happened to be passing the same stand, and without knowing why, stepped in and bought a copy for Nov. 17, '94, and was more than pleased to find 'Another Moose,' which I read with fully as much interest as I did the first article. I have for nine years been deprived of my usual outing, and it is in such admirably written articles as yours that I find my greatest pleasure, and again live over the days spent in the woods."

---

The present Legislature of the Province of Quebec will consider the setting apart of a large tract of territory in the Laurentian Mountains for a game park. The reserve will comprise some 2,531 square miles, embracing most of the wild country between the Quebec & Lake St. John Railway on the one side, Lake St. John and Saguenay on the other, the St. Lawrence River from Quebec to Tadousac forming the base of the triangle. The object of the park is to be the preservation of the primeval forest, fish and game, the maintenance of an even water supply and the study and culture of forest trees.

---

MR. J. Keelas Dodge, of Patchogue, L. I., who died the other day at the age of 83, was accustomed to make much of the fact that he was the only living man on Long Island who had entertained Abraham Lincoln as a guest; and the incident of Lincoln's visit which appeared to have impressed itself most vividly upon his memory was in connection with a gun brought by Lincoln as a present for his host. The gun was loaded up with a tremendous charge and Lincoln "fired it off." The result was a bruise to Lincoln's right arm that afforded material for Mr. Dodge's reminiscent story telling to his dying day.

---

The Cuvier Club, of Cincinnati, gave its twenty-first annual reception and banquet on Thursday evening of last week; and like all that had gone before the occasion was notable for gustatory and social success.

# The Sportsman Tourist.

## LOVE'S EYES.

I watch the golden eagle's flight
  Up o'er the Rockies' clefted caves,
Now big, now fading from my sight,
  While slow, below the wild grouse laves
  With faltering wing, earth's meadow waves.

And great souls have with wing-tips kissed
  The height that groundlings shrink to dare;
For swinging out above earth's mist,
  Keen visioned, in a purer air,
  They catch a sight of heaven there.

So soaring toward life's mountain heights
  I'd pierce the mists with eager will;
But here in low and fitful flights,
  I lave the prairie field-waves still;
  My breast unswelled, my vision ill.

Yet the wild grouse that laves the lea,
  Speaks out clear-tongued to all who plod,
Ee'n thus, "'Tis all as it should be,
  As well as though winged Mercury shod,
  I follow out the will of God.

"And though I scale no dizzy cloud,
  Nor trace the gloaming's rainbow, streak,
The mists of earth can ne'er o'er-shroud
  The prairies' grassy nest I seek,
  Nor young that lifts its hungry beak.

"I'll make my quest no bliss-lit land,
  Up o'er the arched fields of blue
My vision seeks the near at hand,
  In my young brood, rib-jostling crew,
  I catch a sight of heaven too."

CLARENCE PINNEO.

## AFTER "LITTLE DIVIN' FOWL."

### The Second Expedition of the Skipper.

HAVING by the use of something less than a barrel of liniment and some painful but violent exercise, reduced the pain and soreness caused by the expedition after birds with the mule, the Skipper began to look about him again, intent upon going over to St. Helena Island after "little divin' fowl" and a nondescript called "pond chicken," which is very good eating, by the way. A pond of fresh water had been mentioned as lying in those parts, where teal, mallard and the "chickens" abounded, and was described as about 400yds. back from the shore, and easy walking.

The weather was continuously delightful, cool and almost cloudless, and so clear and exhilarating was the air that existence seemed a perfect delight. This was too much for the ardent mind of the Skipper to stand, so he loaded shells with shot Nos. 6 and 8 and rubbed up the old gun, and after a careful examination of the now restored muscles, prepared for action.

On this occasion the party consisted of the Skipper, the Architect and the same original soldier. Orders were given that the steam launch should be ready at six o'clock in the morning, and all hands were called at 5:30. Hot coffee, toast, fruit and enough meat to solidify the repast—and then the members of the expedition lighted their pipes and embarked. Old Bob was taken along on a chain to do the retrieving act, after the surface of the pond should be covered with dead birds. How good the tobacco tasted in the crisp morning twilight! With what looks of pitying condescension the party regarded the houses of the settlement where the rest of humanity was still sleeping the sleep of those who care not for out-of-door sport! What hopes of full bags of fowl placed in that part of the old shooting coat which gives the successful Nimrod the appearance of a hunchback! Well, the brethren of the rod and gun all know how it is themselves, and man's noblest sport and recreation has so many delights connected with it, that it is of no use to recapitulate them for the dear old FOREST AND STREAM, for has not some of the noblest narrative literature of these literary days been spread upon its fair pages?

In the story of the mule expedition I have described the Skipper, the mule and the soldier. On this present trip a new character comes on the scene. The Architect was cut out for a light-weight among the sprinters. He has been too busy these latter years to get much outing, but he still possesses that ardent soul which loves the sport itself, and so he was on hand in great shape, armed with some sort of a magazine gun, single barrel, 10-gauge, warranted to be good for anything from murder down.

With ardent hope and high spirits the party embarked, towing a batteau, and went swiftly down the river with the ebb tide. Soon after the start the soldier seemed to be much troubled. His mind was evidently working on some hard problem. At last out it came. With much slaughter of the vernacular and a plentiful interspersion, so to speak, of blankety-blanks, it seems that he had just discovered that blank, etc., pot-hunter, who had heard of the Skipper's intended trip, had preceded the party by twenty-four hours, and returned laden with great spoil.

The Skipper regarded the Architect steadfastly, and that officer returned the stare. Meanwhile the soldier kept on with his godless litany in several languages, the most of which might be expressed by what is generally known as "anathema marantha," or words to that effect, whatever it may mean. However, the weather was too good and the air too inspiring for men to remain mad long, although I am bound to record that all through the expedition the soldier's face would occassionally harden and his eyes would snap, and fearful mutterings in English and German would issue from his lips. At last, some time before sunrise the party reached the landing place and disembarked in the batteau, leaving the old dog Bob on the chain in the boat, until he should be required. A hard level sand beach to land on and a little flock of shore birds rendered up six to the Skipper's gun, and were placed in the big pocket as a nest egg. Then clambering up the bank the "easy walking, 400yds." was encountered. No accurate measurements were taken, but the Skipper asserts emphatically that it was about a mile going to the pond and about two miles coming back.

When the omnipresent Southern darky cultivates the succulent sweet potato on these Sea Islands, he divides the land into ranges of mountains and deep valleys. The ranges of mountains contain the potatoes and the valleys contain pitfalls, tangled briers, rattlesnakes, water-moccasins and oath-producing things too numerous to mention. Traveling over them is somewhat desultory, but the Skipper asserts that while the Architect was gaily skimming over the ground like a swallow, he himself was pitching and plunging like a Dutch galliot in the North Sea or an unhappy Democrat after the recent fraternal contest at the polls. This peculiar agriculture also has another effect upon men of obese tendencies. It takes about 200yds. of lineal distance and stretches it into about two miles of crooked distance. After floundering along about a mile, seemingly, the soldier pointed off to the left, and at the distance of about half a mile, showed a bushy puddle which he called a pond. Cautioned not to talk but to approach as noiselessly as possible, the Skipper breathing heavily, crawled up behind some bushes and with a snap shot killed a "chicken."

Then the party distributed itself about the pond and in hidden stands waited. The gentle pond chickens are heard in the bushes calling to each other and splashing about. The Architect from a small grass island was heard, like the enemy at the burial of Sir John Moore—"sullenly firing." The soldier crept about in the high grass, playing the changes on his "cuss" tune. The Skipper had brought a box to sit on, and patiently waited for the game to swim within range, meanwhile chewing the fragrant "cud" of pepsin gum. The sun mounted slowly in the east, but no "little divin' fowl" flew in, and the passing hours seemed freighted with monotony. Was this sport? Yes, for the Skipper had recovered his lost wind, the face of nature was like a picture, the glorious air of the advancing morning was health and life giving, and faith taught the elastic spirits of the party that if no birds were there that morning, they having been potted and frightened away by the previous and impious pot-hunter, yet in the fullness of time other birds would come, other days would follow; so with swelling hearts and fervent hopes they all took a drink, and affirmed that it was not a very good day for birds anyhow.

Old Bob swam into the mudhole and brought out the birds, one for the Skipper and two for the Architect, and the party in Indian file started for the beach. The ground seemed more like a permanent earthquake on the return than it did in going. Irreverent negroes chuckled at the ponderous flounderings of the Skipper. Old Bob filled his paws with burrs and howled dismally. At last the beach was reached and embarking in the waiting launch, the party started for home.

While thoughtfully smoking on the return trip the Architect suddenly removed his pipe from his mouth and asked, "What day is this, anyhow? "November sixth, by Jupiter." Election Day! All the Democratic birds were paralyzed, and like the Tammany tiger, had no use for two good Republicans like the Skipper and the Architect. That settled it. It was not a good day for birds in an exclusively Democratic State. Undoubtedly in North Carolina and some other States the sportsmen would have done better.

The chicken and little beach birds were good eating, but the next trip of the Skipper will probably be fishing for sea bass. I will try to send to the FOREST AND STREAM a full account of the voyage. C. H. ROCKWELL.

## THE FLORIDA COWBOY.

I DO not remember ever to have seen a reference to him in print, yet he is a forceful and picturesque character in his chosen home—the wide savannas and endless reaches of piny woods that form the southern portion of the peninsula of Florida.

His avocation from youth to age is to care for the vast herds of catttle and droves of hogs that roam over that region. We found him an interesting figure, differing in some respects from his Western cousin, in other things very much like him.

An introduction to him at close range occurrod one February day as we were returning from rifling a bee tree on the banks of Bowlegs Creek, an affluent of the Peace River.

Across a "deadenin" (*i. e.*, large open space in the piny woods) appeared the figure of a man on horseback rounding up a herd of cattle which had evinced an inclination to stray off the range. The crack of his long whip and his musical cry of "Oooe, ooe, ooe, oooooe!" came pleasantly across the interval. Catching sight of us, he left his employment and came riding toward us, his tough little pony falling into the lope—a cross between a walk and a trot—which is their only gait, and which will carry their riders over fifty miles in a day with scarcely a halt. I made a mental photograph of his trappings as he rode up.

His head covering was a slate-colored sombrero with very wide brim. He wore a gray woolen shirt with red stripes, homespun butternut-colored breeches, and heavy cowhide brogans armed with cruel-looking spurs. He carried saddlebags—filled, as I conjectured, with provisions—a pair of blankets in a roll behind, and balanced on his pommel a light Marlin rifle; attached to his saddle leather was a short-handled whip with a rawhide lash nearly twenty feet long; the latter, together with their peculiar cry, being their only dependence in rounding up or controlling their cattle. The man was short and muscular, with an open, pleasant countenance, so far as appeared through many weeks' growth of beard, and, as we discovered later, was the son of one of the largest owners on the range.

"Mornin'," said he, as he rode up.

"Good morning," we responded. "What's new over around Bassenger?" he continued, throwing himself into an easy attitude, one leg over his horse's neck and the other crossed upon it. "Bassenger," said we, "how should we know; we're from the hotel. "At the Park?" said he. "I allow I oughter knowed as much, but we get so suspicious out here on the range that when we see a stranger we want ter know all about him." We were equally curious about him, and plied him with questions about his peculiar craft and life, which he readily answered. At last he set off toward the hotel, and as we drew near we met him driving a sow and her brood of twelve which had been troubling the hotel people for some days back, to their wilderness home.

Another day, in response to a cordial invitation, we drove out several miles to dine with the father of this young man, one of the lords of the country. His house was one of the best to be found in this section—two stories in height with upper and lower galleries, and cool, wide halls opening upon the former at either end. Honey suckle, Cherokee roses, and other climbing plants quite covered the structure with bloom and greenery, and as it stood at the head of a gentle slope just where the piney woods gave place to the broad prairies of the Okeechobee country, the piazzas commanded a wide, and to our mind a novel and beautiful view. On the south lay an illimitable prairie covered with coarse grass but treeless; nearer us were round and oval-shaped islands of pines like outposts of the forest in its march upon the plain; back of us the serried ranks of yellow pine, a dead wall of green, yet as one approached showing long-drawn aisles and open cathedral-like spaces. The Major received us kindly, and after a substantial dinner, a smoke on the leaf-hung balcony, and a saunter through his fine orchard of 40-year-old seedling orange, lemon and grape fruit trees, invited us to go for a ride over the range.

"I am sorry I can't show you a round up," he remarked, as we mounted, "but they only take place in the spring when the flies have driven the stock out of the woods into the open plain. I can show you the pens, however, and give you some idea of the manner of conducting the business.

"Florida is not generally regarded as a stock raising country," he continued, "yet there are nearly 500,000 head of cattle roaming over these vast savannas, besides thousands of hogs, and a lesser number of sheep. Before the war our market was Cuba almost exclusively; now we ship to Jacksonville. The grasses of Florida are not so fine and nutritious as those of the West, but then we have neither cold nor blizzards to guard against. The land is owned almost entirely by large holders, the National or State governments, railway and canal coporations under grant of the State, with a few cattle kings. By law and by immemorial usage uninclosed land is open to the use of all, so that the only way an owner can enjoy exclusive possession is to fence it. These great tracts of common land are the opportunity of the stockman. He has only to turn a parent herd of cattle loose on the prairie and grow rich on the increase; theoretically, that is. Practically the herds are subject to certain dangers which materially lessen the stockmen's profits. One of them is the attacks of wild beasts, another is the tendency of the cattle to get mired in the water holes, "cut throats" we call them, where they go to drink and which abound hereabouts. But here are our corrals."

A long lane formed by two post and rail fences led up to a large pen of perhaps half an acre in area, on one side of which was a gate opening into a much smaller pen.

"In the spring, as I said," continued my friend, "the cattle bunch on the prairie and are then driven into this pen, the young calves are branded and all turned loose again. The process requires several days' hard riding in order to get the herds of one owner together, and those of other owners excluded, and the scene at the corrals with a score or more of cowboys sorting out the increase and getting them into the inner pen for branding is an animated one. At night the camp-fires flare up and the weary stockmen stretch themselves to rest with no covering but the sky."

Later in the season it was our fortune to share the fire and sod bed of a camp of cowboys.

"Do the cattle ever turn on you?" I asked a veteran who favored me with some reminiscences.

"I never had one but once," he replied; "that was soon after the war, when there were a number of old and savage bulls on the range. You see in ordinary times we aim to sell the bulls off before they get old and ugly, but during the war they were left to themselves. A party of us camped one night on government land in the saw-grass region, below Okeechobee. As night fell I heard an old bull bellowing off to south'ard and said to my partner, 'If he smells us he'll charge us sure.' He laughed, said he 'lowed not, and went to sleep. An hour after that bull with an awful bellow charged dead on the camp. Everybody but me was took panicky and ran for the trees. I cut my horse's halter and tethered him close alongside, jumped to saddle and spurred toward the bull. He charged me, but I dropped him easily with a ball from my Marlin, the boys came down from the trees and we all went to sleep again. The bull steaks next mornin' fur breakfast was pretty tough, though."

"Do the alligators trouble you much?" I asked, seeing that the old fellow was in a reminiscent mood—as a rule the cowboy is not talkative.

"It is rare that a 'gator will attack a full grown critter," he replied, "but they'll seize calves and yearlings, and they are just naturally death on hogs, likewise on dogs. They lie in wait for hogs in the cut-throats, and when the poor brutes comes to drink, swish comes their powerful tail, knocking the beast into the water where their jaws close on 'em in a twinkling. As to dogs, you can't get a Florida bred dog to go into the water for love or money.

"I saw a fight onct to the death, between our old bull and a 'gator It was on Peace River, years ago when that stream was the paradise of 'gators. The 'gator caught the bull by the nose as he went down to drink, and there was a powerful scrimmage there for a few minutes. The 'gator though had the aid of his friends and relations, a score of whom were lying in wait for a dinner. One of them brought his tail around with a blow that swept the bull into the water with every leg broken, and after that he was only a feast for the hungry varmints."

Florida cowboys have few pleasures—"bear drives," shooting matches, horse racing and dancing parties are the principal ones. The two last named are the favorites. The colony of Englishmen who have settled in and about Fort Meade have a race track near that village, and every fall give a several days' racing tournament at which the rules and conditions of the great English race tracks obtain. It is open to all; the cowboys attend in force, and as saddle horses only are admitted they not unfrequently carry off the honors.

The dance is the favorite and only form of social amusement. It is not unusual for the beaux and belles to ride twenty miles through the forest to engage in it. The square dance is the only one practiced, and I was surprised to find that the order of the dance and directions of the master were almost identical with those witnessed among the mountaineers of the Adirondacks.

Much corn whisky flows at these gatherings, and they not unfrequently end in a free fight.

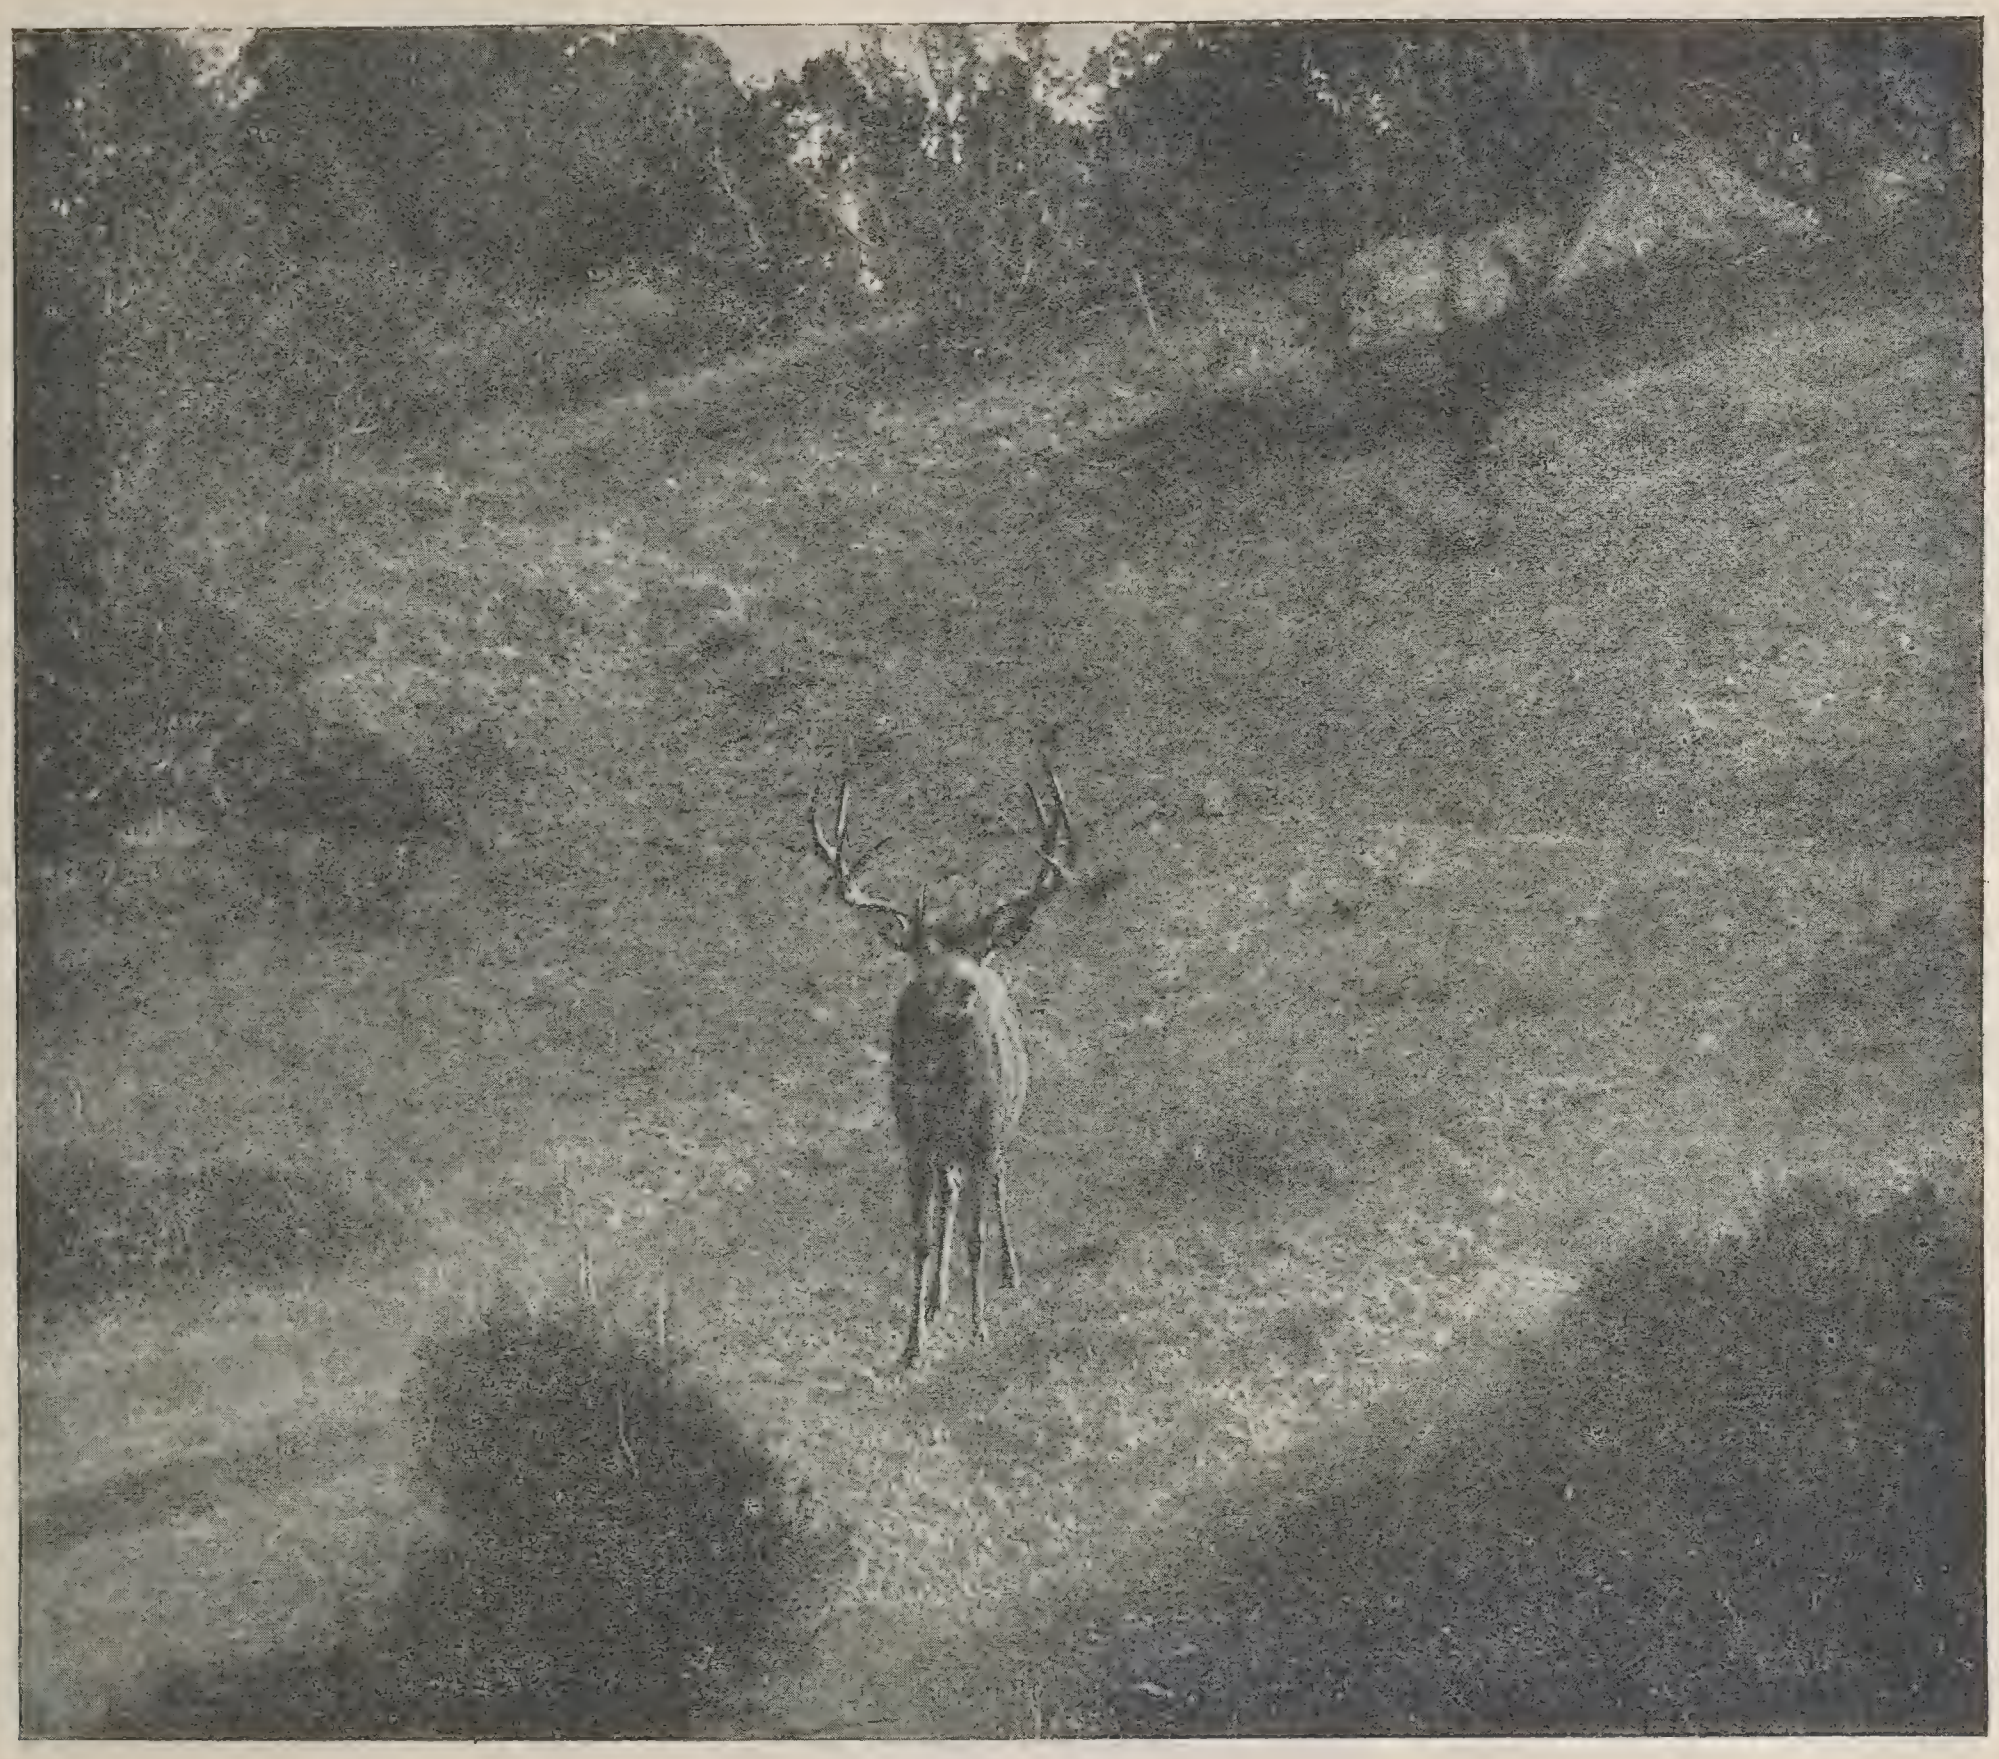
CHARLES BURR TODD.

# Natural History.

## FLORIDA FOXES CLIMB PINES.

THE query "Do foxes climb trees?" has been asked many times, and as often answered in the positive. Still there are some people who are incredulous. The reason is that in their part of the country (and they've probably never hunted anywhere else) foxes prefer to go to ground or take refuge in rocks when hard pressed rather than roost in trees. In my opinion, there is one good reason why they don't climb trees in the North or in the central States, and that is because they can't do it. In those parts referred to the fox travels over a great deal of ground, in many places rocky and mountainous. He also does a certain amount of digging on his own account when he wants ground moles, young rabbits under a tree stump, etc. All this work and this walking keep his claws comparatively well worn down; hence the difficulty of climbing a straight tree, even when it could be grasped. Another thing, too; when a fox can get into a good hole or among rocks, he is pretty well safe from hounds or hunters. In a tree he'd be an easy mark for even a boy with a rock.

In the Florida peninsula it's different altogether. The Florida gray fox has the agility and capabilities of any old tomcat. Give him a young pine of 8 or 10in. in diameter, and the fact that there's not a branch on it for 30ft. or more won't bother him a particle if the hounds are pressing him. He just "trees" and calmly waits to be "chunked" out of the pine; lightwood knots, judging from the way Joe Durrance, of Fort Meade, Florida, can throw them, are all that are necessary in the way of missiles. There are two reasons why foxes tree in Florida in preference to going under ground. One reason I think is because they have abnormally long claws which are due to the nature of the soil, which is sandy, and to the fact that they have to do very little, if any, digging to get their suppers. In the next place, water is so near the surface that it is almost impossible to go any depth without finding moisture, hence what holes any animals may dig are generally comparatively shallow and therefore unsafe. So that the only avenues of escape for a hard pressed fox are to hole up in a spot from which a good mattock can nearly always dislodge him with only a small outlay of manual labor; or to climb a tree where he believes he will be safer; the hounds can't scratch him out anyway. When a fox wants to go to ground he chooses a good-sized gopher hole. Be it known that Florida "gophers" are not the gophers of the West; neither do they bear any resemblance to those animals. A gopher in Florida is a common tortoise; there are plenty of them too, and for some reason best known to themselves, setters and pointers will make game on them in a way that raises a hunter's spirits only to dash them down again.



Last winter I spent a few weeks in the vicinity of Fort Meade with my brother, who has lived there some seven years. He knows every inch of the country for miles around, is as keen on any kind of sport as I am, and has a few hounds that hunt anything except rabbits and gophers. It was during my stay with him that I was first introduced to a fox up a tree. We hunted and killed foxes by moonlight, starlight, at daybreak, and once killed one in the middle of the day. We never came home empty-handed, Fred's hounds were too good for that; once a trail was struck it was dollars to doughnuts the fox would be jumped; once jumped, it was tree or hole. Possibly they lose a fox sometimes; they never did when I was out. His pack consisted of but four, old Smiler, Spring, Harlequin and Solomon, the last a great dog but headstrong as old Harry. When I knew Smiler he had seen his best days after foxes; he was getting old and the younger hounds would run away from him in a long chase. This didn't please the old dog; when he wanted to rest he'd stop and bay up a tree; as a rule the other hounds would believe him and would fly to him and assist in raising a disturbance at the foot of a pine that no fox could climb. When my brother would get to them it would be a case of "hark forward," with a sound rating thrown in. The delay would cause slow running for a while, but on every occasion that I was out the result was entirely satisfactory. We killed six foxes altogether, four of them "treed," one went to ground in a gopher hole near a cracker's house and was soon (we were told) dug out by the cracker and his son, the sixth was run into by the hounds on a road during the hunt by starlight, and was not found till next morning, the hounds having left the fox after killing it and refusing to show us where it was. As a matter of fact we were actually within a short distance of it at one time. The dim light of the stars in a great measure prevents anything like riding to hounds through the pine lands; it's a case of knowing the country and "nicking in" on such occasions. That night Solomon preferred to run a fox by himself to joining his three companions; this bothered us a little at the start, as we scarcely knew what to make of it. Smiler, Spring and Harlequin killed theirs after a long run, leaving him as above stated. Solomon pushed his fox so hard that it had to hole up, meeting its death at the hands of the aforementioned cracker and his son.

A dash of forty minutes through the pine forests after a flying pack on a moonlight night is the most exhilarating thing I know. It sounds like reckless work and probably is, but with a good horse under me, I'd sooner do it than eat. Fallen trees, gopher holes and palmetto roots, all have to be looked out for; the gopher holes being particularly dangerous for a horse to put his foot in. On the night of Dec. 23, 1893, after a long trail, we had just such a burst of about forty-five minutes, with Fred's hounds driving a gray fox before them and making such music as, taking all the surroundings into consideration, I'd never heard before. There were only five of us out, Fred and myself and the three Durrance boys, Joe, Harney and Jim. To a Northerner it would have been a weird sight to see us sweeping over the long grass, threading our way at a gallop between the boles of pine trees. As soon as we heard the hounds tree their fox we sobered down to a jog. In a couple of minutes we were with them. The four hounds were baying at the foot of a small pine; 25ft. up that pine was the fox, plainly visible in the bright moonlight. Joe Durrance dismounted, picked up a pine knot, "chunked" him out and all was over.

Were we more unsportsmanlike than the fox hunters of Kentucky who hunt the red fox, which doesn't climb trees but holes up when hard pressed and the opportunity occurs? Our hounds had earned him and he had been fairly treed after trying all the tricks he knew. Men who ride after hounds because they have open country and can do so, are apt to look down on a man who, in a mountainous, unridable country, shoots a fox before a hound which has probably stuck to the trail over the most difficult kind of ground, puzzling out the scent on bare spots, finally driving his fox over the runway where his owner is stationed. In this case there is none of the excitement attendant on riding to hounds to buoy the hunter up. Often chilled to the bone, he has stood for hours, always on the alert, straining his ear to catch the distant sound that tells him the fox is at last coming his way. Is that man no sportsman? Charles Reade once wrote a book entitled "Put Yourself in His Place." Do you see the point?

To return to hunting the fox in Florida. The last day of my stay had come and I wanted to see a chase by daylight. Getting up at daybreak, horses were fed, breakfast eaten, and we were ready to start about half an hour before sun-up. It was chilly, in fact cold, at that hour of the morning. To keep warm it was necessary to button one's coat up, a new experience to me in Florida, the thermometer having fluctuated between 70 and 90 during my stay; that is, during the daytime.

The first thing we struck was a cold trail of what turned out to be a marauding wildcat. For a long time it was slow work, but the work done by the hounds was well worth watching. First, Smiler would have it; and then, just as we thought they'd got well under way, the trail failed. Solomon's stern soon showed that he had a touch of it some 50yds. ahead; a cry from him and the other three would fly to him; a moment's delay while each one showed the other where the cat had been, and away they'd go, only to have the same thing re-enacted over and over again with variations. The cat had been evidently on the hunt and had turned aside here and there in search of her prey.

THE KING OF THE GLEN.

Photo from life by A. G. Wallihan.

At last the trail got so that the hounds could keep moving, following every twist and turn. When they did get up to the cat it was in a long "bay," almost impenetrable, and she had them at a disadvantage. We soon gave up the idea of ever doing anything with her and it began to look bad for a fox hunt; the sun was well up and the heavy dew was fast drying off.

Blowing the hounds off the wildcat, we set off to hunt for another trail. In half an hour we had one, cold, it is true, but still a trail. It was really beautiful to see the hounds work out the puzzle they had before them; Spring, the solitary lady of the pack, did great work, hampered as she was by a lame shoulder. After probably three-quarters of an hour's slow work, things suddenly brisk-ened up considerably. In place of a spasmodic canter or two which was all we'd had to do to keep up with the hounds on this trail, we had to hustle along pretty lively to get up to them, and once with them, to keep there. Each hound was giving tongue, Solomon's deep voice playing a splendid bass accompaniment to Harlequin's soprano, Spring's contralto and old Smiler's melodious tenor. The pace improved rapidly; it began to look as if we were in for a good thing, after all. We were disappointed in this, and we thought afterward how lucky it was we'd had such good work done by the hounds while trailing. The end came too soon.

We had just reached the edge of a small swamp when hounds ceased giving tongue. Instead, each hound was springing in the air, just as a dog does when he's got a rabbit in long grass. "He's bedded right here," said Fred; "why didn't the fool get up and dust when he heard us coming?" Scarcely had the words left his lips when, out of the long grass that grew up around the top of a fallen tree, I saw a long gray object uncoil itself right among the hounds, not six feet from Solomon's nose. A sudden yell from each hound and a sight race began, each hound striving to get up to the fox. Slowly but surely Solomon began to cut down the lead; 100yds. and he was almost up to the tip of the brush. The fox had no chance to double, the pace was too hot; Harlequin, Spring and Smiler were bunched close behind Solomon. It was a great race. Another 100yds. and Solomon was almost alongside; he was reaching over as if about to pick up the fox every moment, when all at once, with a sudden spring to the left, the fox sprang at a pine and climbed like a cat for about 15ft. It was a tree 2ft. in diameter, too thick for him to clasp. There he stopped, hung on for a moment, and then, before we could get down to the hounds to hold them, so as to give him another chance for his life, his hold gave way and he toppled back right into the open jaws of old Smiler, who used to be pretty good at catching falling foxes. Although we didn't have a gallop after him, we had seen a chase neither of us may ever see the like of again. I have the hide of that fox by me now to remind me of the extraordinary termination of our morning hunt. Had the fox been able to get to a small pine, he might have been living yet; as it was, the pace was too hot to pick and choose; it was any tree or no tree at all.

Can foxes climb trees? I guess they can.

EDWARD BANKS.

## A LASSOED MOOSE.

WATERVILLE, Me.—The greatest achievement in the hunting line heard of is that of Frank Pooler, of Moose River. It seems that he has had more or less experience in the use of the lasso, also understands the habits of the game with which his county abounds, and not long since, seeing a moose cow with two young ones at her side, while he was out in the woods, he made up his mind that he would secure the whole lot. Instead of shooting, he left the opening where the game had appeared and went to his home and secured some oats. With these he went back and made three piles on the ground, and then went some ways back and climbed a tree where he could overlook the place and waited. He thinks it must have been some two hours which he had to remain in this not too comfortable position, when he saw the cow and her young come out again and commence to graze. At first it looked as if they were not going to see the bait, but they worked out a little at a time and finally seemed to smell the oats, for one of the young ones came toward it and stopped, seemed to be sniffing the air, then deliberately advanced to the first pile and began to eat.

Instead of paying any more attention to the animals Mr. Pooler proceeded home, ate his supper, and some time in the evening went back with the second lot of oats and then returned home once again. He now got out his lasso, and taking some stout cord started back. It was not a very pleasant place to spend the night, but this is what Mr. Pooler did, his patience being rewarded at an hour before day had fairly dawned by seeing Mrs. Moose and her two children appear and walk deliberately up to the oats.

The distance of the lasso throw was some 12ft., Mr. Pooler thinks, and was made at the cow moose. The moose was successfully struck about the neck and then came some fun of the rough and tumble order. Pooler and the cow moose were very much mixed up, for though the lasso was firmly seated, the strike had not been sufficiently hard to choke the animal down. Instead, she put in some tall sprinting, but could not stand the second shock received when the full weight of Pooler's body was thrown upon her neck as he tripped his toe and fell to the ground. Though still hanging on to the lasso, by which he was dragged some little distance, her wind being cut off, the moose also dropped to the earth in a choked condition, so that it took but a short time for Pooler to right himself and go to her and tie her legs so that she was perfectly secure.

The two young ones, which turned out to be two little bulls, did not run to any great distance, for when the mother bellowed, as she did when the lasso was loosened, the young ones came out of the woods, a short distance away, but could not be caught at the time.

Having the moose secure, the next thing to do was to get her some half mile back to his place. This he could not do himself he found, and so returned home for his wife, who returned with him, and then the great feat of dragging the cow moose to the cowpen commenced. It took about a day to do it, as only short stages could be made at a time, the moose bellowing all the time, and the young ones following at no great distance, but dodging back quick enough if any advance was made toward them. They seemed to know that something was wrong.

Then the cow pen was reached, which consisted of a pole fence some 6ft. high, the inclosure not being over 30ft. square. This all had to be fixed and the moose hobbled. For the time being Mrs. Moose was left untied, the door to the pen left open and Mr. and Mrs. Pooler went into the house and rested for a time, also keeping a look-out for the young moose. In less than an hour both of the young ones had entered the pen with their mother and were made secure, the pen was put in proper condition and the old moose let loose. For a long time all she would do was to stand and tremble, then tried to use her head to butt the fence down; but finding this would not work she wandered round and round the pen. For a day she would not eat anything, but then consented to do away with a few oats and some cut clover. In a few days the moose would eat all right, and Saturday last Mr. Pooler was in this city and sold the two young bull moose to George Meguire of Waterville for $70.—*Boston Journal.*

### The Lord of the Glen.

WE reproduce this week from Mr. and Mrs. A. G. Wallihan's illustrated "Hoofs, Claws and Antlers of the Rocky Mountains," the plate entitled "The Lord of the Glen." In his description of the making of the photographs Mr. Wallihan writes of this picture: "I had waited long and patiently one morning, when I saw the gleam of the sun on a pair of horns through the cedars. With nerves all of a tremor I watched to see if he would keep on the trail he was on, which passed about 60ft. from me—but no—he turns directly toward me and comes panting down the trail until within 60ft., when I bleated like a fawn, at which he instantly stopped, with his mouth wide open, as he had evidently been running, and was very fat. The click of my shutter told me that I had his shadow hard and fast, so when he had looked and I had admired him as much as I liked, I moved my hand and he was gone—almost like magic. Satisfied for the day, I packed my camera and was soon riding over the hills for home."

### Strange Effect of Fright.

A FEW days since, as a neighbor, Mr. E. B. Townsend, of Valley, Wash., was standing near his chicken house he was startled by the swift fall of a dark object almost directly overhead, and which with almost bullet-like velocity darted under the chicken house, which was elevated a foot or so above the earth.

His flock of chickens scattered around the yard, broke into panic flight, and among them was a fine young rooster weighing 10lbs. which ran swiftly toward the barn for 15 or 20yds. and fell perfectly dead from sheer fright.

Looking under the chicken house a fine blue grouse was found lying senseless from the shock of its fall to earth, and with its breast torn open by the concussion. Ed. chopped its head off and had it cooked for his dinner (the grouse, not the head), but thinks it scarcely paid for the loss of the big rooster.

## CHICAGO AND THE WEST.

### The West of the Present and the Past.

[*From a Staff Correspondent.*]

#### Geography and a Valley.

CHICAGO, Ill., Oct. 1.—I have always felt that there should be a new application of the science of geography, by which one should not need to carry it all vaguely in his head, like a last year's Fourth of July oration, but be able to use it on the spot, where it would be of some good to him. Now, to get any good of your geography, you are obliged to have along a map all the time, and even if maps were always correct, which they are not, it isn't always convenient to carry a map. For instance, I am traveling in Montana or Colorado, or some other grand part of this grand country, and I look out of the car window and see a lovely plain or a high white peak; I can't tell what or where they are. I must first look on my railroad folder and find what town I am near—or ask the porter, who always tells, but rarely knows—then I must follow the mapped-out line of my railroad—which is built on the wide angle, foreshortened, omit-the-rest-of-the-earth basis common to maps showing the course of any given railroad. Following this map, I may be fifty miles out on any given river, or may be a hundred miles from the peak which is or is not the one I think I want to know about. I read in my book that at such a point Kit Carson had a fight with the Indians, or that near such another place old Bill Williams was chewed by a bear, and I want some kind of a geography that will tell me I am seeing those places when I happen to look out of the car window and glance at them. What the map says is of no particular use. The geography of the present is no good, and I can't blame children for rejecting it. What we want is a science that will tell us where we are by looking at the landscape and not by looking at the map. Kit Carson and old Bill Williams had this sort.

I don't know, therefore, just where I was on my way between Butte and Bozeman when I saw the beautiful valley I want to tell about, but it was somewhere east of the bold, rough mountains over which the N. P. road crawls somehow, east of Butte, and it was somewhere west of the valley of the Gallatin, where the soil is as black as any that Iowa can show, and as deep, and as beastly muddy. My valley may have been that of the Jefferson, or that of the Beaverhead—all these headwaters of the Missouri being named, renamed and subnamed and divided in a way that doesn't make much difference, anyhow, and which will be abolished when the new geography appears, which shall wipe all names off the maps and set all men to studying the earth and nature instead of books and paper. Anyway, my valley wound along so beautifully among the mountains, so finely fringed with willows and cottonwoods, so admirably flecked with sunlit meadows, and so ornamented with the jewels of the sparkling river which traversed it, that I am glad I cannot tell where it was on the map, and can only say that it was beautiful. I wanted to get off the cars, and build a house and stay there and live. It was so very quiet and so charming. I knew there were whitetails in the willows, and suspected sheep on the mountains beyond, and maybe a bear up the black cañon. And it was all so sunny and bright and so free and untroubled, with no suggestion of rent, groceries or grief. It made one think of the grimy city and its suffering, desperate, sordid crowds with a feeling of disgust and pity, and made one feel as though here he could hold up his head and look himself in the face. Certainly, thought I, I will stop this train, get off right here, and locate this valley for my future home.

#### Wire Fence Around It.

Alas, for my valley. I saw a wire fence cross one of its natural meadows. There had been some one cutting hay—always hay, hay in the West, as if the whole family lived on it. There were some willows dropped for a fence at the edge of one of my white-tail thickets, and in the distance I saw the posts of a corral. And at length, out in the middle of my delectable valley, the place I had picked out to grow old and die in, there stood, all by itself it is true, but none the less garish, gaudy, new and unspeakably civilized, a spick and span Queen Anne cottage, with red painted roof! "Sarpington," said the R.R. map, and maybe it knew, though there was nothing there but the Queen Anne cottage and the little station building. I hope the place never grows larger. I hope it is only just some new rancher, a young fellow, with a pretty wife and a lot of nice dogs, who has dropped in there and is going to forget the world and be by it forgot. I wish him all kinds of luck, for he has sure got my place. I thought it was in the middle of the uninhabited world, but I reckon there "aint no such a place" as that any more. It all comes of the modern overgrown system of geography, with its greed of discovering places and putting names on them. No wonder Kit Carson and Bill Williams died. It is enough to disgust any one. So I sighed, and kept right on with the train.

#### BOZEMAN, MONTANA.

Bozeman is situated in the heart of the black, muddy valley of Gallatin. The geographies answer for the Gallatin, and you can see the black mud for yourself, or at least you could when I was there. It was about 4ft. deep and no wheeled vehicle excepting the street car could go over it. Being thus cut off from the outside world, and indeed cut off practically from herself, Bozeman was a very quiet town last spring, quieter than ever the prevailing hard times would have made it. All Montana has for some time been suffering under the silver depression, and Bozeman, though not a silver-mining town, has had to take its share of the general trouble. It is, however, well located as a town bound to be fairly prosperous, for this same black mud of the Gallatin means agriculture, and agriculture lasts sometimes when mines shut down.

There is no great shotgun interest at Bozeman, but it is exceptionally strong as a rifle town, and boasts a strong club of gentlemen interested in long-range rifle practice. The head of this club, I take it, is Mr. W. B. Benham, who conducts one of those odd and interesting stores which can be found nowhere but on the frontier. You can buy any kind of a gun or any weapon you want at Mr. Benham's place, and also you can buy any kind of hide, head, horn or other sort of trophy. And you can for no charge have permission to look at the oddest, wildest and most impossible of collections of weird freaks in old time rifles. I never knew before how many foolish things had been done in the way of gun-making until I saw Mr. Benham's unique collection.

Mr. Benham is an old time hunter of big game, and has passed all his life in the West. In his younger days he killed many and many a deer in Minnesota, and in his long residence in Montana he has killed large numbers of all the big game. He has killed moose in that part of the Rockies. Some years ago he and some friends went on a big game hunt, just below the Yellowstone Park, getting besides Mr. Benham's moose a large number of elk and bear. Nowadays Mr. Benham does not go out hunting very much, although he could get bear, and very likely a sheep within a dozen miles of Bozeman. He pointed out to me a cañon on the near-by mountain slope where a few months ago a friend of his had killed three bears in one bunch. Even such sport rarely tempts Mr. Benham now, although he is a man in the prime of life, and he seems to prefer to stay at home and figure out trajectories, ratios of powder and lead, express charges, etc., etc. In these matters he is fairly to be called an authority, and I should be entirely willing to take his word unquestioned in the matter of either a hunting or target rifle. Both the theory, and the practice of target shooting he has down to a fine point, and at the 200-yard range is one of the best performers I ever happened to run across, as witness my own eyes. When I go into a competition with another fellow, even of the most friendly sort, I always feel bad when I discover that I have not been entertaining him in the least as a pace-maker, but I found the mortifying fact impressed upon me that in shooting with Mr. Benham it would be entirely too much courtesy to call me either pace-maker or competitor. I was only one who also shot.

#### Old-Time Rifle Sights.

Mr. Benham has the store which I understand was once occupied by Freund, who some years ago manufactured a rifle sight which was thought to be an essential of a perfectly equipped Rocky Mountain rifle. Mr. Benham has a whole boxful of these sights even yet, but he does not sell very many these days, and instead mounts most of his customers' rifles with the Lyman sights, which he says are better. "We used to charge people from $3 to $5 for a set of sights, according to the way we happened to feel about it," said Mr. Benham; "but I fear those days are past." Yet those old sights had some very good principles, and I value not merely as a keepsake the set which Mr. Benham gave me as a souvenir of the old days.

#### Live Mountain Sheep.

Besides his trophies of hides and horns, Mr. Benham nearly always has some live wild animals about him, and with great glee he took me out to show me the menagerie which he now has on hand. Chief of these animals is a great specimen of the Rocky Mountain sheep or bighorn. Dick, as this fellow is called, is now in the prime of life, between four and five years of age, and seemed in fine condition, showing no ill effects from captivity excepting that his hoofs have grown out exceedingly long, making him almost deformed in that respect. He misses the hard rocks for which nature intended him, and the soft straw of his pen is a luxury which he would gladly forsake.

Dick at one time had a mate, Betsy, and I understand that Dick was caught a year ago last May and Betsy in the June following. Betsy was sold some time ago. For

a week or so after he was first taken, Dick was very wild and would buck up and down in the air like the wildest bronco, and show fight whenever he was approached. In a week or so, however, strange to say, he grew quite tame and would eat from the hand and at the call. He even became so civilized as to break open the oats bin one night and give him an exceedingly square meal. Dick is kept in a little tight-boarded inclosure, 8 or 10ft. square, accessible only by a small door in the wall. As we stooped down and looked through the door, Dick took up his position on the opposite side of the pen, and stood there with his head high up, one of the proudest, most defiant-looking creatures one ever set his eyes on. He gazed at us steadily, his large light eye never winking or turning, and he stood so calm and immovable he might almost have been taken for a mounted specimen. I would very much have valued a photograph of this fine animal, but the dim light and close range rendered this impossible with the instrument I had.

I was, however, able to get at the local photograph gallery, known as the Hamilton gallery, a fine photograph of the mountain sheep, which was taken in this identical pen, and exactly on the spot where Dick stood as he looked at us. This photograph was made by Hamilton, not of Dick, but of an almost equally good specimen known as Billy, which was owned by Mr. Benham before Dick came into his hands. In order to get a better picture of Billy a wagon sheet was let down to cover the walls of the pen, so that some contrast could be afforded of the animal's coat against the background. The photograph thus obtained I have sent on to FOREST AND STREAM, and it is probably as good a photograph of the Rocky Mountain sheep as was ever made. Although the distance was so small, not over 8ft., the distortion is hardly noticeable. The horns may seem a trifle exaggerated, but not to any extent. The strangely fixed, immobile look of the sheep is rendered exactly, and very good judges have taken this stiff expression to indicate that this picture was a fake, and taken from a mounted sheep. This, however, was not the case. The picture shows a bit of straw hanging to Billy's breast, just as he rose and backed up into his corner. It also shows a small, horny protuberance on the forehead, which was an odd and distinguishing mark of this specimen.

Billy was caught by an old mountain man in the mountains only a few miles from Bozeman. The snow was heavy, and Billy's captor pursued him on snowshoes into the deep snow, where the poor sheep struggled helplessly. The hunter ran up and threw himself on Billy's neck, tied Billy's feet together, and finally hauled him out of the mountains on a hide, with all four of Billy's feet trussed up so tightly that he could not make a motion. Such are some of the exploits and resources of the Rocky Mountain men. Some time I am going to ask Mr. Benham to write a more complete history of these sheep of his, because he knows more of the bighorn in captivity than any one I know of in the West.

### A Questionable Cat.

Another pet of Mr. Benham's interesting, though hardly so engaging as Dick, is a big wildcat called Tom. Tom is kept behind iron bars, and was one of the curiosities at the West Gallatin fair last year. Tom is shy the greater part of one foot, the steel trap which made him captive having robbed him of several claws. This, however, might almost properly be called a saving clause, for Tom uses the rest of his feet with a vindictiveness born of a most execrable disposition. Tom has whiskers and a bass voice, and no means has ever yet been discovered which will subdue or tame him in the least. He growled at us continually while we were looking at him, and swiped the end of a caressing stick with one of his good feet in a way that left grooves on the end of it as deep as if cut by a knife. Tom is one of those odd puzzles in the cat family which puzzle the hunters, but which do not puzzle the naturalists who don't happen to see them. The naturalists have certain rules and regulations under which wild animals are supposed to classify themselves, but the wild animals don't do it, just the same. There are certain distinguishing characteristics which are supposed to enable one to tell *Lynx canadensis* from *Lynx rufus*, but I have a notion that it would bother the savants to tell whether Tom was a lynx or a bobcat, provided they should actually see him.

### An Owl That Scorns Water.

Still another pet of Mr. Benham's is Dick, an odd looking owl, with a gutta percha neck and a wise expression of confidence. Dick is a very sociable little fellow, and coos and chuckles very confidentially to his friend Mr. Benham. Mr. Benham tells me that this bird had not tasted or touched water since the summer before, a period of six months. He did not say that the owl came from Kentucky, and indeed I am of the opinion that it was caught in Montana.

### More Interesting Things.

One of the main attractions of Bozeman, and one of its business concerns, too, is Mr. A. Gottschalk's Montana Armory, one of the greatest depots in the West for hides, furs and specimens, to say nothing of many articles indicative of the old time Indian days. Mr. Gottschalk is distinctively an old timer himself, and learned thoroughly all the mountain ranges of the upper Rockies before he went into the merchandise phase of hunting. He is, by the way, an old reader of FOREST AND STREAM, in the doctrines of which paper he believes implicitly, in so far, I suppose, as one in his business can. Mr. Gottschalk gets his goods from all over the West and Northwest country. When I first saw him he was opening the boxes of a shipment which came to him from the Cœur d'Alene Mountains. This lot had over 200 blacktail skins, and a whole box full of fine heads, horns and skins of mountain sheep. Mr. Gottschalk showed me the twenty-one-point elk head, whose picture has appeared in the columns of FOREST AND STREAM, and also an enormous elk skin, nearly a third larger than the ordinary elk hide, and so long that it practically reached from the ceiling to the floor of his store room. He showed me also a remarkable skin of the black bear of the quality known to the trade as "silk bear," very rare and valuable. The coat was long, soft and glossy, and felt indeed more like silk than the ordinary rough hairy covering of the bear. Mr. Gottschalk told me this specimen was brought in by the hunter Howell, the same who was captured last winter in the Park, in the act of killing the Park buffalo.

### Dead Buffalo of the Park.

It was of Mr. Gottschalk that I obtained some information which leads me to suppose that there have been within the past year or two far more buffalo killed in the Yellowstone Park than was ever generally supposed. Mr. Gottschalk was discreet in giving this information, but such as he gave he gave freely, and I have every reason to believe that his statements are correct. He told me that he thought the buffalo had been scattered considerably from their ordinary range in the Park within the past few years because of their pursuit by hunting parties. He knew of 6 head that had left the Park entirely and come over into the Gallatin Valley. A hunter whom he knew only by the name "Scotty" told him that he had killed 5 head of buffalo within the Park, near Electric Peak, and brought them out of the Park, over the north line, and west of Electric Peak. This was within the past year. Mr. Gottschalk also told me that last fall he had 7 raw buffalo heads offered to him by a party in Idaho. He would not tell me the name of the party but said he thought these buffalo were killed in the central or southern part of the Park, and taken over the south line. Mr. Gottschalk further said that a friend of Howell's, the poacher, had hinted that Howell brought out 7 buffalo heads to Cooke City last winter, when he went out for supplies. As Howell admits having killed 13 buffalo and one moose, this may bring his number of buffalo up to 20 head. Mr. Gottschalk also insists that 19 head of buffalo

MR. BENHAM'S MOUNTAIN SHEEP.
Photograph from life.

were killed by Snake Indians southeast of the Park in the fall of '93. If to these figures of the slaughtered buffalo we add those found dead by the FOREST AND STREAM party, in the Hayden Valley, which I still think to have been 6 or 8 head, and if we even count these to be included in the 10 head found dead by John Folsom later on, the total will seem to be something fairly alarming, and will give grounds as reasonable, at least, as any known to the contrary, for my earlier assertion that there are not half and probably not one-fourth the number of buffalo now alive in the park which were supposed last year to exist. Mr. Gottschalk says that Jack Baronette, an old-timer who has lived and traveled all over the Park, told him this year that he thought there were about 140 buffalo alive in the Park. I believe this estimate to be as extact and correct as any attainable from the data of 1894.

### A New Sort of Animal.

In his earlier days Mr. Gottschalk was a successful bear hunter, and one who liked could certainly get from him an interesting lot of bear stories. There is only one, however, which I want to tell, and that is one which will cause our friends the naturalists to smile on me with pity, and to perhaps call Mr. Gottschalk an imaginative person. He told that in the early seventies he was hunting in the limits of what is now the Park, and he killed a queer animal, whose like he had never seen before nor since, neither had he ever heard of any one who had seen or heard of one like it. He described it as being something like a bear, but too small for a bear, weighing between 100 and 200lbs., but certainly an adult specimen. He said that it had a long, sharpish nose, long claws and long hair, and was of a dark, dingy gray color. It was en the ground when he killed it. I suggested a deformed bear, also suggested wolverine, fisher and everything else which I could think of, like or unlike the description, but Mr. Gottschalk only laughed at me. "I know all the animals of this country," said he, "or at least I ought to in my business, and I tell you this animal is the only one of the sort I ever heard of. I called it a "man eater."

### Further Information About the "Man-Eater."

Now, it so happened that at that time I had not met old Bill Hamilton, of whom I am going to write a great deal after awhile, and to whom I cannot help referring at this time. I was with Uncle Bill for some time at Billings and on the Stillwater after I had left Bozeman. Among other things, I asked him, as I always do any old-time hunter I meet, how many kind of bears he made out to be native to the Western country. Of course, I know that the scientists allow only two kinds of bear, the grizzly and the black, although I believe that a gentleman has come pretty near convincing them that there should be a third species, the "red bear." The scientists base their classification on the size, shape and general arrangement of the bones, etc., which lie inside of a bear's skin. Now, when you meet a live bear in the mountains you have at first no *coup d'œil*, so to speak, of his bones. You are at first more concerned with his size, shape, color, in fact, with the outside of the bear rather than the inside. These are the things which the hunters look at, and when they find a bear whose color is neither that of the grizzly or the black bear, and whose claws are neither long enough nor short enough, and which has a sort of hit-or-miss color of his own, they don't stop to examine the bear's face to see whether it has a gradual slope or a pronounced stop before the eyes. They just give that bear another name by itself and let it go at that, thinking it easier to name the bear than it is to examine his bones. I am always disposed to side with the hunters rather than the naturalists, because I don't believe in naming mountains or classifying bears. It is getting it down too fine. Anyhow, as I was saying, I asked old Bill Hamilton how many kinds of bears there were, and this is what he said:

"First of all," said he, "there is the grizzly bear, the biggest and most dangerous of them all. This bear ranges east into the Rockies, but I don't think it is ever so large there as in California. There is a great deal of dispute about the weight this bear sometimes reaches. Old Wes. Teeter, a good bear hunter, says that he has seen this bear in California weigh 1,100lbs. dressed, and of this he was sure. He thought this was the second largest grizzly he had ever seen.

"Then there is the cinnamon bear, which of course all mountain men know by its color. I know of one of these bears which weighed 900lbs. dressed. George Ray, a good bear hunter, says he has seen a cinnamon bear weighing over 1,000lbs. dressed. I have been told that men have seen cinnamon bears so large they thought they weighed 1,800lbs., but I only know that they will weigh over 900lbs. dressed.

"The next bear is the silver-tip, which grows large, but not so large as the other two I have mentioned. The silver-tip is a local ranger and does not wander about much and travel over big stretches of country like the cinnamon.

"Then we hunters have another bear, the bald-face or roach-back bear. Of course, you will say that is the silver-tip, but four-fifths of the mountain men will call this a distinct species.

"The next bear I would call the brown bear. It is usually heavier than the black bear. You will no doubt call this the same as the black bear, which is found all over the United States.

"Lastly, I am going to tell you about a bear of which the naturalists never heard, and of which I have heard but a very few mountain men speak. This is what we call the pine-nut bear. It is a small animal, and weighs only about 125lbs. dressed. It never comes down into the foothill country, and is only found high up in the mountains. It climbs away up in the pine trees for nuts, and that is why we call it the pine-nut bear. It is a vicious, hard-fighting animal. It has fur about the color of that of the grizzly. No specimen of this bear has ever come into the hands of the naturalists so far as I know, and no bookman has ever seen one. I have never seen but a very few myself, but I did see one within the past three years. In shape it is a little like a wolverine."

Here now was something interesting. Mr. Gottschalk had called his unknown animal a "man-eater," for want of a better name. In old Bill Hamilton's description of his "pine-nut bear" I could not fail to recognize the same animal. At all of which the naturalists have my entire consent to smile. I believe there may be some things in heaven and earth they have not dreamed in their philosophy.

### The "Fan-Tail Deer."

While I am in the business of getting smiled at by the naturalists, I may as well make a good job of it. The scientists tell us that there is no such animal as the "fan-tail deer," and yet every one who has been much in the mountains has heard the hunters speak of this more or less mythical animal. I myself have heard several hunters claim that there were fan-tail deer in the Sacramento Mountains of New Mexico, though as I never saw one myself I was disposed to be superior, and to rest on the scientific belief that the so-called fan-tail deer was a small variety of the white-tail. Of course I asked Uncle Bill Hamilton about the fan-tail deer, and in his quiet modest way he told me what he knew.

"Yes" said he, "I know the naturalists say there is no such animal, but they only say that because they have never seen and examined a specimen of it. You must remember that this is a big country, and that for a long time it was a wild and unexplored country, and was visited by hundreds of hunters and practically no naturalists. It is only fair to suppose that the men who lived on the ground may have seen things which those who did not live there never did see. Now I myself have seen the fan-tail deer, and over toward the Missouri there are what we used to call the Fan-Tail Mountains, because we saw so many of those animals near there. I should say that the fan-tail deer was more like an antelope or a gazelle than a deer. It is a little bit of an animal, and I should think would weigh between 25 and 50lbs. It had very small horns and a long white tail, which it switched sideways rather than up and down. I always called this the North American gazelle. I never knew of one of these animals being examined by a scientific man, and of course you know I do not claim to be scientific in the least."

With these additional data in regard to the much mooted fan-tail deer, and in regard to my "man-eater," or "pine-nut bear," which so far as I know is an entirely new sort of thing under the sun, I leave the scientific people to pity me and doubt the facts, both of which I do not doubt they will do. Nevertheless I enjoyed hearing the old timers tell about the old time days, and I have a whole book full of other things they told me, all of which I am going to take pleasure in trying to repeat.

E. HOUGH.
909 SECURITY BUILDING, Chicago.

## A JOLLY TIME IN NORTH CAROLINA.

Stillwater, N. C.—The first day of November, the opening of the shooting season in North Carolina, was fair and bright, and brought joy to the heart of many a sportsman. Few could be happier than the four old veterans who by solemn compact had agreed to meet together on the last day of October in Portsmouth, Va., at 9:15 A. M. sharp on the pier of the Bay Line steamers, ready to catch the train of the Seaboard Air Line for a shooting trip anywhere that would seem best to us in North or South Carolina. We have often heard of Burn's familiar line "The best laid plans o' mice and men aft gang aglee." And so with our own. For when the hour of departure arrived, there was no N. Y. P. & N. steamer in sight to bring my friends, A. H. Overman, Springfield, Mass., him of bicycle fame, and Wm. S. Gummere, the long-headed lawyer of the Pennsylvania R. R., Trenton, N. J. "Then and there was hurrying to and fro," and adjusting of glasses, straining to catch a glimpse of the steamer coming down Norfolk Harbor. A 'phone message said she was sighted. Then I made a frantic appeal to Trainmaster Wrenn and Col. Anderson, general passenger agent S. A. L., to hold the train fifteen minutes. They yielded because I told Capt. Wrenn that he was good and Col. Anderson that he was handsome. Both of these statements severely wrenched my conscience. That was the shortest fifteen minutes I ever passed, and as it was just out another message announced that the steamer would make her first landing on the Norfolk side in twelve minutes. Another quarter of an hour was begged for and secured after the same methods as before, only it took larger doses and the fetching assertion that could not resist that a S. A. L. train would make up a lost half hour in a jiffy. And still no steamer came, and the train load of passengers showed their impatience of the delay. After hurried promises from Messrs. Wrenn and Anderson that they would meet my friends and help them to overtake me by the Atlanta special, the word was given and the train glided off, my heart meantime being in my boots, for I felt like an "old har' had run 'cross my path."

I had engaged to take up Polk Miller, with his dogs and banjo, in Weldon. When I invited him to shoot with our party I expressly stipulated that he must bring a banjo or be sent back afoot from the first station. He is not known in Virginia as Mr. Miller or Mr. Polk Miller, but just Polk Miller, prince of good fellows, president of the Virginia Game Protective Association, lecturer and delineator of the character of the "old-time plantation Virginia nigger." And what a great success he is in all these rôles! Added to these, he can outwalk in the field and bag more birds than any man I have ever tackled. Briar patches, branches, mud and water are only playthings to him if they conceal a bird, and he can discount any kind of a dog in putting up a bird in a brier thicket. No matter how wet or hungry he may be (he never gets tired), as soon as our car is reached he grabs up the banjo and sings an old-time plantation darky song, one that will make you laugh your sides sore, or another that is so plaintive in its tender melody that it bedims the eyes with tears as it recounts the characteristics of that gentle race of long ago. He tells a good story on himself. Not long ago a negro walked into his drug store and thus accosted him, "Good mornin', Marse Polk Miller, dey tells me you'se de onliest man in Virginny dat can play de reg'lar 'foh de war nigger banjer."

"Well, they do say so, Tom. Want to hear me play?"

"'Deed I does, sir, and wants you to learn me how."

"All right, Tom; come up to my house any night and I'll help you."

"Thankee, sir; I'm comin' up dar right straight tonight."

He went up, and they sat down in the dining room for the lesson. They played on for a few pieces, when suddenly Polk Miller struck up, "Don't dem watermillions shine." Tom could stand it no longer, but threw down his banjo, threw up his hands, gave a loud yell, and then exclaimed, "Golly, Marse Polk Miller, how I does wish you wus a nigger!"

And it was a consolation to me to gather up Polk Miller and his banjo at Weldon. We decided we would sidetrack at Aberdeen to await the coming of Messrs. Overman and Gummere the next morning. Meantime a message came from Mr. Gummere that he had an abscess on one hand and another on his lip, but would join us as soon as possible. (Can you imagine a lawyer in a more helpless state than with an abscess on his lip?) Mr. Overman joined us by breakfast in the morning, and came in bright and cheerful in spite of his getting left. He is as "jolly" as Mark Tapley ever dared to be under the most adverse circumstances. In fact, we named him Mark Tapley, a soubriquet he bore with becoming humility.

With Mr. Henry Powell, the Aberdeen hotel man, we set out with guns and dogs galore. Polk Miller set a pace that nobody could keep up with. The dogs could hardly keep ahead of him. Everybody was eager to draw the first blood. The chance was soon given, for on a beautiful hillside the dogs drew up on a covey, each man swearing that his dog had pointed first, while I knew all the while that Shot Picôt had done the work, and I very frankly said as much to Shot. Eight barrels went off rapidly, and the truth must be told, although painful, not a feather hit the earth. Diligent search was made, because we were anxious to show the natives what cracks we were. Reproachful looks were cast around.

We now paired off and walked over the road to the farm of Dr. McNeille, formerly of Bridgeport, Conn. Here we had some very good shooting, which, for a while, was interrupted in a very unexpected and sudden manner. An elegant carriage drove up, from the boot of which sprang down an agile Frenchman, who said he was instructed to bring us to the house. Here we were welcomed by Dr. McNeille to a most appetizing lunch, consisting of such delicious viands that we were soon rendered averse to further exertions afield. So after lunch we drove in Dr. McNeille's carriages through the fields and allowed the dogs to hunt by the roadsides. This is a most luxurious way to hunt birds. The dogs may get tired, but we don't seem to care for expenses. Dr. McNeille assured us that the whole 1,500 acre farm was ours, and we believed it. It is a wonder how in less than a year he has cleared up from the stump 250 acres of ground and set it all in fine varieties of grapevines, many of which bore luscious fruit the first year. He has a charming villa, and certainly knows how to dispense a most gracious hospitality. His home is a tangible evidence of what Northern money and brains can do in the woods of "Old Carliny." It is a lucky sportsman who can claim the friendship and attention of this big-hearted, broad-gauge man. Good luck to him, and may he long live to cheer the hearts of his many friends. He quite captured us, and with many regrets we left him home with its vineyards and fig trees. In a few years those soft, sunny hillsides must prove a wonder to the passerby.

When we reached our car we were delighted to count out a great big pile of birds, Mr. Powell generously dumping his with the common lot. We had a good time at Aberdeen, and this was largely due to the efforts of mine host Powell, who, in addition to owning a good dog, knows where every covey of birds can be found. He takes good care of his friends and is "no slouch" with a gun. He can provide good shooting always in that section by making short excursions in the country or up and down the several lines of railway centering there. For the information of those interested it may be well to state that any sportsman in delicate health may find recreation and a climate suited to his physical condition in the sand hills and long-leaved pine region of southern Carolina. And at Southern Pines he can find all kinds of accommodation from the cheapest boarding houses to the fashionable Piney Woods Inn. These places are about six hours from Norfolk, Va., or Portsmouth, the termini of many lines of steamers.

Our friend Gummere's lip having subsided, he reached us on Sunday. We celebrated his arrival by going to hear a colored brother preach—the Rev. Mose Pitchford. We owed this to "Bro. Mose," for he has been for many years our faithful cup bearer afield. "Bro. Mose" is well known to many New York, Philadelphia and New Jersey sportsmen, all of whom will be glad to know that he is as handy as of yore with his corkscrew.

We had several days more of fine weather after Mr. G. came, and a batch of birds went off daily to our Northern friends. One day Overman and Gummere came in with each a brace of wild turkeys, and no one will ever know the real facts as to how they came by them. It is one of Gummere's solemn convictions that no good lawyer will ever lie except for pay. The days sped by so quickly that we hardly could realize that our week was out. We had to lose good old Polk Miller a few days before. His songs, stories and banjo still ring in our ears. This is not the last shoot of this gang. Nothing succeeds like success, and we are to have it all over again, for no four ever had more genuine fun. L. J. Picôt, M.D.

P. S.—In answer to many inquiries impossible almost to write singly, I will say that Maxton, on the Carolina Central R.R., and Gibson Station, on the Raleigh & Augusta R.R., are good points for shooting.

## IN NEW JERSEY COVERS.

You ask for experiences with rod and gun during the present season. Mr. Hoops and Gus Weiss of Hoboken, ex-Commodore Ernest Fackert of Jersey City and myself, took the 9:23 A.M. P. R.R. train from Jersey City, *en route* to Spotswood, Middlesex county, N. J., for a day with the cottontails. Hoops had with him his big white setter and Gus Weiss his two beagles, about as homely quadrupeds as ever mortal saw, with noses keen and a highly developed capacity of sticktoativeness when on a track.

We were met at the depot in Spotswood (or Snufftown) by Willy Quackenbush, the son of the farmer where we were invited to shoot Willy is a chip of the old block, as he proved in the field. Joe Quackenbush is not only a good farmer, but a good hunter and shot at small game. A ride through a sandy region among the pines and scrub oaks brought us to the farm, where we were warmly welcomed by Mr. Jones and his daughter, Mrs. Joseph Quackenbush. Mrs. Q. is one of those old-fashioned farmer's wives one always likes to meet, rotund in form, showing generous living (she only weighs about 300lbs. avoirdupois). A hearty "Glad to see you," and a cordial shake of the hand, while sincerity glows in every smile of her jolly face, puts you at ease and at home at once. We found Joe was out in the swale with a party of friends, who soon appeared at the sound of the horn announcing that dinner was ready. The party consisted of Hon. Perry Fountain, Freeholder of the county, his brother George and Mr. Thos. O'Neil of Brunswick, our host, the veritable and only Joe Quackenbush, and John, a younger brother of Mrs. Q., and a good John he proved to be. But then he has but just returned from the West, where he had been having ample practice among the jack rabbits and prairie chickens. They brought in four woodcock, four quail and several hares (rabbits), the result of the morning's work.

After putting away where we thought would do the work good a true farmer's substantial dinner, we were off to try our luck. I need not tire you with particulars of the afternoon sport. We made some good shots and some abominable ones at what we went after molly cottontails. The Freeholder got the cream, for he is a young man not only of brain but of energy, and knows the ground. Fackert's rotundity and poor Jacobstaff's lumbago prevented their getting around with sufficient activity. The younger shooters had the most shots, while we contented ourselves with stands outside the copses; but taking our chances as little *Lepus* dodged out and in, we got there sometimes.

We tried again after an early breakfast. But one hour's tramp settled Jacobstaff, and his old lumbago, that had been troubling him for several days, and which he was in hopes he could walk off, came on in redoubled force, in fact verily doubling him up; and he had to leave the party for the house, where he spent the day very pleasantly listening to reminiscences of the old neighborhood—one of the oldest in the State. Mr. Jones, the owner of the two finest farms in that region (having on the one some 2,500 bearing peach trees), is the son of Col. W. A. Jones, who was the father of the Seventh Regiment of New York city and was Sheriff of New York county about 1844 to 1846 if I remember right. The house where we stopped is one of the oldest in the State. It has a massive construction and walls nearly 2ft. in thickness of hewn timber. It had been a block-house during the Revolutionary war, and as it is but a few miles from the battle field of Monmouth, of course it was one of "Washington's Headquarters." We are going down there again some time and Mr. Jones has promised to drive us around and show us the many interesting points of revolutionary note.

The boys came in about 3 P. M., as we were to take the 6 o'clock train. They all seemed to have had a good time, as the string of cottontails and gray squirrels proved. But they put up only one woodcock and no quail or grouse. After another big dinner we were driven to the depot and were off for home, well satisfied with our day in Middlesex county and pleasant visit at Joe's.

Dr. Perry W. Levering, of the Jersey City Gun Club, and party have just returned from a day's shoot at Pete Bird's, up Ogdensburg way. They brought back 23 rabbits (hares), and the doctor killed a fine English cock pheasant, one of the stray ones probably from Tuxedo or Blooming Grove parks. It is a fine bird in full plumage. The doctor will have it mounted for his gun room.

Since writing the above another of the J. C. H. G. C. boys has arrived. Dr. Cummins—he of the big partridge (owl) mentioned in a former issue of your paper—returned, bringing with him another magnificent specimen of the English pheasant. They put up several of these splendid birds, but were careful to shoot (at) only the cocks. The last bird is somewhat larger than Dr. Levering's, probably a year older, and is in very bright plumage. It will be mounted and placed with the owl, woodcock, grouse and wood duck that adorn the dentist's reception room in Jersey avenue. Jacobstaff.

## WHY HEAVY CHARGES?

From time to time during the last fifteen or twenty years there have appeared in "our paper" dissertations on the subject of loads for shotguns, hardly any two correspondents agreeing as to the amount of powder and shot to be used, but nearly all advocating a larger load than I have shot, and although the subject is as old as guns, and I run the risk of being called down by the editor, I make so bold as to "chip in" a few of my ideas.

I had occasion the past fall to look into the matter of loaded shells for the first time, for my own use I mean, not being able to get the powder I wished to load shells with, and was surprised to find that ninety-nine one-hundredths of them were charged with 3¼ to 4drs. of powder for a 12-gauge gun. Of course I didn't buy any, but got some rifle powder, which is the only kind the average powder seller keeps, from blasting down to rifle use, and loaded what few shells I needed just then. I didn't like it, for it was too quick and the recoil unpleasant, but it was the best I could do. It is nearly twenty years since I began shooting a breechloader, a good old lifter action Parker, and in all that time I have shot powder the grain of which was the size of DuPont's Eagle Ducking No. 2, and for the past ten or twelve years that powder exclusively, and am still shooting it, for a more satisfactory, pleasant shooting powder I never used, and never expect to. I speak of black powders of course. What I may find out about the different brands of nitros remains to be seen, if I live long enough, but while this can of No. 2 "holds out to burn," I'll ne'er to nitro powders turn.

There's no doubt but that I'm an "old fogy," for I still shoot a hammer gun; but I have been pretty fortunate in getting what game I went for, and—well, the longer I I live the more I respect the maxims "handsome is as handsome does," and "let well enough alone." But when that can peters out I may experiment some. I saw a man's arm nearly cut in two once by the explosion of a gun which had in it a patent powder, and it wasn't funny a bit. I did, come to think of it, fool with a wood powder a little once, but when I found out that sometimes I could kill a quail at 40yds., and then again couldn't kill a squirrel at 15yds., or at the muzzle of the gun, I got tired of that foolishness pretty quick. And I may be eccentric, but I like to hear the gun go off, too. It reminds me of old times, and when the rime of years has powdered an old man's locks, reminiscence is pleasant if he has been good. And I'm growing deaf anyway, and if I were to go shooting patent powders and fail to hear the gun go off, and then look down the muzzle to see about it, I'd get into trouble, like as not. So as I said, as long as that can last I think I'll shoot the old reliable.

But that wasn't what I started out to say. I have been and am still surprised to see how many sportsmen cling to the idea that it is necessary to put 3¼ or 3½drs. of black powder into a load, and of nitro powders in the same proportion, probably. I speak only of a 12-gauge in this article; I never shot a 10 and never expect to as long as a 12 gets the game. A 10-bore is a cannon.

I suppose the reason why the public loaders of cartridges put such large loads on the market is because the shooters call for them, which isn't necessary at all. It is all a matter of habit, and a useless habit, too.

For many years I have used for all small game one invariable load, 3drs. powder and 1oz. shot, and whenever I shoot straight it gets game at any reasonable distance, and by pushing the gun a little it has killed at big distances. I have killed quail 'way off yonder at 75 to 80 paces, and squirrels pretty nearly out of sight, while ducks, snipe and hares turned up their toes when it seemed folly to shoot. Quite a good deal of experience has taught me conclusively that the above load is entirely sufficient in any fair shooting gun, and why shooters will load themselves down with useless weight, and get their shoulders jammed with useless kicking is what puzzles me, and has for many moons. The proof of the puddin' isn't in the weight or the cost. For deer shooting I used 3½drs., with 12 buckshot, and with that load my old Parker, blessed old gun, would put 8 out of the 12 into a 2ft. space at 50yds. with either barrel, and few deer ever got away under 60yds. while there was powder a-plenty to send the shot home. The first deer I shot with that gun was a doe, between 40 and 50yds. away, and the 8 shot that went through her lungs or thereabout all went into a space that a letter sheet would cover. I haven't any idea that 4drs. of powder would have killed her any sooner. And during that same decade, I remember while out one night fire hunting, I shined a deer's eyes at a little over 100yds., for I paced it within ten minutes—couldn't have done it if I had not had one of Ferguson's lamps—and walking up about half the distance pulled down on the orbs. There wasn't a sound or kick. I found the deer dead, and it had been standing behind a good-sized tree which protected its vitals. One shot entered just back of the eye, one in the neck, one just back of the vitals, and several struck the tree just where they ought. I mention this to show how the old gun would discriminate when obstacles were in the way, and you could not persuade me that a larger charge of powder would have shoved those three shot any better.

For turkeys I always set the gauge at 3⅛ scant with 1⅛ scant of No. 1 shot. It is plenty and does the work, and the shooting is pleasant—if you get the turkey.

You remember I wrote you lately that I had got six turkeys in south Missouri. Well, two more fine specimens came to hand before I left, which made eight out of the ten I shot at with the aforementioned load, and as a rule you know turkeys in the woods don't run up and lie down while you wring their necks. One of them dropped at sixty-four long steps, for my bifurcation is arranged for that style. Sometime, maybe, I'll tell how those two birds got away. Under the circumstances I can't lay their escape to either load or gun.

Now if the loads mentioned will, under widely varying circumstances, almost uniformly prove satisfactory with me, presumably they will with others. And that leads me to say that I would like to know if any of your readers have used the shot spreaders that are on the market, or made anywhere, and if so which kind, and with what results? My gun needs something of the kind, as it shoots too close for brush uses. O. O. S.

FREDONIA, N. Y.

## THANKSGIVING IN THE WOODS.

"SNOWING, come."

Our winter's hunt for 1893 had been planned many months previous and all preparations had been made for a hasty departure when our guides should summon us, and now in the latter part of November came over the wire the short but welcome message which appears above. Next morning our party, made up of Dr. Heber Bishop, of Boston; Harry S. Seeley, of New York, and the writer, and generous supplies for such an expedition were being hastily transported toward the mountain fastness of northwestern Maine, where the beaver builds his dam and the lordly moose has still his home.

For hours we had journeyed away from civilization, and late in the afternoon we arrived at the terminus of the regular gauge railway where transfer is made to the diminutive narrow gauge road, its rails being put two feet apart, and room for but a single passenger in each seat.

We follow the devious pathway of winding stream, climb over mountain spurs and finally alight at the little station of Dead River, in the forest, where but a single house is the only habitation. And yet our journey is not ended, nor will it be until we have gone into the denser forest some fifty miles beyond, where the shriek of the locomotive is not heard and the dilletanti do not come. Here teams are taken for an eighteen mile drive over a primitive road to our destination for the night.

Before the sun appeared above Mount Bigelow the next morning a buckboard team with the party and supplies on board took its departure over the unequalled blue-ribbon corduroy, boulder and bog road of Maine for the camps of the Megantic Club, on the Chain of Ponds some twenty miles away.

We had planned to reach these camps soon after midday and our permanent camp beyond Mount Pisgah, in the Moose River Valley, the same night.

But the weather grew sunny and warm with advancing day, and the melting snow and previous rains had so filled the bogs and worked such sad havoc with much of the corduroy that our progress was slow indeed. It was so late in the afternoon when we reached Shaw's farmhouse, some seven or eight miles this side of the Megantic Camps, and as far as it is possible for the buckboard to go, that we decided to stay there over night and push on to our destination the next day. Shaw's farm is simply a clearing in the wilderness to grow hay to feed the horses and oxen used in lumbering operations during the winter season, and it would be a very expensive luxury to transport it in from the settlements.

As frequently happens in this northern country at this season, when the sun went down it grew intensely cold and next morning a sheet of solid ice covered the ponds.

Our guides looked crestfallen. The ice was not thick enough to be safe, and to go around the shore to the other side of the pond to the trail was entirely out of the question, because of dense water brush, boulders, overturned trees and trap rock rising sheer 50ft. and over out of the water. And besides, such crust had formed upon the snow that the most careful, stealthy footstep could be heard a hundred yards away, making successful still-hunting of big game absolutely impossible.

A council of deliberation was convened, when the guides suggested that the trip be abandoned or postponed to a more favorable season. It was announced to them that we were out for big game, that we had proceeded too far to back out, that the weather bureau probably had some more snow to distribute, that we would await its arrival with becoming complacency, and that the problem now pressing for immediate solution was how best to get an early view of Camp Taylor over in the valley beyond the mountain.

Our guide of endless resource, Herb Heal, child of the forest, lithe and sinewy, as willing as strong, and whose burden never tires, skilled with rifle and rod, grand master of paddle and frying pan, clear of eye and steady of nerve, and whose footprint in the pathless forest makes a bee-line to destination, proposed that he and Jack Boyle, a fellow guide well schooled in woodcraft, make an opening for a canoe, and then proceed to chop a canal through the ice, and for the rest of the party to follow after the lapse of a couple of hours. This plan being the only way out of the dilemma, was adopted, and at once put into execution. We returned to the warm farmhouse and whiled away a generous two hours and then embarked in frail canoes and followed in their wake.

The ice was so thick it could not be broken with a pole, and with an axe only a narrow channel could be cut, so that our heavily laden canoes had to be paddled with the utmost caution to prevent the sharp, jutting corners of ice from penetrating their thin sides and giving us an icy bath, and possibly sending us to the bottom.

Going around a bend about a mile from the landing we see the ice choppers still at work, and a very considerable part of the task yet to be accomplished. We overtake them and are chilled to the bones before reaching the shore, an hour and a half later. Packs are shouldered and the trail taken along Clear Water stream for Camp Taylor, some ten miles beyond. Ascending the stream to its source, we reach the summit of the Boundary Mountains between Maine and the Province of Quebec, overlooking Spider and Megantic lakes in Canada, and many miles of beautiful mountain scenery in Maine.

Our trail follows the crest of these mountains for several miles, and furnishes such wealth of panoramic splendor as might well enlist the pencil of artist and pen of poet. But to human mind and human skill it is not given to portray adequately such beauty and loveliness, and fortunate indeed is he whose privilege it is to gaze upon the fascinating scene.

To some the journey may seem long and rough, and that fatigue would dull the edge of romance, but he whose ear is attuned to nature's symphonies and whose eye appreciates the beautiful and grand, has a thousand compensations, and the trip ends all too soon.

Going over a ravine we encounter an enormous track of a bear, around which we gather and note that it must belong to an animal of huge proportions, and all resolve to go in pursuit the next day. The shadows are lengthening and we hurry on. Fatigue says tarry, but enthusiasm prevails, and soon we are on the downward slope toward Moose River.

Another mile and a half and we are crossing the beaver dam now in possession of a colony of these interesting quadrupeds, a few rods beyond which is Camp Taylor, our haven of rest and abode for the next few weeks, hidden away in the forest and unknown to all save its very few owners and some trusty guides.

A roaring fire is soon giving needed warmth, and a cup of bouillon paves the way to a well earned and bountiful supper. Far away as it is from sources of supply, Camp Taylor is not without most of the necessities and many of the luxuries of civilized life, and the spring mattrasses and soft wool blankets were not among the least highly prized.

The fatigue resulting from the unusual experience of the past few days was so great that an adjournment was made from the supper table to bed, nor was any practical joker inclined to indulge in levity. Political ambition, financial depression, professional obligations or business cares troubled not the dreams of the sleepers. The weather had moderated during the afternoon and night, and with the break of day the camp resounded with the enthusiasm that greeted the announcement that six inches of snow had fallen during the night and that it was still snowing. This prevented following Bruin's trail, for which, no doubt, he was thankful, but all started out in pursuit of moose, caribou and deer, the three members of the party, each with a guide, taking different directions.

As the day advanced the snow fell thicker and faster, until the great, soft snowflakes filled the air so full as to limit the vision in the mountain defiles to a few yards, and at midday it seemed as if night was at hand.

It was a slavish day to be out and all made an early return to camp, three deer having been seen but none were killed. The storm grew in volume during the night, and it was snowing in such abundance as to shut out the view of a neighboring peak not a mile away. It seemed as if a large snowball might be made by simply clasping the hands together in the air.

But venison was wanted for the camp and all sallied forth, Dr. Bishop and Herb, Harry and Latty, and the writer and Jack.

Well, perhaps it is not best to tell all the happenings of that day. Some things are too sacred to tell and should be kept as family secrets, and so I believe my readers will pardon me if I respect this custom that boasts a venerable antiquity, and give but a mere outline of this day's doings.

I had tramped up and down the mountainside, and wallowed and floundered about in soft snow two feet deep and over, until after midday, and was thoroughly fatigued with the exertion and wet with sweat and the vast quantity of snow dislodged from the spruce and fir trees, now bending under its weight and looking like huge ghostly pyramids, without getting a shot or seeing anything to shoot at, and so I informed Jack that I was going to give it up and go back to camp.

Now, if there is any one thing that Jack likes to do better than another, after pleasing his employer, it is to bring in his share of game to camp. Admiring his ambition and desire in this, and telling him I could certainly follow my tracks back to camp, we parted, Jack carrying the compass and I without one.

For a time everything went well with me, but I observed that the tracks were rapidly growing indistinct, the snow was falling so fast, and so dense was the snow cloud that no familiar peak or mountain top was discernible to aid in locating myself.

Hurrying along as fast as my weary legs would carry me, I soon arrived at a place where other tracks intersected, and making a close examination I was puzzled to know which were mine, all being well filled with snow.

THANKSGIVING DINNER IN THE WOODS.

Discovering what seemed to me satisfactory evidence, I again took the trail and hurried on. Feeling entirely confident I journeyed on and on, until I encountered a great windfall, around which the trail deflected, when it dawned upon me that I had not been that way before, and that I was upon the wrong trail, and that when I returned to the place where I took it all tracks would be so obliterated that it would be impossible to tell one track from another.

Like a flash it passed through my mind that I would probably have to pass the night upon the trail, and I felt in every pocket for matches. Not being a user of tobacco I found none.

Thinking whoever made the trail which I was following might still be within hearing distance, I fired the signal shots agreed upon for "help wanted," but got no answer.

Gathering myself together I started back. Hurrying along with anything but welcome thoughts passing through my mind, I had covered about three-fourths the distance, when I saw the welcome form of Jack coming along the trail. He had heard my signal shots and answered them, but the wind being unfavorable for me and his rifle of smaller caliber than mine I did not hear them. Jack understands human nature too well and is too astute a diplomat always to say what he thinks, and so his innocent query now was: "What did you shoot at?"

Rather an awkward question to be sure, but well calculated to let me down easily.

We hurried back, and when nearing the intersection of the trails we met Herb who hurriedly asked, "Have you seen the Doctor?"

Well, perhaps the rest hadn't better be told here, but after a time we got together and struck a beeline to camp by compass, where we brought up at dark without any desire for more exercise that day.

We were much surprised not to find Harry and Latty in, and knowing our experience, I proposed to fire the signal shots. In this I was overruled on the ground that Latty was at home on every foot of this territory, and that he couldn't be lost. Darkness soon setting in, and knowing Harry would not stay out until that hour whether successful or not, if everything was all right, I stepped out and fired the signal shots. No answer was returned. After ten or fifteen minutes more Herb fired another volley, and was answered from afar off. Later another signal brought answer from near by and soon two forms, nearly resembling animate piles of snow, came tumbling into camp the very personification of despondency and fatigue.

Latty being asked where he had been all day nonchalantly replied, "Oh, just up there in the edge of the woods."

This answer was so transparent and evasive that it became a standing jest during the remainder of the trip, and it found a place on our Thanksgiving bill of fare, by way of embellishment.

Tending to mitigate the misadventure of the day, Harry made the best shot of the trip. Locating a deer far up on the mountain side, looking directly at him, he took hasty aim and planted his bullet exactly in the median line where the neck joins the body. The bullet passed directly through the heart and out under the tail, the deer falling dead in its tracks. They attempted to bring the quarry to camp, but had to abandon it because of the severity of the storm.

Herb and Latty went out next morning and brought it in, Latty finding a stream that was turned around the wrong way "up in the edge of the woods."

It was still snowing, but with abated fury, and the hunters were content to spend the morning hours in camp, enjoying much needed rest; but two more deer fell to different rifles before night.

The succeeding day broke clear and cold, the curling smoke from our cozy camp was soon lost to view, the bark on the trees snapped with the keen frost, the forest seemed dressed as a bride in costliest laces, which the rising sun decked out with gorgeous, sparkling gems, and all were enraptured with beauty, stillness and grandeur of the scene.

Much as summer camps may be enjoyed and praised, he has missed much novel and pleasant experience who has never had the pleasure of a sojourn in the wilderness when the snows of winter still the footfall and nature sleeps.

As the day wore on one hunter and a guide, then another pair took their departure, and lastly the writer and Jack sallied forth.

Going but a short distance from camp, following the course of a mountain brook, we came upon a birch tree nine inches through and some sixty-five feet long, that had been cut down the night before by beavers. We had encountered many beaver cuttings almost every day, but had never before seen any tree so large as this felled by these diminutive rodents. Human skill could not better plan to fell the tree, nor to fell just where it was wanted. The principal gash had been cut more than half way through the trunk upon the side on which it was to fall, and upon the opposite side a smaller gash higher up, felling the tree directly between two other large trees, into one of which it must have lodged had it varied but a few feet either way in its descent.

After duly admiring for some time the patience and skill manifested here, Jack at my suggestion returned to camp and procured the saw, and sawed out a section, showing the cutting, and it has now a conspicuous place in my valued collection of trophies of the trip.

The others of the party returned to camp with two magnificent bucks and a splendid bull caribou, when hilarity and good cheer reigned supreme.

Thanksgiving was drawing near, and our *chef* was instructed to do the occasion honor, and to tax to their utmost the resources of the camp. Whether or not he succeeded we will leave our readers to decide when they have read the *menu*, which was emblazoned upon birch bark, and which is reproduced here. With but a single exception, every dish and article thereon was served, and all received due attention.

But why recount here in detail all the fun and frolic of the trip? Every incident had an individuality and pleasure all its own, but to enumerate them here would extend this article to undue length, and overtax the patience of my readers.

To sum up briefly, our two weeks of camp life in the deep snows and cold of winter was made up of fun, frolic

and incident which gave to each day an individuality all its own, and rounded out into a prized remembrance the most pleasant time we ever spent in camp.

Our unconventional life and unusual exercise soon gave energy to nerve and strength to muscle, and made easy the task which at first would seem impossible. The fascinations of our environment, the absolute whiteness of the snow, the deathly stillness of the woods, the delicate tracery of the evergreens and towering forest trees lent an added charm and made a beautiful picture of the woods in winter.

Our killing comprised two does, five bucks and a bull caribou. Slaughter being the lesser object sought, our killing was much less than it might have been. We endeavored to spare all females and those killed would not have been shot had their sex been known.

Our ambition was to secure a lordly moose, and while we were in their country of "at home," and saw their track several times, the continued snow blotted out at night the trail picked up and followed during the day, and so we got none. But this will be an impelling incentive to another trip, and will give added zest to anticipation.

Cheery Bob Phillips, superintendent of the Megantic preserves, did us the honor of accepting the hospitality of Camp Taylor during the last few days of our stay, and to show him our appreciation of his condescension and presence, and to aid in holding him down to *terra firma*, we kindly allowed him to put upon his shoulders two saddles of venison, weighing 110lbs., and carry them out over the mountain trail to the Chain of Ponds, the little distance of some ten or a dozen miles. Such honors seldom come to him, and he is so highly pleased when they do, that his elation knows no bounds, and his best friends say he wears a decided hump upon his back ever since. This dangerous experiment, which has ruined many a beautiful character, is mentioned here, that others may profit by, and avoid our mistakes. GEO. A. MCALEER.

WORCESTER, Mass.

## SOUTH DAKOTA GOOSE SHOOTING.

BRIGHT and early on the morning of Nov. 8, I and my partner left Pierre, S. D., for a drive of thirty miles in quest of the wild goose. Our destination was the corn and wheat fields of Sully county, a favorite feeding locality. At this season of the year the geese roost nightly on the many sand bars of the Missouri River and at break of day their cheerful *honk, honk*, may be heard as they rise and separate into numberless squads, flying to the fields in search of food. Returning to the river by 10 o'clock, they make another trip at about 3 in the afternoon, and go back to their roosting places after dark. This is their regular habit, although on a cloudy day they often stay in the fields the whole day.

We drove out in anticipation of a good time, and on arriving in the vicinity of their usual haunts we made a number of inquiries, and the answers were invariably the same, "Yes, there are lots of geese around the Sully Buttes; good fields and nice people to stop with." So heading in the direction we soon located ourselves with Mr. F. E. Blakemore, who kindly gave us some pointers on the flights, and to whom, with his estimable wife and daughter, we were indebted for the most hospitable reception and kindly treatment we had ever enjoyed.

Hurriedly lunching, as the evening flight was on, we grasped the 10-bores and made for the lines of flight. Separating, we studied the different flights for the rest of the day, and felt repaid on coming in by finding that our observations tallied as to main flights and feeding places very closely. S., my partner, brought in a sample goose.

Six o'clock the next morning found us in the field, and on coming in about 10 o'clock I found that S. had three geese and I had six empty shells, but no goose. Of course I "got the laugh," but I gave it back in the afternoon, killing, rather singularly, four lone geese to his "one to get."

Daybreak found me in a stubble field on the west line of flight while my colleague, as the lawyers say, stuck to the east line. I think it will be some time before I shall forget that morning's shoot.

The morning broke cold, and a brisk wind from the west made it a good goose day. Hastily forming a light blind of tumble weeds, and getting my shells in reach I lay down in my blind, but had not long to wait, for soon I had the satisfaction of seeing a bunch of twelve or fourteen honkers heading directly for me, 50 or 60yds. high. Allowing them to pass over I arose and sent a charge of 00 at the nearest goose, which stopped him and he was soon a model decoy. The next geese caught sight of him, set their wings and sailed within 30yds. of me, furnishing two more decoys. Then came a clean miss with both barrels at easy range. Say, were you ever there? How a fellow kicks himself. Once more a small bunch, a nice double, a lone goose; another double, another miss, but got one with the second barrel, and so on until the flight was over and I had the pleasure of counting eleven plump geese as they lay side by side.

Hiding the game I made for the house and discovered that my partner had secured one goose. Hitching up I went after my birds and coming back called him out to size them up alongside of his one poor, scrawny, half-starved "cripple just as like as not" specimen. You see my turn came at last. But S. took it all right.

Three o'clock that afternoon found us together in the same field with eight or ten dead geese for decoys, but as our large shot was about gone we could only depend on the geese decoying near enough for us to stop them with No. 4. Soon they came, and after an A 1 time of hitting, missing and friendly guying of each other, night found us with twelve more birds, making twenty-four for the day.

The next morning we tried them for an hour after daybreak, but they were "on to us," and we only bagged three, a total bag of thirty-five geese in three days.

Bidding host and family good-bye, and sending the birds ahead by an obliging farmer, we were soon talking it over at home with our fellow sportsmen. To say that we enjoyed our trip would not half tell it, and we shall wait as patiently as possible the coming of another fall.

CAMP-FIRE.

*The* FOREST AND STREAM *is put to press each week on Tuesday. Correspondence intended for publication should reach us at the latest by Monday, and as much earlier as practicable*

## IN MAINE WOODS.

BOSTON, Nov. 24.—The Maine Sportsmen's Fish and Game Association proposes to take important action the coming session of the Legislature in that State. The Association is to meet at Augusta, within a few days, and matters will be discussed. The Fish and Game Commission is expected to be present. Sportsmen are invited to be present or to send in their opinions by letter. The committee on Legislation of the Association consists of its President, Eugene M. Hersey, of Bangor; Hon. J. F. Hill, of Augusta; Hon. Jessie M. Libby, of Mechanic Falls; Hon. J. F. Sprague, of Monson; Hon. Herbert M. Heath, of Augusta; Hon. F. E. Timberlake, of Phillips. The committee will take into consideration all proposed and needed changes in fish and game laws. The committee is particularly anxious to have the views of sportsmen on the subject of killing cow moose at any time, prohibiting the killing of any moose without horns or of "spike horn" moose, increased penalities for violations of the game laws, especially dogging deer, reducing the number of pounds of trout and salmon to twenty-five instead of fifty; decreasing the amount of game that one individual may take to one bull moose, one buck deer and one doe.

W. T. Farley with his friend Harry Clark are just out of the woods from their very successful deer hunt at Andover Surplus, Me. They found the ground covered with snow, and they arrived on the ground the day following a light, fresh snowstorm. The number of deer surprised them, or at least the tracks. Mr. Clark got a fine buck the second day. Mr. Farley got a handsome buck on the third day. The gentlemen are very pronounced in their praises of deer hunting in Maine; done in the right spirit. But they are down on the slaughter that is being practiced. In some cases three or four guides to the man are hired, and they take all the deer they can get; each hunter carrying home his quota of three. Such men should go into the business of deer butchering. SPECIAL.

### Down on the Marsh.

*Got-drunk, got-drunk, got-drunk.* "Yes, my friend, I judge from all reports they did," I made answer to the old veteran mossback on a big lilypad not far from my tent, where we were camped, fishing for bass and shooting woodcock. *Jug-o-rum, jug-o-rum, jug-o-rum,* said another. "Yes, they must have had pretty good *jag-on, jag-on, jag-on;* well, everything looks that way if the stories I've heard are true." *Elder-blue, elder-blue, elder-blue. Wilber-too, Wilber-too, Wilber-too.* "They were both here," I answered, "but, thank goodness, they've gone; and who was the third party with them?" *Peters, pe-ters, pe-ters.* "That's it, that explains the whole matter." A party had camped in this same place a few days before and had had a regular spree. They were Elder Blue, Wilbur and Peters. I knew them and had heard of them before. And the last thing I heard before hearing a woodpecker call the long roll for breakfast as the sun rose, was the frogs deploring the depravity of human nature in general and talking the matter over. H. B. J.

WABASHA, Minn., Nov. 17.

### Game Trophies for the Sportsmen's Exposition.

WASHINGTON, D. C., Nov. 16.—*Editor Forest and Stream:* Permit me to say a word in behalf of the Sportsmen's Exposition to be held in the middle of May next, at Madison Square Garden. I think this opens a first-class chance to get an exhibit of hunting paraphernalia, and of trophies the like of which has not before been seen here or elsewhere. Some years ago there was an exhibit of heads in London and a very good series of measures taken of them. A committee composed of Mr. Archibald Rogers, Mr. George Bird Grinnell and myself will be connected with this exhibit to the extent of being the measuring committee for the heads. I sincerely hope that all owners of big heads will send them to the exposition. I should feel a little ashamed if in our exposition on our own soil we were not able to show better heads than were shown in London, where the trophies were all from English sportsmen.

THEODORE ROOSEVELT.

### Maine Hunting.

EUSTIS, Me., Nov. 16.—Four moose hunters left this place for Spring Lake last Monday morning and returned to-day. They report killing four moose, two caribou and one deer; and they let four moose pass within easy rifle range that they did not shoot. The snow is 6in. deep, and makes the finest of hunting. All parties wishing to shoot large game should drop a line to A. B. DOUGLASS.

### Florida Information Wanted.

A CORRESPONDENT asks for the address of a writer in these columns who offered to refer inquirers to a certain point in Florida where shooting and fishing are combined with moderate expenses. If this meets the eye of that contributor he will please communicate with us. Perhaps some one else can suggest such a place.

### Ohio Quail.

LODI, O., Nov. 18.—Quil season opened Nov. 10 with a snow storm, but last week was pleasanter, so I managed to get a few birds. Quail are more plenty than last fall, but not as two years ago. Rabbits are numerous, as usual. E.

### Long Island Rabbits.

AT Lindenhurst, L. I., last Tuesday I killed thirteen rabbits in four hours; pretty good luck for so short a distance and time. Any one going there can get good accommodations at Gleste's Hotel. A. H.

### The Market and the Game.

EDGAR, Neb., Nov. 20.—There are plenty of quail here this fall but the market-hunter is getting in his work every day and many are being shipped out, mostly to Chicago. H.

THE name Cammeyer stamped on a shoe means "standard of merit." A catalogue of sportsmen's footwear will be sent free on application. Address A. J. Cammeyer, New York.—*Adv.*

IF you want fur-lined coats, vests, or robes, or anything in the line of fine gentleman's furs, you should write C. G. Gunther's Sons, 184 Fifth avenue, New York.—*Adv.*

# Sea and River Fishing.

## ANGLING NOTES.

### Supervisors' Laws.

IT is to be presumed that there was some good reason why, after conferring power upon boards of supervisors to "pass at their annual sessions such laws and ordinances as shall afford additional protection to and further restrictions for the protection of birds, fish, shellfish and wild animals except deer," etc., etc., that the time was fixed for such laws to take effect as follows: "No such ordinance shall take effect until the first day of May next after its passage." But after thinking the matter over for the past fifteen minutes I cannot discover why April 1 would not do just as well and serve every purpose intended by the law as it stands.

I was appointed by the Mohican Rod and Gun Club as a committee to go before the Supervisors of Warren county and ask for a law closing for a term of years the brooks tributary to Lake George in which the U. S. Fish Commission has this year planted 12,000 fingerling landlocked salmon. The planted streams contain a few trout, but the supervisors for the sake of possessing the salmon are willing to close the streams against fishing for any fish at any season, which is the only true way to protect a planted stream until the fish get a start. What will be the result? The supervisors will doubtless pass the law, and it will take effect the first of next May, but the trout fishing season opens, now, in these streams on the 15th of April, and next year it will be legal under the State law to fish for trout in the streams for two weeks before the supervisors' law can go into effect, and it is the trout fishermen that have caught the little Atlantic salmon in streams further north until salmon are no longer planted in them, and I think we cannot expect the landlocked salmon to escape unless the Legislature comes to their rescue and changes the word "May" in Section 273 of the game laws to read "April." It is true that the open season for landlocked salmon does not begin until May 1, but it is mighty hard for some fishermen to distinguish between a trout and a landlocked salmon if they have the chance to catch both in the same stream. I do not believe in constant tinkering with the game law, but unless there is some good reason why it should not be changed, and I know of none, it is to be hoped that the Legislature will make the change so that supervisors' laws will go into effect on April 1. That gives ample time for the laws to become known, and now that the U. S. Fish Commission has commenced stocking New York waters with landlocked salmon on a large scale, and the people, wherever the fingerlings have been planted, desire to close the streams against all fishing, to give them every protection, the law should lend itself to aid the people in this direction.

### "Section 140."

Ever since, and in fact before, Section 140 of the Game Law of New York was enacted, I have tried in various ways to accomplish its repeal, as it is a menace to all fish protection in Warren county. Only a few weeks ago I told in this column how it defeated justice that the Mohican Club attempted to mete out to a notorious fish poacher. When I went before the supervisors to have the landlocked salmon protected in the streams, I presented a bill "for the further protection of fish in Warren county," and the supervisors very kindly put it through with the other. It is intended to defeat the infamous provisions of 140 as to spearing, netting and shooting fish in Warren county. I say "intended" after due deliberation. Returning on the cars from the county seat, a certain judge asked if I had accomplished the legislation I sought, and I said yes, and that I had secured the passage of one bill that might give some of the gentlemen of his profession business in the courts. That if it was not good law it would at least make the other fellow do the walking—to prove it. He asked if the doubt was in regard to the powers of the supervisors, and I said that it was: "If that is all your bill will stand, for you do not know what extraordinary powers the supervisors of this county have. Years ago, and a good many of them, a Court of Sessions sent a man to the county jail for say, sixty days. The supervisors were holding their annual meeting at the time, and they decided to have the prisoner brought before the board that the members might review the proceedings of the Court. The prisoner duly appeared, and after solemn deliberation the board resolved that the prisoner should be formally admonished by Elder Blank (one of the supervisors) and discharged. And he was discharged! So I say to you, if your bill is only a little matter of difference between your lawyer and the laws of the State, I think your case a good one." The only trouble is that if the validity of this land is ever successfully disputed, I fear the lawyer will blame the whole thing on to me. In the mean time the Mohican Club will go ahead as though the law was the best and strongest ever enacted, and I think it is as good as the average game law.

### Bad Black Bass.

While Judge B.'s story may be considered the humorous feature of my journey in search of laws to protect our fish, I heard another story on the cars that is anything but humorous. I met Mr. Scott Barton, of Brant Lake, N. Y., who wished to know various things about fish and fishing, all of which led to his telling me that last year a black bass spawned near his dock in shallow water, where the fish was under his observation daily. The young bass were hatched in June and remained about the bed for a week or ten days, the parent fish guarding them and driving away any other fish that came about. After about ten days of the most solicitous care and brooding on the part of the parent fish, Mr. Barton noticed one morning that the old bass was charging right and left through the brood of young fish, and that the young were making every effort to escape into any shelter that offered, "In fact, it looked to me as though that old devil was eating its own babies." The next morning the brood of young bass appeared to be greatly reduced in numbers, and the old fish was again charging into the fry, apparently with malice aforethought. Mr. Barton was so incensed at the unnatural action on the part of the parent bass that he baited a hook and caught the old monster, and upon opening it thirty-eight or thirty-nine little black bass were found in its stomach.

Mr. Barton tells me that he could not be mistaken about the species of the little fish, they were black bass; and the parent fish had eaten most of its own brood after carefully caring for them for ten days or more. Many charges have been made against the character of the black bass, but this is by far the most serious indictment yet presented; and I cannot yet think it is the habit of the black bass to eat their own young if other food abounds.

I know of one instance where a black bass brooded its young for six weeks after they were hatched. Mr. Barton tells me, further, that after he found the young bass in the stomach of its parent, he made inquiries among the fishermen about the lake and watched other bass with their young, and from what he learned came to the conclusion that it is quite common for the black bass in Brant Lake to eat their young. I would be very glad to hear from any one who has made observations upon this subject of cannibalism among black bass. It will be a difficult matter to investigate thoroughly because of the law in some States that forbids the capture of bass during and directly after the spawning season, but it can be investigated in New York State, where there is no law to protect bass during their actual spawning season except as the supervisors have furnished it.

### From the Hatcheries.

This is the season in which the work is done upon which the fishing of succeeding seasons depends. Nature and the fish hatcheries of the land are both employed in developing fish for the years to come, and as the result is large or small, so the promise of fishing in the immediate future may be good or bad. Fish Commissioner Griffin of New Hampshire writes me from Manchester: "This year our catch of breeding lake trout at Newfound Lake beats any previous record, both in the number of fish taken and in the size of the females. We took in all about 900 trout, but used only 830 for spawning, the balance being males, and were not required. I estimate that we have taken 3,500,000 eggs, but cannot tell accurately until they are figured on the trays at the hatcheries where they are laid down.

"The weight of the fish would average at least 10lbs. We weighed several that brought the scales down to 18lbs.

"We took a few male trout weighing from 1½ to 3lbs., which proves to our satisfaction that the fry planted in the past are doing well, as for the first three years that trout were taken from this lake for breeding purposes no small trout were caught. Taking into consideration the fact that all of the trout taken this year were taken off of one spawning bed with a common dip net, it leads me to think that we have as good, if not the best, lake in the country for this species of fish.

"Col. Wentworth says that the very rough weather at Sunapee Lake this fall on the saibling spawning beds has interfered with the work of taking the parent fish. Still, they have met with fair success, and at last reports they were still taking saibling.

"The catch of breeding landlocked salmon at New Found this year is larger than ever before, being 89 fish, as compared with 67 for the largest number in any previous year.

"As few have been stripped, I cannot say how many eggs we will get; but judging from the number of females taken this season, as compared with last, we will certainly have three times as many."

### Stocking Virgin Waters.

Fish Commissioner George F. Peabody, of Wisconsin, sends me a description of the result of the work done in his State in the way of stocking certain streams with brook trout. The waters are streams in Waushara county, which eight years ago were barren of fish life, except perhaps suckers and chubs. About a dozen of these streams, made up of springs and flowing through a charming wooded country, although they contained no trout, seemed to invite them, and as all conditions of purity and temperature of water and food were offered the Commissioners began to stock them with brook trout fry, and the result has been such as to border on the marvelous. During the past season a catch of forty trout was made in one day in these streams, and after being dressed the fish weighed 63lbs., the largest fish weighing 3lbs. 10oz. On the same date two other gentlemen caught fifty trout, of a total weight of 62lbs. The Commissioners visited the streams in July, and in spite of an extremely hot day they caught 135 trout in three streams in a few hours fishing.

Waupaca county has also been benefited in a like manner, and one stream that sixteen years ago contained no trout, now, as the result of stocking by the Commissioners, yields strings of from 500 to 1,500 trout in from one to two weeks' fishing. I have an idea, however, that encouraging as such results must be to the Commissioners who have exercised such excellent judgment in the selection and stocking of these streams, that the waters will not stand such a tax upon their resources. When two fishing parties in three days' time take 1,200 and 1,500 trout respectively, from waters artificially stocked, they do not exercise the same good judgment displayed by the Commissioners in stocking them, and such merciless fishing must cease or the hatcheries of the State increased to keep up the supply of fish. This is but one of the many things which tend to confirm my view that we must soon have the catch of so-called game fish taken for sport limited by law.

Mr. Peabody urges very strongly that the Fish Commission of his State should be removed entirely from political influences as the only means to make it thoroughly efficient.

### A New Sinker.

Mr. Alfred Jardine has a reputation as an angler which extends from his home in Great Britain to the rest of the habitable world where angling is practiced as a fine art, and a Jardine this or a Jardine that is quite sure to relate in some way to fishing; and the name is enough to insure that the article, whatever it may be, is good. I have just received from Redditch, England, samples of perhaps Mr. Jardine's latest invention, in the shape of a sinker, called the "Archer" Jardine detachable lead, and after due deliberation I have arrived at the conclusion that it is the best sinker I ever saw. I have seen many forms of detachable sinkers, but they are as nothing compared to this one, which has the very unusual merit that it may be attached or detached from a leader or line without the least injury to either, and it is so simple that I wonder that 4,000 anglers have not thought of it before. The sinker is of soft lead, round, and of various thicknesses and lengths to produce different weights. Around the lead is a spiral groove, and the ends of the lead terminate in a bit of coiled brass wire. The line or leader, when soft from wetting, may be wound around the grooves and conducted inside the spiral terminating wires, and then it is impossible for the sinker to slip on the line or leader. It is the only sinker that I know of that can be attached to a gut leader without injury to it.

The sinkers are painted a dark green, without gloss, and the lead is soft enough to be bent into the form commonly used on a casting or trolling line to prevent the line from twisting as a spinning bait revolves.

### Yearling Trout.

Among those who have been converted to the use of yearling trout for stocking or restocking streams, instead of fry, is Mr. A. C. Collins, president of the State Sportsmen's and Farmers' Association of Connecticut, and I understand that the belief is growing throughout that State that yearling trout are not only better for stocking purposes, but that they are cheaper in the end than fry. And this reminds me that I have just read that "the average number of fry taken from a salmon is about 6,000."

A. N. CHENEY.

## AUTUMNAL MUSINGS.

NOW THE withered leaves come whirling down, and caught by the eddying gusts are scattered to the hollows and fence corners, there to lie packed in damp sodden masses, awaiting the action of time and their final disintegration. The intense yellow of the last golden rods gleams out in bold contrast against the brown carpet of the fields and roadsides. Here and there the grayish white and purple stars of the belated asters attract the eye, and across the pastures bright patches of color betoken the presence of the scarlet leaved sumac. Along the edge of the forest bordering the meadow is displayed an unrivalled combination of colors—the deep green, the bright yellow, the vivid scarlet and intermediate shades marking the fading away of the emerald foliage of the summer months. Already has the hum of insect life ceased and the bark of the gray squirrel taken the place of the bird song now hushed by the approach of icy winter.

Ah, how these familiar signs all give warning of one of the inevitable changes so consistent with the laws of nature; and with this change comes a subtle undefinable feeling of melancholy inspired by this universal decay of all things bright and beautiful. This feeling most strongly appeals to the angler's heart, and why not? As is the ship to the marines or the studio to the artist, such are the forests and streams to the naturalist-angler. Grand music to his ear is the dash and roar of the mountain stream, and in the proper season he is ubiquitous in the mountains. You will hear the ring of his cheery laugh as he shouts to his comrade across the pool or where the stream leaves the hills and widens out into the calm reaches of the meadow, you will hear the splash of his wading boots and the swish of his leader as he sends the feathered cheat out to the chosen spot. But now the summer wanes and these are things of the past, and a feeling of rebellious discontent steals over him, as he lays the rod away and ponders on the cheerless idle days that must surely intervene till the return of the open season again.

But hold. Not altogether are the days profitless. These are the sportsmen's golden days, replete with pleasures made possible by these gloomy later months so distasteful to the brother of the angle. In our northern clime there are pleasures peculiar to the season. There is the start in the early hours of the glistening frosty morn, the long tramp over the breezy hills, the invigorating walk as we follow the erratic movements of the well trained canine friend through the fields, the point, the flush, the whirr of brown wings, the thunderous roar of the gun, followed by the abrupt downward plunge into the brown stubble, and then the retrieve. But this is active, boisterous sport, not to be compared with the quiet joys of the gentle art. The gun does not and cannot take the place of the rod, for we do not measure the pleasures of the day by the weight of the creel. It is enough to wander of a lovely June day, rod in hand, on the fern-covered banks of a pleasant stream, now stopping at some swirling eddy or inviting pool to capture a dripping prize, or again pausing to listen to the trill and twitter of the feathered companions of the wood. Ah! is not this the acme of happiness?

But we must yield to the stern decrees of nature and wait till springtime clothes the earth with richest garb, and brings again those days replete with pleasures that, as good old Izaak Walton saith, are without offence to either God or man.

E. M. BROWN.

### "Red Trout," Kennerley's Salmon.

LOCKPORT, Nov. 23.—I dislike very much to disturb the conclusions of so enthusiastic and entertaining a correspondent and angler as "El Comancho," of Seattle, on the subject of "red trout," but that industry and perseverance which led him to undertake a quarter mile portage and a twenty mile voyage in a Siwash canoe ought to be able to stand a little contradictory evidence.

In an article published in the last number of FOREST AND STREAM "El Comancho," is positive that the "red trout" is identical with the common lake trout of the Puget Sound country. "El Comancho" is mistaken in his conclusions. The fish he writes about was identified, illustrated and described in FOREST AND STREAM a few years ago as Kennerley's salmon. This little "red fish," as it is called around the lakes of Whatcom county has puzzled many an angler, including the writer, and I was greatly pleased to learn its identity. It was my privilege to visit Lake Whatcom, Wash., less that five weeks ago, when I found these fish assembled at the mouth of a creek near the head of the lake, ready to ascend and perform their family duties, when the water in the creek was sufficiently high to permit it. I caught some of them by letting a gang of three hooks down among them and suddenly raising it.

The fish then presented a healthful appearance, the males being of a reddish hue, which I do not think is due to disease as "El Comancho" says. The files of FOREST AND STREAM will furnish him with a great deal of information about this fish.

### Pleasant Pond Landlocked Salmon.

CHARLESTOWN, N. H., Nov. 23.—*Editor Forest and Stream:* I am perfectly contented to "sit corrected" as to the landlocked salmon in Pleasant Pond, New London. As I said, I wrote solely from memory, all my records being burned, and was deceived, by the name of the pond, as to its location, having forgotten that there was a Pleasant Pond in Springfield, it not being so named in my map of the State.

I prepared the list of the lakes in the report of 1879, myself, with no small labor, and made it as correct as possible up to that date. I should be the last person to accuse my old friend and colleague, Powers, of any underhand proceedings, for the Commissioners themselves were fully informed of the doings of each other, but for obvious reasons we did not care to make all our experiments public until we knew something of the results.

I am very glad to have the rapid growth of the "wininish" in the New London pond verified, for Mr. Powers and myself made up our minds in 1876 that it was the "coming fish" for New Hampshire waters, and that it was better for us to introduce them than to devote all our energies to the original object of the Commission, *i. e.*, that of restoring the *Salmo salar* to our rivers.

The next step I want to see taken is to stock our small rivers, which are too large for the *S. fontinalis*, with the European or brown trout, and I have so written Commissioner Shurtleff.

VON W.

### The Proposed Minnesota Association.

ST. PAUL, Minn., Nov. 23.—*Editor Forest and Stream:* A movement is being started with the intention of organizing a voluntary Minnesota Game and Fish Protective Association as an auxiliary to the constituted State Bonrd. A plan has been outlined in several recent issues of the St. Paul *Pioneer Press*, and has received favorable editorial comment as also the indorsement of our State Board of Game and Fish Commissioners, and the promised active support of some well known gentlemen and enthusiasts on the game question.

A short explanation and a brief outline of the proposed work is in order. During late years the game and fish reserves of Minnesota are fast becoming depleted through the indiscriminate hunting and fishing both in and out of season. Naturally there are cases which the State Board does not become acquainted with, though where they do, they vigorously prosecute. They are doing a noble work. There is a feeling of antagonism among many people of the rural districts against game legislation, since they have an idea that game laws are made only for the benefit of a favored few. The State Board is necessarily composed of but a few members, but if there was a voluntary State organization that any might join as members, it would afford an excellent opportunity for a dissemination of views on the subject and a hearty co-operation. We would be in direct touch with the entire State, and the conduct of each member would do much to win a kinder feeling at large for those who do enjoy the pleasures of the rod and gun.

What we need is an organization to give support to the game laws, and encouragement and assistance to the State board. It is certainly most possible that such a body might be formed and incorporated during our present session of Legislature.

We will be perfectly voluntary in character, no one of us wishing to enrich himself by a dollar; and with a membership fee of not more than a dollar yearly, we should enlist the support of a very large number of gentlemen of like tastes. The game resources of Minnesota are worthy of the effort. We can be of such service in effecting additional legislation. There is a growing sentiment among sportsmen of the whole country that laws should be passed everywhere prohibiting the sale of game. Another fact is, that rich as Minnesota game reserves are, we cannot forever furnish game to citizens of other commonwealths gratuitously; and would see enacted a law exacting a license fee from all non-resident gunners. We should not be expected to give unlimited advantages to strangers to our own detriment.

WM. L. TUCKER, Sec. Com. on Organization.

### New York Association.

NEW YORK STATE ASSOCIATION FOR THE PROTECTION OF FISH, GAME AND FOREST.—Syracuse, N. Y., November 20.—The next annual meeting of the New York State Association for the Protection of Fish, Game and Forest, will be held in the Assembly Hall of the Hotel Yates, in the city of Syracuse, beginning at 10 A. M. on Thurday, Jan. 10, 1895.

This meeting will be of unusual importance. The association has become influential in the shaping of legislation in relation to the interests it assumes to protect, and at this meeting new subjects of vital interest will be presented for serious consideration, and numerous amendments to the Code are likely to be proposed. With full and zealous representations from the various auxiliary associations and clubs, the proceedings of the meeting can be made most influential. The work necessary to be done ought to be well distributed for all are alike interested. We urge that the attendance should be full, with a view to making the declarations of the meeting felt in the Legislature.

It would seem that the importance of this meeting, which must consider questions relating to fish, game and forest alike, should appeal to all of the tournament organizations as well as to the present membership of the association. Their earnest assistance and support is greatly to be desired. When the constitution of the association was revised and made to provide for winter and summer meetings, it was done with the expectation that all associations throughout the State, even such as preferred the gun to the rod, or the rod to the gun, would come into full membership, and by force of wise counsels and large numbers give to the association such power and influence as to give great weight to its recommendations to the Legislature. This circular is sent to all clubs and associations throughout the State, hoping that all earnest friends of the protection so much needed, will give to the next meeting of the association their hearty support.

Under a resolution adopted at the last meeting, proposed amendments to the code must be filed with the chairman of the law committee, W. S. McGregor, Syracuse, on or before Dec. 10. Particular attention is called to this requirement, that this part of the business programme for the meeting may be arranged in advance. It is hoped, however, that proposed amendments, so filed, will be general in their character and operation, except in cases were special legislation seems to be absolutely necessary.

A very important subject which will be introduced for special consideration will be the suggestion of the Senate committee to divide the State into three districts with a special code for each district.

It is hoped that delegates to the meeting will be appointed at least two weeks previously, and their names sent to the secretary at Buffalo, that a full and authentic roll may be prepared. A general programme of business will be prepared with a design to dispatch business, for it is manifest that the proceedings will be of unusual length and interest.

Unless active and efficient efforts shall be put forth, it must be that the cause of protection will fail, and game, fish and forest perish. Never was there more to encourage workers in this cause than now exists, and with all its friends at work there must be grand success.

JOHN B. SAGE, Sec'y. DWIGHT H. BRUCE, Pres.

# The Kennel.

## FIXTURES.

### DOG SHOWS.

1895.

Feb. 19 to 22.—Westminster Kennel Club's nineteenth annual show, at New York. James Mortimer, Supt.
Feb. 26 to March 1.—Mascoutah Kennel Club, at Chicago. J. L. Lincoln, Sec'y.

### FIELD TRIALS.

Feb. 5.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.

## THE E. F. T. C. TRIALS.

THE trials which began on Monday, Nov. 19, at Newton, N. C., were a decided success. There was more interest manifested in them, there were more club members in attendance, and there was a fairly good entry. All in all, these trials were auspicious for a better future for field trials.

Messrs. W. S. Bell and S. C. Bradley judged the Members' Stake, and they, with Mr. N. Wallace, judged the remainder of the competition.

Birds were moderately plentiful.

The grounds were not in the best condition owing to light cover, due to a late frost and a dry season.

The weather was quite warm, too warm at times for the highest class of work.

Following is a list of the visitors present who followed the trials every day, besides several townspeople:

L. W. Porter, J. B. Douglass, Richmond; T. R. Tuell, Tennessee; J. O. Harrison, North Carolina; John Y. Jordan, Asheville, N. C.; Edmund H. Osthaus, Toledo, O.; G. W. Shackleford, Atlanta; R. S. Smithy, R. D. Hopkins, Britman, N. C.; W. A. Coster, A. M. Hanna, Saratoga; W. T. Thompson, W. B. Meares, Jr., Hillsboro, N. C.; F. A. Hodgman, P. Lorillard, Jr., F. R. Hitchcock, H. B. Duryea, S. S. R. Mineikin, E. R. Hearn, J. E. Orr, Major J. M. Taylor, Mr. and Mrs. W. B. Duncan, New York; S. Murray Mitchell, Edwin J. Dougherty, J. W. Rabe, Philadelphia; W. H. Anderson, Atlanta, Ga.; Dr. R. T. Mead and wife, Manistee, Mich.; M. M. Jordan, Greenville, S. C.; Edw. Dexter, M. M. Johnson, Boston; P. H. O'Bannon, Sperryville, Va.; Mr. and Mrs. E. F. Young, H. H. and L. D. Hargrave, Charlotte, N. C.; R. S. Smith, Baltimore. The famous handlers in attendance were: C. E. Buckle, Horace Smith, John White, D. E. Rose, J. M. Avent, Maj. J. A. R. Purcell, J. N. Lewis, J. B. Stoddard, C. Tucker and son.

### The Members' Stake.

There were ten starters in this stake, nearly all of which were dogs of exceptional merit. The conditions were changed in so far as to permit a member to run any dog or dogs regardless of ownership. This departure seemed to infuse more vitality and enthusiasm into this stake than has been exhibited in several years past.

It is an important stake in many respects. It has a direct personal interest for the members and is something to look forward to in the way of direct competition for them. Very few care to come year after year for the sole purpose of witnessing a competition. There must be something of more direct interest. By varying the conditions year after year or making changes so as to relieve the monotony of running for like prizes under like conditions each year, there probably would be more interest. At all events, this important stake is worthy of more consideration and attention.

The work was very clean cut and free from error, not entirely because the dogs were so far superior to anything in the open stakes, although they were superior dogs, but to their superior handling, which was a good object lesson for many professional handlers to have seen and profited by it. There was very little noise, the dogs were permitted to hunt out their ground and there was none of the unseemly and harmful scrambling so often practiced in the open stakes. It is rarely, in the latter stakes, that the handlers give their dogs half an opportunity on scattered birds owing to their over-eagerness to get points before a competitor. There is loud urging of the dogs and a pressing forward of handlers into the scattered birds before the dogs have time to point them, resulting in flushed birds and lost opportunities for work. They seem never to have outgrown the old theories of the heat system, and sacrifice much of the general qualities in a frantic effort to get points. There was none of this in the Members' Stake. While the dogs were skillfully kept up to their work there was none of the flurry and scramble which are no part of competition.

The drawing was as follows:

Pierre Lorillard's black, white and tan bitch Leona (Eugene T.—Belle of Hatchie), *with* Lochinvar, black, white and tan dog, H. B. Duryea, handler.

Pierre Lorillard's bitch Antoinette, *with* F. R. Hitchcock's black, white and tan dog Tory Sandstone (Count Gladstone IV.—Tory Diamond).

Pierre Lorillard, Jr.'s, black, white and tan bitch Lady Araminta (Eugene T.—Dell Rivers), *with* W. B. Meares, Jr.'s, dog Linwood.

F. R. Hitchcock's black, white and tan bitch Topaz (Count Gladstone IV.—Tory Diamond), *with* W. B. Meares, Jr.'s, orange and white dog Joyful (Dion C.—Natalie).

Roi d'Or, black, white and tan dog, handled by H. B. Duryea, *with* J. E. Orr's liver and white pointer dog Shot.

*Second Round.*

Topaz with Leona.
Lady Araminta with Lochinvar.
Sandstone with Joyful.
Roi d'Or with Antoinette.

*Third Round.*

Lady Araminta with Topaz.
Leona with Lochinvar.
First, Topaz; second, Lady Araminta; third, Lochinvar.

This event preceded the Derby and All-Age Stake, which did not begin till Wednesday, Nov. 21. On Tuesday many of the visiting sportsmen went shooting.

### MONDAY.

The start was late, owing to bad weather. The early morning was dark and rainy. The solid black sky showed no signs favorable for good weather, but about 8 o'clock the clouds rapidly broke up, the weather cleared perfectly, and the sun shone warm and clear. While not so warm as to be uncomfortable, it was a little too warm for the best work.

Birds were neither in abundance nor scarcity, yet they were scarce enough to test the finding qualities of the competitors quite thoroughly.

*First Round.*

The competition in this round was so good and the work so clean-cut by nearly all the competitors that it was indecisive in establishing any pronounced superiority. The handling, too, was so skillful that there were none of the flurries and rushing and unseemly scrambling which so often mar the competition in professional stakes.

LOCHINVAR—LEONA.—The heat began at 9:24. Lochinvar showed a decided superiority over his competitor, though faulty in locating his birds accurately since he required coaching to set him properly on his points. He was first to point, but moved on, then both dogs roaded and nothing was found. In thick cover in a run Leona was on point and as one of the judges crossed through the difficult cover he flushed the bevy. The cover was so dense it was difficult to form other than a vague idea of the point. On the scattered birds Lochinvar pointed three times on singles in quick succession, and pointed once on footscent presumably, as nothing was found. Up at 10:05. Both ranged well and at good speed, Lochinvar the better.

ANTOINETTE—SANDSTONE.—They began at 10:12. Both were in heavy weeds working down wind and a bevy flushed. The high weeds concealed the cause of the flush. The bevy was followed. Sandstone took a cast into the woods and pointed it. Mr. Hitchcock failed to flush, but after he ordered the dog on he flushed the bevy a few yards further on. The dogs were steady to shot. On the scattered birds Antoinette pointed a single well and Sandstone backed. Next he flushed excusably. The heat ended at 10:54. Both ranged fairly well and with good speed. Sandstone showed some self-will at times.

LADY ARAMINTA—LINWOOD.—They were cast off at 11:05. Lady soon pointed a bevy and was prettily backed by Linwood. The dogs were worked in a circle back to the birds in corn. Linwood pointed them, and Lady coming up the other side of the narrow run, pointed the same bevy. Both were steady to shot. The birds were followed into pine woods, where Lady flushed a single and Linwood made a good point on one. Next he drew with head well up to a point on the bevy. At the same time, Lady apparently not seeing him, drew to a point on the same birds and got very close on them before stopping, and either stopped to wing or stopped barely soon enough to make a point. In any event, her performance was far inferior to that of Linwood. Sent on, Lady pointed; nothing found. Linwood pointed a single and was steady to shot, and his next point had no bird. Up at 11:33. Linwood showed superior ability in locating, drawing and accurate pointing, far superior to his competitor in those qualities. But his range was very narrow. Lady ranged well and had the greater speed, but her point work was ordinary.

TOPAZ—JOYFUL.—They started at 11:37. Both went well, Topaz going merrily, speedily and wide. Joyful was one of the Derby entries. Topaz took a wide cast, found and pointed a bevy nicely, and held her point staunchly till her handler came up. Joyful drew in and pointed the same bevy. Both were steady to wing. Topaz flushed a single. Next she pointed in weeds where birds had been marked down and Joyful pointed, but the birds could not be found. Joyful pointed nicely a bevy in corn. Up at 12:08. Topaz was speedier and the wider ranger, and had a most animated action. Her point work was sharp and superior. Joyful ranged fairly well and at good speed, worked well to the gun and showed good judgment.

ROI D'OR—SHOT.—They started at 12:18. One of the judges flushed a bevy which was marked down close by. Shot pointed and roaded slowly on the trail of some running birds. He finally got a point on a single and was steady to shot. Sent on, he flushed a single. At the same time Roi, about 80yds. away working on separate ground, pointed a bevy, and next pointed a single. Shot showed carelessness and flushed twice. Roi made two points on birds in woods. Up at 12;55, with the heat all in Roi's favor. Roi ran a steady working heat, kept up his speed, though there was nothing in his performance above superior every-day work.

*Second Round.*

The work had been so even that it was impossible to make any accurate selection of the winners. Eight dogs were retained.

TOPAZ—LEONA.—After lunch, at 1:45. Both soon pointed, moved on and made game. In woods, Topaz pointed and Leona backed. One of the attendants said a bevy had flushed from the spot a few moments before. Leona pointed a single. Up at 2:24. Topaz was the better ranger, though neither ran so well as in the morning.

LADY ARAMINTA—LOCHINVAR.—Lady pointed a bevy in woods and was steady to shot. Soon each got a good point on a single. Lochinvar next pointed and nothing found. Lady, standing directly over a single bird failed to point it. Up at 2:54. Lady had shortened her range very much as compared with that of the morning, and was not equal to Lochinvar in that respect. Her work on birds was not clean and skillful.

SANDSTONE—JOYFUL.—They started at 3:00 and ran 23m. Joyful pointed a bevy in corn, taking a long cast to it. He held his point quite a while till his handler came up, then moved in and flushed. Some of the birds lit a few yards away and he flushed them. Sent on again he pointed two birds in sedge grass. Up at 3:23. Both were diligent, though neither ranged wide in this heat.

ROI D'OR—ANTOINETTE.—They began at 2:30 and ran 17m. Antoinette flushed an outlying bird, then stopped on a point on the bevy. They were steady to shot. On the scattered birds, Roi pointed a single and Antoinette refused to back. Her range was much shortened. Roi kept up his steady gait and had medium range.

*Third Round.*

ARAMINTA—TOPAZ.—At 4:10 they were cast off. Topaz got a point on a bevy and two points on singles and one flush. Lady got one point and one flush, all in a strip of woods. Next Topaz found and pointed a bevy, and Lady drew to a point on the same bevy. Topaz was the wider and better ranger, and her point work was better. Up at 4:38.

LEONA—LOCHINVAR.—They began at 4:41 and ran 23m. Lochinvar made a staunch point in corn; nothing found. Sent on, next he pointed a bevy in weeds. The dogs were separated during the latter part of the heat, Lochinvar being lost for some minutes, when found, on point. Lochinvar was the better. The judges announced the winners as follows: First, Topaz; second, Lady Araminta; third, Lochinvar.

### WEDNESDAY.

A rainy morning cleared up quickly into a delightfully pleasant day which grew warmer and warmer, till at last the handlers were content to run in their shirt sleeves, and were uncomfortably warm even then. Whether or not the dogs would have done better work if the weather had been cooler is a matter for speculation. Birds were not plentiful. It required diligent searching to find them.

### The Derby.

For all setters or pointer pups whelped on or after Jan. 1, 1893. Three purses; first prize, $300; second, $200; third, $100.

The first stake of the open competition began with the Derby. The quality of the dogs was average. No phenomenal performer appeared in the competition.

The stake had 13 starters, drawn in the following order:

F. R. Hitchcock's black, white and tan bitch Dotlet (Count Gladstone—Della), H. B. Duryea, handler, *with* Blue Ridge Kennels' black, white and tan dog Tony Boy (Antonio—Laundress), D. E. Rose, handler.

Charlottesville Field Trial Kennels' liver and white dog Delhi (Rip Rap—Queen II.), C. E. Buckle handler, *with* Avent and Thayer Kennels' black, white and tan bitch Clementina (Roderigo—Norah II.), J. M. Avent, handler.

P. Lorillard, Jr's., black, white and tan dog Shad (Eugene T.—Lou), C. Tucker, handler, *with* Avent and Thayer Kennels' black, white and tan bitch Cynosure (Roderigo—Norah II.), J. M. Avent, handler.

F. R. Hitchcock's black, white and tan bitch Luna, (Roi d'Or—Tory Diamond), John White, handler, *with* H. H. Hargraves' lemon and white bitch Antovista (Antonio—Buena Vista), owner handler.

Blue Ridge Kennels' black, white and tan bitch Lady Mildred (Antonio—Ruby's Girl) D. E. Rose, handler, *with* P. Lorillard Jr's., black, white and tan bitch Paloma (Eugene T.—Lou), C. Tucker, handler.

Blue Ridge Kennels' black, white and tan bitch Nellie Fox (Antonio—Can Can) D. E. Rose, handler, *with* Charlottesville Field Trial Kennels' liver and white dog Tippoo (Rip Rap—Monterey) C. E. Buckle, handler.

W. B. Meares, Jr.'s, orange and white dog Joyful (Dion C.—Natalie) a bye, owner, handler.

*Second Round.*

Cynosure with Tony Boy.
Delhi with Lady Mildred.
Clementina with Luna.
Paloma with Nellie Fox.

First, Cynosure; second, Tony Boy; third, Lady Mildred.

Some changes were made in the order of the running, by consent of the handlers, to favor Mr. Avent, who was ill.

The competition was quite good, some of it superior.

The winner, Cynosure, made an exceptionally good showing. She was superior to her competitors, and won with something to spare.

Tony Boy was not excelled by any dog in the stake in respect to speed, good range and a dashing, pleasing manner of going. His point work was faulty, and in this respect was decidedly inferior in the competition to Lady Mildred, winner of third. The latter was quite successful in finding and pointing, but was not equal to Tony Boy in range and speed, though she had good medium range. It was not an easy matter to decide between the two, though I thought her finding and pointing so far the better that she should have had second. Still, Tony's superior speed and range were to be considered, and in setting off dissimilar qualities there is room for differences of opinion.

*First Round.*

DOTLET—TONY BOY.—They were cast off at 8:55. The first work on birds was on a bevy in heavy sedge. The dogs could not be seen. The bevy flushed, and Tony made a flush on two remaining birds. The birds were followed and Tony roaded to a point on a single and was steady ro shot. At the same time Dotlet pointed and would not move on except when urged. She pointed and drew over cautiously till the end of the heat, plainly not on footscent. Tony Boy showed good range and speed and put much enthusiasm into his work. On the single bird which he pointed he did a good piece of work. Up at 9:29.

LUNA—ANTOVISTA.—At 9:37 they were cast off. Antovista pointed in a cornfield; nothing found. She showed some unsteadiness on a single bird. Luna pointed a bevy; Antovista refused to back and stole the point. The birds were followed. Antovista flushed one and chased. Luna pointed and several yards away one of the judges flushed a bird. Antovista refused to back. She pointed, probably on footscent. Up at 10:09. Antovista was a good ranger, was diligent and speedy, but was lacking in experience and discipline. With more experience, she should make an excellent performer. Luna showed fairly good point work and moderate range.

DELHI—CLEMENTINA.—They began at 10:14. Delhi was easily the better. Clementina was self-willed and disposed to work to please herself regardless of the gun at times. Crossing the hollow, the judges found Delhi on a point, but the birds flushed a few moments before the judges could get to him. He presumably had the point. Soon Clementina was lost, or what was probably more correct she was working to please herself. Before she was found, Delhi took a cast into the next field and pointed a bevy and was steady to shot. This was a good piece of work. The birds were followed. Delhi in woods pointed them, Clementina, crossing in ahead pointed the same bevy. Each then got a point on a single bird, and Delhi pointed footscent where birds had flushed from. Up at 11:07. Clementina was hard to handle and needed a lot of whistling and ordering to keep her even partially in control. Delhi worked well to the gun and his point work was clean and sharp. He ranged well, but came in to his handler once in a while unnecessarily.

SHAD—CYNOSURE.—They were cast off at 11:21. Cynosure opened the bird work by finding and pointing a big bevy in sedge and weeds. She was steady to shot. The birds were followed into corn. Cynosure pointed in corn, but nothing was found. Next she took a cast into sassafras bushes and heavy sedge, and she was left behind some moments on the supposition that she had gone on ahead. Returning, she was found holding a point on a bevy steadily, which flushed wild. The dogs became separated. Cynosure was ordered up at 11:52, and Shad ran four minutes longer without finding. All the advantage was with Cynosure.

LADY MILDRED—PALOMA.—After lunch at 1:30 they were cast off. Lady far outclassed her competitor. She found a bevy in weeds on a side hill and pointed it. Paloma drew a short circuit about Lady and flushed the bevy. Both were steady to shot. Next Lady roaded on a side hill in weeds across wind on a bevy which she pressed too close and flushed. A bird was left and Paloma pointed it. The dogs were worked in a circuit to the scattered birds in woods. On the way, in thick cover, Paloma made a half point on a single bird, which flushed wild. She roaded further down the hill and got a point on a single. Lady was out of sight for a few moments. She was found on a point in pines; Rose flushed the bevy and Lady was steady to shot. The heat ended at 2:07. Lady beat out her ground with excellent judgment and showed superior skill in her bird work. She found well, too. Paloma's point work was ordinary and she had no success in finding bevies. Her range was middling.

TIPPOO—NELLIE FOX.—They began at 2:18. Tippoo flushed a bevy in open weeds, which probably injured his chances seriously. The bevy was followed and Tippoo pointed it. Sent on, he flushed the remaining birds. In weeds, Tippoo backed Nellie's point; nothing found, but a bird had been flushed from the place shortly before. A bevy flushed by the handlers was followed into the woods. Both flushed the same bird, then Nellie flushed one. She next made a barren point. Each got a good point on separate birds. Nellie pointed foot scent and was backed. Up at 2:54. Both had moderately good range and speed. There were several points made where birds had been marked down, and which, therefore, were not false. Their work was in a hot part of the day.

JOYFUL—IGHTFIELD ROSALIE.—The latter was merely a working mate, Joyful having the bye. They started at 3. A single bird was seen to flush in high sedge, and Joyful stopped to a point on the flush. At 3:18 the dogs were taken to new ground, which took 22 minutes. Joyful was then run alone. He pointed a bevy in weeds, and got two points on singles in hard cover. His range was but moderately fair. Up at 3:54.

*Second Round.*

The judges consulted during some minutes and selected eight dogs to continue the running. In my opinion, Clementina, for disobedience and self-hunting, could have been left out; Paloma the same for a general inferior showing; Luna for but a moderately good performance.

CYNOSURE—TONY BOY.—They stated at 4:32. Cynosure was lost for a few minutes. She was found steadily pointing a bevy in weeds on a side hill. Tony ran into the bevy and flushed it. Tony, probably on foot scent, pointed, at the same time Cynosure pointed and a single bird was flushed after she moved on. Tony next made a good point on a single bird. Cynosure pointed on a side hill in sedge; nothing found. Both made game. Tony pointed a bevy, and Cynosure coming up close to Tony, pointed or backed. Up at 5:01. Both were good rangers and covered a lot of ground.

This heat ended the day's work.

### THURSDAY.

A heavy fog partially obscured the view during the first two heats, but as the sun mounted higher the fog was burned

away. Birds were not found in plentiful numbers during the day, save in a few places and for short times. The work was not quite up to standard. After the fog was dispersed the weather conditions were fairly favorable for good work. The sky was overcast nearly all the day.

DELHI—LADY MILDRED.—They were started at 9:19. The heat was patchy in the work. Delhi, a pointer of excellent merit, ran in hard luck all the way from start to finish. He showed excellent capabilities in his first heat, and a willingness to do good work in the second, but what with bad luck in coming on his birds under difficult conditions, etc., his point work was nothing. Lady was first to point, she finding a bevy in weeds, Delhi not near to back. Sent on, Delhi, the wind not in his favor, flushed a bevy in pines. On scattered birds in thick grass and briers, Lady roaded up two, one at a time. The flushes were moderately excusable. Lady made an indecisive point on scattered birds. Delhi flushed a bird. Both roaded well along a ditch where birds had run, Delhi showing the greater skill. The running birds flushed here and there out of this ditch with no positive point work on them, though each pointed. Both roaded from the ditch into open weeds where birds had run and flushed. Followed into woods, Lady pointed the scattered birds and Delhi went close by them and failed to point. I could not see whether he scored a flush or not. Up at 9:42. Delhi was the wider ranger. Each covered a great deal of ground, Delhi showing the most judgment.

CLEMENTINA—LUNA.—They were cast off at 10:14. On a bird of a marked bevy, Luna pointed a single and was a bit unsteady to wing. The birds were followed into woods. Luna pointed a single, then flushed it. Clementina made two points on single birds. The heat ended at 10:45. Of the two Clementina did the better work, though the heat was inferior as a whole.

PALOMA—NELLIE FOX.—They started at 10:00 and ran a poor heat. Nellie false pointed repeatedly and Paloma did not do much of anything. Up at 11:15.

The judges soon announced the winners:

First, Cynosure; second, Tony Boy; third, Lady Mildred.

Thus Mr. Norvin T. Harris, who purchased both Cynosure and Tony Boy at Bicknell, showed rare judgment in selecting dogs of merit.

### The All-Age Stake.

Open to all setters and pointers that have never won a first prize in an All-Age Open Stake at the Philadelphia, Southern, United States or Central field trials. First prize, $300; second, $200; third, $100.

This stake was begun next after the Derby was decided. There were twenty-two starters, many of them dogs of field trial reputation and superior merit.

Following is the order of drawing:

Pierre Lorillard, Jr.'s liver and white bitch Antevolo (Count Noble—Trinket II.), C. Tucker, handler. *with* F. R. Hitchcock's black, white and tan dog Tory Sandstone (Count Gladstone IV.—Tory Diamond), John White, handler.

S. Murray Mitchell's orange and white dog Sandy Gladstone (Breeze Gladstone—Delaware), J. Lewis, handler, *with* Blue Ridge Kennels' black, white and tan bitch Allene (Gath's Hope—Ruby's Girl), D. E. Rose, handler.

Charlottesville Field Trial Kennels' liver and white dog Delhi (Rip Rap—Queen II.), C. E. Buckle, handler, *with* W. W. Titus's black, white and tan bitch Minnie T. (Dick Bondhu—Betty B.), J. B. Stoddard, handler.

Stoddard & Kidwell's black and white dog Tick Boy (King of Kent—Bloom), J. B. Stoddard, handler, *with* Pierre Lorillard, Jr.'s orange and white bitch Beryl (Gladstone's Boy—Ruby D.), C. Tucker, handler.

Blue Ridge Kennels' black, white and tan bitch Bessie Shoupe (Gath's Hope—Countess Rush), D. E. Rose, handler, *with* Eldred Kennels' black, white and tan bitch Antonia (Antonio—Miss Nellie Y.), J. B. Stoddard, handler.

D. G. Rowland's black, white and tan bitch Camille II. (Roderigo—Topsy Avent), Horace Smith, handler, *with* T. E. Shreve's black, white and tan bitch Mecca (Paul Gladstone—Latonia), John Lewis, handler.

J. W. Shriever's black, white and tan dog Livingston of Rhæbe (Gath's Mark—Cosette), *with* Blue Ridge Kennels' black, white and tan dog Blue Ridge Mark (Gath's Mark—Ollie S.), D. E. Rose, handler.

E. J. Meyer's black and white bitch Soubrette (Rowdy Rod—Prince Donna), John Lewis, handler, *with* Avent & Thayer's black, white and tan dog Topsy's Rod (Roderigo—Topsy Avent), J. M. Avent, handler.

Pierre Lorillard, Jr.'s black, white and tan bitch Maiden Mine (Vanguard—Georgia Belle), C. Tucker, handler, *with* Charlottesville Field Trial Kennels' liver and white dog Wild Damon (Damon—Flora), C. E. Buckle, handler.

F. R. Hitchcock's black, white and tan bitch Tory Topaz (Count Gladstone—Tory Diamond), John White, handler, *with* Major J. R. Purcell's liver and white bitch Lady Margaret (Dick Swiveler—Countess Bang), owner, handler.

Pierre Lorillard, Jr.'s black, white and tan dog Eugene T. (Count Noble—Ruby's Girl), C. Tucker, handler, *with* J. W. Shriever's orange and white dog Monitor (Gath's Hope—Cleo S.), owner, handler.

*Second Round.*

Antevolo with Wild Damon.
Minnie T. with Bessie Shoupe.
Topsy's Rod with Blue Ridge Mark.
Eugene T. with Antonia.
Lady Margaret with Mecca.

*Third Round.*

Eugene T. with Minnie T.
Maiden Mine with Mecca.

*Final.*

Eugene T. with Topsy's Rod.

First, Topsy's Rod; second, Eugene T.; third, Blue Ridge Mark.

The competition was indecisive, no dog seeming to be able to make clean work, therefore it was a difficult stake to decide, and the opinions of experts varied greatly.

Topsy's Rod made an ordinary showing, taking all his work into consideration, save the one good find.

Eugene T. made an ordinary competition, too, and had the additional fault of working badly to the gun. There were several dogs in the stake which did better point work and worked better to the gun than Eugene, but their work was not uniformly good, nor was Eugene's for that matter.

Blue Ridge Mark, third, worked better to the gun and beat out his ground with better judgment than either of the other winners, and his work was better and more uniform, considering all his competition.

*First Round.*

The start was made after lunch.

ANTEVOLO—SANDSTONE.—At 1:11 they started. Sandstone dropped to a point on a marked bevy. He was steady to shot. On scattered birds, Antevolo pointed a single and Sandstone flushed it. Sandstone next got a good point on another marked bevy, doing this piece of work neatly and quickly. Antevolo got a good point on one of the scattered birds and Sandstone pointed or backed; pointed probably, as his handler flushed a bird close by. Both showed good range and speed, covering all the ground that was necessary, though not with the best of judgment. Up at 1:45.

SANDY GLADSTONE—ALLENE.—The latter lost nearly all chance to win by false and inaccurate pointing. They started at 1:50. Allene made a beautiful point in weeds; nothing found. In open weeds Sandy pointed a bevy and was steady. He got a good point on the scattered birds and afterward he pointed a single well. Allene got a doubtful point on a single. She pointed repeatedly inaccurately. Her style on point was very fine. She ranged wide at the start but gradually shortened her range to ordinary. Sandy's gait was not fast, but he galloped steadily in an all-day manner, beat out his ground well and showed superior ability on birds.

WILD DAMON—MINNIE T.—Delhi was drawn to run with Minnie, but owing to having run in the forenoon in the Derby he was permitted to change places with Wild Damon by consent of all concerned. They started at 2:47. While being led through woods to be cast off, Minnie on chain, pointed a bevy, Wild Damon close by also recognized the scent. Soon after being cast off Minnie found and pointed a bevy nicely. Damon crossing in ahead flushed it. The scattered birds went down a hollow in a difficult place for work. They were followed. Minnie made a good point on some of them. Both were steady to shot and wing. Each secured a point on a single. Next Damon nicely pointed a bevy in weeds. Minnie on a side hill in sedge pointed a bevy and Damon backed well. On scattered birds Damon pointed, then moved on to a flush. Minnie flushed a single. Her range and judgment in beating out the ground were excellent and she worked to the gun prettily. She showed great accuracy and skill in her point work and proved an excellent finder. Wild Damon's work was about ordinary. Up at 3:23.

TICK BOY—BERYL.—Tick had the wider range, covering a great deal more ground, but Beryl was sharp, accurate and wise in her point work, and in this proved superior. Tick made game in heavy weeds, and Beryl coming up, quickly and independently pointed the bevy. They were steady to shot. The birds were followed into woods, where Beryl pegged two good points. Her work was clear and sharp. Working into the open Tick pointed a single nicely and Beryl backed. Both pointed a bevy in woods. Again on scattered birds Beryl pointed where the birds flushed from. Next she dropped to a point on a single in sedge. They started at 3:30 and ran 31m.

BESSIE SHOUPE—ANTONIA.—They started at 4:09. They were cast off in large fields which afforded a fine opportunity for good ranging. Both went wide at good speed, Bessie the wider ranger. She pointed staunchly in weeds and was backed; nothing found. Antonia pointed a bevy in the open and Bessie backed; both steady to shot. The birds were followed. Bessie pointed, and Antonia coming in a moment later, pointed 4ft. from Bessie. Nothing found, but by the edge of woods a single bird was flushed afterward. In sedge Bessie got a doubtful point on a marked bird. The heat was a long one and a great deal of ground was searched with little finding. Up at 5:00, and the work for the day ended.

### FRIDAY.

A dense fog prevailed for an hour or more after the competition began. As the fog lifted, the temperature rose and the sun shone clear. It was uncomfortably warm. A sudden rain storm which lasted nearly an hour interfered with the work of the afternoon. Birds were not plentiful. They were in number hardly up to the needs of the competiion.

CAMILLE II.—MECCA.—They were cast off at 9:02. Camille flushed a bevy. In pines, Camille pointed a bevy and Mecca coming in ahead independently pointed the same bevy. Both dogs were steady to shot. Sent on. Both roaded in open sedge, and Mecca was first to point. Camille coming in pointed the same bevy. Sent on, Mecca pointed a single bird. Up at 9:43. Camille was too fat, but showed good capabilities. Mecca was the sharper in her bird work and maintained the better range.

BLUE RIDGE MARK—LIVINGSTON.—They started at 9:53. Every advantage of range, speed and point work was with Mark. Livingston made one point, nothing found. Both made a point on some remaining birds of a flushed bevy. The birds were followed. Mark flushed one, Livingston pointed a single in the edge of woods. Mark backed. He next made two quick, sharp points on singles in leaves in woods. Livingston was a narrow ranger. Mark ranged wide, beat out his ground with judgment, and his point work was very superior. He ran an excellent heat. Up at 10:22.

TOPSY'S ROD—SOUBRETTE.—They began at 11:05. When cast off Topsy made a quick run to the side of a ditch and pointed. The handlers had a marked bevy in the ditch. Mr. Lewis had sent his bitch away in another direction. Mr. Avent tried to flush but could not. Everybody laughed. In the meantime another bevy had been marked down. Topsy pointed it in weeds and Soubrette flushed it. In a ditch Topsy dropped to a point on a single which she was close to. Next Soubrette pointed a bird well and Topsy backed. Some scattered birds were followed into woods. Soubrette pointed in woods; nothing found. It was said a bevy was flushed there. Topsy pointed on a bevy in corn, then moved on and flushed it. Next he pointed a single. Up at 11:33. Topsy was the wider ranger. His point work was ragged. Soubrette was a moderate ranger.

MAIDEN MINE—DELHI.—They were cast off at 11:57, and ran 18 minutes. They were separated all the time, and the judges concluded to cancel the work done and begin over again. The party then went to lunch, and the heat was resumed at 1:19. Delhi pointed up wind of a bevy in open weeds, and failed to locate it. It was flushed after Delhi moved on. On the scattered birds in dense cover in a bottom, Maiden Mine made three points in quick succession. Delhi was out in the open in the meantime. He, in the open near edge of woods, pointed on two or three birds; next he pointed a single in pines. The dogs were separated. Maiden pointed a bevy in the open, and next got two points on scattered birds. She made two points and nothing could be procured, although a bird had been marked down where one of the points was made. Maiden was quicker and sharper in bird work. Both ranged well, Delhi the better. His point work was not up to his best form.

TOPAZ—LADY MARGARET.—They began at 2:06 and ran 34 minutes. Both roaded about 200yds. and made their points about alike. Topaz pointed the bevy and Lady backed. Topaz made three good points on single birds and Lady made one. Both did good point work and ranged well. The latter part of the heat was in a high wind and a flurry of leaves, a severe wind and rain storm having quickly come up.

The party sought shelter from the storm in the houses close by.

EUGENE T.—MONITOR.—They started at 3:30 and ran 34m. The heat was very one-sided, Eugene having the best of it in every particular. He was difficult to handle at times. He dropped to a point on a bevy in corn and the birds flushed wild. Next he was lost for a while. He made two or three good points on singles in woods. His range was wide.

This heat ended the day's work.

### SATURDAY.

The weather was much like that of the preceding days—foggy in the morning and a hot sun during the remainder of the day.

The work was inferior as a whole. There was no really finished, high-class work, and there were several so near alike in the competition that it was extremely difficult to forecast the winners.

ANTEVOLO—WILD DAMON.—They started at 8:45. Damon made two flushes on bevies. Antevolo dropped to a point on a bird in heavy cover. She was the better ranger. Down 26m.

TOPAZ—MAIDEN MINE.—They ran a rather indifferent heat so far as pointing and finding are concerned, although they covered a great deal of ground. Maiden roaded quite a distance to a point on a bevy in woods. She was steady to shot. At the same time Topaz in weeds. Nothing found. In woods, Maiden got a good point and was backed. Topaz flushed a single, and each made a point to which nothing was found. Topaz found and pointed a bevy in pine woods. It was a good piece of work. The dogs were separated some minutes. Maiden pointed scattered birds. Topaz pointed a bevy in weeds. Both were found on a point in briers; both were steady to wing. Topaz pointed in open weeds and two birds were flushed a short distance behind. Down at 9:28. Up at 10:43. They showed some tendency to potter betimes. Topaz made a good showing as a finding dog.

MINNIE T.—BESSIE SHOUPE.—They started at 10:58. Bessie pointed a bevy in sedge on top of a high hill. The dogs, which in the meantime were separated, were brought together. Minnie pointed two single birds and made one point on scattered birds. Next, Bessie made two good points on singles. Minnie had the advantage in range and judgment in beating out the ground.

The running was suspended while the party lunched.

BLUE RIDGE MARK—TOPSY'S ROD.—They were cast off at 12:14 and ran thirty minutes. Mark made a good point on a bevy and held it till his handler went up to him. He was steady to shot. A bevy flushed by a horseman was marked down by the edge of a cornfield. Both dogs were worked toward it. Both pointed the scattered birds. Next, both took a long cast in the open field. Topsy caught a scent, drew 30 or 40yds. to edge of woods and pointed. The bevy was about 40yds. further on in cane in woods. Both dogs roaded to it and pointed. The credit of the find was Topsy's but it was the only work which really gave him a claim to a place in the stake, as his previous work had been inferior. Up at 12:44.

EUGENE T.—ANTONIA.—They started at 12:57. They ran twenty-three minutes. Eugene flushed two or three birds of a bevy, then pointed the remaining birds. Antonia false pointed in weeds. Eugene flushed a bevy down wind. Eugene made the beteer showing, though it was poor.

LADY MARGARET—MECCA.—They began at 1:29. The work was done at the start in very thick cover, so it was impossible to determine it accurately. Lady pointed a single, which was killed. Lady steady to shot. Mecca pointed a bevy. Next Lady pointed a single. Next Lady pointed a single and was backed. Both next pointed on scattered birds, which flushed wild. Up at 1:56.

*Third Round.*

Four were kept in.

EUGENE T.—MINNIE T.—They started at 2:13. Eugene pointed a single on a side hill. Eugene pointed footscent where a bevy was flushed. Minnie backed. Down 15m.

MAIDEN MINE—MECCA.—They started at 2:53. Maiden pointed near a bevy which she had not accurately located. As the judge rode up, he flushed it. Some of the birds lit 100yds. away, near Mecca. The latter flushed and chased. Maiden pointed footscent. Mecca, 40yds. ahead, pointed the bird. Maiden was a bit unsteady to shot. Maiden pointed. Nothing found. Up at 3:00.

*Final.*

EUGENE T.—TOPSY'S ROD.—They started at 3:14. They ran 12m. Topsy pointed a bevy in heavy weeds. Eugene took a long, straight cast, leaving good ground unworked, refused to obey the whistle and went on quite a distance. It was said he was found pointing a bevy. He worked badly to the gun, and his last cast was near being, if not quite, a bolt.

The judges then announced the winners: First, Topsy's Rod; second, Eugene T.; third, Blue Ridge Mark.

### Manitoba Field Trial Club.

*Editor Forest and Stream:*

At a special meeting of the Manitoba Field Trial Club held in the Manitoba Hotel, Winnipeg, on Thursday evening, Nov. 17, it was decided on motion to hold the next trials at Morris, Man., on Tuesday, Sept. 10, 1895, and to offer for competition $500 in prizes, divided as follows: Derby Stake, purse $250, four prizes, first $100, second $75, third $50, fourth $25; entries close July 1, 1895. All-Aged Stake, purse $250, first prize $125, second $75, third $50; entries close Aug. 15, 15, 1895.

An Amateur Stake will also be run off, entries for which will close same date as All-Aged.

The secretary-treasurer was also instructed to have the usual advertisements placed in FOREST AND STREAM and *American Field.*

The prospects of the club for next year are very promising. The new officials are all more or less interested in canine matters, and doubtless will render great assistance toward making the trials of next season the best ever held in Canada.

R. J. GALLAGHER.

## POINTS AND FLUSHES.

[*By a Staff Correspondent.*]

Mr. F. L. Harris, Passenger Agent of the Mobile and Ohio Railroad, visited Bicknell the week of field trials. Trials B of the U. S. F. T. C. will be held at West Point, Miss., on the line of the M. & O. R. R. Mr. Harris assured the sportsmen that M. & O. management felt kindly toward the club and the sportsmen, and would make some special concessions in respect to carrying dogs and a reduced fare. One rate for a round trip was under consideration.

Mr. J. B. Scott Jr., traveling Passenger Agent of the Baltimore and Ohio Southwestern Railway was also in attendance, and he seemed to think that his road too would be considerate with sportsmen who desired to attend the field trials at West Point. Those who contemplate attending the trials might wisely keep this information in mind.

B. WATERS.

NEWTON, N. C., Nov. 17.

*The* FOREST AND STREAM *is put to press each week on Tuesday. Correspondence intended for publication should reach us at the latest by Monday, and as much earlier as practicable.*

# DOG CHAT.

A number of letters and other matter are left over till next week.

The friends of Mrs. Smythe and those who know of her as the proprietor of the Swiss Mountain Kennels, of Germantown, Pa., will be shocked to hear of the sad accident which has befallen her. On Tuesday afternoon, Nov. 20, Mrs. Smythe was out driving, accompanied by Mr. and Mrs. John Meacham, of Brooklyn, the parents-in-law of Mrs. Meacham, so well known in spaniel circles. In crossing the railway below her house a train ran into them, instantly killing Mr. Meacham, and Mrs. Meacham received such injuries that she died a few hours after. The flagman, who had run to stop the horses, was also instantly killed. Mrs. Smythe was fortunately thrown on the cowcatcher, but was carried several hundred feet before the train could be stopped. It was found that one arm was broken and her hips smashed. The horses were crushed to a jelly and the carriage smashed to atoms. Mrs. Smythe now lies in the hospital, and unless she has sustained internal injuries it is expected that she will recover.

Dr. Stahl has brought from Europe three fine bloodhound bitches and one bloodhound dog. These are for Dr. Lougest and are prize winners at the English shows. Dr. Lougest has received through Spratts Patent the mastiff bitches we mentioned his having purchased.

Mr. Pierre Lorillard has bought the pointer Wild Damon of the Charlottesville Field Trial Kennels for the sum of $250.

Mr. W. H. Bean of Passaic N. J., writes us as follows:

"On Nov. 6, my white English setter dog strayed from home at Passaic N. J. and has not yet returned. A despicable neighbor had scattered poisoned meat in the vicinity of his house and several valuable dogs had been poisoned. To prevent my dog from getting any of it I put on him a wire muzzle; this with perhaps some poison which he may have eaten caused him to lose his sense of location and although seen some days afterwards as I now learn, (although every effort was made to trace him at the time) he has not been seen since Nov. 10. He was registered in the A. K. C. S. B. No. 27327. He is a white English setter dog named Davy Crockett, orange ears and ticks on nose and forelegs, dry nose, black eyes, three and one half years old, not broken on game and quite thin. He was a household pet and highly thought of. I bought him from L. A. Goodwin Jr., Newburyport Mass., through an advertisement in your paper, 3 years ago. If any of your readers get trace of him I shall be obliged if notified and will pay suitable reward for trouble."

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will also receive careful attention.*

W. H. W., Chicago Lawn, Ill.—Bess III. (A.K.R. 6,983), black and tan bitch, whelped July, 1885. Breeder, Mr. David Simpson, 96 Greenwich avenue, New York. Owner, Dr. J. E. M. Yardly, 230 West Thirty-eighth street, New York. By Dan out of Nellie. Dan out of an imported bitch owned by Robert Bonner.

### "Forest and Stream" Fan Pedigree Blank.

FOR some time past breeders of dogs have demanded a pedigree form that would afford spaces for a more extended pedigree than those hitherto published. The difficulty has been in arranging a form that, while admitting the required extension, would be compact and not too large for mailing. This difficulty has been solved in the "FOREST AND STREAM Fan Pedigree Blank" which is so arranged that a dog's pedigree can be recorded for eight generations, and the spaces radiating from a center, the reader is enabled to trace at a glance the different strains which lead from sire and dam. Spaces are also provided for recording the name of dog, its breed, color, sex, breeder and address, dates of birth and purchase, from whom purchased, E. K. C. and A. K. C. Stud Book numbers and certification. These blanks are for sale at $2 per hundred, 30 cents per dozen, by the Forest and Stream Pub. Co., 318 Broadway, New York.

# Hunting and Coursing.

### National Fox Hunters' Association Meetings.

A MEETING of this association was held in the hotel on Monday evening, Vice-President Roger Williams presiding in the absence of Admiral Jouett. Mr. Williams stated that the object of the meeting was to ratify and revise the rules drawn up by the appointed committee. The rules were read by Mr. Hagans and were discussed separately. Rules I., II. and III. were left unchanged. Rule IV. the word "exhibitor" was changed to "subscriber." Rule V. changedto read "a castrated dog or spayed bitch." Rule VI. unchanged. Rule VII.—"In connection with dogs, dog shows or dog trials" was altered to "in connection with foxhound trials." Rules VIII. to XXII. unchanged. Rule XXIII. the words "or kept" were stricken out and the words "ground hunted" were altered to "meet." Rule XXIV. unchanged. Rule XXV. was altered in some important respects. "Divided into packs containing not over eight each" was revised to read "divided according to the committee's discretion." Also the following sentence was stricken out:

"Judges have the privilege at any time dnring the trials to order any hounds (except those that have been barred) 'in' again, but if said hounds have not been hunted so often and as long as those with which they are to compete, they shall run a 'bye' sufficient in the minds of the judges to equalize their work with their competitors" and instead the following inserted: "The judges in their discretion may permit any hound which has not had a fair trial in which it was drawn and started in the first series, to run again in the next succeeding division. But only such hounds as have qualified themselves by actual work in the field shall be admitted to a subsequent series." The last sentence but one of this rule was amended to read: "find, cry, trail and catch." The addition of the following rule was ordered: "Rule xxvi.—At the conclusion of the running of any series or round the judges shall inform the master, who shall publically announce the same, which hounds they desire to run in the next series."

The meeting then adjourned.

#### Thursday's Meeting.

This meeting was called to order by Dr. Wash Miller at 4:30 in the hotel. The secretary having returned home Mr. B. Hayman was elected temporary secretary and filled the position most creditably. Dr. Miller addressed the meeting on the question of continuing or abandoning the trials and called for the sense of the meeting on this point. Mr. Hagans expressed his disappointment at the grounds and scarcity of foxes, stating that the grounds were entirely unfit for the purposes of a trial. He said further that the preliminary arrangements had not been carried out in a proper manner. The committee was in the dark as to who would attend and the number of hounds that would be entered, and the committee had been deceived as to the nature of the grounds. But they were not discouraged, for he believed that foxhound field trials can be made successful, and cited the Brunswick Fur Club as an instance. He would, however, guarantee that suitable grounds with plenty of foxes could be found for trials either in the spring or any other time, and did not believe the abandonment of this meet, which he believed to be the best course, would give the association a black eye.

Mr. Kinney spoke on the results achieved in the way of making friendships and getting acquainted with other foxhunters, and the laying of a good foundation for the future of the association. The initial trials of the B. F. C. turned out much the same way and had to be given up for want of foxes. He then traced the course of the B. F. C.'s annual improvement until the present year. When going foxhunting, he remarked, one cannot expect everything as one would wish, and urged the members to be satisfied with the results of the meeting in spite of non success of trials. He concurred in the motion to abandon the trials and fully believed in the association's future success.

Mr. W. S. Walker indorsed what had been said, and remarked that another year the committee would take more time in their arrangements and not do things in such a hurry. Mr. Ware did not regard the meet as a failure by any means, for socially it had been a grand success. The chair called upon Mr. Kinney for some information as to the workings of the B. F. C., which was given. It was then formally voted that the meet be declared off for cause.

Mr. Ware moved that an executive committee of eleven be appointed to investigate grounds and make all arrangements for the next field trials, and Messrs. W. S. Walker, W. N. Ramsey, C. M. Corbin, A. B. F. Kinney, Walter Rice, A. Ware, Roger Williams and F. J. Hagans were appointed. Mr. Hayman proposed the holding of trials before spring, and the question was generally discussed, but nothing definite resulted.

A committee of three was appointed to draw up the constitution and by-laws and report the same for ratification at the next annual meeting. Messrs. R. Williams, W. S. Walker and W. W. Huffstetter were appointed. The meeting then adjourned until Friday morning at 9 A. M.

#### Friday's Meeting.

The adjourned meeting was called to order at the appointed time and again adjourned until evening. At 7:30 the meeting was called to order in the rooms of the Strodes Valley Hunt Club by Vice-President Dr. W. Miller; Mr. B. Hayman again acting as secretary, and fourteen members were present, beside others interested in the proceedings.

The question of electing officers for the ensuing year was brought up and discussed. Mr. W. N. Ramsey moved that the present officers be re-elected; seconded by Capt. Hathaway and carried. The vote was a very light one and the chair said it would have been better if members had discussed the matter fully

Mr. A. B. F. Kinney spoke on the advisability of a change and the advantage of electing as officers members who took an active interest in the Association's affairs, and moved that Mr. Ramsey's motion be reconsidered. Seconded by Mr. W. S. Walker, who spoke on the propriety of electing officers at this meeting. The motion to reconsider was carried unanimously. It was then voted that the Chair appoint members to act with Dr. Miller as a committee to draw up a slate of officers. They reported as follows: "It is our opinion that it would be well to re-elect all officers at present in office, and to add to the board of directors the following gentlemen: Mr. A. Ware of Washington Court House, O., A. B. F. Kinney of Worcester, Mass., and A. W. Hamilton of Mount Sterling, Ky. The report was adopted.

Mr. W. S. Walker called attention to the action of one of its members, namely Judge Perry, who had got up an independent hunt on Wednesday night and run over the grounds which it was intended the Association should use the next morning. After a few words from Mr. Winn, it was moved by Captain Hathaway, seconded by Mr. Huffstetter, that the Chair appoint a committee of three to investigate the charges made against Mr. Perry and report on same at the next annual meeting. Before the motion was put, Mr. Hayman entered a strong protest against waiting a year for a report, urging that immediate action be taken.

After a few words from Mr. Huffstetter and Mr. Kinney the motion was withdrawn and it was voted that the Chair appoint a committee of three to investigate the charges against Mr. Perry at once and report to this meeting for action to be taken thereon. The Chair appointed Messrs. W. Huffstetter, E. H. Walker and A. M. Bedford. Several gentlemen were called to give testimony before the committee and at the end of half an hour the committee returned with the following:

"We the committee appointed to investigate the charges preferred against Judge J. W. Perry would respectfully report to the Association that after hearing all the evidence offered we find that Judge Perry has been guilty of misconduct in getting up an independent hunt, and hunting over the grounds selected for the field trials of this association all of the night before the field trial and after it had been announced that said field trial would be held on said grounds on the following day. The committee therefore recommend that he be severely censured for his action in so doing."

The report was adopted unanimously, and the secretary was instructed to incorporate the report in the minutes of the meeting and to forward a copy to Mr. Perry.

A vote of thanks was tendered to the judges for their services during the week.

A vote of thanks to the president, Admiral Jouett, was given for his generous donation of $25 (to be added to first money in the Champion Stakes), and the secretary was instructed to return the president his donation, in view of the fact that the running was not brought to a conclusion.

A vote of thanks to the ladies was carried amid applause.

Moved by Mr, Hayman; seconded by Mr. E. H. Walker, that the secretary-treasurer be instructed to make, at his earliest convenience, two reports—one for each office—to the president.

Mr. Ware asked, as a member of the executive committee, for instruction as to when the Association would like to have the committee's report concerning next meeting, and the committee was instructed to render its report by August 1, 1895.

Capt. Hathaway then spoke of the pleasure it had affordet the Kentuckians to see so many visitors attending the trials, and Mr. Kinney responded in appropriate terms. A vote of thanks to the sporting press was responded to by the representatives of FOREST AND STREAM and *American Field*.

A vote of thanks was then tendered to the owners of land over which the hunting had taken place, and Judge Ewing responded. Capt. Hathaway proposed the health of the nonsporting press to which Messrs. Fox and Klepper responded cleverly. The Strodes Valley Hunt Club were thanked for their courtesies during the meet and Mr. Winn responded gracefully.

The meeting then took on a social phase and the aspect of a good time generally, with lots of back patting, good speeches, and with a jolly good whoop-la—gone away! finish, the first trials of the Association were brought to a close.

### "Danvis Folks."

*Editor Forest and Stream:*

A perusal of "Danvis Folks" in book form (I had read the most of it as published serially in your valuable paper) confirms me in the belief that as a delineator of plain, every day New England life of twenty-five years ago Mr. Robinson stands unequalled. Long may he live and largely write.

J. CHEEVER GOODWIN.

### National Fox Hunters' Association Meet.

"The dusky night rides down the sky
And ushers in the morn.
The hounds all join in glorious cry,
The huntsman winds his horn.
And a-hunting we will go."

"Ye jovial hunters in the morn
Prepare then for the chase;
Rise at the sounding of the horn
And health with sport embrace
When a-hunting we do go."

IT was just this spirit that attracted the visitors to Olympian Springs, Kentucky, last week on the occasion of the inaugural meet of the National Fox Hunters' Association. But "the best laid plans o' men and mice aft gang aglee," and the poet must have had a prophetic vision of this meet, for alas! its application here is very appropriate.

In fox hunting man may propose, but sly reynard holds the situation, or as John Chinaman would put it, "no foxee, no huntee." The weather clerk also contributed to our undoing aud the trials had to be declared off before any stake was decided. We have become so accustomed to expect a successful issue in all our field trials, whether they be on quail, hares or foxes, that it was never expected for a moment but that such a trial as was proposed could be properly carried out here. But affairs like these require system and organization and these two material qualities were not forthcoming. There seemed to be a happy-go-lucky air throughout the meet—as if we had all assembled in this out of the way nook of the world for a good time rather than to systematically test the merits of the hounds in the different packs.

We do not know who chose the country over which we were expected to hunt, but the choice must have been made from hearsay rather than personal observation, as a glance at the wooded hills and dales which surround the hotel would have convinced any one, with a knowledge of field trial requirements, of its entire unfitness. A judge cannot very well honestly say that such and such a hound is superior to others in a pack unless he has an opportunity to see the hounds work. And it was totally impossible to do so here.

Of course the social side of the gathering was a gratifying success, it could not be otherwise in "Old Kentuck;" but the serious—the business—part of the programme was a failure, dire and complete, and the reasons for this untoward outcome may be briefly explained. The Kentuckians seemed to view the affair from a pleasurable standpoint, and so long as they were mounted and the hounds were in cover they cared not for field trial regulations or the rules the members of the club had been at such pains to formulate. Helter skelter, crash and a *sauve qui peut* seemed to be the order of the day not only with those behind the hounds, but with each little company of horsemen that rallied to the music of the hounds from every point of the compass. It would have required a detachment of cavalry to keep that crowd of enthusiastic hunters within bounds, and the few who grappled with the situation were simply routed horse, foot and dragoons. I don't mean to say that any one was unruly or disorderly, that could not be with such true sportsmen; it was simply the "get thar" feeling bred in the fox hunting Kentuckian, that could not be restrained within the narrow limits of a field trial.

The meet, however, must not be counted an entire failure if it has taught the management a lesson in organization. We realize the fact that the officials were almost, if not quite, unfamiliar with the management of a field trial, and therefore, any suggestions which we offer here for future guidance are tendered in the kindliest spirit.

In the first place the secretary should have arranged a bulletin board in a conspicuous place in the hotel, and on this all the club announcements should have been posted. The names of the hounds required in the day's hunt should be written on this board, and below these the time of starting and directions as to where the hounds would be cast off or meet. When it was found that the ground was so dry and the conditions so entirely unfavorable for hunting except in the very early morning hours, the meets should have been announced for 4:30 A. M. This early hour would have allowed for the little unavoidable delays incident to starting such a large meet, and the scarcity of horses, and still have given us plenty of time to reach the hunting grounds by daylight. The hounds could then have been put in and doubtless a start made before the main crowd of local hunters had assembled. As it was, no one seemed to know exactly when we were to start, and consequently precious time was lost, and the sun was up before we were well under way. As most of the finding was in woodland, deeply carpeted with dry leaves, it was simply impossible after the sun had dried up the little dampness left by the hoar frost, for hounds to pick up a trail, or, if they did, to carry it along at any speed, and the higher the sun rose the worse became the conditions, until finally even the keenest hunters' patience melted away and the hounds were called off. This was the case the very first morning of the trials, and the experience thus learned should have prompted the arrangements outlined above.

Again the field trial committee or stewards should have been selected from hunters present who had no hounds entered in the stakes and these gentlemen should have been invested with authority to restrain the crowd and allow none but, as the rules distinctly state, the judges, handlers and members of the press to follow the hounds at all closely. These stewards should be identified by suitable badges A man who is interested in a hound that is in a heat and consequently doing his best to help his hound along cannot be supposed to pay much attention to his duties as a field steward. We should remember this was a field trial, not a pleasure meet entirely.

The question of judges is another important point. Instead of leaving this to a hasty choice when the hunt is assembled the judges should be decided upon and announced in the press before the time set for the trials, and only such men selected who conld be depended upon to act throughout the running of the stakes. An experienced guide, one who is well up in the sport and with a thorough knowledge of the topography of the country and the wiles of the local reynards is a *sine qua non*, and a mistake was made in not having such an one here. The huntsman intead of being the field marshal as was the case at this meeting, should be an experienced hunter and have charge of the handlers and hounds under the direction of the judges. Of course we understand that these hounds would not hark to a strange voice still there are many duties and necessary ones which such an official could have performed, as the hounds being strange to one another naturally hunted very independently and were continually scattered.

With these few remarks we may pass on to the main story of the trials.

This was a Kentucky meet *per se* and therefore as Kentuckians, men and women, are renowned the world over for their devotion to sport in general and fox hunting in particular it goes without saying that there was fun galore for everyone who participated.

The forming of new friendships, a process through which one glides so easily among these jolly people, impromptu races and scurries across the bits of open country we came to now and then; the genial air of good fellowship and the entire

absence of formality and the goodnatured chaff and banter all tended to make one forget such a state as city life, with its hardness and meanness, and content to enjoy to the full this elysium of sport.

In the hunts up North and in most hunts in England, the men hunt to ride, here they ride to hunt. The music of the hounds is the magnet that draws them from their cosy beds while the stars and moon are still bright to follow the tortuous windings of the woodland paths in the gray dawn or leave their warm fireside to spend the best part of the night in the gloomy woodland pathways listening to the ebb and flow of the hound chorus. And what patience these men have—and women too, for woman's rights in the hunting field are conceded the world over but nowhere more so than in Kentucky. There is no style here, the pink and the tops and white cords and the 1,000-dollar hunters are unknown, but probably there is a more genuine love of sport hidden under their rough exteriors than could be found under the pink coat of the average post and rail fencer in the swell hunts.

The horses of the men who followed the hounds at Olympia were simply saddled with the ambition of their owners to "get thar;" the foppery of the chase was entirely absent. Their hunting horns, hanging to their shoulders by a strip of rawhide, once ornamented the crest of some departed cow or bullock, but their tone is sweeter far than the blare of the metal ones in vogue where style reigns supreme, and the mellow, rythmical winding of a Walker's horn beats Strauss or Chopin all to boots.

I might as well explain here that the jumping which constitutes the charm of hunting for most men is a very secondary consideration here. There is doubtless just as much of the daredevil spirit which prompts men to take a five-barred gate, and it finds its outcome in sending their horses at such ugly-looking places as no one in his sane moments would think of climbing up or sliding down. Their fences are, as a rule, simply "unjumpable," for a Virginia rail fence with eight or nine bars up would stop even a Filemaker. Here they pull them down to three rails and the horses crawl over or jump just as they like, and as many of the mounts are the family buggy horses it is generally a crawl. There is one phase of the fox hunting here that disappoints and irritates one who is imbued with the style of hunting in England or with some of our packs in the North, and this is that no sooner do you imagine that, with a few others who have pushed ahead, you are well away from the ruck, and have the hounds to yourselves, than in turning some corner you find twenty or thirty others standing at ease, quietly enjoying the sport, seemingly without having made much effort. He who has enjoyed the feeling of being alone with the hounds will appreciate what I mean.

Another interesting phase of hunting down here is the prominent part the mule plays in the day's sport. Some of them are good jumpers when put to it, but have little judgment of distance and must be difficult to ride. Probably in no other country outside the Shires of England could one find such a crowd of horsemen.

Of course this was a special, advertised hunt, but a field of nearly 200 horsemen in all their various equipments was a sight at once unique and interesting. A number of ladies participated in the fun, but to such straight riders as Miss Carrie Lee Hathaway, Miss Mayme Robinson and Miss Lady Prewitt must be accorded the palm, in lieu of a brush. They were among the first to arrive and the last to leave. After hunting in the early morning hours they were as ready and eager to participate in the night hunting as their fathers or brothers. No wonder Kentuckians are such fox hunters when it's bred in their mothers like that. And the negroe's love of the sport is aptly illustrated in his answer to Judge Perry, who had asked a nigger, as dark as the ace of spades, to get him some possums. The tone of contempt in which he answered, "Ma dawgs are fox dawgs. I ain't got none o' dem possum dawgs," was very amusing.

On Wednesday night there was a gay house party, a number of ladies having attended the hunt from neighboring towns, under the chaperonage of Mrs. Thomson, and the energy with which they all engaged in a good old game of blind man's buff was surprising considering they had been seven or eight hours in the saddle during the day. Another night there was a candy pulling, and so it went throughout the week, resulting in a novel sensation for those whose experience of field trials generally prompts them to wish the monotony over as quickly as possible.

Among the sportsmen present were men whose names are household words throughout the State. General W. H. Gentry, for instance, a happy example of a gallant Kentuckian, was the life of the party, and therefore a sportsman in every sense; Col. Hamilton is another, accomplished and refined to a degree, his family is noted throughout the State as eager foxhunters. Then there was Dr. Wash. Miller, whose kindly care that visitors should feel welcome was much appreciated; and Roger Williams, who is always to the front in any sport, but the list might be extended indefinitely. It would be impossible to give the names of all who took part in the hunt, but we give those who stayed at the hotel and cottages:

A. Ware, Washington Court House, O.; Howard Tracy, F. J. Hagans, Harry L. Means, Louisville, Ky.; the Strodes Valley Hunt Club, of Winchester, Ky., consisting of members J. B. and W. N. Ramsey, Dr. Wash. Miller, Capt. Leeland Hathaway, Jas. F. Winn, J. P. Pendleton and J. M. Hodgkin; E. S. Jouett, Jr., Winchester; Roger Williams, Desha Breckinride, B. S. Coyle, Dr. W. B. McClure, Judge J. W. Perry and Dr. Silas Evans, Lexington, Ky.; B. Hayman, Chicago; A. B. Kinney, Worcester, Mass.; John Fox, Jr. and Max Klepper, representing *Century;* R. S. Albin and Chas. Martin, Millersburg, Ky.; A. M. Bedford, J. A. Gibson, W. B. Calk, W. B. McKinney, Robt. Fletcher, C. G. Panfan, J. W. Shront, John Botts, Dicky Meeden, J. Will How, J. S. Wyatt, R. J. Gettles, A. T. Thompson, T. W. Anderson, J. G. Johnson, all of Mt. Sterling, Ky.; A. Kulmer, Salt River, Ky.; D. E. and J. C. Peters, North Baltimore, O.; L. T. Anderson, Cincinnati, O.; W. S. Walker, Point Leavitt, Ky.; E. H. Walker, A. K. Walker and R. W. Walker, of Hammock, Ky.; J. H. Emby, Silver Creek, Ky.; T. L. Philips, A. Granville Smith, L. T. Bush, R. D. Baldwin, J. H. Oden, Col. H. P. Thomson, Nelson V. Prewitt, M.D., P. B. Winn and Carr Calman, of Winchester, Ky.; David Prewitt, Pine Grove, Ky.; Dr. W. F. Sturgill, Creedo, W. Va.; J. H. Kinnerley, Kennana, Ky.; J. D. Donner, Willis Crabb, Sam Moss, Owingsville, Ky.; James McCue and son, Sharpsburg, Ky.; H. C. Trigg, Glasgow, Ky.; J. F. Spencer, Pine Grove, Ky.; Gen. W. H. Gentry, Gentry Place, Ky.; J. H. Williams, H. Clay Williams and Victor K. Williams, Frenchburg, Ky.; Ernes Gillespie and W. H. Bridges, Judy, Ky.; N. F. Pierce, Spencer, Ky.; Geo. Rayburn, Canuaigo, Ky.; J. J. Mark, Coventry, Ky.; W. J. Lampton, Washington, D. C.; Jas. H. Cunningham, Austerlitz, Ky.

The ladies who were in attendance were Mrs. Emma Walker Herr, one of Kentucky's foremost literary women; Mrs. Silas Evans, of Lexington, Ky.; Mrs. H. P. Thomson, Thomson, Ky.; Miss Speck, St. Louis; Miss Cabell, Washington, D. C.; Miss Gay, Winchester, Ky.; Miss Estill, Jasper, Ky.; Miss Tillie Cox and Miss Bessie Faulkner, Versailles, Ky.

Such a list as this shows the widespread interest that was taken by sportsmen generally in the meet.

With the exception of the incidont in which Judge Perry was identified, and which is spoken of elsewhere, the best of feeling prevailed, although naturally there was some disappointment felt when it became necessary to declare the trials off.

The Derby was drawn on Monday night, Nov. 19, and the entries were as follows:

F. J. Hagans' black, tan and white bitch White Toes (Judge—Nellie), September, 1893, breeder, Howard Tracy.

F. J. Hagans' black, tan and white bitch White Nose (Wake—Lize), August, 1893, breeder, W. S. Walker.

Strodes Valley Hunt Club's black and tan bitch Genessee (Bonny—Betsy), June 1, 1893, breeder, L. Parker.

A. Ware's blue and ticked dog Guy (Old Hen—Maud), June 13, 1893, breeder, Ed. Templeton.

W. S. Walker's black, white and tan dog Big Strive (Imported Strive—Sal), June 1, 1893, breeder, owner.

W. S. Walker's black, white and tan bitch Fannie (Wake—Mollie), June, 1893, breeder, owner.

The secretary having for some unaccountable reason returned home with the books before the meeting closed, we are indebted to Mr. Hagans for the particulars, breeding, births, etc.

## TUESDAY.

The thermometer had dropped with a rush during the night, and though it felt like home for the Northerners the denizens of the sunny South looked blue. The ground was as hard as nails and those who have run beagles in such weather knew just what to expect, for the sun was peeping over the mountain tops long before we started. There was a long delay at the start; horses were scarce, for some had broken loose in the night and returned home, and saddles were at a premium. Here is where a little more mangerial executive ability would have been valuable and pertinent. The judges had not arrived, and this led to another wait until it was after 9 o'clock when the cavalcade moved toward the woods near the hotel. The judges were Col. Hamilton, Bart Coyle, W. W. Huffstetter; huntsman, L. T. Anderson, chairmen of field committee, F. J. Hagans. The hounds were cast off and we followed through the brush, over rapidly rising ground until in certain parts the side of a house would illustrate its steepness, and horses had to hang on by their teeth. Finally we reached the summit of Knob Hill, one of the loftiest points among the surrounding hills. The view was simply entrancing, wooded hills ranging one behind the other, dotted here and there by a little clearing that marked the humble home of some squatter; a village or two could be seen in the hazy distance nestled peacefully in its russet envelope.

We were so high up that it seemed as if we could see most of the U. S., in fact Roger Williams said we could see Gibraltar and the Eiffel Tower on a clear day, but then he may have been only joking. The hounds were feathering in the gullies below but there was no scent, and but for an occasional whimper from an over-exuberant youngster it would have been difficult to tell where they were. We worked on across a chain of ridges, indulging our horses in a series of scrambles and slides. This continued until we met some niggers in the bottoms who could give us no closer information as to the whereabouts of reynard than that one had been run by their hounds the night before. We then worked to the east and did some roading for a mile or two and rallied at a large tobacco barn. Here we sunned ourselves for an hour or so while the hounds were tonguing now and then in the woods above, but finally the horns sounded and they straggled in by ones and twos. A consultation was held by the judges and committee and they wisely concluded to return to the hotel and try again toward sundown. A canter home and dinner followed. Afterward we looked over the hounds and found a rather "scratch" pack. The Walker hounds, most of them, were running to the English type, and so were some of the Strodes Valley's, whose recent importations from the Holderness Hunt, in Yorkshire, are beginning to make their mark. The others were more or less of the native type, snipy and leggy, the best of them being a couple of smart ones belonging to Mr. Hagans and others of Mr. Ware's. Mr. Kinney had his Ned and the celebrated Logan, and the latter naturally attracted much attention.

To make a short story shorter, we started again about 5 P. M., and putting in near the hotel the hounds struck at once, and there was some lively trailing in the rough woodland, and Strive and one of Hagan's hounds did some smart hunting. It soon became too dark to follow the hounds, and we waited in the bridle paths listening to the music. The hounds could be heard driving down below us in the burnt woods and

> "Fond echo seemed to like the sport
> And joined the jovial cry,
> The woods, the hill, the sound retort,
> And music filled the sky."

Finally the hounds drove the fox into the cliffs, as Messrs. Hagans and Walker ascertained. The retreat was sounded and we turned our horses' heads toward home. It was not long before the amateurs were between the sheets and dreaming of the big fences they would take in the morning.

There was no decision given in the Derby.

## WEDNESDAY.

There was not much frost during the night and conditions seemed more favorable for trailing. Another large crowd was out again, there being anywhere from 130 to 150 horsemen. Starting about 6:30 A.M. from the hotel, we roaded 3½ miles and then cast off at edge of woods.

The following hounds had been drawn in the first heat of the Champion Stake, which had closed with 36 entries divided into 3 heats:

F. J. Hagans' black, white and tan dog Banjo (Sport—Rose), September, 1892, breeder, Lee Barbour.

A. Ware's black, white and tan bitch Maud (Jumbo—Old Fly), Nov. 2, 1890, breeder, W. Robinson.

A. B. F. Kinney's black and tan dog Ned (breeder and breeding unknown), 1891.

W. W. Huffstetter's white and tan dog Turk (Scully—Bessie), May, 1890, breeder, owner.

A. M. Bedford's black dog Nig (Ralf—Cloudy), June, 1891, breeder, owner.

Bourbon Kennels' white, black and tan bitch Lulu (Bolivar—Fancy), April, 1887, breeder, F. C. Riddel.

Strodes Valley Hunt Club's white and black bitch May (Calvin—Dinah), April, 1892, breeder, Geo. Brown.

Iroquis Hunt Club's black, white and tan bitch Rallie (Joe Cotton, Jr.—Solist), February, 1893, breeder, Harry L. Means.

W. S. Walker's blue bitch Kate (Little Bourbon——), 1891, breeder, W. S. Piersall.

E. H. Walker's white and black dog Rock (Trav—Bessie), 1891, breeder, R. L. Walker.

C. M. Corvin's blue ticked dog Bird (breeding unknown), 1891.

The judges to-day were Messrs. H. C. Trigg, Alexander Scobee and Col. A. W. Hamilton.

Mr. Walker's Rock and Mr. Hagans's Banjo cried a trail, and the other handlers, urging their hounds to them, excited the eager dogs, and the whole crowd dashed through the woods and pushed the forward hounds on what proved to be a false scent or back track. Banjo and Rock again hit off right and the balance packed to them, add for a mile or two there was pretty stiff going. The huntsman, Mr. Anderson, took a header in the scramble, and losing his horse in the woods, gamely footed it to the nearest farmhouse, and procuring a better mount continued in the chase. Then Willis Goodman plunged into a quaking quagmire, from which it took the united exertions of the company to extricate him. Boughs and limbs of trees were thrown on the mud, a corduroy was made over the quaking stuff, and he was enabled to escape. The hounds had thus got well away, but we caught up with them in another mile or so. It was great fun. Howard Tracy and several others were left hanging on the trees and vainly "skinning the cat." It was not long before the unwieldy crowd had caused the hounds to overrun again, and rattled them so that it was impossible to keep the trail, which at best was getting cold; so they were called off and a move made to another region. Strict orders for the crowd to keep back were given, which were religiously observed till we turned a corner. It was getting quite warm again and everything was as dry as a bun except our shirts and horses. There had been some pretty stiff climbing during this run, and how the horses held their feet is a marvel; but the riders stuck to them like so many monkeys.

At noon a fox was jumped in a sheep pasture, but we lost it after a short dash. Two hounds coming from the crowd ran right across the line where the fox had been seen to go away after doubling, but they failed to take it up. The hounds were laid on where the fox had been seen to cross a road into the woods, but the leaves were so dry it was simply impossible to do more than a little cold trailing. This convinced us all that it was useless to attempt further hunting, and though a large territory was hunted out nothing was started and we returned home. In addition to the hot sun, the wind was quite strong and this was against us too. Mr. Trigg, one of the judges, is as game as they make them. He must be getting on for seventy, and although he dislocated his shoulder in getting out of the train on Monday night he was in the saddle all day acting as one of the judges, and I followed him up several nasty places that I felt pretty proud to negotiate though in perfect health.

This was the only day in which we had some chance to see the hounds work, and it seemed to be a case of every hound for himself, for they would be scattered half a mile apart, thus requiring an amount of yelling and hallooing that must have distracted the hounds had they been on trail. A pleasant little episode was meeting a couple of sportsmen on horseback, who with three pointers, had been luckier in their line than we were, bagging quite a nice bunch of quail.

It was after 5 P. M. when we reached the hotel, hungry as bears and tired out.

The judges issued the following announcement in the evening: We have decided to continue in the finals the following dogs in the order named: H. J. Hagans' Banjo, E. H. Walker's Rock, Corbin's Bird, Bourbon's Lulu. Judges: H. C. Trigg, Alexander Scobee, A. W. Hamilton.

The social element in the party were in great form after supper, and it was late for fox hunters when we sought our hard but welcome straw couches, and lulled to sleep by the flickering wood fire, the fantastic shadows thrown on the wall soon changed in our dreams to gigantic foxes and house-high fence rails.

## THURSDAY.

This should have been a good day's hunt but somehow everything seemed against us. The word was given for an early start, and the eager ones were up at 4:30 and while the moon was still shining brightly. We should have had breakfast at once and started forthwith, as it was intended to hunt in at the same part of the country as yesterday.

The following hounds were drawn to run to-day:

A. Ware's white and tan dog Drive (Grand—Trusty), 1891, breeder, John Young.

Strodes Valley Hunt Club's white and tan dog Patsy Powell (Risque—Kate), 1889, breeder, W. G. Powell.

A. M. Bedford's black dog Spokane (Ralph—Cloudy), June 1890, breeder, owner.

C. M. Corbin's white dog Joe (Barney—Alice), 1891, breeder, John Reed.

W. S. Walker's black and tan dog Tom (Bloomer—Chinn, August, 1892, breeder, owner.

E. H. Walker's blue ticked dog Joe Carr (Little Bourbon——), 1891, breeder, W. S. Walker.

Bourbon Kennels' white bitch Ollie (Ball—Clay's Jennie), June, 1891, breeder, owner.

F. J. Hagan's black and tan dog Brownie (Joe Cotton—Cora), November, 1889, breeder, N. T. Harris.

A. B. F. Kinney's white, black and tan dog Logan (Logan—Star), breeder, A. Granville Smithe.

Roger Williams's black and tan dog King (Henry's Scout—Henry's Speed), 1890, breeder, Priest Henry.

Iroquois Hunt Club's black, white and tan dog King Lee (Joe Cotton, Jr.—Solish), February, 1893, breeder, Harry L. Means.

Strodes Valley Hunt's gray and red dog Perry (Yell—Ellen), 1891, breeder, Cooper Bros.

Starting finally at 6:30, we had to halt on the roadside for one of the judges whose horse had escaped in the night, and and two of the hounds were missing, so that it was after 7 A. M. when the hounds were cast off, and the sun had gilded the trees for some time. At every step the crowd was increased by batches of ten or a dozen horsemen until there must have been 150 riders out.

The judges to-day were Col. Hamilton, Alexander Scobee and Mr. B. Hayman, who was elected in place of Mr. Granville Smithe. If ever hunters worked diligently for a find we did to-day. We marched up hill and down hill, hither and thither, but ne'er a red could we scare up. It was so warm that coats were a burden, and if we had viewed a fox I doubt if the hounds could have carried his trail along for 10yds. without a check. At noon the judges decided it was useless to try further, and there was talk of abandoning the trials, which was finally decided upon at the meeting in the evening. It was found that during the early morning hours, about 3 A. M., Judge Perry had organized an independent hunt, and starting off with some hounds, hunted over the territory that he knew we were to traverse during the day. This ruined our chances even had the weather been propitious, and was a most reprehensible and unsportsmanlike action on his part, especially so considering that he is a prominent member of the association.

The entries in the third division that did not run were:

A. Ware's white, black and tan dog Jim (Ed Walker—Kate Smith), 1891, breeder unknown.

J. F. Winn's black, white and tan dog Miller II. (Rock—Swift), May 2, 1893, breeder, owner.

A. M. Bedford's black and tan dog Ralph (Calvin—Cloudy) June, 1891, breeder, owner.

A. M. Bedford's black bitch Emily (Ralf—Cloudy), June, 1891.

Bourbon Kennels' black, white and tan bitch Blaze (Pat—Nightly), April 23, 1892, breeder, owner.

Bourbon Kennels' white, black and tan dog Jack (Scully—Nell), Sept. 1, 1891, breeder, owner.

Strodes Valley Hunt Club's white and blood-spotted bitch Bird (Kole—Hett), April 1. 1892, breeder, Pendleton Tracy.

W. S. Walker's tan and white bitch Lead (Joe Cotton——), 1801, breeder, Bud Dickerson.

W. S. Walker's blue-spotted dog Luck (Kole—Hett), April, 1892, breeder, Pendleton Tracy.

E. H. Walker's white and black bitch Alice (Trave—Bessie), 1891, breeder, R. L. Walker.

Alex. Gibbs's blue ticked dog Blue Back (Blue Back—Fan), 1892, breeder, owner.

C. M. Corbin's black, white and tan dog Charley (Red Back—Unknown), 1890, breeder, Dick Wilson.

To sum up here it may be said that the meet was held entirely too early in the fall. The leaves have only just fallen and are blown hither and thither by the wind. November is the poorest month for hunting down south for the Indian summer weather is entirely too warm. There is good night hunting and there are plenty of foxes here but they lie up during the day and only move at night. When the leaves have settled and there is more moisture scent would be much better. These conditions would obtain in February which is an ideal hunting month in Kentucky and Tennessee. This the committee should bear in mind when selecting the grounds and date for the next meet.

In the evening the members present held a meeting when it was decided to abandon the trials for this year.

In this day's hunt Mr. Kinney withdrew Logan explaining that the conditions of hunting were so different, Logan being accustomed to hunt to the gun, that in fairness to his hound's reputation he thought it best to withdraw him. He himself was not accustomed to the riding which it would be necessary to do to keep up with the hounds and unless his hound saw him every now and then he would come in and not hunt with the others. This was the case with his Ned the previous day and those who did not know the circumstances formed an erroneous opinion of the dog, so Mr. Kinney can not be blamed for not allowing Logan to run.

In the evening after a hasty supper the horn sounded, boots and saddles and the hounds were called on for a night hunt or road frolic. Four or five foxes were started and there was glorious music and running most of the night, camp-fires were lighted and the company enjoyed themselves to the full, in what to many was a hunt under novel conditions.

FRIDAY.

Here is good hunting weather said everyone when the blinds were rolled up this morning. Heavy clouds hung low, but by breakfast time the rain came down in torrents. Messrs. Corbin and young Walker took the hounds out and accompanied by Miss Hathaway and Miss Robinson, who braved the elements in company with Col. Hathaway and a few others, enjoyed the music of a good run until noon time. Meanwhile General Gentry organized several drag hunts for those who stayed at home. These were laid around the hotel in full view of the guests and proved very amusing, being followed chiefly by native hounds brought in by several old farmers. One black and tan hound of good make and shape was particularly true on the trail.

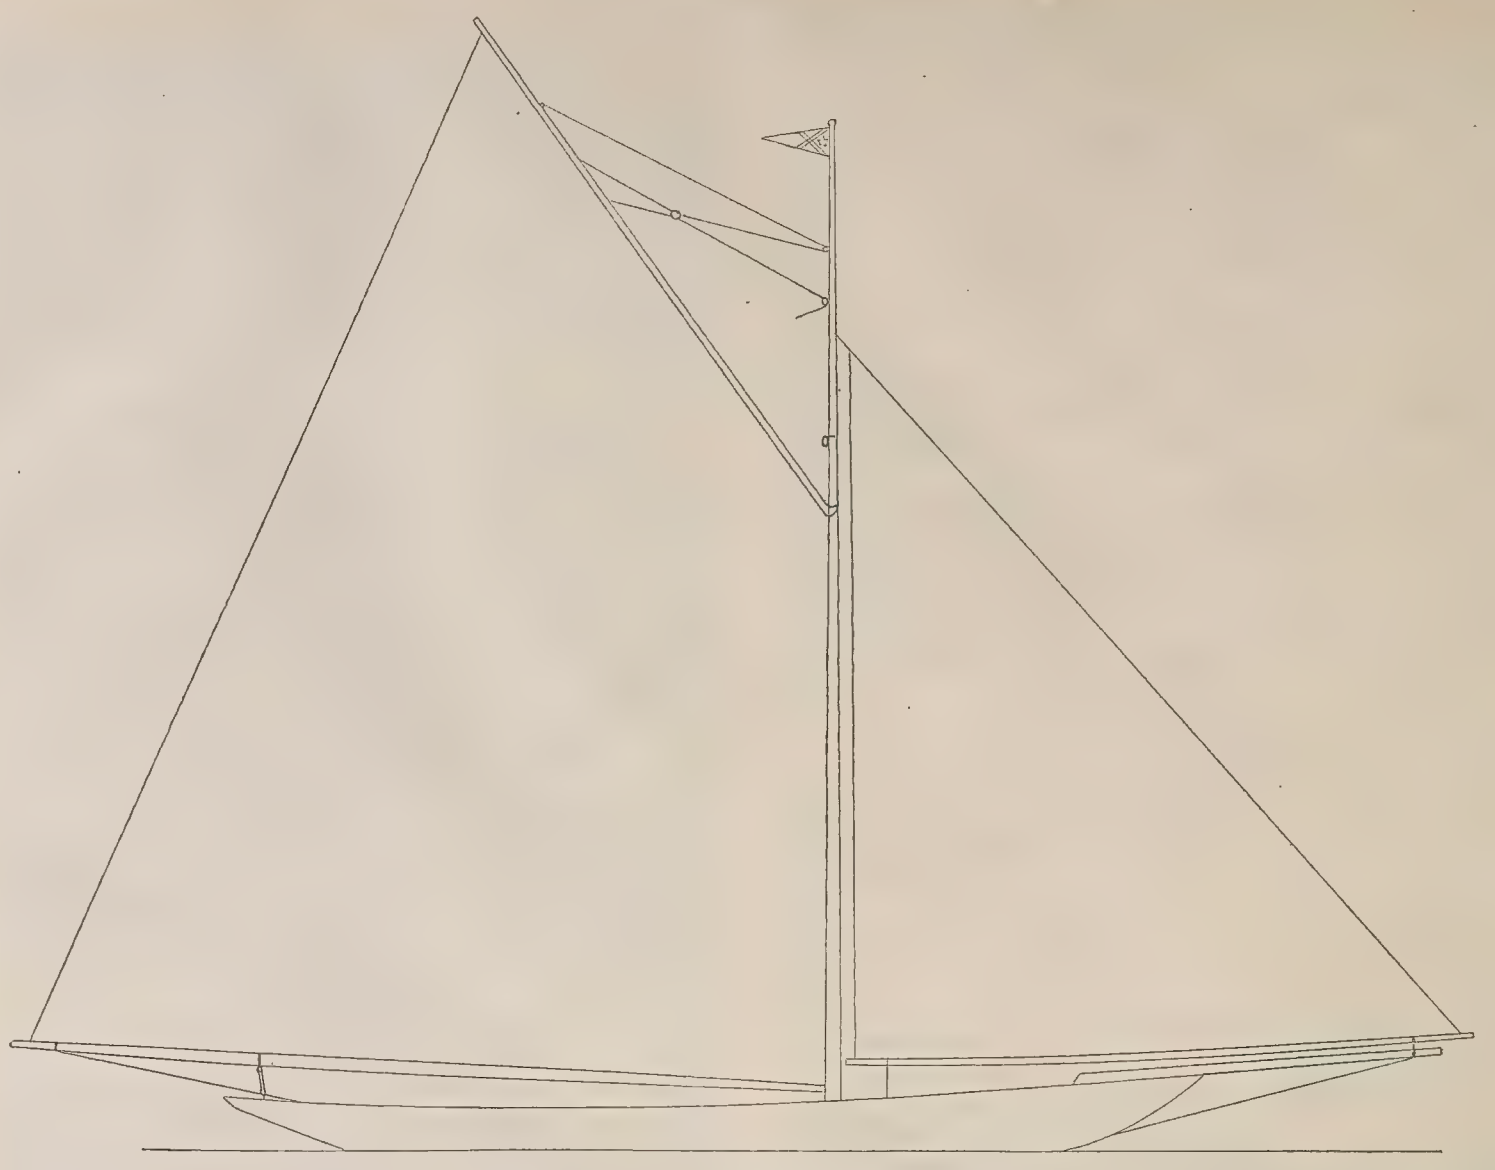
After supper the members held their adjourned meeting, which is reported elsewhere, and which finally resolved itself into a grand social finale when every one patted his fellow member on the back and voted the present the best time in their lives, and, with Kentucky hospitality, extended invitations to the strangers to come and hunt with them any and all the time if they wanted.

And so ended the first trials of the National Fox Hunters' Association, and the tuneful, sleepy echo of W. S. Walker's horn still sounds in our ears, all that remains of what will always be a pleasant memory. H. W. LACY.

# Yachting.

FROM the latest advices, Lord Dunraven has taken no positive steps since the receipt of the reply to his letter, either to a decision with Mr. Watson as to final details of the new yacht or to hasten a formal challenge from some club. Meanwhile the limit of time for challenging is rapidly disappearing.

ONLY the future can prove whether the chances of a Cup race in 1895 have been made or marred by the reply of the special committee of the New York Y. C. to the letter of Lord Dunraven; but, whatever the result may be, it must be admitted that the committee has done its work well and written a good letter. So far as the specific suggestions of Lord Dunraven are concerned, there is nothing in the committee's reply to interfere in any way with a speedy conclusion of the preliminary negotiations and the sending of a challenge in due form. The committee has, however, we are glad to see, gone further than this, having already taken up the point which we commented on last week, of the relations of a challenger to the new deed. By a plain and definite statement of the terms on which the Cup if won must be held, it has disposed of the nonsensical proposition made by Lord Dunraven in 1892, of holding the Cup under "the terms of the Volunteer-Thistle matches," and of the misunderstanding that was the natural consequence of Lord Dunraven's insistence on this phrase and the club's announced determination to accept his challenge only as made under the new deed.



In view of this statement by the committee of the position of the New York Y. C., the present condition of affairs is a very simple one. The club reasserts its adherence to the new deed *in toto;* the leading British yacht clubs, and particularly the Royal Yacht Squadron, have pronounced this same deed illegal and unfair, and have declared that they would not race under it. The issue is square and clearly defined, and must be fought out some day; the sooner the better for both parties.

In discussing the letter of the committee the many independent clauses can best be taken up in order of their relative importance rather than in the chance order in which they actually occur.

We have long ago pointed out that the conditions governing an international or in fact any challenge cup must be of two classes, the primary conditions under which a trophy is established and held, and which also define the broad rights of a challenger; and the secondary, relating to the practical details of racing, such as dates, courses, measurement, judges, sailing rules etc. Though no such distinction is made in the legal jumble known as the new deed, it nevertheless exists, and must be recognized in all discussions of conditions.

Of the various points of the committee's letter, only one relates to the primary conditions, that beginning with the allusion to the Valkyrie-Vigilant matches. In covering it, the committee makes a clear and concise statement that "the new deed is held to completely cover and control the contests for the cup." We have always looked upon the proposal to hold the cup under the terms of the Thistle-Volunteer races, prior to the drawing up of the new deed, as a foolish and futile attempt of the challenger to avoid the direct issue of the legality of that document. Two years ago we pointed out that it meant absolutely nothing—that as long as the holders stood by the new deed, any challenge accepted must be made under it and not under special conditions which tended to nullify it; and further, that a challenger who might win the cup, could in no way be benefitted by an agreement on the part of the New York Y. C. that it would allow him, if he were so foolish, to throw away all the unfair advantage which he might legally claim under the deed. The present statement of the committee seems to cover this point most fully, and should dispose finally of this mischievous side issue.

The committee also reminds Lord Dunraven that the time in which he may come to a decision and write and mail his challenge, is getting very short; by the letter of the new deed, if a challenge were sent by the club which Lord Dunraven will represent immediately on the receipt of the committee's letter, it could not reach New York before Dec. 1, consequently the races must be sailed after Oct. 1. Allowing for even a brief delay in arranging the details between Lord Dunraven and his club, the races cannot be sailed before the middle of October; while a longer delay, the challenge not reaching New York before Jan. 1, would justify the New York Y. C. in declining to sail next year. Not only might the formal challenge from a club havebeen sent last summer, but at the very least Lord Dunraven's personal negotiations should have begun as long since in order that both parties might have ample time for preparation. In view of the widespread knowledge of the ten-month clause, the New York Y. C. would be quite justified in declining to waive this notice when a much longer one might well have been given.

SAIL PLAN OF FIN-KEEL MODEL YACHT.

OF the numerous secondary conditions dealt with in the letter, the most important is that relating to the selection of one of several yachts after trial to represent the challenger. While this proposition is so obviously in accord with the modern practice of match sailing that it must some day prevail even in the Cup races, we had not realized that advanced ideas had so far replaced the old belief in the fairness of outmatching a single foreign adversary by putting the fleet against him, as to secure a favorable consideration from the New York Y. C. of such a proposal. "The sun do move," and the New York Y. C. with it, and we rejoice thereat; but at the same time, in view of the rigid wording of the new deed, there is room for doubt as to the power of any holder to accept a challenge which does not give the four dimensions of the challenging yacht. So far as its power goes, the committee has dealt with the matter in a broad and liberal spirit which will be appreciated by all yachtsmen, even though the change should not be made immediately.

THE next point—the measurement of the waterline and the prohibition of the "ballast crew"—is practically of little importance. It has been for some time a foregone conclusion that such a change as Lord Dunraven asks for would be made in the racing rules of the club, to govern all yachts; and it would certainly be recognized in any international contest. That the point is in reality of minor importance is apparent in considering the effect of an adverse decision. In that case, with the knowledge of what was allowed Vigilant and how she profited by it, the challenging yacht would in all probability have been designed to carry a still larger ballast crew; a sort of competition which, while hurtful to yachting, would have afforded no advantage to either side over the other, both profiting by it. Very fortunately the committee has, by its decision, averted the necessity for such an extreme course. The accompanying condition, as to shipping and shifting ballast, is also settled definitely and fairly.

THE rejection of the suggestion to substitute sailing length for l.w.l. length rests with the club as a body, or, to be accurate, with the voting members, and not with the committee, and is merely mentioned in the letter. The decision of the yacht owners present at the recent meeting was what might have been expected in view of the difference of opinion existing for some time on the question of classification. Whether or no the suggestion would have been accepted had it come in a different form, looking to the mutual agreement on some fixed limit of sail, naturally not less than the proportion of Vigilant, we can not say; but it seems evident that such a measure would be beneficial to both parties. It would not follow that such a regulation would in any way promote a small sail plan or operate to the disadvantage of the present high-powered American type; but it would put an end to a competition in over-sparring that is neither scientific nor profitable.

THE decision of the committee to abolish the one-gun start is, in our opinion, a mistake, for two reasons. In the first place, while the committee may be correct as to the nature and extent of the feeling within the club, we believe that there is a growing feeling among American yachtsmen in favor of a one-gun start, especially in important matches. The apparent disadvantage which Vigilant suffered this year and last has given rise to a strong feeling against the English method; but at the same time the striking contrast between the quick play and sharp racing in the Valkyrie-Vigilant races and the slovenly practice in all club regattas has had an effect on the yachtsmen who were gathered from all parts of the country to witness the last Cup races; and it only needs such an improvement in the American boat as will enable her to hold her own in the fascinating cat-play about the line to bring about the general adoption of the method. It is quite likely that the next season or so may see the change made, and then some patriot will discover that the races between America and Maria or some other ancient craft were started in this way, with a single gun, and that it is an American invention; thus letting us all down easily and gracefully.

To go back to the old way just now is practically a confession that while the English way is better, we are not quite up to it and must fall back on our rights for protection. A bolder way would be to stand by the best and build our boats and train our men up to it.

What makes the matter worse is that while being placed in the position of asking an advantage, the American boat in taking the two-minute interval really gains nothing, as the superior quickness of the other craft still enables her to out-maneuver right up to the final gun; postponing the trouble for two minues, perhaps, but in no way lessening it. Conditions may occur in which the two-minute interval may give an unfair advantage to one boat or the other, just as a ten-minute interval does; but in the majority of races the boat that turns quicker and is the better handled will get the start, whether with a single gun r a short interval.

THE decision of the committee in regard to starting to windward is merely in accordance with common sense. Whether starting at New York, Newport or Marblehead, in each case necessarily well under the shore, it would be absurd to tow fifteen miles further out to sea for a windward start with a probability of a sea breeze by the time the starting point was reached, making a run after all. As pointed out by the committee, there would be very serious disadvantages in towing out fifteen miles beyond the Scotland or even Half-Way Rock, sailing in and out again, and finishing at or after dark some twenty miles offshore. One point, so far as we are aware, has not been brought out in any previous discussion. If a challenger is really solicitous of starting all races to windward, he may at any time make it compulsory by the simple course of forcing a disagreement over the conditions on any grounds however frivolous; in which event he may demand three races outside of Sandy Hook, two not "to windward *or* leeward," but "to windward and return," the third triangular, but with the windward leg first.

IN the very probable event of the building to the 90ft. limit, the stipulation as to the two per cent. excess naturally disappears, a fact which the committee has very properly called attention to. The decision of the committee as to the transferal of the races to Marblehead has been from the first a foregone conclusion; considering all the circumstances, no yacht club would act otherwise, the only strange point is why such a suggestion was ever made.

WITH the letter of the committee before him, Lord Dunraven should be able to make an early decision; and to frame a reply as open and straightforward, and which shall avoid the bargaining and dickering which attended the previous races. Still holding our oft-expressed views of the new deed, we consider it fortunate that the committee, while evidently prepared to put a fair and liberal construction on all matters, stands strictly on the literal demands of that masterpiece of nautico-legal acumen; thus putting it to a practical test which we are convinced that it cannot withstand through any extended series of Cup contests.

## The Dunraven Letter.

THE answer of the committee of the New York Y. C. to Lord Dunraven's letter reached England last week and was cabled to New York on Friday night, as follows:

"NEW YORK, Nov. 15, 1894.

"MY LORD:—The committee appointed by the New York Yacht Club have the honor to submit the following reply to your letter of Oct. 25 to Mr. Oddie, on the subject of a challenge for the America's Cup:

"As to that portion of the paragraph of your letter marked 'First,' relating to limiting the live weight and measurement with all weights on board, the committee are unanimous in its favor, and will recommend it to the club; in fact, the propriety of adopting some such regulation has for some time past been under discussion by a committee on racing rules.

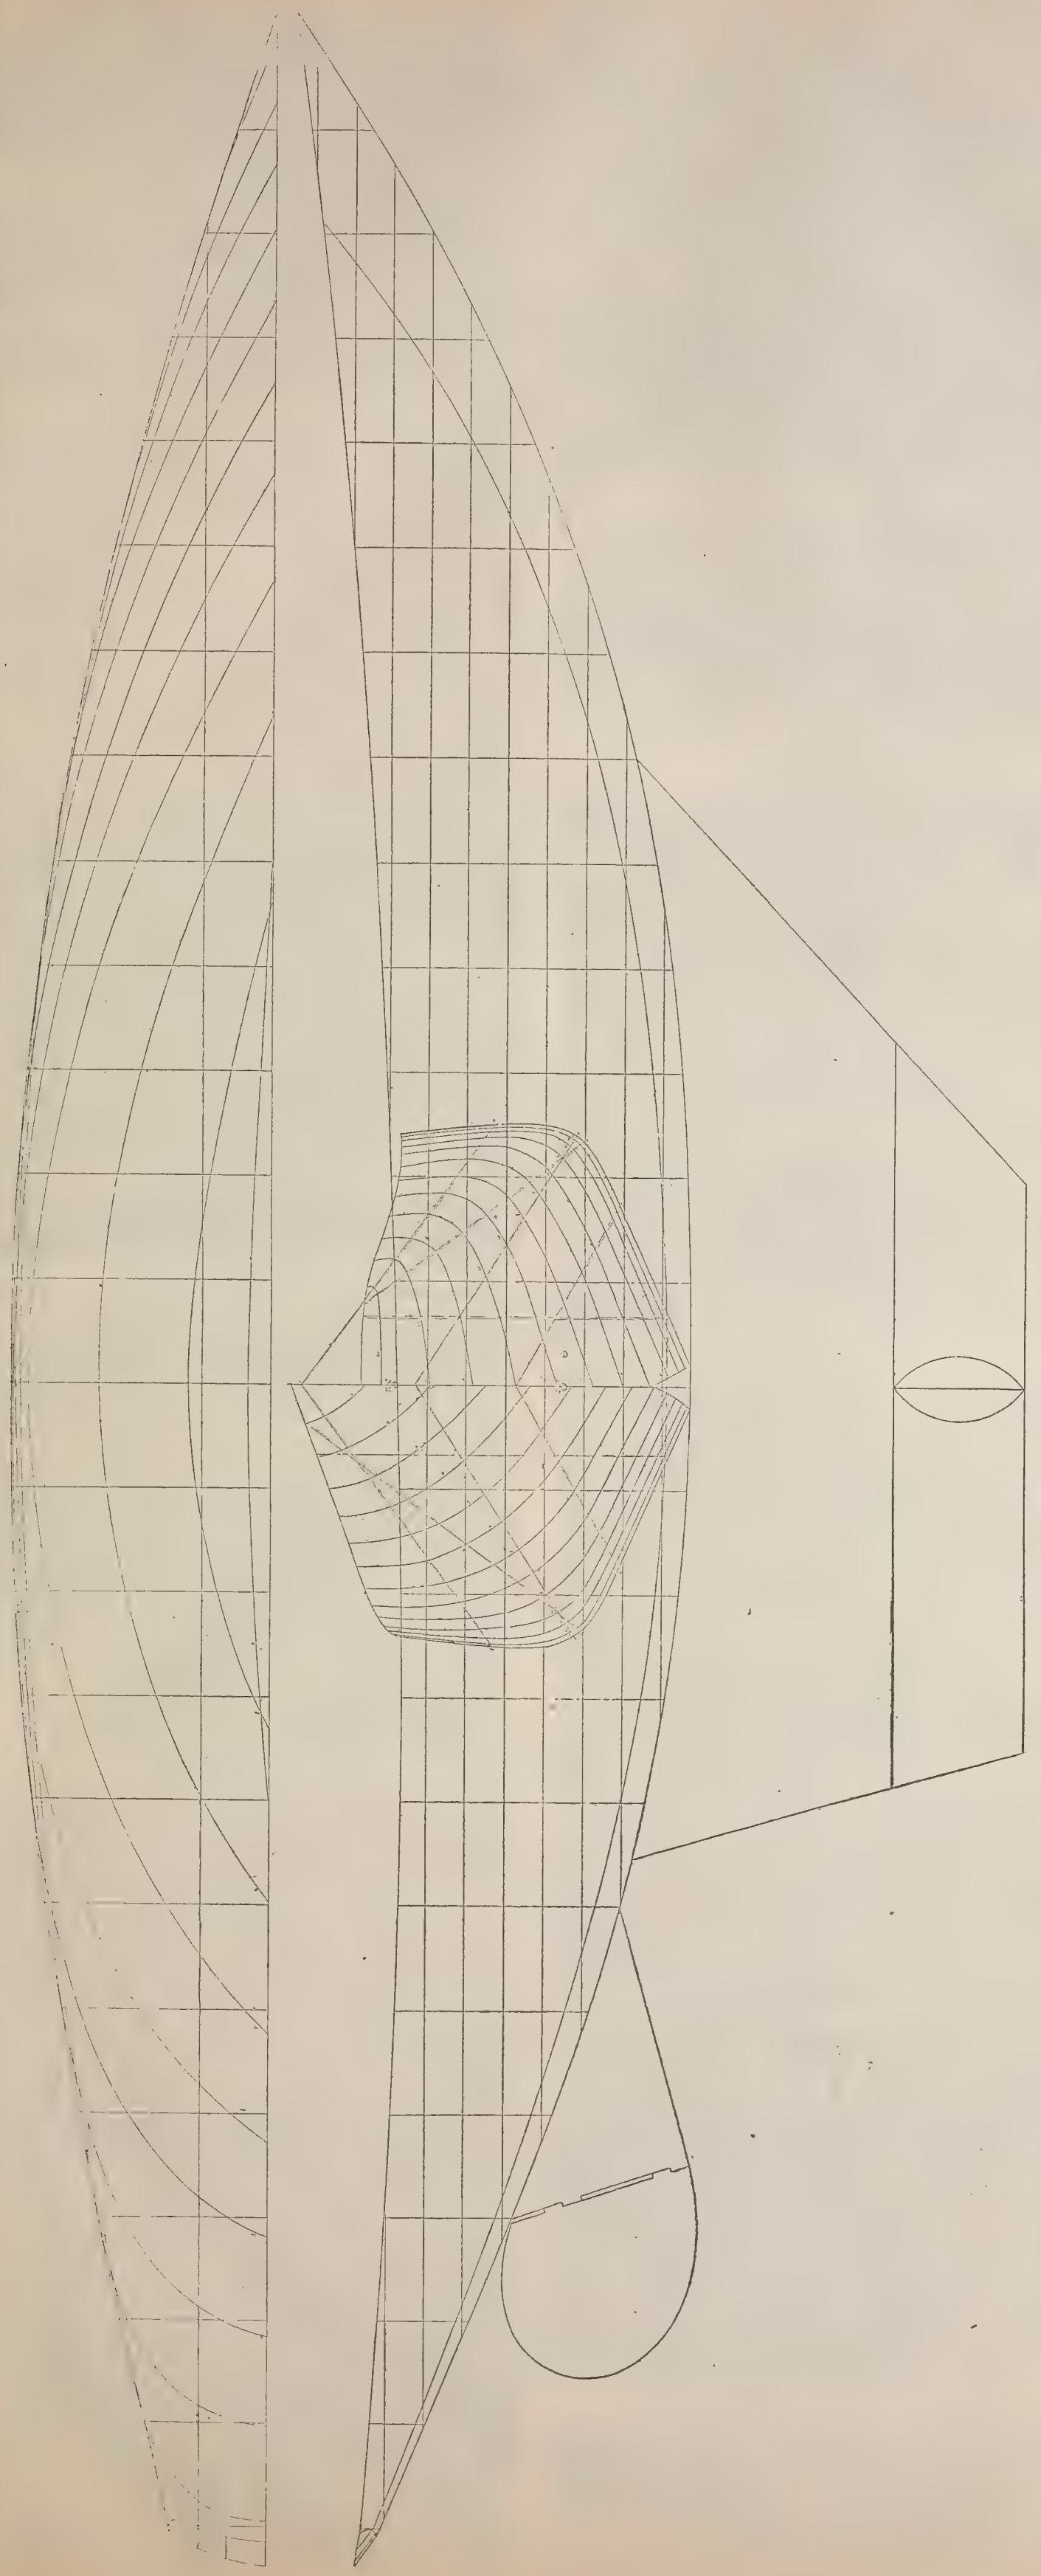
"The other parts of the paragraph we think you will find already practically provided for by referring to page 30 of the report of last year's match, copy inclosed, under supplementary and final conditions.

"In regard to your proposal headed 'Secondly,' it did not seem practicable to agree to selecting a starting point so far beyond Sandy Hook Lightship as might be required for a windward course of fifteen miles, in the case of a wind off shore, in view of the distance from the Bay Ridge anchorage to the lightship, and of the importance of starting from and especially of finishing at the lightship in case of fog or darkness.

"The committee will, however, agree to add the condition that all of the races shall be started to windward, if possible, from Sandy Hook or Scotland Lightship.

"In regard to furnishing sailing length instead of loadwaterline length, the secretary of the club informs us that he has cabled, as you suggested, that loadwaterline length would be required.

"To sail the races at Newport or Marblehead or anywhere out of its home waters the club considered out of the question.



"In regard to your last suggestion, the feeling at the club is, that the name of the challenging yacht in the challenge is necessary.

"In order, however, to meet your views in the matter, and secure the best and fastest yacht as a challenger, the committee would agree (should you desire to substitute later another vessel) to recommend that the club consent to the withdrawal of an original challenge, and the simultaneous acceptance of a new challenge, without change of racing dates, from another vessel, provided she complies with the terms of the original challenge.

"The terms and conditions of the Vigilant-Valkyrie match would, with certain changes, be acceptable to the New York Y. C., and we now proceed to state those that we are convinced would be requisite.

"As to holding the Cup if won by you, the feeling of the club is this: Any agreement that the Cup, if won by you, should be held open to challenge under precisely the same conditions as those under which you challenge is superfluous, for according to the provisions of the deed, a winner would certainly be entitled so to do without any acquiescence on the part of the New York Y. C., and be perfectly free to publicly announce his intention of so doing. From this, although granting you no additional right, any such agreement is, as a matter of form, most inadvisable, being in the nature of an addition to the deed itself, which is held to completely cover and control the contests for the Cup.

"The experiment of a one-gun start, although most interesting last

DESIGN FOR MODEL FIN-KEEL.—BY CHAS. A. COOLEY, ESQ., 1894.

year, was an innovation upon the customs of the club, and we feel that a certain short period, say two minutes, must be allowed for crossing the line after the starting signal, the exact time of any yacht crossing during that period to be taken as her start, and the end of the period as that of any crossing after its expiration. The feeling on this point is very strong, as well as the opinion that our practice produces a more satisfactory race.

"The conditions of the last match, as to not exceeding the load waterline length specified by more than two per cent., would, of course, in no case permit either vessel to exceed the limits fixed by the deed, a contingency possible as the upper limit is approached.

"Ten months must, of course, intervene between the receipt of the challenge and the date of the first race.

"We have written you at this length in order to provide you with the data for a challenge and the terms of a match, which, in our opinion, would at once be accepted.

"With the hope that such a challenge may be soon received, and with renewed offers of any assistance it may be in our power to render, we have the honor to remain,

"Yours very respectfully,

"JAMES D. SMITH, Chairman.
"A. CASS CANFIELD, Secretary.
"For the Committee.

"The EARL OF DUNRAVEN, No. 27 Norfolk street, Park lane west, London."

The portion of the Vigilant—Valkyrie report referred to above is as follows:

"If either yacht by alteration of trim or immersion, by dead weight, increase her load waterline length, or in any way increase her spar measurements, as officially taken, she must obtain a remeasurement by special appointment before the next race, or failing this, must report the alteration to the measurer at the club house at 10 o'clock P. M. of the day before the race following such alteration, and must arrange with him for remeasurement, and, if required, be in the Erie Basin by 7 o'clock A. M. of the day of said race, and there remain until 8 o'clock A. M. if necessary for purpose of remeasurement."

## A Fast Model Yacht.

WE are indebted for the accompanying design to Mr. Chas. A. Cooley, Sec'y-Treas. of the Manchester (Mass.) Y. C., and a student of the Boston School of Naval Architecture, the design having secured the highest mark given in that institution. The design has been used by Mr. Cooley for sailing in open water, Hingham Bay, and she has fully realized her owner's idea of a boat that could carry full sail in any weather in which it would be comfortable to follow her in a row-boat. With sheets in and a good breeze it requires hard and steady work at the oars to catch her. The dimensions are:

| | |
|---|---|
| Length over all | 49in. |
| l.w.l. | 35.5in. |
| Beam | 10in. |
| Draft | 10in. |
| Sail area, sq. in. | 1,836 |
| Weight of hull, etc. | 7.5lbs. |
| fin and bulb | 15lbs. |

This weight of bulb brings the model somewhat below the designed waterline, but the result in regard to speed and stability was so satisfactory on the first trial that no reduction of ballast to bring her to the designed line was deemed advisable.

The model is built on the "bread and butter" plan described on page 413, Nov. 10, the sides being about ½in. thick, with three coats of varnish inside and the outside painted black above the waterline and copper bronzed below. The deck is of mahogany, bitts of oak, and the mast is stepped in a brass tube. The fore edge of the fin is raked sharply on account of eelgrass on the sailing ground, but this feature is undoubtedly a good one in all respects, with the supplementary fin for the rudder tending to make a fin-keel steadier on her course. The rudder is weighted with lead, but has no tiller—it is only used when off the wind. The sheets, halyards and shrouds are set up with wire hooks and loops similar to the euphroe of a tent line. The shrouds, from the rail to a point about half way up the mast, are of wire, and for the rest of the distance the hounds are of cord set up in this way. The displacement curve shows a good distribution of bulk, and the diagonals are very fair and easy for such a powerful boat.

## The Small British Racing Craft.

MR. WILLIAM WILLARD HOWARD, the American canoeist and journalist, contributes a long and interesting article to the *New York Sun* of Nov. 18, on the small British racing yachts. There is much in the article that we fully agree with; not until Americans begin to understand the extent to which racing is carried in England, and the unlimited sport to be had from systematic and continued racing in the smallest classes as well as the larger, can we hope to realize possibilities for racing which exist in the splendid waters about New York and Boston, or to have a satifactory racing fleet, comprising a number of well supported classes.

There are some points however in which we must take issue with Mr. Howard. So far as being a comparison between the small boats of the two countries, the article is rather anomalous, as there are no small racing boats on this side to be compared with the Solent and Thames fleets. Mr. Howard mentions such small craft as Scarecrow in comparison with Pique, Sorceress and Spruce III. but he must know that while the latter were designed and built solely for speed, the American craft were designed to no existing class, and with no thought of racing, but only for afternoon sailing and cruising; their construction being quite heavy owing to the high cost of a lighter construction that would be of no advantage to them for the use proposed.

While dealing only with small yachts, Mr. Howard mentions Vigilant and Britannia in an assertion that the former is superior in actual speed through the water and in racing on open-sea courses, Britannia's advantage being that she is faster in stays and her skipper an expert in local knowledge. This very one-sided estimate ignores entirely the important points that, while the great number of Britannia's victories over Vigilant prove her at the very least almost as fast under any fair conditions, she is at the same time a ship and a sailor's home, and not a mere empty shell; and also that while Vigilant has been kept out of many races by disasters to spars, gear and centerboard, Britannia has sailed some fifty races this year with hardly an interruption.

The following quotation is one that American yachtsmen should lay to heart: "The fact that in England a small boat may be raced almost every month in the year, whereas in the United States the racing season begins in June and ends in September, has an important bearing on the constant racing competition and the building of boats. In New York a yachtsman no sooner gets his craft tuned up to racing pitch than he must haul up for the winter. In England he may race all through the winter months, as they do at that active and progressive hotbed of half-raters, the Oxford University Sailing Club. Constant racing is more potent in improving the form of boats than anything else that may be named; and, therefore, under the circumstances, it is not at all surprising that at the close of the summer season of 1894 England should have better boats." Of course the peculiar climate of England makes sailing practicable for a much longer season than in the latitude of New York; but the trouble here is the great delay in ordering and fitting out, trial trips being made after instead of long before the June regattas.

The following is but too true: "In America there is an unfortunate belief that a man owns a small yacht because he cannot afford to own a large one; whereas, in Great Britain, many of the keenest smallboat sailors are dukes and lords, and men of title and position generally. In America a man too often gets the largest boat that he can for his money; in England he aims to get the best boat of a certain size that money will procure. The result is plain, the American boat is heavy and cheaply put together, while the English boat of the same class is light, carefully built, and highly finished."

Mr. Howard condemns the lug rig in the various forms on the small raters; and also states that the American hollow spar is an impossibility there on account of the continued wet weather. He says: "Not only are the English rigs for small craft inferior in shape, but in construction they are far from being equal to the best American productions. Nothing in England this year can compare with the Scarecrow in point of neatness, extreme lightness, strength and general handiness." It would only be fair to Mr. C. J. Stevens, by the way an Englishman, to state that there is nothing in this country, as well as in England, which equal or approach the very light and beautiful rig that he has devised and made for the original Scarecrow, a part of the credit being also due to Mr. L. K. Young, who made the spars, blocks, and some of the brass fittings. On the same subject Mr. Howard says: "In the matter of blocks and fittings, Great Britain is nearly on a par with the United States; although the style and finish of American fittings are much superior to the English." This is undoubtedly true as concerns "canoe jewelry;" but if English yachtsmen are as badly off as Americans for fittings for the next larger size of craft, we are sorry for them. Apart from the special set of blocks made for Scarecrow, we do not know of a block, either wood or metal, which is fit to put on a 20ft. boat. The smallest size of yacht blocks, 3in., are far too large nd clumsy; the boxwood canoe blocks, imported from England, as well as the small metal blocks made here, are very badly designed and fitted, even if large enough, and there is nothing more needed just now than a neat, light and shipshape block to take lines from ¼ to ⅜in. diameter. In concluding the article Mr. Howard makes the very truthful remark that: "When it is possible for a 16ft. yacht to get 65 races in America during the season, we shall see whether American designers and builders do not turn out the fastest craft in the world."

## An International Measurement System.

While it is doubtful whether the New York Y. C. could have been induced to entertain any proposal from the Yacht Racing Association for the adoption of a common measurement system for British and American yachts, at the same time we regret that the latter body has abandoned the proposed attempt toward such a desirable end. The differences in the rules of the two nations are even now in many respects so small that they might easily be eliminated, with obvious advantages to both parties in the event of a continuance of building for international racing. One of the most earnest advocates of a common rule is "Thalassa," the well-known English yachtsman and yachting writer, and his latest contributions to the subject, after appearing in the *Yachting World*, have just been reprinted in pamphlet form by that journal.

In reviewing the whole subject, "Thalassa" begins with the appointment of the committee last August to report on the working of the present Y. R. A. rule, and the failure of that committee to attain any practical end. After pointing out the close similarity of the two formulas, "Thalassa" shows how the addition of the two factors, length and sail, in the Seawanhaka rule, makes it superior to the Y. R. A. rule, in which the same factors are multiplied, giving practically a cubic instead of lineal quantity. As he shows, this difference, of itself, would remove the tendency to extreme length which exists under the Y. R. A. rule, a fact that disposes of the bugaboo placed before yacht owners in the discussion of a sailing length classification a few years ago, to the effect that classifying by the Seawanhaka rule would recreate the long, narrow hulls.

The general proposition for a common international system is, we believe for the first time, put into definite shape by "Thalassa" as follows: That the Seawanhaka formula and time scale be adopted by the Y. R. A., and that on the other hand the American clubs adopt the Y. R. A. method of measuring sails in place of the present method of spar measurement by the Seawanhaka rule; and also a classification by sailing length in place of waterline length. If there be any so foolish as to quibble over either side leaning too much toward the other, this proposed exchange would from its fairness be unobjectionable on such a score; but what is of infinitely greater importance is the undoubted fact that both parties would gain in their home racing by the proposed new features; while a strong stimulus would be given to international competition in all classes. We have always considered the Y. R. A. method of measuring sail as inferior in accuracy and especially in certainty verification to the Seawanhaka method, and we still believe that the latter, with a proviso, if desired, which would include the club topsail, would prove the better; but this point at most is of slight importance.

In support of this scheme, the details of which have evidently been carefully considered, "Thalassa" gives the following tables of result under the new classification, introducing, in addition to many existing yachts, a pair of imaginary boats in each of the two larger classes. The table is carried down to the half-rating class, but we give only the sizes from 20 rating upward.

Class I.

Big cutters. No limit of rating at present.

| Name of Yacht. | L W.L. | Sail Area. Actual, 1894. | Limit by Y. R. A. Rating. | Limit by American Corrected Length. |
|---|---|---|---|---|
| | | | | (100) |
| Satanita | 98.00 | 9,016 | ..... | 10,404 |
| (Lion) imaginary | 93.00 | ..... | ..... | 11,449 |
| (Eagle) imaginary | 90.00 | ..... | ..... | 12,100 |
| Britannia | 89.24 | 10,359 | ..... | 12,267 |
| Vigilant | 87.25 | 11,588 | ..... | 12,712 |
| Navahoe | 86.93 | 10 816 (1893) | ..... | 12,792 |

Class II.

Proposed new class.

| | | | | |
|---|---|---|---|---|
| | | | (90) | (80) |
| (Battle Axe) imaginary | 75.00 | ..... | 7,200 | 7,225 |
| (Bowie Knife) imaginary | 70.00 | ..... | 7,857 | 8,100 |

Class III.

40-raters, classified by American rule.

| | | | | |
|---|---|---|---|---|
| | | | (40) | (62) |
| Carina | 60.75 | 3,947 | 3 950 | 4,000 |
| Vendetta | 60.45 | 3,967 | 3,970 | 4,038 |
| Lais | 59.92 | 4,000 | 4 005 | 4,105 |
| Queen Mab | 59.20 | 4,053 | 4,054 | 4,199 |
| Varuna | 59.17 | 4,046 | 4,056 | 4,203 |
| Thalia | 59.14 | 4,055 | 4 058 | 4,206 |
| Corsair | 58.55 | 4,098 | 4,098 | 4,284 |

Class IV.

20-raters, classified by American rule.

| | | | | |
|---|---|---|---|---|
| | | | (20) | (48½) |
| Asphodel | 46.53 | 2,576 | 2,578 | 2,547 |
| Stephanie | 46.53 | 2,566 | 2,578 | 2,547 |
| Deirdré | 46.17 | 2,506 | 2,599 | 2,584 |
| Luna | 46.10 | 2,595 | 2,603 | 2,591 |
| Dragon | 46.04 | 2,601 | 2,606 | 2,597 |
| Thelma | 45.78 | 2,571 | 2,621 | 2,623 |
| Audrey | 44.73 | 2,641 | 2,682 | 2,732 |
| | 43.52 | 2,740 | 2,757 | 2,662 |
| Inyoni | 43.91 | 2,732 | 2,732 | 2,818 |

The effect on the largest class is discussed as follows:

"Taking the classes in the table *seriatim*, we first come to the big cutters, for which at present there is no top limit of any kind. The only limit is the engineering difficulties connected with a single stick carrying about a quarter of an acre of sails. Vigilant's sail area, as measured for the race on Aug. 4, 1894, being 0.265 of an acre in area, and Britannia's 0.238 of an acre. Up to the limit of a quarter of an acre of sail in a cutter's rig, the engineering difficulties now appear to have been fairly well met, but it has been done at great expense to those owners who have faced the question practically. It is therefore only fair to present owners, and the time seems well chosen, to place a top limit of rating on the class of big cutters.

"International racing in the big class is mainly at present a contest for supremacy between Great Britain and America. If, therefore, we ask them to agree to a limit for this class, it should be expressed in their own formula of rating, viz., corrected length, and an agreement made that all contests should, if possible, be conducted under this rating rule; in which event the competitors would in all probability come to the starting line at equal rating, and there would be no time allowance, which now detracts from the perfection of racing otherwise obtainable in the large class. A limit of rating would, moreover, enable the two countries to meet with yachts which embody the distinctive national types more than is possible at present. Indeed, with a limit of hull length on waterline alone as at present in the Cup races, the wonder is that the competitors should have embodied any distinctions in type. If, therefore, we ask them for a rating limit to cover the Cup, and other similar races, we can well afford to accept their rating of 'corrected length' (misleading name) as the gauging rod.

"This formula $\frac{L+\sqrt{S}}{2}$ brings Vigilant to a rating of 97.50, and Britannia to a rating of 95.45, and Satanita to a rating of 98.71. It would be unfair to the existing owners of big racing cutters to fix upon any limit below their present rating, and the limit of 100 which I proposed in the *Field*, Nov. 11, 1893, seems fair to all. The letter may be quoted here: 'Sir, my proposals concerning the challenge for the America Cup (which seems to have met with some attention on the other side), put in their simplest form, are:

"'(1) That the Y. R. A. challenge and select the yacht when the time comes. (2) That the competitors be limited to a sailing length of 100, which shall not be exceeded, any combinations of L. and S. A. which do not exceed 100 by New York rule being permitted. (3) No time allowance to either if below 100. (4) People on board to be limited to fifty. (5) Length of hull on waterline to be measured with those people on board, and marks affixed on the hull. (6) Other conditions as agreed to by Lord Dunraven in 1893.—Thalassa.'

"The unbiased reader will gather from the figures given in the two classes now examined, that the American rating rule possesses the important advantage over our own rule of rendering the lengthening of a design for any class more disadvantageous in sail, and the shortening of the design more advantageous in sail. Put in another way, if any hull length be taken as the pivoting point in any class, it is necessary to reduce stability more thoroughly when increasing said hull length under the American rule; and, on the other hand, when hull length is reduced, stability can be increased more actively under the American than under our own rule. In short, the American rule is harder on L. and easier on S. than the Y. R. A. rule. Again, in a third manner, it can be stated as a fact that the sail curve for length is steeper with the American rule than with our own rule. The simple adoption of the American rule, without any modification in regard to B or D, or girth, would therefore carry us in the direction we wish to go. Whether it would carry us far enough is open to grave doubt."

---

The questions of defects of some modern types and the advantages looked for in any future change of rule are very fully discussed, but at too great length to reproduce here. "Thalassa" proposes, as an effective but moderate remedy, the following supplement to the Seawanhaka rule: "Add to l.w.l. the excess of extreme beam over 2½ times the depth of hull at quarter beam, to find the length for rating." The objects aimed at by this change are (1) To encourage internal space, irrespective of the position of the waterline; (2) To handicap adversely the extreme boats recently developed by compelling them to clip sail in order to keep within the rating. (3) To arrange this handicap algebraically, so that there shall be no tax at and below the moderate point selected; and above it, that the tax shall be hardest on the most extreme boats."

The effects of the proposal on various types of 1-raters, about 19ft. sailing length, are very fully shown in tabular form. The possibilities of development, especially in some unforeseen and mischievous direction, are so unlimited under any new rule when the competition is keen in building and racing, that we hesitate to pass judgment on "Thalassa's" proposal without a more careful consideration than is possible on the first reading; but it bears evidence of a comprehensive study of the whole subject, in the light of the many other proposals recently made, and is at least free from the objections made to others. One thing is needed to put the plan into convenient and popular form, a terse and compact expression (other than "rating") for the two awkward terms "sailing length" and "corrected length," together with the omission of that most unjustifiable nuisance, the numbering of classes I., II., III., etc. We recommend the pamphlet to American yachtsmen as worthy of careful reading.

---

## The Centerboard.

In a recent interview Mr. A. Cary Smith is reported as speaking as follows in connection with Mr. Nixon's criticism of the centerboard:

"I do not care to publicly criticise statements of this kind, but the centerboard deserves many good words. In the first place, a large racing centerboard yacht, of from 80ft. to 90ft., is a better sea boat than a keel craft, for these reasons: The keel boat, to compete with the centerboard, must draw from 17 to 21ft., and with such a draft she cannot be very wide, and the weight carried on the keel will be from 70 tons to 80 tons. Such a craft will be a bad boat before a big sea, as she is liable to be 'pooped,' the narrow stern and great weight not lifting quickly enough to escape the waves.

"Again, when 'hove to,' the keel boat must take the full fury of the wind and sea, because the deep draft will not allow of her drifting to leeward to avoid the sea. At such times the centerboard craft, from her light weight and greater buoyancy, will lift to the sea and scud like a duck. The Iroquois, a centerboard schooner, rode out the famous March blizzard under a maintrysail only without injury. The spray from the caps of the seas was blown over her topmasts. After thirty hours of this experience the trysail was slackened as the boat fell off, and, the helm being put up, she went off before the wind like a bird. Her captain told me that she was the best sea boat he ever put his foot on.

"The Navahoe, Lasca and Vigilant, all centerboards, crossed the ocean quite lately, and their sea qualities have been greatly commended. The first of these had the wife of the owner on board both going and returning, which speaks volumes for her sea qualities.

"The great runs of the Lasca and Vigilant stand alone for boats of this size, and show that their sea qualities must be of the first order. The Lasca ran out a gale without any trouble.

"When we come to the question of speed between the two types of boats, the unbroken series of defeated keels that have come from England to establish their superiority must be eloquent testimony for the centerboard.

"Once more, the sea experience of these centerboard boats and the feature of the overhang at bow and stern will in time be utilized on seagoing steamers."

---

While we quite agree with Mr. Smith as to the seagoing qualities of centerboard yachts of the type of Iroquois, Lasca and Volunteer, his deductions, as far as the more modern types are concerned, are hardly logical. Assuming that the centerboard craft of good depth of body but no outside keel, such as Iroquois, is a better sea boat, and in particular has certain advantages, when hove to in the worst weather, over the narrow cutter of great depth, the parallel does not hold in comparing the modern representatives of the two types, Navahoe and Vigilant with Valkyrie and Britannia. The inference that the keel boat must be much narrower and deeper than the centerboard is not borne out by the dimensions of these craft: Vigilant 26ft. beam, 13ft. 6in. draft; Navahoe 22ft. 6in. beam and 13ft. draft, both centerboards; and of the keel craft, Colonia 24ft. beam, 14ft. 6in. draft. Britannia 23ft. beam, 16ft. draft, and Valkyrie 22ft. 4in. beam and 17ft. 3in. draft. It would be almost as fair to take Britannia as compared with Navahoe and to argue that the modern centerboard boat is narrower than the keel craft; as in the face of the above figures, to credit one type with a material difference of beam such as would affect the seagoing qualities.

The matter of draft is subject to the same comparison, Vigilant and Navahoe should properly be classed with the keel boats, and not with Volunteer, Lasca and Iroquois. To us Mr. Smith's argument is much as follows: Iroquois, of moderate depth and draft, a light centerboard and no outside keel, has proved herself an excellent sea boat—*ergo*, as Mr. Smith himself would say, Vigilant and Navahoe, of much greater displacement and draft, of very different model, and excessively heavy and deep outside keels, must be good sea boats—because they carry ballast centerboards of great weight, which are probably not used in an ocean passage.

In our opinion the centerboard and keel discussion is now confined to a very narrow limit. The success of Kathleen, Minerva, Gossoon, Gloriana, Wasp and Britannia, with the comparative failure of such modern centerboard boats as Shark, Hawk, Verena, Ventura and others of less note, should be convincing proof that the keel type may be made as fast, to make a moderate claim, as the centerboard, in any size of yacht. On the side of the centerboard, it may be said that such a craft as Iroquois makes as good a cruiser and sea boat as can be set afloat, with a moderate draft that is highly advantageous for many uses, and with good accommodation but little hampered by the centerboard trunk. In the smaller classes, however, now that men have learned to understand and use the keel type; the general use of the keel boats proves that the disadvantage of draft is more than compensated for to many yachtsmen by the increased accommodation.

As far as the large classes are concerned, the defeat of the British yachts in the Cup races cannot be assumed as conclusive evidence of the superior speed of the centerboard; especially as it is off-set by Minerva, Wasp and Gloriana on the other hand, to say nothing of Britannia. The only conclusive test would be the building of an American keel yacht and a trial with the American centerboards. This interesting experiment should have been made in 1893, but the opportunity was wasted when Colonia was made to draw less than 2ft. more than Vigilant. Even with this handicap, the good work of Colonia in the trial races of 1893 is to us satisfactory ground for believing that the superior speed of the keel can be demonstrated as fully in the largest as in the smaller classes.

The owner or designer who will study carefully and impartially the course of racing for the last half dozen years will find ample data to enable him to decide between the keel and centerboard according to the size, intended use and home waters of a projected yacht; whether for racing, cruising or a combination of both; for Long Island Sound, Marblehead, the Chesapeake or Florida. The one point not yet settled, and to which discussion may very profitably be limited, is the value of a great weight carried as ballast in the centerboard; especially when associated with a hull that is essentially of the keel type. Neither of the experts, Mr Nixon nor Mr. Smith, throw any light on this, the vital point of the centerboard controversy to-day.

---

## YACHT NEWS NOTES.

The *American Shipbuilder* of Nov. 15 contains a good portrait of Henry Piepgrass, the well-known yacht builder of City Island.

Yampa, schr., has been sold by Chester W. Chapin to R. S. Palmer, former owner of the Marguerite. Capt. Edward Sherlock has taken command of her and will fit her out at Boston, where she has gone from Tebo's. Mr. Palmer will sail in January for the Mediterranean, to witness the spring racing.

We have received from Mr. Thos. W. Schurmann, of Calais, Me., a couple of photos of the fast yacht St. Croix News, built by Henry A. Davidson, of Calais, from designs by Mr. Thomas Clapham. The yacht was built as a prize for a contest instituted by the St. Croix *News*, and is owned by Mr. Thos Vanstone. She is 27ft. over all, 19ft. 10in. l.w.l., 9ft. 6in. beam, and 21in. draft, without board. While designed for a fast cruiser, she has shown great speed in the races last summer, defeating all of the fast boats of St. Andrew's and Quoddy bays. Her best point is to windward and in heavy weather. She will be refitted next season with a new mast and light sails.

A steam yacht of French design, the Jeanne Blanche, is now building by the Société des Forges et Chantiers de la Mediterranée, for Mr. Rodolphe Faulquier, a French yachtsman, owner of a smaller yacht of the same name. The new craft, designed by Mr. Largane, the naval architect of the works, will be 167ft. between perpendiculars, 21ft. 3in. beam, and 13ft. draft. The owner and his wife are enthusiastic cruisers, and the yacht will be most comfortably and elegantly furnished. She will be rigged as a two-masted topsail schooner. The hull will be of steel and the engines will give a speed of nearly 14 knots.

Tha bright little paper, the *Model Yachtsman and Canoeist*, gives notice in its November issue of its suspension after this year, the support which it receives not being sufficient to warrant its further publication, a fact for which we are very sorry in the interests of model yachting.

Capt. J. R. Hattrick, Mate John W. Hattrick, and Engineer Robert Valentine, the crew of the steam yacht Alcyon, which left this port July 16 last, bound to Baracoa and Guantanamo, and which was abandoned with her engines disabled and subsequently towed into Baracoa by a Spanish gunboat, as previously stated, have just arrived at this city from Charleston, where they had been landed in the fruit schooner Nellie Coleman, from Baracoa. The trip throughout was one of continued misfortunes, and the Alcyon was forced into innumerable perils along the Southern coast and Bahamas through repeated accidents to her machinery. Captain Hattrick stated yesterday that their trip south to Florida was made through the canals, and no serious mishaps occurred until after he had taken his departure from Ragged Island, Oct. 9. The following day a heavy gale was experienced and the boilers burst and the engines gave out. For five days all hands stuck to the yacht amid most trying circumstances, making every effort to save her. Provisions and water had given out, and the seas were breaking completely over her. Oil bags were rigged out over the bows, with the effect of keeping the sea from breaking over her, and at the end of the fifth day Captain Hattrick located himself to be within close proximity of this uninhabited island. The sea having moderated somewhat, they abandoned the yacht and pulled for the island of Cayo Mono, reaching there on Oct. 14. They were now quite exhausted and lay down in the sand and slept all throughout the first night. During the day they suffered greatly from the powerful rays of the tropical sun, but the nights were spent comfortably, although they became very stiff from exposure to the heavy dews. There was no vegetation on the island saving the cocoa plums, which grew wild, and these were partaken of ravenously, with the result that they became very ill. On Oct. 20, when the sea moderated, they put off to Cocoa Cay, where they were immediately placed under arrest by the Spanish marine officer stationed there, charged with being filibusters. Captain Hattrick's Spanish papers, which fortunately he had preserved, served to disclose his identity, and he was then kindly treated and taken down to Baracoa by that officer in a small sloop, reaching there Oct. 23. There he made a statement to the American Consul. Through the efforts of the Consul a Spanish gunboat was sent in search of the yacht, and she was found to have drifted ashore to the westward of Baracoa. She was hauled off and towed to her destination, but while ashore it was found she had been boarded by the natives and plundered of furniture and nearly everything of value. Captain Hattrick says he received the kindest treatment at the hands of the lighthouse keepers along the Bahamas.—*Philadelphia Ledger, Nov. 21.*

The Larchmont Y. C. announces the following fixtures for the season 1895: Saturday, June 15, spring regatta; Thursday, July 4, annual regatta and first special race for 30 and 21-foot classes; Friday, July 12, second special race for 30 and 21-foot classes; Saturday, July 13-21, annual sail; Saturday, Aug. 3, third special race for 30 and 21-foot classes; Saturday, Aug. 31, fourth special race for 30 and 21-foot classes; Monday, Sept. 2 (Labor Day), fall regatta and fifth special race for 30 and 21-foot classes; Thursday, Sept. 5, sixth special race for 30 and 21-foot classes; Saturday, Sept. 7, seventh special race for 30 and 21-foot classes and race for Flint cups for cabin cats; Saturday, Sept. 14, Larchmont cup for schooners and eighth special race for 30 and 21-foot classes.

Lucille, steam yacht, Geo. W. Vanderbilt, will have a new Almy boiler.

Monhegan, schr., is fitting out at Poillon's for a Southern cruise.

The Erie Y. C., of Erie, Pa., has elected the following officers: Com., George T. Bliss; Vice-Com., George Berriman; Rear-Com., C. C. Wicks; Sec., E. B. Lynch; Treas., Walter Reitzel; Meas., Wm. Marks, Jr.; Asst.-Meas., Wm. Morrison; Surveyor, F. Lynch, Jr.; Asst-Surveyor, Donald Sturgeon; Surgeon, Dr. Harvey. Com. Bliss, H. M. Eaton and Charles Heydrick were appointed a committee to secure a charter from the court.

The Beverly Y. C. has adopted the following recommendations of the special committee on measurement of the Cape Cod division of the club's racing fleet: That the classification shall remain as it is, and the clause of Rule 5 of the sailing regulations relating to measurement be amended by substituting for it the following, viz: "Racing measuremement south of Cape Cod shall be the length of the yacht on a line parallel with and above the waterline; the perpendicular distance of this line above the waterline shall be, for first class 5in.; second class, 4in.; third class, 3in.; fourth and fifth classes, 2in." That the next following paragraph be amended so that it shall read, "The waterline length shall be measured when the yacht is afloat, and in her ordinary sailing trim."

---

# Rifle Range and Gallery.

## Zettler Rifle Club.

New York, Nov. 21.—The Zettler Rifle Club held its weekly gallery shoot at headquarters last night. Eighteen members were present and participated in the competition. Messrs. Flach, Holges, Ross and Dorrler are having a class for the first position for the most points. In the shooting last night Flach led his competitors for the best five scores. In the race for the champion medal for the best score on the first entry the honors were divided between L. Flach and M. Dorrler each making 246. The best ten shot score was made by Flach, Plaisted and Ross each with 247. Scores:

Championship medal, first entry: Louis Flach 246, H. Holges 245, M. B. Engel 242, B. Zettler 242, G. W. Plaisted 236, B. Walter 238, R. Busse 238, A. Klein 219. G. H. Downs 229, M. Dorrler 246, F. C. Ross 245, C. G. Zettler 245, H. D. Muller 238, F. Schmidt 231, Dr. Grosch 234, S. Ruzzini 227, Gus Nowak 224, H. Munz 207.

Best 5 scores:

| | | | | | |
|---|---|---|---|---|---|
| L Flach | 246 | 243 | 247 | 244 | 247 |
| H Holges | 245 | 246 | 244 | 245 | 244 |
| F C Ross | 245 | 245 | 243 | 247 | 244 |
| M Dorrler | 246 | 245 | 243 | 242 | 244 |

Best 10 shot score: L Flach 247, F. C. Ross 247, H. Holges 246, B. Walther 244, M. B. Engel 243, B. Zettler 242, Gus Nowak 241, G W. Downs 232, A. Klein 237, G. W. Plaisted 247, M. Dorrler 246, C. G. Zettler 245, Dr. Grosch 243, R. Busse 244, F. Schmidt 242, A. D. Muller 242, S. Buzzini 232, H. Munz 229.

---

## Gallery Tournament.

New York, Nov. 26.—The Empire Rifle Club closed a three days' gallery prize shoot at its headquarters Saturday night. There was the usual attendance of the local gallery experts and the result was sharp competition and high scores. The programme called for ten prizes from $25 to $2. There was a special prize, a diamond badge, for the shooter making the five highest scores. There was a spirited race for this prize, and it was finally won by L. Flach on the following scores: 75, 74, 74, 74, only four points off from the possible on the five scores. Mr. Rosenbaum was only one point behind Flach on his total for the five scores. The competiton for the first prize, $25, was decidedly interesting and resulted in four men tieing for the first position, each with 149 points out of a possible 150. In fact the pace was such that even the experts had to be in good form in order to get a nibble at the prizes. There were five full scores made during the shoot. Ties divided:

| | | | | | |
|---|---|---|---|---|---|
| L Flach | 75 | 74—149 | M Dorrler | 74 | 74—148 |
| Wm Rosenbaum | 75 | 74—149 | W C Collins | 75 | 72—147 |
| L Buss | 75 | 74—149 | H D Muller | 74 | 73—147 |
| F C Ross | 75 | 74—149 | R Busse | 73 | 72—145 |
| M B Engel | 74 | 74—148 | C E Geusch | 73 | 72—145 |
| H Holges | 74 | 74—148 | B Zettler | 73 | 72—145 |

### Cincinnati Rifles.

CINCINNATI, O., Nov. 18.—The Cincinnati Rifle Association's held its regular shoot to-day. Conditions: 200yds., off-hand, at the standard target:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Gindele | 10 | 10 | 9 | 10 | 7 | 8 | 6 | 7 | 9 | 9—85 |
| | 8 | 9 | 9 | 9 | 10 | 9 | 9 | 7 | 10 | 8—88 |
| | 8 | 8 | 9 | 8 | 8 | 7 | 8 | 8 | 9 | 9—82 |
| | 9 | 9 | 9 | 9 | 9 | 8 | 8 | 8 | 7 | 7—83 |
| Louis | 7 | 9 | 9 | 10 | 7 | 9 | 5 | 5 | 7 | 6—74 |
| | 8 | 8 | 10 | 10 | 9 | 10 | 7 | 10 | 9 | 6—87 |
| | 7 | 9 | 8 | 10 | 5 | 7 | 7 | 7 | 6 | 9—75 |
| | 8 | 4 | 8 | 9 | 4 | 6 | 9 | 5 | 6 | 10—69 |
| Payne | 9 | 8 | 8 | 4 | 9 | 7 | 7 | 8 | 8 | 8—76 |
| | 10 | 7 | 8 | 6 | 10 | 5 | 6 | 7 | 7 | 8—74 |
| | 5 | 10 | 6 | 8 | 8 | 6 | 7 | 8 | 6 | 10—74 |
| | 4 | 7 | 8 | 8 | 7 | 7 | 5 | 8 | 10 | 5—70 |
| Wellinger | 10 | 5 | 5 | 7 | 7 | 9 | 9 | 10 | 8 | 10—80 |
| | 10 | 8 | 6 | 7 | 9 | 6 | 7 | 10 | 6 | 9—78 |
| | 9 | 10 | 6 | 8 | 7 | 8 | 10 | 6 | 8 | 7—79 |
| | 10 | 10 | 8 | 6 | 8 | 7 | 6 | 6 | 8 | 10—79 |
| Hake | 10 | 7 | 7 | 7 | 9 | 5 | 9 | 6 | 7 | 5—72 |
| Topf | 7 | 5 | 3 | 7 | 6 | 9 | 7 | 4 | 7 | 9—60 |
| | 7 | 7 | 8 | 5 | 6 | 5 | 5 | 10 | 8 | 3—64 |
| | 7 | 3 | 8 | 7 | 3 | 8 | 7 | 5 | 10 | 8—66 |
| | 10 | 7 | 7 | 7 | 5 | 8 | 4 | 5 | 8 | 4—65 |
| Simon | 7 | 10 | 7 | 10 | 3 | 10 | 8 | 8 | 6 | 5—74 |
| | 8 | 9 | 10 | 10 | 5 | 6 | 4 | 8 | 4 | 9—73 |
| | 8 | 9 | 8 | 7 | 5 | 9 | 5 | 5 | 5 | 9—70 |

### Schlicht Rifle Club.

WEST NEW YORK, Nov. 19.—At the weekly gallery shoot of the Schlicht Rifle Club, held at headquarters this evening, the following appended scores were made: Wm. Schlicht 223, Fred. Krobatsch 235, Charley Meyer 236, Geo. Schlicht 244, Geo. Dorr 237, Andrew Deubline 218, Jacob Schlicht 220, Fred. Lambrix 230, Geo. Reichert 225, Aug. Tribout 215, H. Aufder Heide 230, Geo. Lautenberger 235, Aug. Meyer 228.

Medal winners: Geo. Schlicht, champion medal, 244; Fred. Krobatsch, first class, 235; Geo. Lautenberger, second, 235; Charley Meyer, third, 236.

FRED. LAMBRIX, Sec'y.

### Greenville Rifle Club.

GREENVILLE, N. J., Nov. 24.—The weekly competition of the Greenville Rifle Club for class prizes at its headquarters last night brought together 16 members. The following appended scores were made:

First class—M. Dorrler 246, C. Boag 236, Plaisted 239, Robidoux 237, Collins 235, J. Boag 238, Scheeline 235, Lutz 236, Purkess 238.

Second class—Agneau 239, Gotthardt 230, Spahn 226.

Third class—Hill 218, E. Wuestner, Sr., 197. E. Wuestner, Jr., 215, Renker 226.

### Miller Rifle Club.

HOBOKEN, N. J., Nov. 23.—At the weekly gallery shoot of the Miller Club, Nov. 21, the appended scores were made: Meyns 237, Berckman 231, Staden 230, Scott 226, Rogers 221, Dewey 220, Dunstedt 218, Sohl 233, Miller 230, Vogel 229, Vanderheyden 224, Gollon 221, Taylor 220.

## RIFLE NOTES.

A new rifle club was organized last week in West New York, N. J. It will be known as the Unknown Rifle Club; its headquarters will be at Gus Schlicht's gallery. The board of officers are as follows: President, Ernest Engel; Vice-President, George Jobst; Secretary, Fred Metje; Treasurer, Henry C. Zuelch; Sergeat-at-Arm, John Simpson; Captain, George W. Dorr; Shooting Master, George Nagel.

Hoboken, N. J., has for a time had the pleasure of having the only ladies' rifle club (Miller). We learn that Hoboken has become so proud over its first possession that it has come to the conclusion that while one is good two are better, and it now has two lady rifle clubs. They are not to be on the same block, however. The latest addition is known as the Our Own Lady Club.

In looking over the scores of our rifle cranks as they come to us from week in the columns of FOREST AND STREAM, one is sometimes compelled to query as to why it is that there is so much unevenness in the scores of good shots, some high and some low. This matter of uneven scoring by the best of our marksmen is at times quite inexplicable. During a practice shoot in one of our local parks last week we were a witness to an incident in which this extreme uneven scoring was made prominent. One of the shooters present, after making a series of good center shots, started out to make a ten-shot score with the following result: 23 25 24 23 24 22 20 22 24 25—232. After receiving the congratulations of his companions over his brilliant effort this worthy shooter started in to make another effort with this result: 14 21 19 23 18 23 20 25 21 18—202. If some one would find the remedy for this peculiar disease his praises would be sung by all the cranks in the land.

In our last week's notes we mentioned the fact of the organization of a new rifle corps in Brooklyn, the Unique. We have since learned that the new corps is not Unique, but Elite. Our mistake came through our endeavor to help our German informant out of his dilemma in trying to explain the name of the new club to us. Our informant in his explanation described the new corps' name as something "way up" This appeared to us unique in the line of shooting, and our worthy German led us into the error by finally deciding that Unique was the name. The new corps is said to be unusually strong financially, its members being business men of large means.

There will be a monthly meeting of the delegates of the National Shooting Association (Schuetzen Bund) at headquarters, No. 12 St. Mark's place, Friday evening, Nov. 30.

The Hild Rifle Club, with headquarters at No. 425 West Fifty-third street, New York city, held an open turkey shoot on Wednesday evening of this week.

The 100-shot match between Ross and Martin against Dorrler and Busse will be shot at Cypress Hills Park on Thursday (Thanksgiving Day). There will be a large gathering of local riflemen to witness the contest. The make-up of the two teams is such as to make the final result a matter of uncertainty.

Herr Gross, the American representative of the Troisdorf Smokeless Powder, devotes a good deal of time to our local riflemen. He seems to be sanguine in the belief that nitro will soon be extensively used in the sporting rifle. The fact that our large manufacturers have already got their rifle cartridges in different calibers on the market for sale, leads us to infer that the change is coming

Our riflemen will welcome the day that emancipates them from the noise and dirt of black powder; but the emancipation will be long in reaching many of the cranks whose prejudices lie buried beneath years of experience with the powder of their fathers.

We have had many queries put to us of late as to the prospects of another match between our Eastern and far Western riflemen. At the last visit of the California men to Philadelphia in 1876, the Western men made matters very interesting for their Eastern brethren. The national festival in New York next July will no doubt draw the Californians into the competition, and then there will be an opportunity to size and be sized.

Since the telegraph match some years ago between the California team and the Zettlers, the latter have had a sort of inward longing to meet the California representatives in a match where the two teams could come together on the same range. Telegraph matches as a general thing do not give satisfaction to either party engaged in the competition. We had in view something of this kind in the line of matches, when we suggested in Rifle Notes some months ago the idea of adding an extra day to the festival next year to be devoted to team and individual matches. Make it sort of an annex to the great shoot—as it were. Will not our Western correspondent "Roeel" give us an idea as to how our Western friends feel on this subject. Our Eastern cranks have been so long encrusted with the belief that they are real champions that a meeting with the men of the far West might have the same experience (in a figurative sense) in showing the Eastern men their true position that the Chinese are receiving from the Japs at this time.

# Trap-Shooting.

**All ties divided unless otherwise reported.**

**If you want your shoot to be announced here send in notice like the following:**

### FIXTURES.

Nov. 29.—DEXTER PARK, L. I.—Thanksgiving Day shoot at live birds.

Nov. 29.—SOUTH ORANGE, N. J.—First tournament of the South Orange Field Club, under the management of W. N. Drake; targets.

Nov. 29.—CANAJOHARIE, N. Y.—All-day shoot of the Canajoharie Rod and Gun Club. Chas. Weeks, Sec'y.

Nov. 29.—RYE, N. Y.—All-day shoot of the Rye Gun Club; live birds and targets; shooting commences at 10 A. M. E. J. Pope, Sec'y.

Nov. 29-30.—WILMINGTON, N. C.—Eastern Dog and Game Protective Association's tournament; targets.

Dec. 4-5.—BLOOMSBURG, Pa.—Third tournament of the Bloomsburg (Pa.) Gun Club; live birds Dec. 4; targets Dec. 5. W. B. Allen, Sec'y.

Dec. 13.—MORRISTOWN, N. J.—Handicap at 15 live birds, $15 entrance, handicap 26-33yds., class shooting, $25 added to the two high guns.

Dec. 20-21.—ELIZABETH, N. J.—Two days' shoot of the Elizabeth Gun Club; first day, targets; second day, live birds.

## DRIVERS AND TWISTERS.

*Club secretaries are invited to send their scores for publication in these columns, also any news notes they may care to have printed.*

The Bloomsburg (Pa.) Gun Club will hold a two days' tournament on Dec. 4 and 5. The first day all the events will be at live birds, targets being used on the second day. The first event on each day is for the championship of Columbia county, Pa., and is open only to residents of Columbia county. The live bird programme also contains five other events: two are 5-bird races, entrance $4; one a 7-bird, $6 entrance; a 10-bird, $8 entrance and a $2 miss and out to conclude with. The target performance is varied; 10, 15 and 20-target races, at a uniform entrance of 10 cents per target, figure on it; also a miss and out, $1.50 entrance, and also two events at 5 pairs. Hacks will meet all trains on each railroad running to Bloomsburg. Shooting commences at 9 sharp on Dec. 4.

The Riverton Gun Club, of Riverton, N. J., and the New Utrecht Gun Club, with grounds at Woodlawn, L. I., have arranged to shoot two team races at live birds in the near future. The conditions of the race will be 10 men to a team, 15 live birds per man, 30yds. rise, Riverton rules govern in the match shot at Riverton, New Utrecht rules governing the contest at Woodlawn. No dates have been fixed for these matches, but there is every likelihood that the first will be shot at Riverton the middle of December, the return race taking place at Woodlawn, L. I., in January.

The review for 1894, issued by the Interstate Manufacturers' and Dealers' Association, is a comprehensive account of the good work done by the Association during the past year. As a specimen of the printer's art it is equally a success. Talking about the Interstate Association, those Southern gun clubs who would like to hold a successful shoot under the auspices of the Association should lose no time in sending in applications. There's a nice date open in May between the Knoxville and Memphis shoots.

The Sunbury Gun Club, of Sunbury, O., is a new organization created for the purpose of encouraging wing shooting. The officers of the club are E. D. Palmer, Pres.; W. P. Roberts, Vice-Pres.; Fred. Froiser, Sec.; A. G. Stultz, Treas.; I. M. Price and Charles Gaylord, Directors. Great preparations have been made for a good time at the opening shoot on Thanksgiving Day. The members of the young club look for some good sport during the winter months.

The programme of the Thanksgiving Day shoot of the Forest Gun Club, of Philadelphia, Pa., reached FOREST AND STREAM too late for any mention to be made of it. The Forest Gun Club, with grounds at Twenty-seventh street and Lehigh avenue, Philadelphia, is a young organization, but its enterprise bids fair to mark it up a peg or two among the clubs of Philadelphia and vicinity.

The two days' tournament of the Elizabeth (N. J.) Gun Club, the dates of which are Dec. 20 and 21, comes at a time when there is nothing to conflict with it. The club's grounds are well arranged and are also easily accessible from New York city or from any part of New Jersey. Under these circumstances the first bi-monthly tournament of the Elizabeth Gun Club should be a success.

A curious feature in connection with George Work's winning the cup at Carteret last week is the fact that Work did not shoot on the Carteret team that originally won the trophy. When Fred. Hoey twitted him with this after the shoot was over the other day, Work replied, "Well, I helped Carteret to win it, anyhow, by only killing 21 out of 25 when I shot against her team!"

Scott Terry, of Plainfield, N. J., and T. W. Morfey, of Paterson, N. J., shot a match at Benner's Fanwood grounds on Wednesday, Nov. 31. The conditions were 25 live birds, 28yds. rise, 50yds. boundary, $25 a side, use of one hand only. Morfey won easily, scoring 18 to Terry's 8. It is stated that a return match is to come off this week at Paterson.

B. A. Bartlett, of the Burgess Gun Company, of Buffalo, N. Y., is back in the East again after a Western trip which has lasted since he took part in the Chattanooga shoot of Sept. 19 and 20. He is to take part in the Central New York Trap-Shooters' League tournament at Syracuse, N. Y., on Nov. 27 and 28 of this week.

L. S. Thompson, George Work and Fred Hoey expect to take part in the shooting at Monaco during the coming season. The two biggest events are the Grand Casino sweeps, shot on Feb. 4 and 5, and the Monte Carlo sweep on Feb. 7. In each of the above contests the prizes are well worth winning; high guns count.

The Raritan Gun Club of Summerville, N. J., expects to have a shoot on Thanksgiving Day. At their regular monthly meeting last Friday evening arrangements were made for new shooting grounds. The old grounds will be sold by the club for building lots. The club is in a first class condition financially.

Judging from the scores made by the cracks at Chicago, John Watson knows something about picking birds. A race like that championship match at Burnside, if shot in the vicinity of New York city, would draw a crowd of phenomenal dimensions, that is, as far as crowds at pigeon shoots go.

The Central Gun Club, of Harrison, N. J., has elected the following officers for the ensuing year; Jacob Ranser, President; John Floyd, Vice-President; William Coyle, Recording Secretary; John Bradley, Financial Secretary; Joseph Droughton, Sergeant-at-Arms, and Geo. Lloyd, Captain.

The following have been elected as the officers of the Riverton, Pa., Gun Club for the coming year: President, Howard Wills, Jr.; Vice-President, John Bishop; Secretary, J. V. Bishop; Treasurer, U. S. Sever; Captain, Jerome Wills.

The New Utrecht Gun Club has arranged for a special car on the Sea Beach Railroad to leave Third avenue and Sixty-fifth street, city line, at 1:45 and 2:45 every Saturday afternoon for the accommodation of its members who want to go the club's grounds, at Woodlawn, L. I.

The "President's Cup" will be the feature of the Carteret Club's shoots now, until some one wins it five times in succession. The first contest takes place on the first Wednesday in December.

Dr. Carver was to have shot a race with Eddie Bingham on Friday last; the match fell through, it is said, owing to Bingham being out of all form and unwilling to shoot.

Saturday, Dec. 1, the New Utrecht Fall sweepstakes will be shot on the club's grounds at Woodlawn, L. I., the entry list, open only to club members, is limited to 14.

The scene has shifted from the West to the East, Brewer and Elliott are both here and are both talking shoot. "The wind bloweth where it listeth, etc."

Eddie Hill and S. H. Dilts shot a match at Yardville on Wednesday of this week; the terms were 100 birds each, $100 a side.

Among the many attractions for Thanksgiving Day shooters is a live bird shoot at Dexter Park, L. I., for live turkeys.

Brewer and Elliott will shoot five races——sounds familiar?

### Brewer and Elliott Still Talking.

JACK BREWER and Jim Elliott are both in New York city now. Elliott is East on business as well as for pigeon shooting. On Monday he and Brewer happened to meet in the store of the W. Fred Quimby Company. After the usual amount of badinage on the part of Brewer, Elliott stated that he would shoot Brewer a series of five races, two here and two in Kansas City, the fifth anywhere, each race to be for $100 a side and at 100 live birds per man. Elliott stipulated, however, that he must not be asked to shoot within sixty days, as he wanted to get acclimatized properly. Brewer agreed to everything. Not a cent was put up at the time; it was just a verbal agreement.

### The Morfey—Batsch Match.

PATERSON, N. J., Nov. 24.—*Editor Forest and Stream:* Will you kindly allow me a space in your valuable paper, in reference to what was headed "A Public Outrage," to point out where I was protecting my friends, instead of "throwing them down," as you have stated.

In the first place, I did not make the match for $100, neither did I agree to give Mr. Batsch 20 dead birds. It was only a little race at 100 birds for the cost of the 200 birds and a nominal sum.

You also state that it was wondered, at first sight, whether it would be a square race or a fake. Now, I am at a loss to see what reason anybody had for thinking so. Here I have shot twenty-one matches since the 21st day of last January, and have won nineteen out of that number; and I say right here, once and for all, that I do not class myself with any shooter who resorts to such tricks and roguery for the sake of the few dollars he could make that way. His time would certainly be very short among gentlemen; and I have no hesitation in saying that there were some men of that type in the crowd that very day, and they had been laying odds of two to one that I would beat Batsch out by ten birds. They had made arrangements with Batsch to divide their winnings if he missed enough birds to make me beat him that number of birds. As the race was already lost, it could not make any difference to him, and that was their only way to steal a few dollars from my friends, and I happened to hear of their little game and was just clever enough to stop it and save my friends' money.

All of this trouble is caused by two or three $5 bettors from Newark; and their sole object is to injure my reputation among better men than they ever were or ever will be. I am pleased to say that I am a member of the New Utrecht Gun Club, which is composed of gentlemen, and they know me too well to believe any such accusations made against me by a few soreheads from Newark. I cannot understand why a certain class of people are so bitter against me, unless it is that I am English born and came to this country, and have so improved in my shooting as to be able to beat the majority of the pigeon shooters, and do not lay in with them to rob other shooters. I was offered on one occasion $250 to sell a $25 match; and, verily, if I were inclined to be crooked I would accept all such offers.

It is only right and just to add that I do not lay all the blame on Mr. Banks; I do think that he was influenced by the words used by C. H. Townsend and C. M. Hedden; and I know perfectly well that none of that class of men will give me credit where credit is due. I will add that I did not bet one dollar that I would not beat Batsch out by the ten birds. One bet was made by a party on the grounds to that effect at odds of $20 to $10 and the money put up; and after the race the stakeholder had disappeared and has not yet returned.

I did not shoot for any portion of the gate receipts.

T. W. MORFEY.

[In the above communication Mr. Morfey tells what he knows about the circumstances surrounding the match he shot with Frank Batsch, of Elizabeth, N. J., on Nov. 14. While Mr. Morfey finds fault with FOREST AND STREAM's account of the shoot, as reported in last week's issue on several minor points, he does not deny that he was guilty of willfully dropping birds. Mr. Morfey's main grievance appears to be that whereas FOREST AND STREAM stated that by dropping birds, as he acknowledges he did, he thereby lost his friends' money, he actually did the exact opposite—dropped birds in order that his friends might win money. The motive of a jockey who "ropes" a horse is very seldom inquired into.]

### Alex King Can Shoot.

PITTSBURG, Pa., Nov. 23.—The live bird shoot of the Herron Hill Gun Club held yesterday at Brunot's Island was a decided success. There were no less than 18 entries in the 15 bird race, handicaps ranging from 26 to 30yds., entrance $10. Alex King, standing at the 30yds. mark, took first money alone with 15 straight; Elmer E. Sharer, J. O'H Denny and W. S. King divided second with 14. No less than seven tied for third money with 13 out of their 15. In a $2 miss and out with 8 entries Alex King and "Jim Crow" divided the pot, not without a long struggle however, each killing 18 straight before they agreed to divide.

The Denny—Shafer match was won by Denny with the score of 83 to 77; no less than 6 of Shafer's birds fell dead of bounds.

Match, cost of birds and expenses:

| | |

ED. SWARTWOOD.

### Yale—Harvard—Princeton.

HARTFORD, Conn., Nov. 24.—Although the weather was dark and drizzly, there was a good attendance yesterday to see the match between Yale, Harvard and Princeton on the grounds of the Colt Gun Club of Hartford. Everything worked smoothly, and the college boys were satisfied with the management, which was left entirely with the club members. Out of 300 targets thrown not any were broken by the traps, and it was one continual popping till the match was over. Yale won with the small score of 101 out of a possible 150. Harvard was second with 92. Princeton scored 87. Sterling of Harvard had the best score, 26, closely followed by W. Miller of Yale with 25. Among the audience was a 'busful of ladies, probably admirers of the Princetons, as they had an orange flag. The scores were as follows:

Intercollegiate team race, five-men teams, 30 targets per man, 150 per team:

| | |
|---|---|
| **Yale.** | |
| Franklin | 0110110011011110011111111110101—22 |

### Loaded for Bears.

ELIZABETH, N. J., Nov. 24.—Yesterday afternoon a $5 sweep at 7 live birds was shot. First and second prizes were two bear cubs which have been located in the club house for some days. On the first sweep six shooters tied for first and three for second prize. Ties were shot off in the next sweep, same number of birds and entrance money. Lindsley and Hill again tied for first prize, while Charlie Zwirlein won his cub by killing 7 straight. In the end Zwirlein took both cubs home with him to Yardville, where they will be shot for on some future occasion. Scores:

| | No. 1. | No. 2. | | No. 1. | No. 2. |

This afternoon about 200 people were on hand to see a match between Batsch and Ross, but as Batsch's backers failed to show up the shoot was off. His backers did not tell him they would "squeal" until near noon on Saturday. Ross of course claimed forfeit. The following sweepstakes were shot, Nos. 1 and 2 at 10 birds, $5 entry, two moneys, No. 3, 7 birds, $5, two moneys:

## New Utrecht Gun Club Scores.

THIRTEEN members of the New Utrecht Gun Club put in an appearance on Saturday last, Nov. 24, at the club's grounds, Woodlawn, L. I., and entered their names for the club race at ten live birds, handicap allowance. The birds were excellent flyers and no true straight scores were made, although C. T. Pennington and E. Lohman, both class C. men, tallied ten with the aid of their full handicap allowances. With such men entered as Capt. Money, C. Furgueson, Jr., Nostrand, Coulston, Morfey and W. F. Sykes, this speaks volumes for the class of birds provided. The result of Saturday's race leaves Conny Furgueson, 3d, C. A. Sykes and T. W. Morfey all bunched for first place. Morfey and Conny being a tie. The little fellow drew some hard birds, his 10th being particularly swift. Such a lot of twisters as were trapped during the afternoon are very seldom seen at an ordinary club shoot.

After the club race ten men entered a five-bird sweep, $2 entrance, class shooting. Although it was a short race, Fessenden alone killed all and took first money. In a second event of a precisely similar nature with nine entries, four men killed straight. Two miss and outs, $2 entrance, brought the afternoon's sport to a close. While these events were being shot, the lamps of New Utrecht shone brightly on every hand.

Prior to the club race Capt. Money and C. Furgueson, Jr., shot a match for the price of the birds. The conditions were 50 live birds per man, 30yds. rise and 50yds. boundary. Capt. Money was shooting in good form, being quick with his first and centering his birds well. He won easily by 10 birds, killing 45 to 35. The birds were corkers, which, added to Furgueson being out of all time and form, resulted in his poor score. His start was disastrous enough; he dropped four out of his first six shot at. The way he undershot all birds alike proved very conclusively that his gun is far too crooked for live birds. Capt. Money lost but one bird in his first 25, his 18th bird, a low swift driver, which fell dead out of bounds. Furgueson had no less than five dead out of bounds out of his 15 missed birds. Capt. Money, of course, shot E. C., 50grs. of it; Furgueson stuck to Schultze, his load being 44grs.

Scores of the afternoon's work are as follows:

Match, C. Furgueson, Jr., vs. Capt. Money, 50 live birds, 30yds. rise, 50yds. boundary, loser to pay for birds:

*Trap score type—Copyright 1894, by Forest and Stream Publishing Co.*

C Furgueson Jr 0 1 2 • 0 0 1 1 2 1 2 2 2 2 0 0 2 1 • 2 2 2 2 0 2 2—17

## Work Won the Cup.

THE sixteenth and, as it proved, the final contest for the $1,000 inter-club cup, won by the Carteret Club last year, took place on Wednesday, Nov. 21, at the grounds of the Carteret Club, Bergen Point, N. J. The day was a poor one for pigeon shooting, there being scarcely a breath of air; added to this, the sky was overcast and rain was falling when the members got together and shot a few practice birds prior to the main event of the day. Then the sun came out and the rain cleared away, but for all that could be seen of the northern shore of Newark Bay from the club house, that body of water might have been the Atlantic Ocean itself. Occasionally a stray tug would steam past showing up dimly in the haze; gliding through the unruffled waters of the bay, it was soon swallowed up by the incipient fog which later on in the afternoon caused considerable delay to traffic on the North and East rivers. Shortly after 4 the fog swept down in earnest and very nearly put an end to all further shooting. As it was, the hour of 5 had struck, and it was quite too dark to see with anything like certainty when Knapp missed his 4th bird in the third miss and out, ending the shoot for the afternoon.

George Work, Fred Hoey and Capt. Money of course were on hand to have a try for the cup. Each had four wins to his credit; another victory to either of them meant good-bye to the $1,000 cup for the balance of the members. J. Knapp, with two wins to his name, also took part in the race and, as it turned out, gave George Work a tough nut to crack before he ultimately won out when Knapp missed his 10th bird in the ties. There were seven entries, L. S. Thompson, Fred Hoey, Capt. Money, George Work, J. S. "Williams," J. Knapp and Schultze. The last named dropped out on the 10th round, lack of practice causing him to drop three birds out of his first ten. Capt. Money lost his 2d and 4th dead out of bounds and retired at the end of the 11th round, being beaten by a right-quarterer that was fast enough and tricky enough to suit anybody. The next to drop out was Fred Hoey, who had shot well but had drawn a remarkably hard lot of birds. He went out on the 20th round, being followed on the next round by "Williams" and Thompson. "Williams's" work throughout the race was hardly up to his form; there were reasons for it, however, chief among them being a long railroad trip from the West. Thompson, one of the best shots in the club, has been pursued by the hardest kind of luck in these contests. This is well evidenced by the fact that he has not a single win to his name out of all the 16 races. He was shooting well on this day, and up to the 15th round had shot quick and cleanly; he had had none the best of it either in the matter of birds; note the flight of his first 14 birds. Then came a break; he dropped his 15th, 18th and 21st birds, each one of these precisely similar in flight—left-quartering incomers, and easy ones at that; his 18th fell dead just behind the score, but his other two lost birds were apparently almost unharmed.

It thus remained for Knapp to fight it out with Work. A good deal depended on the result; if Work won, the cup was his; if Knapp came out ahead, it gave him three wins, while Hoey, Money and the others would still have had a chance for the cup. Knapp's 8th bird fell dead out of bounds; he then killed out straight; Work missed his 19th bird, an easy one, although a driver; killing his next 6 he tied with Knapp. The rule is to shoot off the ties in this race at 5 birds. In the first series both killed their 5; in the second series Work killed all his birds, while Knapp let a left-quarterer get away from him, although he filled it full of shot. This gave the cup to George Work. That he had had to shoot to win it is shown by the scores he made in the last two contests: Nov. 7, 24 out of 25; Nov. 21, 34 out of 35, a total of 58 out of 60 birds at 31yds. rise.

In the matter of birds Work had somewhat the best of it at the start, although it should be stated to his credit that at no time did he allow his birds to have a chance of becoming hard; he snapped them up right close to the trap. His score shows 13 first-barrel kills out of his 25 birds; he also used his second for safety five time on his remaining 12 birds. His judgment of place, etc., was very accurate, and the judgment with which he used his second barrel on his last bird in the ties (a dark brown bird, that started as a driver, but on being hit with the first barrel turned to the right) would be hard to beat.

Knapp deserves special mention for the nerve he displayed in this contest. He made some really remarkable second barrel kills, particularly in the ties, and although under the whip all the time after his bad luck with his eighth bird, he was as cool as the proverbial cucumber. His total for the day when all was over was 48 out of 51.

Scores, cup race, club handicap rise, 25 live birds per man, 50yds. boundary:

| Work (31) | 111212111—9 | 120—2 | ..... |
| Chapin (26) | 1211220 —6 | ..... | ..... |

At the close of the cup contest Work, who is president of the Carteret Club, announced that he would donate a cup, value $500, to be known as the President's Cup, to be competed for on almost precisely the same terms as that under which he had won the other cup. The main difference in the conditions is that the races will be at 20 birds instead of 25, and that ties will be shot off miss and out instead of in series of 5 birds. The first contest for the President's cup is set for Wednesday next, Dec. 4. Five wins will make any club member the owner of this cup.

## Kansas City Defeats Ottawa.

KANSAS CITY, Mo., Nov. 23.—The Metropolis Gun Club, of Kansas City, Kan., held an all-day Peoria blackbird shoot at the Fowler shooting grounds on Tuesday of this week. The feature of the day was a team race between the Metropolis Club and the Ottawa (Kan.) Club, eight men to a team and each man shooting at 25 targets. It was to have been a three-cornered shoot, with Leavenworth in, but the Leavenworth team failed to put in an appearance. The Metropolis Club presented a strong team and won rather handily. Scores follow:

Team race, 200 targets to a team, everything known:

## After the Ball.

CHICAGO, Ill., Nov. 24.—Since the great championship race of last week there has been much more talk of pigeon shooting in Chicago than actual matches shot. In fact, the great shooting carnival that was promised with the advent of Dr. Carver, seems to have rather ingloriously petered out. The Doctor has seemingly been ready at all times to fulfill his various engagements, but a number of the men who had expressed an ardent desire to meet him became suddenly troubled with heart-failure after Carver had disposed of Mott with a score of 95, and of Kleinman with 91. The Doctor's form has greatly improved since his first appearance here, and he could undoubtedly make matters very warm for almost any one now.

Of all the concourse of shooting men who have been here during the past two weeks, but three have been consistently willing to shoot, and these have been Carver, Brewer and Grimm. The latter left here on Monday last much disappointed because his two weeks' visit had produced but one match, that with Carver on Nov. 17. He was very anxious to meet the Doctor again in a series of three races, but the latter declined until he had met all the others who had talked shoot. The little Iowan was unable to remain here longer, but he was anxious to impress upon me the fact that he would meet any one, barring Brewer, and that he would come at once to Chicago on receipt of a telegram advising him of a match.

He was particularly warm on Elliott's trail, but the latter advanced the plea that there was no chance for gate money in Chicago, and he deemed it only right that in some way the birds should be paid for at least. Still Elliott knew in advance that there was no gate here, so some people have asked why he came at all, seeing he would not shoot here.

Brewer had in my hands for a full week, a forfeit of $200 to bind a race with Elliott for $500 a side at 200 birds each, but Jim declined to consider it. None of the other shooters wanted any of Brewer's game, so he was obliged to depart for the East without a match. Before he left, however, he and Carver agreed, so I learn, to shoot a series of ten matches at various points, during the winter. This would have much the flavor of a hippodrome, and unless the Eastern shooters are less wary than their Western confreres, will receive little patronage. We don't like such things out here.

Carver's conduct during his visit here has been thoroughly gentlemanly and sportsmanlike, and he has created a most favorable impression. He has demonstrated his willingness to fulfill all actual or implied engagements. I should like very much to see a race between him and Abe Kleinman, who, I think, could give the Doctor a hard fight. Probably that will not take place however, as Abe has been shooting little of late.

There was talk of a match or matches between Carver and Ed. Bingham, but the latter, I believe, did not consent to the date proposed by Carver, and as yet the races hang fire. In fact, I see no good prospect for the Doctor getting on any more matches with the local shooters, and as the oursiders have all left Chicago, it is by no means improbable that Carver himself will shortly follow their example, and thus will end what promised to be a memorable meeting of expert shots, with matches enough to settle a number of disputes.

Carver's match with Grimm, shot on Saturday, Nov. 17, was a peculiar example of the saying that a pigeon match is never out until the last bird is shot. Grimm missed 8 of his first 20 birds, and was 7 behind on the 27th round, yet he shot with dogged persistence, and finally won with a margin of 3 birds. Carver's shooting in this race was dreadfully ragged at the close, and he seemed much annoyed at his defeat.

In the afternoon of the same day, Carver shot a match with Mr. R. S. Mott, a local amateur who shot under the name of "Robin" in the championship shoot. The Doctor's complete reversal of form in this match from his performance in the morning, was remarkable. He killed his birds cleanly and in excellent time, and achieved the excellent total of 95. Mott's 89 was very creditable.

On Monday, the 19th, Carver and Geo. Kleinman met in a match for the regulation $100 a side, and the new champion met decisive defeat. Kleinman apparently had the race up to 60, but struck some bad luck, and, probably through loss of nerve, made bad shooting to the finish. Carver closed remarkably well, killing his last 40 in grand style. The day was bright, with a good breeze from the southwest, and the birds a good lot.

The details of the score were as under:

*Trap score type—Copyright 1894, by Forest and Stream Publishing Co.*

The most remarkable lot ot birds that have been furnished for a match in Chicago this year greeted Dr. Carver and J. D. Smith in their contest on Tuesday. A regular gale was blowing and this made the shooting the most difficult imaginable. John Watson, who adores good birds, says that Carver's score of 82 was the best shooting he has seen for a long time, and the best race the Doctor has shot here. Smith, who is a veteran duck shooter living at Evanston, likewise shot well, his score of 77 being excellent, considering the birds.

W. P. MUSSEY.

## Trap at Little Rock.

LITTLE ROCK, Ark., Nov. 22.—The eleventh contest for the Pulaski county medal took place on the club grounds to-day. The weather was very unfavorable for target shooting. It was dark and gloomy at times, then occasionally the sun would shine for a few minutes, after which it would become cloudy again. This made the light very uncertain, and as the targets were thrown very low they were quite difficult to see. The scores made under existing conditions taken as a whole were very good.

Dickinson won the medal at the previous contest and to-day he successfully defended it. The pace he set (45 out of 50) was just a little too hot for the boys; Duley was right after him with 43. When each had shot at 25 birds Duley led with 23, but he was unable to keep up this pace, and Dickinson soon passed him. After the first 25 he was compelled to change loads, not having any more of the kind he was accustomed to, and the substitute being much slower, this in a measure accounts for his falling down. Irwin did not shoot up to his usual form, being handicapped by having a new gun, this being the first time he has shot it at the trap. He says, "Just wait until I get used to my Smith ejector."

Medal contest, conditions 50 singles, unknown angles:

PAUL R. LITZKE.

## New Jersey Trap-Shooters' League.

THE fourth season of this successful organization will commence with the coming new year. The tournaments have during the past three years been the most successful of any held in the East; have been the means of bringing together members of gun clubs who would have otherwise remained strangers and have fostered a gentlemanly spirit of rivalry at the traps. The cost of joining the League is but trifling (initiation fee $3, annual dues $3, prize fund $5) and clubs have the advantage of a fine tournament each season on their own grounds, besides attending others which will be held monthly. Secretaries of clubs desiring to affiliate will please send their names and addresses to the undersigned who will furnish all information.

W. R. HOBART, Sec'y N. J. T. S. L.

246 MOUNT PLEASANT AVENUE, Newark, N. J.

## "Trap-Shooter's Ready Reckoner."

THERE has just come from the FOREST AND STREAM press an extremely useful pocket reference book for trap-shooters. Its full title reads: "Trap-Shooter's Ready Reckoner. A series of tables showing at a glance the division of purses under all conditions, simple and complex, with entries from one to fifty. For use by individuals, clubs, and tournaments. Compiled by J. C. Clark, Secretary Kansas State Sportsmen's Association." Price 25 cents, postpaid, by Forest and Stream Pub. Co.

## The Interstate's Review.

THE Interstate Manufacturers' and Dealers' Association has issued a review of the work done by the Association during the year of 1894. Compared with the showing made in '93, the figures for 1894, given in the recapitulation show a marvelous advance over those of the preceding year. The review, which is given below in detail, is good and interesting reading. A comforting feature is the vast increase in the number of shooters who took part in the various events. In 1893 231 shooters recorded their names on the score sheets of the Interstate Association. This year the large number of 589 entered their names on the list. If this does not mean that trap-shooting is still booming and that the Interstate Association's shoot are popular with shooters, what does it mean?

To come down to figures, the Association actually gave nine tournaments; the following list give the dates and places of the tournaments: Grand American Handicap, April 4, 5, 6; Pittsburgh, Pa., April 17, 18, 19; Springfield, O., May 2, 3; Chicago, Ill., May 17, 18, 19; Grand Rapids, Mich., May 30, 31, June 1; Elwood, Ind., June 27, 28; Louisville, Ky., July 18, 19; Chattanooga, Tenn., Sept. 19, 20; Charleston, S. C., Oct. 10, 11.

On Aug. 21, 22, 23 and 24, the Interstate Association's paraphernalia was doing good service at the Pennsylvania State shoot, held at Wopsononock, Pa., under the auspices of the Altoona Rod and Gun Club. The Association's manager had complete control of the management of that shoot, and its figures are very properly included in the review of the year's work.

The following is a list of the officers of the Association, which was incorporated nearly two years ago—Dec. 27, 1892:

Directors—Chas. Tatham, President; O. D. Delano, Vice-President; Justus Von Lengerke, Secretary; J. A. H. Dressel, Treasurer; Geo. H. Sampson, H. A. Penrose, Noel E. Money, Elmer E. Shaner, Manager.

Executive Committee—J. A. H. Dressel, Chairman; Chas. Tatham, Justus Von Lengerke.

Classification and Tournament Committee—Justus Von Lengerke, Chairman; Noel E. Money, H. A. Penrose.

Club Organization Committee—H. A. Penrose Chairman; Noel E. Money, Justus Von Lengerke

The introduction to the Review states, *inter alia*, the policy of the association both in the past and in the future, and is as follows:

"Four years have elapsed since the inception of the Interstate Manufacturers' and Dealers' Association, and the indefatigable zeal of its founders has borne fruit so rapidly that its name is now familiar to the sportsmen and gun clubs of America.

"In the following pages will be found a carefully collated and absolutely correct transcript of all the interesting data and summary of the work done during the season of 1894.

"Although the past year has been fraught with financial disturbances extending throughout the entire country, the success achieved by the Association is well nigh phenomenal, and has exceeded the anticipations of even the most sanguine. In this connection it may be noted that the success attained is not to be alone measured by the number of targets thrown, but by the stimulus trap-shooting has received, and the assistance and encouragement rendered; which served to create a healthy and permanent growth of the many gun clubs throughout the country.

"Continuing as before, on the broad-gauge plan and apart from the beaten tracks, being equipped with all necessary paraphernalia, latest electric apparatus and conservatively managed, we predict for the future even greater successes than achieved in the past.

"Our tournaments for the season of 1895 will be characterized by the same liberality of management and fairness that has won for us the enviable position we have attained in the trap-shooting world."

Each tournament is then reviewed in detail. Facts and figures that are of any interest and which may tend to show the success of each individual tournament, are set forth. The recapitulation which brings this review to a close, is by no means the least interesting portion of the work.

### Grand American Handicap.

The inaugural tournament for 1894 was the second annual grand American handicap at live birds, which was decided at Dexter Park, L. I., April 4, 5 and 6. The Interstate Manufacturers' and Dealers' Association guaranteed $1,000 (and all surplus added) in the main event, which was shot under the following conditions, viz.: 25 live birds, $25 entrance, 50yds. boundary, with a dead line at the 33yds. mark and handicaps ranging from 25 to 33yds.

There were 53 entries and one forfeit, making the total purse amount to $1,335.

Thos. W. Morfey, 28yds., won first money.....$667 50
Capt A. W. Money, 30yds., won second money..... 400 50
Fred G. Moore, 29yds., won third money..... 267 00

Thos. W. Morfey, on the 28yds. mark, and Capt. A. W. Money on the 30yds. mark each killed 25 straight. They shot off for first and second places at 10 birds, then miss and out, with the following result:

T W Morfey (28yds.).....0022222222—8 21—10
Capt A W Money (30yds.).....2201122102—8 20— 9

This was one of the best exhibitions of the day, every bird being a fast one and over one-half of them being veritable "hummers."

Seven of the contestants killed 24 birds each and were in the tie for third money, which was shot off at two rounds of 10 birds, then miss and out, with the following result:

| | | |
|---|---|---|
| F G Moore (29yds) | 2•22212222—9 | •022121110—7 1 |
| W J Simpson (29yds) | 2112221220—9 | 22•2•01212—7 0 |
| E D Fulford (33yds) | 2220222222—9 | 20200110w |
| J L Smith (28yds) | 11•2122210—8 | ..... |
| F Walters (29yds) | 0222022•12—7 | ..... |
| J F Kleinz (31yds) | 2222•21•w | |
| W M C Jones (27yds) | 2•22220w | |

Seventy-three shooters took part in the tournament and $3,216 was divided in different purses. The total number of live birds trapped was 2,655.

### Pittsburgh, Pa.

The second tournament was given at Pittsburgh, Pa., April 17, 18 and 19, under the auspices of the Pittsburgh Gun Club and the Iroquois Rifle Club.

The first day was devoted to the shooting of a handicap target race under the following conditions: 100 to 125 targets, entrance $5 and price of targets, 16yds. rise, 4 moneys, novelty rule to govern.

There were 44 entries, making the total purse amount to $220.

J Von Lengerke (100 targets) scored 99 and won first money.....$88
C. Hamilton (117 targets) scored 97 and won second money..... 66
W. G. Clark (110 targets), H. J. Levis (115 targets) scored 94 and won third money..... 44
Jim Crow (105 targets), C. Kochendorfer (118 targets) scored 93 and won fourth money... 22

BEST AVERAGES SECOND DAY:

J E Wright, first.....91 13-17 per cent.
Chas Crosby, second.....90 10-17 " "
F V Van Dyke, C A Young, third.....89 7-17 " "

BEST AVERAGES THIRD DAY.

R O Heikes, first.....92 per cent.
E D Fulford, second.....90 " "
E H McWhorter, third.....88 " "

The total number of shooters taking part in the tournament was 86. Average entry first day, 44; average entry second day, 55 3-5; average entry third day, 39.

The total amount of money divided in purses was $1,329 92; 17,256 targets were trapped during the tournament; $110 was added to the purses by the Pittsburgh Gun Club and the Iroquois Rifle Club.

### Springfield, O.

The third tournament was given at Springfield, O., May 2 and 3, under the auspices of the Springfield Gun Club.

BEST AVERAGES FIRST DAY.

E D Fulford, first.....18 14-17 per cent.
D A Upson, second.....86 8-17 " "
R O Heikes, J A Ruble, third.....85 5-17 " "

BEST AVERAGES SECOND DAY.

D A Upson, first.....89 7-17 per cent.
E D Fulford, R O Heikes, second.....87 11-17 " "
J P Easton, third.....85 15-17 " "

The total number of shooters taking part in the tournament was 39. Average entry first day, 20 7-10; average entry second day, 16 4-5. The total amount of money divided in purses was $833. 7,940 targets were trapped during the tournament. $200 was added to the purses by the Springfield Gun Club.

### Chicago, Ill.

The fourth tournament was given at Chicago, Ill., May 17, 18 and 19, under the auspices of the Prairie Gun Club. Continuous bad weather marred what promised to be the grandest tournament ever given. The conditions under which the tournament was held are fully explained in the following account taken from FOREST AND STREAM of May 26:

"The weather was an assorted lot of the Chicago article. In the first two days there were distinct samples of torrid midsummer, cold weather, snowstorm, rainstorm, hailstorm, gentle breeze, high wind and perfect calm. On Friday there was such a raw, stiff half gale, with rain and snow, that it was deemed best to postpone the inanimate target events to the next day. The shoot was thus most seriously injured by the weather. It injured a most perfectly equipped and arranged tournament for which the Interstate Association is justly deserving of credit. The Interstate never gave a better shoot so far as the Interstate was concerned, and the whole made as pretty an exhibition of the modern tournament as has been seen up to date."

WINNERS OF THE STAKE EVENTS.

*Inanimate Targets.*

Lake Street Elevated Gold Cup (Novelty rule championsip)—R. O. Heikes, score 81 out of 100.

Barnard Sweepstakes (Novelty rule)—Dr. H. Frothingham and Mr. Welburn, score 19 out of 25

Sportsmen's Review Trophy (Novelty rule)—J. E. Haggerty, score 23 out of 25.

Santa Fé Equipment (Novelty rule)—D. A. Upson, score 39 out of 30 singles and 10 pairs.

Clabrough Contest—J. A. Ruble and G. W. Rexroat, score 43 out of 50.

Young Sportsmen's Contest—Master Bisson, score 3 out of 10.

*Live Birds.*

J. A. Ruble, second.....87 10-17 " "
C. A. Young, A. Livingurth, third.....87 1-17 " "

The total number of shooters taking part in the tournament was 38. Average entry first day, 23 9-10; average entry second day, 18 3-10. The total amount of money divided in purses was $922. 7,530 targets were trapped during the tournament. $200 was added to the purses by the Elwood Gun Club.

### Louisville, Ky.

The seventh tournament was given at Louisville, Ky., July 18 and 19, under the auspices of the Kentucky Gun Club.

BEST AVERAGES FIRST DAY.

R. O. Heikes, first.....95½ per cent.
E D. Fulford, second.....92 " "
E. D. Rike.....90 " "

BEST AVERAGES SECOND DAY.

R. O. Heikes, first.....91 per cent.
J. A. Ruble, second.....90½ " "
E. D. Fulford, third.....89 " "

The total number of shooters taking part in the tournament was 42. Average entry first day, 24 3-5; average entry second day, 15 4-5. The total amount of money divided in purses was $1,030. 8,840 targets were trapped during the tournament. $250 was added to the purses by the Kentucky Gun Club.

### Altoona, Pa.

The eighth tournament was the State Shoot of the Pennsylvania State Sportsmen's Association, which took place at Wopsononock, Altoona, Pa., Aug. 21, 22, 23 and 24, under the auspices of the Altoona Rod and Gun Club. At the request of the Altoona Rod and Gun Club, the entire outfit of the Association was used at this shoot, which took the place of our regular August tournament.

BEST AVERAGES FIRST DAY.

E D Fulford, first.....96 per cent.
W J Vance, second.....92 " "
H W Thurman, third.....91 " "

BEST AVERAGES SECOND DAY.

W H Wolstencroft, first.....95 5-7 per cent.

The total number of shooters taking part in the tournament was 58. Average entry first day, 30 4-5; average entry second day, 32 1-7; average entry third day, 32; average entry fourth day, 23 2-3. The total amount of money divided in purses was $3,520.75; 21,940 targets and 1,141 live birds were trapped during the tournament.

### Chattanooga, Tenn.

The ninth tournament was given at Chattanooga, Tenn., Sept. 19 and 20, under the auspices of the Chattanooga Gun Club.

BEST AVERAGES FIRST DAY.

R O Heikes, first.....92 per cent.
F C Etheridge, second.....87½ " "
B A Bartlett, third.....84⅔ " "

BEST AVERAGES SECOND DAY

R O Heikes, first.....93⅓ per cent.
J E Legler, second.....89½ " "
F H Woodworth, third.....88⅔ " "

The total number of shooters taking part in the tournament was 46. Average entry first day, 21 4-5; average entry second day, 28 2-5. The total amount of money divided in purses was $1,398.50; 11,985 targets were trapped during the tournament; $200 was added to the purses by the Chattanooga Gun Club.

### Charleston, S. C.

The tenth tournament was given at Charleston, S. C., Oct. 10 and 11, under the ausplces of the Palmetto Gun Club. The tournament was held under very adverse circumstances, which is fully described in the following account taken from the *American Field*, of Oct. 30:

"All arrangements had been made for the opening of the tournament, when a severe storm swept along the Atlantic Coast and struck Charleston in all its fury, leaving wreck and ruin in its path. Hibernian Park, where the tournament was held, was a sight to behold; tents, screens, blackboards and stands were razed to the ground and a foot of water stood everywhere. This was the state of affairs when the storm abated the night previous to the day advertised for the opening of the tournament. The attendance was light, which was due to the threatening weather previous to the tournament."

BEST AVERAGES FIRST DAY.

F V Van Dyke, W E Post, first.....86⅔ per cent.
B H Worthen, second.....82⅔ " "
U M C Thomas, Capt Geo Swan, third.....77⅓ " "

BEST AVERAGES SECOND DAY.

F V Van Dyke, first.....85⅓ per cent.
Geo Peterman, second.....79⅓ " "
B H Worthen, third.....76 " "

The total number of shooters taking part in the tournament was 20. Averave entry first day, 14 2-5; average entry second day, 12½. The total amount of money divided in purses was $545 50; 4,455 targets were trapped during the taurnament; $100 was added to the purses by the Palmetto Gun Club.

RECAPITULATION.

In the summary a comparison is made with the tournaments of 1893. This will in a measure convey a slight idea of the success attained during the season of 1894.

| | 1894. | 1893. |
|---|---|---|
| Shooters taking part | 589 | 231 |
| Live birds trapped | 5,831 | 1,356 |
| Targets trapped | 111,405 | 37,580 |
| Money divided in purses | $17,301.17 | $5,610.75 |

Our season for 1895 will open with the Grand American Handicap at live birds, April 3, 4 and 5. The target season will commence about April 15 and end about Oct. 1. Clubs desiring tournaments should make early application for same.

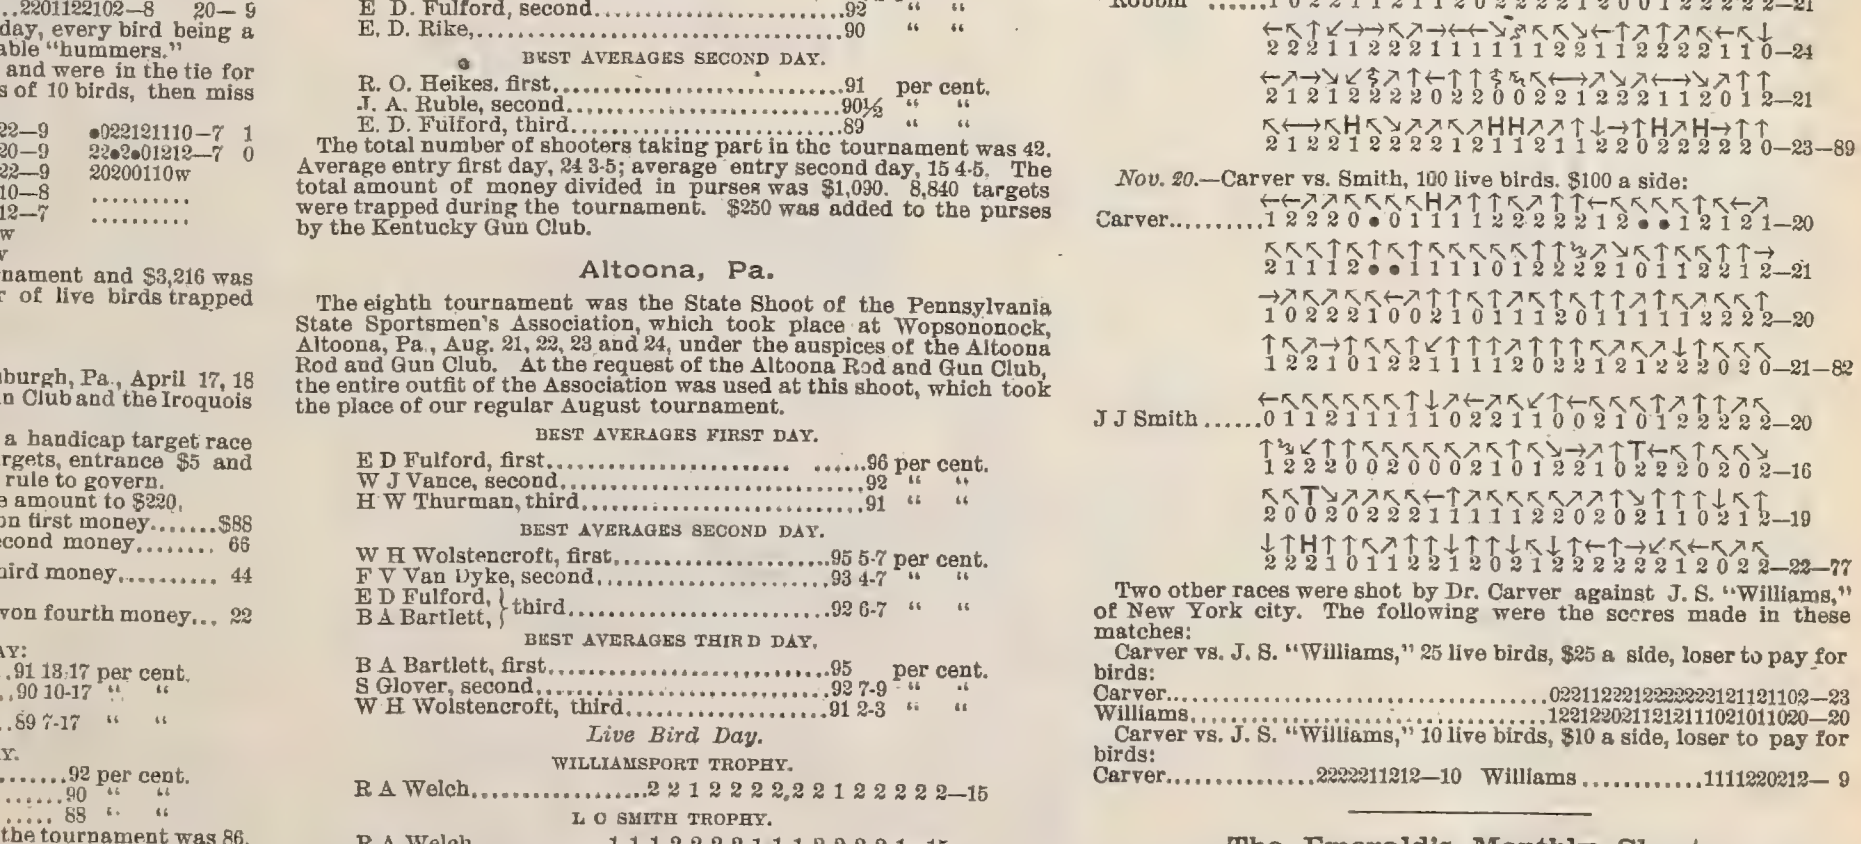
INTERSTATE MANUFACTURERS' AND DEALERS' ASSOCIATION.

## Carver Takes Four Scalps.

CHICAGO, Ill., Nov. 20.—Between Nov. 17 and 20 Carver has shot five matches and taken four scalps. Three of the races were 100 bird matches, $100 a side; one was at 25 birds for $25; the other a 10 bird race for a single tenner. The totals show that he scored 294 out of a possible 335, against his opponents' scores of 292. Charlie Grimm, of Clear Lake, Ia., beat Carver by 3 birds, scoring 87 to the Doctor's 84. Against "Robin," a well-known member of the Garfield Gun Club, Carver rolled up 95 against "Robin's" 89; the birds in this match, judging from the flights given, do not seem to have been of the same caliber as those in his match with with J. J. Smith, a member of the Evanston (Ill.) Gun Club on the following day. On this occasion Carver dropped no less than 18 birds; his opponent, however, accommodated him by dropping just 5 more.

A peculiar feature of the Carver—"Robin" and the Carver—Smith matches was the way in which the traps fell to the different shooters. It will be noticed in the Carver—"Robin" match that although the way the traps fell was eccentric, No. 3 and No. 4 being pulled 126 times out of a possible 200, yet the division of the traps was very equitable after all. In the Carver—Smith match, Smith drew end traps 47 times to Carver's 34, no slight disadvantage on fast birds. The following tables show how the traps fell:

| | 1 | 2 | 3 | 4 | 5 | | 1 | 2 | 3 | 4 | 5 |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Carver | 10 | 7 | 32 | 31 | 20 | Carver | 14 | 22 | 20 | 24 | 20 |
| "Robin" | 18 | 16 | 31 | 32 | 13 | Smith | 24 | 17 | 19 | 17 | 23 |



Details of the scores are given below:

*Nov. 17.*—Carver versus Grim, 100 live birds per man, $100 a side, each man to pay for his own birds:

*Nov. 19.*—Match, Carver versus "Robin," same as above:

*Trap score type—Copyright 1894, by Forest and Stream Publishing Co.*

*Nov. 20.*—Carver vs. Smith, 100 live birds. $100 a side:

Two other races were shot by Dr. Carver against J. S. "Williams," of New York city. The following were the scores made in these matches:

Carver vs. J. S. "Williams," 25 live birds, $25 a side, loser to pay for birds:

Carver.....0221122212222222221211211102—23
Williams.....1221220211212111021011020—20

Carver vs. J. S. "Williams," 10 live birds, $10 a side, loser to pay for birds:

Carver.....2222211212—10 Williams.....1111220212— 9

## The Emerald's Monthly Shoot.

TUESDAY, Nov. 20, saw no less than 30 members of the Emerald Gun Club gathered together at Dexter Park, L. I., the occasion being the monthly shoot of the club at live birds. Large as is its membership, an attendance of 30 shooters speaks well for the system which provides these shoots. Unlike most clubs, the Emerald Gun Club is an expensive one to belong to if you don't take part in these monthly shoots. But, if you attend regularly and take your *pro rata* share of the birds killed, the debit and credit columns of your account will very nearly balance. When you've figured up the fun you've had and added that in, it will be highly probable that you'll find yourself a debtor to the club.

Tuesday, Nov. 20, was about an ideal day for pigeon shooting; barring the cold frosty air, it needed only a brisk wind aiding the birds to make it perfect. At the start the birds were a good lot, but taken as a whole they were very uneven; just that class of birds that knock out straight scores. Three or four slow ones and then a corker; that's what tells. As a consequence not a single straight score of 10 was made. At the end of the 5th round S. H. Moore and Dr. Leveridge were the only ones out of the 30 who had toed their marks that had 5 kills to their credit. Moore lost his 6th bird, dead out of bounds, right at the score. Dr. Leveridge slipped up on his 8th bird, a comparatively easy incomer, thus spoiling the last chance of a straight score. There were no less than 9 nines and 8 eights. Scores follow: Club point handicap, 10 live birds per man:

## The Effect of the Wadding Material Upon the Performance of Shotguns.

BY ARMIN TENNER,

Superintendent American Testing Institution.

[*Continued from page 459.*]

The test was commenced with what may justly be termed purely experimental wadding.

SERIES 1.

Load 1—3 drms. DP. Eagle Ducking blk. powd.=85 gr., in Black Club shell, 1 U.M.C. cb. w., 12 ga.; weight 7 gr., diam. 0.748045 in., 0.118112 in. thick, 1⅛oz. No. 7 shot=344 pellets; av. v. 910 ft. sec., great. diff. 70 ft. sec.; av. gpr. 3450 lbs., great. diff. 600 lbs.

Pattern 1, Parker gun.....av.(7) 108, great. diff. 42 pellets.
" 2, Remington gun.....av.(4) 140 " " 60 "
" 3, Francotte gun.....av.(7) 201 " " 43 "
" 4, Greener gun.....av.(8) 109 " " 47 "
" 5, Tenner gun.....av.(5) 185 " " 50 "

Load 2—3 drms. Sch.=44 gr., Smokl. shell, 1 cb. w.; av. v. 926 ft. sec., greatest diff. 54 ft. sec.; av. gpr. 4950 lbs., great. diff. 540 lbs.

| Pat. | | | Pellets. | Pat. | | | Pellets. |

In glancing over the results achieved with these purely experimental waddings we are confronted by several surprising facts. In the first place the values obtained with 3drs. Schultze h. g. powder, wadded with one common cardboard wad only, are certainly contrary to all theories on interior ballistics. The figures show that if one gets pushed hard for wadding, he can try his luck with a simple cardboard wad. It is evident that Schultze powder is not so very susceptible to inferior wadding material as might be supposed. The black powder, too, did fairly well with the cardboard wad only. Cotton padding appears to lack density and rigidness. It cannot be employed in breechloading guns. Neither the single regular black-edge nor the trap or field wad alone appear to answer for any of the propelling agents employed. Some powder seems to do better with the former, some with the latter; but for general use they do not answer much better than the cardboard wad. No balling of shot was experienced with any of the wads so far employed, a fact which will be recalled later on. Fairly good results were obtained with the paper filler wad; but this wad has one fault in common with all other wads so far mentioned—it fails to produce regularity.

Schultze powder performed quite well with the 16 ga. felt and 2 12 ga. cardboard wads. Neither of the powders did well with the brown elastic dry felt wad. This is probably due to the fact that this wad is rather spongy and the cohesive quality of the felt is not what it might be. The result with this wad seems to show that a wad must have a certain degree of density; i e., be of sufficient hardness.

The results obtained with the loads 26, 27, 28, and 29 go to show that wads should be seated horizontally in the shell, and the figures secured with load 31 teach us to employ wads of even thickness. It did not appear necessary to subject all the powders to this test, inasmuch as those used furnish a pretty good basis for applying the results obtained generally. Schultze's behavior with the cardboard wad may be regarded as an exception—perhaps as an accident. It would be entirely out of place to draw any conclusion at this early stage of the test and before we have seen what can be accomplished with suitable wadding, which henceforth will be employed in various combinations.

SERIES 2.

## Courtney Beats McMurchy.

SYRACUSE, N. Y., Nov. 24.—The scores made in yesterday's bi-weekly medal shoot of the Onondaga County Sportsmen's Association show that Courtney's physique is not a bar to his handling of a gun at the traps. The Colonel's work in these medal contests has been very regular and his smashing of the kingbirds very sure. Yesterday he had, among others in his class, to meet Harvey McMurchy, one of the best shots in the country. It was common report that "Mac" would walk off with the medal, but common report told a flattering tale. It is true he tied Courtney on his first string of 50 with a score of 48. In the shoot-off, however, Courtney won by two targets, breaking 18 to his opponent's 16. This gave Courtney the medal once more.

In Class B, Hunter led his men, breaking 38, W. Morris being close up with 37. James Boyd was king of Class C with 30, his solitary opponent, W. Jennings, scoring 27. In this squad B. A. Bartlett, of the Burgess Gun Company, of Buffalo, N. Y., shot a string of 50 targets, breaking 45, the highest score made during the day. J. Glennon, who was not in for any medal, shot in the same squad also, and broke 33. After the race Bartlett paralyzed the shooters by his exhibition of trick and fancy shooting, an exhibition in which it must be said he is *facile princeps.*

The scores are somewhat lower than usual, but this may be accounted for by the fact that the traps were screwed up very tight and threw a hard, swift target. Scores in detail:

Medal shoot, 50 kingbirds per man, unkown angles:

Class A.

## The Townsend Testimonial.

THE following notice has been received in regard to the second day's programme of the Townsend testimonial tournament, which had to be postponed, owing to stormy weather, to Thursday, Dec. 6. Shooting to begin at 9:30 A. M.:

Programme: Event No. 1, 10 empires, entry $1; No. 2, 15 empires, $1.50; No. 3, 10 empires, $1; No. 4, 20 empires, $2; No. 5, 15 empires, $1.50; No. 6, 10 empires, $1; No. 7, 15 empires, $1.50; No. 8, 15 empires, $1.50; No. 9, 10 empires, $1; No. 10, 10 empires, $1. For Event No. 4 W. F. Quimby donates 1,000 empire targets, to be charged for at the uniform price of 5 cents each. If not all used in this event they will be used in the following events at the same price until all are thrown.

Special events on side traps: No. 1, 25 empires, $1, for $20 in cash, donated by Mr. Al. Heritage; first prize $8, second prize $6, third prize $4, fourth prize $2. No. 2, 25 empires, $3, 21yds. rise, both barrels, unknown angles, one man up; a .38cal. repeating rifle, donated by W. H Wolstencroft, to be added to first money.

The following prizes will also be shot for on conditions to be arranged: 12½lbs. American wood powder, 20lbs. E. C. powder, copy "Bench Show and Field Trial Records," magazine shooting vest, grass ducking suit, box of cigars.

Come to this shoot and bring all your friends.

AL. HERITAGE,
W. F. QUIMBY,
M. F. LINDSLEY,
T. H. KELLER, } Committee.

## Trap at Watson's Park.

CHICAGO, Ill., Nov. 24.—The following additional scores were made during the past week:

*Nov. 20.*—Audubon Gun Club race, 15 live birds per man:

# Answers to Correspondents.

### No notice taken of anonymous communications.

DR. JES, Douglas, Wyo.—Will you kindly decide the following to settle a dispute? Two men agree to shoot off a tie miss and out. A shoots and misses. B claims the stakes without shooting. A claims that B must shoot, and that if B misses both must begin again and shoot until one has scored one more target than his opponent, both having fired the same number of shots. Ans. A is right.

H., Edgar, Neb.—1. A large swan was captured near here by a farmer. I secured it and will have it mounted. It was of a very light drab on the neck and to some extent the same on some of the feathers on the back. Its bill was pink color, with black markings around the nostrils, feet black, the under feathers very thick and heavy and of a beautiful silky white. The bird was brought in alive, as its captor had only wounded it. What kind of a swan would you call it? 2. Some years ago a flock of large birds passed over the town from the southwest. They were about the color of the brown pelican, perhaps a little darker; but I do not think they were pelicans, as I could not see any pocket under their bills. They sailed along at a good height and quite slowly, and seldom moved their wings. What do you think they were? It is the only time in a residence of twenty years that I have seen such birds. Ans. 1. Probably young trumpeter swan. 2. We cannot surmise.

A 2 oz. trial package sent post-paid for 25 cts.

It will give us great pleasure to forward a copy of our catalogue to any one who "goes a-fishing." Some people charge for their catalogues, some charge for the postage, some charge for both. We are more than willing to give away our catalogues and prepay postage on them. No angler, after looking at the catalogue, can resist buying from us or from our trade-customers all the fishing-tackle he can afford to pay for. That is where WE get back a good deal more than cost of catalogue and postage.

# ROWLAND E. ROBINSON'S DANVIS BOOKS.

CHRONICLES OF SPORTSMEN AND OTHER HUMAN BEINGS.

## Uncle Lisha's Shop.

LIFE IN A CORNER OF YANKEELAND.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies." The talk naturally ran much on hunting stories and wood lore, but although the stories told were generally good, their truthfulness was not always accepted without question, and the volume abounds as much in dialogue as in narrative. "Uncle Lisha's Shop" is brimful of quaint humor and sentiment, and there is an unmistakable touch of human nature in Uncle Lisha himself, and his good old wife, Aunt Jerushy; in Sam Lovel, the hunter, and in fact n all the other characters introduced.

## Sam Lovel's Camps.

UNCLE LISHA'S FRIENDS UNDER BARK AND CANVAS.

When Uncle Lisha went West, Sam Lovel took Antoine as his partner, and the fortunes and misfortunes of the two as trappers are described with all the charm of our author's quaint style, while their friends and enemies, and all with whom they are brought into contact, in the course of the story, step on to the stage real living flesh and blood creatures drawn with such fidelity to life that the reader never doubts that he would recognize any one of them from the description, should it ever be his good or ill fortune to run against him.

## Danvis Folks.

A SEQUEL TO THE SHOP AND THE CAMPS.

This volume is a collection into book form of the "Danvis Folks" chapters published in FOREST AND STREAM. It relates the further fortunes of Uncle Lisha, Sam Lovel, Granther Hill and other personages of the story whom we know so well. Mr. Robinson avers that his characters were of the old times and have passed away. That surely is a mistake. They are living to-day here in these three books, and the Vermont author has endowed them with qualities which will give them long life to come. If you already have on your shelves the Shop and the Camps, you have a place there for this third volume.

Sent postpaid, the Shop and the Camps, $1.00 each, the Danvis Folks, $1.25.

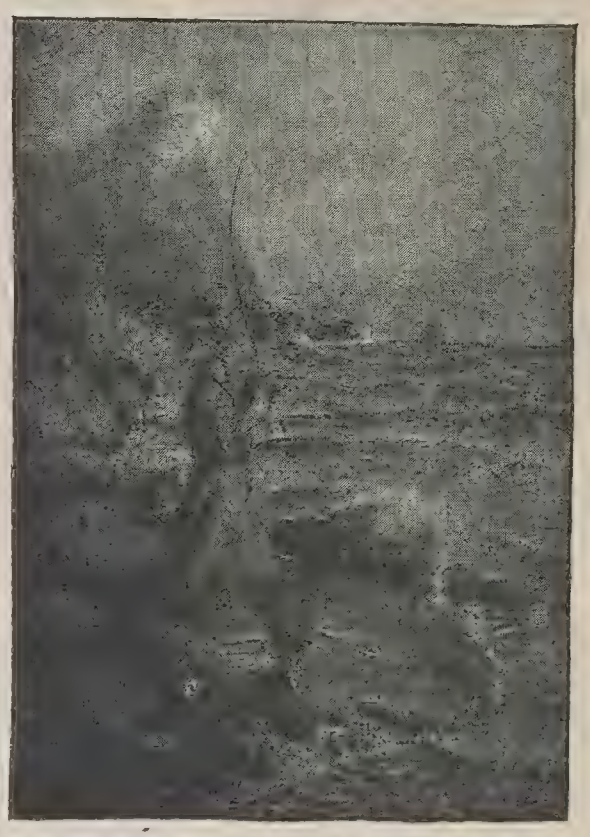
# Forest and Stream's Outdoor Scenes.

FROM ORIGINALS IN WATER COLOR AND OIL, PAINTED EXPRESSLY FOR THE FOREST AND STREAM.

HE'S GOT THEM.

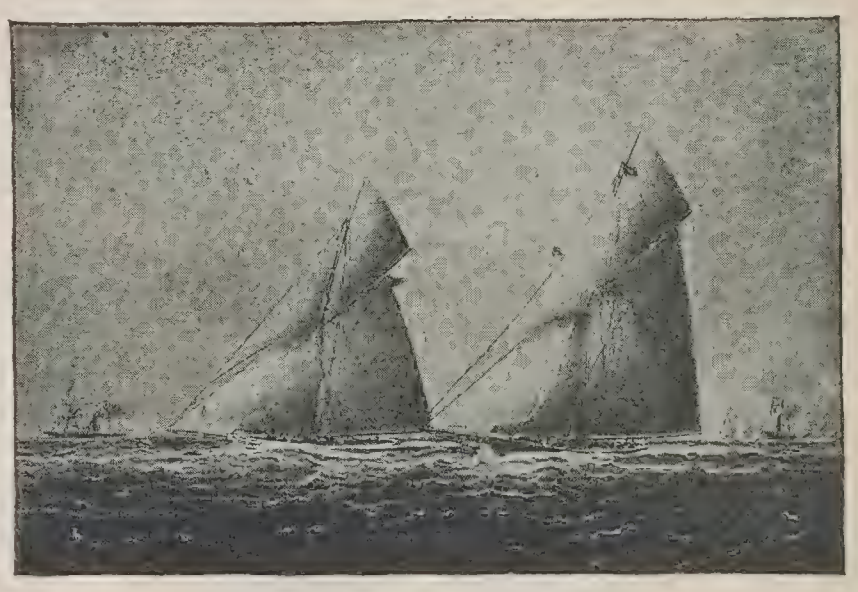
JACKSNIPE COMING IN.

## AS PREMIUMS.



We have prepared as premiums a set of four beautiful and artistic reproductions of original paintings of realistic outdoor scenes. The art work is the best obtainable in New York; the pictures are rich in effect and are intended for framing. They are done in 12 colors. The yacht race is from an oil painting; the others from water colors. The scenes are shown in the small cuts herewith. The plates are 14¾ x 19in. The pictures are sent both to **new** subscribers and to **old** subscribers upon renewal, on the following terms:

**Forest and Stream** *one year and the four pictures*, **$5.**
**Forest and Stream** 6 *months and any two pictures*, **$3.**



If subscribing for 6 mos. designate by title the two pictures desired. Single pictures will be sold separately, price $1.50 each, or the set, $5. Remit by express or postal money order, payable to Forest and Stream Publishing Co., 318 Broadway, New York.

The pictures are sent by mail, postpaid, wrapped in tube.

Copies of them may be seen at this office, and inspection is invited.

**The FOREST AND STREAM is put to press on Tuesdays. Correspondence intended for publication should reach us by Mondays and as much earlier as may be practicable.**

## Forest and Stream Water Colors

We have prepared as premiums a series of four artistic and beautiful reproductions of original water colors, painted expressly for the FOREST AND STREAM. The subjects are outdoor scenes:

**Jacksnipe Coming In. "He's Got Them" (Quail Shooting). Vigilant and Valkyrie. Bass Fishing at Block Island.**

The plates are for frames 14 x 19 in. They are done in twelve colors, and are rich in effect. They are furnished to old or new subscribers on the following terms:

**Forest and Stream** *one year and the set of four pictures*, **$5.**
**Forest and Stream** *6 months and any two of the pictures*, **$3.**

Remit by express money order, postal money order, or postal note. Make orders payable to

**FOREST AND STREAM PUB. CO., New York.**

### *SNAP SHOTS.*

"THE Gallions and Flota joyning here all sail hence with the King's treasure to Spain." So read the old charts showing the course of the Spanish treasure ships from Mexico up through the Florida Gulf and across the seas to Madrid. On any map of the United States, along the great rail line and water lines convergent to New York, one might write that here the mails are bringing the good things from angler and shooter and sportsman tourist for the delight and entertainment of FOREST AND STREAM readers. And more than ever of old the King of Spain was deserving of his treasure is the reader of FOREST AND STREAM worthy of the best that can be written and printed for him.

Week by week we are sending out a sportsman's journal filled in all departments with a fund of reading marked by freshness, variety and generous measure. Week by week, through the new year just ahead, the FOREST AND STREAM will be kept up to the standard already attained; perhaps it will be above that standard. Old subscribers frequently assure us that as it grows older the paper comes more and more nearly to their ideal of what a journal should be for the sportsman of America. Need we add that the ideal held by its editors is higher still?

We note with interest that Rev. Dr. J. McClusky Blayney, of Frankfort, Ky., has come out high-hook in the Natchaug competition for the biggest string of fish caught in a day. The Doctor won his gold piece with the muscle-testing and record-smashing score of 366lbs. of large-mouth black bass, taken in the Twin Lake waters of Wisconsin. We are pleased to know that the prize went to Dr. Blayney, for had some one else caught twice as many fish that feat might not have been so creditable as was the Doctor's, since he threw back into the water all but a paltry half dozen of his fish. A prize for biggest score can hardly avoid being an encouragement to foolish and sinful waste; such incitement is radically wrong in principle; and no reward of the kind should be offered by any one anywhere. In this view we have reason to know Mr. Chaffee quite agrees with us; and he tells us that this particular prize will not be offered again.

The case of Judge Jonathan Dixon and others charged with shooting ducks illegally in New Jersey has been put in train for trial in February. The mills of the gods grind slowly, but the game wardens do occasionally see to it that the grinding is exceeding fine.

In a Brooklyn divorce suit the other day the husband testified that by reason of his domestic troubles, once when starting off on a fishing trip, he had hoped that he might never return home alive. Now there was a man to be pitied. Half the fun of a fishing excursion is bringing home the fish for the admiration of one's wife. If anything might cause an unhappy husband to repent of his longing to die away from his family, it would be a big string of bass or trout. But perhaps this poor fellow had no fish to show and so did not dare face the music. There is something in that, too.

In our comments last week on a certain case of flagrant crookedness at the trap, we made a deduction in the first paragraph not strictly logical and hence not strictly just; and we have a respect both for logic and for fairness. Instead of deducing from the single acknowledged instance of dishonorable action the conclusion: "From all of which it appears that when this particular individual is engaged in a trap-shooting match the affair is not a straight and square competition of skill between sportsmen, but is an underhanded manipulation of the score," we would have been more logical and just had we said, "the affair may be not a straight and square competition of skill between sportsmen, but may be an underhanded manipulation of the score." When a man makes a record by one piece of underhanded work, the presumption thereafter is that he will repeat it, and yet on any given occasion he may not be other than straight.

Most men find solid satisfaction in showing the tangible testimonials of their luck in the field. They are not satisfied with the mere catching of fish or bagging of birds; they must bring them home to distribute to friends. This is one reason why the non-export fish and game laws bear heavily where they make no distinction between game carried out by sportsmen as trophies of amateur skill and game shipped to market by professional shooters. The purpose of these statutes is excellent; their practical enforcement results in benefit to the game supply. But there is a happy mean between unrestricted traffic and absolute prohibition of game carrying by sportsmen. Some privilege should be accorded the sportsman, but not unlimited license, for there are those whose greedy instincts require curbing. Eastern sportsmen who go West, to make pot-hunters of themselves there, and kill barrels of birds and put them in cold storage to be smuggled, to Brooklyn say, in the winter, should have their thrifty schemes smashed by the laws and the wardens.

A bookkeeper in a New York bank having made away with over $350,000 of the funds of the institution, a Binghamton correspondent of the *Evening Post* of this city makes the horse-sense suggestion that the stealing could not have been carried on year after year had the bookkeeper been sent off on vacations. "In the country," he writes,

> "it is customary for bank clerks to take a vacation annually, at which time the bank keeps open for business just the same, and the books upon which the clerk who is away has been working are in use, and if there are any secrets locked up in them, they are pretty sure to be divulged." Probably, he adds, this New York bookkeeper "was not fond of angling, or of the mountains or seashore during the heated term, as most bank clerks of nine years' experience are. Would it not have been better for the bank to have invited their bookkeeper to take a vacation of ten days or so, at least annually?"

Certainly it would have been better. Every bank clerk, and every other financial clerk, should be fitted out with a fishing rod and sent off every year when fish are biting. And if any should protest that he cares naught for fishing, let his employers look well to his accounts. As Launcelot says—or as Shakespeare might have made him say, for the bard was an angler himself—the bank clerk that hath no love of fishing in himself is fit for steals, defalcations and flight, by night.

If a cashier or a clerk buys FOREST AND STREAM on his way home, that is a good sign; there are multitudes of them among its readers to-day; and we never yet heard of one of them who was not very ready to leave his accounts to others while he went fishing. In fact, there was a bank that went under because of the dishonesty of its responsible managers from the president down, and the only person who came out of the wreck with clean hands was one whose name has long been familiar as a contributor to our columns. Does not Walton characterize the fishermen of to-day quite as truly as he did those of his own time when he speaks of honest anglers? And do not enjoyment of the gentle art and a clear conscience go hand in hand by the brookside?

Why must daring young American sportsmen go to Africa in search of perilous adventure in the wilds, while there is our own Indian Territory, with the redoubtable Bill Cook and his gang to make it interesting for them. It used to be in the tame days of yore, that shooters who ventured into the Territory, in despite of the law forbidding white men to hunt there, found a mild flavor of excitement in their liability of being run out by the authorities. Now there is open to them the wilder exhilaration of a brush with outlaws and renegades; and the bold young fellows who hold that it is creditable to imperil one's life in pursuit of sport have a capital chance to show their mettle. If they should fail to draw Cook's fire, they certainly would that of the opposing forces; a man who has been in camp a week or two looks enough like an outlaw to be shot for one on sight in a country where outlaws are known to have their habitat.

This is the time of the year when some one comes to the front with a proposition to tax game. They say in Massachusetts that the new law there laying a tax on bicycles is so unpopular as practically to be ignored in the cities. Does any one opine that a gun tax would be any more popular?

The case against Edgar Howell, charged with having violated the order of Capt. Geo. S. Anderson, superintendent of the Yellowstone National Park, by re-entering the Park after expulsion from it, was dismissed when it came before the United States District Court in Cheyenne. The court held that a person could not incriminate himself by disobeying the orders of the superintendent. So we shall never know judicially what the Secretary of the Interior intended as to expelled persons from the Park. There is satisfaction all around that now there is a law to cover such cases, a law clear, explicit, and we rejoice to say, having a capital effect.

A story comes from St. Paul that a carload of eighty-two saddles of venison was shipped through that city on Nov. 26, on its way out of the State to the Chicago market. The Minnesota law forbids export; and this case is interesting because, if the facts are correctly reported, the unlawful shipping was accomplished only by sharp work in eluding Game Warden Andrus and his subordinates. While two deputy game wardens were watching the car in the North Minneapolis yards, reports the *Pioneer-Press*, "it was switched at a rapid rate of speed up through the yard, where the venison was transferred to another car and started for Chicago. They believe that is what was done, because when the car got to North St. Paul, where Game Warden Andrus was waiting for it with a search warrant, it was found to be empty."

The bright side of the protective situation in Minnesota is told within those quotation marks. The market purveyors do now and then get their illicit plunder to market, but they have to cudgel their wits to accomplish it. When they find it necessary to shuffle cars about and to hustle the meat from one car into another, one thing at least is certain, the laws are not dead-letters. Game Warden Andrus is not a dummy, nor asleep; nor do his search warrants always prove a sesame to empty cars. Under his direction the enforcement of the game laws has been brought to a high standard of efficiency. He is doing a grand work for his State. Of what the Minnesota system is and does, we shall have more to say. It is a magnificent object lesson.

Some one came in last Tuesday to know if anything could be done to arrest the progress of a proposed match at trapped quail. As quail are now in season we assume that they may be shot from the trap, if any one has a taste for such work; but it is low business; and no one with a spark of field sentiment in his breast would stoop to it. If these trap-shooters of quail belong to a gun club they ought to be drummed out of the ranks.

There is no longer in this State any such office as town game constable; it was abolished when the present game code was adopted; but in spite of this town elections are enlivened by the races of candidates for the office, and the individuals elected assume authority to act. In numerous cases the town game constable proves to be an unconscionable scalawag, who uses his office as a cloak for his own lawlessness. Once in a while a State game protector gets after one of these fellows and rounds him up for shooting or fishing out of season.

We shall be glad to send to any address, which may be given us, of a person interested in the field of FOREST AND STREAM, one of our Silver Bullseyes.

# The Sportsman Tourist.

## DAYS AFIELD.

Again after ruffed grouse. This time Elmer says, "Come go, the Professor will join us."

A consultation with my junior, a few hurried instructions to the book-keeper, some things put off, and some, I am afraid, left undone. It is surprising how easy it is to arrange your business to absent a few days when you really want to "go gunning."

Elmer is a good fellow, tall and handsome, has hosts of friends and I doubt if an enemy in the world, generous, open-handed and open-hearted and full of mother-wit. To him the possession of anything enhances its value ten fold; Blank is the only maker that can make a gun, and Elmer's is the best he ever made; Antonio is the only dog in America that can sire a good dog, and Elmer's is (to him) the only real good one he ever got.

When he's not talking gun, Antonio pups, "going gunning," the virtues of his political party, or the stupidity of the other, he sells dry goods. Judging from the "brand" of his gun, the pedigree and shape of his dogs, the cut of his clothes and his general easy manner, he must sell a good many.

Four o'clock on a dark, damp, chilly morning in late October in the Pocono Mountains is early, and it takes a liberal application of the sponge and plenty of cold water to get me thoroughly awake. A short walk to the Professor's cottage for breakfast, helps, and when I get there the blazing logs in the chimney place look and feel good, the ham and coffee smell and taste better. Before we're through breakfast the team and George Stiff arrive; he is afraid it's going to rain; it does look like it; but the dogs and guns, macintoshes, lunch baskets and we are soon packed in. We have a nice little drive of twelve miles over the mountain roads to Bender's, just on the border of Pike and Monroe counties.

Because Donald refuses to lie lengthwise on the iron foot rail in the front of the wagon—there's no other place for him—the Professor suggests that I have him taught how to behave properly in the carriage, pointing to Ben Hur and his son comfortably rolled up under the back seat; but it is a disagreeable, clammy, cold morning, and I don't mind. (It's wise to keep one dog where he could locate a bird should one be lying beside the road.) All things have an end, and so does that ride.

I wish I could describe that almost perpendicular cliff rising up full 500ft. over there on our left, timbered half way up its rugged gray rocky sides, rising out of a base of color from the deep green of the hemlocks to the bright scarlet of the maples, with all the intervening shades of reds, yellows and browns of the autumn woods.

It won't rain, the clouds are drifting away and the mountain top is standing out clear and bold with only an occasional cloud "hitting" it as they pass over.

But what is Donald doing there? My nerves begin to tingle as the pup shows that something in the air is pleasing his sense of smell. Isn't he a picture? Head and tail stiff and straight, the breeze swaying his handsome flag, his fine white coat glistening as satin, that small tan spot just back of the shoulder and the dark ear seeming to intensify the whiteness. He looks a statue. Not a motion, unless you can detect that slight quiver of the under jaw and notice a suggestion of foam in his lips—get ready, there is a bird there—"steady Donald." What a roar as away it goes, not 6ft. from me sharply to the right. As I wheel a twig catches my gun. I recover it quickly and send both barrels after him in quicker order, but you don't want to take aim twice at a fleeing grouse.

He's well marked down, and in a few minutes Ben Hur and Donald are trailing, and four pairs of hands tighten on gun barrels and stocks. The Professor's dog has located him and the Professor's gun cracks. Elmer, a little further off, sees him coming—only one more load of shot for you "King of the Wood" bird, and you are in Elmer's pocket. Ben Hur soon finds another one and Elmer kills him quickly—two empty shells and two grouse—not often beaten.

They are not thick, it's a long time and a longer tramp before we find the next one.

No loafing around a spring to eat lunch to-day. It's too cold and the ground is too wet.

We are going up over a hill in an old road in Indian file, our dogs coursing off well on our flanks, when up through the treetops a grouse goes like a cannon ball—I never saw a man who could fire his gun as quickly as the Professor—I am sure the bird dropped over there in the edge of that old field. Donald can get through a barbed wire fence quicker than I, and he goes across that field like a white streak. Certainly he has started a rabbit, and I am mad clear through, and start after him on a run. How I misjudged him—the hackney that had as fine knee action and carried himself as proudly at Madison Square Garden this week as that precious pup did when he came out to me with that winged bird in his mouth, has a blue ribbon.

The Professor and Elmer are to go down this valley, Bender and I will keep to the hillside. It's our last chance for to-day, as the long shadow of the mountain is reaching clear across the valley. Here are unmistakable signs of game. Ben Hur has located it and a woodcock comes by me and goes sailing over Elmer's head. My gun does not get to the shoulder; his does, however. What is it about you, "spirit bird," that makes you so dear to all sportsmen's hearts? Why does Elmer feel more proud of this little brown beauty than of that big pocket of big birds?

"Look, George!"

There is Donald again, staunch and true; too many guns here to make a mistake, and I move quickly. Another woodcock, but I'm too quick for my load; No 7 shot do not leave me a very good specimen for the taxidermist.

On again; Donald well to the foot of the hill, some 40yds. to my left, makes one of those quick points, more frequently seen in quail shooting than in the mountains after grouse, but he got too close that time before locating and away go two grouse looking as big as turkeys. The rise is too great for me, but the crack of my gun warns the others and two reports follow within just sufficient interval to distinguish the two.

"My bird."

"Not much, my bird."

"I shot first."

"Well, I shot last."

Bender winks at me and I call out:

"Who shot 'm, dat caribou?" *

A hearty laugh from the valley and two big generous voices almost as close together as the reports of their owners' guns answer, "You did," and the bird is offered to Donald—but I am afraid to trust to his game pocket and so decline with thanks.

Mrs. Bender's supper—Mr. Delmonico, if all your guests had climbed mountains and rocks and waded streams and run after dogs and eaten a cold lunch, and Mrs. Bender was your caterer and cook, you would have to raise your prices or fail.

The ride home—Elmer's stories, the Professor's reminiscences. When the unrolling of my traps and the searching of my pockets revealed nothing but that poor mangled woodcock, Mrs. B., did not look so proud of me as she did the day we had our wedding reception.

If Donald seems the hero of these hunting trips it is not because he finds all the birds and makes all the "points," but because he hunts nearer to me than the other dogs and I see more of his work. G. B.

New York, Nov. 24.

* "Sport with Rod and Gun."

## A DAY WITH BOB WHITE.

Years ago, at the close of the war, game had multiplied in Kentucky so that sportsmen, relieved of the anxieties produced by the conflict of arms, could easily divert their minds by a day or a week in the fields, chasing deer or shooting partridges—the latter the Bob White of the esteemed and lamented "Wells" of North Carolina, whose nomenclature I accept, if not as scientific as our friend Cheney would suggest.

How we love to cling by the days of our boyhood when Bob White, sitting on the fence of the old farm, sang his solo so sweetly and clearly that ears deaf to all other sounds drank in his music as essential notes in the melody of life. We felt better and happier then, and had no dust of the city in our nostrils or our throats to clean out or clouds of its thick atmosphere to dispel before catching the first sunbeams from the eastern hills.

Bob White, how his notes, strong and simple—no divine afflatus to dissolve or reduce to primal scale—came to us across the shocks of wheat, or, later, over the frosty meadows as we sat on the porch of the old farmhouse, when the October days came and went with their red maple leaves dropping in the creek and furnishing a hiding place for the minnow from hungry bass. Memories crowd on us when we think of these golden hours of the long agone, and scores of pages could not tell how happy our hearts were. Bear were plenty then, big and lusty; squirrels dropped the hulls of the hickory nut in infrequent showers from the scale-bark trees as we sat or stood beneath them and watched to find in what particular limb or bough they sat and made their meal or prepared their winter stock.

Back of the old farmhouse stood the cabins of the blacks that were slaves and had not become awakened to the new order of things and still relied on "old marster" and "old mistiss" to relieve their daily wants. Shoes and clothes and "somethin' to eat" they had for years gotten as manna from the clouds, out of the hands of the owners of the old plantation, and when the war closed they had not fully learned that "man earns his bread by the sweat of his brow."

But I wander. The smoke of battle had ceased; the boys had come home—the old blessed home—and social and public life were being reorganized. Partridges—old Bob White—were loose in the land, those that loved the sport had only to get their guns cleaned, fill their powder flasks and shot bags (no loaded shells then), and tramp the fields to get a full share of the feathered favorites.

A friend of mine—John W. Irvine—invited me to visit the old Grigsby farm in Lincoln county, Ky., six miles from Danville, and take a day's hunt for the fast flyers. Gladly accepting the invitation, we drove out the night before the hunt and stayed with the old folks in the spacious farmhouse, whose owner had not yet returned from the war. So enthusiastic was our talk before the blaze in the fireplace that Major Irvine, the father of my friend, vowed that next day he would take his gun and join us, and show the young bloods how to shoot. His memories of the days agone, when game was too plenty to offer any special enticement to the hunter, warmed his blood, and oft he was raising his arms and leveling his gun in deadly aim as he recited the good old times when game actually got in one's way and had to be moved out by rock, shot or bullet.

It was a bright, clear, frosty morning that greeted our sight next day as we rose with the sun, and after a hot and inviting breakfast called the dogs and were off to the fields. The country was level or gently rolling, with brier patches here and there, or clumps of weeds, whose seeds afforded rich food to Bob White in his rambles. The corn was cut, and here and there a stubble field presented a parade ground for our fluttering innocents. Major Irvine, with his long 36-inch barrel shotgun, was promptly on hand and zealous to test our skill and walking powers. It did not take long to prove that young legs were better than old ones, and quietly dropping to the rear the Major formed the rear guard of the hunt, coming in on the reserve when our shots had gotten the birds well scattered. Of course this gave us the advantage, and blaming us for trying to walk our legs off, the Major excused his lack of success by declaring that he would rather not kill a single bird than try to run it down and kill it before it had a chance for its life. He believed in giving every living thing a chance, and a fair one, and our course was simply cruel murder.

As we crossed the pike on leaving the house and entered a cornfield bordered by beech woods, the dogs flushed a covey in some ragweeds. Rising, they divided, part going into the woods and a part settling in the lower end of the cornfield. My friend John followed the latter and I climbed the intervening fence and proceeded to flush those that settled in the leaves of the woods, the dogs—Dash and Don—went with Irvine and left me to tramp up the stragglers. On the first that got up and darted among the low-hanging beech limbs I scored a clean miss, but dropped the second as he rose from a clump of briers and was straightening out for a bee-line to the north. Two others flushed wild, and after ten minutes' tramp I only succeeded in bagging one more of the flock. Meanwhile John had bagged five birds in the cornfield, and the Major proudly showed one that he had "knocked down at 60yds., sir, every yard full measure—just wanted to show you young fellows what could be done with an old reliable gun—none of your modern sparrow killers." The odds in our favor in game pocketed did not seem to disturb his mind in the least, presumably being due to the unseemly haste with which we covered the ground and not from superior skill or more deadly aim. We humored the Major's claims and excused our rapid movements by stating that we had promised birds to several friends and had to see that our pledges were fulfilled.

Skirting the beech woods the dogs seemed animated by the keen, frosty air, and covered every inch of ground. The cornfield, covered by patches of long wiregrass and ragweeds around the dead stumps, where the plow had scarce deigned to turn the sod, with briers along the fence rows, presented a royal cover for birds. Nor was it long before both dogs were on a dead point in the edge of a bunch of tree sprouts close to a stump. Steady, frozen apparently to the spot, with tails stiff as steel rods, and eyes to the front as on parade, they waited till we came close up. We called to the Major to take line abreast with us and choose his birds as they rose. Gradually advancing, up went the covey in a bunch, scattering wildly. Five shots rang out quickly, and four birds dropped to the ground. The Major took one shot only—all he said he cared about for a single rise, "but I got my bird, dead as a hammer," said he. Which bird was the Major's was not entirely clear, as I got one with the first barrel and shot wild at a high circler overhead with the second, while John explained that he killed two crossing and one far out on the right near a cornshock.

We raised no issue with the Major on the deadly qualities of his gun, but as John and I followed the scattered birds we maliciously agreed to allow the Major to fire at the next flock and to retain our own fire. "I want to show the old man he had better shoot at birds sitting than on the wing," said John.

Two more quail were all we got from the second flock, as most of them had gone deep into the beech woods, where shooting was difficult, and the remainder had disappeared beyond the range of the dogs.

Crossing a rail fence we next took in a stubble field, so thick in stubble and feed that we felt sure of giving the Major the benefit of our plot. Nor had we long to wait, for Dash shortly threw up his head and snuffed the scented atmosphere that betrayed the lurking birds. Stealing forward a few steps he halted and seemed ready to point, but either the birds were on the run or the wind was fickle, for again he stole silently forward, while Don, who was roading an adjacent hillside, seeing Dash's action, rapidly quartered toward him. Suddenly catching a full breath of the hidden bevy, he stopped short and straightened to point. Dash advanced slowly a few steps and halted, nose and tail in line. Cautioning the Major to be sure and get his bird on the rise, John and I slyly exchanged glances of anticipated fun and all three moved forward to flush. A big covey burst on the wing with a roaring sound, and the Major's gun banged its single note of assault on the flying flock, for both the other guns were silent. The Major turned quickly to us with a mute glance of inquiry, and we were just going to explain how it happened our guns didn't go off when a lot of floating feathers in the air and a fluttering partridge on the ground upset our calculations, and for the moment we looked at each other in a dazed way.

"I was waiting for you to shoot," said John, as he looked at me with a quizzical gaze.

"And I was waiting for you," I replied, "but I reckon the Major didn't kill the bird he shot at."

"I kill my birds," stiffly added the Major, "and doubtless help you to kill some of yours."

The laugh was clearly on us, but neither John nor I were just then in the humor to tell the Major the joke that gave us its sharp edge.

"Too many birds in that flock," said John to me when we got out of hearing of the Major. "Couldn't help hitting one if he had shut both eyes."

The bevy had scattered well in the stubble and the dogs did excellent work, so that before quitting the stragglers we had bagged nine birds, of which John got six and I three, while the Major explained that as he did not care to walk himself down he would lag in the rear and watch our work.

Two more coveys we got up before noon in the open fields, but some one had evidently cut down their numbers before we flushed them, as both were small and only netted us a few birds from each.

The sun had now got well overhead and was making matters quite warm for us, when, in crossing a low worm fence, the Major suggested it was a good plan to halt and dispose of our lunch. It met our approval exactly, and taking the cold chicken, ham and other eatables stored in our game pockets ere we left the farmhouse in the morning, we waded into them with such relish as only active exercise and open air can give.

We were just concluding the lunch when the rail on which we were sitting suddenly broke and came near dropping us to the ground. The next rail proved of sounder stuff and caught the fall.

In the laugh provoked by the incident, John saw a chance to suggest a conundrum.

"Pa," said he, "what makes things weigh heavier after you eat 'em than when you carry 'em in your pocket?"

"Guess you got more than your share and the fence rebelled," replied the Major. "Don't eat so much next time, or else take a seat on the ground."

Distributing the remnants of the lunch to the dogs, we concluded to take a short rest before resuming operations. Before us lay a small bottom, with clumps of weeds here and there, and just beyond, at the foot of several wooded knolls, ran a spring branch. Our plan was to cross the branch, go over the hills and work up some stubble that lay beyond. As we sat on the fence and chatted, the dogs were leisurely moving among the weeds, nosing here and there, when suddenly a big bevy rose on wing and flying well together, dropped on one of the knolls among the leaves. The ground was clear, the trees were scattered enough for good shooting, and calling to the dogs to steady them, John and I jumped down and made ready to open on the flock. The Major complained that he was hot and tired, and he would sit and watch us get the birds up. Climbing the hillside carefully, we slowly approached the spot where we had watched the birds light. The dogs were ahead and slowed down to our repeated warnings, but singularly enough, they reached the ground, passed over it, went beyond, circled in all directions, but evidently without detecting the slightest scent of the hidden flock. Having seen

them drop to the ground in plain sight, we were puzzled. We began to surmise that either they had taken wing again without our noticing it, or else that they had rapidly run off, when a bird rose from under our feet almost and darted away. John dropped him nicely and Don retrieved him in good order. Leaves covered the short green grass under the beech trees pretty thickly, and it was evident the game was hidden under these, and withholding their scent, so that the dogs were of little use.

We at once concluded to walk up to the birds and take turn-about shooting at the single ones—both taking chances if not dropped by the first barrels. It took close tramping, for the quail would lie until our feet were almost over them before getting away. The shooting was splendid, one bird after another being raised to wing, and when the first shot failed the second was almost certain to drop him. The dogs had nothing to do but retrieve, and they speedily seemed to understand this was the only business they had there then, for they moved quietly along beside us and brought in the dead birds without unnecessary steps or noise.

Our plan worked nicely, so that with one or two exceptions we bagged the entire flock. Major Irvine having watched our sport and gotten his rest, came up when we could find no more birds, and smilingly said, "Boys, you are beginning to learn how to shoot." Then he added, "If I hadn't been tired, though, you would have had no need for a second barrel. I don't want two shots at a partridge that I kick up out of the grass."

This was not the only instance in which I have seen quail withhold their scent, but it was the only one where the grass was green and short and not green and long. Several times I have known them to alight in thick, matted, green grass and it was impossible for the dogs to find them. Whether it is the green grass that obstructs and destroys the scent, or whether the bird has the power of withholding it under certain circumstances is a matter I would like to have solved. In the instance named the power of the bird, in addition to baffling the dog, of hiding under the scattered leaves so completely as to prevent our seeing a single one before he rose on the wing, was conspicuously evident. It seemed only the certainty that we were going to place our feet on him that drove him from cover.

And further, why should the entire flock resort to this close and puzzling style of hiding, and have to be fairly driven out, instead of easily taking to wing when one or two were flushed? Was there some occult and mysterious bird intelligence and means of communication that led each individual to proceed upon a common design?

Feeling in excellent spirits over our success so far, we proceeded at once to the stubble field. The dogs went to work with fresh alacrity, evidently feeling that they were to have a chance to redeem themselves. Here, however, we met our first failure in getting up a covey, though several roosting places were discovered. Crossing a ragged ravine, we entered a field of standing corn. The dogs shortly disappeared, and after waiting for them some time we concluded they had found birds. Separating, we proceeded to search for them. The field was scoured and no sign of dogs. On the right of the cornfield the fence was thick with weeds and pokeberry bushes, with here and there a stalk of red sumach. Surmising that birds would go there for range, if anywhere, we proceeded to the fence and one on each side slowly began an investigation of the bushes.

Scarcely 30yds. had been gone over when I noticed a white spot among the weeds ahead. Closer and careful investigation showed it to be the white back of Dash, rigid as a fence rail, with nose directed to a fence corner. Warning John to be ready, we cautiously moved ahead, when with a burst of sound a covey broke from the fence corners and thick weeds in eager flight. John got two on his side of the fence, while I was fortunate enough to drop two with the first barrel and one with the second. Most of the covey went into the standing corn, but John marked down two that dropped by a stump in the clover field across the fence. These we easily bagged, as the ground was clear and afforded an easy shot. Having some distance to go and the afternoon waning, we concluded not to follow the birds that took to the standing corn. Don had been backing Dash where the covey rose, but was completely hidden from view under the bushes.

Later one or two small coveys were found in a neck of stubble, and several birds added to our bag, when we entered a piece of open woods a mile from the house. Through the middle of the woods ran a division fence, and along its line, some distance off, were clumps of ironweed and high grass. The dogs entered there and evidently scented birds, from their quick, eager movements and close search of the ground. John was eager to put up the covey, but by this time there was a tired feeling in my legs and body that sympathized with Major Irvine, who since noon had been simply trailing our steps. I suggested we had had fun enough and for John to monopolize the sport, while the Major and myself sat on the fence and watched the fun. It took but a few minutes for the dogs to locate the covey. At the rise John got his two birds. The remainder took a long flight down into the heart of the woods—too far to be followed.

The day had been beautiful beyond expression, though slightly warm about noon; and feeling we had our full of glorious sport, we turned our steps to the house and counted out on the hearth in front of the big, old-fashioned fireplace our game. Sixty-five plump quail made a big bunch, of which the Major could only claim five as his quota, but consoled himself by remarking that "that was more than he could eat."

OLD SAM.

## SPECIMEN COPIES.

**Any reader of the "Forest and Stream" may on request and without expense have a specimen number of the paper sent to a shooting or fishing friend.**

## IMPRESSIONS OF A TENDERFOOT.

A "TENDERFOOT" I understand to be one born in the East, and who for the first time treads the slopes of the Rocky Mountains. I believe that mere transit on a through express, or even a stay at Colorado Springs or Manitou, does not relieve one of the contemptuous apellation. To lose this epithet one born east of, say Kansas City, must leave the paths, and the garb, in which he has been wont to walk, and immerse himself in the vast space of the West. It does not seem to matter whether he mines, ranches, fishes or hunts big game, but personal experience of ranges, mesas, gulches, sage brush, buttes and broncho is essential.

Having been born in the State which has succeeded Virginia in bearing the title of "Mother of Presidents," and to which the beautiful but unsatisfactory buckeye has given its common name, I had only seen the great West during various business errands, generally connected with the fruitless attempt to make the sanguine children of the setting sun carry out contracts to repay Eastern capital or to find why similar capital, like some of the rivers that flow from the eastern slope of the Rockies, seemed to sink into the ground and be lost, doubtless fertilizing and refreshing the immediate course of its flow, but never reaching the seaboard. In this happy summer, however, being temporarily free from such cares, I was invited to join a party to hunt and fish in the Elk Head Mountains, which lie in the northwestern corner of Colorado, and now can proudly boast a familiarity with many things and scenes which are peculiar to the boundless West. Whether the obnoxious name has really left me is still not a certainty, but as two big bull elk fell to my rifle, while my acclimated companions failed to get a single one, they seemed to believe that I was gaining at least a slight familiarity with the country.

First on the list of my novel impressions comes acquaintance with the broncho. He is of mixed descent, on one side coming from the mustang and on the other from the eastern horse, but the proportions of blood must vary very greatly; still the type is distinct. He is generally small, perhaps averaging about 900lbs., and seems to have no distinctive color or marking. Ordinarily he is a sleepy and biddable beast, who travels with his head down and exerts only as much effort as is absolutely necessary; but this gentleness and quiet simply give an opportunity for the storage of energy, and, on proper stimulus, this calm and passive animal expends his accumulated force with terrific and tumultuous effects.

"THE ENTIRE OUTFIT."

Among our pack animals was a little pot-bellied brown horse who was one day plodding along under a pack of 200lbs., and seemed half asleep. Suddenly, for no reason that I could see, he concluded to get his pack off. Down went his head; up went his back; and a fine exhibition of genuine buck-jumping was begun without notice. When this did not loosen the well-tied "squaw-hitch," he seemed to go absolutely mad. Screaming like a steam whistle he tore at the pack with his teeth, dashed against trees, reared, plunged and rolled, until finally the pack fell from him. Then, his aim being accomplished, a perfect calm succeeded, and no objection was made to the replacing of the pack or to carrying it afterward.

The broncho is a creature of the wilds, and is equal to any difficulty which they present. On my first day we rode forty miles over a range, with no road or path beyond an occasional game trail. We went through spruce forests, over fallen timber, up steep and stony mountain sides and down again, and the orders to me were: "Leave your rein loose and let your horse go." I followed these instructions literally, although when my broncho was descending slopes of about forty-five degrees, and jumping over big logs on the down grade, it seemed reasonably certain that we were both going to everlasting smash, and one escape did not seem to furnish any reason why the next peril should be safely passed. On such a slope I remember coming to a couple of fallen trees lying across each other, perhaps two feet high on the upper side and four or five on the lower. My black carefully examined the obstacle, and then coolly leaped it, alighted in a sitting position, slid about ten feet, brought up and went calmly on. Looking back I saw my brother's horse go through precisely the same performance, and as he leaped, the pair seemed to be going directly into eternity.

Nearly all our hunting was done from the saddle, in spite of the tremendously rough nature of the country. Several of the horses were the perfection of shooting ponies, and seemed to actually hold their breath when the rifle was lifted for a shot. All of them would stand, provided the long reins were thrown down and allowed to hang, and it was a matter of only a moment to dismount. When game was known to be near we generally left our horses and hunted on foot, returning to them after success or failure.

Second only in force and novelty to the broncho impression was that of the country where we camped. To reach it we had come eighty miles by stage, passing through a barren country, where only the immediate valleys of the rivers were fertile, and had ridden forty miles, all the latter being through sage brush except while actually crossing the ridges, until we were within six miles of camp. There we came to the edge of the so-called "Park country," a region heavily timbered with magnificent spruces, and the forest frequently divided by open glades, varying from 50ft. to a mile or more in width, covered with grass and flowers, and dotted with single trees or small clumps of timber. It was a country of running brooks and singing birds, and especially fitted for game of all kinds. Out of it rose magnificent mountain peaks of purple-brown trap, giving grandeur to its beauty. The whole region seemed to have been laid out by a most skillful landscape gardener, on a colossal scale and regardless of expense, and had an air of finish that seemed incredible in an absolute wilderness, forty miles from anywhere. None of this timbered country can be less than 9,000ft. above the sea, and its fertility, as contrasted with the barrenness of the lower country, is doubtless caused by the accumulation of snow upon the mountains, whose gradual melting keeps only the upper levels moist.

The mule deer (*Cervus macrotis*) abounds in this park country, and we rarely saw less than thirty in any one day. There seemed to be two distinct varieties, differing decidedly in shape and color. Among the glades around our camp we found slender, long-limbed bucks, decidedly light brown in color, and with the face a nearly uniform mouse gray. In the scrub oak near the edge of the desert the deer were much larger, shorter and thicker, lighter and grayer in color, and with a very light gray patch, almost white, across the face. Our guides always made a distinction between the gray bucks and the "bald-faced" bucks, and insisted that the two types always kept at different levels, as we found them.

Where elk can be found, however, one thinks but little of deer, and we were chiefly in pursuit of the greater and rarer game. For the first week after reaching camp, which was early in September, they could only be found in the dense spruce forest close to the mountain peaks. Later they seemed to travel more, and the sound of their trumpet became not uncommon. When the bull is young, and the call is heard at a distance, it sounds singularly like a human whistle. Heard closer at hand, or from an older animal, the note is more harsh and strident. The old bulls bellow in deep tones not very unlike those of a domestic bull. Fortune sent me the first shot at an adult male, and rewarded it with a handsome 12-point head, but with rather light antlers, the animal being still young. My great prize came on the last day's hunt.

Two of us had crossed the ridge and were in the aspen timber about two miles from camp, when we heard a young bull call at a considerable distance down the mountain. Leaving our horses we started toward the sound on foot, but after walking a mile or more, we heard the call again on our left, and high up the slope. We then separated, my brother keeping on, and I went back toward the horses, and had nearly reached them when suddenly an elk appeared on my right, 300yds. up the hill. He was strolling slowly parallel with my own course, and occasionally taking a bite of grass. Instantly I started toward him, keeping behind trees as well as possible, and running as fast as a defective lung and elevation of 10,000ft., and a pretty steep hill would permit. While running I saw that this bull was followed by other elk, marching slowly in single file, and appearing one by one from the thick timber. Knowing that the large bull is usually at the rear end of a procession of this kind, and having already a better head than the first one had, I determined to wait and take my chance of a big fellow, so, entirely out of breath and tremendously excited, dropped behind a rock about 150yds. from the line, and waited. Eight cows, a calf and another young bull passed me one by one, and at last a mighty head bearing a huge pair of antlers appeared between the aspen trunks, and in a moment the monarch of the herd stepped into a little glade before me and strolled slowly across it. As his head appeared I sighted just in front of it, and when the ivory bead of the Lyman sight showed fairly just back of the shoulder pulled the trigger. The bull did not even start or flinch. Then I forgot my breathlessness, my excitement and everything else but that elk. In an instant a second cartridge was in place, a steady aim taken, and at the shot the great bull dropped to his knees, but rose at once and continued his slow walk. So he kept on walking and I kept on shooting until the aspens on the other side of the glade concealed him. Then I dropped on the rock and sat and gasped from excitement and exertion together, for at least ten minutes.

When breath came back I walked slowly up the hill to the point of his vanishing, and only a few yards beyond found the great elk stone dead and with four bullets clean through him. The orifice of exit was scarcely larger than that of entrance, and the balls had evidently lost but little velocity in passing through nearly two feet of flesh and bone, showing the great power of the .45-90-300 cartridge.

We had no means of weighing or exactly measuring this animal, but estimated his weight at 1,100lbs. or over, his height at the withers over 5ft. and the weight of his head and horns at about 100lbs. The horns were very long and remarkably heavy, having the usual twelve regular points, and three large and four small reversed points, so that he could properly be called a nineteen-point head. Having a Kodak in camp I was able to get a good photograph of "the entire outfit," which Western expression corresponds strictly to the Yankee "the whole kit and caboodle."

A. ST. J. NEWBERRY.

## A LAKE VIEW TOAST.

Topeka, Kan., Nov. 24.—*Editor Forest and Stream:* The Lake View Shooting and Fishing Association was organized in 1891 as a stock company to maintain a fish and game preserve and for the recreation of its members. In its preserve of Lake View, situated along the line of the A., T. & S. F. R. R., five miles west of the city of Lawrence, Kan., it has one of the best bass preserves in the West. The original membership consisted of fifty stockholders of the city of Lawrence and fifty of Topeka, but the shares soon went to a high premium, and a few of them have been scattered from Chicago on the east to Denver on the west.

For the purpose of cementing good fellowship among the members of the Association, in March of 1894 the members residing at Topeka gave a banquet at the club house on the grounds as a surprise party to the Lawrence members, and on the evening of Oct. 23 the Lawrence members gave their return banquet to the Topeka members and other invited guests. The club house was decorated with bunting and evergreens and the famous heads of game belonging to Prof. Dyche, of the State University, as the Kansas State University furnishes of its professors five members of the Lawrence contingent. The banquet was all that could be desired.

I inclose a programme of the toasts and responses, but owing to the departure of the train conveying the Topeka membership home, it was somewhat abridged; and after the address of welcome and its response, Profs. White, Robinson and Dyche, of Lawrence, were called, and Messrs. McNeal, Ware, Baker and W. F. Rightmire, of Topeka; but the event of the evening was the response of the Rev. Dr. Roberts, of Kansas City, Mo., to "Missouri's Greeting to Kansas," at the close of which the Topeka members, with three cheers for the Lawrence membership and the invited guests, took their departure. I send you Mr. Rightmire's response to "The Gun and Rod."

Observer.

### "The Gun and Rod."

We can all remember in our childhood the popular poem of the "Old Oaken Bucket," in which the poet sung, "How dear to my heart are the scenes of my childhood," so at this time in responding to those magic words that have been assigned as my subject, permit me to say that if that poet had ever felt the thrill of the communion with nature that comes to every true sportsman afield and afloat, instead of singing of "The Old Oaken Bucket" he would have sung of the sports of his childhood, and then we should have had embalmed in song the love of nature's enthusiast for those true companions of his hours of leisure, the gun and rod.

May I express it as the desire of every sportsman that the poetic gifts of Whitcomb Reily or our own "Ironquil" will yet choose this live subject; and then what joy it will give us to sing their choice meters of our early love for that old family relic, the old gun. In your speaker's case it was an old flint-lock that had been changed to use percussion caps, that had been carried by his mother's grandfather at the siege of Louisberg, when the colonists captured that stronghold of France in the New World. It was known as a Queen Ann's musket, and with it he used at least to frighten the chipmunks, squirrels, crows and woodchucks upon his father's hillside farm in central New York, and to produce a lameness in the region of the right shoulder. But in spite of all its imperfections that old gun held such a warm place in our youthful affections that the improved guns of our maturer years have never caused us to forget it, and to make a confession, I do not believe that my first deer, a five-pronged buck, gave me half as much pride and self-satisfaction as did the death of the first chipmunk brought to bag with the old musket.

The rods of our childhood of which we all have clear, distinct, and sometimes tender recollections, were of many kinds, but principally of beech, birch and ironwood, used while we toed the line, and were the bait that was whipped upon the line, while irate parents and schoolmasters wielded the rods. But even such misapplied use of the rod did not cause a final separation and absolute divorce between the rod and ourselves, for we all lovingly remember those halcyon days, when with bent pins for hooks, wrapping twine for line, and ash or hickory sprout for a rod, and worms for bait, we strolled along the banks of brooks for chubs, dace and the beautiful brook trout, or perched upon the remains of old trees that had fallen into ponds or lakes, caught strings of perch, sunfish, goggle-eyes and bullheads far more satisfactory than we have ever caught of bass and trout in our maturer years.

The joy of those early days with gun and rod will ever linger as the brightest on memory's pages, and ought to be embalmed in holiness, because we were then too young to know anything about that satire upon fishermen, invented by some fiend incarnate, who said, "All fishermen will lie," and at that period of our lives we knew nothing of the license granted to "fish stories," and innocently tried to tell the truth about our exploits on land and water.

What sportsman present but cherishes the memory of the time he felt the thrill that came along his line, causing every nerve to tingle with emotion, as by a deft turn of his wrist he hooked the king trout of the pool, or the tackle-smashing bass of the pond or lake, and how eagerly yet carefully he tried to land it; and when the fish, through its own innate energy, or the lack of skill on the part of the angler, gained its freedom, oh, the disappointment! and how you blamed yourself, if alone, or laid the fault upon your tackle, if you had a companion. And when you afterward related the incident, what person present will make an affidavit that you gave your friends a veritable account of the transaction, and did not tell a "fish story?"

How pleasant the recollection of that picture hung on memory's wall of the time when we approached our first big game, upon a still-hunt. How many-colored the leaves of the forest were on that most beautiful day of the early fall. How the gold of the hickory, birch and beech harmonized with the red and purple of the maple and oak, and the dark green of the pine, spruce and hemlock. What a joy it was to breathe the crisp morning air. How the pulse throbbed and the heart thumped as we carefully crept up the hillside to deal death with the rifle to the deer in the vale beyond the hill. And how when out of breath we reached the crest of the hill and tried to sight our rifle, we had the buck fever in such an intense form that we could not have taken a good aim at a mountain.

Such are the pleasant pictures that furnish the bright pages of a true sportsman's memory, and each one of you will agree with me that it is not the capture of fish or game that gives the zest and charm to the ramble afield, or the float upon the water, but the pleasure of the communion with nature that such occasions afford, and the joyous recollections that linger around such trips in after years.

If we consider the effects the gun and rod have upon their users we find that the patience, inculcated while still-fishing and waiting for a bite, is forever afterward a characteristic of the sportsman. The skill, caution and alertness that come from the proper use of the gun in still-hunting, are by their possessor put in daily use in all the business vocations of life. We adopt as an axiom the rule that the use of the gun and rod for recreation will make of their users better and more successful men; and the villain who was the author of the saying, "Too lazy for anything but a fisherman," was a base slanderer. Let him learn the lesson that each one of the members of the Lake View Association has so well been taught by experience, that "It takes a great amount of hard work to be a successful fisherman."

While we are willing to verify the statement that the sportsmanlike use of the gun and rod makes better citizens of their owners, yet there are some prejudiced persons so benighted that they will deny this and boldly affirm the contrary. It was my fate to attend a lecture given by the Society for the Prevention of Cruelty to Animals, where the lecturer had such a great love for the animal kingdom that he was willing to lecture for the Society in their behalf at a large annual salary, and at the lecture he uttered this libel upon sportsmen, he said: "You may take your most upright, truthful Christian citizen in any community and make him a present of a breachloading shotgun, a jointed rod and reel and a hunting dog, and in two weeks' time he will become such a liar that none of his friends will believe anything he says, and he himself will soon come to the conclusion that it is impossible for him to tell the truth."

Let me express the wish that every lover of the rod and gun may have such joyous use of them, that as his head grows more snow-like, his footsteps fewer and halting, he may look back upon a life enlivened by the joys of the chase; and as he dozes away his few short years may his dreams be happy ones of ranging the fields and woods of dreamland, and may he float down the river of Lethe accompanied by those most joyous companions, "the gun and rod."

## WOMAN AND FIELD SPORTS.

It is a cause of wonder and surprise to me when I am off on my summer vacations in the forests that so few women manifest taste for shooting and fishing. Not so much that there is a certain accomplishment in the use of the rod and rifle, but rather for the athletic benefits which come from their use, for either develops muscle, the stability of which is in large degree the mainstay of health. Such practice also trains the eye and mind by concentration, for an expert with the rifle must have abandoned unsteadiness of sight and thought, and the nimble rod is no less exacting of that equipoise of its holder, which is required to deftly cast a fly and recover the object for which it was sent out. No flighty person, of either sex, can shoot or cast successfully; but by practice a steadiness of thought and nerve can be acquired which will stand out in singular contrast with previous frivolity. There is discipline in it which is not found in any pleasure or in any vocation.

Physically, there is in these great opportunity for recreation and development, for either the rifle or the rod offers some incentive for a tramp or a boat pull. Not that women may hunt the forests or rivers as men hunt them, through thickets and over rapids unattended, but with proper observance of the rules of decorum and comfort, always with some object in view when short or long excursions by land or water are contemplated.

Women who will train themselves and accept suggestions from experts, almost invariably become accomplished in both shooting and fishing. The most perfect fly-casting I ever saw was by a highly cultured lady, and I know several who can clip off the head of a linnet at twenty paces almost unerringly, and who will also kill a deer at long range as stoically as an old hunter.

There is a growing tendency among women to give more attention to outdoor sports, trampling underfoot those old notions which would permit her no liberties outside of the parlor. Under such restraints, for want of wholesome, proper exercise, she began to deteriorate in both health and physique, and the necessity of such manner of life as would restore to her her health, form and beauty, so impressed itself upon her that innovations upon old customs and prudish notions naturally followed. So it is in these days that the "summer girl" no longer looks disdainfully upon an expert use of oars, or under proper escort hesitates to follow the longest or most obscure trail, or climb the highest mountain, or do any of many things which were once shocking to "good society." The true American girl of to-day has her head bent in the right direction, and in time will practice those arts for building up a strong constitution during the summer time which will secure to her the comforts which good health and development command. When she has a proper woods costume and finds pleasure as well as profit in the sports from which she has long been debarred, there will be a stronger and better generation of women to distribute more joy and sunshine among mankind.

D. H. B.

### From Florida's West Coast.

Tarpon Springs, Fla., Nov. 25.—Fishing is good. R. W. Clemson caught a 16-pound tarpon in the Spring last week. He said it was quite a lively fish for a 6-ounce rod. Quail have been fairly plenty this fall. Deer not many, but turkey—why the woods are full of them, and we have had so many that we have lost all relish for Thanksgiving. We are having glorious weather. We have only one trouble—our Mayor went out and got a bear last week, and he is now too big for the town. I was glad to hear of "Danvis Folks" in book form. I don't know when I have read anything that touched me like the closing chapters of "Danvis Folks." Tarpon.

# Natural History.

### Foxes in Trees.

*Editor Forest and Stream:*

When I read the article in a recent issue of the Forest and Stream by Tappan Adney, describing how he found a fox snugly housed in a nest in a treetop, I felt very much like hunting the gentleman up and giving him a bear hug.

Up in the Berkshire Hill country I have been looked upon for a long time as a past grand master in the art of lying, simply because I stated in a public place in North Adams that in fox hunting in the Ozark Mountains of Missouri the pack of hounds I followed ran a fox until the animal took refuge in a treetop. When I told the story every one shook their heads and one or two left the room. But all the same, while following old Doc. McGregor's pack, about two miles southwest of Dixon, Mo., the hounds ran a beautiful red fox up a tree, and when we arrived upon the scene the hounds stood at the roots of the tree looking at the snug and safe perch of old Reynard.

On other occasions during my stay in that region I witnessed several similar incidents. Whether locality has anything to do with the habits of the fox I am not prepared to say, but when any one claims that foxes do not climb trees it is due to ignorance. Fenton Samuel.

### Wild Pigeons.

Rome, N. Y., Nov. 26.—*Editor Forest and Stream:* On reading the article which appeared in one of your late issues in relation to the return of wild pigeons to central New York and to the fields once so prolific of these most beautiful birds, I was fearful that Dr. Kidd had been misinformed in relation to the facts in the case.

On making inquiry of truthful sportsmen who know whereof they speak, I would say for the benefit of the Doctor and all others interested, that many flocks have been seen in their flights over the highlands north of us and that on the pine plains, five miles west of our city, a few flocks have baited and some have been trapped. Should they return next season we will see that the poachers do not murder or frighten them from the roosts they have this fall pre-empted.

In the days when these game birds were so very plentiful was it not sport right royal to pop them on the wing as they were encircling the buckwheat stubble? Then roasting their plump and fat flesh by the camp-fire, serving them with rashers of bacon and corn-bread, a dish was had to be relished by the boys of my day. J. B. McH.

### Gray Squirrel Variations.

Rome, N. Y.—For the benefit of Mr. Comstock who would like information in relation to squirrels, let me relate that owing to the past very mild winter many of these beautiful little "varmints" pulled through slick and fat.

The gray and the red species have been quite plentiful throughout central and all northern New York, yet not a black one have I seen nor heard of. At least two litters of albinos of the gray family have been "hatched" on Floyd hill a few miles north of us. Some of them have been shot and offered for sale in our city. Slick, full-fledged and fat, they found ready market at one dollar each. J. B. McH.

### The Linnæan Society of New York.

A regular meeting of the Society will be held at the American Museum of Natural History, Seventy-seventh street and Eighth avenue, on Tuesday evenings, Dec. 11 and 25, at 8 o'clock. Dec. 11—R. L. Ditmars, "Notes on some Species of the Genus *Crotalus*, with a brief Review of the Genus." Dec. 25—Walter W. Granger, "Remarks on the Mammals of the Black Hills and Vicinity."

Walter W. Granger, Secretary.

## CHICAGO AND THE WEST.

### The Present and Past in the Wilder West.

[*From a Staff Correspondent.*]

BUTTE, MONTANA,

The Chicago of the Mountains.

Chicago, Ill., Oct. 18.—In earlier mention of the Montana cities I have spoken of the strange contrast presented in the blending of the mountain life of the past with that of what we may call the new civilization of the West. The conflict of the broad-brimmed hat and the Derby is nowhere more in evidence than in these large Montana towns. This, however, must be said under qualification, for in the very largest city of Montana the contrast no longer exists. The past is gone and nothing remains but the present, a very utilitarian and material present. At Butte City you may, it is true, occasionally meet with an old-timer, whose individuality will suggest the flavor of the frontier, but he is apt to be regarded as a curiosity, even by those who rejoice in the title of the oldest inhabitants of Butte. There are occasionally Indians in Butte, but they pay railroad fare and wear hats, and where you will see one Indian you will meet a hundred Cornish mining men with dress and dialect uncouth as that of the Indians, but still showing nothing to suggest any American or Western past. Butte has no ancient history and is glad of it. Butte is dirty, rich, busy, progressive, enterprising and materialistic. It is the Chicago of the mountains, a city with a bigger reputation for its size than probably any city in the world. There is hardly any civilized land in which the name of Butte City is not regarded as a synonym for wealth and energy coupled with a broad-gauged generosity in matters of business, pleasure or morality. Butte is the "red hot town" par excellence. The city government is doing its feeble best to change its reputation, but the reputation, I fear, will go marching on for many and many a day to come.

If there is on earth anywhere a more prosaic, unpicturesque, unbeautiful city than Chicago it is this same prototype, this miniature Chicago, Butte, the red-hot town of the mountains. It has not in it or about it one thing beautiful in landscape or environment. The great naked butte which gave the town its name stretches up cheerless and desolate, without the first inviting feature to commend it. The smoke of the smelters has killed all the feeble vegetation of the hill side, and the too energetic axe men have denuded the mountains absolutely of their forests. The town is naked, bald, prosaic, but full of energy and go, and full of wealth and possibilities of wealth to an extent unequaled in any community less unique. The city lies in a deep dip or valley of the mountains. You go up into the high place, which the sightseer first of all searches out, and as you look out over, or rather up to the surrounding country you see the range of the great Continental Divide sweeping about you in a great letter S. The climbing Northern Pacific breaks away from the valley for the east. The Montana Union finds an easier trail back up the valley to Garrisons. The Great Northern forces its way through a cañon so black and narrow that you wonder again at the audacity of the men who built the iron trail. And then you wonder why they should ever built these trails at all into this desolate and forbidding angle of the Continental Range. The citizen of Butte does not concern himself over such impolite questioning as this. He pities you. He points to the awful suffocating columns of smoke coming from the colossal chimneys on the mountain side above the town, and he talks to you in millions with a glibness sufficient to give you swimming of the head. For Butte is built on a solid mass of rich mineral which extends nobody knows how far and deep and wide into the secret subterranean chambers of the hills. Butte couldn't help being wealthy if she tried. Like Chicago, she is the child of destiny, and the children of destiny cannot be repressed, neither can their clothing be measured for them for many years in advance.

### The Rise of Marcus.

The Jason of this town is one Marcus Daly, who came to these regions, so goes the story, with nothing but his pickax and his nerve. The history of Marcus reads like a piece of romance of the Monte Cristo order. He seems to have been a man of simple, ordinary habits at first, but blessed above all with that most desirable of all qualities, the faculty of "getting there." You cannot eliminate from the character of the mountain man the blind conviction that there is such a thing as "luck," and indeed he is a man of very limited experience who inflates himself with the idea that there is no such thing as luck, and who ascribes his own success to his own excellence in energy and judgment. Marcus might have been all kinds of a man, but without his luck he could never have gotten where he is. A few years ago he dawned on this corner of the world, as I have said, with nothing but his pickax and his nerve, and maybe a pipeful of tobacco. Other men have dug in all sorts of places in the mountains, and Marcus himself could have taken his pickax a mile from where he employed it and used it to such effect that he might still be working at $1.50 a day. But Marcus didn't do that. He sunk his pickax where the mineral was, and dug up gold, diamonds, rubies, emeralds, race horses, houses, lands and even, they do say, State officials. He owned first his pickax, then the entire mine, then the smelters, then a city of his own (Anaconda), and now they say he owns Montana. Unless something be done to Marcus I fear he will own the earth.

### The Sportsmanship is Modern.

We should naturally expect to find the sportsmanship of Butte latter day, modern and up to date in every respect. Butte has no frontier history and bears no suggestion of the days of the mountain men. There are big-game hunters in Butte and small-game hunters and anglers, but they need to go some distance from the city to practice their craft, and the city itself suggests no worse possibilities in that line than does any big manufacturing town in the East. Butte has reached the stage of development in sporting matters instanced by the trap club and the duck preserve. One would hardly think of finding duck shooting out here in the mountains, but it is a fact that the Red Rock Club preserve, on Red Rock Lake, where the sportsmen go for their wildfowl shooting, is one of the best fowling grounds in the West, and exceptionally good bags are often made there. The membership of the club is pretty well scattered over the State and the shooting privileges are much valued by the lovers of the shotgun in that region. It is something of a run from Butte down to Red Rock Lake, but the reward is ample when the trip is made. Butte sportsmen are obliged to go thirty miles for their trout fishing, too, but they think nothing of that.

The Butte Rod and Gun Club is a vigorous association of trap-shooters, as modern in its ideas and methods as any in the country, and including in its numbers some exceptionally good shots. The leading shooter in this body and perhaps the most prominent man in Montana in what we may call the modern sportsmanship, the sportsmanship of protection and preservation, is Mr. John F. Cowan, whom all the Montana men have delighted to honor with positions of trust and responsibility. Mr. Cowan is a gentleman of singular reticence and modesty, but his record, both in business and sportsmanship, is one of energy and success. Closely identified with some of the largest business enterprises in the city, he yet has time to shoot in a match or sweepstakes, and always time to spend in furthering the better interests of the sportsmanship of to-day. Mr. Cowan has won and successfully defended in five shoots the old Hight and Fairfield medal, indicative of the live bird championship of Montana, and he stands a good show for at least temporary ownership of the new live bird medal which will be offered by the young Montana State Sportsman's Association from year to year henceforth. Mr. Cowan, as has already been announced in these columns, was chosen president of the State Association for the first year, and a better man could not have been selected. Mr. Cowan is not altogether unknown as a shooter in the East, and Chicago sportsmen will remember to have met him at the traps in this city on several occasions in the past, when he left his Western home for a short visit in the East. Mr. Cowan is a college graduate of Princeton. He was bow oar in the college crew of '81 and on his office wall there hangs a fine photograph of the Princeton crew which naturally Mr. Cowan prizes very much. Mr. Deveraux, who was coach for the Princeton crew that year, is one of the group in that photograph. Mr. Deveraux also sought his fortune in the West, and becoming a part owner in the famous Molly Gibson mine at Aspen, Colorado, became a very wealthy man.

### There is no West.

There is one very pleasant feature of the Butte Rod and Gun Club which might well be emulated by other associations of that nature. The club has very nicely fitted up social club rooms, which serve as headquarters for the sportsmen of the town. Here are displayed the trophies, etc., of the club, including the handsome cup indicating the State clay-bird championship, which was won by the Butte Club in 1887.

There is a very good gun store at Butte and run by a very good and accommodating owner, Mr. A. Wehl, who is numbered as one of the fixtures in all the meetings and doings of the Butte Rod and Gun Club. The stranger within the walls of this mountain city can secure all the latest wrinkles in guns and ammunition at Mr. Wehl's place, and there are few recent ideas known to the craft in any section of the country which cannot be found in full evidence here. Verily, the old days are past, and the new days are upon us. The shotgun replaces the rifle and is now used for the destruction of the artificial substitutes for the game which once inhabited these districts. In the middle of the Continental Range there is no longer any West. It is past and gone. Butte is only geographically in the West. In its methods, its business life, its customs, its sportsmanship, Butte is the same as San Francisco, Chicago, New York. The modern day is at hand. For a better exhibition of the modern sportsmanship, or for a more kindly or hospitable reception at the hands of the ancient and honorable craft of sportsmen, whose fundamental principles do not change with the years, you will search in vain to find better exemplification than in this busy, bustling, prosperous, mountain Chicago, held in the crooked arm of the Continental Range.

E. HOUGH.

THE LAST GENERATION.
From "Hoofs, Claws and Antlers."

## SHOOTING TALK.

The editor's call for a statement of the positions assumed in rifle shooting by hunters is, in the very nature of things, such an appeal to the garrulity of every old rifle crank, that he need not be surprised if it buries the editorial chair under an avalanche of manuscript. For my own part, I have tried almost every possible position, settling down finally to straight off-hand shooting as giving the very best results.

My first deer was killed in Potawatamie county, Iowa, in 1854, on my fifteenth birthday (Christmas Day). From the time when that never-to-be-forgotten five-point white-tail buck fell in front of my little muzzleloading rifle, deer hunting became almost an infatuation.

I remember occasions when what proved to be a tracking snow beginning to fall in the evening, and having obtained my father's promise of a holiday on the morrow, that appetite went from me instantly—not a mouthful of supper could be eaten—and having cast fifty bullets in the little old-fashioned round bullet moulds (always fifty bullets, though I never fired half a dozen shots any day), and having provided powder, caps and linen patches well greased, found myself so devoured with excitement and impatience that sleep was well nigh impossible; and when morning dawned nothing but the stern mandate of my father forced me to pay the slightest attention to the breakfast table before setting out for an all-day's tramp in search of the elusive creatures whose white banners so often waved a farewell, the agony of which was never fathomed on earth save by the leg-weary boy, alone upon the wide prairie, far, far behind.

And buck ague! I have wondered if any one else ever did, or could, suffer therewith as I used to in the days of my boyhood. Being naturally very nervous, I never could shoot a rifle with a single trigger with any degree of accuracy, but was obliged to use double triggers, set to go at a touch. Even then so poor a marksman was I, that I was obliged to take a rest of some kind at every shot at deer, for the sight of the beautiful creature in front of my rifle would set my heart to pumping like a hydraulic ram. I remember well the time when, having already killed two deer, and beginning to fancy myself a great hunter, and having practiced rifle shooting until I was reasonably sure of hitting a prairie chicken off-hand at 50yds., and the first tracking snow of the season having come, I took the trail of a doe and two fawns on the west bank of the Nishnabotna River, just above Big Grove, and making a successful crawl upon the watchful creatures until I was within 75yds. of the unsuspecting doe grazing peacefully broadside to, I took a knee rest (that is, with one knee on the ground), and missed the big target completely.

Away went two of the group, flying over the smooth bottom land with the speed of racers, but fortunately my luck held, for the buck fawn, the fool of the family, not having seen me, and after a long stare, during which I hugged the earth and peeped through the grass at him, concluding that it wasn't going to be much of a shower, after all, peacefully resumed his grazing.

Creeping back behind a little hillock I reloaded, and having crawled up within 75yds. of the silly creature, and watching until his head was down in the grass I rose on one knee and vainly tried to steady the wobbling rifle on his body long enough for me to touch the trigger. In vain! His head was rising again and I dropped into the grass to await another opportunity. How many times this was repeated I do not remember, several at any rate. While crouched in the grass my heart pulsated only at the normal rate, but up on my knee I must not rise without another tumult. It was one of the queerest situations I was ever in. Positively, it seemed almost as though my heart was another fellow with whom I was trying to make terms. I would lie and reason the matter out, expostulating and explaining, and trying to get the consent of my heart to remain quiet for only a short time—say a minute or so.

Apparently I could arrange for anything or everything—except! I mustn't try to rise to my knee. And finally, after probably half a dozen vain attempts, the queer fancy seemed to possess me of stealing a march upon the other fellow while he wasn't looking. And the oddity of the whole affair was I almost made it. For rising quickly I steadied the rifle as much as possible for a shot at his heart, I touched the trigger just as the dreaded upheaval began, and broke the little fellow's neck. For once in my life "bull-headed luck" was as good as science.

I don't know how buck ague affects others, but it was the foe of my boyish enjoyment, and for many years so hindered my marksmanship that it obliged me to make up for lack of skill in this direction by the most consummate care and skill in approaching game, and finally more than repaid all it cost, when, after the buck ague disappeared, and I had attained to something of proficiency with the rifle, I was enabled to get game where better riflemen, who were not so good hunters, were utterly at fault.

Still I have always found that the double-triggered rifle was a necessity to riflemen of nervous temperament, though the logic of events finally convinced me that the very best mode—for me at least—was off-hand shooting, straight.

Take aim with the hair triggered rifle the best you can, wait patiently until the front bead swings across the center—it will come some time—touch! and the thing is done.

And yet, does the scientific rifleman with nerves of steel get a thousandth part of the enjoyment following a successful shot that was realized by the half-crazy boy dancing and shivering his very teeth loose around the first antlered trophy of his little skill? I trow not, by a long chalk.

And now how one thing suggests another. I think of the many interesting sketches and reminiscences contributed by my brothers of the great family of American sportsmen for my gratification through the columns of our dear old paper during the past year, and the question arises, what shall I do for them in return? Or how fail to note the many pleasing things which the paper has contained for the instruction and entertainment of its mighty host of readers?

Shall I tell of the unsuccessful hunt I took in the mountains, when having taken the wrong trail and night overtaking me in a lonely spot where grass for the pony and water for us both was finally obtained, I lay down in front of the roaring camp-fire, and with nose buried in the pages of Forest and Stream forgot my troubles while camping on the shore of the beautiful lake with Br'er Hough on the occasion of Forest and Stream's Fourth Annual?

I might if I were not in such haste to commend Br'er O. O. S. for his courage in confessing that he has actually eaten pawpaws!

Bear in mind that I never harbored a suspicion regarding the cougar which swam against the handspike, but I do like to have things fully explained.

It is all straight now. Of course it is understood that a man who dares eat a pawpaw is a match for a cougar any day in the week, but why didn't the valorous hunter tell us the whole story?

Why didn't he tell us that when the infuriated brute swam up to the edge of the driftwood, "breathing out threatenings and slaughter," that he slyly drew from his pocket a half-eaten pawpaw and shoved it under the poor brute's nose, forcing her to smell it until, deadly sick of life and all its promised joys, she turned away to drown herself in sheer self-defense, when our friend O. O. S. proceeded to "take the disadvantage" of her with a club? And isn't it gratifying to note that the researches of modern colored science have thrown so much light upon the queer actions of the bluejay?

It was always evident that the little rascal was up to some mischief or "devilment," but when hurrying to escape his furious scolding I was never painstaking enough to first examine his teeth.

Let the grain of sand be really shown in evidence, and I'm ready to declare war upon him, pretty as he is.

Observe, too, the effect of the educational influence of the sportsman's paper. I venture to say that until Forest and Stream began its uplifting and instructive teachings in Dixie that never a single black bear in all Florida had learned to dive to the bottom of a lagoon and bring up an alligator in his arms. Great is the power of the press!

And now, while I am exceedingly grateful that I am far enough off in the jungle to discourage all possible attempts of our accomplished and racy friend, O. O. S., to shy a pawpaw at me with any hope of success, I'll rest my cramped wrist by bidding our whole family (of course including dear old "Shoshone"), a kind good night.

Orin Belknap.

## TEXAS AND THE SOUTHWEST.

### Ducks by the Million.

From all along the coast of Corpus Christi Bay comes word to the effect that the flight of bluebills is greater this year than ever before. On the Oso (a large shallow body of brackish water), seven miles from Corpus, the flight of ducks is beginning, while thousands upon thousands of bluebills, redheads and canvasbacks, are twice a day clearing the air on their way up and down the Nueces Bay. They fly in the morning in search of fresh water and food, which abounds at the mouth of the Nueces River, and return in the evening to roost in the bay and the neighboring lagoons.

The bluebill duck is not generally prized as an article of food in the northern waters, but along our Texas coast nearly every one prefers it to any other duck. The reason for this is that they feed almost exclusively upon small oysters and eat no fish whatever. The flesh of the bluebill that feed on fresh water marshes is rather fishy because they sometimes catch a luckless minnow in their long dives and consequently taste fishy, but the Texas bird is too high-toned; he despises the plebian fish diet and eats only the best that the oyster banks afford—hence the fine flavor.

### Shame! Shame!

A publication issued from Dallas supposedly in the interest of sportsmen has startled the Southwest in general and the small-bore shooters of San Antonio in particular by proposing a grand field contest. The proprietors of the publication aforesaid have announced what they term a grand field tournament to take place during the holidays all over the State. Here is the advertisement as sent to a San Antonio gun house:

Prize Shoot.—$50 silver cup presented by *Cyclist and Sportsman*, Dallas, Tex., to be contested for during the Christmas holidays, at San Antonio, Tex. Eight hours' shoot over setter or pointer with 12-gauge (or under) shotgun, charge not to exceed 1¼oz. shot and 4drs. powder. Game to consist of quail, prairie chicken, duck, teal, snipe, plover, squirrel and rabbit. (Count by points, to be arranged by a committee.)' The best bag, or highest score, wins the prize. Contest to take place within a radius of twelve miles of San Antonio. Note.—This contest is open to all paid-up yearly subscribers to *Cyclist and Sportsman*. All desiring to compete who are not subscribers can subscribe through this store.

The reader will notice that the best bag is to win the prize emblematic of being the greatest game killer in the State. While the progenitors of the scheme undoubtedly will champion the cause of game protection, while they will turn all kinds of literary handsprings condemnatory of the conduct of pot and market-hunters, it seems to me a little out of place for them to offer a premium on the indiscriminate slaughter of game. One of the conditions of the proposed slaughter for the silver cup, is that the shoot must take place "over a setter or pointer." Of course, all sportsmen well know that duck, snipe, plover, squirrel and rabbit are nicely hunted by either dog. I think my friend Hough's column in Forest and Stream would be printed in red should he witness the harrowing spectacle of my elephant-pointer climbing a live oak after a festive rodent of the woods. But may be the contest may not take place after all. There might be a cyclone of indignation on the date of the proposed shoot. I hope there will.

### At Mud Flats.

A gay party of officers from Fort Sam Houston are enjoying the hospitality of Geo. Fulton, the "Prince of the Southwest," at his ranch, 150 miles from San Antonio, on the Aransas Pass railway. Their first day's hunt netted a lot of great big honker geese and a fine string of juicy mallards and teal.

### Plenty of Tarpon.

The Greek sailors at Corpus Christi say that the tarpon are so numerous off Flower Bluff (about ten miles south of the town) that they frequently jump clean over their boats and actually churn the water into a foam. On several occasions small tarpon have been caught in hundreds in their nets.

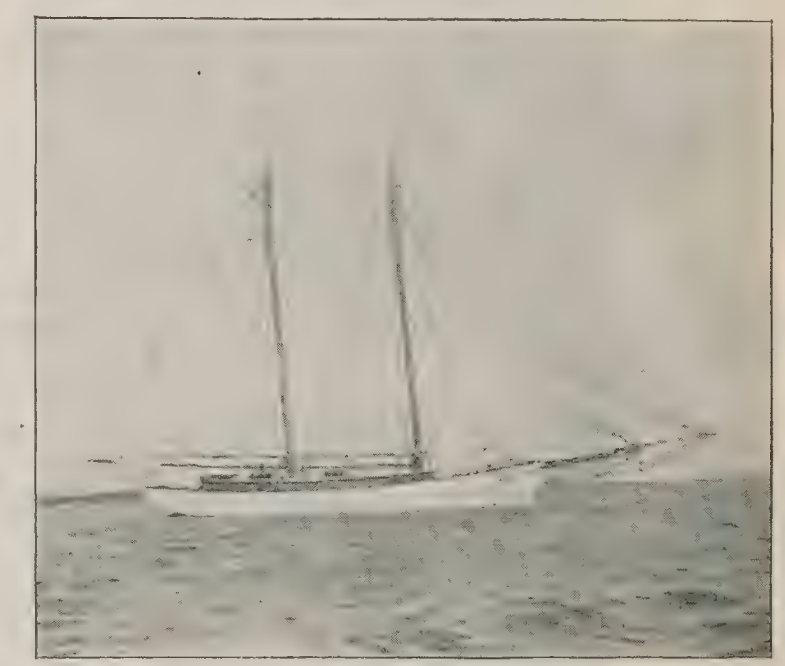
### Swans in Plenty.

A rover of the Texas coast, who is thoroughly reliable, told me last week that an ordinary shot could load a wagon (presumably a small one) with white swan any evening on Hines Bay. He also stated that Mons. Scolopax had taken possession of all the lagoons and marshes. There wasn't a word said about killing them with sticks, but he stated that he fired twenty shots at them and finally left in disgust, rightfully concluding that he wasn't much af a jacksnipe hunter, nohow.

### Visitors.

Two brothers, Messrs. Schmidt, of Milwaukee, are visiting San Antonio. They brought a letter of introduction from Dick Merrill, of the same place, but now in the Deltas of the Mississippi. This office was also pleasantly visited by Mr. Winton, a popular sportsman of San Luis Potosi, Mexico.

Texas Field.



## THE FLIGHT OF THE BRANT.

### At the Roanoke Association's Hunting Grounds.

The little white dingey pulled from the dock at the old city named after good Queen Bess to the white-winged yacht Brant that lay straining at her anchor under the strong flow of the ebb tide. Laden with guns, *impedimenta* and eager-hearted sportsmen, with the soft, meek-eyed setters crouching low, the little skiff reached the Brant and everything was tumbled aboard. Sharp and quick the orders from Capt. Hayman to the crew, and with all canvas spread the yacht drifted down the waters of old Pasquotank, only the topsails set on the lofty, slender spars catching faintest impetus from the straying zephyrs.

After supper, stretched on deck with Prima Donna, of royal English setter blood, poking a cold nose into my face for recognition, I watched the stars of the Southern skies as we drifted down toward the sound. From the dark heights the *honk, honk* made the setter lift up her head and scent the breeze with short, eager sniffs as if to say, "Ah, just wait until to-morrow."

Oh, Queen Bess, the little country village named after you has not enjoyed much benefit from the distinction

THE BRANT.

and hardly borne the weight of a sovereign name. Yet through its portals passes many an one who drinks no stinted bumper to the royal sport that lies the other side, and remembers Elizabeth City with that indescribable feeling and surge of blood that recalls the shot that tops the record.

Balmy the night and soft the rocking of the yacht as we slept through the hours speeding the Brant on her voyage to Roanoke Island. One knows not when the yacht comes to anchorage off the club house of the Roanoke Cruising Association, and the hoarse booming of the breakers on the Diamonds and the sandy ridges shutting the turbulence of the ocean from the placidness of the sound, only lull the sleeper to sweeter dreams and restful slumbers.

Early in the morning I rose and went on deck to take a plunge in the sound, whose soft tepid touch made me doubt whether it was but a night since I had left the bleak, dreary wintriness of January days in New York. It gives one a feeling of contempt for the comfortable bath-room on the yacht.

Sunday we went to service at Manteo, an old village on the island named after an old Indian chief, and for dinner at "Uncle Bill Basnight's" ate yams and drank scuppernong wine that tasted at first like *Lafaurie avec marrons* at "Dels."

We decided to live on the yacht (a veritable palace) instead of at the club house, to the great disappointment of Spence Daniels and *chef* Mose—the greatest dusky "Lothario" and "Deacon of the Church" (*sic*) the African world has ever been blessed with: "Er mos' powerful exhorter, sah, and a leader to der mo'ners' bench, sah."

CROATAN LIGHT.

In the gray mist that shrouds the earth and hides the face of the waters before dawn, we got into the skiffs where the decoys, guns and rubbers had already been stowed, and sailed into the east. To the south went Mr. Koehler to Spence's Lump, while I went to the Widow's Lump.

Bobby's noisy clack and extreme Carolina dialect moved us to the wildest merriment with his criticism and comment on our guns and attire, as we tacked and sailed into the wind as can only the "Car'liny" fishing boats, on our way to the goose lumps. Now a word from Spence Daniels and another from Capt. Hayman, with many a foreboding and gloomy comment on the wind and much more of the same tenor about the wildfowl, until I felt that the day was cast in evil form, and then the skiff stranded. There, far off, barely discernible, nearly two miles away, rose the Widows' Lump, a little island-like spot of sand, with just water enough to float the coop

LIVE DECOYS ON THE LUMP.

filled with live wild decoy geese; and piling the guns and coats on the coop, we waded to the lump, for the water for miles and miles is only a few inches deep, with tortuous channels winding down the middle.

Already the streaks in the sky made us hurry to stake the wild geese (live ones, remember), and hurry Spence with his coop back to the skiff and get him away before the first flights of wildfowl should pass over us.

Into the blind, because the skiff has already faded out of sight in the gray mist; and amid noisy splashing and washing one old gander is already stretching his long neck and straining the leather thong which ties him to the stake driven in the shallows out of sight. Out of the duskiness and gray shadows come muffled sounds as of the heavy wing strokes of the flying geese, that resolve into nothing as we settle ourselves down to patiently wait. Brighter grows the daylight from behind the sandy ridges dividing the ocean from the sound, and the great bars shooting to the zenith light the watery waste into vermilion and carminated blood, and a glowing red ball of fire up comes the sun. Involuntarily made a sun-worshipper, I rise; when Hayman roughly pulls me down, and points with gun barrels directly at the sun just suspended over the rim of the horizon. Lo! there, as if they were issuing from its glowing incandescent mass, a V-shaped dotted line is spread across its face—the apex in its heart and the ends reaching far out. "They are coming this way." How swiftly they fly. "Are they high or low?" But the old gunner says not a word, as if miles away they could hear the hoarse whisper, and lets his hand weigh heavily on my shoulder for utter silence. On they come, nearer and nearer; but, oh! how high. No use, they are too high even for the 10-gauge; but hear that old renegade decoy gander *honk-honk* as he tries to lure his wild brethren to their death. The only thing I suppose the white man taught him. From above the leader echoes *honk-honk*, and we are afraid to move; but they go on, and I stare at Hayman, and Hayman mutters, "Too high," and peers out between the brush of the blind as time goes on.

"See there!" but my eyes detect nothing across the stretch of waters. "Low down on the water coming from the lighthouse." "Too much for my eyes," I am about to say, when I see the whirling forms just over the water coming directly toward us. "Aye, they will light," as the whole twenty decoys begin to flutter and *honk-honk*, and then had the heart stopped beating and the breath bated as the geese alight and begin swimming toward the decoys

"Mark"—"fire"—three wild geese float on the water. "Up and at them"—the second barrels bark and another goose falls as the others wing away.

Out on the sand, Hayman takes some twigs and fixes the dead geese as if they were sitting on the sand—to me they look just as if they were alive sitting upon the nest.

"Great Jupiter! look at that, Hayman." For across the heavens, line after line reaching from the easterly horizon to its westerly rim, came successive flocks as we crouched low down in the blind. Countless myriads moving onward, and then Hayman's hand fall heavily on my shoulder, backing, forcing me lower to the sandy floor. Far over our heads a flock was circling—sailing around and around, answering with noisy greetings the *honk-honk* of the captive renegades luring them to their doom. Noisy converse between the clouds and the sands. Lower and lower they come, and just as they are about to light something frightens them, and then up rises Hayman—and I, needing no prompting, let the iron dogs bark for two that came tumbling almost in the box. A third one tumbled on the water and began fluttering away. Hayman sprang into the water and put two shots into it before he got the goose nearly a quarter of a mile away. Away went the others and then, "See, that one is badly hurt," said Hayman, as one bird seemed to be slowly sinking from the flock flying away off in the distance. Lower, at first, three or four geese seemed to stick to the wounded one, but as he sank lower, the others went back to the flock and the doomed one sank lower and lower, falling slowly to the sound, the life blood ebbing away—badly, maybe fatally hurt, too far for us to get it. Deserted, abandoned and left to die.

So it went on until we had twelve before noon, and then the largest flock of the day settles about 600yds. away on the shoals, the water barely high enough to reach their breasts. The decoys honked to them in vain, and then I rose them with the Winchester and got one straggler going low as they flew over our heads. More real enjoyment in that one feat than in anything that happened that day.

So the hours waned and the day went by, and about 4 o'clock the signal, four shots, brought Bobby with the coops to the lump to take us back. We were all out of the blind on the lump with half the decoys in the box when a flock came right at us. Hayman and I sprang down in the blind and grasped the guns, while Bobby crouched behind the coop and squeezed the old renegade decoy gander until he honked as never honked he before. I named him "Simon Gerty," after the old white renegade on the Ohio, who in the dime novels figured with Daniel Boone.

Heard one ever the yarn before, that the geese came and settled down among the decoys with coop and boy on the lump? Bobby's shrill voice, wild with eager impatience, "kill um," spoiled the intended slaughter, but we got two, making fifteen geese.

Sport enough for the day, and wading across the water we got into the skiff and sailed back to the Brant. A bath and a smart rub down and dinner all ready. And then as the boys cleaned the guns and hung up the fowls, I stretched out on the deck enjoying a *dolce far niente*, the priceless satiety of a sportsman who has had one fair day without mar or spoil.

Mr. Koehler came back with eight geese and two brant and the camera took the picture.

So passed the days for geese and then a day and a day for ducks. Down the Pamlico Sound drops the Brant with white pinions that never tire and willing hearts that beat eagerly to give the guest sport. The keeper of the lighthouse out in the sound rang us a friendly greeting as we sailed by, and we returned the salute by dipping our colors. The light of old Hatteras gleamed far off like a star, and "Bodies" light far behind may at times be seen between flashes, and then we sleep while we wait for dawn.

What counts in sport? Numbers—never—never! Rare, difficult shots. Take the leader or wait for "one" and "five" coolly counted to line with the right and "get 'em both," that's the thing what tells! Quarterer, incomer-sky-rocket—these fill the heart with an elation which never comes on the mere count of the dead wildfowl which strew the deck at the close of the day. Birds enough killed to keep the cankerous disappointment out of the heart, and enough to send home, with a glorious revelry over the multitudes of water fowl flying all

HUNG IN THE SHROUDS OF THE BRANT.

around, and then we go back to get the promised deer. For the ice box in the hold of the Brant has all the geese and ducks we want, although we were more than a little disappointed that no white swan came within reach of the iron hail. So, satisfied with our sport that had no taint of slaughter to rob it of honest pride, we left the ducking grounds.

Back to the club house at Roanoke Island to eat a dinner prepared by Mose and get Spence and Bobby; and then onward for Alligator River the Brant spreads her white wings! Upward and beyond we pick up "Unker Bill" and the two best hounds in Carolina State and the Brant speeds onward. In a howling gale, that is piling the white soap-suds on the Diamonds, which strings the necklace on Hatteras' scrawny neck, and raises the witches' white-caps on the sound, we make the line between the headlands and pick our way between the frothing shoals! One wild gale sweeping shoreward and the tremendous undertow leaves sandy mounds rising out of the ocean where on the last tide there was water twenty fathoms deep. Gleaming in the sun-like burnished silver, they look like a string of brilliants set in emerald green, stretching for miles along the shore. The old residents call them Diamonds.

"On Hatteras' shore the dead man's boots,
Shirt and trousers are wreckers' fruits,
And th' breakers toy, the floater's eyes
Staring sightless—the sea-gull's prize—
While 'Sunday dressed' with honest pride,
He goes to church with sturdy stride."

Early in the morning the rain is falling like a second deluge and the Brant is swinging at anchor. Taking our guns and dogs we go ashore for woodcock and get a few stray ones, some robins, blackbirds and woodpeckers to fill the bag. A bird pie for dinner with broiled woodcock, baked wild goose and Car'liny yams, "fit for the king." Another day of pelting rain and then I make "Unker Bill" promise to make a try for the deer to-morrow even if it should be in the midst of a waterspout. Seven-up and Pedro, novels and yarns, with a very limited little game of a very wild species, and the day is numbered.

About seven in the morning we go ashore and wade and flounder through the marsh and morass until thoroughly tired and wet through from falling and stepping in holes waist deep and trying to keep from standing on our heads as we fall from the slippery logs, we get our stands. From afar comes the soft, mellow bay of the hounds, and then nearer and nearer until almost upon me, and then

DEAD GEESE FOR DECOYS.

fainter and fainter grows the ringing bay until it dies away in a moan, mingling with the patter of falling drops. And later and later all is still. Then from afar the soughing of the wind blended with the patter of the rain and the storm is drowned in the bay of the hound—nearer and nearer, eager, angry, almost on me—which way? Bother the rain! It is coming right against the wind! No, it can't be, for the deer would get the scent! Now the baying stops; the hounds have lost the scent—too bad—the rain—and the moisture in noisy pats dripping down. No, there it is, angry, fierce and maddened—now, right in the face of the wind, the deer comes, the hounds on his very heels. There he is, throwing up his head—one bound—the sharp crack of the rifle—some words best express my thoughts, usually printed like this ——— he is gone. There come the hounds, sharp, short is the yelp—on they go. Ah, silence—they got him—so did I.

Don't you h'ar dat hound a-baying
'N a snatching ob de trail,
Ole Nest'r 's dar, 'n a-staying,
I'll be boun' he'll never fail.
I'm bound he'll shorely get un,
Ise gwine ter eat no mo' ham,
Dis darkey 'll eat dat wenison
Wid grease 'n punkin yam.

"Unker Bill" comes, and thirty or forty yards we find the deer and the hounds licking the blood. "Uncle Bill" hangs up the deer and we start again. Later in the day I missed a better one and a better shot, but that is luck; and after noon we went back to the Brant. Stringing up the deer upon the shrouds, I got a snap shot and then my time is up; we started homeward.

Geese, ducks, woodcock, robins, blackbirds, deer—what a royal cruise. E. J. MYERS.

### In the Michigan Woods.

IRVING, Mich., Nov. 26.—A hunter in Montmercy killed a white deer last week and has had it mounted.

There have been more convictions in the Upper Peninsula for violation of the deer law in October than during the entire four years following the establishment of the office of game warden. Several hundred dollars were collected in fines from outside hunters; tons of venison were seized and given to poor people, and many a dog was shot during the chase.

David Ickes and party, of Hastings, captured two bears while north hunting this fall. They were shipped home, and the larger one attracted a good deal of attention.

Game of all kind is unusually scarce this fall, and what finds its way to market brings a good price.

R. K. Grant and party, of Hastings, will, I believe, return from the north next Tuesday. The latest word from them reports their having shot seven deer.

John Small, of Petoskey, went hunting with a friend who accidentally shot Small in the back. He died before help could reach him. While hunting deer L. C. Hancock was instantly killed by the accidental discharge of a gun in the hands of J. Lafferty. Henry Miller, of Conklin, accidentally killed himself while hunting.

Hugh Huggett, of Gaylord, recently had an exciting experience with a large wildcat. He went alone on a hunting expedition and the cat sprung for his throat as soon as it caught sight of him, but Huggett raised his gun and shot it dead just before it reached him. J. C. YATES.

### Ruffed Grouse Near New York.

YONKERS, N. Y.—Partridges are unusually plentiful along the line of the Harlem Railroad. I know this from personal experience and from many letters received from friends. Any one of the many small towns north of Katonah will afford excellent shooting, provided one will engage some one to put him on the best and most likely cover. Millerton, on this road, two hours' ride from the Grand Central, is a choice place for birds. There are excellent accommodations, and if one should communicate with Mr. Charles Corey, they will find him a most congenial gentleman and a thoroughly well posted sportsman. J. T. W., JR.

## COMBINATION ARMS.

*Editor Forest and Stream:*

In your paper for October 6, there is an article by "Cayuga" condemning the combination gun, chiefly on the ground that it is inferior to a shotgun for winged game shooting, or to a repeating rifle for large game.

Most hunters of practical experience would admit the correctness of this opinion; and yet the fact remains that the combination gun, properly constructed, is more completely adapted to certain kinds of work than either a repeating rifle or an ordinary shotgun.

In places where both large and small game are found and where a hunter or explorer is shooting for food, or perhaps collecting animals for natural history purposes, it is not uncommon to meet with large game when only a shotgun is at hand, or vice versa; and even in countries where native gun bearers are employed, a good opportunity of shooting is often lost while one weapon is being exchanged for the other. Such instances have frequently occurred in my own personal experience.

The threebarreled gun described by "Cayuga" seems to me to be an excellent weapon for use in districts where the .32-20-115 cartridge would be sufficently powerful. It would be well adapted for both large and small game, if the rifle barrel were .40 caliber and chambered for a 60 or 70 grains straight shell, like those made for the Ballard, Maynard and Sharps rifles. Cartridges of this size, although now superseded to some extent by .45-calibers, were for many years found to be very deadly by hunters engaged in the pursuit of deer, wapiti, bear, and even bison. With reduced charges of powder and either round or short conical bullets they are very satisfactory for killing large birds such as wild geese, cranes, etc., when these are too wary to be approached within the range of a shotgun. With minute charges of powder they are equally well adapted for supplying the pot with duck, grouse or rabbits, when it is undesirable to make much noise for fear of disturbing large game.

A Maynard .40-60 rifle in my possession, loaded with 48grs. of powder and a round bullet of 102grs., seated on a thick lubricated wad, carries with accuracy up to 100yds. (At 60yds., fired from a rest, it put five successive bullets into 1⅛in. wide by ⅞in. deep.) With 5grs. of powder and a round ball it shoots well enough to bag a ruffed grouse or rabbit up to 40yds., and on account of the rapidity with which a round ball loses velocity, it is much safer to use about a farm than an ordinary .25 or .32 small game rifle with its conical projectile.

So small a charge gives, of course, a high trajectory when the powder is placed loose in the shell, as is generally done; but this defect is to a great extent overcome by loading in the following manner: Fix the powder at the bottom of the shell with a stiff cloth lubricated wad (like those made by Eley for .40 express rifles), place another wad in the mouth of the shell, press the bullet down until rather less than half of it is above the rim, and fill in the angle evenly all round with some lubricant. Loaded in this way the curve of the bullet's flight is hardly perceptible up to 40yds., and in off-hand shooting would be entirely unnoticed, while the velocity is so great that the lead is flattened on an iron target to the thinness of a quarter dollar.

There seems no way of accounting for this velocity unless on the supposition that the air between the two wads, being suddenly compressed by the explosion, acts on the principle of a boy's popgun, and drives the bullet well into the rifle grooves before the force of the powder comes into full play.

Nitro powders do not act well in these small quantities. Five grains by measure of Schultze fail generally to drive the bullet up to the muzzle.

"Cayuga" mentions that the cylinder barrel of his gun carries bullets well. The other barrel would do the same if choked on the "recess" or "tulip" system. Such barrels can be made very accurate with bullets up to 50 and often 60yds., and although only 16-gauge, carrying large shot with sufficient closeness and force to kill ducks well at 40yds. with No. 5 shot and geese with BB. While it is admitted that a composite gun may be, on the whole, inferior to a good repeating rifle for large game alone, it yet has advantages peculiar to itself which may more than compensate.

In the event, which frequently happens, of a deer at a gallop being missed with the first shot and stopping for a moment to locate the danger, there is a good chance of killing with a bullet from one or both of the smooth barrels; or an equally good chance of the animal disappearing among the bushes before a second shot can be fired from a repeater, through being startled by the noise of the lever working down and up.

If the composite gun be fitted with the double grip action, which although now old-fashioned, is surpassed by none for enduring hard wear, it can be reloaded in perfect silence, a quality which may sometimes be of much importance in thick brush when it is desirable to avoid scaring a timid animal or showing a dangerous wounded animal the exact position of the hunter.

Badly wounded deer when followed up, are apt to hide until the hunter is close to them, and then rush from one bush to another, giving the chance of only a snap shot. In such cases they are more easily killed with buckshot from the composite gun than with a bullet from a repeater.

Although the 16-gauge barrels are inferior for ordinary wing shooting to a 12-gauge shotgun, yet with the aid of the rifle barrel game can sometimes be bagged at ranges where even a 10-gauge would be useless. For instance, I was once stalking a large kind of crane, called "coolen," in the Punjab, carrying a gun having a .45 rifle barrel loaded with a round bullet and 55grs. of powder, and a 16 smooth barrel loaded with BB shot, which went closely enough to be almost certain of killing a bird of that kind at 50yds. When 90yds. distant the coolen became suspicious and prepared to fly, so I fired the rifle barrel before he had time to rise from the ground—and killed him. I may here remark that a round bullet of .45 bore, even when driven by 55grs. of powder, does not mangle a large bird, but punches a clean hole, causing rapid bleeding.

Composite guns should be well balanced and as light as possible consistent with safety, in order that they may be handled quickly at winged game. Some are made in this country taking the .40-82 rifle cartridge and yet weighing only 7½lbs., they do not recoil uncomfortably, being fitted with shotgun stocks more than 14in. long.

With various gauges of rifle and shot barrels weapons of this kind have been used during the last forty years by hunters in South Africa in such quantities that they have acquired among English manufacturers the name of "Cape rifles." There could hardly be a greater proof than this of their usefulness to explorers or sportsmen naturalists. When traveling in the American bush, whether by canoe or on foot, it is extremely inconvenient to carry two guns, and I am inclined to believe that the threebarreled weapons now made in the States will come more and more into use, and be particularly appreciated by men of business who seek by an annual outing to recruit their health and jaded energies, and whose chief enjoyment comes from luxuriating in the loveliness of nature while prepared, with only one gun to carry, for any kind of game that may present itself. J. J. Meyrick.

Devonshire, England.

## THE MAINE DEER SEASON.

One of the best deer hunts of the season has been made by Messrs. C. P. and F. H. Stevens. Both are interested in Camp Vive Vale, at the Narrows, Richardson Lake. By previous arrangement with J. A. French of Andover, they were met by him at Rumford Falls and taken to the South Arm. They had two guides, Charles Edgar Marston and George Thomas, both of Andover. There came a slight addition to the few inches of snow already on the ground. Before they had proceeded a half mile up the Lake Road they came upon the fresh tracks of a deer that had crossed the road. Soon the tracks became very numerous. They got into camp and got things nicely arranged. They killed four deer within twenty to eighty rods of the Lake Road. At night, after the day's hunt was over, the team met the hunters, either up or down the road, by previous agreement, and thus all long tramps were avoided. They had simply to go up the mountain on either side of the road till they came upon the game. The first day this did not take very long, but by the second day the tracks became so numerous that it was not easy to follow a special track. On the third day there came a crust which made deer still-hunting very difficult. But the hunters were not very sorry, for they had secured their law quota, three deer apiece.

Both the Messrs. Stevens are students of hunting and fishing, and this hunting trip was full of interest to them. Mr. C. P. Stevens is greatly delighted with the quantity of game he found. He is of the opinion that the supply of deer in Maine is inexhaustible. He says that it will be impossible to thin them out by fair hunting, under the law, as it stands to-day. Mr. F. H. Stevens came upon the curious idea that a deer will follow in the footsteps of a man for a long distance. He came upon his own footsteps of the previous day, where, since he had been along, a deer had followed, stepping very carefully in the footsteps of the hunter. A fact he also noted was that where a deer was killed the day before and dragged down the mountain and toward the camp, the trail was one very likely to be followed by one or more deer. Evidently they came upon the trail in the night and followed it, sometimes for a mile or two. The Messrs. Stevens pronounce the hunting easier for deer than they had ever dreamed of, and the game more plenty.

Mr. J. A. French writes me that up to last week hunters and the people of Andover, Me., had killed 19 deer, more than double any previous season of late years. I also learn from the Maine papers that since the season opened there have been taken out over the Phillips & Rangeley Railroad 28 deer this season. This makes 47 deer known to have been taken in the Rangeley region. A gentleman interested in the subject, writes me that he has heard of fully 150 deer passing through Bangor over the Maine Central this season. Some 12 deer are also reported to have been taken down over the same road from the section above Skowhegan. Adding to these numbers an estimate of 200 deer said to have been killed and taken out by the waterways from the eastern part of the State, and we have a total of 400 deer killed and taken out of Maine by the regular routes of travel. Then if we double this number, in order to get at the number killed by citizens of the State, we shall have a total of about 800 deer killed already this season in Maine. It is hardly possible that the estimate is large enough. Special.

### To Go to Sleep.

Poughkeepsie, N. Y.—It may be rather late in the season to write about matters pertaining to camp life, but the suggestions that follow will apply equally to all that are afflicted with insomnia either on a bed of boughs in camp or on a bed of down at home. True, most campers need no other soporific than the previous tramp with rod or gun or a white ash breeze on the homestretch to enable them to enjoy the sweetest—if not the most dreamless—slumber, "tired nature's sweet restorer, balmy sleep." But there are those, both at home and in the woods, whom sleep avoids for weary hours, no matter how earnestly it may be sought.

On first retiring, lie flat upon the back for a few minutes; then with a slow inspiration fill the lungs to their full extent, and empty them entirely by slow expiration through the nostrtls. Let this be repeated three times, with the body in repose and limbs straight. Turn upon the right side (if that is the side usually lain upon when sleeping), draw the left leg up till the heel touches the right knee, lay the right hand upon the left knee and the left hand upon the right elbow, and if the conscience is clear, sleep will soon do its work. Try it. J. H. D.

### Shooting at Far-Away Game.

*Editor Forest and Stream:*

With all deference to so experienced a hunter as "Lew Wilmot," I must state my belief that there is a certainty, in a long series of shots, of causing much useless suffering by aiming at a deer's head beyond 50 or 60yds.

If an outline of the head and brain cavity be drawn life-size on cardboard and stuck up at 150 or even 100yds. it will be found on trial that unusually fine shots, aimed with the most accurate sporting rifles, are as likely to knock out an eye or break the jaw as to hit the brain.

This is the case not merely when shooting off-hand but when resting the rifle in any way that is obtainable while hunting.

A similar argument has been advanced in this country with reference to shooting at rabbits' heads with .22 rimfire rifles, viz., that the bullet either misses altogether or kills on the spot. Unfortunately it is about equally liable to break the jaw and allow a rabbit to escape into his burrow, probably dying of starvation. J. J. Meyrick.

### Menhaden Crews and Ducks.

Asbury Park, N. J., Nov. 27.—*Editor Forest and Stream:* In answer to many complaints received from residents along our coast in relation to the slaughter of ducks by the crews of the menhaden steamers, County Warden James T. Edge and myself have visited the points where the offense has been committed and find just grounds for the complaint. At Elberon there is a great basin famous for its mussel beds, on which the birds feed; and there is where the complaints are the loudest. So persistently have the steamers followed this lawless course that the birds have left or have all been slaughtered. To determine which is difficult. Our informant assured us that at different times the boats would bear swiftly down upon a flock with a full head of steam and rake them while still sitting, and as they rose again pour in the murderous fire, and so keep it up for hours together, marking the flock down and using the same tactics until the majority were bagged. The law is explicit in reference to this matter. The owners of the boats are well known and must stand responsible for the acts of their crews in violation of State laws. The question naturally arises, if the birds were marketed who received the benefit?

Is it not time that the several coast States take these people in hand and say just how far they shall go in their plunderings. Their antagonism to the food fishing interests is well known, their great destruction of lobster spawn an undisputed fact. And now, having turned their attention to the fowls of the air, we are hourly expecting to hear their mandate, "Get off the earth!"

Leonard Hulit.

### How Jack Stout Met His Death.

Newark, O.—Some of the readers of Forest and Stream may recall the killing of Jack Stout, a large black bear, the property of Mr. Elvy Smith, of Clay Lick, O. Jack was captured when a cub by James Smith, in the wilds of Wisconsin, and in company with his little sister Becky was brought to Ohio, where they were sold to H. Miller, of Rocky Fork. Becky was exchanged to a gang of Turks for a vicious cinnamon, which was afterward sold to a local butcher for the Newark markets. Jack became the property of Elvy Smith, and was raised on his farm, where he became a great pet. He would roam over the fields at his own sweet will, but would always return home like a good boy. He was often given a bottle of cider, which he could handle with the greatest ease, and would drink from it as well as I could. But Jack's disposition soon changed. He became cross, and when a young lady called to see him he attacked her, biting her severely. At this Mr. Smith became about as cross as Jack, and a shooting match was arranged, and on this occasion Jack met his doom by a .38-40 Winchester in the hands of Fred. McQueen, a young lad of seventeen years. His overcoat brought $12. The rest of the day was spent in turkey shooting and at targets, in which Flint drove center off-hand at 100yds. Black Rifle.

### My Pigeon Shoot.

It wasn't the shooting of the bluerock, dead, or the bluerock, living, over a trap, but of the lightning-like passenger bird that in my young days delighted the people of New York by giving us the finest exhibitions of their fecundity and gregariousness. Well, once during their plenteousness I went with a companion to shoot them. I had shot grouse, woodcock, quail, etc., for years, and wouldn't be caught skulking around to shoot them out of the trees. I stationed myself in a swale along which flock after flock rushed like rockets. I fired into a flock exactly overhead, expecting half a dozen at least to fall. But one bird came to the ground. I fired five times more at flocks passing over me, trying the experiment of letting them pass me a little before pulling trigger, but with no success. All I got was one bird. I gave up in utter disgust. Now, those birds did not seem to be above 30yds. high, and any novice could shoot into the flock as I did without fault of aim. My shot were about No. 6. Did I miscalculate the height of those birds, or what was the cause of my failure to score? My pot-hunting companion got six birds out of trees. Had I prescience I would have pot-hunted that day.

N. D. Elting.

### West Virginia Woodcock Law.

Central City, W. Va.—*Editor Forest and Stream:* The hunting season did not open here with great expectations, nor were sportsmen disappointed. Quail are not really plentiful, and the enthusiasm among wing shots seems not to be of average intensity. I have tried, for the first time, nitro powder, something approaching what I have long desired, viz., less recoil (my gun is very light), less noise and less smoke. I have reason to believe that black powder for sporting will, in a decade or so, be a thing of the past, as themuzzleloader is destined, like the flintlock, to become a curiosity.

The West Virginia woodcock law is the poorest kind of a one. This game is not plentiful here and the heat is too great to hunt it in summer. The law allows woodcock shooting from July 1 to Sept. 1, including the hottest months. So we see that when the weather becomes cool enough to make hunting pleasurable and healthful this bird cannot be shot. If the law was changed to read, from Sept. 15 to Nov. 15 there would be some sense in it.

N. D. E.

### Barnegat Birds and Fish.

Barnegat, N. J., Nov. 30.—Our gunners have been at loss this week, for the tide has been so low that there has been no chance, although the bay is full of ducks. Still some of the boys managed to drown their disappointment in coot shooting in the Inlet, some killing as high as thirty-nine, which they said beat staying home anyway; others went rabbit hunting, making good bags. By the way, you could still catch a bass at the Inlet if you had good bait. Wm. C. Inman.

### Making Shot-Balls.

Marysville, O.—Mr. L. O. Crane's statement in your issue of Nov. 10 tells how to make shot shoot like a ball. I tried the experiment at several distances, ranging from 30 to 90yds.; and with a cylinder bore shotgun I planted a charge of 1⅛oz. of No. 8 shot with 3¼drs. powder into a solid green oak butt at a distance of 90yds., and as Mr. Crane says, I think it would make "bad medicine" for a lion at that distance. H. S.

### A New Jersey Convention.

BRUNSWICK, N. J., Dec. 3.—*Editor Forest and Stream:* For many years there has been general complaint of the inefficiency of the game and fish laws of New Jersey to protect the game and fish to any appreciable extent. In spite of State and individual efforts to stock forests and streams, pot-hunters and other unscrupulous individuals have been able to disregard the laws with practical impunity.

The New Brunswick Gun Club at a meeting recently held took the initiative in a movement looking toward the adoption and enactment of adequate laws. It was decided to hold a convention in this city in Voorhees Hall, at 12 o'clock noon, Dec. 15. An invitation will be sent to each gun club in the State to send two delegates. The Brunswick Club will bear all the expense except the transportation of delegates. It will be the purpose of the convention to recommend to the commission recently appointed by the Legislature such changes in the game laws as will serve to protect the game and also to provide means of detecting and punishing infractions of the law. The local club has elected Barker Gummere of Trenton, and George A. Viehmann as delegates.

### New Lefevers.

IT will be good news to many sportsmen to learn that the Lefever Arms Co. have decided to place upon the market medium price hammerless guns fitted with automatic ejectors. This improved ejector is a model of simplicity, consisting only of two pieces, one a hook pivoted in the hammer, the other a lever pivoted in the frame. The mechanism of the gun is not cut away or weakened, nor are any of its compensating features interfered with. Only the discharged shell is ejected, and it is thrown with force a good distance. The ejector parts may be removed and easily replaced by any one. The Lefever Company announce that their prices are more favorable than ever offered on ejector guns.—*Adv.*

## Sea and River Fishing.

### TROUT IN THE RANGELEY WATERS.—III.

BY MOLECHUNKAMUNK.

I THINK the trout in the Rangeley Lakes, excepting the Umbagog, are about as plentiful as ever, although the raising of the waters has changed their spring and autumnal habitats a good deal, and some of the old fishing places are of the past. Trout Cove in the large lake above the Upper Dam was a spring fishing place for a period of ten or fifteen days, where in the gentle current one could satisfy his most ardent passion for trout, and become fairly surfeited; that is if one could ever become completely surfeited with fly-fishing.

Not far from Trout Cove was the run below the old, now submerged, stone dam, which for large trout in the autumn surpassed any spot I ever knew of. I used to have the fishing there alone and unrestricted to my exorbitant heart's content, over twenty years ago, when there was scarcely another rod going. Day after day I fished it in the height of the season, wending my way to it a mile through the woods by lantern light to get the first fishing of the blushing morn, and after resting through the day I would take in the evening fishing, and wend my way home an hour after dark by the same light which had guided my morning footsteps. Sometimes I would get hold of a big fellow after dark, which would so tire my patience that I would feel like straining my leader to separation.

The water there ran dark and smooth in a passage of 30 or 40ft. wide between large rocks into a pool of several acres in area below. In the passage and below were the leviathans of the deep. Now of late years, the lake raised 12 or 15ft. high, has destroyed the current, and made a sea of the locality.

Some days one might whip the run and pool for hours without a rise, although gigantic breaks about might occasionally be observed, but the favorable hour in the right season was sure to reward the seeker. Once I caught the pool on a day of high carnival, a day of exultant joy, of moving and commotion of trout, which on some days and occasions exhibit an eager recklessness, and all fearless and bent on destruction. It was a cold, blustering, gusty day, with occasional sleet, late in September, when I had to go back frequently to a fire on the shore to thaw out my benumbed hands. At intervals the water boiled about me with swirling breaks, and visible currents of pursuing fish. My first cast, a short one, scarcely 10ft. away, responded with a 5-pounder in an instant, and I begrudged the time it required to bring him to net. Another and another rose in succession to my fly, which scarcely flecked the merry ripple tops ere it was taken. No under surface draw seemed required for my first few fish, and I screamed with delight at each strike. My third was an 8¾-pounder, and the largest of the day, and the smallest was 3lbs., and my total catch 10 fish, which weighed 57lbs.

I secured all alive in two large cars I had at the run, excepting the largest, which was gilled, and on the following day weighed the balance and gave back to the pool all but three, which answered any use I could give.

The largest trout I have seen after being caught weighed almost exactly 11lbs., although there are well authenticated instances of trout which have been caught weighing 12 and 15lbs., and 10-pounders have been taken in several instances. The largest I have ever taken weighed 9¼lbs. and the second largest 9lbs., and I have taken a good many from 7 to a little over 8lbs. I once secured a 9½-pounder from the apron below the Upper Dam some fifteen years ago, which came over the fall of the dam above and was left dry on the apron logs. The logs of the apron were separated somewhat, allowing the water to pass through as it flowed over the dam. I was some distance off, and saw the commotion on the apron which I first thought was my Skye terrier at play, as he frequented the spot; but succeeded in arriving at the apron and in securing the fish as he had almost reached the end of the apron and was about to drop into the water below. I have seen eels of 10 and 12lbs. weight caught securely between the logs of that old apron, which came over the dam at night, large, lusty, black-backed and yellow-bellied fellows, which had doubtless done their share in ravaging the lakes.

I remember well this large trout, the 11-pounder, which for several years in the autumn came to the same place in a moderate swirl of water above a dam, where in his mighty solitude—for he seemed quite alone—he would signify his presence occasionally by an uplifting at the surface which would make an angler's heart quake. He became the target of many ambitious efforts, both of fly-casters and bait-dabblers, but maintained a dignified and conservative indifference. In a quiet surface and with the sun's rays in a favorable quarter he was often observed either in quiet meditation or slowly taking his constitutional promenade. In vain were flies sunk down for his convenience, and equally vainless were the tidy worms and natty grasshoppers trailed before his majestic presence. Some vowed he was 3ft. long, that his mouth was large enough to take in a black duck, and that he must weigh 15lbs. Well, he was taken one day by an old guide, who would have scorned to have taken him any other way than fairly, but most curiously he was taken while everybody was at dinner, and according to his account he had allowed his worm-baited hook to rest on the bottom for a while, from which it was seized by the old patriarch, and in natural sequence completed his foraging adventures and he soon laid gasping an the green grass. He did not prove to be 15lbs. in weight, or 3ft. long; in fact, was a very short trout for his weight, meauring exactly 27½in. in length and of magnificent color. His photograph, life-size, is before me.

A remarkable and well authenticated catch was made by my friend, the Hon. H. O. Stanley, of Dixfield, Me., some years ago, in the large lake of five trout in one day, and all with a fly, which weighed 42lbs., the largest weighing 10lbs. and the smallest 7lbs. It is doubtful if this catch with a fly has ever been exceeded by any fisherman at the Rangeley Lake in a single day.

In fishing through the ice in winter, the habit of trout to occupy one locality is quite perceptible, especially in large ponds or lakes, and trout so speedily partake of their surroundings, not only in color, but in proportions, that but little difficulty is found by one who has successively fished certain large bodies of water, in determining the places from which a mixed lot have individually been taken. In one of the Rangeley Lakes with which I am particularly well acquainted, and in which I have fished many winters, I have noticed a very great dissimilarity in the trout, so marked as to be noticeable at a glance. When I first fished the lake it was comparatively unknown, and the catching of trout through the ice was to some extent a necessity to provide food, and not in conflict with the law, although during late years the habit has become limited, in accordance with the legal provision. I observed the great dissimilarity in the trout the first year and kept the daily catches separated according to the places secured from. At that time our party consisted of five, and we put out from twelve to fifteen lines with live bait in different places, each being from a mile to two miles from the others. Toward night our horse and pung was employed in conveying us home where each party brought his catch, and each fish was carefully weighed and a record made of the catches of each fisherman. Following up this method for several years and keeping the fish separated, I observed not only the differences of the fish in color and proportionate lengths as to weight, but a marked difference in average weight. This method of winter fishing I followed up for a dozen years on a particular lake, besides fishing quite a number of other lakes through the ice the same years, and my experience in fishing the same localities during the springs and autumns of over a quarter of a century, has resulted in convincing me that a very large proportion of the trout possess localized peculiarities, and remain in and about the same places the whole year, although some of them take their regular outings, and a few of them may take permanent departures. There are in this lake I refer to some portions that mark the denizens so clearly that they are most clearly recognized when caught in places several miles from their previous homes. In some places the trout are similar, though not entirely so, to those of some other place, but the extreme markings are wonderfully different, so much so that I will venture to say that the difference in length alone as to weight in the trout from two localities in mind, would amount to fully from 2 to 3in. in length for each ½lb. in weight, and of course a proportionate difference in waist measurements.

We find in men the characteristics peculiar to climate, soil and food. So with trout, excepting that they show much more prominently than with the human race, the disparities occasioned by their surroundings. Once when fishing through the ice for several days with a friend at a certain place on the lake where we had remarkably good luck in getting short thick trout, and which place by the way produces the heaviest trout in the lake for length, and after pulling out a fat 4-pounder which hardly measured 16in. in length, I remarked to my friend that he would probably be surprised to catch a 1½lb. trout which would exceed the 4-pounder in length. In demonstration of this we set a dozen lines in 30ft. of water by an island where above all the places in the lake I had observed the trout to be very long and slim, and where the color indicated most positively that the bottom was not only very muddy, but extremely dark. Here we caught fifteen or twenty trout, which were invariably slim and eel-like and black-bellied. Among them were several running from 1 to 1½lbs., which were not less than from 15 to 17in. in length. In that locality it is unusual to catch any trout of great weight, although I once caught there a trout of the most unusual weight, long, slim and dark, which was the longest trout I ever saw, measuring 30½in. in length and weighing 7lbs. He was an old one and evidently dying of old age and lack of food, which his waning activity failed him in gaining. A short time ago a lady, a friend of mine, caught a plump 8-pounder, which measured exactly 23½in. in length, which was caught in comparatively shallow water in a quarter where I have taken thousands of trout, but where I have never known a slim black-bellied trout to be taken from, not even a stray, though often strays are picked up about the lake, and I have often taken trout which I knew had arrived where caught within twenty-four hours, from a distance at least of two or more miles, having the markings in color too strong to be ignored, and which had not been long enough at the new place to get fitted out in the prevailing garb.

Inexperienced fishermen may think this somewhat improbable, but men with whom I have almost yearly fished for the past thirty years will recognize the features I have illustrated. We often remark to each other, that is a cedar tree trout, or a so and so trout, and probably correctly. Why trout will remain about one place for life, is difficult to explain; but they do. And so we may say about men. Why will they stay in one place and eke out an uncertain and precarious existence, when they can go where they could do so much better? I often think of this while I am traveling about the world, and witness the prosperity of some localities and the misery of others, and find humanity pleased and satisfied in each place. No matter where I go it is mostly the same, with the inhabitants lauding the respective merits of their region and claiming advantages not possessed by others; and so they stay and die, and their children grow up after them and follow in the footsteps of their parents. And so it is, I presume, with the trout. If they could talk and express themselves and be understood, it would probably be found that they had very good reasons of their own for continuing where they could not be otherwise than slim and black, when they might go where they would soon get fat and mellow with unctuous delicacies. Occasionally one strikes out, as with humanity, and never returns, linking his fortune with another colony and unknown evermore among his old friends and relatives. And if a trout be carried away from his accustomed home he will return forthwith. He will lose no time, after the recovery from the fright of his strange taking away, in heading from home again, and he will have no more difficulty in finding it than a man would if taken from his home to a distance, but from where he can see the old, familiar landmarks, from which he cannot go amiss. It is no more instinct with the trout to find his way home, or the experienced homing pigeon to find his cote when taken a thousand miles away, or with the salmon to find his way in the sea to his native stream, than for the man to find his way home when in sight of the church spire of the home town. With the fish and the bird it is a matter of scent and sight of concentrated perceptiveness, as with the hound which follows the track of the fox and deer or the footsteps of his master among a hundred others; of a sense of acuteness, which might be considered a new sense, so unknown is it to the human race.

Hundreds of instances could be adduced to evidence if necessary the almost miraculous acuteness of scent and sight with many of the lower order of animals. Scent with the *Salmo* family is of the highest order and most keenly developed, and we are all familiar with the rapidity with which the trout will eject the deceitful fly if not hooked. Stoddart, one of the most reliable and conservative writers on trout, gives an incident of drawing trout up stream for over a mile when he had used spawn bait, which by the slight impregnation of the running water from the bait, tolled up black-bellied trout from a pond on the stream below, and water is a far better conductor of odor than of heat and cold.

The ocean is not trackless to its denizens, and its currents have their lanes and highways, and no lake or pool is so sluggish as not to have its varying qualities, partaking of local features.

Every spring and stream has its peculiarity of odor, depending upon the formations about the flow. The discolorations of the Amazon and Mississippi are apparent to the eye for many miles at sea, but the outreaching laminations of odor extend hundreds of miles beyond the color line. Neighboring streams have a dissimilarity apparent to the crudest sense, and the water of a single lake varies in color and taste, according to its locality. That of one cove will be different from another, affected by the character of the ground and of the neighboring plant life, while in the imperceptible yet existing currents of the lake a distinctive character is imparted. All these features are apparent to the perceptive and acute scent of the trout, which guides the possessor in the darkest night as readily as in the day, and it is well known that the journeys and migrations of the *Salmo* family occur almost exclusively in the night, and no darkness is too dense for their advance.

I will cite an instance which came to my observation, by accident, in one of my early winter fishing excursions. It was in January. Camping the first night at the lower end of the lake, we commenced our journey the following early morning over the ice for our permanent camp nine miles distant. The ice was about eighteen inches thick with a foot of settled snow upon it. The going was hard and when six miles up the lake, and three miles from camp we stopped for lunch by the shore, at a locality noted for the extraordinary beauty of its trout. So noted were the trout of this particular place for their plumpness, and vivid colors, surpassing any of the lake, that it is not uncommon to have the old native fishermen familiar with the lake say, whena particularly high-colored plump trout is taken in other localities, "Oh that is from middle point, next chub cove." The day was fine, the hour early, and the distance comparatively short to camp. I was anxious to take a few of the beautiful trout of the place to show one or two of my friends of the party who were novices at the lake. We had our ice chisel, and plenty of live bait, which we had brought in, but unfortunately no hooks or lines as they were at camp, but one of the party finally brought out from his valise half a dozen slim but good sized hooks on single gut, rather inferior for work, but acceptable in the situation, and which we lengthened out into hand lines with serviceable twine at hand. Three or four holes were speedily cut, and it must be admitted over a spawning bed with which we were familiar. With some small minnows and careful handling, we soon had half a dozen fine trout out. I had one of the men cut a basin in the ice beside one of the holes, in which water was conveyed from the opening, in which I had the trout placed as soon as caught, that we might better observe their beauty, and they were beauties indeed, averaging between two and three pounds in weight.

We did not lose a single trout we hooked. This we distinctly remembered, but in the handling of the flopping trout upon the ice, before they could be conveyed to the basin, three of the single guts snapped, leaving the hooks in the jaws of the trout, where they remained, as we did not care to remove them immediately, to the injury of the fish. We all admired the remarkable beauty of the imprisoned trout, and a regret was expressed that they should be sacrificed. An idea suggested itself which was carried out, that we would take them to camp alive. We had a tight box containing stores. This was emptied and filled with water, into which the trout were placed, with its cover lightly tacked on to prevent the swaying of the water, and with the box on a hand sled it was so conveyed to camp. On its route the water was changed several times, so that all the trout arrived in fine condition. At camp the trout were put in a car with a weight, by which it was sunk in 10ft. of water. That evening it was decided that we would have trout for breakfast, but upon

pulling up the car in the morning it was found that in lowering the door had sprung open, and that all of the trout had escaped, so we had no trout for breakfast.

During the forenoon as I was putting down some lines about a mile from our fishing place of the day before, I concluded to run down to the first place and put in a few lines there, which I did over the spawning bed, and in a short time caught seven or eight fine trout, and among them were two which we had caught the previous day, and which carried in their jaws the broken off hooks which we had noted the day before. These trout being liberated the night before three miles from the spawning bed, had found their way back without delay and probably all of the trout so liberated had likewise arrived back again, making the passage during a dark night beneath 30in. of ice and snow. The occurrence induced us to carefully consider the matter, and we unanimously remembered the circumstances of the broken guts, and that they had broken in the floundering upon the ice, and that we did not lose a single hook in the water, or one of the trout which were hooked. The rapid passage of the trout in so brief a period, and that we should have caught them again so quickly, made such an impression upon me that I made a careful notation at the time, although I have small occasion to refresh my memory in the matter. In reality there was nothing astonishing about it, excepting in the ability to establish the facts.

The trout finding themselves liberated in a strange locality, which was near the mouth of a stream running into the lake, followed out the distinctive stream water into the lake until they reached the central gentle current, which was a part of the flow which occurs from lake to lake. This water flow in its peculiarities they were familiar with, for it flowed past their home, and despite the incidental localized odors they had no difficuly whatever in almost stygian darkness in rapidly pursuing their proper route. As they approached their own home their scent recognized the growing familiar conditions as our sight confirms with more certainty our routes as we draw nearer home.

I feel very positive about this element of scent as the guide of fish. It is the sense which enables the salmon to unerringly reach the fresh water streams of its nativity. They have no compass; they do not take any note of geological features, but they return with certainty to their native streams. It is not probable that they go far from the deltas of their streams, probably not so far as 200 miles, perhaps not 100 miles. They are not deep-water fish; they go where their food abounds, for the schools of small fish which inhabit the moderate depths of the sea.

It is not unreasonable to believe that the outreaching freshness and odors of a salmon stream may reach out into the sea for several hundreds of miles.

## ANGLING NOTES.

### Just Game Laws.

GAME laws are supposed to be enacted—and generally speaking they are—solely for the protection of fish, birds and animals during their breeding seasons, that the supply may keep somewhere near in touch with the demand.

The "breeding season" is not simply the time during which fish are depositing spawn or birds are laying eggs, for the care and rearing of the young fish and game to a certain age by their parents has to be considered as part of the breeding season, and a law which does not take into consideration the time required for rearing and recuperation is little better than no law at all.

Any game law which goes beyond this or falls short of it, and is enacted for the convenience of any class of men is ill-advised and sure to work more harm than good. It may be necessary in the interest of fish and game preservation to close certain waters for a term of years that they may be restocked, or to prohibit the killing of game for a period to prevent its extinction, but that is for the benefit of all concerned and is not what I refer to; but I do refer to annual close or open seasons that may be made or are attempted to be made for a favored class. The black bass law in New York is an instance of this sort of legislation. In spite of the fact that black bass spawn all through the month of June and it is the one so-called game fish that broods its young for days after they are hatched, the general law opens the fishing for this fish May 30, as was alleged by an angling newspaper when the law passed, that city anglers might avail themselves of Decoration Day, a holiday on which to fish in a lake near New York city. How true this may have been I do not know, but such was the plea, and it was never, to my knowledge, contradicted.

Similar legislation is that which attempts to close the fishing season for some particular fish until the summer boarders arrive in the country. Very recently I have heard people talk about providing fishing for the summer boarder, as if the summer boarder was the only person in the wide world who loved to fish or to eat fish after they were caught.

The summer boarder is an important and most desirable factor in every community, and it is right that they should be considered; but it is not right that the open and close seasons for fish and game should be made to conform to the opening and closing of the summer hotels and boarding houses. The native fisherman has to be considered also, and he has rights which he is very jealous of. To be sure, there are times, seasons or occasions when he has a well developed idea that the summer boarder, who may be his very best friend, is a tyrant who is trying to put his foot on his neck, but he is open to reason if properly approached.

In justice to the summer boarder I must say that I never knew him to ask for the taking down or putting up of the bars for his convenience, and if such requests are made they come from the native hotel keeper; and the one redeeming feature about such requests is that he who makes them realizes the great importance of protective laws to keep up the supply of fish and game. Game laws to be effective must have the support of the native community and then every man is a game protector. Antagonize the native fisherman by passing laws which covertly discriminate against him, and it will take four game protectors to the acre to enforce the laws. There is no earthly reason why the native fisherman and the summer boarder, through his attorney, the hotel keeper, should not be, and work, entirely in sympathy for the protection of fish and game. Their interests are identical, if they but knew it, and one is, to a more or less degree, dependent upon the other, and as a rule I believe they do work in harmony. It is only in isolated cases that education influences have not progressed to the point where the native fisherman and the summer boarder—always by attorney, realizes that what is fish for one is fish for the other. Therefore, I believe that just and efficient game laws to be such as provide only for the protection of fish and game during the breeding seasons of the different species.

### Pike and Pike Fishing.

On one occasion at least when I have been asked in FOREST AND STREAM about the size of the largest pike (*Esox lucius*) taken in American waters, I have said the largest I knew anything about was one of which I have a photograph, taken in Lake Le Boeuf, Pennsylvania, which weighed 35lbs. Recently the species of this fish having been questioned (it being suspected that it might have been an unspotted mascalonge or "Chautauqua pike"), I wrote to Mr. W. G. Sargeant, of Meadville, Pa., who sent me the photograph eleven years ago, asking if later investigations had given any reason for doubting the species. He replied under date of Nov. 12:

"Our pike are the great northern pike (*Esox lucius*); not the pickerel, and not the mascalonge. Of this I am certain. The only fish of the *Esox* family in dispute is the pike of Chautauqua Lake. It is neither the pike (*lucius*) nor the mascalonge, and it is too large for the pickerel (*reticulatus*)—so large that they are frequently taken in weight up to 25, 30 and 35lbs. One of the latter weight was taken on a trolling line this season, and pulled the young man who caught it into the water. F. W. Cheney took one of 45lbs. in a net last year. It was taken for the purpose of hatching the spawn artificially.

"The largest pike taken at Lake Le Boeuf was caught by Mr. T. Judson on a bass line, gimp snood, and hook of small size. The weight was 46½lbs., and my father-in-law weighed it. It was a true great northern pike (*Esox lucius*).

"We have taken a number of pike at Lake Conneaut this fall—largest 16½lbs.—by trolling rather fast and using a 10in. chub, or black sucker for bait. Took two last week of 12 and 14lbs. by casting a large bait. The best fishing is now, and the rougher the weather the better the pike bite. We have taken pike-perch, called Susquehanna salmon, this year, weighing 16½lbs., and many between 10 and 12lbs. They are fine eating but not game. I send you my 'souvenir' of the lake and you can rely on my statement about the fishing." In Mr. Sargeant's souvenir I find mention of a pike of 50lbs. speared in Conneaut Lake and bought by a Meadville gentleman, who sent the head to the old Peale Museum in Philadelphia, where it was exhibited. Another of 55lbs. is reported to have been caught previously, but there is no authentic record of its weight. But one of 48lbs. was killed with rod and reel, and one of 49½lbs. was speared, which Mr. Sargeant saw.

Mr. Alfred Jardine, the celebrated English pike angler, who has a record of the big pike taken in England during the past twenty years, records, as the largest, one of 37lbs.

Now, having quoted the greater part of Mr. Sargeant's letter assuring me that the large fish are pike, I am in a quandary, for, by using one little word of two letters, he stamps the fish with the distinguishing mark of the mascalonge. This may have crept in through inadvertence, and I will so consider it until he has had an opportunity to review it.

### Texas Tarpon.

Fishing records must be approached with circumspection, if one wishes to avoid trouble, for they are kittle cattle, particularly fish records in Texas, where everything is so big that the fish have to outdo themselves to keep up with other products of the State. But a fish record should be accurate, whether it is made in Texas or Rhode Island. I read the note of "L. F. M." in FOREST AND STREAM of Nov. 17 about twelve tarpon being taken in one day, which constituted "the largest record ever known." Soon after, my friend Mr. Wm. D. Clevelaud, of Houston, Texas, sent me an account of the capture of the same fish, and he, too, said it beat the record for one day's tarpon fishing. It happened just at the time I received Mr. Cleveland's letter that a friend in England had written to me for the tarpon score made in Florida last season and the papers containing as much of it as I could find were on my desk, and from it I learned that more than twelve tarpon had been taken in one day in Florida. April 8, this year, at Fort Myers, thirteen were taken, the largest one weighing 167lbs. The next day, April 9, eighteen tarpon were killed at the same place, and the largest one weighed 168½lbs. From the account sent to me of the Aransas Pass tarpon only the weight of the largest one, 125lbs., was given, and the record claimed may consist of something besides twelve tarpon in one day or the weight of the largest fish. It is so easy to start conflicting "best records" on their rounds through the newspapers that I believe it advisable to set them straight when it is possible.

### Canadian Fishing Clubs.

The report of the Commissioner of Crown Lands for the Province of Quebec for 1894 has just come to me, and it contains much interesting information about the numerous fishing clubs in the Province. Within the last nine years 48 fish and game clubs have been incorporated under the provisions of the Provincial Laws, and the membership of many of these clubs is made up in part, and, in some instances largely, of American sportsmen. Perhaps the most interesting part of this report to anglers is the record of fish caught in the rivers and lakes of Quebec during the season just passed.

For instance, Mr. Walter M. Brackett, the famous artist of Boston, reports the capture of 33 salmon in his river, the north branch of the St. Marguerite, the largest of which weighed 34lbs. Mr. H. W. DeForest reports 202 salmon from his river, the Grand Cascapedia, the largest fish 42½lbs. and this is the largest salmon reported. Many lessees have not reported. Only the second part of the Restigouche figures in the report with 9 salmon, largest 26lbs. The York, Mr. Thomas Murdock lessee, reports 81 salmon of total weight 1,225lbs., and Mr. John Fottler, Jr. of Boston from his river, St. Jean, reports 119 salmon of 1,645lbs., largest 28lbs., as against Mr. Murdock's largest fish, 32lbs.

The reports from clubs leasing trout waters are perhaps more interesting than the reports from the salmon rivers. The Triton Club reports the largest trout 7¾lbs. When it comes to totals the Jacques Cartier Club caught 3,408 trout of a total weight of 1,037lbs. The Stadacona Fish and Game Club 3,388, weighing 1,921lbs. The St. Bernard Club, largely made up of Vermont anglers, 2,244 trout, weighing 1,094lbs. The Triton Club fish ran larger for the numbers caught, 2,134 trout, weighing 1,550lbs. A score that must have been very satisfactory to its members is reported by the Amabelish Club, of Springfield, Mass., which leases the central part of the Metabetchouan River. A total of 894 trout, weighing 488lbs., is a very tidy score. The largest trout reported from the rivers is one of 6lbs. from the Murray, W. H. Blake, lessee; but the Orleans Fish and Game Club is a good second with one of 5½lbs. from the Jeannotte. There is no report from the Laurentian Club, but there is one from the St. Maurice Club, and I have saved it to be mentioned as a sort of a "finally, brethren," and if the figures have not been transposed, as I very much suspect they have, and thus overlooked by the proofreader, I must advise Dr. Drummond that such fishing should have a barbed wire fence 18ft. high entirely around it, with a big dog and a man with a gun at the only entrance to the preserve; and even then I fear there are men who would tear their clothes trying to climb the fence. The report says very plainly that the St. Maurice Club members caught 668 trout, weighing 1,920lbs., an average of nearly 3lbs. per fish. There is nothing in the Crown Lands Report to indicate that lake trout are taken into consideration, and it must be assumed that the club report refers only to brook trout.

One feature of the club reports worthy of note is the column under the head of smallest trout taken. No trout under ¼lb. are reported. The smallest trout taken by other clubs are 5, 6 and 8oz.

### Limit the Catch of Fish.

In a note very recently I said that I believed that the time was near at hand when the number of fish taken by anglers would of necessity be limited by statute. I am not a believer in signs or omens, but the ink with which I wrote the note to which I refer was scarcely dry when, quite by chance, I opened the book of the Adirondack League Club, as I moved it from one place to another in my library. My eye caught the printed line, "The Fish and Game Record," and under it I read, among other things, "Under the club rules of 1893, not more than 10lbs. in all of speckled or brook trout, and not more than five in number of salmon or lake trout, shall be killed or taken out of the preserve by any member. The allowance of each member shall be charged with the fish or game killed by any member of his family or guest, and also by any guide or other employe in his service."

For my part I do not understand what any man can do with more trout per day than the members of the Adirondack League Club are entitled to under this rule, and what is reasonable and just for members of such a club as this, should be reasonable, just and enough for any man who fishes the open waters of the State. It is really no compliment to any man, or woman either, to send him a lot of trout days after they were taken from the water. I doubt very much if, as a rule, the fisherman who imposes his fish upon his friends after a fishing trip, would himself eat the fish which he distributes, for a man who knows the flavor of a fish out of water does not hanker for fish that have journeyed far afield after capture. The Bisby Club, now incorporated with the Adirondack League Club, has a rule similar to the one I have quoted. Those clubs have their own fish hatcheries and their affairs are conducted by good business men and keen sportsmen, and if they have found by experience that such rules were necessary within the confines of their preserves, why is it not more necessary to enact something of the kind for the State at large?

A. N. CHENEY.

### The Natchaug Prizes.

THE Natchaug Silk Co. send us the names of their prize winners for the season of 1894, with the competitors also who failed to win the $25 gold offered in each class, but who ought to be abundantly contented with their great good luck. The winners' names are in italics:

MUSKALLONGE.

*Mrs. H. D. Stevens*, Chicago, Aug. 22, Twin Lakes, Wis., 41lb., length 38in., line No. 17. W. H. McManus, Chicago, Sept. 22, Lake Vieux Desert, Wis., 32lb. 8oz., line No. 6. W. T. Holly, Chicago, Sept. 21, Lake Vieux Desert, Wis., 36lb. 8oz., line No. 6. J. B. Carlin, Ashland, Wis., Sept. 6, Wild Cat Lake, Wis., 12lb. 8oz., line No. 18. W. W. Ellston, Angola, Ind., May 16, Lake James, 22lb. 2oz., line No. 6. H. T. Brigham, Wanseon, O., Turtle River, 25lb. 12oz., line No. 5½.

SMALL-MOUTH BASS.

*Will Cunningham*, Attica, Ind., Aug. 24, Kankakee River, 6lb. 9oz., line No. 1½. George H. Pratt, Chicago, July 6, Pistagua Lake, Ill., 5lb., line No. 19. C. H. Laird, Washington, D. C., July 15, Potomac River, 6lb., length 23¾in., line No. 2. M. P. Gray, Frankfort, Ky., July 25, Star Island, Mich., 6lb., line No. 1½. J. Ficher, New Brunswick, N. J., Aug. 14, lake in Canada, 5lb. 8oz., line No. 17. G. A. Collins, Lakeport, N. H., Aug. 20, 6lb. 2oz., line No. 19. James Donahoe, Williamsport, Pa., Oct. 16, Susquehanna River, 5lb. 8oz., length 23½in., line No. 19. W. B. Higly, Cleveland, O., Sept. 10, Sable Lake, 5lb. 4oz., 21¾in. I. L. Holt, Meriden, Conn., July 17, East Hampton, Conn., 4lb. 2oz., line No. 3. Mrs. I. G. Wilson, Franklin, Pa., July 11, Bobcaygeon, Ont., 5lb. 4oz., line No. 3.

LARGE-MOUTH BASS.

*E. J. Beidler*, Gabriella, Fla., July 4, Pearl Lake, Fla., 8lb., line No. 6. Carl Darnell, Goshen, Ind., Aug. 26, Indiana Lake, Ind., 5lb. line No. 19. W. A. Morris, Mexico, Mo., May 25, 5lb., line No. 3½. R. C. Welch, Braidwood, I. T., Sept. 28, 7lb. 10oz., line No. 2. Ben. Bugbee, Waukesha, Wis., July 5, Phantom Lake, 6lb. 12oz., line No. 19. Bert. MAINE TROUT.

*T. J. McDonald*, Lowell, Mass., May 22, Middle Dam, Me., 8lb. 8oz., length 25½in., line No. 4.

### Fishing on the Al Foster.

NEW YORK CITY, Dec. 1.—Kindly say to my brother fishermen that they can put in a few days of grand cod-fishing on the Al Foster. I at one time laughed at this kind of fishing and will now admit that it gives me a great deal of pleasure to get a good-sized cod on my hook. I do not admit to my friends that it will compare with black bass or trout fishing with a light rod, but the substitute at this time of the year is agreeable. I must wet a line when I do not go in the woods with my dogs. I have met a number of old fishermen such as we do not see around the lakes, and I have yet to meet one who is not willing to give you advice and help you catch a cod. Come along and try your luck and let me know through the FOREST AND STREAM what you think of it. H. C. W.

## Fishculture and Fish Protection.

### Vermont Fish and Game League.

MONTPELIER, Nov. 21.—The fourth annual meeting of the Vermont Fish and Game League was held here this evening, and was followed by the third annual banquet. The attendance was large. Col. W. W. Henry of Burlington presided.

The report of the treasurer showed that the League has a small fund on hand, also a small part of the "Leach fund," which was given for defraying the expenses of introducing game into the State.

Mr. Titcomb, secretary of the League, proposed sixty-four new members, all of whom were admitted. Among these were men from New York city, Boston, Ticonderoga, N. Y., and other places outside the State, making the present total membership 271.

The officers elected were: President, N. W. Fisk; Secretry, J. W. Titcomb; Treasurer, A. W. Ferrin; Vice-Presidents, W. R. Peake, Bristol; E. C. Smith, St. Albans; H. R. Dorr, Rutland; W. S. Webb, Shelburne; F. D. Proctor, Proctor; James W. Brook, Montpelier; Erastus Baldwin, Wells River; Membership Committee, U. A. Woodbury, H. R. Dorr, J. W. Titcomb; Executive Committee, Addison, D. A. Bisbee; Bennington, H. S. Bingham; Caledonia, L. K. Hazen: Chittenden, Wm. W. Henry; Essex, Nathan Hobson; Franklin, F. J. Hanley; Grand Isle, S. E. Fleury; Lamoille, Geo. M. Powers; Orange, W. S. Curtis; Orleans, F. C. Kinney; Rutland, C. A. Gale; Washington, C. C. Warren; Windham, F. W. Childs. Windsor, Fred Arnold; Auditors, A. B. Noyes, E. W. Raymond, J. H. McIntire.

The League's appreciation of the services of its retiring president found expression in this resolution: "That this organization extend to H. R. Dorr our heartfelt appreciation of the faithful services in the past which has assisted in bringing us as a society to our present flourishing condition."

And as to Fish Commissioner Titcomb it was voted: "That it is the will and pleasure of the League that Governor Woodbury shall not accept the resignation of Secretary Titcomb from the State Board of Fish and Game Commissioners." This vote was afterward put in the form of a resolution, requesting the Governor not to fill the vacancy caused by the resignation of Secretary Titcomb, it being understood that he is still Commissioner until his successor is appointed.

J. E. Hubbard, J. P. Rich and E. H. Lewis were appointed a committee of three to select a design for the League button. The committee recommended a button of appropriate design, showing a deer's head and a crossed rod and gun. The report was accepted, the price being left with the committee.

Senator Edmunds sent a letter in which was made this plea for the interests of the League: "The general intention of the Vermont farmer is to make our beautiful State more and more attractive to visitors, who use and consume and pay for in cash on the spot almost everything that farmers produce, and at prices usually far above those paid by shippers. I have been compelled to travel a good deal in this and other countries, and I have observed everywhere that the most prosperous rural communities are those that attain the greatest number of visitors, who, in one way or another, make a home market for everything without any middlemen or the tax of transportation. If our State will have good roads and game in her forests and fish in her waters she will receive more real benefit than from 1,000,000 operatives in her factories, and will preserve her homogeneous people, who have given her the character and peace she has so long enjoyed."

Gov. Woodbury spoke in the same vein at the banquet in the evening, when he responded to the toast "Vermont," referring to the work of the League as "the leaven of the State" in their line of improvement. He said that the work of the League is of great moment in furthering the fish and game interests, and that the Legislature, while not in sympathy with sporting interests, perhaps, were gracious enough to see the good effects of bringing people to our State, and therefore were willing to help the League in all reasonable ways.

Senator Barber, responding for the committee on game and fisheries, said that the success of the League was greatly due to the interest taken by Mr. Titcomb. In conclusion he asked that he be retained as Fish Commissioner. The request was greeted with loud and long applause.

Gen. W. W. Henry responded to the toast, "The Fish and Game League." A. H. Nelson, of St. Johnsbury, responded to the toast "Recreation," dwelling particularly upon the delights of fox hunting.

W. W. Grout spoke on "Good Work." The association in doing its best work, he said, was greatly hindered by vast amounts of sawdust and shavings in the streams. He could not see why the farmers did not recognize this and put a stop to the nuisance, as it would be a great benefit to the farmers at large. He thought the farmers should be induced to join the League so that they might better realize the importance of the work.

"Fish and Game Culture as Related to the Material Prosperity of New Hampshire," was the subject taken by Mr. C. F. Rowell, of Keene, N. H., who spoke of the attractive waters of his State that have been stocked, and told how the cottages had sprung up around them wherever the fish had grown large enough to afford sport, and of the increased income of the State occasioned by the fish and game interest. Others who spoke were George M. Powers, M. C. Washburn and John W. Titcomb.

## The Kennel.

### FIXTURES.

DOG SHOWS.

1895.

Feb. 19 to 22.—Westminster Kennel Clu s nineteenth annual show, at New York. James Mortimer, Supt.
Feb. 26 to March 1.—Mascoutah Kennel Club, at Chicago. J. L. Lincoln, Sec'y.
March 5 to 8.—Western Kennel Club Co., at Denver, Col. E. T. Welant, Sec'y.

FIELD TRIALS.

Jan. 14.—Pacific Coast Field Trials Club, at Salinas, Cal.
Jan. 21.—United States Field Trials Club's Trials B, at West Point, Miss. P. T. Madison, Indianapolis, Sec'y.
Feb. 5.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y, Marietta, Ga.
Sept. 10.—Manitoba Field Trials, at Morris, Man. John Woolton, Manitou, Sec'y.

### Hamilton Dog Show.

THE local show at Hamilton, Ont., Nov. 24, was a success financially and in regard to the quality of many of the exhibits. A number of Toronto exhibitors took down dogs for exhibition only, just to show the dogmen of the Ambitious City that Toronto can win blue ribbons when it wishes. A. A. Macdonald had his fox-terriers King Pin and Dark Eye, and others in this company were H. B. Donovan, J. O. Bennet, James Denny, W. P. Frazier, W. L. Crawford and Geo. Bell. The show was held in the Drill Hall, and with 285 entries there were 265 dogs benched. Mr. W. J. Tulk, Jr., was acting secretary, and with the committee worked hard to have everything in good order, and succeeded. The show was confined to dogs owned in Hamilton.

The members of the committee did not enter their dogs for competition, though some of the best dogs in Hamilton are owned by them. The Terra Cotta Kennels made an excellent display with their Russian wolfhounds, now in much better condition than when shown in September. Dr. Griffin had his crack team of bull-terriers, among them being Principio and Kathleen Mavourneen.
